HATCH TELLS ABOUT FARM BUREAU PLANT IN STARK COUNTY

(Continued from page 1)

thorns off the cactus. And he produced a combination plant that grew spuds on its roots and tomatoes on its top.

"Science has taught us many lessons about the requirements for good plant growth. As a result of the Smith-Lever Act passed by Congress in 1912, leaders of advanced thought in agriculture in DeKalb and Kankakee counties produced another combination plant. The seed was sown in all parts of these counties and soon other counties took up the work until now some two thousand counties in our United States are growing and ripening the fruits of this plant, which in time was called the Farm Bureau. Its tremendous growth has extended its main roots into every state in the Union. Its enormous and sturdy trunk, the American Farm Bureau Federation, is spreading its protecting foliage over all humanity.

Tubers Represent Activities

"The tubers upon the roots represent the county and state activities; the foliage represents projects under a given activity, county, state and national.

"It was soon discovered that our great plant did not thrive in some particular localities and the men most interested in its success began to study this Farm Bureau plant. They found it to be in the legume family. And legumes, we know, do not thrive in acid soils. They found that the most successful and vigorous growth was in sections where there had been community activity.

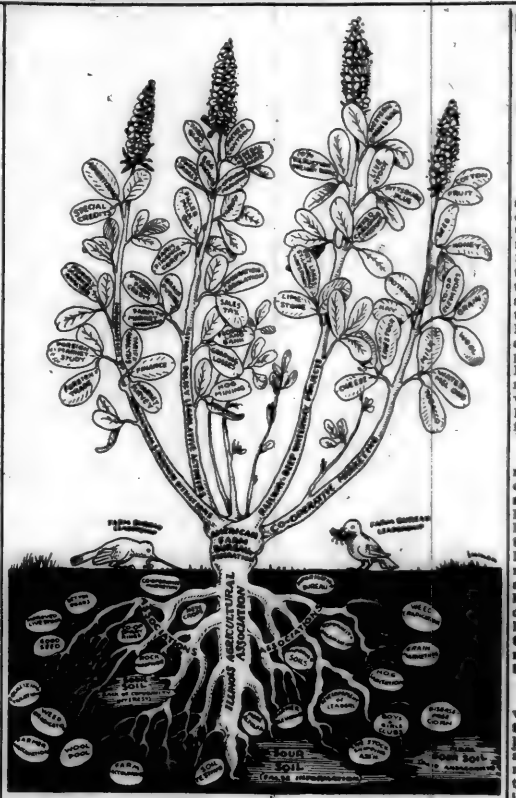
Farm Bureau Parasites

"This plant, like all plant growth, is subject to attack of parasites; some working alone, others in groups and each preying upon the activity most suited to its taste. This is our plant and we can cultivate and train it to produce fruit of untold good to present and future generations. We must spray with truths to counteract the parasites and keep the minds of our members sweetened by active community work. It has been my observation in organization work that this picture holds true. In localities where community work has been active our Farm Bureau has thrived with profit and pleasure to its members.

"Leading in a community is something like running a large farm. With plenty of efficient help the crops can be taken care of easily; but if help is scarce, weeds will grow and parasites can get in their deadly work.

Sowed Good Seed

"Our own community began sweetening and inoculating its soils some fifteen years ago when our first Farmers' Institute was started. It sowed the seed of desire for further advancement in agriculture, and out of this sprang our Alfalfa Growers' Association and our Experimental Farm, which have resulted in soil improvement and the production of tons of alfalfa in the vicinity of Kewanee.



"Our Round Table meetings, fostered by Professor Hamilton and myself with other help, were held in country school houses. These meetings brought out many valuable thoughts and discussions. Out of all this came the desire to try out the new plant, the Farm Bureau, which in due time was organized in Henry county and a short time later in Stark county.

Counties Well Organized

"Both counties organized into community Farm Bureaus. I happen to be president of the local Farm Bureau and a board of nine directors work with me. The rest of the county is organized in this way. In Stark county there are several active community clubs centering around rural churches. So you see the soils were ready to produce whenever adequate cultivation was made to grow better community life.

"There is no question in our minds as to the value of our organization to agriculture, but you are wanting to know just what we are doing to get this across to our neighbors and associates.

"We have no set schedule of meetings and no set program. We decided a few years ago that the place for these meetings was the lawn of some prominent member's home. We agreed that 'all work and no play made Jack a dull boy,' and we believed the little girl was right who, when asked by her grammar teacher to define man, said, 'A little boy grown up.' Accordingly, our programs have included some play along with the serious facts brought out.

Mr. Hatch's legume, which illustrates the value of good, friendly, neighborly communities and the farm bureau.

Come Miles For Picnic

"Our programs vary, but I will try to describe some of them. In 1922 we held seven meetings in the two communities under our jurisdiction. The first one was held on the lawn at the home of a farm bureau member. His desire to have all his friends enjoy a good time at his place stimulated him to put forth a great deal of personal effort. We called twelve or fifteen men at different points and urged them to ask people to come to this Farm Bureau meeting. Cards were mailed to some, a detailed account of the plans was published in the local paper ten days before the meeting, and later the program was announced through the same channel. All this got it before the people. Then a good account of the affair as published in the local paper made splendid advertising for the next meeting, which had already been planned and announced. The farmers and their families began coming before five o'clock and the program of fun, games, music, readings, speeches and moving pictures continued until ten o'clock.

Study Aims of Farm Bureau

"About the same procedure was followed at each meeting, but always with different subjects for discussion. A great many people followed these meetings through. It gave us the chance to get over the work and aims of the Farm Bureau.

"Last year we held one of these meetings at my farm during July and close to a thousand people attended. They came from four different counties, some driving as far as thirty miles. Our program started at five o'clock with horseshoe games for the men and volley ball for the women. At half past six the women folks spread the basket suppers and everyone stopped their games to eat, some in cafeteria style, others in family groups. They met old friends and made new ones until eight o'clock, when the program began. There was singing by a local quartette and a soloist, music selections by local saxophone talent, readings by a little girl from our school and an address by our city editor, who put his personal influence, as well as that of his paper, back of the Farm Bureau. Then came the movies, a comic and 'The Yoke of Age.' The program was a little too long, but several hundred people stayed until it was completed. They all enjoyed it and wanted another one this year, which we will have on June 20.

Everyone Works

"The point we want to make is to have the Farm Bureau a leading organization in the community. A little help by many hands makes the things come easy. What we must do is develop local leaders and confidence in these leaders, and it can be done by stimulating a desire among young folks to take part in such programs. Readings along Farm Bureau lines should be provided. I would suggest such subjects as, 'Signing up Dad,' 'Ma's Trouble with a Sitting Hen,' 'Johnnie Feeding the Prize Pig,' 'Alfalfa and the Picnic,' and any others which can be made funny and at the same time carry a moral.

"We believe that we should be closer to so-called business men, that is, we should know their problems as well as make known to them our problems. So we invite our town folks, bankers, lawyers, doctors, and merchants to our meetings. This gives them an opportunity to learn the vital points of our movement. A good live time is our motto. A chairman who can keep things moving is half the battle.

C. of C. Helps

"Some time ago we held a farmer-banker meeting in Stark and Henry counties with farmers and bankers in the ratio of two to one, with each bank represented by one man. We had a supper, a good address by Geo. A. Fox, executive secretary of the Illinois Agricultural Association, some music and a discussion of farm questions by farmers and bankers. We believe we sold to the bankers the high ideals of the Farm Bureau leaders that evening and it has been worth a lot to us. The banker, editor and minister are three city men who must cooperate with the Farm Bureau.

"The Chamber of Commerce returned the favor by promoting and paying the expenses of a tri-county picnic at Kewanee last September. Farmers and town folks alike were there and took part in the games and entertainment features. J. R. Howard spoke to the crowd of 5,000 people who stayed throughout the day in spite of a drizzling rain. Had the weather been favorable I think there would have been 20,000 people there.

"That is the way we see our Farm Bureau plant here at Kewanee. It is a legume that we can cultivate so that it will produce the kind of fruits we want it to produce. We think we have gone a long way in our county and local community toward sweetening the soil for this plant, the FARM BUREAU."

HERE'S WHAT EXECUTIVE COMMITTEE ACCOMPLISHED AT ITS JUNE MEETING

June 6 is the date of the last executive committee meeting. Following are actions taken and problems discussed:

1. Heard progress report on the new auditing service corporation, the "Illinois Agricultural Cooperatives Association" and passed resolution endorsing all work done on it and also nominated Geo. A. Fox as recording secretary and R. A. Cowles as treasurer in accordance with the by-laws of the new incorporation.

2. Heard and sanctioned financial report.

3. Dean H. W. Mumford, College of Agriculture, University of Illinois, explained the program of work being carried on by the Extension Service, Experiment Station and College of Agriculture.

4. The following resolution was presented and passed unanimously:

"The Illinois Agricultural Association is proud of the stand it has taken on the McNary-Haugen Bill and offers no apology for its course in the recent campaign in behalf of the Bill.

"**RESOLVED:** That we commend the work of our officials who so efficiently conducted the campaign for the McNary-Haugen Bill and the hearty support given by the County Farm Bureaus to their State Association in this fight.

"**BE IT FURTHER RESOLVED:** That we continue our efforts and unite with other farm organizations in a determined effort to secure some kind of agricultural relief that will place this basic industry on a parity with other industries of this country."

We view with alarm the fact that the 68th Congress, after acknowledging agriculture as the basic industry of this country and also acknowledging that a real emergency exists in this industry, failed to enact any agricultural relief legislation.

We therefore call upon all who are interested in agriculture and the future prosperity of this country to study the vote as registered for and against the farm relief measure of the present Congress with a view toward supporting men who will pledge themselves to principles that will restore the value of the agricultural dollar so that the standards of living of those engaged in agricultural pursuits be comparable with those enjoyed by labor and industry.

"**BE IT FURTHER RESOLVED:** That we commend the action of all the members of the 68th Congress who supported the principles advocated by our farm organizations and especially those of our own State."

5. Heard reports from organization and poultry and egg marketing departments.

MINIMUM WEIGHT RULING WILL SAVE SHIPPERS' MONEY

Decision of Illinois Commerce Commission Reduces Possibility of Injury to Stock

Illinois farmers and livestock shippers will benefit by a recent decision of the Illinois Commerce Commission reducing the minimum weight on hogs in standard 36 foot cars from 17,000 pounds to 16,500 pounds on intrastate traffic. This decision is the result of a complaint filed by the transportation department of the Illinois Agricultural Association against the railroads which transport livestock between points in Illinois and the commerce commission has ordered the 63 railway companies involved to adhere to this new ruling on or before July 1, 1924.

Avoid Injury to Stock

It has been the rule of railroads in Illinois to charge freight on hogs and mixed livestock on a minimum weight basis regardless as to actual weight of the livestock transported, according to L. J. Quasey, director of the I. A. A. transportation department, who filed the complaint, and this practice has worked a hardship on the farmer who ships during hot weather when overloading in order to load up to the minimum weight requirement results in injury or death to stock.

Lowers Minimum Weight

The new ruling on minimum weight will also be of advantage to shippers of mixed carloads of livestock, especially on calves and hogs where the hog minimum and hog rate is applied, as this makes 500 pounds difference in the rate. With the minimum weight now set at 16,500 pounds the shipper can load lighter without paying any excess freight. Some adjustment has also been made on cars over the standard 36 foot length but the most significant change is on the standard car. The saving under the new ruling will be approximately a dollar per car.

Producers Equipped To Handle Orders For Feeder Cattle

"Farm bureau members who feed cattle should bear in mind that there is a Producers Commission Association operating in the Kansas City market," says C. A. Stewart, director of livestock marketing of the I. A. A until July 1 and newly appointed secretary of the National Livestock Producers Association, "and when buying feeder cattle remember that this organization is well equipped to handle orders for all classes of feeding stock and any order which is placed with them will be given the best attention."

"In addition, by purchasing your feeders through them, you are assisting in developing livestock marketing work. If you happen to be in that market in person, call on the Producers and get acquainted. If Kansas City is a market which you patronize for feeder cattle and you cannot find the time to visit the market, do not hesitate to place an order with the Producers by mail."

TALKS, DISCUSSIONS, MUSIC AND DINNER FEATURE MEETING

Sixty-five Farmers And Business Men Attend Champaign Conference To Consider Problems.

Sixty-five farm bureau representatives and business men from the counties of Champaign, Macon, De Witt, Piatt, Moultrie, Douglas, Coles and Shelby, constituting the 19th Congressional District of which J. L. Whisnand, Charleston, is executive committeeman, met at the Inman hotel in Champaign, June 14, for a regularly scheduled meeting. Short talks were made in the morning session by V. Vaniman, of the Illinois Agricultural Association and John C. Watson, taxation specialist of the I. A. A.

Give Business Advice

Mr. Vaniman explained the auditing, accounting and business advisory service of the newly incorporated Illinois Agricultural Cooperatives Association, showing that the purpose of this new association is not to spy and check up on the managers of cooperative concerns but is rather to give sound business advice, provide against mistakes and mismanagement and furnish information on a cooperative basis. He outlined the development of all business dividing its growth into the three stages of promotion or organization, the stage of efficiency or improvement of business and the final stage in which business firms unite to solve their problems cooperatively. Mr. Vaniman reminded the farm bureau members that big business firms have long ago reached the third stage in this business development while farmers' cooperatives have been content to stand by and look upon cooperative auditing and accounting with aloofness.

The Illinois Agricultural Cooperatives Association is designed to prevent bankruptcy of cooperatives in this state and although it was instituted chiefly by the Illinois Agricultural Association, it is now incorporated under the laws of the state and is independent of the I. A. A. Mr. Vaniman expressed the opinion that the auditing service will put farmer-owned cooperatives five to ten years ahead of what they would otherwise have been.

Watson Explains Taxes

J. C. Watson made a short talk on the tax situation in Illinois both at present and in the future. He offered the income tax as the solution to the problem of taxing intangible property. "The first thing that should be done is to secure an equalization of the tax burden," said Mr. Watson, "giving the farmer, the laboring class and the home owners, both in the city and in the village, a fairer tax law." He showed how an unjust tax situation has existed and does now exist because a large amount of personal property is not at present taxed due to the fact that it is intangible. "Diamonds and musical instruments are good examples of intangible property," said Mr. Watson. He answered questions put to him by the farmers present and predicted that Illinois tax-payers would pay higher taxes before they ultimately become lower.

Talks Farm Legislation

D. J. Holterman, of the 19th district, made a short comment upon matters of farmer legislation taking issue with the statement that agricultural interests cannot be helped by legislation and the establishment of an agricultural policy. "The big trouble with us farmers is that we haven't gone after legislation which we wanted," stated Mr. Holterman. "It is not our idea to promote unfair legislation but simply to get a square deal in legislative matters."

A farm bureau dinner at the hotel followed the morning meeting. Group singing, led by Lloyd Lamkins of Champaign, was a prominent feature of the dinner hour.

At the afternoon meeting Mr. George W. Willett, principal of the Lyons township high school at La Grange and who is directing the I. A. A. school survey, spoke on, "The Farmers' Side of the Rural School Question." He pointed out that rural schools have been too much adapted to city conditions instead of rural life. "The biggest mistake in our rural school system," said Mr. Willett, "is that we have tried to put too many newfangled ideas into our rural schools instead of developing the natural advantages that already exist there."

Make School Survey

Under Mr. Willett's direction a rural school survey, which was sponsored by the educational committee of the I. A. A., is being made with the idea of getting definite information which will be helpful in enacting school laws at the coming legislature that will be more beneficial to farmers and their children.

Following Mr. Willett's talk, Fred Jorgenson, manager of the Pioneer Creamery Company at Champaign, reviewed the egg-marketing situation during the last decade, presenting the problems of buying and handling eggs. He expressed the opinion that consumers are now getting far better eggs than they did several years ago, due chiefly to egg-candling laws and cold storage facilities.

Several five minute reports were made by representatives from the various counties outlining the activities of the local farm bureaus. The next conference of the 19th district will be held at Decatur some time in September.

Pass Resolutions

The following resolutions designed to help solve serious marketing problems were presented by D. J. Holterman of Sadorus and passed on by the meeting: To the Nineteenth Congressional District of Illinois, Farm Bureau Conference.

Gentlemen:- Whereas, The farmers of this country as time goes on and their financial condition grows steadily worse, in recognizing the value of business cooperation and the necessity of owning and controling their own marketing systems, and

Whereas, the attempts to establish a national farmer-owned grain marketing system in the past, have not been successful, more for lack of cooperation of our different farmers' organizations, than to either plan or principal, Therefore be it

Resolved: That this meeting request the Illinois Agricultural Association to use its best efforts and influence to cause the assembling of a national conference of representatives of our farmers' organizations whose membership is interested in the production of small grain such as wheat, rye, oats, barley, flax, and soy beans, for market, for the purpose of bringing out and establishing a farmer-owned and controled marketing system for small grain, and further be it

Resolved: That this meeting request the Illinois Agricultural Association to use its efforts and influence to secure the assembling of a national conference of representatives of all farmers' organizations whose membership is engaged with the production of corn for market, for the purpose of creating a farmer-owned and controled marketing system for corn, and further be it

Resolved: That a copy of these resolutions be sent to the Illinois Agricultural Association requesting action at the earliest possible date.

Following is a list of those who attended the meeting:

Chas. Mittendorf, Lawrence McConnell, A. R. Grimdley, J. A. Hosack, Mr. and Mrs. L. E. Lamkins, Lloyd Lamkins, F. A. Jorgenson, all of Champaign; F. A. Gougler, I. A. A., J. T. Smith, F. W. Jordan, Urbana; J. C. Watson, I. A. A., Chicago; E. E. Charles, I. A. A., Chicago; C. C. Burns, farm adviser, Champaign county; Wm. Blue, Mahomet; Wm. Odell, D. J. Holterman, Sadorus; J. N. Caslet, L. K. Irwin, F. W. Garrett, Tuscola; L. W. Graham, Hindsboro; Chas. L. Meharry, Attica, Ind.; G. A. Smith, Seymour; J. L. Whisnand, Charleston; C. B. Althaus, Gr. ve, Willett, La Grange; E. G. Theim, Prairie Farmer, Chicago; W. E. Riegel, Tolono; G. E. Ewing, Arcola; Chas. McDonald, Hindsboro; S. S. Davis, farm adviser, Monticello; O. M. Allyn, Edwin Blue, C. W. Thorpe, Clinton; Chas. J. Robinson, Shelbyville; Henry M. Dunlap, Savoy; M. E. Wise, Cerro Gordo; T. W. Lamb, Bement; M. I. Goken, Lane; D. M. Black, Kenney; C. D. Raves, Webona; W. Z. Black, St. Joseph; E. F. Webster, Rantoul; F. E. Jackson, Fisher; E. P. Imbodoila, Decatur; Henry Shafer, Illiopolis.

Ground hogs have become such a menace in Stephenson county that the farm bureau is conducting a county-wide ground hog extermination campaign. J. Fred Smith, a Stephenson county farmer who has waged an incessant war against the pests, has offered a prize of $35.00 to the boy who makes the most catches by September 1.

Hundreds of little slum kiddies like this one are hoping that some good hearted farm bureau member will take them into the country for a two weeks outing. Hot weather will soon be upon us; give these poor children an opportunity to see what God made for His people—the great out-of-doors. Many of them don't know a cow from a horse; they're lots of fun, too. The children are being sent out in groups of one dozen or more to distances within a 200-mile radius of Chicago. Write today — do a good turn. You'll enjoy their outing, too!

REPUBLICANS CUT AND POLISH PLANK AT G.O.P. MEETING

(Continued from page 1)

"We favor adequate tariff protection to such of our agricultural products as are threatened by foreign competition.

"We favor, without putting the government into business, the establishment of a federal system of organization for cooperative marketing of farm products."

The latter goes somewhat further in the matter of federal assistance in cooperative marketing than the farmers requested, since they confined their request to "the active aid of all of the government departments having to do with agricultural production, particularly the Department of Agriculture which should include a branch devoted to cooperative marketing that is in keeping with the needs and importance of this work."

Federal Aid For Roads

The farmers were assured of the continuance of federal aid in the building of farm-to-market highways as provided in the "seven per cent system" enacted in 1921. Likewise the party pledged itself on the railroad problem in conformance with the Federation's tentative plank. "We favor a careful and scientific readjustment of railroad rate schedules," says the platform, "with a view to the encouragement of agriculture and basic industries, without impairment of railroad service." The request for a plank asking for a speedy completion of the valuation of the railroads so the Interstate Commerce Commission may have a more intelligent basis for determining rates was ignored. However, the platform, if weak in that particular, can be tread upon safely by the agriculturists when it comes to merchant marine and the development of waterways. After endorsing the merchant marine and the sale of government-owned ships when propitious, it neglected to advocate a method of making the merchant marine profitable. The farmers told the platform carpenters that we need more freight and passengers on our incoming ships and that an inducement to our business men to designate our flag ships should be held out in the form of a treasury certificate, based on the freight charge on incoming commodities. They also advocated reduction through rail and water rates.

Approve Reclamation Projects

The convention approved the study of the reclamation projects made by the committee appointed by the Interior Department for the purpose of relieving the distress among the farmers on these projects and putting the whole reclamation work on a business basis.

An effort was made on the part of the farmers to get the party to recognize the need for a general plan of comprehensive waterpower development, based upon the conservation of our water resources by storage developments where feasible, thus increasing the country's waterpower from 56,000,000 to 200,000,000 horsepower or more. Such a plan, they maintained, should take into consideration the need for the development of air nitrates for war and for fertilizer, and power should be reserved for the purpose. Muscle Shoals was suggested as an outstanding opportunity to inaugurate such a policy, and the plank makers were told that this plan should be followed in the disposition of the property. The platform, however, merely lauds the waterpower.

Start Baseball In Galesburg District

Another farm bureau baseball league has been organized in the Galesburg district with six member teams from Bureau, Warren, Knox, Stark, Whiteside and Marshall-Putnam county farm bureaus. Representatives from the farm bureaus in this district met at Princeton recently and made arrangements for farm bureau baseball games this summer. G. E. Metzger, organization director of the Illinois Agricultural Association, outlined the plan by which all farm bureau district leagues in the state are governed.

According to the schedule of games drafted at the meeting every team in the district plays one game with each of the other teams. The champions of the district will be eligible for the state farm bureau baseball tournament to be played at the annual I. A. A. picnic at Lincoln, August 26.

The Springfield district league with teams from Cass, Macoupin, Sangamon, Logan, Menard, Morgan, Mason and Tazewell counties, was the first to organize with a definite playing schedule. Local farm bureau teams in Kendall county are also playing on a fixed schedule with the intention of developing a county team to enter the final tournament at the Lincoln picnic.

Farmers Will Get Fair Shake, Says Fox to Advisers

"We are proud of the stand we have taken on the McNary-Haugen bill," said Geo. H. Fox, executive secretary of the Illinois Agricultural Association, when he spoke to the farm advisers in their annual conference at the University of Illinois, June 10, 11 and 12. "Agriculture is not getting a fair shake with other industries, and the Illinois Agricultural Association is here to see that the farmer gets his due consideration."

Continuing, Mr. Fox told of the fine fight made by organized farmers, especially in Illinois, for the McNary-Haugen bill and that even though the bill lost, the efforts put forth had not gone in vain. He said that no definite action had been mapped out for the future excepting that a general conference of all farm organizations has been called at St. Paul and that the Illinois Agricultural Association would be represented. Mr. Fox touched lightly upon the numerous projects underway by the various departments of the I. A. A.

Mason County Beats Cass In Baseball

Baseball continues to occupy a position of importance in the Springfield district. The Mason county team defeated Cass county in a loosely played game last Saturday. Both teams hit frequently but Mason county batters garnered their hits at opportune times and scored a total of 12 runs on 14 hits. Cass batters were able to hit consistently but their safeties were scattered. Errors by Cass county players were responsible for several Mason county scores.

The contest with Cass county is the first of the season for Mason county. They have a bunch of hard hitters and reports indicate that they will develop into strong contenders for the state championship. Following is a summary of the game:

WILLETT TO MAKE EXTENSIVE SURVEY OF SCHOOL PROBLEMS

Will Conduct Investigation in Illinois and Other States. Althaus Secured as Research Assistant

The investigation of rural school problems, instigated by the Educational Committee of the I. A. A. in cooperation with the Illinois State Educational Committee is progressing rapidly under the direction of George W. Willett, principal of the Lyons township high school at La Grange, who was secured to superintend the investigation. Anticipating the passage of school laws at the coming legislature, it is the aim of the Educational committee of the I. A. A. to obtain facts directly from educators throughout the state and from farmers so that any changes that may be made in the management of rural schools may be made consistent with the wishes of the farmers and their children, in so far as they are affected.

Send Out 10,000 Letters

Responses exceeding all expectations have been received from 400 letters sent out to school principals and superintendents asking questions which will give Mr. Willett important facts and information upon which to base conclusions regarding the actual conditions of rural schools over the state.

Ten thousand letters each embodying some 40 definite questions have been sent out to farmer tax-payers of the state, the results of which are expected to furnish detailed information on taxes and assessed valuation of farm lands. The aim of the investigation is to combine the best judgment of farmers with that of teachers in the state toward securing legislation which will improve existing school conditions by giving the rural districts better schools in return for the taxes paid for their upkeep.

Get Farmers' Viewpoint

During the summer Mr. Willett will be in Michigan and other states making a study of similar educational problems in those states and gathering information which will aid in solving the problems of Illinois. C. B. Althaus, of La Grange has been secured as field man to help in the survey. He will go through the school records in various counties of the state classifying the results both good and bad, of school practices used in the past. The questionery sent to farmers calls for complete facts regarding the tax situation as well as for the farmer's personal viewpoint upon pressing school problems.

That the survey being made by the Educational Committees is attracting widespread attention is shown by the large number of replies to letters sent out and by the interest taken in the subject recently when Mr. Willett outlined his program of investigation before the 19th congressional district conference at Champaign.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday, July 5, 1924 | Number 13

DEMOCRATS PLEDGE PLANK DEMANDED BY ORGANIZED FARMERS

Bradfute and Silver Represent A.F.B.F. at Big Convention; Cowles' Presence Requested

The Democrats pledged themselves to adopt an international policy of cooperation to re-establish the farmers' export market; to adjust the tariff so that the farmer can buy again in a competitive manufacturers market; to readjust and lower rail and water rates to make the farmers' market national and international instead of regional and local; to bring about the early completion of internal waterway systems for transportation and to develop our water-power for cheaper fertilizer for use on our farms; **and to establish an export marketing corporation or commission in order that the exportable surplus may not establish the price of the whole crop** last week at their New York convention.

Adopts A. F. B. F. Plank

O. E. Bradfute and Gray Silver, the American Farm Bureau Federation president and the Washington representative, were delegated by the A. F. B. F. executive committee to present the demands of organized agriculturalists to the Democrats. The plank submitted by these representatives was adopted almost verbatim according to R. A. Cowles, treasurer of the Illinois Agricultural Association and its special representative at Washington during the recent McNary-Haugen bill battle who was requested to attend the convention by Democrat friends of agriculture and who helped while there to draw up the organized agricultural plank which was adopted.

The full text of the Democratic agricultural plank appears on page 2.

1200 Attend Elmira Farm Bureau Picnic

The farm bureau in Elmira township, Stark county, held its annual community picnic June 20 at Roselawn Farm, the home of O. L. Hatch, pioneer in farm bureau work in Illinois. Twelve hundred farmers and business men and their families from Kewanee and surrounding territory turned out for the picnic. This was a record crowd for the Elmira farm bureau picnic. Last year between five and six hundred attended.

During the late afternoon and early evening volley ball, horse shoe games and general farm gossip were the most popular sports. Interest in the horse shoe contests in preparation for the state tournament at the I. A. A. picnic in Lincoln, August 26, was running high among farmers from Stark, Henry and Bureau counties.

A basket supper under the big trees of the Hatch lawn followed the athletic contests. Talks, music and readings of particular interest to the farm bureau members and a five reel comedy movie put on by Stark county Farm Adviser, E. E. Brown, completed the program.

I.A.A. Will Award Trophy to Winner Of Loading Contest

The transportation department of the Illinois Agricultural Association in cooperation with the National Livestock Producers Association has instituted a safety loading contest between farmers' shipping associations which ship to the terminal agencies of the Producers. The I. A. A. will offer a trophy to the shipping association which sustains the least loss on the basis of volume of business to any of the Producers commission companies. The Producers association is conducting a similar contest between its patrons.

The purpose of the contests, according to L. J. Quasey, director of the I. A. A. transportation department, is to stimulate careful loading and handling of livestock, especially during hot weather. The railroads of Illinois will be asked to cooperate toward better handling of livestock enroute to market.

The contest being started by the Illinois Agricultural Association will be confined to shipping associations within the state of Illinois. The producers' contest, and a trophy which they will award, will be entirely separate from the I. A. A. contest, but will be governed by similar regulations.

Following are the terms and conditions under which the associations will operate in the I. A. A. contest:

1. The contest will cover only shipments to the Producers between July 1 and December 31, 1924.

2. A minimum of 20 cars for the six months period will be required to qualify a shipping association for the contest. (This means a total of 20 cars to any one or more of the Producers commission companies.)

3. Shipping associations will not be required to keep any records in connection with the contest. Such records as are necessary will be kept by the terminal agencies of the Producers commission companies and the department of transportation of the Illinois Agricultural Association.

4. The rating will be on the basis of percentage of loss or damage of the net value of the shipment.

5. The progress of the contest will be announced from time to time through the I. A. A. Record and other publications.

The Kansas Cooperative Wheat Growers pool has just completed its second year of business with highly satisfactory results. Farmers who pooled their wheat with the association report gains of from 9 to 17 cents per bushel over the price they would have received by selling individually.

Announcement coming from Berlin indicates that a German scientist has discovered the hoof and mouth bacillus. Confirmatory tests have not been made but various authorities are enthusiastic about the discovery.

The chinch bug is making a serious assault upon the winter wheat crop in southeastern Iowa.

DRUMMING UP VOTES

Farmers' Union Organizer Claims I.A.A. Indorsed It

The report got out in Danville and that vicinity that the Vermilion County Farm Bureau and the Illinois Agricultural Association had endorsed the Farmers' National Union of America. The source of the rumor was in a statement by a Mr. R. P. Adler, a representative of the Farmers' Union, which was recorded in a newspaper story published June 15 in Danville concerning a Farmers' Union meeting to be held in Danville.

In the article Mr. Adler was recorded as saying that "the new organization (meaning the Farmers' Union) in no way conflicts or competes with other farmers' organizations such as the Farm Bureau or the Illinois Agricultural Association. **It has the indorsement of both these organizations.**"

The Illinois Agricultural Association has never indorsed the Farmers' Union. Following is a statement sent to the newspapers by the Vermilion County Farm Bureau and R. A. Cowles, I. A. A. treasurer, who happened to be in Vermilion county at the time:

"On account of confusion in the minds of many farmers in regard to the new organization which held a meeting in Danville, June 21, under the name of the Farmers' National Union of America and due to the statements which appeared in some newspapers of the county which have led some of our members to believe that the Farm Bureau and the Illinois Agricultural Association had indorsed this new organization, we feel it necessary at this time to issue the following statement:

"The new organization does not have the indorsement of the Vermilion County Farm Bureau or the Illinois Agricultural Association nor has it asked for indorsement to our knowledge. It is a separate and distinct organization and its plans, purposes and leadership have not been discussed by them with us."

Milk Producers at Sandwich Organize Selling Association

Seventy-five milk producers at Sandwich, DeKalb county, met June 25 with A. D. Lynch, dairy-marketing specialist of the I. A. A., to discuss milk marketing questions. A contract was drawn up whereby the producer may sell his milk at a price previously agreed to by the buyer. The price of 92 score butter and the cash corn market enters into the price which is to be named for milk in advance.

Heretofore the producers have never had a stabilized market and have never been able to make any definite calculations on what to expect for their milk. They have organized with the hope of avoiding this difficulty hereafter.

The organization has recently applied for a charter and permanent officers will be elected soon. A milk marketing sales committee was appointed at the meeting in Sandwich to act for the organization. T. H. Roberts, farm adviser of DeKalb County Farm Bureau, is ex officio member of this standing committee.

THOMPSON SENSES GOOD AND BAD IN GRAIN MERGE PLAN

I.A.A. President on Committee To Consider $25,000,000 Sale to Farmers; Wants Farmers to Control

Farmers who follow the news of the realm know that in the last few years, particularly the last few months, wherever cooperatively minded men happened to gather, grain marketing with its thousand and one angles which convert into a half dozen fundamentals, has taken the front of the stage and held its audience in hope, tears, laughter and chagrin at various intervals.

At several I. A. A. district meetings held so far this year, grain marketing, its sore thumb failures in the past, its apparent possibilities in the present, and its necessity in the future, has been brought to the attention of officials of the Illinois Agricultural Association.

Purpose Sale

Now comes a proposal from four of the largest old line commission companies in Chicago to place their entire organizations, representing about 70 per cent of the terminal facilities for handling grain in the United States, under the control of farmers for a consideration of approximately $25,000,000. The proposal was presented to the American Farm Bureau Federation at its regular quarterly meeting the middle of June and is to be presented to all other agricultural organizations interested.

The American Farm Bureau Federation executive committee, of which President Sam H. Thompson is a member, authorized O. E. Bradfute, president of the American Farm Bureau Federation, to appoint a committee with himself as chairman, to investigate and consider from every angle the grain marketing proposal laid before them by representatives of the Armour Grain Company, the Rosenbaum Grain Company, Rosenbaum Bros. and J. C. Shaffer and Company.

The members of the committee appointed are: O. E. Bradfute, chairman; Sam H. Thompson, president of the I. A. A.; J. F. Reed, president of the Minnesota Farm Bureau Federation; Murray D. Lincoln, secretary of the Ohio Farm Bureau Federation, and Frank D. Evans, attorney for the Utah Farm Bureau Federation.

Plan Considered Before

"The plan has been under consideration for some time," said Mr. Thompson previous to the first meeting of the special committee at Chicago, "in fact, a similar proposition was up a year and a half ago. The companies which have presented this plan represent about 70 per cent of the terminal grain marketing facilities in the United States.

"We have given the representatives of these grain companies a hearing. The American Farm Bureau Federation was given first consideration by the grain men because they realized that their plan would not carry through without the approval of the A. F.

(Continued on page 3)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

The Democratic Pledge to Agriculture

During the four years of Republican government, the economic condition of the American farmer has changed from comfort to bankruptcy, with all its attendant miseries. The chief causes of this are:

(a) The Republican policy of isolation in international affairs has prevented Europe from getting back to its normal balance, and, by leaving unsolved the economic problems abroad, has driven the European city population from industrial activities to the soil in large numbers in order to earn the mere necessaries of life. This has deprived the American farmer of his normal export trade.

(b) The Republican policy of a prohibitive tariff, exemplified in the Fordney-McCumber law, which has forced the American farmer, with his export market debilitated, to buy manufactured goods at sustained high domestic levels, thereby making him the victim of the profiteer.

(c) The Republican policy of high transportation rates, both rail and water, which has made it impossible for the farmer to ship his produce to market at even a living profit.

To offset these policies and their disastrous results and to restore the farmer again to economic equality with other industrialists, we pledge ourselves:

(a) To adopt an international policy of such cooperation by direct official instead of indirect and evasive unofficial means, as will reestablish the farmer's export market by restoring the industrial balance in Europe and the normal flow of international trade with the settlement of Europe's economic problems.

(b) To adjust the tariff so that the farmer and all other classes can buy again in a competitive manufacturers' market.

(c) To readjust and lower rail and water rates, which will make our markets, both for the buyer and the seller, national and international instead of regional and local.

(d) To bring about the early completion of internal waterway systems for transportation and to develop our water-power for cheaper fertilizer and for use on our farms.

(e) To stimulate by every proper governmental activity the progress of the cooperative marketing movement and the establishment of an export marketing corporation or commission, in order that the exportable surplus may not establish the price of the whole crop.

(f) To secure for the farmer credit suitable for his needs.

(g) By the establishment of these policies and others naturally supplementary thereto, to reduce the margin between what the producer receives for his products and the consumer has to pay for his supplies, to the end that we secure an equality for agriculture.

—o—

Agriculture and the Democratic Platform

The original draft of the Democratic agricultural plank, which underwent some changes in the Resolutions Committee, was prepared in counsel with representatives of organized agriculture and others who are prominent in the party and who are acknowledged students of the agricultural situation. O. E. Bradfute, president, and Gray Silver, Washington representative, respectively, of the American Farm Bureau Federation, were present and actively participated in the conference and presented the proposed plank to the Committee. Also, Robert A. Cowles, treasurer of your Association, was present, at the request of Mr. Bernard M. Baruch.

Mr. Baruch is a staunch advocate of the principles that were embodied in the McNary-Haugen bill, recently defeated in Congress, and affirmatively supported the bill. His sympathetic and thorough understanding of the agricultural situation in this country was generally recognized in the Democratic Convention, so that the plank resulting, now submitted to the voters of the country, may be said to be constructive and fairly definite as a basis for administration and future legislation.

—o—

Chicago Producers Cut a Melon

The Chicago Producers will split their annual melon soon, returning 30 per cent of the commission charges of the last year to the shippers. Fine stuff. They report a 60 per cent growth in business over last year. The cattle department increased in activity 62 per cent; hogs 70 per cent and sheep, a newly created department, increased 200 per cent. Fine stuff.

On one of the recent Illinois days the Chicago Producers handled 12 per cent of the yard run—but that's not unusual for them. Fine stuff. The Producers handled 85 cars that day and the nearest old line firm handled 28. Fine stuff. There are over 100 others competing.

Illinois farmers will get 52 per cent of the melon. Finer stuff.

—o—

Organization Wins Again

The fact that the minimum weight requirement has been reduced on hogs in standard 36 foot cars from 17,000 pounds to 16,500 pounds in interstate traffic represents a fine victory for the Illinois Agricultural Association.

This decision by the Illinois Commerce Commission is the result of a complaint filed some time ago by the transportation department and took considerable perseverence to push it through. Sixty-three railroads were ordered to comply with the new ruling.

How far would an individual farmer get if he asked the Illinois Commerce Commission to order 63 railroad companies to let him ship fewer hogs per car during hot weather? You know.

When 63,000 farmers work together with the assistance of trained specialists, results are obtained.

—o—

We Should Get Together

It's an ill wind that blows no one good, the old saying goes. And it was a strong vote that killed the McNary-Haugen bill, but though it lost, there may be a gain resulting from its defeat much more valuable to farm organizations than we realize. Agricultural organizations are about to become banded together to fight for the principle involved in the McNary-Haugen bill or some similar kind of agricultural relief. July 11 and 12 are the dates set for a conference at St. Paul of the several organizations which fought for the recently defeated measure.

If nothing else comes out of the effort put forth to put the McNary-Haugen bill across than to unite the various farmers' organizations, the time, energy and money spent will not have been in vain.

—o—

For the Fellow Who Will Not Read

Our Farm Bureau was never in a better working condition. There are more dependable men who are behind the organization now than at any previous time. We showed that in getting over 2,200 signatures in about three days' time. Over a hundred loyal men left their plows and planters to act when called. We hope that the farmers' plight is improved soon or there will be many who will become radical.

It is a disgrace that a farmer has to work 16 hours a day to make the living he is getting. There has been too much work below the ears and not enough above. It is your business to see that your indifferent neighbor does some reading, comes to meetings and asks for service. Only a few are hopeless. A farmer in Hopewell recently came in lamenting about his indifferent neighbor, saying: "An organization cannot do that fellow any more good than it can help a fence post." It is not the fellow who is like that that we have to watch. It is the one who would destroy the organization in order to again graft off his neighbor's helplessness. There is nothing as bad as "active ignorance."—Marshall-Putnam Farm Bureau.

—o—

Extra Dividends to Cass County

When John C. Watson, head of the I. A. A. department of taxation, investigated the Cass county finances and found evidences of gross irregularities, he started a log rolling which has gained momentum with every turn. Now it seems to be rolling straight toward several county officials who were connected with the finances. The official auditor hired by the Board of Supervisors of Cass county has reported his findings to the Board. It reads like a Diamond Dick novel with a dozen or so villains and Miss(ed) Cash, the hotly pursued heroine.

Probably the real hero is a collective one—the Cass County Farm Bureau. It instigated the investigation. Mr. Watson is accustomed to doing services like that, so we can't call him a hero. Anyway, Farm Bureau members in Cass county, you've got a few *extra* dividends from the Illinois Agricultural Association—and dividends have been tossed out to every person in Cass county, member or not, excepting the villains.

THE LIARS' CONTEST

A LITTLE PERSONAL BILL

Dear Mr. Editor: I have been watching with interest your liars' contest and seeing that there are no entries from Metzger or yourself I have concluded that professionals are barred.

Since the office force there has been so liberal as to donate a medal to the Champion Liar, I herewith enclose a draft for $100 to be used as a further first prize and also a five dollar bill for smokes for yourself and the rest of the force. Farming has been so profitable the past three years, crop prospects so good and the future in so bright now since Coolidge signed the McNary-Haugen bill that so small a matter as the above doesn't mean anything to the average farmer. At any rate I'll never miss the above amounts because it's part of the federal cash soldier bonus we received last year.

You fellows in the I. A. A. office might just as well take it easy for a while since the Chicago Board of Trade, other "big business" interests and such publications as the Packer are so diligently guarding the farmers' rights. It was mighty fine of the force there to refuse the six months' vacation on full pay offered by the directors, especially since all the big battles have been won and there is nothing for you to do till something new comes up. If you insist on not taking a vacation I suggest that you at least take a trip down to Muscle Shoals so that you can give us a good write-up on how the project has become such a great fertilizer producing plant. I would also like to learn just how much the Lake Erie to Mississippi waterway has saved the people of the central states.

Then after you have investigated these various points of interest I suggest that through your columns you collect a contribution from the farmers for the purpose of reimbursing such of our public officials who have been so absorbed in looking after public interests that their own affairs have suffered, such as Fall, McCray, and others, including those war contractors who lost so heavily on government contracts and who have not yet received their just dues from Mr. Dougherty's department of charity.

Hoping you all enjoy the smokes and that you find a champion liar worthy of the name, I remain, fraternally yours,

—Bill Williams, Orchard Farms, Alma, Illinois.

HERE'S ONE PUT TO RHYME

"It's in the moon you'll plant your corn,
If you want it all to grow."
That's what my neighbor said t'other morn,
A leanin' on his hoe.

Well, methinks, now I'll be bright;
So I planted an acre workin' early 'till late.
The corn came up all right,
But say, it was too darn cold to cultivate.

The stuff it grew and grew and grew
Without no 'tention at all.
It kept it up the whole summer through
'Till along in early fall.

But now it's time to shuck the stuff—
There's a thousand bushel or more.
And that's what I call downright tough,
'Cause the moon's an iceberg clear to the core.

—Lowder, Illinois R. R.

HARD TO BELIEVE THIS

Some years ago we farmed some bottom land which was undoubtedly the wettest piece of soil next Lake Michigan. Even in hot weather we never needed to carry a jug of water to the field with us. Each fellow was provided with a four foot length of one-half inch rubber tubing. When we were cultivating and wanted a drink, we'd kick the cantle off a crawfish hole, drop the hose in the hole and suck out water like a railroad locomotive.

About all we could raise was crawfish holes and frog hops. We had a five year rotation. Crawfish holes one year and frog hops the next. Well cultivated frog hops went from 25 to 30 feet to the hop but by adding a little fertilizer we were able to get some 50-foot hops.

We got to cultivating the crawfish holes and when they got big enough we'd harvest 'em and sell 'em for post holes. Post holes sell like hot dogs for about 25 cents a hole. The crawfish hole harvester which we invented was quite a curiosity in the neighborhood.—Elmer Waddell, Taylorville, Christian county, Illinois.

ONE FOURTH OF ALL FEDERAL T. B. CASH COMES TO ILLINOIS

57 Counties Now Testing; I.A.A. Directly Helpful in 47; Several Others Considering Area Testing

Editor's Note: This is the first of a series of similar articles to be written by I. A. A. departmental directors telling of the work done in each department.

B. M. H. PETERSEN,
Director, T. B. Eradication Department

One-fourth of the entire federal indemnity appropriation which is apportioned among all the states of the Union has been allotted to Illinois because Illinois farmers have demonstrated that they want their cattle tested and have gone out to get all the help they can obtain. The state has made available ample funds to take care of indemnity payments. The large packers are paying a premium of 10 cents per 100 pounds on all hogs bred and fed in a county which has been declared an accredited area, and Edgar County, Illinois, farmers, and those in 27 other counties in the United States are now getting that premium. Tuberculosis-free cattle command a higher price than untested cows. Dr. J. W. Pettit, President of the Illinois Tuberculosis Association, says, "If we will pay more attention to the prevention of tuberculosis by testing our cows and by using other preventative measures, we will have little need for sanatoriums in the future."

M. H. Petersen

Work Advanced Rapidly

That the requests of the Illinois Agricultural Association, county farm bureaus, the National Livestock Exchange and other Illinois farmers' organizations for a state appropriation of $1,000,000 dollars for tuberculosis eradication indemnities for a two year period were wisely made is best evidenced by the remarkable advance of area testing within the last two years.

When the present funds for indemnities became available there were few counties which had seriously considered the eradication of the white plague from the cattle within their borders, but with the large funds available since last July, Illinois has indeed made rapid strides in cleaning up the disease which is costing farmers of the country $40,000,000 a year.

At the time this article goes to press there are 57 of the 102 counties in Illinois which have made appropriations to be placed on the list. These counties comprise over one-half of the area of the state and boast of two-thirds of its cattle population. With this rapid growth in our testing program, Illinois has more counties doing area testing than any other state in the Union.

Backed State Laws

With the rapid expansion of tuberculosis eradication work came a demand for assistance along many lines closely associated with the actual job of testing cows. This demand your state association has tried to fill with the establishment of the T. B. Eradication Department. Numerous reports of violations of the state and federal sanitary laws have been made; and largely thru our efforts the state has stood back of its 60 day retest order, the Governor within the last 10 days having given special instructions that this order which requires a 60 day retest on all dairy and feeding cattle brought into Illinois be rigidly enforced. Our constant demand that an adequate and enforceable regulation governing the testing of cattle for feeding purposes has resulted in the issuing of order number 16, which requires that feeders be both injected and observed at quarantine until the test has been completed.

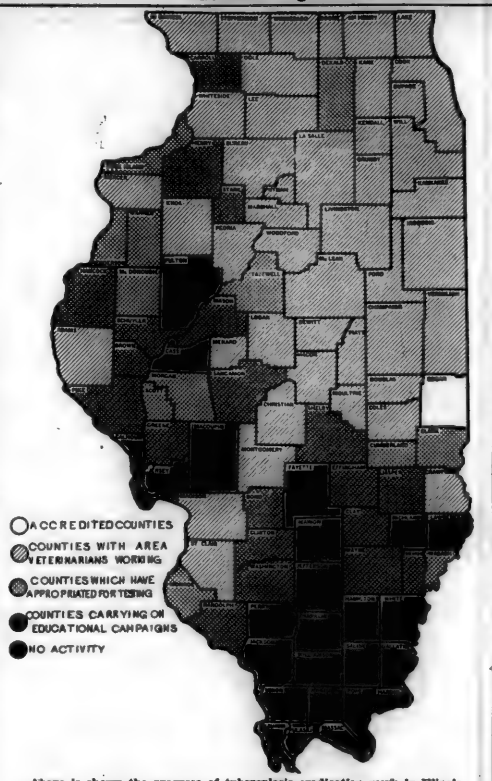
One-third of the counties in the state have been assisted in putting on educational campaigns to explain the advantages of cleaning up tuberculosis on the county area plan and secure an appropriation from their Boards of Supervisors to make this work possible; and each month brings additional recruits to the ranks of the counties which have secured appropriations to enable their farmers to have cattle tested free and obtain indemnities for those which are found to have tuberculosis.

Work in 47 Counties

That tuberculosis eradication is a subject of vital interest the length and breadth of our state is best shown by the fact that the director of this department has assisted with various phases of this work in 47 counties since the first of the year. It is perhaps a growing realization that most of the tuberculosis among people comes as a direct result of tuberculosis in cattle that causes the phrase "Get Tuberculosis Before It Gets Us" to be the slogan of an increasing number of farmers who also realise that it is the healthy animal which produces the greatest returns at the least cost.

As an increasing number of counties enter into this cooperative plan in which the federal government, our state and the counties cooperate with the farmer in cleaning up his herd the demand for tuberculosis-free cattle will naturally increase, tested cattle will bring more money than those of questionable health and untested cattle will find their market constantly shrinking. Already there is great demand for tested dairy cattle and since Illinois cannot take care of all of her own buyers this department is making arrangements with a growing number of Wisconsin breed associations which make it possible for farm bureau members whose herds are under state and federal supervision to buy tuberculin tested cattle subject to a sixty day retest with a guarantee that their money will be refunded in case a reactor is found on the retest. Farm Bureau members who have bought cattle directly from breeders under these arrangements report actual savings of from thirty to 60 dollars per head on their local prevailing prices.

Can your county satisfy some of our own Illinois farmers who wish to buy T. B. free cattle? A virgin field lies open to counties which will step forth and develop breeding centers from which the rest of Illinois can draw good cows to replenish its herds. The sale of surplus healthy cows each year from our own herds would prove a profitable sideline to the whole milk or cream producer. Which county will be the first to start on a 10 year program to develop its cattle breeding industry, and become one of the centers for good, healthy, profitable cows in Illinois? We most earnestly wish to see our Illinois farmers spend their money with their Illinois neighbors. Can we help you get your neighbor's business?



I. A. A. Ready to Help

With these facts before us and successful operation of the area test already in progress in over one-half of our counties let us take our opportunity to rid our herds of this costly disease while our city cousins and government are willing to cooperate in sharing a part of the farmers' burden.

How can the I. A. A. best serve you in this problem? The T. B. Eradication Department is at your service any time to take care of your interests and assist in the solution of your problems in the best way possible.

Dean H. W. Mumford of the College of Agriculture, University of Illinois, picked out an average day and tabulated the activities of all the farm advisers in Illinois for that day. He found that 94 advisers had 1,115 office calls, wrote 1,174 letters, distributed 11,440 circulars on various agricultural subjects, wrote 59 articles for publication, made 99 farm visits, held 40 conferences with a total of 429 farmers present, held 53 meetings with 5,153 attending and conducted 36 demonstrations.

The Seward Farm Bureau baseball team in Kendall county is leading the other seven teams in the county league with four games won and none lost.

Above is shown the progress of tuberculosis eradication work in Illinois to July 1, 1924, as shown by M. H. Petersen in the accompanying progress report of his department.

GRAIN MERGE PLAN BROUGHT TO A.F.B.F.

(Continued from page 1)

B. F., although all other farmers' organizations interested will be consulted. The committee appointed by Mr. Bradfute is to be added to later with representatives from the other farmers' organizations which are interested. This committee is to investigate every angle of the plan before taking favorable or unfavorable action. It is realized that many things could be gained, but there could also be many pitfalls.

"The price," said President Thompson, "would be settled by disinterested parties after a thorough appraisal of the property. This would be one plan, if we were truly ready for it, whereby we could immediately start to handle grain on a real, nation-wide basis. Farmers have been ready for some time for a grain marketing scheme of any worthy, practical kind. In the past, there have been too many obstacles — internal strife has probably been our biggest barrier; the inability of the leaders to get together. I would be favorable to some such plan as this providing that the control were in the membership right from the start. Who will control the company will be one of the biggest bones of contention for the committee to thrash out. The producers must have the control through their elected representatives."

Involves 5,000 Co-ops

The plan contemplates the acquisition of the mechanical and managerial facilities of four large grain concerns and 5,000 cooperative elevators and proposes that the resulting international grain marketing sales agency become grower owned, financed and controlled. After a four day discussion by the executive committee of the American Farm Bureau Federation, a resolution was adopted authorizing the president to appoint a committee to complete the study and analysis of the proposition for the purpose of determining the practicability of the producer undertaking to own the marketing facilities for grain and the practical method by which it may be successfully accomplished to the best advantage of the producer.

The proposal contemplates using the facilities of existing exchanges and operating in accordance with their established rules. The company formulated by the merger, the plan stipulates, would be at the service of state cooperative pools, elevator exchanges, farmer-owned elevators and individuals as a grain merchandising agency.

Five Adams County Co-op Associations Want Audit Service

Farmers' cooperative associations continue to subscribe to the Illinois Agricultural Cooperatives Association, according to Vernon Vaniman, who is managing the membership campaign under direction of the Illinois Agricultural Association. Farmers' elevators, county farm bureaus, livestock shipping associations and milk producers' associations are signing up to receive the auditing and accounting service offered by the cooperatives association.

At present Adams county leads in membership with the Ursa Farmers' Elevator Company, La Prairie Farmers' Elevator Company, Adams County Shipping Association, Quincy Milk Producers' Association and the Western Illinois Fruit Growers' Association using the auditing and business advisory service of the Illinois Agricultural Cooperatives Association.

Seventeen other counties have one or more organizations represented in the accounting association. At their next meeting the directors of the Adams County Farm Bureau will consider subscribing to the auditing service and indications are that they will apply for membership, thereby bringing the total number of member associations in Adams county up to six.

AUDIT SYSTEM AND TAXES DISCUSSED AT DISTRICT MEET

Farmers Say Limestone Prices Are too High; Consider Gasoline Tax and Other Problems

Threatening weather, bad roads and the busy farm season were responsible for the small attendance which marked the first meeting of the 22nd district in Greenville, June 17. Frank Potthast, president of the Bond County Farm Bureau, presided at the meeting. The present tax situation and the price farmers from this district are required to pay for the limestone they buy were the chief topics of discussion.

Speaking of the activities of Madison county, Farm Adviser, Alfred Raut, brought out the fact that there exists wide differences in the assessed valuation of city and country property and that the difference in valuation of livestock in different sections of the county is great. It is these inequalities which the farm bureau will attempt to remedy. As a result farmers have withheld one third of their real estate taxes.

B. W. Tillman, farm adviser of St. Clair county, and Paul Ewald, adviser of Monroe county, explained that the tax situation in these counties is very similar to that of Madison county.

The gasoline tax was discussed by Stanley Castle, I. A. A. executive committeeman from the 22nd district. He stated that the I. A. A. takes a favorable stand toward this tax if the funds are to be used solely for the upkeep of state aid roads. He also pointed out that in other states having a gasoline tax provision is made whereby farmers can obtain a refund on gasoline used on the farm for tractors and stationary engines. The I. A. A. would also have the gasoline tax take the place of some other tax now in effect rather than be inaugurated as an additional tax.

Discuss Prices

Mr. Tillman showed that the price of limestone in this district is higher than in any other part of the state in spite of the fact that the farmers in this district use more limestone than those in other districts. The demand for limestone in this section has become so general that farmers regard it as a necessity and it is their opinion that the producers of limestone are purposely holding the price up.

J. R. Bent, director of the phosphate-limestone department of the Illinois Agricultural Association, was expected to be present but in his absence Executive Committeeman Castle explained how the I. A. A. is attempting to solve the farmers' limestone problems.

Farm Adviser Raut brought up consideration of the Illinois Agricultural Cooperatives Association, stating that none of the farmers' organizations in this section have had an auditing service. He spoke with favor toward the system and suggested that the farmers' organizations should get together upon the proposition.

No place or date was set for the next district meeting.

Every state in the union, Canada and even South Africa has shown interest in the McLean county system of sanitation in pig raising. Even the Naval Academy at Annapolis has adopted the system in raising the pigs used to clean up the garbage there.

Establishment of a Farm Bureau gasoline and oil supply company at Carthage is proving a profitable investment for Hancock county farmers.

In Missouri 60,000 signatures have been secured to petitions asking that the proposition of a two per cent tax on gasoline and a 50 per cent increase in automobile registration fees for road maintainance be put on the ballots in November.

Nearly 700 boys and girls attended the second annual Junior Club University Tour held June 12 and 13 at the College of Agriculture.

BLOOMINGTON MEET GIVES I.A.A. CLEAR, CONSTRUCTIVE TIPS

Seventeenth District Men Want Harmony Among Farm Organizations; Research In Grain Marketing

Oh, the chairman o' this here meetin'
In McLean's Prexy Moon,
If he ain't asked you to do some speakin',
He'll do so prety soon!

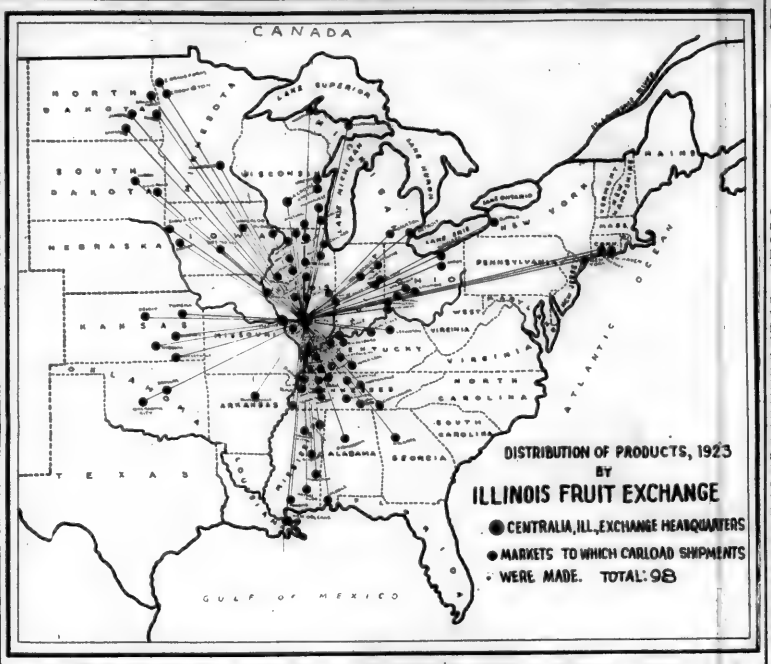
J. H. Checkley, farm adviser of Logan county and a "Jim Dandy" community singing leader, sounded the "keynote" of the 17th district meeting at Bloomington, June 24, when he composed the above verse to "It Ain't Gonna Rain No Mo" and sang it, among many others, to the 65 farm bureau representatives present who also joined in on the choruses. McLean, Ford, Livingston, Logan and Woodford counties were represented.

Foremost among the constructive projects considered was a thought concentrated in a resolution passed asking that steps be taken by the Illinois Agricultural Association to bring forth greater harmony between it and the Farmers' Grain Dealers' Association, both of which are working for the farmers' interests, the latter representing many Farm Bureau members but some of its leaders indicating jealousy toward the Illinois Agricultural Association.

A general discussion of local live stock shipping association problems featured the morning session. J. D. Harper of the National Livestock Producers Association and formerly head of the poultry and egg marketing department of the I. A. A., answered questions regarding the work of the Producers. It was pointed out by Mr. Harper that the executive committee of the National Producers consider the present progress of the terminal agencies about right for a healthy growth.

Considerable comment was made praising the Illinois Agricultural Association for its energetic, thorough fight for the McNary-Haugen bill. A motion was passed asking that the principles embodied in that bill should be upheld when the nation-wide meeting of all farm organizations is called at St. Paul, July 11 and 12.

Study Grain Marketing



Discussions of grain marketing by several representatives brought out the fact that the 17th district would like to see the I. A. A. put in considerable energy and research investigating grain marketing. The fact that President Thompson had been appointed on the A. F. B. F. committee which is to consider the giant proposal of five old line commission companies in Chicago to sell their organizations to farmers, indicated that the I. A. A. is connected with the biggest proposition yet conceived for a farmer-owned national grain marketing system. F. D. Barton, Cornell, executive committeeman of the 17th district, said that the I. A. A. executive committee talks grain marketing every time it meets but there are many hurdles to clear before a grain marketing plan that will suit the majority of farmers is definitely decided upon. Grain marketing research is to be pushed by Mr. Barton at the next meeting of the state executive committee.

Mr. Checkley told of the plans being made by Lincoln and Logan county to entertain the Farm Bureau members when the state picnic is held at Lincoln, August 26. He said that Lincoln is preparing to handle the largest I. A. A. state picnic ever staged.

Simon C. Moon, president of the McLean County Farm Bureau, was elected chairman of the day. Mr. Barton led discussions and will present the ideas of the 17th district Farm Bureau people to the executive committee of the I. A. A. at its next meeting in Chicago.

George Wicker, general manager of the new auditing and business advisory service instituted by the I. A. A., talked to the group in the afternoon, telling that the purpose of the service is to make cooperative marketing organizations safer for farmers. The new auditing association has recently audited the books of the Peoria Producers, they having subscribed to the service along with the National Livestock Producers Association, and found them in good shape. He pointed out that the Illinois Agricultural Cooperatives Association, which is the incorporation name of the auditing service organization, will be definitely connected with the I. A. A. because in the by-laws of the new incorporation it is definitely stated that the executive committee of the I. A. A. should submit two names of men to act as I. A. A. secretary and treasurer, respectively, have been already named and elected.

Following are the names of those in attendance: E. F. Coolidge, W. D. Brickley, A. J. Johnstone, Alvin B. Otto, G. C. Johnstone, F. J. Basting, F. W. Bill, R. G. Benjamin, Bloomington; Harry C. Dixon, Covell; G. L. Potter, W. C. Asper, C. H. Patterson, Walter Springer, Pontiac; M. E. Lyons, Odell; Asa B. Culp, Paul E. Johnstone, Eureka; L. I. Harris, Graymount; Wm. Krause, L. R. Parks, A. M. Armstrong, J. H. Checkley, Wm. J. Houston, D. C. Shepler, Lincoln; Chas. M. Colburn, Beason; C. E. Hopkins, Pontiac; T. Ralph Miner, Mt. Pleasant, Iowa; Walter Nichols, Heyworth; J. W. Kirkton, Normal; L. V. Husted, F. W. Reeve, F. D. Barton, Cornell; Homer Caton, J. T. Freitag, Carl N. Freitag, Stanford; D. H. Kent, J. W. McCullough, A. O. Convis, Geo. T. Swaim, Gibson City; Earl Henry, Paxton; Aura Johnston, Hudson; George Wicker and H. C. Butcher, Illinois Agricultural Association; J. D. Harper, National Livestock Producers' Association.

The Illinois Fruit Exchange during the year 1923 shipped its produce to 98 different markets as is illustrated in the map above. Although this is a slight decrease in number of markets reached in comparison with the 1922 markets, A. B. Leeper, director of the fruit and vegetable marketing department and manager for the Illinois Fruit Exchange, thinks that the 1923 shipments were placed much better geographically. He points out that a large number of towns were reached closer to home than in the previous year, which is good marketing technique.

The Illinois Fruit Exchange is a participating unit of the Federated Fruit and Vegetable Growers which last year handled 33,500 cars of fruit and vegetables representing a money value of about $25,000,000. The Illinois Fruit Exchange has closed its second marketing season. The tonnage embraced a wide variety of fruit and vegetables. The result on peaches was extraordinarily good since the Illinois peaches received the highest average price obtained by any other association in the United States.

Gougler Studies Farmers' Markets

F. A. Gougler, director of poultry and egg marketing, is spending considerable time investigating farmers' markets where the farmers bring in poultry, eggs, butter, cottage cheese, cured hams, fresh meats and numerous commodities produced by the farmers on their own farms and sell them on a market conducted by themselves on certain days of each week. The purpose of the investigation, Mr. Gougler says, is to furnish all necessary information for persons who wish to start similar markets.

Fruit Producers Reorganize on a Five Year Plan

The members of the Ozark Fruit Growers' Association are so well satisfied with their cooperative selling through the Illinois Fruit Growers' Exchange, that they met June 17 and reorganized their association, signing new contracts under which they will operate for a period of five years. The contract which the fruit growers first signed was binding for only three years and has just recently expired.

Those who patronize the fruit growers' exchange are members of the farm bureau, membership in the exchange being declined to those who do not belong to the farm bureau. The exchange markets in car lots all kinds of fruits and vegetables for its patrons and handles such supplies as spraying equipment and materials, fertilizers and fruit packages, which it is able to furnish at a considerable saving to its members. The Ozark association has one of the finest packing sheds in that section of the state, adequately equipped to handle the business of its patrons.

Eighty-six head of Holsteins in the John Erickson herd dispersal sale at Waupaca, Wis., sold for an average of $1,138.

The Columbia Quarry Company will give away a carload of limestone as prizes at the Randolph County Farm Bureau picnic August 21.

F. A. Gougler, I. A. A. poultry and egg marketing specialist, is making a ten-day trip through Iowa, Wisconsin and Michigan, studying the egg-marketing situation in these states.

William E. Hedgcock, formerly farm adviser of Peoria County Farm Bureau, will become director of the I. A. A. livestock marketing department July 1.

During the month of June the I. A. A. transportation department collected slightly over $1,300 on overcharge and loss and damage claims for Illinois farmers and shippers.

The McHenry County Farm Bureau offered prizes to rural school children for the best essays upon the subject, "Why McHenry County Should Do Tuberculin Testing?"

Brown County Has New Shipper Co-op

The livestock producers of Brown county have recently reorganized their shipping association and effected what promises to be an efficient marketing association, according to G. E. Metzger, organization director of the Illinois Agricultural Association. The new organization will work under the name of the Brown County Shippers' Association and aims for closer cooperation between the farmers, the local shipping associations and the Producers in the terminal markets.

Under the new organization the board of directors is required by the by-laws of the association to meet regularly each month to consider shipping problems and other business pertaining to the association.

Final hearings on the Pittsburgh Plus case have been held before the federal trade commission, which is expected to hand down its final decision some time during the coming fall.

METZGER TALKS ON CO-OP MARKETING TO RADIO AUDIENCE

"Farmer Must Get Broader Viewpoint and Understand That Sound Business Must Prevail"

The keynote of the farmers' cooperative marketing situation was struck by G. E. Metzger, director of the I. A. A. organization department, when he spoke over station K. Y. W. at Chicago, July 1.

"The real essence of the situation is that the average farmer's viewpoint of cooperative marketing of his own products is not yet broad enough to enable him to understand that his concern is a regular business institution," said Mr. Metzger in speaking of the lack of real cooperative managerial ability in this country at the present time. "Neither does the farmer realize that cooperative institutions are governed by human beings and that they are not empowered to do miraculous things. On the other hand, he must understand that sound business practice must prevail, that his concern can be expected to render real service, that it must do it efficiently and if it does these fundamental things, loyalty on the part of the membership should enable the cooperative to return the highest price for farm products."

Expressing the belief that many midwest farmers have not yet caught the cooperative spirit in a big and effective way Metzger said, "The average farmer when asked what he expects of cooperative marketing will tell the inquirer that he expects a higher price for his products. 'How much higher?' I ask. Many have no idea but ordinarily farmers will say that they would be satisfied to get the middleman's profits. The average farmer-owned elevator in Illinois, it is estimated, makes the farmer about four cents per bushel. This might be a fair portion of the local margin which the producer might expect but that will not put him out of the present serious economic difficulty. The local farmers' elevator company does not go far enough. Local plants must be combined and consolidated into terminal sales agencies large enough to be a market factor and control in part at least the so-called exportable surplus of various farm commodities."

Adams county has organized a baseball league with at least four township teams. The county championship will be decided September 20 at the Adams county farm bureau picnic.

Marshall-Putnam county farm bureau baseball team recently defeated Stark county 4 to 0 and Knox county 12 to 3.

Severe outbreaks of army worms are reported from at least 25 Illinois counties.

28 TO ST. ANNE IS BIGGEST "KIDDIE" ORDER OF SEASON

Mr. A. Mailloux of St. Anne, Kankakee county, has a heart. Here's why.

He rounded up enough people in his community to take 28 slum kiddies and sent in his "order" to the Outing Secretary at the I. A. A. office, asking for a July 1 delivery. Twenty-eight slum kiddies all in one group going to one chairman is the largest "order" received at the I. A. A. office yet this year. The cool weather this spring is responsible for a comparatively slow response to this humanitarian business of sending poor, needy slum kiddies into the country to good farm bureau homes for a two-weeks outing. But vacations for many children have already been arranged for and the outing secretary has high hopes of beating the last year's number of 473.

A. Mailloux

Mr. Mailloux said that all he had to do was to telephone and see some of his neighbors and it wasn't long until he had orders for 28 poor kiddies.

The United Charities of Chicago furnishes the kiddies, cleans 'em up in every way and delivers 'em in groups of a dozen or more any place within 200 miles of Chicago. Just drop a line to the Outing Secretary and you can get all the details.

I.A.A. Awaits Detailed Proposal on Grain Merger

STAND URGED THAT FARM ORGANIZATIONS RETAIN OPEN MINDS

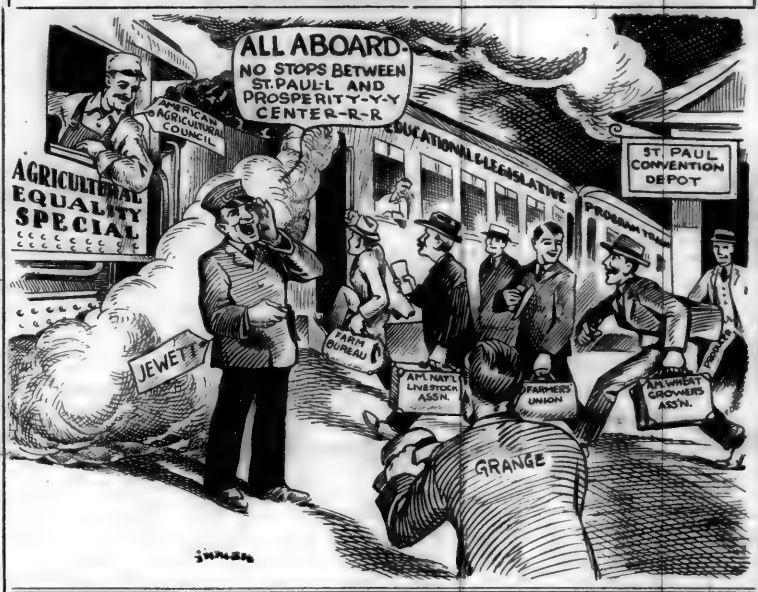
Grain Marketing Company Incorporated To Take Over Five Elevator Companies; $26,000,000 Involved

For some weeks a special committee from the American Farm Bureau Federation with O. E. Bradfute as chairman, has been giving consideration to tentative proposals made by the Armour Grain Company, the Rosenbaum Grain Corporation, Davis-Nolan-Merrill and Company, J. C. Schaffer and Company and Rosenbaum Brothers' Company for the taking over of the physical facilities of these old line grain companies.

This committee on Monday, July 14, believing the proposals merited further consideration, authorized that steps be taken to form a corporation under the Illinois Cooperative Marketing Act with capital to acquire marketing and terminal facilities and a common stock issue of 1,000,000 shares with a par value of $1 a share; 1,000,000 shares of "A" preferred stock at $25 a share and 500,000 shares of "B" preferred stock with a par value of $50 a share.

It's Already Incorporated

Articles of incorporation have been issued by Louis J. Emmerson, secretary of state. The following men are the incorporators: Millard H. Meyers, spokesman for the cooperative elevator people; O. E. Bradfute, president and J. W. Coverdale, secretary, of the American Farm Bureau Federation; Gray Silver, Washington representative of the farm bureau; Fred A. Mudge, Peru, Ill.; Louis J. Tabor, Columbus, O., Oscar B. Ashworth, Mattoon, Ill., and J. M. Dyer, Spencer, Ia.



The incorporation of a company under the Marketing Act seems to be only a necessary step at this time for the purpose of selecting a representative group of men who can legally solicit and receive proposals for the purchase or leasing of marketing facilities, analyze and digest such proposals and determine whether at this time a large cooperative grain marketing company should be set up, and if so, what facilities are required and whether same can be acquired by purchase or lease on terms favorable to the grain farmers of our country.

Position of I. A. A.

President S. H. Thompson is a member of the American Farm Bureau Federation Committee, but was unable to be present when the committee made final its recommendations to incorporate the Grain Marketing Company. **The impression gathered by a great many of our farmers from the press reports is that the entire deal has been consummated and the new company will start to market grain at once. Mr. Thompson has made no recommendation to the other officers or the executive committee of the Illinois Agricultural Association. Until definite proposals have been made to the Board of Directors of the new**

(Continued on page 3)

A PROGRESSIVE STEP

Arrange Wool Pool In Attempt To Cut Marketing Expenses

William E. Hedgcock, who assumed the direction of the I. A. A. livestock marketing department, July 1, has made arrangements with the National Wool Warehouse and Storage Company whereby the week of July 21 to 26 has been designated as "Illinois Wool Pool Week."

Instructions have been sent to farm bureaus recommending the concentration of as much wool as possible at one or two central points in each county where it will be shipped to the warehouse by local freight if in less than carload lots. Where it is not shipped from a central point it should be shipped from the nearest local freight station sometime during the wool pool week.

At the present time the warehouse company is busy grading a large amount of Iowa wool. They have received a few shipments from Illinois but in many instances it is coming either by local freight or express in small shipments which makes the transportation expenses higher than necessary.

By designating the week of July 21 to 26 as wool pool week in Illinois the warehouse can make arrangements with the different railroads to reload into a trap car at division points, wool received over several roads. The trap car is provided to facilitate the handling of small shipments from scattered points. By this arrangement the I. A. A. marketing head hopes to cut down freight charges on all wool shipments.

A second advantage in naming a specific period for pooling Illinois wool is that it will enable the warehouse to grade all the wool before buyers arrive thus increasing the chances for better prices.

Co-ops Celebrate With Annual Meet

July 8, 1924, was written into the annals of agricultural history as a big day down in Little Egypt. The history making occasion was the third annual meeting of the Egyptian Seed Growers' Exchange and the second annual meeting of the Red Top Growers' Warehouse Association, held jointly in the association warehouse at Flora. Two hundred members of the associations and their families attended the meeting, some of them coming fifty miles.

After a short business session, with John Rogier presiding, the meeting adjourned to participate in a picnic lunch provided by the women and served upon a sixty-foot table, cafeteria style. The Exchange furnished plenty of lemonade and iced tea.

Walton Peteet, secretary of the National Cooperative Association, addressed the meeting at the afternoon session, discussing the general conditions of the cooperative movement, particularly the financial problems of cooperatives.

The treasurer's reports of the two organizations were made by L. A. Evans, of the finance department of the I. A. A., who audited their accounts. These reports from the treasury of each organization show that the year just past has been a very successful one for both organizations.

Cotton Producers Meet To Consider A Marketing Pool

Cotton farmers from southern Illinois met in Mound City, July 2, with G. E. Metzger, organization director of the I. A. A., and considered the formation of an Illinois cotton growers' pool. A report from an organization committee which had investigated the possibilities of such a pool indicated that a growers' marketing organization would be advisable. Further study of the situation is to be made by the committee and their report heard at a meeting late in July when final consideration will be given to the proposed marketing plan.

Growers in other cotton producing states operate pools, all of which affiliate with the American Cotton Growers' Exchange. The proposed Illinois growers' pool would be established upon a similar plan.

This season, the first for many years, shows a material increase in the acreage of cotton in Illinois. The latest estimate on the 1924 cotton crop according to the agricultural statistician at Springfield, places the acreage at 16,000. Early in the season it was expected there would be at least 25,000 acres but bad weather and unfavorable conditions have reduced the acreage seriously.

The directors of several Ford county cooperatives have recently considered favorably the Illinois Agricultural Cooperatives Association auditing service. The Ford County Farm Bureau has subscribed for membership in the auditing association.

"AMERICAN COUNCIL OF AGRICULTURE" IS FRAMED AT ST. PAUL

Illinois Agricultural Association Has Several Representatives There; Cowles Is Elected Secretary

A centralized body which will co-ordinate the efforts of all farm organizations toward securing the enactment of some measure which would embody the principles of the McNary-Haugen bill was formed last week at St. Paul when 150 representatives from approximately 50 farm organizations met in conference. It was definitely and clearly expressed that the National Council of Agriculture is to supplement existing farm organizations, not to re-place them, and is to concentrate its efforts upon securing legislative enactment along the lines of the McNary-Haugen bill. The Council will devote its entire energies to this end. The nation-wide conference was called immediately after the defeat of the McNary - Haugen bill in the last Congress. The name is "The American Council of Agriculture." An executive committee was appointed, consisting of 15 members. The purpose of the National Council of Agriculture is primarily to obtain equality for agriculture through legislative remedies. The fact that agriculture has organized into a central body, one that will speak for all agricultural organizations in one mighty, authoritative voice, is thought by farm leaders to be a progressive step. The Council is to meet annually and will probably open an office in Washington. Temporary headquarters will be at our I. A. A. office in Chicago.

Frank D. Barton

A. C. Everingham

The Illinois Agricultural Association was well represented at the conference, having in attendance the three members of our legislative committee, F. D. Barton, Cornell, chairman; H. E. Coombel, Hooppole, and A. C. Everingham, Hutsonville, as well as R. A. Cowles, director of finance, Bloomington; L. E. Warner, president, Henry County Farm Bureau; Ernest D. Walker, Stronghurst, Henderson county

Resolutions of "The American Council of Agriculture" Adopted at its St. Paul Meeting, July 12

Declaration of Purpose

Be It Resolved by this conference that there should be created an **American Council of Agriculture.** Its chief object shall be to make it possible for the existing agricultural organizations of whatever character and similar organizations which may be brought into being, to speak with one voice and through a united leadership wherever and whenever the general well being of Agriculture is concerned, whether in the realm of legislation, whether in harmonizing methods of marketing or other organized effort, or in militantly championing those policies and principles which have made ours the greatest, the best and freest government on earth and which, as a heritage infinitely precious from the Fathers, it is the solemn duty of all citizens to preserve and defend against selfish or misguided aggression from whatever quarter.

Throughout the centuries the well being of Agriculture has been synonymous with the well being of civilization and nations have most frequently risen and fallen, not through the prowess or weakness of marching legions, but as those who tilled the soil were happy and frugally prosperous, or as they became victims of economic wrong, neglect and discontent. From the beginning of our own Republic it has been freely admitted that Agriculture constitutes its great "basic industry" and not merely in the light of World history but from its tremendous contribution to our national wealth in days gone by, we believe this to be profoundly and incontrovertibly true—and so believing, it shall be the purpose of the American Council of Agriculture to promote and defend the broad welfare of Agriculture under any and all circumstances and by such means as appear to it honorable and effective. For speaking in general terms, unless the dollar that the farmer receives for his toil shall possess as great purchasing power as the dollar which the other organized forces of society exact from him, then certain ruin will ultimately overtake Agriculture. And inevitably that ruin will involve the ruin of industry and seriously menace the well being of those who labor in shop and factory for their daily bread. And hence the task which the Council has solemnly undertaken is a beneficent and unselfish one which cannot succeed without leaving in its wake a greater degree of assured happiness throughout the length and breadth of the land.

Therefore and to the end that those who read may the more fully understand the spirit of its purposes, the Council desires to here record that in the days to come it will not ask for any privileges for Agriculture in Congress or elsewhere that the aggressions of other classes or agencies do not force upon it. And we give this voluntary assurance, not as a truce to wholesome class rivalry, but because in the end the nation must stand or fall upon the unselfishness of its classes and of its individuals—upon whether or not all of us, as classes or as individuals, are willing to "live in the sweat of our faces" and "do unto others as we would be done by." And those who proceed upon any other theory, whether as a class or as individuals, are but sowing the wind and in the years to come their children will reap a harvest of dragon's teeth. For no class or individual can become the beneficiary of economic wrong or favoritism without subtracting from the sum total of the Nation's happiness—and the Nation's happiness, the assurance that the laborer, whoever he may be, is "worthy of his hire," the safeguarding of this privilege should be the solemn objective of all governments and of all fair-minded citizens. And that these ideals may ever actuate those who shall be commissioned to exercise the authority of this council so long as it remains a constructive force, this is the ardent hope of those who have prayerfully brought it into being. In these premises we should constantly bear in mind that our task is not merely to compel even handed justice for those who toil in the fields and feedlots, but that there devolves upon us a still higher duty—the duty of so employing the hosts of Agriculture that those venerable and time-tried institutions of government which have served us so well in the past shall be handed down unharmed to the generations of the future.

Part I of General Resolutions

We recommend the creation of a National Agricultural Council to do that which shall be necessary and advisable to secure the enactment by Congress of the legislation embodying the principles of the McNary-Haugen bill and thus secure for American agriculture equality with industry and labor.

Second: That the delegates present and participating in this conference shall act temporarily as such agricultural council with full power until the annual meeting of the Council.

Third: That such Council shall be composed of five (5) representatives chosen by each National farm or commodity organization and by one (1) representative chosen by each of all other agricultural associations and agricultural cooperative commodity associations in the United States.

Resolutions

Generally speaking, we desire to earnestly direct the following statement to the farmers of the United States:

Profoundly serious as are the existing conditions confronting agriculture, yet candor compels us to confess that the farmer shares in the responsibility for their existence, because in days gone by he apparently forgot that "God helps him who helps himself" and did little to protect himself and his fellow farmers against the forces which determine his living and production costs. With industry and labor, organization has always come first, while with the farmer it has been considered a secondary matter and it is therefore not surprising that he should find himself the victim of the organized forces which surround him on every side.

We heartily endorse the efforts of farmers in forming cooperative marketing associations and urge the faithful adherence to their membership contracts, as they are the essence of cooperation and bring into being the necessary instrumentality for permanent and successful marketing of farm commodities.

We desire to go on record in favor of orderly marketing of grain through farm controlled cooperative agencies throughout, and in this connection recommend that the speculative buying of grain by farmer elevator companies be discouraged.

We also desire to recommend a greater harmony of purpose and action in the operation of cooperative livestock commission companies at the various stockyards in which premises such splendid progress has been made during the last two years, and in which activity nothing except needless and foolish friction can defeat our almost complete control of livestock movements in the near future. In this connection, we also earnestly urge all carload feeders throughout the country to henceforth consign all their livestock to a cooperative commission company, and even so, we recommend the immediate establishment of a farmers' livestock shipping association at all points where such associations are not in operation at this time and where the movement of livestock justifies such agencies. Let us remember with reference to both grain and livestock that our first objective should be the undisputed control at the earliest possible moment, of the central grain and livestock markets—for this control is overwhelmingly vital to the successful operation of producers' contracts as applied to these commodities.

In the coming national election we recommend rewarding those who supported the McNary-Haugen bill in Congress without the slightest regard to the party label and we also recommend that the following pledge be exacted from all candidates for Congress, whether in the House or Senate:

In the event of my nomination and election, I hereby pledge myself to vote for and faithfully support legislation that will give agriculture equality with industry and labor and in line with the spirit of the McNary-Haugen bill.

Supplemental Resolutions

Be It Resolved: That this conference and organization here represented express their appreciation of the signal service rendered by the Department of Agriculture under the sincere and able leadership of Henry C. Wallace.

Whereas: Equality for agriculture with industry and labor embraces all agriculture, and whereas, in the last Congress, the McNary-Haugen bill did not receive the support of the cotton states generally,

Now, Therefore, Be It Resolved: That the Council give special consideration to the problems surrounding the cotton producers and to this end invite their friendly cooperation.

Resolved: That this conference and the organizations here represented express their deep gratitude to Mr. George C. Jewett for his courageous, capable and untiring efforts in behalf of the McNary-Haugen bill.

Resolved: That the Secretary be instructed to have the proceedings of this conference printed for distribution among the various farm organizations and attending delegates.

Resolved: That this conference express to the St. Paul Association of Public and Business Affairs and to the Press of St. Paul its deep appreciation and sincere thanks for the hearty support they have given the McNary-Haugen bill and for the courtesies extended to this conference throughout its session.

—o—

State-Wide Projects Take Time

A negotiating committee or individual that deals with state-wide projects scrapes against many uncharted rocks and sometimes becomes stranded along the journey to accomplishment. The negotiations which have been under way by the phosphate-limestone department and its advisory committee for several months have been striking obstacles. That department has been serving farm bureau members, among its other duties, to obtain recognition of the county farm bureaus by a special price from the producers on limestone to members. This plan, one under which some county farm bureaus are now furnishing limestone to members under agreements with two or three companies, provides that each and every company that agrees to the plan returns 10 cents a ton to the county farm bureau which sent in the order. This 10 cents a ton is rebated to the county farm bureaus at the end of each month and the county organizations usually return the money to the members who bought the limestone, thus lowering the price of limestone to members by 10 cents a ton. Non-members that order through the county farm bureaus do not receive the rebate; it stays with the county organization. This is the plan which the phosphate-limestone department has been attempting to get subscribed to by the limestone producing companies.

There are 15 or 20 limestone producing companies that are leaders in the production of agricultural limestone. They naturally are competitors; some are commercial enemies. Here are 94 farm bureau counties, each with slightly different conditions, some with widely different limestone needs, and others with wide divergence of viewpoints. When any state-wide negotiating committee undertakes to work out a program in the interest of the state as a whole—one that is fair to both sides and still beneficial to the farmer, a gigantic problem arises.

It takes time, patience, faithfulness and a clear, unbiased knowledge of facts, both from the consumer and producer viewpoints, and a willingness on the part of county farm organizations, farm advisers and the members themselves to achieve success in any state-wide project. All must stick to the conceded fundamentals; some must drop little and irrelevant personal opinions and others must see over trivial details in the interest of combined strength and uniformity of action. But if the fundamentals are right, any plan eventually will go across.

—o—

Lack of space makes it necessary to leave out the Liars' Corner this time.

I. A. A. DEPARTMENT OF TRANSPORTATION REPRESENTS FARMER

88 Counties Reached In Six Months Through Various Services; Handles Claims For Members

Editor's Note: This is the second of a series of similar articles to be written by I. A. A. department directors telling of the work done in each department.

BY L. J. QUASEY
Director, Transportation Department

The work of the Transportation Department is divided into a number of classes of service. Some of these concern the interests of the whole state, others only certain localities while still others concern only certain individual members.

L. J. Quasey

The accompanying map shows counties to which service has been rendered during 1924. This may consist of service upon the request of the Farm Bureaus in the interest of a large number of members in the county or a service to one or more livestock shipping associations, elevators or individual members.

Serve 88 Counties

Service has been rendered to 88 out of 102 counties, of which nine are unorganized, so that according to our records all but 5 of the organized counties have been served.

The map does not show service to the state as a whole.

The following outline shows the principal divisions and subdivisions of the work of the department:

Proceedings Before Commerce Commissions and Railroads:
1. Filing formal and informal complaints before the Interstate Commerce Commission or the Illinois Commerce Commission; presenting evidence and giving testimony in proceedings where the interests of the members are involved and filing briefs in connection with such proceedings.
2. Propose matters for consideration of the railroad rate committees and appear before such committees on occasions where the interests of the Illinois farmers are involved.
3. Negotiating with individual railroads in matters of rates, train schedules and shipping facilities.

Freight Rate Service:
1. Quotation of rates and routing on agricultural commodities.
2. Rate survey work on agricultural commodities.
3. Agricultural limestone rate service to county farm bureaus.
4. Maintenance of a file of tariffs and classifications.

Car Distribution and Supply:
1. Assistance to county farm bureaus and local associations in securing cars.

Shipping Conveniences:
1. Assistance in securing side tracks and other conveniences.

Changes and Adjustments in Freight Train Service:
1. Schedules of livestock trains.
2. Schedules of fruit and vegetable train service, etc.

Claim Prevention:
1. Obtaining necessary repairs and improvements at livestock loading pens.
2. Giving out information to shippers on the reducing of losses in transit.

Railroad Claims:
1. Freight overcharge claims.
2. Freight loss and damage claims.
3. General loss and damage claims.

Represents Members

The Illinois Agricultural Association, through its Transportation Department, represents its members and their interests in formal proceedings before either the Interstate Commerce Commission or the Illinois Commerce Commission.

The Interstate Commerce Commission has jurisdiction over matters pertaining to transportation rates, service, etc. between states. The Illinois Commerce Commission acts on matters concerning transportation within the State.

Action is brought before these bodies either by direct complaint or by intervention in a complaint brought by others in which our interests are involved.

The Indiana Fruit and Vegetable Case in which extensive increases in Illinois rates were prevented and the Hog minimum case in which the minimum weight on hogs intrastate was reduced from 17,000 to 16,500 pounds are some of the more recent cases in which we participated.

The Railroads are organized into Freight Rate Associations for the purpose of handling rate matters between themselves and the shippers. Most of the subjects we handle are taken up with the individual railroads themselves. We have contact with all the principal departments of the majority of the Illinois railroads, so that any particular matter is quickly brought to the attention of the proper department.

Supplies Freight Rates

Many of you know how difficult it is to determine what the correct freight charges are on a particular shipment. The tariffs are complicated and changes in the rates are being made constantly, so that it is important for a farmer to be able to get correct rate quotations. We maintain a tariff file on all the principal commodities in which farmers are interested, so it makes no difference what commodity it is or what railroad it moves over, we can not only give you the correct rate but advice as to the best route also.

We keep constantly in touch with the freight situation on farm commodities so we may know what changes are being contemplated and be in position to protect the interests of our members whenever necessary.

A special service is now being rendered to county farm bureaus in supplying rates on agricultural limestone from several quarries to all points in a county.

Very few complaints have been received regarding car supply. This is due to the fact that the railroads have had a very large percentage of their cars and engines in working order and have been able to keep the equipment distributed so as to better meet the shippers needs.

Helps Furnish Cars

The activities of the Regional Advisory Board, consisting of shippers' representatives cooperating with the Car Service Division of the American Railway Association, are in a large measure responsible for the good condition in the car supply situation.

The Illinois Agricultural Association is represented on the Board of Directors and Agricultural Commodity Committees of the Midwest Regional Advisory Board which includes Illinois territory.

Advice and assistance are given to shippers regarding side tracks, installation of stock pens, leases for stock scale sites on the right of way, etc.

Shippers often do not get matters placed before the proper railway officials and much unnecessary delay can be avoided by referring them through the proper channels.

Requests Granted

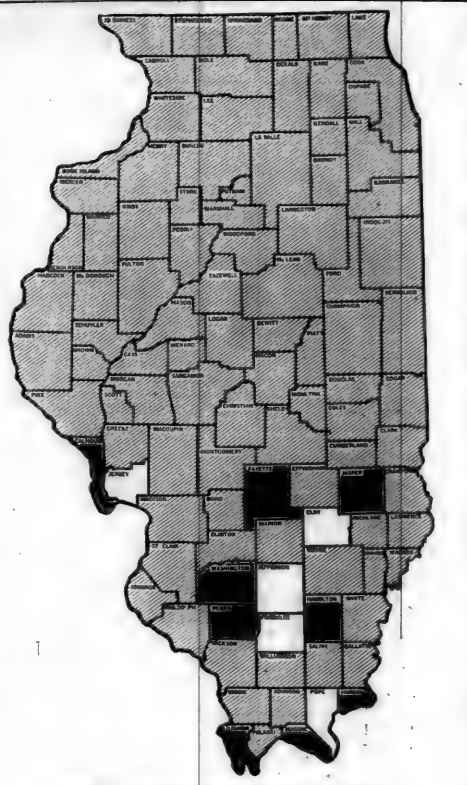
Several months ago some of the live stock shippers at points on the Chicago & Alton Railway asked for an additional shipping day to Chicago and East St. Louis. A survey was made to determine the volume of live stock traffic from various points and to determine which day would be in accord with the desire of the majority of shippers. Wednesday was preferred, with the exception of one or two instances. So in handling the matter with the Chicago & Alton Railroad Company's officials we asked for Wednesday and the request was granted.

There is now under way with the railroads a proposition for repairing, cleaning and maintaining in a sanitary condition the livestock loading pens at county points. In this we have two objects in view. One is the prevention of claims and the other is to stimulate tuberculosis eradication.

Poorly drained stock pens, knee deep in mud, are anything but conducive to the proper and safe handling of live stock. Insufficient water supply is very detrimental, particularly during hot weather. The railroads should supply water at livestock pens.

We are working with the T. B. Eradication Department in an effort to get the railroads to maintain their stock pens in a sanitary condition so as to reduce possible sources of infection. A survey was made of hundreds of stock pens at stations in Illinois and any deficiencies in the physical condition of the yards and pens have been reported. These matters are now being handled with the freight claim prevention and other railroad officials.

Safety Contest Started



The purpose of the safety contest announced in the July 5th issue of the RECORD is to stimulate interest among livestock shipping associations in reducing losses. Livestock shippers can do a great deal toward reducing losses by exercising care in feeding, watering and loading livestock at country points.

The department handles a large number of railroad claims. Shippers are urged not only to use every reasonable precaution in the safe handling of live stock but to be sure to count the stock as it is loaded into the cars. A claim for shortage cannot be made good unless it is supported by proper proof. This can best be obtained by having at least two persons, possibly three, count the animals as they are loaded into the car.

Check Freight Bills

We check over a great many freight bills and if any overcharges are found to exist, claims are filed. Send in your invoices on livestock shipments and your freight bills on other shipments and we will gladly check up on them for you.

Claims due to fire, or for livestock killed on the right of way are also handled. Much of the livestock that is killed or injured on the right of way is because the railroads fail to maintain their fences in suitable repair. Write us if your livestock fence is in poor condition. Getting the fence fixed will not only benefit you but the railroad as well.

The above map represents the service of the transportation department from January 1, 1924 to July 1, 1924. Shaded portions are counties served, white counties not served and black counties not organized or affiliated with the Illinois Agricultural Association.

AWAIT DETAILS ON PROPOSED MERGER

(Continued from page 1)

company, and a most careful canvass of the whole situation completed, the Illinois Agricultural Association is in no position to form a definite opinion as to the merits of the proposed merger. The officers of the Illinois Agricultural Association believe that a policy of open mindedness should be adopted by all farm organizations toward the new company and what it may recommend and request.

The American Farm Bureau Federation lists the following men as having been invited, elected and having accepted places on the temporary board of directors of the Grain Marketing Company; O. E. Bradfute, Ohio, president of the American Farm Bureau Federation; W. J. Brown, Minnesota, president of the American Wheat Growers, Inc.; Harry L. Keefe, Nebraska, president of the U. S. Grain Growers, Inc.; Fred A. Mudge, Peru, Ill., president of the Illinois Farmers' Elevator Association; J. M. Dyer, Spencer, Iowa, president of the Iowa Farmers' Elevator Association; Millard Meyers, Illinois Farmers' Elevators; J. F. Reed, Minnesota, vice-president of the American Farm Bureau Federation; Oscar Ashworth, Mattoon, Ill., Illinois Grain Farmers; Gray Silver, West Virginia and Illinois Grain Farmers; J. W. Coverdale, Iowa Grain Farmers.

Farmers in Mount Hope township in Washington state have organized a better stock association and have selected one breed for each class of livestock which they will breed. Belgian horses, Guernsey cows and Duroc Jersey hogs have been chosen and within a year each member is to have at least one purebred animal of some one of the breeds chosen. Only purebred sires will be used.

Marshall-Putnam Farm Bureau baseball team continued its steady march toward championship in the northwest district league, defeating Bureau county recently by a 12 to 4 score.

CHICAGO PRODUCERS REFUND $55,000 TO ILLINOIS SHIPPERS

Show Increase of 58.5 Per Cent In Total Volume of Business for Last Fiscal Year

Something of the possibilities open to actual livestock producers through close cooperation on a marketing program can be seen in the report of the business done by the Chicago Producers Association in the last fiscal year.

For the second successive year Illinois stockmen have led in the number of cars shipped to the Chicago Producers. Within the last year a total of 9,070 cars of stock were shipped to them from Illinois, 51.5 per cent of the total receipts. Aside from these shipments to the Chicago Producers Illinois shippers sell a large per cent of their stock to the Producers at St. Louis, Peoria and Indianapolis.

Although the exact figures on the refund paid to Illinois shippers are not yet ready, a rough estimate will place it at $55,000.00 out of the total refund of $103,461.55. This enormous refund effected an average saving of $5.84 per carload to the shippers. Livestock men recognize it as proof of the financial success of cooperative livestock marketing.

Make Big Gains

The cattle department of the Chicago Producers showed a gain of 47.8 per cent; the hog department 51.2 per cent; the sheep department 199.6 per cent, while the receipts as a whole were 58.5 per cent greater than last year. The feeder department which is a new service just added during the last fiscal year purchased over 200 loads of cattle and 315 decks of sheep. One order alone was for 22 cars.

The shipping association at Rockford led all associations in the number of cars shipped with 211. The refund paid to this association alone was $1,245.02. The Warren County Farm Bureau Shipping Service followed the Rockford association with 175 cars and the Victoria Shipping Association in Knox county was third with 101 cars. Over 20 associations have the record of consigning every animal to the Producers. Shipments were received from 416 associations.

Seventy-eight out of the 102 Illinois counties shipped stock to the Chicago Producers during the year. Following are the 25 counties having the largest number of cars shipped:

Henry 566, Knox 522, DeKalb 373, Mercer 334, Warren 317, LaSalle 295, McDonough 290, Bureau 285, McLean 278, Rock Island 275, Lee 260, Hancock 253, Stephenson 237, Winnebago 224, Livingston 216, Kane 190, Marshall 187, Ogle 174, Iroquois 169, Carroll 167, Whiteside 163, Kendall 155, Ford 149, Peoria 140, Putnam 138.

More Kiddies Get Country Vacations

Interest in the problem of giving short country outings to under-privileged kiddies of Chicago has increased with the coming of July and warmer weather, judging by the requests for children that have come to the Outing Secretary of the Illinois Agricultural Association, which is working with the United Charities of Chicago on the poor children problem.

Up to July 14 requests for 191 children to be sent out to farm homes had been received. A large order came from Rock Island county where Miss Leila Walker, Hillsdale, as hostess, asked for 25 kiddies to be distributed there. Three of the requests from Miss Walker were for permanent adoption of children.

As a companion enemy to the army worm the familiar cutworm is appearing in many sections of the middle west, doing much damage in alfalfa fields.

Logan county farmers are demanding a 15 per cent reduction on farm land values.

Illinois Boys Defeat English In Dairy Judging

MURPHY KEYNOTES CONFERENCE; PEEK MADE PRESIDENT

Committee Representing All Major Rural Organizations Will Direct Campaign For Equality

(Continued from page 1)

farm adviser; Hugh H. Hastings, Chillicothe, vice-president, Marshall-Putnam County Farm Bureau; Simon C. Moon, Towanda, president, McLean County Farm Bureau and Charles R. Finley, Hoopeston, president, Vermilion County Farm Bureau. Mr. Barton was chairman of the credentials committee and Mr. Everingham was chairman of the steering committee.

R. A. Cowles, the I. A. A. treasurer, was elected temporary secretary of the organization meeting and was later made secretary of the American Council of Agriculture. George N. Peek, formerly president of the Moline Plow Company, Moline, and a member of the Rock Island County Farm Bureau and our Illinois Agricultural Association, was elected president and Carl Gunderson, Mitchell, South Dakota, vice-president. John R. Mitchell, St. Paul, a former member of the Federal Reserve Board, was made treasurer. Frank W. Murphy, Wheaton, Minnesota, whom many Illinois farm bureau members will remember as the speaker for the McNary-Haugen bill at meetings held at Rock Island, Springfield, Danville and Bloomington, was made chairman of the executive committee. He delivered the keynote address of the conference. George C. Jewett, Spokane, Washington, general manager of the American Wheat Growers' Association, Inc., who was chairman of the conferring leaders, and who was the unofficial leader in the recent McNary-Haugen bill fight at Washington, D. C., is ex officio member of the executive committee, as is also R. A. Cowles, the members of which follow:

Robert A. Cowles

Frank W. Murphy

L. J. Tabor, master, National Grange, Columbus, Ohio; Chas. Barrett, president, Farmers' Educational Cooperative Union of America, Georgia; O. E. Bradfute, president, American Farm Bureau Federation, Xenia, Ohio; John G. Brown, president, National Livestock Producers Association, Monon, Indiana; Wm. Hirth, Missouri Farmers' Association, Columbia, Missouri; Chas. E. Hearst, president, Iowa Farm Bureau Federation, Des Moines, Iowa; Mark A. Woods, chairman, State of Nebraska Committee for Promotion of the McNary-Haugen bill, Lincoln, Nebraska; C. H. Hyde, vice-president, Farmers' Union, Alva, Oklahoma; John D. Miller, New York; Wm. J. Brown, president, American Wheat Growers, Inc., Minneapolis, Minn.; George E. Lambert, Equity Cooperative Exchange, St. Paul, Minn.; Frank W. Murphy, Committee for Promotion of the McNary - Haugen bill, Wheaton, Minn.; George E. Duis, president, North Dakota Wheat Growers, Grand Forks, North Dakota. The above list is incomplete, chairman Jewett having not completed the appointment of the full committee as this RECORD goes to press.

George N. Peek, as president of the American Council of Agriculture, made the following statement for the RECORD at Chicago the first of the week:

George N. Peek

"The purpose of the American Council of Agriculture is to secure the enactment by Congress of necessary remedial legislation to create equality for agriculture with industry and labor under the principles of the McNary - Haugen bill defeated in the last Congress.

"The subject is fundamentally economic rather than political and we are determined it shall not become the football of partisan politics. Republicans, Democrats and Progressives have all included agricultural planks in their platforms which ostensibly propose to secure equality for agriculture. The Council, in its St. Paul meeting, passed a resolution urging reward to those members of the last Congress who supported the McNary-Haugen bill without regard to party label and urged that the following pledge be exacted from all candidates for Congress whether in House or Senate:

"'In the event of my nomination and election, I hereby pledge myself to vote for and faithfully support legislation that will give equality to agriculture with industry and labor in line with the spirit of the McNary-Haugen bill.'

"The Council further went on record that it would not ask for any privileges for agriculture from Congress that the aggressions of other classes or agencies do not force upon it, believing that in the end the nation must stand or fall upon the unselfishness of its classes and of its individuals.

"The Council fully appreciated the possible effect of its action upon political parties but agriculture is determined to have equality with industry and labor and we are therefore rather following than creating precedent.

"The Council will make its temporary headquarters with the Illinois Agricultural Association, Transportation building, Chicago."

Although all the farm organizations represented had many points in common, and although in general harmony was paramount, in some instances, especially when the resolutions committee was in session, there was evidence of considerable backbone among many of the representatives, all of which was said to be indicative of healthy thought.

Secretary Wallace was commended for his earnest and persistent support of the McNary-Haugen bill. Also, a resolution of sympathy was sent to President Coolidge in condolence over the loss of his son.

Following is a partial list of the more important national organizations which were represented and the corresponding representatives:

American Farm Bureau Federation by Gray Silver.

American Wheat Growers Association, Inc., by William J. Brown, President, and George J. Jewett, general manager.

National Live Stock Producers Association, by John Brown, President, and James R. Riggs.

National Producers Alliance, by O. P. Reese, special representative.

National Grange, by E. A. Eckert, executive committee.

Farmers Educational and Cooperative Union of America, W. C. Landson, national lecturer.

Since January 3, 1924 the Ill-Mo Dairy Company at East St. Louis has received cream from 829 patrons at 243 shipping points in Illinois and Missouri.

LONG FIGHT OVER PITTSBURGH PLUS NEARS A VERDICT

One of the Longest Cases in History; Expect Final Decision From Commission This Fall

The final argument in the five-year fight over the Pittsburgh Plus controversy was reached by the Federal Trade Commission when it met June 23 and 24. The concluding stage in this long drawn out law suit marked the climax of one of the most remarkable economic investigations ever conducted in this country.

Farmers, manufacturers and other business interests look now to the final decision of the commission, expecting a report favorable to western business interests. Much of the testimony and argument against the Pittsburgh Plus steel pricing system was furnished by the counsel for the Commission, of which Sam H. Thompson, president of the Illinois Agricultural Association is a member, and the Associated States Opposing Pittsburgh Plus, which is a group of western states whose legislatures have appropriated funds amounting to $55,000 to fight this practice. The Illinois Agricultural Association has taken a stand against "Pittsburgh Plus" because its practice costs Illinois farmers thousands of dollars each year.

Argued In 1919

A formal application for a complaint against the U. S. Steel Corporation and the so-called independent companies was made in September, 1919. The case was argued in December, 1919, and by a vote of three to two the commission denied the application the following June.

In September, 1920, an application for a rehearing was granted and the case was argued again in December, that year. In April, 1921, the commission granted the application by a vote of three to two, thus reversing its first decision.

Since then John W. Bennett, special examiner for the commission, has been taking testimony in the Pittsburgh Plus case. Scores of cities have been visited and hundreds of business men both in and out of the steel industry have been questioned on the matter. The examiner's report containing over 350 pages, strongly denounced the Pittsburgh Plus practice and upheld the stand taken by the American Farm Bureau Federation and the Illinois Agricultural Association, both of which have been active in the fight against the Pittsburgh Plus practice of pricing steel.

Price Discrimination

The report was submitted last March, following which voluminous briefs and arguments were offered by counsel for the commission, Karl E. Steinhauer; H. G. Pickering, of Superior, Wisconsin, counsel for the Associated States Opposing Pittsburgh Plus and George H. Spear and Charles P. Craig, on behalf of the city of Duluth. Comprehensive briefs were also filed by the counsel for the U. S. Steel Corporation.

The case was argued in the recent trial by Steinhauer and Pickering against the Pittsburgh Plus practice and for the corporation by Richard V. Lindabury and W. E. Corlett, of New York.

Decision In Fall

The attorneys for the corporation denied the charge that the famous Pittsburgh Plus practice of pricing steel involves price discrimination against customers or that it is economically or legally unsound. Their argument was almost entirely a technical legal defense, attempting to prove that Section 2 of the Clayton Act, and Section 5 of the Federal Trade Commission Act, which are the statutes relied upon by the defendants, are not applicable to the case.

Argument for the commission and the Associated States Opposing Pittsburgh Plus maintained that existing laws are sufficient to remedy the injustice caused by the present system of steel pricing. They insisted that discrimination against eastern, western and southern manufacturing centers results from the practice while the steel corporation interests near Pittsburgh are thereby safeguarded.

It is considered likely that the Federal Trade Commission will hand down the final decision early this fall at the latest. The vote of Charles W. Hunt of Iowa, who was recently appointed to the commission, may have a deciding influence in the outcome of the case. He has been aligned with agricultural interests and is expected to vote against the Pittsburgh Plus system since it is represented that this practice has resulted in excessive prices of farm implements.

A thousand Kendall county people attended the annual summer picnic of Kendall County Farm Bureau at Hellgren's Park, June 26. Baseball games in which Lisbon Center walked on Big Grove and Kendall defeated Bristol, and horseshoe contests won by Wilbur Harnly and Ed Price were the big athletic events of the day.

Sam H. Thompson, president of the I. A. A. and Senator H. C. Kessinger spoke in the afternoon urging closer cooperation and predicting more prosperous times for the agricultural industry.

The United States Department of Agriculture has recently created a Bureau of Dairying to handle all dairy problems relating to the government.

According to a government survey the number of pigs in the United States now is 20 per cent less than a year ago.

The Chicago Producers Commission Association is offering a $25 bonus to Boys' and Girls' calf club contestants who market through their association before January 1, 1925, a calf weighing 1,000 pounds or over. This means an additional 2½ cents per pound besides the usual high price paid for such calves. The Chicago Producers are also going to give a banquet to all calf club winners who attend the International Livestock Exposition next fall. The St. Louis Producers are promoting a similar contest for boys and girls who market 1,000 pound calves through their association.

Anticipating a recommendation by the Tariff Commission to reduce the duty on sugar the American Farm Bureau Federation passed a resolution at its meeting last month urging that tariff on sugar beets be not disturbed. This action was taken on the grounds that it would work a hardship on western sugar beet growers and prove to be a handicap to southern cane growers. Similar action was taken by the Minnesota Farm Bureau.

The recent appropriation for T. B. testing by Hancock county brings the total to 58 counties in Illinois.

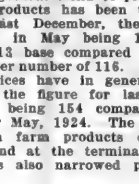
The Producers' Commission Company of Indianapolis recently held an "open house" for the farm advisers in their Illinois territory, showing them through the packing plants and explaining how the livestock is handled at the terminal markets.

The population of the United States increased 1,943,000 in 1923, making a total population of 112,826,000 on January 1, 1924.

WHITESIDE COUNTY BOYS WIN CONTEST OVER BRITISH TEAM

Defeat English Dairy Judges By 96 Points and Get London Daily Mail Trophy

The Whiteside county boys' dairy judging team, representing America, triumphed over the British team in the International contest at Hayward Heath, England, July 11. The American contestants — Harold Gaulrapp, Rock Falls; Donald Williams, Sterling and Elwyn Folkers, Sterling—won over the team from England by 96 points and were awarded a gold trophy by the London Daily Mail. Last year the trophy was won by high school boys from Maryland.



The Whiteside team earned the right to represent the United States when they out-judged 20 other teams in the National Boys' Dairy Judging contest at Syracuse, New York,, last fall. They had previously won the state championship at Springfield.

During the six-weeks trip, which the boys have taken with their coaches, L. O. Wise, farm adviser of Whiteside county, and C. S. Rhode, dairy extension specialist at the University, they have visited the best dairy herds in America and England, as well as points of historical interest. They will visit the livestock breeding districts of Scotland, England, France and Jersey and Guernsey Isles before returning to America.

Tendency of Prices Is Back To Normal

The discrepancy existing between the prices of farm products and general commodities has been gradually growing less for almost a year, according to a price review prepared recently by the research department of the American Farm Bureau Federation. Farm prices for the past two months have on the average been steady to strong while the general price level has declined slightly.

The general trend of prices on farm products has been upward since last December, the index number in May being 121 on the 1913 base compared to the December number of 116. Wholesale prices have in general declined, the figure for last September being 154 compared to 147 for May, 1924. The spread between farm products on the farm and at the terminal market has also narrowed perceptibly.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday, August 2, 1924 | Number 15

POSITION TAKEN ON MERGER IS APPROVED BY EXECUTIVE BODY

I.A.A. Maintains Open Minded Attitude Toward New Company; Thompson Declines To Serve

The executive committee of our I. A. A., in session July 25, officially expressed its approval of the open-minded stand taken recently by officials of the association regarding the Grain Marketing Company, newly incorporated $26,000,000 merger of five old line grain companies of Chicago and Kansas City.

Since this action was taken by the executive committee the directorate of the new company has been elected with Millard R. Myers, spokesman for cooperative elevator people, as president. Gray Silver, grain grower of West Virginia and Illinois and Washington representative of the American Farm Bureau Federation, is president of the new Grain Marketing Company and J. W. Coverdale, Chicago, secretary-treasurer.

Board of Directors

Other members of the board of directors are:

M. D. Lincoln, Columbus, O., secretary, Ohio Farm Bureau Federation.

J. W. Coverdale, Chicago, secretary of the American Farm Bureau Federation, and wheat grower, Ames, Ia.

Oscar Ashworth, Mattoon, Ill., grain grower.

A. L. Middleton, Eagle Grove, Ia., farmer.

W. E. Gould, Kewanee, Ill., banker.

L. J. Tabor, Columbus, O., master of the National Grange.

Gray Silver, Chicago, grain grower of West Virginia and Illinois, Washington, D. C., representative of American Farm Bureau federation.

J. F. Reed, Gary, S. D., grain grower, vice president of American Farm Bureau federation.

C. M. Dyer, Spencer, Ia., president of Iowa Farmers' Elevator association.

O. E. Bradfute, Xenia, O., president of American Farm Bureau federation.

W. J. Brown, Thief River, Minn., president of American Wheat Growers, Inc.

Fred A. Mudge, Peru, Ill., president of Illinois Farmers' Elevator association.

Harry L. Keefe, Walthill, Neb., president U. S. Grain Growers, Inc.

$4,000,000 Capital

The company will open its activities with $4,000,000 paid in capital with no outstanding indebtedness, according to an announcement made July 26.

The developments of the Grain Marketing Company since the executive committee meeting has not altered the position taken by I. A. A. officials.

The executive committee also ordered the grain marketing committee of the Illinois Agricultural Association to investigate carefully the proposal for the benefit of the association's 63,000 Illinois farm bureau members. The association defines its position as follows:

"Until definite proposals have been made to the board of directors of the Grain Marketing

(Continued on page 3.)

THE LATEST REPORT ON THE GRAIN MARKETING COMPANY

Late Wednesday, July 30, the grain marketing and finance committees, after conferring with President Thompson, Secretary Fox, Treasurer Cowles, Legal Counsel Kirkpatrick and Auditing Counsel Frazier of Frazier & Torbet, Chicago, determined the nature and scope of the investigation to be made into the already completed grain merger. F. D. Barton, Cornell, and W. H. Moody, Port Byron, of the finance committee were present as were H. E. Goemble, Hoeppole, and A. R. Wright, Varna, of the grain marketing committee.

The determination of the grain marketing and finance committees came as the result of a motion passed by the Executive Committee, in session Friday, July 25, ordering an investigation into the grain merger and turning it over to the grain marketing committee and I. A. A. officers to outline the investigational procedure.

The Grain Marketing Company is being asked to furnish complete, detailed independent auditors reports for each of the companies involved for each of the past five years.

Considerable resources will be thrown into the investigation procedure as it is desired by all the officials and committeemen to determine truthfully and from an unbiased standpoint the real value of the merger to farmers. It is realized that Illinois farm bureau members will no doubt be asked to buy stock in the Grain Marketing Company, the incorporated company which has been merged the Armour Grain Company, Rosenbaum Grain Corporation and Rosenbaum Bros. I. A. A. officials wish to be in an authoritative position to advise Illinois farm bureau people.

Competent professional men will be engaged to carry out the provisions of the outlined investigation. Following is the outline for the investigation of the grain merger showing the facts which will be sought:

(1) National Public Policy:

(a) A statement of the legal requirements to be met, if any, to secure the approval of the United States Department of Agriculture and of the United States Federal Trade Commission; together with an indication of the procedure that must be followed in securing such Federal approvals, and the approximate time that will ordinarily elapse in the processes of Federal investigation.

(b) A statement of the legal steps, if any, for the approval of this merger by the authorities of the State of Illinois, e. g., the Secretary of State and the Illinois Commerce Commission.

(2) Place in the Cycle of Grain Marketing:

Opinions should be secured from competent agricultural economists and statisticians as to the place of the facilities which are to be merged, considered as part of the grain marketing facilities of the United States and Canada.

(a) The relation of the merged facilities in scope and volume with other grain marketing facilities in Chicago, Kansas City and Omaha.

(b) The relationship to other grain marketing facilities in Minneapolis, Duluth and Buffalo with particular reference to the improvements in facilities within the past five years at Duluth and Buffalo.

(c) A statement of the existing relationships between the companies that are to be merged and Farmers' Co-operative Elevators in the territory served. For example, what percentage of Farmers' Elevator Companies are now marketing through these three companies that are to be merged?

(3) Valuation and Earning Capacity:

(a) Values indicated by independent certified audit reports (Balance sheets and profit and loss statements) for each company for each of the last five years.

(b) A statement of the properties secured and alienated by each of the three companies during each of the last five years, together with their earnings.

(c) A statement of the depreciation accounts maintained by each of the three companies for each of the last five years.

(d) A statement of the earnings of each of the companies for each of the last five years, classified as between (1) profit or loss from future or speculative transactions; (2) profit or loss from warehousing and commission transactions.

(4) Investigation of Proposed Economies:

The statistics presented by the vendors as to proposed economies should be compared with earnings and expense accounts for each of the last five years.

(5) Investigation of Proposed Plan:

(a) Computation of data necessary to set up estimated balance sheet and estimated earnings requirements necessary in making the investment of farmers in stock safe as to principal and interest on farmers' investment.

(b) Analysis of legal features of proposed by-laws and contract.

(c) Analysis of experience, reliability and cost of management personnel that is to be taken over from the former companies.

Produce Farmers at Prophetstown will Sell Cooperatively

Details of organization and a membership drive for a producers' market will soon be started by the executive committee of the producers' association at Prophetstown, Ill., according to plans worked out with Donald Kirkpatrick, legal counsel of our I. A. A., at a recent meeting of the committee.

The movement for a producers' market, through which poultry products, dairy products and other farm produce will be sold direct to the consumer, was started some months ago but thorough consideration of the advisability of establishing such a market and care in drawing up a contract has wisely prevented a hasty beginning for the market.

The Prophetstown producers' market will be established on a purely cooperative, no-capital, no-profit plan and except for small expenses connected with operation the proceeds of sales will go directly to the sellers. The marketing contract is being given further study by our I. A. A. legal counsel to eliminate all flaws or defects.

A. D. Lynch, our I. A. A. dairy marketing head, with the aid of the executive committee of the Prophetstown market will supervise the campaign for membership and work out details for the permanent administration of the produce market.

The Stephenson County Farm Bureau, one of the largest county farm bureaus in Illinois with around 1,400 members has begun a reorganization upon the township plan.

County Farm Bureau Chairman L. M. Swanzey appointed a committee of three to redraft the county constitution so as to provide for the creation of 17 county township units and the election of the township officers at annual township meetings. The township presidents elected will become the directors of the county farm bureau.

Heretofore, the county farm bureau board has been appointed by the county chairman. This plan has not developed as many nor as active community leaders as was desirable and has lacked, it is thought, the democratic spirit which the election of the leaders and selection of local programs of work in the communities will give.

Farmers' Markets Don't Need License

Farmers' cooperative markets that are not organized for profit and collect no commissions for sales of commodities of its members or shareholders, but make only such reductions from sales as are necessary to defray the expense of operating the market, do not have to obtain a license under the Cooperative Marketing Act of 1923, according to an opinion coming from the State Department of Agriculture at Springfield to our I. A. A. through Donald Kirkpatrick, legal counsel for the Association.

The statement to the effect that farmers' cooperative markets need not comply with the Commission Merchants License Act was the result of many inquiries coming to our I. A. A. from farmers' cooperatives requesting information in regard to license for operating markets.

F. A. Gougler, director of our I. A. A. poulty and egg marketing department, has just completed a three weeks' trip through Iowa, Minnesota, Wisconsin and Michigan, where he studied produce marketing problems in many local markets.

Cotton Growers In Cooperative Move To Sell 1924 Crop

Cotton growers in southern Illinois met in Mound City, July 23, with G. E. Metzger, our I. A. A. organization director, for the second conference relative to the formation of a cotton growers' association.

An organization committee which has for several weeks been studying the possibilities of a cooperative marketing organization made a report favorable to effecting such an organization. According to the plan outlined at this meeting a minimum of 1,500 acres of cotton must be signed up by the owners to be sold through the cotton growers' association.

Four hundred acres were signed up at the meeting and during the next few weeks the committee will sign up the balance of the 1,500 hundred acres. Soon after the minimum is reached, the organization committee will conduct primaries for the election of directors who will meet and effect a cooperative cotton marketing association which will handle the 1924 crop.

Milk producers in Illinois and Missouri are watching with growing interest the Ill-Mo Creamery Company at East St. Louis. The company began buying cream last January 3 on a cooperative basis and has shown a marked uptrend in volume of business done each month. In May 43,000 pounds of butter were manufactured by this company, which is considerably above the average privately owned creamery company.

Marshall-Putnam baseball team defeated Knox county July 18, 4 to 3, making them leaders of the Galesburg district with five games won and none lost.

"I.A.A. DOING REAL BUSINESS," STATES SECRETARY WALLACE

Executive Committee and Directors Hear Secretary of Agriculture Outline Challenge Confronting Us

Editor's Note: Secretary of Agriculture, H. C. Wallace, recognized as official sponsor of the McNary-Haugen bill, stopped off at Chicago July 25, the date of the last executive committee meeting, and took time to speak briefly to our executive committeemen and departmental directors. Although not herein recorded officially, Secretary Wallace left the impression that he is by no means disheartened over the defeat of the McNary-Haugen bill in the last Congress, and, as will be noted when his speech which follows, is read, he thinks (as do many of our agricultural leaders) that agriculture is facing a challenge in the issue: "Should the world's crop set the price of the domestic crop?" His answer is, "No." So is ours. That is one reason why our Association is strong for the principles of the McNary-Haugen bill. The National Council of Agriculture, recently formed at St. Paul, will have more to say about this later.

Following is the talk given by Secretary Wallace as recorded by a stenographer:

"I have been kept fairly well informed concerning the work of the Illinois Agricultural Association, and you have been doing real business for the farmers of your state.

"You know that during every other period of depression there was a tremendous stimulant to farm organizations. It is easy to organize when things are going hard with the farmers. My observation is that in those periods the organization goes through three stages:

"First, through agitation when the evangelist goes out and helps crystalise sentiment and vocalizes the farmers' own feelings. This is an easy period.

"Second, the period of organization—when you go out and get memberships. This is rather an easy period.

"Then you come to the time of administration. That is the test. Organization is not an end in itself, although sometimes I have felt that some of our folks were inclined to think it was; but I guess you people have learned differently, and they have in a good many other states.

"Organization is simply an implement, a thing to be used on behalf of the members, and that period of administration determines whether the organization is going to live or die.

The Third Depression

"This is the third depression I have been through, and the third that a number of you men have been through. I look back to the time when we had the West organized almost as well as it has been during the past three years. And then the organizations gradually soaked away in the ground like a rain in July because they had not got to the point where they say the purpose of an organization is to do certain things for its members.

"Now, the Illinois Agricultural Association has stood out as one of the relatively few organizations of its kind which has been functioning as it ought to function, and I want to congratulate

(Continued on page 4.)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Our Grain Merger Stand

The position of the Illinois Agricultural Association on the recently completed grain merger is one of open-mindedness.

It has been neither indorsed nor condemned by our association. When complete and definite information as to the ultimate channels of the grain movement have been ascertained, when past and present earnings of each of the five merging companies have been determined, when legal questions have been carefully scrutinized, and, probably most fundamental of all, when the general marketing policy of the I. A. A. is set in regard to control of markets or control of product, then our officials will be in a position to advise with weight as to the merits of the merger.

At the present time, considerable time and effort is being expended in an endeavor to find the truth.

It is realized that the merging with ultimate farmer-control may be the greatest opportunity for farmers of the present generation. But should the attempt fail, cooperative marketing would likely receive a set-back for a generation. When one corporation buys another, months and sometimes years are consumed in reaching a definite and clear basis by which the seller and buyer may dicker.

There are so many angles that should be considered that the men investigating the merger and its value to our members have a gigantic task—and an important one.

—o—

Business-Like Methods Increase Collections

Membership dues have rolled in much faster so far in 1924 than in 1923.

Many of the counties which experienced greatest difficulties with collections last year are turning in the highest percentage of collections this year.

We wondered why, so we went to the finance department to find out.

The answer is given in this short statement: "Those counties which experienced difficulty in collecting dues last year and have come to the front this year discovered that it is as necessary to apply business-like methods in collecting dues as it is for the United States government to apply business-like methods in the collection of taxes."

Business-like methods are essential to farm bureau success. We need it in all branches—community, county, state and national. Some have it; others are getting it and still others are in dire need of it, but do not realize their predicament.

Five years ago Sunday schools were universally regarded as unbusiness-like and sloppy in keeping accounts, in keeping contact with their membership and in receiving contributions for the church. Today successful Sunday schools are highly organized with business-like methods supplementing and progressing arm-in-arm with the Golden Text.

In a detailed analysis of the 1924 status of collections of farm bureau dues, L. A. Evans, auditor of memberships in the finance department, shows that the geographical position of a county—whether it lies in "Little Egypt" or along the Wisconsin line—makes but little difference in the rate the members pay their dues. And it's not the size of the county, the number of members or the month of the year the memberships fall due or the kind of crops grown; it's business-like procedure.

He finds that business-like methods are used in the counties where collections are the best. Business-like methods go hand-in-hand with a successful farm bureau.

—o—

Organization Points the Way

By G. E. Metzger, Director of Organization.

The farmer's problems can only be successfully solved in a straightforward business-like way. The solution of these problems is difficult, however, when such a comparatively few farmers know what the agricultural problems are and how to approach them in the way of a solution. The problems of the farmer are not all within the boundary fences of his farm, so a decent understanding of farm relationship demands that the viewpoint of Mr. Average Farmer must broaden.

The principal handicap is the low average price level of agricultural products as compared to the general price level of most non-agricultural commodities. Four principal problems are to be met before that handicap is overcome. They are:

1. Close attention to legislative affairs.
2. Distribution of his own products.
3. Taxation.
4. Economy in production.

Not until the last few years has the farmer's voice been heard in a very forceful way before the law making bodies of the State and Nation. Up until a comparatively short time ago the farmer was not in a position to handle his legislative affairs in the way that it is generally done in this day of organization. Some very definite results have been obtained, but the legislation secured so far at the hands of Congress has not given the farmer much relief. The principal reason for the defeat of proposed legislation, which strikes directly at the farmers' trouble, can probably be pretty well summed up in the old familiar phrase: namely, "The farmer is not well enough organized."

It is a common expression among opponents of the McNary-Haugen bill that the farmers were not agreed on the measure. It was pointed out time and again that only about one-fourth of the farmers of the country are in organizations. Then, evidently, one of the matters which has to do with the farmers securing legislation of the type that will enable him to work out of his difficulties, is the problem of organization. In other words, one farmer in the organization, supporting it morally and financially, with three on the outside desiring in their hearts to ride free, can hardly carry this load in addition to that of the opposition.

The second problem involves a great many things, chiefly among them is cooperative marketing and transportation. Many railroads during the past year have reported big earnings. With sufficient volume of business and efficiency in management it might not be unfair to assume that still some future reduction might be made on freight rates of agricultural commodities. Transportation is a big item of expense to the farmer. It has been clearly worked out by the National Live Stock Producers Association that out of an actual operating expense of the Producers Commission Companies in 1923, totaling $4,987,900, as much as $3,142,500 went for freight. All of which means that 63.02 cents out of each dollar which the American farmer expended in marketing his live stock was paid out for transportation. Problem number 2 on distribution involves the construction and maintenance of Deep Water Ways, which, again is linked up closely with legislative affairs. Cooperative marketing of farmers' commodities is making headway. It will not, however, solve all of the farmer's problems. Most of the work done so far has been confined to handling the commodities locally. It must be expanded into the terminal markets. To handle many of these commodities in a big way involves the use of great sums of money. Inasmuch as the agricultural industry at this time is not in a position to put very much money into a marketing organization it behooves the leaders to work out some sort of plan whereby operations can be financed largely on borrowed money. Organizations of the non-profit, non-capital stock type, are therefore being recommended. In order to obtain the necessary credit it is often necessary to use a long time binding contract covering the commodity which the individual has to market thru his association. Farmers are slow as a rule to grasp the importance of a contract or to turn over even to their own sales agency their products to be marketed in a collective way. This again is a matter of education and organization.

Taxes on farm property have been increased largely in the last few years and seemingly little is being done to check the expenditure of immense sums of money in governmental affairs. This statement in itself outlines a problem which has hardly been touched upon by any sort of civic organization. The matter of equalization of valuations between various classes of property has been studied quite extensively by this association and has brought out some very striking facts. Farm lands as a rule have been valued higher in proportion to actual sales values than other classes of taxable property for taxation purposes. Much work has been done along that line and the results are gratifying. Total reductions in farm land taxes this year approximate $2,225,000. This work must be continued, and it will again involve the support of the individual thru his farmers' organizations to maintain and extend this work.

Economy in production of farmers' commodities is a problem which will always confront every farmer. No matter how efficient a farmers' marketing organization might become there will always be some farmers who go broke for the reason that they are not efficient producers. An organization such as the Farm Bureau can point out the problem and it can pretty largely point out the best practices known today, but if real economy in the production of agricultural products is to be brought about, each individual farmer is going to do that job on his own farm. There are matters in economy in production, of course, such as the buying of supplies, seed, etc., which can only be handled efficiently thru organization.

Much time could be spent in the discussion of each of these problems but it is our aim here only to point out what the farmer's problems really are, and to emphasize the fact that the solution in all of these cases is organization, and that the necessary organization of farmers to handle these gigantic problems will only be perfected when the men who are now members boost night and day for the organization to which they belong, and make every effort to educate neighboring farmers who have not yet caught the vision of the problems of today.

THE LIARS' CONTEST

'RAY FOR KANSAS!

Editor, Liars' Contest:

I read with much interest the contributions of your Illinois Liars—and then with disgust your threat to import some lies from Kansas unless your contributors did better.

I want you to know that Kansas people do not tell lies. The lies that emanate from this land of sunshine, sunflowers and sons-of-wimmin, come from the Illinois people who have emigrated to this wonderful state and who have become victims of temporary mental aberration by the sudden emergence from darkness to light. They get all right after having become acclimated.

It was an Illinois man who, having been in Kansas but a short time, wrote to his brother who was to follow later: "Don't come! This is the most Hellacious climate you ever saw. As I was driving to town yesterday one of my oxen died from sunstroke. Before I could get him skinned the wind turned to the northwest and froze the other one to death."

I think it was another Illinois man who upon his arrival in the state heard a Kansan make a perfectly truthful and reasonable statement about his milk cow having been in heavy flow of milk for some three years without having freshened. He butted in with the statement: "That's nuthin.' My father had a cow that gave three gallons of milk a day for two years, and she never did have a calf, and her mother before her never had a calf."

Mr. Editor, you're right. If you want some big stories follow some of your Illinois men to Kansas. But do it before they have attained the rights of citizenship here. Don't wait for their return, either. They never come back.

Yours in the interest of truth.—Ralph Snyder, President Kansas State Farm Bureau, Manhattan, Kansas.

WE ARE NOT SURPRISED AT ANYTHING FROM MIZZOU NOW

Dear Editor:

In Phelps county, Missouri, before securing the signatures of 99 44/100 per cent of the farmers to the producers' contract, we obtained the signatures of 100 per cent to the Community Promissory Note which follows:

"I promise to pay a regular attendance to my community farmers' meetings at the time and place designated, the interest rate to be 100 per cent; and the principal not negotiable on any meeting date by proper payment of interest; it being understood that failure to pay either interest or principal means that I am to receive with all courtesy a friendship counselee whose duty is to help me receive the true cooperative spirit, and, should I prove to be such a contrary person that I cannot receive such a thing, I further promise to leave the community, join my own kind and make room for a person with an understanding heart and forgiving spirit—the two requirements necessary to golden rule cooperation."

"Lielagly" youre.—S. H. Hess, Rolla, Missouri.

How about it, Illinois? Are there any Sucker defenders?

Us, we spent our vacation in the Missouri Ozarks. The first morning we were there, we were wakened by a series of blood-curdling shouts from the timber. "What," we cried tremblingly, recalling tales of deadly mountain feuds, "is that?" "That yelling?" calmly replied our host, "Why, that's Lute Simpson's oldest boy, Wolf. He's 21 years old today, and they're puttin' clothes on him."—Mary Zirkle, I. A. A. office, Chicago.

ILLINOIS DAIRYMEN TURN TO MARKETING END OF MILK GAME

Getting $80,000,000 Worth of Products to Consumer Is Big Job; Dairy Is a Factory

Editor's Note: This is the third of a series of similar articles written by I. A. A. department directors telling of the work done in each department.

By A. D. Lynch
Director, Dairy Marketing Department

The problems connected with getting $80,000,000 worth of Illinois dairy products each year from the cow to the consumer in the best possible condition are the chief concern of our I. A. A. dairy marketing department. The dairy farmer is a manufacturer. His farm is a factory and his cows are his machines. He is in business to make money. The dairy department is to help him make it.

A. D. Lynch

That dairymen are giving the matter of merchandising their products serious attention is evidenced by increased requests for service. The department during the first half of 1924 has been called upon for advice on dairy marketing problems by 61 County farm bureaus for a total of 243 requests. Eighty-seven problems on how best to organize a co-operative dairy selling institution have been handled by the department in 26 counties up to June 30. Nine new counties this year have asked the director to visit communities within their borders to make a field survey in order to get first hand at the actual problems and difficulties. Sometimes conditions are found to be unripe for the dairymen to proceed with an organization.

The department has no hesitancy in advising dairymen not to form an organization if it is not needed. In fact negative reports on field surveys and organization demands are frequently made. Often the problem is not one of spending some money in order to sell dairy products, but a problem that suggests a cow test association as a better step. There is no use organizing to sell until there is really something to offer on the market.

Sell Cooperatively

In several counties the dairymen have found that they were not getting all the market afforded for their cream. In these communities there was not sufficient volume to warrant investing in a creamery. In such cases the department worked out a plan for selling the cream co-operatively thru a farmer-owned association to the highest bidder. A pool of this kind offers a partial solution to local cream buyers. On such markets the returns for fat are apt to be low unless the dairymen pool their product and, by large volume, operate their own cream station at a saving which means that much added returns.

The I. A. A. dairy department has no quarrel whatsoever with the proprietary creamery interests for they are an important and necessary service organization for the dairy industry of the state. Only when their service in a community is faulty and better service can be rendered to all thru cooperative effort, does the department suggest to the dairymen that they get into this marketing field themselves.

Learn to Stick

Sometimes dairymen who have embarked in a cooperative dairy organization for marketing their products find after they get going that their neighbor who is not in the organization is getting as good a price as the cooperator. This is the disheartening stage. Right here is where the directors or managers must give the members the facts about their institution. If concentrated competition is allowed to break up the organization, it means a return to the old unsatisfactory prices which originally prompted the venture.

Illinois dairymen are learning to stand by their guns. One organization didn't stick. They were getting increased returns thru cooperative effort. Then they said: "We've got what we went after. Let's disband." They did. After a year of spanking with low prices they recently asked the department to help them reorganize their cream selling. They are going to stick this time, unless they let themselves forget their former rough treatment.

While cream prices in Illinois are improving, they are still about 3 to 5 cents lower per pound of butter fat than in Ohio where dairymen are exceptionally active in pooling their cream and letting the buyers bid for it thru their organization.

The cooperative marketing of milk in Illinois has so far been most successful when the product was not only pooled, but distributed as well.

Retail cooperative milk plants are in successful operation in Lake, Rock Island and Adams counties. Similar institutions, but manufacturing butter, are rendering dependable service to their members in Stephenson, Jo Daviess and Carroll counties. The Ill-Mo Dairy Company is the first farmer-owned creamery to operate as a centralizer in Illinois. Although only a half year old it has become well established in the St. Louis territory and has the patronage of over 800 cream shippers in southern Illinois and in Missouri. The department renders advisory service of various kinds to all of these older business institutions.

Confidential Service

Much of the service rendered is of a confidential nature. It is not a policy of the department to divulge the trade secrets of its clients. To do so would directly violate the principles of good business ethics and destroy the close cooperation existing between these cooperatives and the department.

There is a friendly spirit between Illinois dairy associations with but few exceptions. Several of these institutions have already become members of the Illinois Agricultural Cooperatives Association for their auditing and exchange of information pertinent to greater effectiveness and development.

People are consuming dairy products in greater quantities each year. Prices on dairy commodities have held up well. Money is being made and some is being lost in the dairy business. What are your problems? Tell us. Maybe we can help each other.

Due to lack of sufficient space for individual items concerning county picnic dates we are printing the following dates of picnics, together with the principal speakers wherever possible:

Stark county, Aug. 15, A. C. Everingham, speaker.

Montgomery county, Hillsboro, Aug. 19, S. H. Thompson, speaker.

Saline county, Aug. 22, G. E. Metzger, speaker.

Knox county, Aug. 20, at Galesburg. A. C. Everingham, speaker.

Randolph county, Aug. 21. G. E. Metzger, speaker.

Woodford county, Aug. 21, George A. Fox, speaker.

Scott county, Aug. 21, at Winchester, F. D. Barton, speaker.

Marshall-Putnam county, Aug. 22, at Henry, W. E. D. Rummell, speaker.

Monroe county, at Waterloo, Aug. 24, G. E. Metzger, speaker.

Gallatin county Aug. 27, A. C. Everingham, speaker.

Warren county, Aug. 29, A. C. Everingham, speaker.

Brown county, at Mt. Sterling, Aug. 30, A. C. Everingham, speaker.

Wayne county, at Fairfield, Aug. 30, George A. Fox, speaker.

The map shown here represents graphically the places where our I. A. A. dairy marketing department has assisted in solving the problems of selling dairy products.

AWAITING DETAILS ON GRAIN MERGER

(Continued from page 1.)

Company, which was specifically formed to negotiate officially with the five grain companies, and a most careful canvass of the whole situation completed, the Illinois Agricultural Association is in no position to form a definite opinion as to the merits of the proposed merger. The officers of the Illinois Agricultural Association believe that a policy of open-mindedness should be adopted by all farm organizations toward the Grain Marketing Company and what it may recommend and request."

Thompson Declines Offer

Sam H. Thompson, president of the Illinois Agricultural Association, announced Friday that he had declined to become a member of the board of directors of the $26,000,000 - incorporated Grain Marketing Company.

President Thompson, in reporting his declination to the executive committee of the Illinois Agricultural Association, stated:

"That as a member of the Executive Committee of the American Farm Bureau Federation, to whom the plan was originally submitted for consideration, as a member of the special committee which was thereafter appointed to finally approve or reject the plan ultimately developed, and also as president of the Illinois Agricultural Association whose Executive Committee will be called upon later to consider and render a decision on the proposed merger, and, furthermore, bearing in mind clearly the official responsibility to the American Farm Bureau Federation and the Illinois Agricultural Association as an executive, I think it best that I not accept a place on the Board of Directors of the Grain Marketing Company. I feel that there would be less embarrassment to the Illinois Agricultural Association and the executive committee of the American Farm Bureau Federation, of which I am a member, if I serve them in an official capacity only, in the discharge of my duties.

"We should continue our policy of open-mindedness until the new company has fully developed its plans and completed its investigation thoroughly appraising all properties involved so that a definite conclusion clearly stating the merits and demerits of the whole proposition can be presented to us in detailed, concrete form."

Audit Association Offers Tax Service

One of the services which the Illinois Agricultural Cooperatives Association offers to its members is the filing of returns for capital stock tax, as required by all corporations by the Federal Revenue Act of 1924.

Under a recent order of the Commissioner of Internal Revenue the time for filing returns has been extended to September 30, 1924, due to the fact that the regulations relating to the administration of the capital stock tax are being revised to conform to the provisions of the Revenue Act of 1924.

Forms for filing the returns are not yet ready for distribution and for this reason no penalty will be asserted on returns that are in the hands of the Commissioner of Internal Revenue by September 30.

Filing returns is a special service offered to cooperatives who have subscribed to the Illinois Agricultural Cooperatives Association and will be charged on the basis of actual cost, according to George Wicker, general manager of the auditing service. Inquiries should be addressed to him at the I. A. A. offices, 608 South Dearborn, Chicago.

HERE'S WHAT HAPPENED AT THE EXECUTIVE COMMITTEE MEETING, JULY 25

1. Report of the general condition of Egyptian Seed Growers and renewal of their note for $6,000.
2. Investigation of Farmers Terminal Elevator and Commission Co. at Peoria.
3. Grain merger discussion. Mr. Thompson's statement. (Mr. Smith moved that the grain committee and officers of this association be instructed to make an investigation of the proposed grain merger and bring all the facts disclosed before the Executive Committee so that they may intelligently define their position as to the same. Motion seconded by Mr. Bamborough, and carried.)
4. Motion by Mr. Barton instructing officers of this Association to sign agreement between I. A. A. and Illinois Agricultural Cooperatives Association.
5. Report of St. Paul meeting given by Mr. Barton, Chairman of the Legislative Committee.
6. Officers of this Association authorized to represent Illinois Agricultural Association in conference on ways and means for financing the American Council of Agriculture.
7. Plan discussed under which an exhibit representing the work of the Illinois Agricultural Association might be worked out.
8. Report of live stock marketing department.
9. Report of A. E. Richardson, secretary Milk Producers Advisory Committee, St. Louis district.
10. Next meeting of the Executive Committee to be held September 5.
11. J. C. Watson's report.
12. Special meeting of Executive Committee to be held at Lincoln, Ill., August 26, at 8:00 o'clock a. m.
13. Motion authorizing poultry and egg marketing department to draw up resolution reaffirming approval of the I. A. A. of the accredited hatchery plan.

MURPHY WILL SPEAK TO FARM PEOPLE AT ANNUAL I.A.A. PICNIC

Mrs. Sewell To Talk To Women; Committee Will Provide Entertainment for Everyone Who Comes

STOP ALL WORK ON TUESDAY, AUGUST 26. That is the commanding headline on 2,500 big posters scattered all over Illinois this week. Those who don't heed the command and come to our I. A. A. picnic, at Lincoln, may spend many days nursing a grouch because they didn't.

G. E. Metzger, our I. A. A. organization director, has just announced that Frank W. Murphy, Wheaton, Minn., will make the principal address at the afternoon session of the picnic. Mr. Murphy will be remembered by many farm bureau members as the speaker at meetings held at Danville, Springfield, Rock Island and Bloomington in behalf of the McNary-Haugen bill. He was recently elected chairman of the board of directors of the American Council of Agriculture at the St. Paul meeting.

I. A. A. "picknickers" who have set down that day for our annual picnic wont have to worry about bad weather or bad roads spoiling their trip to the Logan County Chautauqua grounds, where the picnic will be held.

Transportation facilities for reaching the grounds are good both by rail and paved road. Two main highways touch Lincoln so that those who drive in cars will be assured of good roads. Railroad facilities are also convenient for coming to Lincoln from all parts of the state.

Sheds for Autos

Once on the picnic grounds no one need worry about the weather. If it rains there are plenty of sheds for automobiles and other buildings where the program can be followed out without a hitch. If it is hot there is plenty of shade, running water and a big swimming pool. Moreover, hot weather is baseball weather as well as "horseshoe" weather.

J. H. Checkley, farm adviser of Logan county, who is in charge of the local arrangements for the annual farm bureau holiday, has plans completed for the entertainment of everyone. He has arranged to have supervision for the little kiddies so that the women folks can turn them loose and let 'em go. There will be slippery slides, teeters-totters and a swimming pool where they can wade. E. I. Pilchard, of the University of Illinois, has been secured to supervise the play and games of all the little folks.

Talk by Mrs. Sewell

Mrs. C. W. Sewell, Otterbein, Indiana, widely known in the middle west as a home bureau and community speaker, will talk to the women at a morning meeting. Her subject, "The Nation's Debt to the Farm Home," will interest everyone.

Almost every farm bureau county in the state will be represented in the horseshoe pitching contest, according to the number of entries coming to Farm Adviser Checkley.

The district teams that will compete for the state farm bureau baseball championship have not yet been decided. There will be a team from the Galesburg district and one from the Springfield district fighting for the state title.

REMEMBER THE DATE, AUGUST 26.

The agricultural committee of the Danville Chamber of Commerce, in Vermilion county has cooperated with the farm bureau on a Boys' Alfalfa Club project. Fifty business men are backing the enterprise whereby any boy between the ages of 10 and 20 may put in an acre of alfalfa, the seed and limestone to be supplied by a Danville merchant. Next year the boy is to return one ton of hay to the business man who financed him in the project.

Crop reports are now sent by air mail from California to Washington in two days. It formerly took nearly a week.

"PITTSBURGH PLUS" GETS DEATH WALLOP AFTER LONG BATTLE

Abolition of "Phantom" Freight Evil by Federal Trade Commission Saves Farmers Money

Pittsburgh Plus is doomed, if not actually ended. If the U. S. Steel Corporation does not appeal a decision rendered last Tuesday, July 21, by the Federal Trade Commission, this iniquitous practice, which costs the farmers of the midwest $30,000,000 annually, and is estimated to cost the farmers of Illinois not less than $3,500,000 each year, will be ended for all time.

If the corporation does appeal to the federal courts, the final victory will only be delayed for a short time, for the decision of the Federal Trade Commission is sweeping and comprehensive, and there is no question as to its justice.

With the information afforded, as the result of the commission's careful and painstaking investigation, covering about five years, the public will never again submit to "Pittsburgh Plus" or any similar practice, either in steel or in any other commodity.

Charged 'Phantom' Rate

Pittsburgh Plus, as all farmers now know, is the practice of the steel mills of charging for all steel as if it was made and shipped from Pittsburgh, no matter where the steel was actually made and shipped from. That is, steel produced at Chicago, or any other steel producing town in Illinois, or in Gary, Indiana, was charged to the consumer at the Pittsburgh mill price, plus freight, not from the mill which actually produced the steel and from which it was shipped, but from Pittsburgh. Therein lay an unearned freight charge of over 15 per cent of the actual price of the steel and this charge the consumer paid and the mills pocketed.

The farmer, as a class, is the largest consumer of steel. Therefore, the farmer was the one who was principally affected by this device of the steel mills.

Four years ago the American Farm Bureau Federation, and our I. A. A. joined whole-heartedly in the fight on Pittsburgh Plus and since that time have been leading factors in that fight.

It took a great deal of money to fight the U. S. Steel Corporation, whose resources are practically unlimited. Therefore, last year the legislatures of Illinois, Iowa, Wisconsin and Minnesota were appealed to for aid in this fight. Illinois appropriated $25,000 and the other three states $10,000 each. The farm bureau in each of these states aided earnestly in procuring these appropriations.

In Illinois a commission of seven was created by the legislature to administer the appropriation and direct the fight on this evil. Sam H. Thompson, president of the Illinois Agricultural Association, was made a member of this commission by the governor, and has taken an active part in the fight.

States Joined Fight

As a result of these legislative appropriations, an organization of 33 states was formed to fight Pittsburgh Plus, this being known as The Associated States Opposing Pittsburgh Plus. Mr. Thompson is a director of this association, and a member of its executive committee.

The victory assures the consumers of the country relief from an exaction of not less than $75,000,000 a year, of which the farmers bore the major part. An appeal to the courts may delay the final victory but it will only be delay. Even should the courts over-rule the commission, there will be final victory, and in a short time for Congress, in view of the facts brought out, will hardly delay in altering the law to fit this situation.

Mr. Thompson made the following statement to the press, which was carried by all the leading press associations, and widely distributed throughout the country, upon the news of this great victory:

"The decision of the Federal Trade commission outlawing Pittsburgh Plus constitutes a well-earned victory for American farmers in general and our Illinois farmers in particular. It is also a fine victory for the Illinois Agricultural Association since the state and national units of the farm bureau started and furnished the impetus for the fight in 1920 and have been actively opposing both financially and physically the principle of Pittsburgh Plus ever since. Many other organizations in the Middle West joined hands with the farm bureau and deserve credit for their initiative and support.

"It is conservatively estimated that the abolition of Pittsburgh Plus will save the farmers of Illinois over $3,000,000 each year, and approximately the same result will apply to the other great agricultural states. The Federal Trade commission in rendering the decision, states that Pittsburgh Plus specifically adds $30,000,000 annually to the cost of steel products bought by farmers in 11 western states, which include Illinois. Our farm bureau investigations show that approximately $55,000,000 is the amount of annual saving effected for American farmers in the aggregate.

Benefits Taxpayers

"This decision, insuring lower steel costs, will also benefit the taxpayers of the state, inasmuch as hard roads consume vast quantities of steel. The superintendent of highways of Illinois several years ago estimated that the additional cost of Illinois roadways in the state roadway construction program of that time due to Pittsburgh Plus was over half a million dollars. Since then, with constantly expanding roadway construction programs, this cost would be immeasurably greater, if the Pittsburgh Plus additional charges were made.

"Another important effect of this decision to the farmers in the assurance of more stable nearby markets, due to greater industrial activity in Illinois towns that have potentialities for steel fabrication. With Pittsburgh Plus abolished these towns will come into their own, and the farmers in their immediate vicinity will feel the benefit of this in a better nearby home market for their products, which will serve to stabilize farm prices and enable the nearby farmers to obtain a greater proportion to themselves for what they produce.

"This victory is conclusive proof that organized and united effort on the part of the farmers is necessary to overcome some of the difficulties which confront the american farmer. This decision could not have been accomplished without the united effort and influence of strong organization.

"It also demonstrates the wisdom of having farmers on the federal boards and commissions; men that can be depended upon as having the interests of America's basic industry at heart."

SAYS FARMERS ARE FACING REAL TEST

(Continued from page 1.)

you on that. You have had good representation from the country and you have got to have that if you are going to do business for your people.

"To me, it seems that agriculture of the United States is in the time of a real test. We have practically got through with the exploitation period. We have occupied the land. Not that there is other land that is to be brought in, but what is left is the sort of land that has to be brought in under high prices, land that you have to put water on or take water off, and that all costs money. We have occupied easily tillable land. During that period of exploitation, a man, and a good wife, who did real work and got a small start could get ahead only by long hours of hard work. We are through with that period. Most of the profit in that period came through increased land values.

Need Brain Work

"Not that we are going to have advance in the land but land is not going to advance considerably. Our present period brings wholly new problems. We have got to have brain work to work with the hand. We have new improvements in labor saving machinery. We figure in the Department that in a relatively short period of time the efficiency of the individual has increased about 18 per cent and on the other hand, you farmers have substantial increases in your fixed liabilities, your taxes, your interest. The mortgage debt on the farms of the United States from 1910 to 1924 is nearly double, taxes on roads and increased cost of government brings wholly new problems before the farmers of this generation and the coming generation. Now the question is whether the people of United States are willing to pay the increased price which comes to the agricultural industry to maintain our sort of agricultural civilization. That we have all been striving for. Whether they are going to do that depends on the intelligence and the vigor with which the farmers of the United States see it. *The red map in the June 25 RECORD shows the vigor with which three-fourths of the United States saw it.—Editor.*

Foreigners Study Our Markets

"The week before I left Washington, delegates from New Zealand, sent over here by the New Zealand government to study how they could enlarge the market here for their butter, came to my office seeking information regarding their United States outlet. And not long ago delegates came from Australia and from Argentina seeking how they can get into the United States with their chief products—thus meeting us in the market of the world. These delegations are all going to the old country. We know Danish butter has been coming in here.

"All those things are going to make organization more necessary. The individual isn't going to count. He has to cooperate with his fellow farmer. Farmers must work through their organizations such as this. Through systematic study of the problems and the adoption of the same sort of business principles used in business, we are going to maintain our basic industry—Agriculture.

A Big Challenge

"I want to tell you that it is the biggest challenge that ever came to any generation of this country. It is the testing time whether America is going to be kept up on Agriculture's expense and whether the stream of potency which has been going into the situation from the American farms is going to be kept up or going to break down until we have the peasant system of farming.

"If this nation had to depend on the children born in the cities for the increase in population our population would not come up to standard. The increase in population is coming from the farm and from the foreign element. During the last hundred years a constant stream of fresh blood comes into the cities, educated at the expense of the farmers without cost to the city—grown up from 18 to 25 years of age and then turned over free of charge to the cities. If cities did the fair thing they would pay 40 per cent of the cost of education of the country people. Now if conditions such as have existed in the past three years continue we are going to drive off the farm the very best blood. In a general way, the best people of the farm is going to be driven off the farm because there is no man but who wants his wife and children to have a fair chance. We, as farmers, are not going to stand such conditions. We have got to become alive to the big necessity of the situation we are now confronting. And, just as you men are doing here, study the situation as it affects you.

Render Greater Service

"See how you can render greater service to your members. Improve their systems of marketing. Improve the whole mechanism of the farm. More than that, study the big national movement that affects farm prices. We have to produce for dollars as well as bushels and pounds. You have to look into the national centers of growth to see what is going on there; that has its influence on the crops. You can produce to the limit. You can double your production, if you please, if the population grows to consume it, but until you pay attention to the matters of large national policy, which, without your realizing it—reduce your dollar down in purchasing value to half of what it is or 75 per cent of what it was or send it up the other way.

"Your production is going to be a rather hard task. You have to employ men who are capable of thinking in those larger terms. Have intelligence of what they want to do and how to do it and then go at it and do it.

"This is not only your own individual job, but it is a duty which has been laid upon you. Don't think the fight is over. The contest is between the industrial East and the agricultural West. We have a big job of education on our hands."

Tariff Agreement To Favor Shippers

An agreement reached recently by the transportation department of our I. A. A. and the L. & N. Railroad, as to the exact interpretation of tariff rates on mixed shipments of livestock over that road, will reduce charges on such shipments along the L. & N.

The litigation in regard to the tariffs arose after L. J. Quasey, director of the transportation department of our I. A. A. filed claims for overcharge made on several shipments from Carmi, White county, to East St. Louis. The case has been before the Illinois Commerce Commission for more than a year.

The method of applying charges used by the L. & N. was held unjust, unreasonable and excessive by the complainant and the case was to have been given a hearing before the Commerce Commission July 22 but after extensive negotiations the L. & N. admitted the error of wrong interpretation of the tariffs and agreed to make the necessary adjustments.

Outing Secretary,
Illinois Agricultural Association,
Chicago, Illinois.

.....192.....

We have organized a group of.....hosts in this neighborhood who will be glad to entertain.....

Chicago poor children for two weeks beginning.....

..... Following are the names of hosts, number and description of children wanted by each host:

Month and Date

Name of Host	No. of Children Wanted	Sex	Age

It is understood that United Charities of Chicago assumes the liability in the case of accident or illness to any of the children sent to us; however, we pledge to exercise proper precautions in the care and treatment of these children.

We will meet the children at.....or
Railway Station

(Please name at least one optional Railway Station)

Remarks:.....

.....

Name of Host Chairman.....

Post Office.....

Rural Route No.....Telephone No.....

There are hundreds of little Chicago slum kiddies who are hoping some good-hearted farm bureau member will give them a two weeks' vacation in the country. Can you take one? You'll enjoy their vacation, too! Fill in the above blank and mail it in to the Outing Secretary.

12TH DISTRICT MEN HEAR AIMS OF NEW FARM ORGANIZATION

Cowles Outlines Purpose of Agricultural Council; Committee Takes No Action On Reorganization Plan

Discussion of the Grain Marketing Company, as recently incorporated under the Illinois Cooperative Marketing Act of 1923 and explanation of the American Council of Agriculture by R. A. Cowles, treasurer of our I. A. A., occupied the center of the stage at the 12th district meeting at De Kalb, July 23. Thirty farm bureau members attended the meeting in spite of the pressing farm work.

G. F. Tullock, Rockford, executive committeeman from the 12th district, presided at the morning session. A report was made by the organization committee which has been considering since February the drafting of a new plan of organization for the district. No definite action was taken due to the absence of several members of the committee. A tour of inspection to the experimental plots of the De Kalb county farm bureau ended the morning meeting.

Discuss Grain Merger

Sam H. Thompson, our I. A. A. president, was to have explained the grain marketing merger and the aims of the American Council of Agriculture but in his absence Mr. Cowles, who was elected secretary of the Council at the St. Paul meeting, July 12, thoroughly discussed the two organisations.

He told of the purpose of the American Council of Agriculture as determined at the St. Paul conference. It is a centralized body of agricultural organizations which will coordinate the efforts of all farm interests toward the enactment of legislation embodying the principals of the McNary-Haugen bill, recently defeated in congress. "The American Council of Agriculture has nothing to do with partisan politics," Mr. Cowles explained. "All we want is equality for agriculture with industry and labor."

In his explanation of the Grain Marketing Company as it was recently incorporated Mr. Cowles showed that such incorporation is a necessary step to make legal any further consideration of the proposal for farmers to purchase the terminal marketing equipment of large grain firms. He repeated the statement made by President Thompson that our I. A. A. had up to that time retained an open mind on the plan of the Grain Marketing Company.

Logan County Gets Land Valuation Cut

As the result of petitions circulated by the Farm Bureau and signed by more than 50 per cent of the land owners in the county, the Logan County Board of Review last week ordered a 15 per cent reduction in the assessed valuation of farm lands. The petitions were signed by over 800 land owners representing more than 250,000 acres of land.

Last year the taxation department of our I. A. A. co-operating with the County Farm Bureaus and county boards of review decreased the taxes of Illinois farmers approximately two and a half million dollars. But Logan county made no reduction in the land valuation until the present time.

The final assessed valuation for 1924 will be about $3,073,000 less than in 1923 following the 15 per cent reduction. The reduction will also lower the tax valuation in overlapping school districts along county lines, where favorable valuations have already been effected in adjoining counties.

The Quincy bankers Clearing House Association is offering to Adams county farmers several prizes of purebred boars and good seed corn to be awarded on the basis of township attendance at the Adams County Fair.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

I A A

Volume 2 | Issued Every Other Saturday—August 16, 1924 | Number 16

PRESIDENT COOLIDGE ASKED FOR A STUDY OF FARMER'S NEEDS

Letter From Council To Insure For Its Product "An American Price for American Requirements"

Stating that the current increase in the price of certain farm products promises only immediate relief, with no assurance for the future, and that the fundamental causes of the agricultural depression have not been removed, the American Council of Agriculture, in a message sent recently to President Coolidge, petitioned the President to have appointed by the Secretary of Agriculture "an extraordinary commission" to study the situation and needs of agriculture and recommend definite remedial legislation to Congress with a view to its enactment during the coming short session.

Unified Agriculture

The American Council of Agriculture was formed at St. Paul, last month, as a result of the unification of agricultural interests during the period of activity in behalf of the McNary-Haugen bill. Pledging itself to safeguard American agriculture, its first definite move to that end was the communication of the following letter to President Coolidge:

AMERICAN COUNCIL OF AGRICULTURE
Organized to Secure
"Equality for Agriculture"
July Thirty-first, 1924.
Headquarters:
1200 Transportation Bldg.,
608 South Dearborn St.,
Chicago, Illinois.

The Honorable Calvin Coolidge,
President of the United States,
The White House.

Dear Mr. President:—

The American Council of Agriculture was formed at St. Paul, Minnesota, July 11th and 12th, 1924, by 150 accredited and authorized representatives of approximately 50 farm organizations comprising practically all national, state and principal local organizations in the United States. The Council is a central body deputed to speak for these organizations on the subjects of this letter by their unanimous mandate. The authoritative expression of its purpose is:

"To secure the enactment by Congress of the necessary remedial legislation to create equality for agriculture with industry and labor under the principles of the McNary-Haugen Bill."

The Council regards the subject as essentially economic rather than political and it therefore refrains from making any comparison between the respective platforms of the Republican, Democratic and Progressive parties. The Council's prime purposes are: To define and make certain the demands of agriculture, to prevent those demands from becoming the football of partisan politics, and, with no attempt to influence the election in favor of any party, to hasten and insure effective and definite action at the short session of Congress.

The Council does not regard the current increase in the price of farm products as fundamentally meeting the requirements of the agricultural situation, but on the contrary believes that these requirements can be met only by definitely and permanently establishing agriculture on a parity with industry and labor by extending to it the principles of the

VIEWS AT LOGAN COUNTY CHAUTAUQUA GROUNDS

Scenes at Lincoln where the I. A. A. Picnic will be held.

Above—slippery slide for the kids.

Below — the "old swimmin' hole."

Above—the drinking fountain.

Below—a snapshot of the administration building.

Center—overlooking the footbridge and some shady spots.

Elwyn Folkers, Harold Gaulrapp and Donald Williams — junior champion dairy judges of the world—with their coach, "Dad" Wise, will be in Lincoln for our I. A. A. picnic. They will have with them the beautiful London Daily Mail trophy which they won at Haywardsheath, England. One of the boys will tell about club work and their trip abroad.

Courts Hold Co-op Marketing Contract To Be Enforceable

In a decision handed down recently the Appellate Court of Illinois for the second district sustained the Circuit Court of McHenry county in its holding that a marketing contract in Illinois is enforceable, both by way of specific performance and by an injunction against the producer from selling outside the cooperative to which he has contracted to sell his produce. The order for specific performance would require the producer to carry out the terms of the contract and compel him to sell his milk through the milk marketing company.

The case was one in which a producer, Arthur L. Bell, had signed a contract to sell all the milk and cream from his cows through the Milk Producers Marketing Company, a cooperative, non-profit corporation. The contract was signed in December, 1923, according to which Bell was to deliver his milk and cream to the cooperative to March 1, 1924, and thereafter, continuously, unless the contract was cancelled by a written notice from the milk marketing company.

The company alleged that Bell's cows produced 47,700 pounds of milk from January 1, 1923, to April 17, 1923, which he sold to parties other than the Producers Company. The latter took the case to the Circuit Court which held that the contract was binding. The defendant carried it to the Appellate Court which sustained the opinion of the Circuit Court.

The marketing company in this instance was organized under the old membership act and not under the Cooperative Marketing Act of 1923. Copies of the written opinion of the Court are available by application to our I. A. A. legal department.

Wicker Will Study At Co-op Institute

George R. Wicker, general manager of our cooperative accounting service, will represent our I. A. A. at the International Institute on Cooperation, which is to be held in 1925, at several points in the United States.

The plan for creating an International Institute on Cooperation was originated at a meeting of agricultural organizations at Washington, D. C., last February. The purpose of the institute is to correlate and assimilate the principles of cooperative marketing.

A temporary organization meeting was held in Washington in April at which arrangements were made for a conference of the organizations represented at the first meeting and other organizations of a bona fide cooperative character. This conference meets in Cleveland, August 11, the deadline date for this RECORD, and continues in session until August 17. Mr. Wicker will attend the conference and give us further information for the next RECORD.

A new motion picture story showing the work of the farm bureau in Illinois is in the making by our I. A. A. and the Homestead Films Company. It will be shown throughout the state this fall.

School Commission Asks I.A.A. Officials To Serve on Council

J. C. Watson, director of our I. A. A. taxation department, and J. L. Whisnand, executive committeeman from the 19th District have been appointed by H. E. Kelly, Chairman of the Illinois Educational Commission, to serve on the Advisory Council to the Commission.

The Educational Commission, created by law for the purpose of reporting to the next legislature on the problems affecting the public schools of Illinois, has asked the assistance of civic organizations throughout the state. The appointment of the Advisory Council was authorized in Chicago recently.

One of the poignant questions relating to the public schools problem is that of taxation, which centers around the equalization of the tax burden by modernizing the present tax system. In the capacity of adviser on taxes Mr. Watson is qualified to assume an important responsibility as a member of the Council.

Mr. Whisnand, as chairman of our I. A. A. educational committee, has pushed the rural school survey, being made by George W. Willet and C. B. Althous for the committee. He has been associated with the schools of Illinois in various capacities, having been Superintendent of Schools in Coles county at one time.

In Effingham county petitions are being circulated to put the tuberculosis eradication question on the ballots at the November election.

LINCOLN WILL BE MECCA OF ILLINOIS FARMERS ON 26TH

Holiday Will Have No Dull Moments; Baseball, Horseshoes, Junior Sports, Swimming and Speaking

Last call for our I. A. A. picnic at Lincoln, August 26!

Illinois farmers who heard Logan county Farm Adviser, J. H. Checkley, tell about the plans for the picnic, over station WLS, last Wednesday noon know that he has arranged a "hum-dinger" of a program and they are getting ready to "pack up their troubles in their old tin Ford" and drive to the Logan county chautauqua grounds the 26th.

Frank W. Murphy

Beginning in the morning with baseball, horseshoes and other sports and winding up in the afternoon with an address by F. W. Murphy of Minnesota, the program isn't going to have a dull moment in it.

Mr. Murphy, who is well posted on agricultural legislative needs, will discuss the agricultural situation as it is today and will tell our farmers about the American Council of Agriculture.

Without wanting to over-do a good thing and yet desiring that our I. A. A. members get acquainted with Mr. Murphy, we are reproducing his portrait in this issue of the RECORD, the third time within a very short period.

Special supervisors will take care of the little children while their mothers listen to a special program for the women folks in the morning. Mrs. C. W. Sewell of Indiana will talk at this meeting on the subject, "The Nation's Debt to the Farm Home."

One of the biggest attractions will be the baseball game for the state farm bureau championship. The title will be hotly contested for by the winning teams in the Galesburg and Springfield districts. The pennant winners in these two leagues will be decided shortly before the 26th.

Hot Horseshoe Battle

The battle for the state horseshoe championship will be equally as hot as that in baseball. Several weeks ago Farm Adviser Checkley reported that farm bureau communities from all parts of the state have entered in the horseshoe contest.

A later report says there will be a four passenger, Italian-built, cabin type airplane near the picnic grounds to take up a limited number of passengers during the day. The plane is equipped with card tables, buffet and radio like a small boat cabin.

Just take a look at the baseball and horseshoe trophies in the RECORD and picture the excitement you will have at the Lincoln picnic! We make a statement similar to one made before our annual I. A. A. picnic last year—"Lincoln will be the Mecca of organized Illinois agriculture on August 26—and no mistake!"

In 1904 the first car of limestone was purchased in Illinois for agricultural purposes. Last year 400,000 tons were purchased.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Don't Forget the Picnic

Don't forget that our I. A. A. state picnic is Tuesday, August 26, at Lincoln. Arrangements have been made so that everyone, from young to old and from frivolous to pious, will have some kind of entertainment.

—o—

We Await the Facts

The public, through farm paper editors, newspaper men, and farm bureau officials from many states, has been invited in to see just what happened in the publicity turmoil during the formation of the Grain Marketing Company. Questions were asked by farm paper editors, newspaper men, farm bureau people and whatnot during a week in which a series of three meetings of two days each was held and were answered by officials of the Grain Marketing Company and of the vending companies.

Gray Silver, Washington representative of the American Farm Bureau Federation and president of the Grain Marketing Company, took the lead in all the meetings explaining the farmer's side. He pointed out many savings through cutting overhead expenses and through the farmer partially controlling his grain market. His points had been conceded by nearly everybody who had followed the undertaking.

The grain marketing man's side was explained by E. F. Rosenbaum of The Rosenbaum Grain Company, one of the firms taken over by the Grain Marketing Company.

Questions that were asked officials of the Grain Marketing Company were answered by them in the light of their existing information and upon which the gigantic deal was consummated.

But did officials of the Grain Marketing Company have sufficient authoritative information before going into the deal? Did the officials have the information on the points enumerated in the August 2 RECORD? Will the developments in the formation of the Grain Marketing Company command sufficient confidence on the part of recognized farm leaders to insure ultimate success?

Our Illinois Agricultural Association has indicated no specific approval of the new Grain Marketing Company. It has made preparation for a thorough investigation and will proceed with dispatch as soon as the information to be furnished by the Grain Marketing Company is made available.

In the meantime, our association is maintaining an independent attitude and reserving judgment. The investigation will be made for the benefit of producers who may be called upon to become members and stockholders. It will not be influenced by propaganda or publicity either for or against the new company. Our association recognizes that individuals who have associated themselves with the new movement may be over zealous and private interests who stand to gain or lose may be tempted to make claims that cannot be substantiated. Our association has a duty to its members; namely, to make a calm and deliberate appraisal by competent and impartial authorities. This will be done as soon as information is made available and in the shortest possible time. If an honest effort is intended by the promoters, they will be given an opportunity to demonstrate their honesty of purpose as well as prove that there is no selfish ulterior purpose to which producers would not knowingly and willing become a party. The open-minded attitude is retained.

—o—

Farm Women, Please Note

Farm Bureau folks, on the back page is your last chance to get a little parcel of humanity to make happy.

The United Charities has set August 19 as the last day they can send poor little Chicago children into the country for outings. There are hundreds of little tots that have been left behind this year because the country folks all over seem to have been too busy this year to give outings to the usual number of kiddies. Last year we placed 463; this year it's only 206 to date.

Hundreds of the little duffers have been disappointed this year. Three brothers and two sisters happily trudged to the station where they were to meet the United Charities worker and be taken to the country. But there were places for only four. The fifth had to stay back in hot, grinding, Chicago all alone. His disappointment was great. You can change at least one or two of these disappointments to happiness by filling in the blank on the back page.

—o—

The Agricultural Situation

By R. A. Cowles, Secretary,
American Council of Agriculture

The condition of agriculture, the country's basic industry, is generally admitted and understood by all who are really informed.

The condition is the result of the position or situation in which agriculture finds itself, in our peculiar American economic structure—out of balance. The defect is now apparent, forcing the farmer to produce at high costs, both of commodities and services, reflecting American standards of living, and to sell such commodities as wheat, corn, hogs and cattle in competition with the world's lowest standards. He is competing with Argentina, Australia, Russia, India, and all other countries. He is forced to meet the competition of rich new soils, of cheap water transportation rates, or peon and peasant labor—all because of the tyranny of the surplus created in an unorganized indpstry—agriculture.

In practical operation, our American protective tariff system operates to the benefit of the producer, as to commodities of which exportable surpluses are produced, only when the industry is organized to the extent that the surplus may be segregated from that portion of the commodity required for domestic consumption—a process that results in the advantageous sale of the major portion, at an American protected price and the lesser surplus, selling in the world's market at lower world's price levels.

Industrial America has long since recognized this principle, and through its organizations, under legislative enactments passed by Congress in its interests, operates accordingly.

Industry has been enabled to organize for export trade with comparative ease. It has involved the formation of **voluntary** organizations in which a comparatively few men were readily in accord or who could mutually adjust their differences for common good.

Agriculture, on the other hand, is carried on in rural America by many millions of our people who are widely scattered into every state of the Union. It is an industry of as many individual plants out of communication with each other. It is utterly impossible for its individual proprietors, either as such or through its voluntary organizations, with limitations, to organize for any such purpose although there may be complete unanimity of desire to do so.

Let the farmer observe the many organized drainage and irrigation districts over the country which were organized under provisions of legislative enactment. Our legislative bodies have recognized in this case the necessity of forming, in the interests of the public, a "public" (involuntary) corporation for the benefit of the majority. No voluntary organization was possible, a fact proven over and again. The human element present precluded it. The tyranny of the minority prevailed. The lands before inclusion in the organized drainage districts were either unproductive or produced in part only, under favorable conditions of rain fall. The promotion of such organized districts has been a stabilizing process. It has stabilized production in the areas organized.

The precedent is already established—years ago. Its beneficial results are proven. The country has been the beneficiary. Not one of the many who have had experience in such matters would venture that the results could be obtained under any process of voluntary organization.

The broad principles, and the recognition of the human element underlying these cases, are **equally** applicable to the problem of segregating the surplus of our major agricultural commodities, so that the greater portion consumed in domestic trade may exchange generally on a stabilized approximate price parity with the commodities and services required by the farmer.

The basic principles embodied in the McNary-Haugen Bill were these—nothing more. The bill was merely an adaption of these same principles to the problem confronting, not only agriculture, but the whole country. The bill as such is dead; defeated in Congress. The principles live on, sound in their economics and now thoroughly recognized over the country by farmers and their organizations,

Quite recently, current prices of certain grains and fat live stock have advanced substantially on the markets. This improvement in prices has been the occasion for widespread, well organized propaganda on the part of the inspired metropolitan press. It would seem to have been rather overdone, but nevertheless the real issue—the disadvantageous position occupied by agriculture due to a fundamental defect in our peculiar American economic structure—is being rather adroitly covered up.

It must be perfectly obvious to the friends of the farmer, as it is to the farmer, that the same forces, both economic and man-made, to which the current advance is attributable promises at best improvement only in the immediate condition of agriculture and do not address its fundamental defect—with no assurance whatever of permanency or stability for the future. Further, that current prices exist today not as an accomplishment of agriculture or its organizations, directly, but on the other hand are quite beyond its control. This is particularly true with production.

Agriculture, unorganized as it is, and through its many millions of individual plants, scattered throughout rural America, incapable of "combining for export," as organized industry does, **remains** subject to the tyranny of the unorganized surpluses of those commodities produced in volumes over and above domestic consumptive needs, as has already been pointed out. Is "big business" advocating, as a sound policy for the farmer, a continuance of this policy? Or rather is it this; that a continuance would leave entirely undisturbed the system and those dealing in the commodities of agriculture?

THE LIARS' CONTEST

Here are some good lies from our own Illinois, the state where everything grows tall—corn, men and stories. Send us some more. We've had some big storms lately, by the way, but some of the old residents have doubtless seen bigger ones. Tell us about 'em—and the more you send the better we like it.

YOU SHOULD START AN S. P. C. F.
(Society for Prevention of Cruelty to Flivvers)

These folks that are complainin' about hard times and all that—they must be cobwebby. I bin makin money hand over fist.

I've got a lot of rough grass land. Along late winter I go to Chicago and buy three, four carloads of poor, run down flivvers that aint come through the winter well, and turn 'em out on grass in the spring. I take these crippled up and run down fliva and with the judicious use of a little baili wire and chewin gum I soon have them climbing these hills on high and puttin on finish off their cheap summer pasture.

I get 'em for about $10 a car, and get 'em all shaped on pasture about vacation time when the market is tip-top. I furnish free air, free water and grassolene, and generally get $75 to $100 apiece for 'em.

Some of the fliva I get are so run down there's nothin to 'em. I have a bunch of goats I feed the carcasses to, and they pick 'em clean to the skeleton. I've known a goat to eat four tires offen a flivver and gain 60 pounds. Henry said he didn't like to see the skeletons layin around; said a Ford, like a mule, wasn't supposed to quit; so I got a contract out of Henry for skeletons F. O. B. Detroit, $10 per car.—Elmer Waddell, Taylorville, Illinois.

AND, SPEAKING OF HILLS—

Dear Mr. Liar:

My dad doesn't like to raise potatoes because it is such hard work to dig them, so last year I persuaded him to let me raise the spuds. I planted them on a steep hill on our farm, with the furrows running up and down the slope. When they were ready to dig, I dug a hill at the bottom of the row, and had dad hold a sack at that hole while I walked up the furrow with a sledge hammer and hammered on each hill of spuds in turn, jarring them loose so they rolled down the hill into the sack.—Charles Nelson, Virginia, Illinois.

GOUGLER REVIEWS WORK OF POULTRY AND EGG MARKETING

Outlines Aims of Department; Illinois Poultrymen Face Long Time Program of Standardization

Editor's Note: This is the fourth of a series of similar articles to be written by I. A. A. departmental directors telling of the work done in each department.

By F. A. Gougler
Director, Poultry and Egg Marketing

The Poultry and Egg Marketing department of our I. A. A. has been asked for a report of progress, plans and policies of this department. Being so new on the job, I hesitate to respond to the requests made. Nevertheless, it is due the member to know where the poultry department stands on this vital subject and what suggestions we have to offer.

The progress made to date means what we have to point to in the way of accomplishments since this department was created.

F. A. Gougler

With the present director, the third one on the job in less than 3 years, it is an easy matter to explain why nothing of a permanent nature in the way of cooperative poultry and egg marketing has been done.

This is not meant to insinuate that my predecessors did not do their duty and do it well, but rather to state that it takes one considerable time to get his bearings on so comprehensive a project as our poultry and egg marketing problem is.

Two Major Projects

After taking up the work in this department in June, 1924, the first thing we did was to find out what Mr. Harper had outlined in the way of a program and it was learned that two major projects were under way, namely; first, establishing accredited hatcheries in Illinois, and second, getting the egg trade to buy eggs on a graded basis.

Both of these projects have been followed up to the present time. About 15 of our largest hatcheries came under the accredited plan this year and we anticipate double the number will come over to the accredited plan next year. From the market point of view accredited hatcheries mean more standard flocks and this in turn means standard market poultry and eggs, which in turn with a market buying on grade should mean more money to the good producer.

Getting the egg trade to buy eggs on graded basis has met with little success, except here and there in the state. It has resulted in a great deal of publicity and a better understanding of the importance of establishing uniform egg grades and establishing price quotations on well established grades.

To Develop Plan

For the next year it is our plan to continue on these two important projects. Farm bureau members will hear more about them in the future.

We are also mindful of the fact that many members as well as farm advisers are wondering what this department has to offer in the way of a plan for marketing poultry and eggs cooperatively. With this in mind we are studying and collecting information as rapidly as possible with the hope of developing during the next year a plan suitable to Illinois conditions. Organizations that are now operating in other states are being studied and data collected.

Study Minnesota Plan

Recently I made a trip to Minnesota to collect information on their plan of organization and business methods. Their plan provides for dividing the state into districts and each district must secure not less than 1,000 members who shall market their produce through their cooperatively owned market house. At the present time Minnesota has seven districts completely organized and selling eggs, or are nearly ready to sell for their members.

Within two years they hope to have the entire state completely organized into districts, probably 30 altogether and a single state agency selling for all of them.

During July it was our good fortune to study three of these districts, one which had begun handling eggs a month before, another had three months' experience and still another about a year of business to its credit.

From these we collected a lot of valuable information. Minnesota has worked out a wonderful system, but with it they are having their troubles. We had the pleasure one evening of sitting in a meeting of the Board of Directors of a district and it soon developed that they had problems which were giving them considerable concern, all of which led the writer to conclude that a great deal of preliminary work must be done in a district along educational lines and surveys before the district is ready for its membership campaign.

Consider Missouri Co-op

Readers of the RECORD and farm papers have noted that at Hannibal, Mo., a cooperative poultry and egg marketing association is being formed which is called the Mark Twain Poultry Marketing Association. Missouri organizers for the past six months have been trying to interest three or four Illinois counties in joining them in this movement, but recently a joint meeting was called at Pittsfield, Ill.

Farm advisers Ray Miller, Adams county, Guy Hustead, Scott county and Frank Barrett, Pike county, as well as farm bureau presidents and others including Earl Smith, chairman I. A. A. Committee of Organization, attended for the purpose of deciding whether or not they should join the Missouri poultrymen in this campaign.

Develop Definite Program

After an all day conference it was voted that we are not ready to undertake such organization.

This action was not taken with the idea of jeopardizing the campaign in the least on the Missouri side but merely for the purpose of waiting until Illinois formulates a poultry and egg marketing plan and develops a definite policy covering these points.

Our I. A. A. members can be assured that at this time the following department heads including myself are developing a proposed poultry and egg marketing plan for Illinois: L. J. Quasey, Transportation; G. E. Metzger, Organization; Donald Kirkpatrick, Legal Aspects; Geo. R. Wicker, Accounting.

When this plan is finally completed it will be submitted for criticism to a committee of market experts of the College of Agriculture, government poultry and egg marketing experts and a large committee of farm advisers. It will probably be six months or a year before this plan is in final form.

Quality Is Obstacle

In the meantime those counties or communities that are eager to do cooperative poultry and egg marketing can very profitably devote their time to studying the production of quality eggs. There is no greater obstacle to cooperative marketing than the question of producing quality eggs. It is the one thing even in our highly developed commercial poultry districts, that requires constant agitation on the part of managers, to get their members to produce a standard product.

Here in Illinois with 95 per cent of our poultry producers on farms that look upon poultry as a side line in farming, it will necessitate a long time program of standardization in egg marketing to bring about material improvement in the production of first quality eggs.

In conclusion permit me to say that no commodity produced on Illinois farms will be so difficult to market cooperatively as poultry and eggs because of their wide distribution, few commercial flocks and lack of understanding on the part of farmers' wives and farm leaders on the importance of quality production.

Until all this is fully appreciated no effort should be made to market these products cooperatively in this state.

Biggsville, Ill.
Aug. 6, 1924.

Illinois Agricultural Ass'n:

Dear Sirs:—Yours of July 31, in regard to Biggsville stockyards; will say that they have them clean. The agent at Biggsville and I have tried for 8 months to get them cleaned. Just three days after you took this matter up they had men in cleaning them. We appreciate your service very much and many thanks.

(Signed)
Paul Stevenson, Mgr.,
Biggsville Shipping Ass'n.

Fair Visitors Will See Work of Our I. A. A. On Big Map

On display at the Central States Fair and Exposition at Aurora, Aug. 15 to 23, is a gigantic representation of Illinois, showing graphically the activities of the several departments of the Illinois Agricultural Association and the influence this state farm bureau organization has in state and national affairs.

The huge map is 10 feet wide by 20 feet long and lies flat like a table. It is being shown at the Aurora Fair for the first time but will later be on exhibition at the Illinois Products Exposition, in Chicago and again at the Springfield State Fair.

The entire state appears green with a crop of imitation grass covering the meadows and fields; the rivers and lakes are represented by real, flowing water and the hills of southern Illinois and other topographical features are graphically illustrated.

A model farmstead is shown with the map, equipped with a farmhouse, a barn and other buildings and farm equipment. Other larger buildings in the exhibit are the Illinois Fruit Exchange building, at Centralia; the State capitol, at Springfield; Transportation building, which houses our I. A. A. in Chicago; a livestock exchange building, warehouse, creameries and farm bureau offices. Miniature farm animals grazing in the pastures portray the livestock producing sections of the state.

Display of Co-ops

In addition to the map, exhibits are on display showing the immensity of the agricultural industry of Illinois and its relationship to other industries. The importance and number of farmers' cooperative elevators, the distribution and service performed by shipping associations, the producers terminal agencies, the farmers' interest in transportation by rail and water and other interesting phases of farm life are shown.

The huge representation of the state and the other exhibits of our I. A. A. are located in the center of the agricultural exhibit hall, serving as a nucleus around which are displayed some 20 county farm bureau exhibits.

The counties having exhibits in the panorama are Boone, De Kalb, Du Page, Grundy, Henry, Kane, Kankakee, Kendall, Lee, McHenry, Mercer, Ogle, Stark, Stephenson, Whiteside, Will and Winnebago.

Raleigh's Torono's Memo, a Jersey cow owned by Sherman Nursery Company, Charles City, Iowa, has just completed a 365 day record which makes her world's champion two year old Jersey for both milk and butter fat production. Her record is 16,000 pounds of milk with 902 pounds of butter fat.

ASK FOR A STUDY OF FARMER'S NEEDS

(Continued from page 1)

protective system in a manner which will insure an American price for the American requirements independent of the world price for the surplus.

To make certain the accomplishment of its purpose, the Council by unanimous resolution at its meeting in St. Paul, pledged itself to use its utmost proper influence to withhold and divert farm support from any candidate for Congress, whatsoever his party affiliation may be, who omits or declines to commit himself to its purpose, as defined herein, or who attempts to obscure his commitments by equivocal language, or who openly opposes that purpose.

The Council specifically affirms that, in speaking for the organized and unorganized farmers of America, it seeks no ill considered action by Congress, nor any legislative privilege for agriculture not required to remove from and equalize to an impoverished American agriculture, the insidious and none the less effective subsidies assessed against it by the aggressions of other groups and the legislative privileges hitherto granted to them at the expense of agriculture.

To this end, and as a means of clarifying all included questions of economics, practicability, and urgency in an atmosphere purged of the elements of partisan and other selfish controversy, and to do so in ample season before the next convention of Congress, the Council, speaking in its proper right for the farm population of the United States, respectfully and earnestly hereby petitions you to direct the SECRETARY OF AGRICULTURE to immediately appoint and convene an extraordinary commission to study the situation and needs of agriculture and to recommend definite remedial legislation to Congress with a view to its enactment during the short session. To be consistent with the spirit of these purposes, such a commission should obviously be non-partisan, should fairly represent agriculture, and should not comprise spokesmen for interests whose circumstances or conduct shows them to be inherently obtuse or selfishly inimical to the project of securing equality for agriculture under our protective system.

Very respectfully,
(Signed) Geo. N. Peek,
President.
R. A. Cowles, Secretary.
F. W. Murphy,
Chairman of Exec. Com.

FARM BUREAUS ARE RECOGNIZED BY BIG QUARRY COMPANIES

Plan of I. A. A. Agreed To By Limestone Producers; Saves Illinois Users More Than $60,000 Annually

After a long period of negotiation, between the limestone quarries of the state and the phosphate-limestone department of our I. A. A., representing the county farm bureaus of Illinois, the quarry companies have recognized the farm bureaus in an agreement which will save Illinois farm bureau members more than $60,000 annually.

A plan drawn up by J. R. Bent, director of our I. A. A. phosphate-limestone department, and accepted recently by most of the large quarry companies of the state, has put the county farm bureaus of Illinois in the best situation they have ever been in on the limestone problem.

J. R. Bent

The plan advanced by the phosphate-limestone department gives recognition to county farm bureaus and provides an inside price by means of discount certificates issued by the bureau to each purchasing farm bureau member at the time he places an order through the county farm bureau. Under this plan farm bureau members will receive from the farm adviser when placing an order, discount certificates which will be accepted by the cooperating quarry companies as payment to the extent of 10 cents per ton against the bill for the limestone.

Set New Record

Our phosphate-limestone department will continue to furnish order forms in quadruplicate and will furnish the blank forms for the certificates. The quarry company will bill the material at the regular price to the farm bureau purchaser, allowing him to deduct 10 cents per ton when remitting by including the certificate as part payment.

It is conservatively estimated that the annual savings to farm bureau members, through the reductions that have been secured in the general price level and through the special discount made available to them, will amount to more than $60,000 as a direct result of the plan.

With the relationship, in general, between the quarry companies and the farm bureaus the best it has ever been and with the price of limestone in most parts of the state at a favorable figure for the farmer, it is predicted that 1924 will break the record for the amount of agricultural limestone used in Illinois.

Marshall-Putnam farm bureau will have a "homliest man" contest. (Farm Adviser Fuller already entered), a hog-calling contest for men and a chicken-calling contest for women. The homliest man wins three dollars worth of toilet articles, the champion hog-caller an automobile spotlight and a linen table cloth will be given to the winning chicken-caller.

FARM ADVISERS—ATTENTION

The committee arranging for sports at the annual I.A.A. picnic has set 6:30 P. M., Monday, August 25, as the deadline hour for entries in the State horseshoe pitching contest. Counties expecting to have teams in the contest must have entered names of their contestants and the farm adviser must certify to their eligibility by that time. This is the latest possible time at which entries can be received and is sufficiently late to allow farm advisers to wire the entry to Farm Adviser, J. H. Checkley, at Lincoln, in case the contestant's county championship is decided the afternoon of the 25th.

LEADERS IN 25TH DISTRICT MEET TO DISCUSS PROBLEMS

Variety of Practical Topics Features Meeting; Indorse Stand Taken By I.A.A. On Grain Merger

Leaders in Pulaski, Union, Jackson, Randolph, Williamson and Franklin county farm bureaus, meeting in Benton, Aug. 6, for the third 25th district conference, passed a resolution approving the stand taken on the grain merger by our I. A. A. executive committee in demanding a thorough investigation of the Grain Marketing Company.

The grain merger was a secondary topic of discussion, however, in the variety of practical farm problems which the conference considered. Fruit and vegetable marketing, egg marketing, the American Council of Agriculture, the tax situation and mutual fire and lightning insurance were discussed thoroughly by farm advisers, farmers and I. A. A. officials.

Three Franklin county girls, the McCollum sisters, or better known there as the West Frankfort Vocal Trio, provided a novel feature in the farm bureau conference world by singing groups of old familiar songs. They opened both the morning and afternoon session of the meeting with songs which brought unusual applause.

Unite Farm Organizations

In the morning meeting, R. A. Cowles, treasurer of our I. A. A., discussed the American Council of Agriculture and the Grain Marketing Company. "The American Council of Agriculture is a single purpose organization," he said. "Its aim is to unite farm organizations in order that we can enact legislation which will embody the principles of the defeated McNary-Haugen bill.

"Agricultural organizations have been speaking in several different tongues and they must learn to speak with one voice. The Council aims to speak for the principal farm organizations on the subject."

A. B. Leeper, director of our I. A. A. fruit and vegetable marketing department and manager of the Illinois Fruit Growers' Exchange, outlined briefly a new plan of organization which the Exchange has adopted. The new plan centralizes the management and operation of the marketing problems and thus far has been very successful, Mr. Leeper stated.

A general round table discussion resulted from an egg candling and grading demonstration by F. A. Gougler, of our I. A. A. poultry and egg marketing department. He illustrated the way eggs should be graded and urged the sale of eggs on the seven-grade basis advocated by the United States department of agriculture.

"We wouldn't think of dumping our entire wheat crop on the local market and receiving whatever we were offered for it, yet that is just what we do under the present system of marketing our eggs," Mr. Gougler said. "The graded system of egg marketing is coming sooner or later. The farmer should learn now how to produce eggs on a graded basis so he will be ready for it when it comes."

Every farm bureau county in the district was represented in the group of 60 who attended the meeting. The 4th meeting of this district will be held in Marion, Williamson county, during October.

Approve I. A. A. Stand

The following resolutions passed at the close of the conference summarize the general sentiment of those who attended the meeting:

Resolved, that the various farm bureaus in the 25th district lend their active support to a campaign to establish grading of eggs, as the first step in better marketing.

Resolved, that it is the sense of this meeting that we express our approval of the stand of the I. A. A. regarding the grain merger as explained by Mr. Cowles.

Resolved, that our vote of appreciation be extended to J. R. Bent for his services in connection with the limestone producers of Illinois and the farm bureau and its members and that each county farm bureau make a special effort to put on a limestone campaign at the present time.

Resolved, that a letter be sent by this conference to Congressman E. E. Dennison, expressing our appreciation for his support of the McNary-Haugen bill.

Resolved, that it is the opinion of this assembly that the American Council of Agriculture has a field of usefulness which cannot be filled by the American Farm Bureau Federation and that we look with favor upon the new organization.

Resolved, that this conference extend a vote of thanks to our district representative, J. V. Lesley, and to the Franklin County Farm Bureau and its officers for their efforts in arranging this conference which has been both interesting and instructive and to the West Frankfort trio that has entertained us so well.

Whiteside county's junior champion dairy judging team, which defeated their English opponents at Haywardsheath last month, thereby winning the gold trophy given by the London Daily Mail, did so because individual members of the team won first, second and fourth individual honors in the contest. America's team scored 1,590 points and England's 1,484. Donald Williams, of Sterling, was the highest scoring individual of the contest with 545 points to his credit, while Harold Gaulrapp, of Rock Falls, was second with 540. Elwyn Folkers, the third member of the team, scored 505 points.

By processing explosives left on hand after the World War, the federal government has made available 100,000,000 pounds of pyrotol, an explosive which is used in clearing lands and building roads.

Over 5,000 hogs were vaccinated during June and July by Peoria county farm bureau members.

The production of milk in the United States was 110,000,000,000 pounds last year.

WATSON TALKS TO MIDWEST FARMERS ON TAX PROBLEMS

Investigations Made Decrease of Hundred Million Dollars in Assessed Valuation of Farm Lands

"I hope none of you have the mistaken notion that you pay no taxes and so are not interested in taxation," John C. Watson, our I. A. A. authority on taxation, told an audience of WLS radio fans recently. "Do not think that the only people who pay taxes are those who pay money to the county treasurer and get tax receipts for it. Do not forget that you also pay taxes in the costs of nearly every article or service you buy. When you pay the rent for your room, or for your house or apartment, or for your office, your rent includes something for taxes on the property. When you pay for the coal for heating your property, your coal bill has something for taxes on the property of the dealer who sold the coal, the railroad that hauled it, and the mine that produced it. So with your bills for gas, electric power, groceries, clothing, and nearly everything else you buy. You get only a receipt for the payment of rent or other bills. But you are paying taxes on the property of most of the people who sell to you or serve you, because they are able to include the cost of taxes on their property in the prices of the articles and services they sell.

J. C. Watson

Reasons for High Taxes

"There are two principal reasons for the great increase in taxes in recent years," explained Mr. Watson. "The first is the decrease in the purchasing power of the dollar to about 66 per cent of its purchasing power before the war. It now requires about 50 per cent more money than it did before the war to buy the same services or the same articles, except most farm products and some mining products. The second important reason for the great increase in taxes is the notable increase in the number of purposes for which taxes are levied. For a longer time than most of us will live this country will be paying for the cost of the great war. We are also asking the federal, state and local government to do many things which we did not ask them to do only a few years ago. We may have gone too far in this direction."

Mr. Watson outlined briefly the tax situation in Illinois as it especially affects farmers, home owners and city tenants. He reviewed for his audience the plan adopted by many farm bureaus in correcting unfair property valuations.

Investigate 56 Counties

The results of the investigation in 56 counties were interesting. In about half of the counties it was found that in spite of wide variations in individual properties, city and country real estate was assessed with fair uniformity between the two classes. In about one-half of the remaining counties or one-fourth of the total number land was found to be assessed at a higher percentage of its actual value than lots, but the differences were not large. In the remaining one-fourth of the counties the differences were larger; farm land in a few counties running as much as 40 per cent or 50 per cent higher than lots.

"The result of our tax investigation in Illinois last year was a decrease of over one hundred million dollars in assessed valuation of farm lands," Mr. Watson said in concluding his talk. "If half of this decrease was reflected in decreased taxes, Illinois land owners paid about $2,000,000 less taxes last winter than they would have paid, had the high valuation of past years remained.

"What has been done by the farmers of Illinois this year can be done by the farmers of any other state. Organization, however, is necessary for individuals cannot get very far with this kind of work."

Our I. A. A. transportation department received a letter last week from Otto Heuer, a DuPage county farmer, acknowledging receipt of a check for $100 in settlement with a railroad company for loss of a cow killed on the right of way. Damages were collected through our I. A. A. because the railroad fence along Mr. Heuer's farm was in such condition as to allow the cow to get out on the right of way.

The claim had previously been declined by the railroad company before our I. A. A. filed a claim for Heuer. The railroad company also repaired the fence.

"The Farm Bureau has brought more returns to the middle west than the members will pay out in dues in the next 25 years," said L. J. Dickenson, Iowa congressman, in a recent picnic address.

Congressman Dickenson also stated his belief that the principles of the McNary-Haugen bill will be enacted into law. "The fight is still on," he declared, "and with the active support of the farmers, through their organizations, success is certain."

Checkley Explains Horseshoe Rules

The state farm bureau horseshoe pitching championship will be played off at Lincoln, at the I. A. A. picnic Tuesday, August 26.

In order to eliminate down to the contenders for the championship in the limited time, the following rules have been adopted: The preliminaries will start promptly at 9 A. M. All county teams entered will draw for places at court and play one game. The winners of this game will draw for places pitching against winners and the losers will pitch in a similar manner against losers. The same method of winners playing winners and losers playing losers will be used until a total of four preliminary games have been played. The eight highest scoring teams in points won will be chosen to go through a similar semi-final contest and from the highest point scorers two teams will be chosen and they will play the three best out of five of games won and lost.

This system we believe will be more satisfactory than one where a team is eliminated when they have lost one game, as it may happen that the two best teams would accidentally draw one another at the start of the elimination. In the above system of total points won in preliminary games good consistent players will sift out to the top of the contest.

J. H. Checkley, Farm Adviser,
Logan County Farm Bureau.

Premiums totaling more than $4,000 are being offered this year by the Illinois State Fair in its junior department for club and school exhibits.

A report of the executive committee meeting shows that Clark county is checking up on delinquent farm bureau members.

BOARD OF REVIEW OF PEORIA COUNTY PONDERS PROTEST

Expect a Later Hearing for Consideration of Figures Presented By Our I.A.A. Official

Following a hearing on August 6, before the board of review of Peoria county by the Peoria County Farm Bureau, the board decided that it would be well to consider the figures compiled by the taxation department of our I. A. A. which showed that city property was assessed on valuations at least 11 per cent below that of country property in Peoria county.

Last year figures were compiled by the taxation department which indicated a 25 per cent difference between valuations on city and country property. Assessors made their assessments on the 25 per cent reduction basis, but the board of review allowed only a cut of approximately eight per cent.

It is probable that another hearing will be called to consider further the figures presented in the first hearing by J. C. Watson, director of the taxation department.

Considerable feeling had been aroused in Peoria county between the board and the farm bureau before the first hearing. The board claimed, through the city papers, that it had been treated with "scant courtesy" by the farm bureau when it sent out 1,200 tax complaint blanks to its members without first consulting the board.

In the hearing Chas. R. Ford, president of the Peoria County Farm Bureau, pointed out that in 1923 the farm bureau had submitted a tax protest, but the appearance of the farm bureau representatives before the board had not even been recorded in the minutes. There are three city men on the board.

To Winnebago county, Iowa, goes the honor of being the first county in the state to be classified as a modified-accredited area with reference to tuberculosis eradication. The order conferring this classification to the Iowa county came from the Bureau of Animal Husbandry at Washington, D. C., July 25.

Farmers living in Winnebago county who ship hogs to the various markets will now receive a price of 10 cents per hundred pounds more than those coming from counties that do not have a modified-accredited classification.

August 26 is a holiday for Illinois farm bureau members. Plan now to go to our annual I. A. A. picnic.

The Illinois Agricultural Cooperatives Association now has a membership of 47 organizations.

Seventeen counties are now carrying on educational campaigns through our I. A. A. tuberculosis eradication project.

Whiteside county farm bureau members have used 3,250 tons of limestone since February 4.

Last Chance To Buy

WOOL BLANKETS

Only 500 Left

These blankets, made up for the I. A. A., are pure wool, 6-lb., double blankets, 72 x 84 inches.

Colors—Gray and White checks, Blue and White checks.

These same blankets would cost $3.50 more if made up under present wool and manufacturing prices.

TO FARM BUREAU MEMBERS.....$11.00
TO NON-FARM BUREAU MEMBERS.$13.00

Order early, through your County Farm Bureau. Cash must accompany order. Blankets will be closed out during the summer and early fall; no more blankets will be manufactured for the I. A. A.

SHEPLER WINS "BIGGEST LIAR SO FAR" TITLE

Three Lincoln Ministers Pick Local Man's Entry In Liars' Contest

DAINTY MEDAL GIVEN BY RECORD

BULLETIN

We are very sorry to learn, just as the Record goes to press, that Mr. Shepler had the misfortune to get run over by a car at the picnic. His arm and leg were injured but no bones were broken. Possibly the injuries are not too serious to keep him from accepting the medal. Durn it all, Mr. Shepler, us guys framed up a big joke on you, and here you go and get hurt! We trust it is not serious, Shep!

"The Biggest Liar So Far" is the honorary title bestowed today upon D. C. Shepler of Lincoln for his high quality contribution to the Liars' Contest which has been running in the I. A. A. Record since spring and which will continue until the annual Illinois Agricultural Association meeting

hich will be at the Universtiy of nois during Farmers' week in Jan- ry. The supreme champion of the ar will be crowned at that time. The winner, Mr. Shepler, is a mem-

(Continued on Page Two)

HENRY C WALLACE

WALLACE WIRES GREETINGS TO I. A. A. MEMBERS

Pausing from his multifarious duties at the capitol of our nation, Henry C. Wallace, Secretary of Agriculture, today wired his greetings and felicitations to members of the Illinois Agricultural Association as they gathered for the picnic festivities at Lincoln. The telegram follows:

Greetings to members of Illinois Agricultural Association. Congratulations on good work already done and more power to you in task of promoting needs of agriculture and voicing the mind of the farmer and stimulating good farming, clear thinking and right living.

Henry C. Wallace.

FAMOUS DAIRY JUDGES HERE

The team of dairy judges from Whiteside county that Illinois and the world has heard considerable about before and since its winning of the international judging contest in England July 11, was on the grounds today.

The boys came as guests of the Logan County Farm Bureau and were invited especially so that Farm Bureau folks could have a chance to meet them.

The Illinois Agricultural Association helped defray their expenses while abroad, as did several commercial companies.

EXTRA!

The Logan County Farm Bureau Baseball team must have thought they were participating in a track meet instead of a ball game this morning when they beat Menard 14-2.

Will Kin of Torberts Become Farm Bureau "Golf" Champs Again?

The Farm Bureau "barnyard golf" champions of 1924 will have to ring up an unusual record in I. A. A. horseshoe history if they beat or improve upon the one which now stands in the Association's athletic annals. When last year's winners, Walter and Harry Torbert, won from Logan county after several gruelling rounds of horseshoe tossing, they took the championship into the DeWitt County Farm Bureau fold for the fourth successive year.

The Torbert boys, 15 and 17 years old when they won the honors of the state last year, were the only 100 per cent victors in a class of nineteen teams at the I. A. A. picnic at Urbana. The youthful champions were given a handsome silver cup as their trophy of victory, engraved with the record of their performance.

For three years previous to the time when the DeWitt "golf" experts annexed the championship title, their father, Ed Torbert, and Joe Heskett, representing DeWitt county, won the honors at all three annual I. A. A. picnics. Mr. Torbert, it seems, is something of a horseshoe pitching mentor. He trained his two boys for a year before the contest at Urbana last year. In the contest they were cool and steady, unusually so for two amateurs.

Both the boys are real "dirt farmers" and real Farm Bureau boosters. Who will be champions after today?

ED TORBERT and JOE HESKETT won the State Farm Bureau Horseshoe Championship in '20, '21 and '22.

Farm Advisers Hunt Scandal For Record

(Farm Advisers in Counties Adjacent to Logan County Contributed Scandal to Picnic Edition of RECORD.)

G. E. Metzger, the energetic I. A. A. organization director, boarded an early train for Lincoln Monday morning about 3:30 to get here in time to set up the exhibit.

The coach was crowded. Only one seat had less than two occupants and this one contained a female. He gently but firmly requested her to get her feet off the seat so he could sit down. She moved 'em, and he sat down.

She was sleepy and she was of the clinging vine type, she seemed to be looking for a sturdy oak. She rode two hours with her head on Metzger's shoulder.

This is all truth because he let it out in a cleaner's shop yesterday when he asked:

"If anybody here knows how to get this red paint off the shoulder of my coat, I wish they'd tell me how."

* * * *

Farmers in Menard County Have a New Worry.

It is reported that the I. A. A. investigation of the Farmer's Grain Merger (The Grain Marketing Company) has brought out that members of the Farm Bureau are responsible for the debts of the new mergers whether they want to be or not. They are liable to the extent of the value of their property, real and concealed, but not subject to jail sentence so far as has been learned. To give the rumor a kick, it is said that the new company is insolvent to the extent of $60,000,000. Wottalife, wottalife!

Our President, Sam Thompson, had the misfortune to drop the Republican plan on his toe when he was before the Republican convention at Cleveland in June. We wonder if the plank hurt him; it was pretty heavy with agricultural promises.

* * * *

Why not at the next annual picnic stage an old fashioned debate as an added attraction to those who don't enjoy baseball and horseshoes. We have plenty of material to draw from and suggest the following subjects and debaters:

RESOLVED: That it is better to be bald headed than handsome.

Affirmative.	Negative.
A. C. Everingham	G. E. Metzger
V. Vaniman	John C. Watson (undecided)
Bob Cowles	Wm. E. Hedgcock
Geo. Fox	Frank Barton
Sam Thompson	A. D. Lynch

* * * *

Just refer your friends to the Liars' Contest if you ever doubt 'em. Political speakers barred to give the rest of us a chance.

* * * *

Farm Adviser Hughes of Menard County has a fishing camp on the Illinois river this summer. The fish stories he could tell would be scandalous, but he's too modest. If he started anything, we'd enter him in the Liars' Contest.

Mrs. Sewell Eulogizes Farm Women

Praising the agricultural industry as the basic avocation of America and farm life as the most wholesome variety, Mrs. C. W. Sewell, talking to the special meeting of women this morning, eulogized the farm wife and mother as a figure of genuine national importance and the one who has really seen life.

"She it is who is upholding the morale of the farm family today and bolstering up the tired faith of the farmer," said Mrs. Sewell, referring to the farm wife as 'the presiding spirit of this farm home. She is praying like the Italian mother who carried heavy burdens up the steep mountain on a weary journey, where the family went to pray at the shrine of the Blessed Virgin, 'I will pray that my little daughters need not carry as heavy burdens as I bear today.'

"The farm woman does not understand bridge or golf, but the world's problems cannot all be lifted by the daintily manicured hands of women who have never lifted anything heavier than a bridge card or a golf club. And this plain country woman, with sunbonneted little lassies or blue overalled lads on either side of her, is a figure of national importance. She is the woman who has trudged across the ploughed field some stormy winter night to help her sister in the hour of trial. She has tenderly dressed the new born babe or silently, reverently composed the limbs of the dead. She has harnessed horses, milked cows, learned the rude surgery of the farm or carried baby lambs and baby pigs into her clean, warm kitchen to save them from perishing; she it is who has really seen life."

Farm Develops Leaders.

Mrs. Sewell pointed to the fact that 87 per cent of those rated in Who's Who in America today were born in farm homes. "There seems no denying the truth of the statement that these leaders were not the result of accident, luck or magic," she stated, "but it was the result of certain conditions and environments that moulded the characters of these individuals.

"The foot of the ladder of success is always crowded with those who will always be followers. Rural life develops leadership in the character of the boy sent half or quarter of a mile from all all with three or four horses and some more or less complicated piece of machinery. As he plows row after row the far-reaching battalions of corn he has time to think untrammeled by companion or distracting in-

(Continued on Page Eight)

First Baseball Championship Played Today

Base ball fans were in their natural element today when Marshall-Putnam and Morgan county tangled horns this afternoon in an effort to determine the championship nine of the Illinois Farm Bureau Base Ball League. Great interest surged under the skins of farm bureau members from both of these counties as the hour for final settlement came on. Unfortunately, the picnic edition of the RECORD had to go to press before the game was finished.

Although Knox and Warren counties were scheduled to put on the exhibition game this morning, Warren county wired Farm Adviser Checkley Monday that threshing was upon them and it would be impossible for some members of the team to get away. The game was to have been between the two counties with second high standing in each of the two divisions of the Illinois Farm Bureau Base Ball League. Favorable weather and previously delayed threshing kept the Warren county boys away. Menard and Logan counties agreed at the last

"SHOULD KICK LEGS FROM UNDER TABLE"

Shooting straight from the shoulder, Frank W. Murphy of Wheaton, Minn., the speaking attraction of the I. A. A. State Farm Bureau picnic at Lincoln today resourcefully aimed his address at the inequality existing between the prices of the commodities which the farmer sells and those he buys, before Farm Bureau members gathered for the annual I. Even though there has been an increase in prices on wheat, corn and fat livestock, Mr. Murphy stated that the fundamental trouble still exists and that united action by all farm organizations through the American

FRANK W. MURPHY
of Wheaton, Minn., Speaker of the Day

Council of Agriculture is absolutely necessary if agriculture is to be placed on an economic level with industry and labor. Mr. Murphy is chairman of the board of directors of the American council and became widely known to Illinois farmers when he spoke at farmer-banker-business men's get-together meetings at Rock Island, Springfield, Danville and Bloomington in the spring. He was active in the fight for the McNary-Haugen bill, having spent considerable time and energy at Washington endeavoring to get the bill passed.

Pleads for Equality.

"Industry and labor are now glutting themselves at their well laden table," said Mr. Murphy. "Agriculture is eating on the floor. But I want you to see that Agriculture is gradually awakening to its unfortunate position in which it finds itself. Unless industry and labor give it a place at their table, it is likely that Agriculture will kick the legs from under the table bringing all down to the same level. We would rather not do it that way; we wish to come up and eat with them in a gentlemanly manner.

"We are here in peaceful assemblage, Farm Bureau folks," said Mr. Murphy. "Many of you have come long distances today to add your presence to the dignity and strength of this Illinois Agricultural Association picnic. We are in solemn conference this day because your inalienable rights have been invaded. Not only you, but all agricultural people find themselves today in economic bondage by reason of the projection across the current of the natural flow of economic laws of

(Continued on Page Five)

I. A. A. ANNUAL FROLIC STARTS OFF WITH BANG

Clear Weather Causes Much Speculation As To Crowd

LINCOLN DECORATES FOR ITS VISITORS

Farm Bureau picknickers from all over the state, but more especially from the central part of Illinois around Lincoln, flocked to the annual Illinois Agricultural Association picnic today for one short spell of "entertainment for everypne."

"Entertainment for everyone" has been the slogan of the Logan County Farm Bureau ever since it contemplated putting on a state-wide picnic within the boundaries of its county for all Illinois Farm Bureau members.

How Many Here?

Speculation as to the number of people who would be here today was running rampant this morning among Lincoln folks. It had been estimated by J. H. Checkley, Logan County farm adviser, who has been untiring in making preparation for the crowd, that from 10,000 to 15,000 people would be here.

As the weather cleared Monday for what looked like a nice, long stretch of good threshing weather, it became apparnt that many farmers would not be able to leave their shocks and threshing machines.

Many Threshing

However, others pointed out that it is still too wet in many places for threshing, so there was possibility for a great crowd.

Automobiles from various counties began to drift into the grounds early this morning. As many as 18 counties were represented by the time many Lincoln folks were eating their breakfasts.

Lincoln Is Host

The city of Lincoln was host of the day. The Chamber of Commerce extended a royal welcome to the Farm Bureau folks. It has been active in advertising the picnic and in helping make arrangements for carrying out the slogan "entertainment for everyone." Flags were hung out early today by local merchants.

The picnic has been widely advertised. Stories about it appeared in over fifty per cent of the papers of the state.

Farm paper reporters were on hand

(Continued on Page Three)

Golf Contest At Picnic Is Biggest Ever

With 20 teams entered, the "barnyard golf" contest surpasses all previous battles held under the auspices of the I. A. A. picnic committees. At exactly 44 minutes and 32 seconds after nine o'clock this morning 40 flashy, clear-eyed, steady-nerved artists of horseshoe tactics took the courts, each determined to take the handsome silver trophy victoriously into his farm bureau fold.

Gradually two by two these brilliant, seasoned, polished mentors of golf artistry have succumbed to the superior pitching of their competitors. As the Picnic Special goes to press only ten teams remain in the thick of the fray.

After the final contest is played off this afternoon, determining the state farm bureau championship horseshoe

(Continued on Page Four)

Lincoln Says "Glad To Have You With Us"

To the Members of the Illinois Agricultural Association:

There is nothing which can please gan county more than to have this endid opportunity to entertain the n of the Illinois Agricultural Asso- tion. Your association has compli- nted us greatly by choosing Lin- n as its place to entertain. As Lin- n is the heart of Logan county and the heart is the seat of all the tter sentiments of human nature, today the heart of Logan county ills with pleasure in welcoming such men as you who are the backbone of these great United States.

Perhaps we cannot convey as noisy a welcome as a great multitude might, but whatever number there are of us we feel the responsibility of such a momentous day and extend to you a thrice warm welcome in which there is sufficient sincerity to equal the heartiest welcome the greatest multitude could extend to you.

Hospitality for Farm Bureau Folks.

We are not ignorant of the fact that

LINCOLN SAYS "GLAD TO HAVE YOU WITH US"

(Continued from Page One)

your coming together here enhances the prospects of future prosperity of this community and enthuses us to attempt to improve our lands and business and citizenry to the limit of human possibility. We hope that in return for the value you bring us we can impress you with the fact that we deeply appreciate your coming and are only sorry that you cannot linger with us a greater length of time.

You know, and we know, that notwithstanding the fact that the city men and the farmer criticize one another for shortcomings which neither understand, the farmer depends upon the city to market his crops and the city man depends upon the farmer for his very life and for his institutions. We believe that such meetings as this will help remove the misunderstandings and will smooth the paths by which the city communicates with the farmers and the farmers with the city to the benefit and prosperity of both business men and the agriculturist. We cannot but here express our hope and trust that both you and the men of Logan county, no matter in which business we may be engaged, will continue in greater and greater peace and prosperity.

C. of C. Realizes Farmers' Needs.

The Lincoln Chamber of Commerce especially realizes the need of broad and sound legislative and commercial considerations to the men your association represent and we pledge our word most heartily that whatever can be done to further just returns for the farmers of this great country for their all important work of furnishing the necessities of life will be done.

As we feel proud in extending to you the freedom of this, our city, which in our loving eyes appears most beautiful, we are even filled with more pride that you have extended us the compliment of paying this visit here.

WM. E. HODNETT,
President, Lincoln Chamber of Commerce.

Difference in Character

The brave and bold persist even against fortune, the timid and cowardly rush to despair through fear alone. —Tacitus.

Emerson in Several Mood

Emerson, the American transcendentalist, was no admirer of St. George, the patron of England, whom he calls "a low impostor originally hailing from Cicilia," who for his crimes was "lynched by an angry mob in A. D. 361."

SHEPLER WINS "BIGGEST LIAR SO FAR" TITLE

(Continued from Page One)

ber of the Logan County Farm Bureau.

Showed Superior Progress.

By reason of his superior prowess in the now famous contest, Mr. Shepler was awarded a pure galvanized iron medal this afternoon by J. H. Checkley, Logan county farm advisor, was never printed since it was thought by the editor of The Record that no other lies would be submitted by Farm Bureau members if Mr. Shepler's was published. It was a simple honest lie; it said: "I never told a lie."

during the community singfest. The medal was of dainty proportions, being only 18 inches wide and weighing slightly more than five pounds. The medal was awarded for the superiority of a lie consisting of five short words.

Three yards of brilliant purple ribbon draped from the medal called the world's attention to the noble inscription on the bronzed face of the medal which read: "To the Biggest Liar So Far in the I. A. A. Record Liar's Contest."

Shepler Pleased.

Bowing and nodding to his many friends who went wild with glee when they heard of the fine victory won by the local man, Mr. Shepler accepted the coveted honor and thanked the management of the I. A. A. Record for its overwhelming generosity.

The selection of "The Biggest Liar So Far" was a tedious task for the three good men who were chosen to make an unbiased study of the large bunch of lies submitted in the contest.

Three Ministers Pick Best Lie.

Three local spreaders of the gospel —the Rev. George Sutton, pastor of the Presbyterian church; the Rev. A. R. Grummon, pastor of the Methodist church, and Father Leo P. Henkle of St. Mary's church—all of Lincoln, comprised the committee named to make the award.

"There was considerable apparent and intentional lack of honesty in the batch of falsehoods," declared one of the ministers. The winning lie was selected for its simplicity and honesty.

Shepler for Stumping.

It was thought by several farm bureau folks in the crowd today that Mr. Shepler would be sought by Republicans, Democrats and LaFollettes to make campaign speeches this fall. It was said that his success in the contest would bring him national renown since politicians the country over have been attempting to gain his ability for some years.

"I felt I had a fair chance for victory when I entered the contest," said Mr. Shepler today after receiving the medal. "Honesty is my watchword; I applied my slogan to this contest and as you see, I have been acclaimed 'The Biggest Liar So Far.' However, I do not wish to claim all the glory. There are men in my own community who would beat me sixty ways from Sunday if they would enter some of their stories. They are good at telling 'em, but they can't write 'em."

The entry in the Liars' Contest which brought renown to Mr. Shepler

PROGRAMS AND TAGS FOR ALL

Five thousand red, blue, pink, yellow, orange and green programs telling the events of the day were distributed to Farm Bureau picnickers as they came in the grounds today.

Another 5,000 tags bearing the inscription: "Boost Farm Bureau Base Ball" were to be disposed of today. It had not been decided whether the tags should be sold or given away. It was thought that by selling the tags, a part of the base ball team's traveling expenses would be defrayed.

It's a wrong road that has no turning.

has at all times maintained an unwavering faith in the integrity and business ability of our Farmers.

Our cooperation is loyal, strong and friendly, and we consider it a privilege to work with you in every way open to us.

It is our sincere wish to make farming operations bring the utmost in results, and we believe a continued balanced program (cows, pigs and chickens) coupled with increased grain prices, means prosperity for all.

Lincoln College Sixtieth Session

Opens Wed., September 10. Registration Monday afternoon and Tuesday preceding.

A NEW DEPARTURE — The "Premier Plan" for instruction of children in music will be put in effect by Miss Cox who has carefully investigated the system during the summer. She will be assisted by Miss Braucher, Miss Heaton, and Mr. Paul Merry. Details will be found in the August Bulletin to be had free upon request. Those interested may telephone L-196 or L-110.

DRAMATIC ART — This department has been fully organized and will be in charge of Mrs. Bennie Dunaway Koch, who is an honor graduate of Park College where she specialized in Public Speaking and English. She has given private lessons in the University of Oklahoma and in Lincoln College. A four-year course is outlined and every branch of Dramatics will be effectively treated either in classes or in private lessons. Those who are interested should telephone X-884.

NEW INSTRUCTORS — Margaret A. Huntington, A.B., A.M. (Illinois) English.
Rev. George S. Sutton, A.M., Ph.D. (Chicago) Bible.
Norman H. Anderson, B.S. (Kansas Agricultural College) Agriculture and Biology.
Corinne E. Houston, B.S. Lincoln) Home Economics.
Wilbur T. Woleben, B.S. (Illinois) Physical Director and Assistant in History.

The facilities, instruction and equipment now offered are the best in the history of the College.

H. L. RICKERT, Dean. A. E. TURNER, President.

EXECUTIVES MET THIS MORNING

Most of the members of the executive committee of the Illinois Agricultural Association arrived late Monday night so as to be on hand for a special executive committee meeting scheduled at 8 A. M. this morning.

The executive committee had a short session. The next regular meeting of the committee is scheduled for Friday, Sept. 5.

BET THIS IS NEWS, EH JOSIE?

Miss Josie Caldwell of New Holland presided over the women's program in the auditorium this morning.

And a very able presiding officer is Miss Caldwell. Maybe she will be following the footsteps of Mrs. Ferguson, the Texas woman who won the Democratic nomination for the governorship of Texas.

Miss Caldwell will have to change her name to a "Mrs." before she can have a plank such as Mrs. Ferguson campaigned on.

Foretelling the Weather

The weather bureau says that the forecasting of weather for more than a few days in advance is attended with great uncertainty. For this reason the national weather bureaus in various countries do not attempt detailed forecasts of the weather for more than a week in advance. Beyond a week the condition of the weather cannot be foretold according to reliable and scientific principles.

Rogue's Compliment

When a rogue appears in a community with ill intent he professes to be an honorable man; he knows that only such are esteemed. It is a great compliment to morality that those who do not practice it, profess to.—Kansas City Times.

Pride of Ignorance

Emerson once said, "There is guid[ance] for each of us, and by lowly li[stening] we shall hear the right word. Great minds are apt to be humble. [It] is the second-rate intellect that is [full] of pride that it sneers at the ver[y] idea of guidance.

CO-OPERATION GETS RESULTS FOR FARMERS

Picnickers Read Story of I. A. A. Activities In Huge Green Map

BUT EXHIBIT LEFT OUT PART OF STORY

Farm bureau picnickers who have been in the administration building of the picnic grounds today studying the big green map which illustrates I. A. A. activities have seen how their state farm bureau unit has been doing real business the last few years.

The plain, graphical representation of the map shows what co-operation between the I. A. A., county farm bureau, The National Livestock Producers, dairymen, grain growers, livestock men and others have been able to do through co-operation.

In the upper end of the giant exhibit a miniature co-operative creamery only partially tells the story of co-operative marketing of dairy products in Illinois. In reality the dairy industry stretches over a generous portion of the state in every direction of which the I. A. A. dairy marketing and tuberculosis eradication departments are working to solve the dairyman's problems.

Shows Co-op Marketing

Through co-operative dairy marketing farmers are able to get more stable organization of the market, protective legislation, statistical and accounting information, effective advertising, which has already increased dairymen's returns millions of dollars annually.

The little Producers commission house which is located at Peoria on the exhibit serves only as a gentle reminder of what the I. A. A. livestock marketing department, the Producers and shipping associations have done for Illinois livestock producers. Our I. A. A. works with the Producers through the county and local shipping associations, practically every county in the state having one or more shippers organizations.

Another project of the livestock marketing department is an annual wool pool which has been promoted since 1919.

Not Much About Poultry

Aside from the shipping association work the exhibit makes no representations of the I. A. A. poultry and egg marketing department which is at present laying the foundation for one of the most comprehensive poultry and egg marketing systems ever launched.

Under the direction of John C. Watson, the I. A. A. taxation and statistics department in 1923 saved Illinois farmers two and a fourth million dollars in taxes through the equalization of valuations on city and farm real estate.

The taxation department director makes analyses of the various classes of property and represents farmers before county and state tax officials.

$60,000 Saved

The phosphate-limestone department which co-operates with the county farm bureaus by pooling limestone orders has made it possible to save Illinois users $60,000 annually as the result of an agreement with leading limestone quarries.

Under the agreement farm bureaus buy their limestone at the quoted price but by applying to the farm bureau office for certificates are able to obtain a discount of 10 cents per ton by presenting the certificates as part payment.

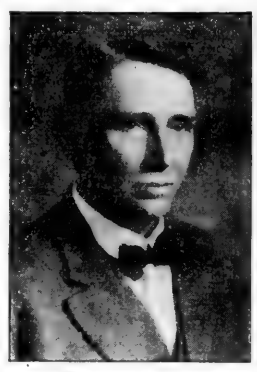
The I. A. A. transportation department in 1923 filed 541 claims, 349 of which were collected for a total of $554.31. Of these claims 175 were light overcharge claims, 33 loss and damage claims and 33 general loss and damage claims. Claims for 1921 have already surpassed this figure.

The transportation department secured a reduction in the minimum carload weight requirements on hogs which saved livestock producers $100,000 per year and assisted in securing changes in livestock mived car requirements which saved farmers $270,000 per year.

The latest service established by the I. A. A. is the co-operative audit and accounting project which is to be partially under the direction of the I. A. A. until it becomes entirely self-supporting and self-governing. The auditing service is known as the Illinois Agricultural Co-operatives Association with the special purpose of providing expert auditing and accounting to farmers' co-operatives.

The audit association is under the general management of Geo. R. Wise who has managed a similar audit service in Minnesota where co-operatives are compelled by law to have their accounts audited.

Membership in the audit association has been under the direction of Vernon Vaniman, a stockholder in the Farmers' Elevator at Verdun. Seventy farmers co-operatives have asked for membership to date. By Sept. 1 there will be at least 75 in the association, according to Mr. Vaniman.



Other departments and special projects of the I. A. A. perform numerous services for I. A. A. members. The finance department keps the records straight and checks up on expenditures. The legal department investigates every case which involves expert legal counsel. The department of information is the middle-man between the activities of the other departments, the county farm bureau and the individual members.

These are a few of the accomplishments of 63,000 thinking Illinois farmers which the makers of the exhibit forgot.

FRANK BARTON PRESIDES TODAY

Frank D. Barton of Cornell, executive committeeman from the 17th district of the Illinois Agricultural Association, presided in his own quaint style today over the mammoth picnic speaking program.

Mr. Barton has been noticeably active in Farm Bureau work. During

FRANK D. BARTON, Cornell
Executive Committeeman from 17th District

the McNary-Haugen bill campaign in the Spring, he spent considerable time in the I. A. A. office at Chicago directing the sign-up of the petitions for the bill which were signed by nearly 60,000 people.

Up at St. Paul when the Council was organized he was chairman of a very important committee—the steering committee. It was a part of his job to help keep bolshevik farmer-labor ledders from sidetracking the Council. But they didn't!

During spare moments he attends to his farm duties. And then he finds time to do Sunday school work in his county. Mr. Barton's a pretty busy man, folks, and it's because he's useful that he's wanted so much.

And now he is official host of the 17th district. It's a fine picnic, Mr. Barton. Thank you.

THOUSANDS HERE FOR I.A.A. ANNUAL PICNIC TODAY

(Continued from Page One)

today to get news from and get acquainted with Farm Bureau folks. J. H. Chtckley gave a talk over WLS, Chicago radio station, telling the world about the picnic.

Local people have been busily engaged in making Lincoln a jovial host for the day. Committees were appointed two months ago by the Logan County Farm Bureau.

The general executive committee consisted of G. E. Metzger, director of organization of the I. A. A., D. C. Shepler, Lincoln; John Lutz, Jr., Lincoln; Will Gardner, Beason; Geo. J. Stoll, Chestnut; E. E. Sisson, Lincoln; Claus Wiggers, Hartsburg, and J. H. Checkley, Lincoln. D. C. Shepler was in charge of concessions. John Schrauf Lincoln, W. C. Coe, Atlanta and Oscar Schultz, New Holland, supervised the horseshoe pitching tournament.

The base ball games were under the care of Ross Quisenberry, Emden, and Oscar Mountjoy of Atlanta. Junior sports were supervised by E. I. Pilchard of the University of Illinois, Alvin Rentschler of Chestnut and Clair W. Brown of Lincoln.

Chas. Schaffer of Beason and Merle Houston of Lincoln had charge of making arangement for the airplane, while Will Gardner of Beason took care of the musical program.

Official greeters were Levi Beaver, New Holland; Wm. Krause, Lincoln; D. C. Shepler, Lincoln; A. M. Armstrong, Lincoln. These men welcomed individual Farm Bureau members at the gate.

Superstition Explained

The superstition connected with lighting three cigarettes with one match has its origin in the fact that in the old Russian funeral service three altar candles were lighted from one taper. It was considered an act of impiety to make any other lights in groups of three and, therefore, ill luck would follow such an act.

All Wear Homemade

Ready-made clothing is unknown in Venezuela and there are 40,000 sewing machines, one to every 100 inhabitants, in use there.

FARM ADVISER FINALLY SAVES SMITH'S LIFE

University Bugologists Mystified By Strange Specimen; Pass Buck

READ STORY AND GET THE MORAL

(By a Farm Adviser)

John, Smith, is a farmer living in Champaign county within sight of the agricultural college. His wife found a small bug in the garden and told him to go forth to the college to have it identified by the college gray beards and to obtain a prescription that would cause the bug's demise (death, folks, plain death).

Smith took the bug to Dean Mumford, he being the boss of the farming college, ought to know what kind of bug it was. The Dean allowed that the bug should be referred to Professor Rusk's department, since it was an animal. Professor Rusk ascertained that the bug lived on vegetation (possibly) and should be taken to Dr. Burlison. The latter decided after a few hours of research that the bug did not live on crops and might even be a cow tick.

Bugists Go Buggy

The following morning Smith returned with the bug, which he presented to Professor Frazier. The latter concluded it had mouth parts for garden crops, after carfeul dissection.

Smith went home to get a fresh bug.

This one was taken to Professor Blair, who recognized the beast as having an entomoligical name which no one knew but Professor Falsom. After Professor Falsom had studied the poor bug his conclusion was that the bug was a bumblebee.

Thereupon Smith made haste to carry Mr. Bug to Professor Flint, as the only livin' man who could classify the bug where it properly belonged. It happened that the professor was in southern Illinois and would be gone for a week.

The Mystery Deepens!

In despair Smith went up town to see if Farm Adviser Burns could get a man who would help him catch up with the work which had piled up while a name had been sought for the bug. Smith got his man and asked Burns: "Did you ever see a bug like this?"

"Sure," says Burns. "It's a potato bug. Kill 'em with paris green."

Moral—The farm adviser has to tell 'em something. (Don't believe it unless you want to, folks.)

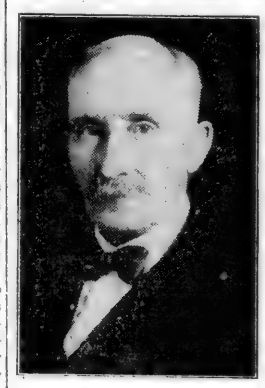
Famous Mount

Mount Parnassus is in ancient Phocis, 65 miles northwest of Athens. It is celebrated as one of the principal seats of Apollo and the Muses, and as an inspiring source of poetry and song. The Delphic oracle and the Castalian spring were on its southern slope. The expression "to climb Parnassus," meaning to write poetry, is an expression once in vogue.—Kansas City Star.

Big Noise, Little Cause

The noise in the receiver of the telephone apparatus is made by the vibration of a diaphragm, but it is hurd to conceive the minuteness of this vibration. A scientific person has recently undertaken to measure this agitation of the diaphragm and has arrived at the conclusion that it is no more than one thirty-fifth part of the millionth of an inch.

Anything can happen now. Insurance men held a convention in Chicago without talking off a single arm.



Here are the base ball and horseshoe championship cups to be awarded today.

Sam Thompson Awards Cups to Champions

None other than the clear thinking, hard hitting Sam H. Thompson, president of our own Illinois Agricultural Association, was to present the beautiful trophies to the state farm bureau base ball and horseshoe championship teams after they had been determined today.

Sam has a bank in Quincy, but his customers hardly ever see him because he's away on business for his 63,000 farmer-constituency. And he's had a lot of business of late! He has a farm or two, too.

There's his tilt with Congressman

SAM H. THOMPSON, Our President

Rainey—that was a good one. Sam stated the farmer's position in that case, all right, all right.

Then there was that trip to Washington with the 57,890 signatures all signed to petitions asking President Coolidge and Congress in general to do their best on the McNary-Haugen bill. The petitions had considerable weight on congressional opinion, but there's a lot of people in Washington who did not do their best for the bill. In fact, we suspect some people were "agin it."

Then, if you remember, he was in the moving picture business with Mr. McNary and Mr. Haugen on the capitol steps at Washington. Like a real movie hero, Sam made a climax to the picture. He dropped the durn petitions right while the camera was grinding.

He'd no more than got a loan or two out of his Quincy bank when this grain merger business came up. And he's been on the jump ever since trying to find a few facts to put his fingers on. The I. A. A. ordered an investigation of The Grain Marketing Company and until the results are obtained Sam says the best thing to do is wait.

English-Born Presidents

Eight Presidents were born British subjects: Washington, John Adams, Jefferson, Madison, Monroe, John Quincy Adams, Jackson and William Henry Harrison. Martin Van Buren was the first president born an American citizen.

Farm Advisers Write Gossip On Each Other

Colby Beekman, president of the Menard County Farm Bureau, has a new job as county supervisor of highways in his county. He has got so used to being cussed that he wants more of it, he says.

• • • •

Here's some deep scandal, folks. Get up close so no one else will hear. Bob Cowles, our I. A. A. director of finance, was to deliver a talk over KYW August 1, but when the director of the station saw his advance copy, he immediately censored it. Too bad, 'stoo bad.

• • • •

Friend: "Well, Checkley, that was a good talk you made over WLS the other night. I've heard you several times and I'll swear I didn't believe you could made that good a talk."

Checkley: "Yeah, I read it off."

• • • •

The Spirit That Wins.

Defeat: "That was certainly fine spirit Cass County showed after the last game with Logan County, wasn't it?"

Feat: "What do you mean?"

Defeat: "Oh, that bottled spirit the Logan County pitcher got for them."

• • • •

Lost: Farm Adviser Hughes of Menard County—left home early Sunday morning, Aug. 24. Late Aug. 25—Mrs. Hughes still looking for him.

• • • •

C. W. Brown, assistant to Checkley, is married. Miss Lucille Stoll was the girl who promised to be his lawful dishwasher. And, just think, she quit a good job teaching school.

• • • •

T. R. Isaacs, Mason County's Farm Adviser, has increased the force by the addition of one boy to his household.

• • • •

The I. A. A.'s charity work is commendable. Many slum kiddies have been given outings, corn shipped to Europe's refugees, etc. Only last winter an applicant sought A. D. Lynch, dairy marketing director, late one night, in his office where he was working all by himself.

The janitor came to Lynch's door and said, "A woman waits without for you, boss."

"Without what?" came the reply.

"Without food nor clothing," said the janitor.

"Give her food and clothing and send her in," was the answer.

(We doubt this. Lynch never works at night, folks.)

• • • •

Glenn Rowell and Ford Rush, the two WLS radio singers who entertained Farm Bureau folks this afternoon with their witty songs and charming voices, have developed a great following among the radio fans of the country.

Today they sang songs that have met with favor in broadcasting. Did you, Mr. or Mrs. or Miss Radio Fan, recognize the voices you heard today as the ones you have enjoyed over the radio in the past?

Well, it's true anyway. But Sears-Roebuck stuff looks different close up.

• • • •

"Tim" Hardin of West Lincoln township attended the I. A. A. meeting at Galesburg last winter.

While up there "Tim" lost his shirt and had to go around with his overcoat on and the collar of it turned up. He blamed everybody he knew up there for the theft of his shirt.

D. C. Shepler, former Logan County campaign manager and otherwise famous, says he knows who got his shirt. He claims he has been up to Galesburg since "Tim" lost his shirt and saw a Swede girl who worked in the hotel, wearing "Tim's" shirt.

What we want to know is how Shepler knew it was "Tim's" shirt the girl had on. Shepler couldn't remember a certain shirt that long and why should he even remember the Swede girl? Then again, why would a Swede girl steal an Irishman's shirt? The world sure are going to the dawgs anyhow!

• • • •

Of all the sad words of tongue or pen; the saddest are these: "We won't get the championship."

Sadly sings Farm Adviser Dickenson of Cass County and poet laureate of the Farm Bureau movement. Dickenson's wife and stenographer is trying to get him to give up baseball for lighter amusements—dancing, for instance.

(Continued on page 7)

VAN ESS
THREE BOTTLE MONEY BACK GUARANTEE

Van Ess usually stops falling hair in a few weeks. But it generally takes about 90 days to start new growth of hair. One bottle of Van Ess, used 1 minute per day, lasts about 30 days. That is why we cannot give you a guarantee except on the purchaise of three bottles.

Buy three bottles at one purchase. This is the quantity for a 90-day treatment. Then use all three bottles on your own scalp as per directions. That's all you need to do. If you are not satisfied with the results, your money will be refunded.

This guarantee comes with a three-bottle purchase of Van Ess Liquid Scalp Massage. For sale at

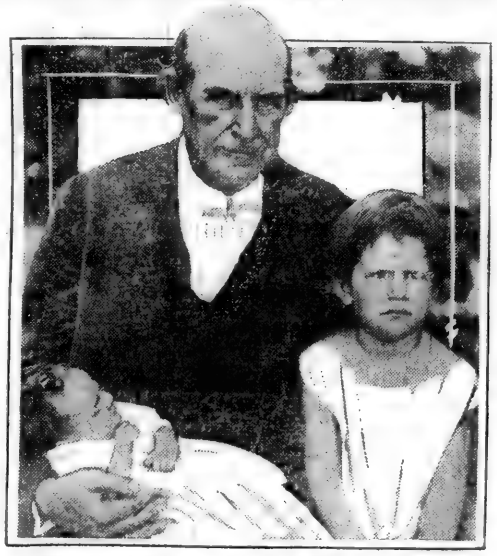
"I Send Greetings To You" Wires Bradfute



O. E. Bradfute, president of the American Farm Bureau Federation, this morning wired the Picnic Edition of the Record the following greeting to members of the Illinois Agricultural Association:

"I send greetings to you as a fellow farmer as well as President of your national organization. I would like to be with you in person but a regional conference of the Farm Bureau executives of The Pacific Northwest takes me to California. We have much the same problems, I find, in every part of the country. Such conditions go to prove the sanity and wisdom of those who first saw the vision of the local Farm Bureaus joining into a state Farm Bureau and the states in turn to federate into The American Farm Bureau Federation. Fly by night or emergency organizations of one kind or another usually are futile and do not leave a record of accomplishment.

The record of your own county Farm Bureaus, of The Illinois Agricultural Association and of The American Farm Federation prove that Agriculture cannot build and progress properly on the theory of "any old port in a storm." Neither can we delegate to other organizations that which we should do ourselves. Agriculture must stand four-square and at no time should there be a break in the lines. We cannot aid in solving our difficult problems, and we have many of them, by shirking our responsibility. No one ever gained anything for himself or those to whom he is directly responsible by not seeking out the right and then aiding to put it over. Boost for Agriculture with your right hand unless of course you are naturally left handed."

O. E. BRADFUTE,
President, American Farm Bureau Federation.

Sale of Girls Gingham School Dresses
Very Specially Priced at
$1.25 and $1.48 Values 98c All Sizes 7 to 14 years

Here are dresses that will appeal to mothers because of the extremely low price and to the little miss because of their beautiful styles. Every dress is well made of good quality gingham in plaids, checks and in plain colors—many have sashes, some trimmed in contrasting colors—others are effectively embroidered.

BLACK SATEEN BLOOMERS
39c
Children's bloomers, sizes 4 to 14 years, well made of good quality black sateen, with elastic at waist and knee. A grade that sells regularly at 49c

BOYS' SCHOOL BLOUSES
59c
Sizes 6 to 12 years, shown in fancy stripes and checks, as well as in plain blue chambray and tan pongee. Regularly priced at 79c.

CHILDREN'S COTTON HOSE
2 Pair 25c
Children's first quality cotton hose, reinforced heel and toe, black only, sizes 5½ to 9½.

MIDDY BLOUSES
At Reduced Prices
Every one well made of good quality Jean, effectively trimmed with braid and emblems.
$1.69 Value $1.25 | $1.98 Value $1.49

FINE RIBBED COTTON HOSE
25c
Children's first quality fine ribbed hose, durable heel and toe, black and cordovan, sizes 5½ to 9½.

Hickory Hose Supporters	25c
Misses' Waist Union Suits	50c
Boys' Waist Union Suits	50c
2-qt. Covered Tin Lunch pails	15c
Waxed Paper, per roll	5c
Pocket Combs, with case	10c

BOYS' OVERALLS
98c to $1.25
Sizes 3 to 18. These come in plain blue, 220 white back blue demin, 4 pockets, bib, also watch pocket.

Loose Leaf Binders 10c and	25c
Fillers for above binders 24 sheets	5c
Ink or Pencil Eraser	1c to 5c
Double Mesh Nets for bobbed hair	10c
Book Straps, 50-in. long	10c
School Scissors, blunt ends, 10c and	25c

5c HANDKERCHIEFS
3 for 10c
Our entire stock of 5c handkerchiefs on sale at 3 for 10c during this school sale. Among the lot are handkerchiefs with embroidered corners as well as plain hemstitched handkerchiefs.

Kathryn Browne, Chicago C[ivic Opera] star, the only opera star w[ho sang to] doughboys in France, wi[ll be the] soloist at the State Conven[tion of the] American Legion at Cham[paign, Ill.,] Aug. 31 to Sept. 3rd, 1924.

Matter of Busin[ess]

Mr. Flubdub was a trifle c[ose. How]ever, he fell in love with [lady and] persuaded her to marry him. [She was] said to be a very capable [manager.] The honeymoon being some[time over,] she approached her husban[d one day] with extended hand. He se[ized it and] attempted to kiss it. "N[ow, John,] don't try to dodge the issue," said the lady firmly. "I want $10."

BOB COWLE'S RED MAP IS FAMOUS

Every state in the Union has had a glimpse of the red map which displays the support given the McNary-Haugen bill during the spring. Requests for extra copies of the map have been so numerous that about 15,000 extra copies were distributed.

R. A. Cowles, director of finance, drew up the map. He had an interesting time in Washington during the fight. He knows more politics than you could shake a stick at. He's also secretary of the American Council of Agriculture.

After drawing up the map, Bob, whose native home is in Bloomington and who is acquainted with lots of people in the Bloomington and Lincoln territories, had a lot of calls to tell about the political significance of the map. So he has been a busy man—but not too busy to buy, try and discard all the standard, non-standard and maverick brands of pipe tobacco he can find. Did you notice his brand today?

Among the important things going on now are straw hats.

Nobody on earth knows as much as a telephone girl in a small town.

GOLF CONTEST AT PICNIC IS BIGGEST EVER

(Continued from Page One)

pitching team, Sam Thompson, I. A. A. president, will present the large silver loving cup to the winners.

The following counties and contestants are represented on the horseshoe courts: Schuyler—Harold Hightower, Linn Eaton; Sangamon — L. T. Kopp, J. R. Christopher; Randolph—Alfred Smiley, Lester Holmes; Stark—Providence Wall, Bracek Berry; Whiteside—Lewis Abbott, David Stuart; Menard—L. E. Heflin, G. G. Welsh; Peoria—M. C. Kown, Wm. Carter; Cass — Herman Schnepper, Carlos Opper; Coles—Geo. and Chas. Temples; Green—N. L. McQuerry, Elmer Garrison; La Salle — A. G. Wheatland, Martin Yocum; Knox—Olaf Oleson, Wm. Eldert; McLean—Samuel G. Smith, R. G. Bright; Henry—Obrecht Brothers; Logan—Rentschler, Stoll.

Lake, Marshall-Putnam and Ford counties entered but no names available.

Now we will see if Babe Ruth has a steady job as home run king.

"THE ONLY WAY"

MURPHY STIRS PICKNICKERS IN MAIN ADDRESS

(Continued from Page One)

artificial obstructions and interferences which have resulted in material advantage to labor, industry and commerce, and to corresponding disadvantages to the nation's basic industry. Our agricultural purposes are peaceful, but at the same time determined and just.

Farmers Not Radicals.

"Many people have found it an interesting pastime to charge groups of farmers in America with being radical; with not knowing what they wanted, and with, being chronic malcontents. No right-thinking citizen of the United States should have such a short memory as not to be fully cognizant of the fact that the most conservative class under the flag are our farmers. One who lives close to nature as the farmer does; one who holds daily communion with the flowers and birds and matches his wits against the forces of nature, and lives out in the open with God must be conservative. If you would understand the soul of America—if you would catch the fire of that great spiritual force that keeps the flame of patriotism burning in this land of ours—if you should know the source from which flows that great current of fine purposes, high resolves, courageous, clean, Christian citizenship, visit the shrines of American farm homes and there you will find it all.

"By the rude bridge that arched the flood,
Their flag to April breezes furled
Here once the embattled farmer stood
And fired the shot heard around the world."

"It is well that this inspirational and never to be forgotten verse should rekindle the fires on the hearthstones of our lives this afternoon. Many in this presence have devoted several months to the great cause of American agriculture. In the long annals of time no more glorious contest has ever been waged for equal rights than many of you have just emerged from. Peace has its conquests quite as much as war.

Progressives Called Radicals.

"In common with you I have been called a radical and a demagogue, but I can say with you that we have had an abiding conviction in the rectitude of our intentions and purposes.

"We sought through legislation—through the McNary-Haugen bill—a square deal for America's agriculture. Through this legislation we did not ask for favor nor for any advantage that we were not justly entitled to. Neither did we ask the government to take away from labor, commerce and industry the advantages enjoyed by them through national legislation. We did not ask for alms nor for anything that we would not gladly grant to others were they similarly situated. We urged that disfavor be abolished. If ever a group of citizens of this or any other republic in all God's time made a fair, unprejudiced, impassioned appeal for that which was justly their due, it was those men who during the last session of congress pleaded the cause of America's agriculture and requested the enactment of this legislation.

"Farmers have always stood for equal rights for all people under the flag through the demand that the purchasing power of the farmer's service, which was taken away from him by national legislation, be restored, are radicals and demagogues, then Patrick Henry was a demagogue and radical when he said 'Give me liberty or give me death.' If, in our determination to preserve for future generation—to the honor and glory of this republic—the sacred shrine of liberty—the American farm home, we are called radicals and demagogues, then those men of long ago who wrested the Magna Charter from over-lords were radicals and demagogues; if we who are heer insisting with Roosevelt that 'all men should be up; not some up and some down, but all up' are radicals and demagogues, then Abraham Lincoln was a radical and demagogue when he freed the slaves.

40,000,000 People Wearing Chains.

"If you, representatives of forty million people who are today wearing economic chains and are the victims of tyranny of law inflated prices and are demanding that you be given the same advantages that others are enjoying—if you who insist that inasmuch as more than one-third of our people depend upon agriculture are bearing the common burdens but are not enjoying the common benefits, which indefensible situation you here seek to correct, are radicals and demagogues, then those patriots who threw the tea overboard in Boston harbor and those who at Concord fired the shot that was heard around the world, were demagogues and radicals.

"And for you, as for myself, I am speaking out that the world may hear and understand that we have no apology to make to any citizen or group of men for the contest which we have conducted as best we could to restore agriculture, labor and industry to an even keel in the life of the nation. And on this occasion I want to say in the teeth of certain individuals in high places who by reason of a selfishness so engrossing—so sordid and so unsympathetic that they could find nothing in the situation of agriculture that called for relief, notwithstanding the fact that the condition of the men and women of America's farms is upon the whole so distressing, so pitiful and so unjust, as to invoke and command the sympathy of every honest citizen in the nation—that the McNary-Haugen bill went down to defeat by reason of the contemptible misstatements circulated by the board of trade, big business interests and others who were opposed to it. This legislation was not defeated because it was bad, but because unknowing people said it was bad. It was not defeated because it was unworkable in fact, but because its opponents falsely said it was unworkable.

Opponents Made Misstatements.

"Everything they said against the bill was unjust. They deliberately put into circulation through the length and breadth of the land infamous falsehoods in respect to this legislation. And as was to be expected, this ready-to-wear, secondhand, canned information, which was altogether misinformation, was spread throughout the nation because they were in a situation to put into circulation. They realized our helplessness and made the most of it. They knew that we lacked organization and finance and took advantage of it. They knew that we were down and in great distress. They knew that the exchange power of the products of the American farms had been deliberately cut in two by the direct and indirect effect of national and state legislation. They knew that the farmer had to deliver twice as much of the products of the soil for fuel, clothing, farm machinery and building material as he did ten years ago. They knew that this condition was the result of a policy of protection for labor, industry and commerce that had become a permanent policy and that the farmer was the unwilling and unwitting victim of it. They knew it was not just for any group of our citizens to have their service measured by a different yardstick than the other groups. They knew that it was unjust, indefensible and stupid to deliberately take away the purchasing power of the farmers of America and knowing that they were submerged and in an unequal situation they used their influence and power to keep them submerged.

Cannot Submerge Farmers.

"We are here today to give notice that no man or group of men—no interest or group of interests—no political party or combination of parties—no power on God's earth can keep in economic bondage—can submerge and reduce to a peasantry more than one-third of the population of the United States. That day has passed. The affairs of the nation cannot function safely with thirty-five per cent of the people slaves and sixty-five per cent free. The world is to witness today a co-ordination of the forces of agriculture in this Republic.

"We exceed any other group. Farm wealth constitutes nearly one-fourth of the nation's total, nevertheless, labor and industrial groups have by organization compelled recognition through radical legislation of demands resulting in material advantages to their groups with corresponding disadvantages to ours. It is because we have just come through a bitter experience in our endeavor, without being properly organized to make the fight, that we are so deeply conscious of what has relegated us to a position of pitiful helplessness. Heretofore, that is, prior to the contest for the enactment of the McNary-Haugen bill, in which national farm organizations joined and worked in harmony, the forces of agriculture have been scattered—nay more, they have had a divided leadership and a disorganized, broken battle front. It is because of this that we are today standing at the open grave of agriculture's first born, and in the solemn presence we are making high resolve that never again shall any legislative child of our meet with a similar fate.

Needed Common Voice.

"If at the opening of the December, 1923, session of Congress America's agriculture had been represented by an American Council of Agriculture as we now have, would there have been any doubt about the enactment of the McNary-Haugen bill? Positively not. Look at this map! (Here Mr. Murphy indicated the map that was reproduced in the RECORD.) No more striking bit of evidence has ever been presented in support of a great cause in all history than this graphic picture of the glorious fight waged by agricultural America for even-handed justice and of the failure on the part of those portions of this country designated in blue on that map to recognize what was honest, fair and just. What an indictment of the statesmanship of a great nation that map is! What an evidence of blind and stupid selfishness! What a pitiful picture that is of the failure of a few men in the great agricultural states of this nation to recognize their plain responsibilities and duties!

Some Leaders Saw Light.

"Some of the leaders in Congress, both on the Democratic and Republican side, had the intelligence to realize that the great oppressed giant, American Agriculture, was arousing. During the months of contest there was plenty of danger signals flying all about which intelligent Congressmen were wise enough to observe. Murmurs of discontent throughout the agricultural states swelled into tremendous rumble as of distant thunder presaging the coming of a great storm. Other Congressmen contented themselves by saying: 'Well, my part of the country is prosperous; my constituents are enjoying advantages under the protective system, and there are not enough of you to enact a law that will bring the farmer into the protective system. Stay where you are and absorb out of your capital the disadvantages that come to you by reason of our advantages.'

"The red mark of guilt is upon the brow of many men in both the great political parties. The McNary-Haugen bill was not sponsored by either of the great parties nor by any party group. It was supported by Republicans, Democrats and Progressives.

Why McNary-Haugen Bill Failed.

"Many of the leaders among all political parties and factions realizing that during the past session of Congress agriculture was not organized—that its forces were not co-ordinated that it could speak with one voice, and that agriculture in its pitifully weak, disorganized condition could not punish or reward at the polls. That is the dismal, but frankly told story of our failure—but again I repeat—that will never be true again. Agriculture, properly organized and co-ordinated in a great, national, legislative force, has and controls four times as many votes as labor or any other group in America. It has enough strength when exerted through a definite, intelligent, leadership as a balance of power, to control political elections in America.

"Again, this is to make it definitely plain that we have no thought, either of organizing agriculture into a great directing force in matters of legislation with a view of imposing upon any other class or group or encroaching upon the inalienable rights of others, but it is our solemn purpose and duty to so co-ordinate the great forces of American agriculture that from this day agriculture will not only be in a position to prevent injustices and encroachments upon its proper rights, but that it will be in a position to demand and back up such demands by its own irresistible forces, that agriculture shall be restored to an equality with labor and industry.

Sincerety in the Cause.

"And that there may be no room for doubt as to the sincerity of our purposes nor as to what agriculture proposes to stand for, we are making no attack here upon the protective system under which through state and national legislation labor, industry and commerce are enjoying advantages which have resulted in the highest prosperity to them that they have enjoyed in many a long year. Agriculture has no thought to enter upon a process of throwing down the citadel of strength and advantages held by others providing, after a fair and determined effort it is enabled to secure the same advantages others enjoy.

"It must be remembered that in common with industry the farmers of America incurred a tremendous debt during the years of the World War. This debt was incurred when the price of farm products was high. That debt is still unpaid and though it was incurred at a time when the price of farm products was from 100 to 200 per cent higher than they are today, the farmer is required to go about the undertaking of paying that debt with prices on the whole about the same level as they were in 1913 for the products of the farm. Industry and labor is retiring the debt it incurred during a period of high prices by returns which they are receiving on a high price level. Labor and industry retires its debt by paying one dollar for each dollar of obligation, while agriculture is retiring its debt by paying two dollars for every dollar of obligation.

Should State Case Clearly.

"The case of the American farmer should be fairly stated, understood definitely and dealt with accordingly. Car window, swivel chair, and propagandist farmers—of whom we have a very considerable number in America—have for years spread, and they are still spreading throughout the nation misleading and contemptible stories, misstating and misrepresenting the situation of the man on the farm. They have gone about this deliberately. They occupy positions which entitles them to their opinions and statements considered by the great consuming public. No more deliberate attempt to misstate the situation of a great group of our people has ever been made in the history of the Republic than has been and is being made at this time to deceive the consuming public in respect to the actual status of the man on the farm. Two matters stand out prominently in respect to the situation of agriculture. First, there is this untruthful propaganda to which I have already called attention and which is damning and demoralizing in its influence. Second, we have addressed to the solution of the problems of the farmer the least intelligence that has been addressed to the solution of any great national problems in all the history of the Republic.

People Want the Truth.

"I am firmly convinced—and this conviction is the result of personal experience in addressing many audiences upon this subject—that the American people want to know the exact truth about the situation of the farmer and understanding it, have a definite desire to settle it utterly regardless of whether it would result in disadvantages to them or whether it would increase the cost of food. Every right thinking American citizen ought to want to lend his influence to abolishing disfavor and bringing the farmer into a proper relationship with labor and industry. And the solution of this problem of agriculture is not one to be solved by any particular political party.

"We have prided ourselves throughout our glorious history upon being able to declare that no wrong exists long in America without being righted. One of the fundamental ideals of our government makes it a part of the creed of our everyday life that every citizen shall be permitted to go about his daily business without bearing the burdens of others and without wearing shackles that are imposed upon him by reason of advantages to others. It is no part of America's creed, social, business, political or otherwise, that the purchasing power of the service of any of our citizens should be much less than that of others.

Fault of Nation's Statesmen.

"The disparity in price between what the farmer receives for his products and pays for what he uses is an indictment against the intelligence and statesmanship of our leaders. It is indefensible. It cannot longer exist without the most serious menace to the national welfare. The forty million of the rural districts exert such a tremendous political and social influence in this Republic that their submergence for any extended period of time would be fraught with the gravest danger to the national welfare. Not only is the business structure of the nation threatened in a manner so profound and so apparent that in our judgment nothing seems clearer than that all citizens should agree that behind common breastworks—behind united lines—behind every citizen and every group of citizens in the country, the flag of the Republic should be planted, and in its name and in the name of everything we hold dear in America, we should go about our plain duty of restoring agriculture to a situation of equality.

Cannot Control Farmers' Production.

"Exportable surplus of food products is a national economic necessity. To control the production of meat and grain on farmers of America to the point of consumption is humanly impossible. Moreover, it would be shadylous policy. We should have on hand at all times several months supply of food. It would be a serious mistake in this great nation of ours to have our food supplies at any time in danger. For years foreign countries have consumed our surplus meat and grain products. The surplus on hand in the world today is rather limited. Lean years offset the fat years. For every pound of meat and every bushel of grain that is brought into the country. But since the price of the surplus of farm products fixes the domestic prices, the farmer is in a situation of much gross inequality that his problem cries aloud for immediate solution.

"The farmer is compelled—he has no alternative, but to buy what he requires in a domestic, stabilized by law, protected market, at prices ranging from 100 per cent on an average above the 1913 level in this country. At the same time he is compelled—he has no alternative—but to sell at prices that are offered him on the part of a world market in competition with the peon and peasant of other lands on a level of prices substantially the same as those prevailing in 1913. He must pay taxes, support schools, churches, build roads, and bear all other burdens common to other citizens, and at the same time contribute to the maintenance of a law stabilized, protected, domestic market, and at the same time sell the product of his toil not only abroad but domestically on the basis of the poorest paid labor of the whole world. Such a situation is not only intolerable, but it is so manifestly unjust that it challenges the purpose and soul of the American people to correct this abuse and injustice.

Adamson Law Protects Labor.

"Every eight-hour day law, whether state or national, every regulation of telegraph, telephone, electric light and gas rate, the restrictive immigration act, (and we favor the restriction of immigration) the Adamson law, the tariff law, the transportation act, the labor board, coal board, and all other interferences with natural economic laws by such legislation places a burden upon America's farmers. These burdens have become intolerable. The farmer is bearing injustices without proper representation or advantages. It is just such situations as these that have caused people throughout all ages to rise and assert themselves. The existence for a period of more than four years of such an unjust situation in this great Republic of the West is the most terrific indictment ever laid against the ability of the American people to govern themselves.

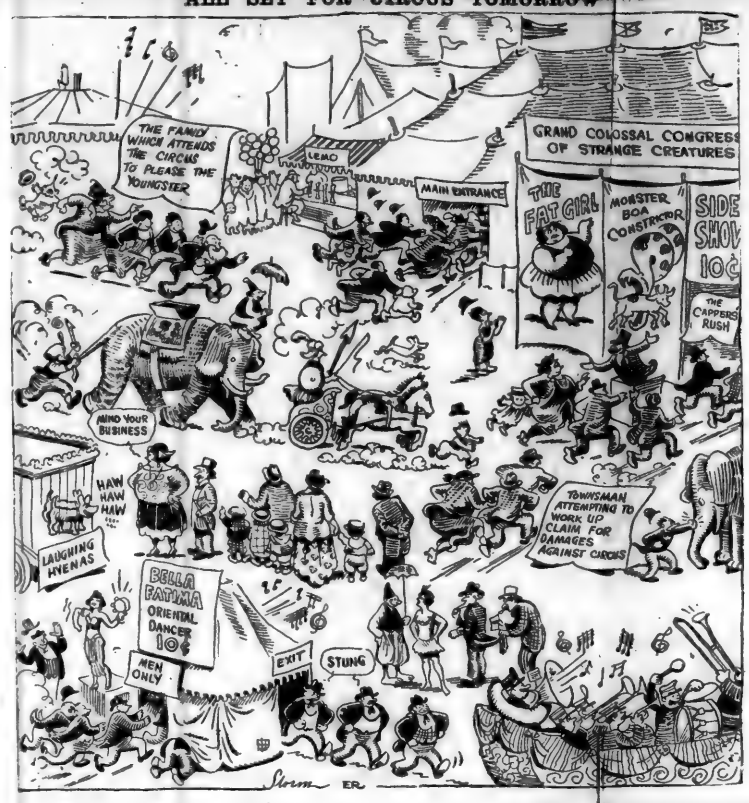
"Inasmuch as the farmer is compelled to pay twice as much for clothing, fuel, building material, machinery and other farm equipment as he did in 1913, because of the cost of the nation's protective policy, and is compelled because he is outside of the protective system to sell all of his products on the basis of the world market, labor and industry is enabled to pass on all increase in price which it has to pay by adding to its product each additional cost item, and when these products reach the farmer he must not only pay the price asked and carried on the increased cost to any one. Operating as he does without protection on the basis of the world market, he is compelled to absorb the loss, in increased cost of what he buys, out of his capital, and that is why today America's farm homes, as well as the chattels of the farmer, are bearing the crushing burden of billions of dollars of indebtedness. But the point of absorption of the ability of the farmer to absorb out of his capital these increased costs and losses has been passed and the nation is confronted with a serious business situation.

Present Prices No Permanent Relief.

"The increase, during recent weeks, in the price of wheat and rye is due to a situation which propagandists outside of the agricultural industry do not concede. The situation is being misrepresented to the public to the end that the problem of the farmer shall not be understood. There is a short world crop of wheat and rye. The prospects for a corn crop in this country have never been so unsatisfactory at this season of the year. The crop is very backward and lacking in promise. Natural causes can never influence unnatural causes. The sale of farm machines in 1924 is only about 25 per cent of what it was before the World War.

Farmers Pay, and d Pay.

"Notwithstanding this fact—notwithstanding the fact that the warehouses are filled with plows and drills, a farmer cannot buy any one of these articles for a cent less than if sales were 100 per cent of the output. Labor and industry set their price regardless of natural conditions. Wages of railway employes are just the same whether business is good or bad. Cotton is high at the present because there have been three short crops of cotton in succession. The farmer's business cannot go along with labor and industry so long as their prices are on artificial, law protected basis, and the farmer is subject to weather and other crop conditions throughout the world.



"But while wheat, corn and rye are some higher, a farmer today is receiving only one-half the cost of production of pork and about 60 per cent of the cost of the production of his cattle. The present price of wheat and rye is about 65 per cent of the cost of production.

"Agriculture is today carrying the combined burdens of labor, industry, transportation and commerce. Exports of farm products have made us the creditor nation of the world. Beautiful crops have been the pride and glory of the Republic for years. We have taken great pride in our basic industry. But today while labor, commerce, transportation and industry are highly prosperous, agriculture languishes to decay. What a spectacle! When agriculture asks for equality it is met with the cry that its demands are uneconomic. How absurd! Any legislation that interferes with the natural flow of the current of economic law is properly chargeable with being unsound. It just depends on what we mean by unsound. If by law the farmer can be compelled, as he is today, to pay about $15 additional by reason of the tariff on an ordinary suit of clothes; if, by law, a farmer is compelled, as he is today, to pay nearly twice as much freight upon what he produces and purchases; if, by reason of law, a farmer is compelled, as he is today, to pay twice as much for coal and building material then does it lie in anybody's mouth to say that through the enactment into law of the same principle we ought to have to say what it costs the farmer to have to pay what it costs the farmer to produce the food we eat. The farmer is through being the wall flower at the dance; he is all through paying for the music and furnishing the banquet for the celebration. He has played the servile part just as long as he is going to do it and just, as long as anybody should expect him to do it. He has waited at the table. He insists on the closed door being opened up. Either the breaches in the protective wall through which the foreign food destroyer him must be closed, or the entire protective wall must come down. What is the sensible thing to do? Bring the farmer into the co-partnership with labor and industry and give him a square deal or throw down the entire protective system and dilute American strength with the weakness of the world? We believe that all should be treated alike, and that under existing conditions the farmer should be given precisely the same protection that is at present shown to others.

"Napoleon said that God was on the side having the heaviest artillery. He also said that his strength lay in the co-ordination of his forces. This is the hour of mobilization. All of our siege guns are to be moved into position. We are to go forward under no command. There is to be no doubt about our objective. We are no longer to be charged with not knowing what we want. All of the farm organizations of America are to be bricaded with other forces in a common offensive. We are to be in a position to reward our friends and punish our enemies. We are forced to take this position by reason of the activities of other groups which have resulted in advantages to them and corresponding disadvantages to us. We will only ask for our rights, and all the forces desiring to keep us in a situation of inequality and servitude shall never prevail against us.

The subject is fundamentally economic rather than political. Certainly it should not become the football of partisan politics. Republicans, Democrats and Progressives have all included agricultural planks in their platforms which promised to secure equality for agriculture. But we have been well fed up on promises. It is now our solemn duty to carefully endorse candidates for public office, who, regardless of partisan politics, will pledge themselves to secure equality for agriculture with industry and labor at the next session of Congress.

ALL SET FOR CIRCUS TOMORROW

Took Parrot's Advice

It was close and sultry, a storm was coming up, causing my rheumatic pains to make me groan. I was alone. From behind a voice said, "Forget it." I looked and saw no one. The voice repeated, "Forget it." In the transom of the door opening on the rear porch sat a parrot, which belonged to a lady across the alley. It had flown away when its cage was being cleaned. When my rheumatism pains me I think of the parrot and forget it.—Exchange.

WALTER P. CHRYSLER'S TRAFFIC TALKS

SPECIAL TREATMENT FOR WIDE STREETS

With enough room, traffic will turn left of center obstruction. Wrong turn would be blocked out if there were center curbings, as shown. This is usually impractical.

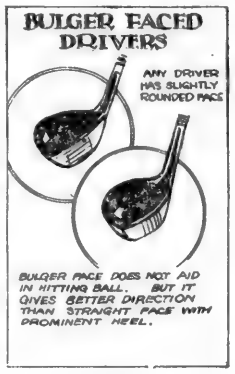
Administrator's Notice.

Estate of Mary J. Patterson, Deceased.

The undersigned having been appointed Administratrix of the Estate of Mary J. Patterson, deceased, hereby gives notice she will appear before the County Court of Logan County, Illinois, at the Court House in Lincoln, Illinois, at the September Probate Term, on the first Monday in September, A. D. 1924, next, at which time all persons having claims against said Estate are notified and requested to attend for the purpose of having the same adjusted. All persons indebted to said Estate are requested to make immediate payment to the undersigned.

BIRDIE M. COX, Administratrix.

Robert R. Humphrey, Attorney.



Dated this 26th day of June, A. D. 1924.

What is the advantage or disadvantage of using a bulger face driver?

Answered by

BOB MacDONALD

Winner of the Metropolitan open championship, 1921, and 1923. One of the longest drivers in the game though using only a 12 1-2 ounce driver.

* * *

There is no advantage in a bulger face as far as helping the player to hit the ball is concerned, as, in fact, all faces of wooden clubs are slightly rounded. Even the face that looks perfectly straight on the ground would be slightly bulged if a straight edge were used. One can always get better direction with a slightly bulged face wherein the heel of the club is filed away, giving the face a rounded appearance, than with the straight face with the heel sticking out prominently.

AT THE THEATRES

WEEK OF AUGUST 25TH.

Lincoln Theatre.

Tuesday, only—E. K. Lincoln in "Women Men Marry."

Wednesday and Thursday—Freddy (Trained Seal) in "The Galloping Fish."

Friday—Hodnett Sisters, under the auspices of K. of C.'s.

Saturday — Frank Mayo in "The Plunderer."

Sunday and Monday—Gloria Swanson in "Society Scandal."

Lyric Theatre.

Tuesday — Rodolph Valentino in "The Young Rajah."

Wednesday—"Gloria Grey in "Bag and Baggage."

Thursday—All star case in "Cause for Divorce."

Friday—Special case in "The Critical Age."

Saturday—Bill Patton in "Fighting Odds."

Sunday—Bebe Daniels and Lewis Stone in "World's Applause."

"THE GALLOPING FISH" GIVES RIOTOUS LAUGH

The "seal walk" is the latest dance hit in Hollywood.

"Freddie" the trained seal which plays the title role in Thomas H. Ince's new comedy special "The Galloping Fish," a First National release tomorrow at the Lincoln theatre, is responsible for the innovation. At least he taught the step to Louise Fazenda and she taught it to Syd Chaplin and Ford Sterling and now all the film celebrities are doing it.

"The Galloping Fish," at the Lincoln theatre, tomorrow.

He had a wiggle all his own that goes like velvet to jazz music. He keeps them roaring from the time he makes his initial bow, sliding from a ten foot spring board into a glass tank at the same moment that his mistress, the Diving Venus, does a swan dive into the tank.

The story of "The Galloping Fish" is as original as the star which plays the title role. A timid little bridegroom, played by Syd Chaplin, drifts into a theatre seeking oblivion from the pangs of agony of his first quarrel with his bride. He is just in time to be collared into assisting the "Diving Venus" and her manager who sneak their seal from the theatre to avoid a sheriff who is trying to attach it for an unpaid bill.

From the time that "Freddie" the seal comes to life in an ambulance and gallops off after a fish wagon with the other timid little "Freddy" in mad pursuit until the last lap of a spectacular flood from which the timid one emerges triumphantly with the seal collared and his bride doing the adoring hero-worship act, there isn't a dull moment in the production. The cast, which was directed by Del Andrews includes Louise Fazenda, Syd Chaplin, Ford Sterling, Chester Conklin, John Steppling, Lucille Ricksen and Truly Shattuck.

Kitchen Floor

If wood is used for the kitchen floor a hard, close-grained lumber should be chosen. A lumber of this type will give longer service, is tougher and will resist water better than one which is softer and has more open pores. Maple is one of the best lumbers for this purpose.

Rollers Numerous

There are more than thirty species of rollers, the birds so-called from their habit of turning somersaults in flying through the air.

700 TREATIES ARE FILED WITH WORLD LEAGUE REGISTRAR

Geneva, Aug. 26.—With the meeting of the fifth annual assembly of the League of Nations on September 1, this year, the latter will be able to ascertain that one of the most important and successful functions of the League is the registering of international treaties and agreements.

The annual report of the secretariat to the assembly of the League will show that to date over 620 treaties have been registered with the secretariat for publication to the entire world.

This provision of the covenant, which was inserted for the purpose of breaking up secret diplomacy, secret treaties, and secret alliances, has been lived up to in the most rigid manner not only by members of the League but by non-members as well.

Germany, for example, in the period between May 19, 1923, and May 19, 1924, has registered 12 treaties with the secretariat.

While the United States has not felt called upon as a non-member of the League to register her treaties for publication, nevertheless the object of this clause of the covenant is fully attained by reason of the fact that virtually all of the states with which the United States has concluded treaties or agreements since the close of the war are members of the League and the latter have filed with the secretariat all treaties concluded with the United States.

File U. S. Treaties.

In fact several have gone so far as to file their treaties with the United States that were concluded before the war.

The loyalty with which the Leaguers are carrying out this obligation with the League of Nations is indicated by the fact that the number of treaties registered has increased steadily ever since the League was organized.

During the first year of the League's existence a total of 112 treaties were registered. During the second year, 151; during the third year, 161, and the year just closed, 189.

Leaguers have shown themselves especially sincere in registering their treaties of defensive alliance which in the past were always guarded with the utmost secrecy and which were at all times looked upon as a constant menace to the peace of Europe.

Now, thanks to the League's obligation to register treaties, the world has the full text of such agreements as the France-Belgian-Polish-Slovakian defensive alliances; the Little Entente's various treaties; the Italian-Serbian treaty of mutual defense and the Italian-Slovakian treaty of cordial collaboration.

Washington Pact.

Even the treaties concluded at the Washington conference for the limitation of naval armaments have all been registered at the secretariat by the various signatory powers, other than the United States.

Besides these great political treaties, the other treaties registered are of the most varied character with the result that the treaty registration department of the League can very aptly be termed the clearing house of international governmental activities.

Amongst the varied treaties registered are those for the protection of industrial, literal and artistic rights; for the suppression of the white slave traffic; for the transportation of merchandise by international railways; the various conventions of the Madrid international postal conference; the various conventions of the Bar ellona transportation and communication conference; commercial and navigation treaties; extradition conventions; frontier delimitations; limitations of armaments; economic and financial agreements; treaties for the protection of minorities; treaties regulating aerial navigation sanitary conventions; arbitration treaties and a score of other objects.

Arbitration Treaties.

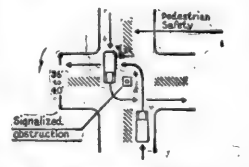
In the domain of arbitration alone, there were filed during the past year treaties of arbitration between Austria and Hungary, between England and Italy, between Chili and Peru, between Hungary and Roumania, between the United States and England, between the United States and Norway, and between Spain and England.

During the past year the number of treaties filed by individual states was as follows: Australia, 4; Austria, 2; Belgium, 3; Bulgaria, 3; Chili, 1; China, 6; Denmark, 25; Esthonia, 1; Finland, 18; France, 2; England, 39; Greece, 1; Hungary, 5; Italy, 7; Japan, 1; Latvia, 9; Norway, 5; Holland, 16; Peru, 1; Poland, 8; Portugau, 3; Roumania, 2; Serbia, 6; Sweden, 21; Switzerland, 4; Czecho-Slovakia, 14; Germany, 12.

As regards classification, the treaties registered with the League since its organization are divided as follows: General international agreements, 27; arbitration treaties, 18; commercial and navigation treaties, 96; extradition conventions, 21; postal and telegraphic and telephonic agreements, 68; frontier delimitations, 12; limitation of armaments, 1; economical and financial agreements, 33; protection of minorities, 13; aerial navigation, 19; bilateral sanitary agreements, 4; agreements relative to aliens, 18; transit agreements, 9; political agreements, 10; peace treaties, 15.

Irish Free State.

One of the latest treaties to be registered with the League was the one under which England granted the constitution of the Irish Free State.



In this case as in the case of all treaties to be registered with the League was the one under which

!
ashamed
It brought him untold misery; yet only he himself, was to blame

He had neglected his teeth so long that he was actually ashamed to visit his dentist. And like so many people, he kept putting it off.

Finally he became so sensitive about their appearance that in conversation he habitually distorted his mouth in an effort to hide them from view.

A reasonable effort on his own part—consulting his dentist, conscientious use of his tooth brush and the right dentifrice—might have saved him this humiliation. But he even neglected these things. He was uncomfortable wherever he went.

Listerine Tooth Paste cleans teeth a new way. At last our chemists have discovered a polishing ingredient that really cleans without scratching the enamel—a difficult problem finally solved.

You will notice the improvement even in the first few days. And you *know it is cleaning safely.*

So the makers of Listerine, the safe antiseptic, have found for you also the really safe dentifrice.

What are your teeth saying about you today?—*LAMBERT PHARMACAL CO., Saint Louis, U. S. A.*

FARM ADVISERS WRITE GOSSIP ON EACH OTHER

(Continued from page 3)

Emil Sandel of Logan County, breeder of Duroc Jersey hogs, is in trouble, according to Bert Bartholomew of Peoria, also a Duroc fancier. The way we get it, Bartholomew went to Sandel's to get a couple of boars. He picked out two (?) in one pen that just suited him and paid Sndel for the two (?). A few days later when the hogs (?) arrived there was only one.

He wired Sandel, who claimed there was only one hog in the pen at the time Bert bought the hog (?).

We have just received some light on the situation from a friend. It seems that Sandel makes some very fine bottled goods—some cherry, some peach, some grains, etc.

Evidently Bartholomew had imbibed too freely of the "liquid thereof" and did actually see two hogs.

• • • •

An injunction has been issued against Logan County Adviser Checkley preventing him from "singing, causing to be sung or instructing others to sing" a certain song: "Oh, it ain't a gonna rain no mo', no mo'"; inasmuch as it has rained, stormed, flooded and otherwise damaged the crops of Illinois farmers ever since Checkley started slinging his darned old song at Farm Bureau meetings.

• • • •

Mr. Earl Smith of Detroit, Pike County I. A. A. committeeman, is certainly prompt at state picnics and executive committee meetings. He reported one day early but since his wife is with him we are not suspicious.

• • • •

I. A. Madden, dignified adviser of Sangamon County and of the Springfield Chamber of Commerce, is taking an unusual interest in the grain merger. "Irish" is going to see that all his Black Hill wheat gets safely and properly marketed.

• • • •

C. J. Thomas, farm bureau extension service man in Jackson County, has a new baby at home. We claim to have the most effective extension service in Illinois and Thomas is on the job all right.

• • • •

For three years, Frank Barrett, Pike County adviser, has tried to find a wife. He so thoroughly sold himself to a young lady recently that she decided to take him for better or for worse probably for wrose). The Farm Bureau is pleased with results, for, months before it happened, Frank seemed dazed. Later reports are that he has settled down to work very satisfactorily.

• • • •

V. Vaniman has been very much excited about a statement from a so called farm periodical saying that he was going to collect $1,500,000 from farmers for his auditing services.

We believed in you Van, but since we learn that you are building a new house we are of the opinion that the I. A. A. better investigate.

• • • •

Anybody needing the services of a co-operative broomcorn marketing expert should call on Melvin Thomas, adviser in Coles County. We are sorry Melvin, but were in the U. S. G. G., too. (Says a Farm Adviser scandal monger.)

• • • •

W. H. Smith, state leader from the University, requested F. W. Garrett of Douglass county to report how he was getting along. The latter reported: "Doing fine. Weigh 265." Another fat job!

• • • •

How these old bald headed fellows do act when they get away from home! We learn from Bertram Abney, adviser at Mt. Vernon, that J. C. Sailor and J. C. Spitler recently went with him to a boarding house to get supper.

A very pretty young thing waited on the table. They talked and she talked; they laughed and she got tickled; they kidded her and she liked it; they waited for on the porch and—(debeated by the censor).

• • • •

FIRST BASE BALL CHAMPIONSHIP PLAYED TODAY

(Continued from Page One)

minute to put on the exhibition game.

Visitors at the state picnic today had the opportunity to witness the first farm bureau baseball championship ever played in Illinois and possibly in the United States. It is hoped to make base ball for farm bureau members a permanent and annual event in Illinois At the chautauqua grounds today, immediately after the speaking program scheduled at 2:30, the championship game got underway.

The championship event has been looked forward to all season as local farm bureau teams played out their schedules for the district championships.

For the 1924 season, the districts in Illinois were formed into what was termed district leagues. Following are the games played by the counties participating and their percentages:

Galesburg District

	W.	L.	Pct.
Marshall-Putnam	4	0	1.000
Warren	2	0	1.000
Knox	1	2	.000
Stark	1	2	.333
Whiteside	0	2	.000
Bureau	0	2	.000
Carroll	0	0	.000

Springveld District

Morgan	5	1	.833
Cass	4	2	.666
Logan	1	3	.166
Menard	1	3	.166
Sangamon	0	0	.000
Mason	0	0	.000

Thus the state championship lays between Marshall-Putnam and Morgan counties, both having crack teams of farmer boys. The ball game will go down in Illinois Agricultrual Association history, as the first championship game initiating a new order of rural sportsmanship.

Farm Bureau base ball began back in 1921 when the executive committee of the Menard County Farm Bureau challenged the executive committee of the Cass County Farm Bureau to a base ball game to be played at their annual picnic. It was 98 in the shade that day and the older members very soon surrendered their positions to their sons and to younger farmers present. Cass county got a pretty good team together the next year and beat all the adjoining counties. This Spring, in looking for new worlds to conquer, Cass county gave a duck dinner to neighboring counties in the district and at this meeting a league was organized.

The trophy to the champions is a silver ball supported by a tripod of three bats. It is a trophy worthy of a Grecian hero of old.

De Bergerac Real Person

Savinier Cyrano de Bergerac was a French author who was born in 1619 and who died in 1655. Edmund Rostand wrote a drama in which De Bergerac was the hero, and the play was in many ways true to facts. The real De Bergerac was distinguished for his courage in the field and for the duels he fought. These numbered more than a thousand, most of them fought on account of his monstrously large nose.

Prejudice Grows

Prejudice is a rank weed of rapid growth. Let yourself dislike a person and you will shortly find that it is impossible for that person to do anything that is right or reasonable.—Exchange.

MRS. SEWELL EULOGIZES FARM WIVES

(Continued from Page One)

fluence and a future statesman or captain of finance is in the making out there on a corn belt farm.

"There is much hard work that can't be done on paper and he learns to do his despised chores quickly, regularly and efficiently, developing traits of industry, patience, punctuality and above all, the sympathy for God's lowly creatures, that is sorely lacking in many of the youth today. There are no eight hour days on the farm. The cropping season is, in the main, a rush season and he does not learn to listen for a whistle to begin or end his day's toil. No captain of finance ever came from the boy who laid down his tools on the stroke of the "houf" and this fact alone explains many of the 87 per cent.

"In few cases is there a foreman employed on the average farm and so each employe is on his own, thereby rendering highly necessary self-reliance and initiative that are invaluable attributes.

"In many of the homes of our working people, every member of the family is employed outside. This condition makes ideal family life well nigh impossible. On the farm, the business is such that wife and children are junior partners, all working together in healthful inviting surroundings and sharing equally in the returns.

Make Own Fun.

"Boys' and Girls' club work is constantly showing the achievements of these country lads and lassies in corn, potatoes, pig, calf, colt, poultry, sewing or baking clubs. The father must needs be industrious, frugal and honest and early at the fireside inculcates these principles in his growing children. Help in the farm house is well nigh unprocurable so the mother must be resourceful, a good manager, a producer as well as a consumer; a woman who is not like the lily, 'toils not, neither does she spin,' but who renders each day an honest day's toil for an honest day's living.

"After supper all are tired from a long, hard day so they gather around the library table well supplied with good books, daily papers and current magazines or perhaps enjoy a concert via radio or victrola. They are far from the amusements of the city and must make their own, but in so doing, another strong link is inevitably formed in the chain of character.

"The farm family lives close to nature and nature's God. No strikes or strikers in their record, but in the fall of poor markets, faulty distribution and overproduction, each succeeding spring sees the farm family beginning anew, their partnership with God in sowing and planting in the hope that they may later reap. It is a highly comforting thought that the Master understood the farmer's life and problems. Recall the parable of the sower, and you will readily see that he understood the principles of scientific agriculture. Poorly chosen, carelessly sown seeds returned no harvest, but that which was skillfully selected and planted and tended returned 'some thirty, some forty and some an hundred fold.'

"As a nation we are charged with reckless expenditure, waste and lack of thrift. Where a weekly or semi-monthly pay envelope is available, it is harder perhaps to resist the temptation to 'buy now, pay later' signs displayed in cunningly arranged shop windows. Indeed, it somehow seems that all forces are in league to separate the laborer from his hire.

"In the country there are generally two and not ofter more than three times a year when there are substantial returns, the sale of grain and live stocks. The cream check and the sale of eggs and poultry generally buy the major part of the provision, which must be purchased outside the home so they learn to buy for cash, buy only what they need and how to do without many things that, while pleasant, are after all non-essentials. If we could some way teach thrift to the youth of America, half our problems would be more easily solved.

Real Democracy.

"Bolshevism does not flourish in a community of property owning, tax paying, law abiding citizens. We are very democratic in the corn belt. When our daughters marry, the neighbors and press do not comment or inquire as to the size of the dowry, the wealth of the groom or the cost of the wedding gown, breakfast or gifts. Instead, they are more likely to ask, 'Is he industrious? Is she economical? Is he clean and honest? Is she skilled in housework on the farm?' And so our young people go out to build new homes with little pomp or ceremony or money.

"They are still willing to begin, not where grandfather and grandmother left off the day before yesterday, but where father and mother started thirty years ago. They see a hard time very often, but in the lean years they grow closer together, more sympathetic and tolerant and it is infinitely more fun to lay plans to buy a second-hand Ford than to ride away on the honeymoon in a Rolls-Royce, the gift of the groom's father.

"Agriculture today is far from being in a pleasing and profitable condition. We are told that 40 per cent of our land is farmed by tenantry; 41 per cent is mortgaged to the limit. Added to this, the deflation of the farmer's purchasing dollar makes a condition that renders it almost impossible, for a young man to acquire a farm of any considerable acreage unless he inherits it. This is driving our cultured educated young people to towns and cities and rendering a serious deficit in the establishing of the new homes that will furnish the leadership of tomorrow.

"The high type standard farm home can only be reached and maintained by a prosperous agriculture, for water systems, heating and lighting plants, paint, paper, new furnishings can only be purchased with money; our corn, oats, wheat or porkers will not be accepted in barter or at an equivalent rate of exchange. Sad misunderstandings have crept in between town and country people, because the former often do not understand that of the excessively high price, they have paid for meat, eggs, fruit, vegetables or butter, the producer received but a pitifully small amount, often not the bare cost of production. The farmer's problem of today is of utmost importance, from the president of the United States down to the poorest paid employe of contract labor.

"The farmer has been ridiculed and cartooned as an uneducated, unshaven, grasping, stingy individual, who wants everything his own way. On the contrary he is quite likely a refined, retiring, suitably dressed business man, who works long, hard hours and pays his high taxes and supports his church and community enterprises to the best of his ability, who asks no exorbitant unfair advantage of his government or his fellow men. He is a true American and he has certain rights. He furnishes food and raw materials that are indispensable. He has a right to the cost of production plus a fair profit, as any other manufacturer. He is entitled to a comfortable home with the refinements of books, magazines and music and the luxury of a bath tub, to the acquiring of a competence for old age, and to give his children, whose efforts are capitalized in the farm business, an education and the advantages they so richly deserve."

EVERYBODY GET ENOUGH TO EAT?

Lots of Farm Bureau folks neglected to bring picnic dinners of their own today. That meant that the church ladies of Lincoln were needed to supply more food. If anyone went hungry today, it was his own fault, Mr. Checkley says, because he warned 'em that Lincoln would be a crowded city today and there wouldn't be much extra food.

You can depend upon Checkley to watch out for the food. Ask Mrs. Checkley.

Best to Forget Wrongs

To revenge a wrong is easy, usual and natural, and, as the world thinks, savors of nobleness of mind; but religion teaches the contrary, and tells us it is better to neglect than to requite it.—J. Beaumont.

12,000 ILLINOISANS FLOCK TO LINCOLN FOR ANNUAL PICNIC

Carry Out "Entertainment For Everyone" Slogan; Get Special Picnic Edition of I.A.A. Record

Twelve thousand Farm Bureau picknickers from all over Illinois flocked to the annual I. A. A. picnic, held at Lincoln, Aug. 26, to find that the slogan "entertainment for everyone" had been carried out by J. H. Checkley, Logan county farm adviser, who made arrangements for the picknickers' fun.

Speculation as to the size of the crowd varied from eight to twenty thousand, with a conservative average of around 12,000 people.

Had Good Weather

As the weather cleared Monday for what looked like a nice, long stretch of good threshing weather, it became apparent that many farmers would not be able to leave their shocks and threshing machines.

However, others pointed out that it was still too wet in many places for threshing, so there was possibility for a great crowd.

Automobiles from various counties began to drift into the grounds early on the day of the picnic. As many as 18 counties were represented by the time many Lincoln folks were eating their breakfasts.

Lincoln Played Host

The city of Lincoln was host of the day. The Chamber of Commerce extended a royal welcome to the Farm Bureau folks. It had been active in advertising the picnic and in helping make arrangements for carrying out the slogan "entertainment for everyone." Flags were hung out by local merchants.

During the early forenoon most of the picknickers milled around over the spacious chautauqua grounds, shaking hands, discussing crop conditions or politics. A little later, with ten horseshoe games under way at the same time, there was entertainment for a large crowd who watched these events.

The exhibition baseball game in the morning between Menard County Farm Bureau and the Logan county team was almost as big an attraction as the headliner between Marshall-Putnam and Morgan Farm Bureaus.

Women folks found ample shade underneath the giant trees of the park. The little folks played on the slippery slide until they were worn out and ready to go home.

Picnic Edition of RECORD

By four o'clock farmers from a distance rounded up their families to call it a day and start on the long road home. As they left the picnic grounds they were given copies of a Special Picnic edition of the I. A. A. RECORD, just off the presses of the Lincoln Daily Star.

The paper was an eight page edition published the afternoon of the picnic by the I. A. A. with the help of several farm advisers so that those who failed to see everything that happened on the grounds might read about it at leisure.

The Boys' Alfalfa Club, organized by the Vermilion County Farm Bureau and the Agricultural committee of the Danville Chamber of Commerce, now has 53 boys enrolled with 53 business men financing the project.

Henry C. Wallace, secretary of agriculture, was invited to come to the state picnic, but he couldn't get away from Washington long enough to come. However, he didn't forget the Farm Bureau folks in Illinois for he sent the following greeting to them at the state picnic:

Greetings to members of Illinois Agricultural Association. Congratulations on good work already done and more power to you in task of promoting needs of agriculture and voicing the mind of the farmer and stimulating good farming, clear thinking and right living.

Henry C. Wallace.

Smith and Bright Win Horseshoe Title For McLean County

Samuel G. Smith and Reuben G. Bright, representing the McLean County Farm Bureau, won the state Farm Bureau horseshoe championship title at the I. A. A. picnic, Aug. 26 in competition with 19 other county teams and with it they won the I. A. A. silver loving cup.

The McLean county pair won two straight games of 50 points each from Leinweber brothers, the Mason county team, in the final match for the state title. In the first game between the two teams McLean won 51-28, throwing 22 ringers to the Mason team's 17. Double ringers were five for Mason and three for McLean.

In the second tilt of the finals McLean also won with a score of 51-40, the champions threw three more ringers than their opponents, getting 27, while both teams scored six double ringers.

It was notable that the two DeWitt county boys, Walter and Harry Torbert, last year's champions, were defeated. These boys' father, Harry Torbert, and Joe Heskett, were title holders in '20, '21 and '22.

Ten of the twenty teams entered were eliminated by the first set of preliminaries, in three games of 50 points each. The next tangle eliminated all contestants except Mason, Tazewell, McLean and Knox counties. Tazewell and Knox were crowded out in three 30 point games, leaving Mason and McLean for the final best two out of three.

After the state honors were settled Mrs. Laura Lanham, Bloomington, national womens' champion horseshoe pitcher, played an exhibition match with Smith, the McLean champion, who placed 4th in the state tournament at Aurora.

The following counties and contestants were represented on the horseshoe courts: Schuyler—Harold Hightower, Linn Eaton; Sangamon—L. T. Kopp, J. R. Christopher; Randolph—Alfred Smiley, Lester Holmes; Stark—Providence Wall, Brack Berry; Whiteside—Lewis Abbott, David Stuart; Menard—L. E. Heflin, G. G. Welsh; Peoria—M. C. Kown, Wm. Carlin; Cass—Herman Schnepper, Carlos Opper; Coles—Geo. and Chas. Temples; Green—N. L. McQuerry, Elmer Garrison; La Salle—A. G. Wheatland, Martin Yocum; Knox—Olaf Oleson, Wm. Eldert; McLean—Samuel G. Smith, R. G. Bright; Henry—Obrecht brothers; Logan—Rentschler, Stoll; Mason—Leinweber brothers.

Lake, Marshall-Putnam and Ford counties entered but no names were available.

Adviser Davis, Piatt county, says farmers there have ordered a trainload of limestone. Between 25 and 30 carloads will make up the big shipment.

FIRST FARM BUREAU BASEBALL CHAMPIONS

Here is the Marshall-Putnam Farm Bureau baseball team, the first team ever to win a state Farm Bureau baseball championship in Illinois. This picture was taken just after they defeated Morgan county at the I. A. A. picnic. Marshall-Putnam's wide-awake farm adviser, F. E. Fuller, is shown in the insert.

Colleges of Middle West Ask For First Co-op Institute

The agricultural colleges of Illinois, Iowa, Minnesota, Ohio, Indiana and Wisconsin have all invited the Institute of Co-operation for its first meeting, which will be for four weeks in July, 1925. Some offers with cash subsidies have been made by colleges in the East.

Plans for organizing the Institute were made recently at a Cleveland meeting at which 50 leading co-operative thinkers were present.

Leaders in the co-operative movement in England, Scotland, Italy, Germany, Russia and other countries where cooperation has become advanced to permanency will be secured to speak at the Institute during its four weeks' session. Cooperative managers and all persons interested in co-operation can enroll for the course. A small tuition will be charged.

The location of the 1925 session of the Institute has not been determined yet, according to George Wicker, director of the co-operative accounting department of the I. A. A. and secretary of the organization committee of the Institute. He says that an estate near Cleveland has offered a $3,000,000 farm as a permanent home for the Institute, but it is likely the offer will be rejected since it is not desired to locate the Institute permanently because some sessions will be held abroad.

Bureau Team Wins Trip To Sioux City

The Bureau county junior livestock judging team composed of Gilbert Carver, Wilmer Dreman and Lawrence Carper won 1st honors in the contest held at the Central States Fair and Exposition for boys' club members.

The victory of the Bureau county boys gives them the state junior championship in livestock judging and the right to represent Illinois in an interstate contest to be held at Sioux City, Iowa, Sept. 15. The expenses of the team on this trip will be paid by the I. A. A.

William Allen, a Sangamon county boy, was the highest scoring individual in the contest. Allen and his two team mates, Joseph Bachman and Reuben Carlson, won second in the contest.

The contest was larger this year than last year, according to E. I. Pilchard, state boys' and girls club work specialist of the University, who managed the contest. Each team placed and gave reasons for their placings on one ring each of hogs, horses and sheep.

Quasey Tells Radio Farmers How I.A.A. Cuts Shipping Costs

Radio fans who listened in on the farm radio program broadcast over KYW, Aug. 29, heard L. J. Quasey, the I. A. A. transportation department director, review the farmer's railroad transportation problems.

"The railroads are organized into associations and rate committees to permit the more efficient solving of problems between themselves and the shippers," explained the I. A. A. director. "From this it can be seen that it is just as necessary for the farmer to have efficient and adequate representation in problems pertaining to railroad transportation as it concerns him."

Mr. Quasey described how his department looks after the farmers' loss and damage claims, right of way privileges, overcharge claims, matters of routing and other technical problems.

"It is the purpose of the department to make every effort to see that the Illinois farmer does not pay any more than his fair share of the transportation costs," he stated in closing, "that he may meet the competition of producers of the same commodities in other states shipping to the same markets; that he is given the benefit of his advantage of physical location with reference to markets and that he is accorded the same consideration as other interests in every phase of transportation."

The U. S. D. A. August corn prospect of 2,576,000,000 bushels is 490,000,000 bushels short of the 1923 production.

PICKNICKERS HEAR MURPHY OUTLINE FARMERS' STATUS

Main Speaker Raps Economic Structure That Shields Everybody But The Farmers

Complete texts of Mr. Murphy's and Mrs. Sewell's speeches at the I. A. A. picnic were contained in the Picnic Edition of the RECORD which was printed at Lincoln and distributed to Farm Bureau members as they left for home. Anyone who wants the full text of the speeches may have a copy of the Picnic Edition by writing the information department. The supply on hand is not large, however. It is regretted that all of both speeches cannot be contained in this RECORD.

"Shooting straight from the shoulder, Frank W. Murphy of Wheaton, Minn., the speaking attraction of the I. A. A. State Farm Bureau picnic at Lincoln, resourcefully aimed his address at the inequality existing between the prices of the commodities which the farmer sells and those he buys, before Farm Bureau members gathered for the annual I. A. A. gala day.

Even though there were many rivalling attractions and the auditorium in which he spoke was uncomfortably warm, Mr. Murphy held his audience through a full hour and a half of stirring oratory.

He was introduced to Farm Bureau folks by President Thompson. Frank D. Barton, executive committeeman for the 17th district, presided.

After Mr. Murphy's speech, Geo. N. Peek, president of the American Council of Agriculture, told of the single purpose of the Council—to secure equality for agriculture by means of the principle of the McNary-Haugen bill.

Current Prices Only a Veil

Even though there has been an increase in prices on wheat, corn and fat livestock, Mr. Murphy stated that the fundamental trouble still exists and that united action by all farm organizations through the American Council of Agriculture is absolutely necessary if agriculture is to be placed on an economic level with industry and labor. Mr. Murphy is chairman of the board of directors of the American council and became widely known to Illinois farmers when he spoke at farmer-banker business men's get-together meetings at Rock Island, Springfield, Danville and Bloomington in the spring. He was active in the fight for the McNary-Haugen bill, having spent considerable time and energy at Washington endeavoring to get the bill passed.

Pleads for Equality

"Industry and labor are now glutting themselves at their well laden table," said Mr. Murphy. "Agriculture is eating on the floor. But I want you to see that Agriculture is gradually awakening to its unfortunate position in which it finds itself. Unless industry and labor give it a place at their table, it is likely that Agriculture will kick the legs from under the table bringing all down to the same level. We would rather not do it that way; we wish to come up and eat with them in a gentlemanly manner.

"We are here in peaceful assemblage, Farm Bureau folks," said Mr. Murphy, "Many of you have come long distances today to add your presence to the dignity and strength of this Illinois

Equalization of Land Valuations in 1924

Vermilion, McLean and Ford counties stand in one, two, three order at the top of the heap of Illinois counties as having the highest assessed valuations per acre on farm lands. Logan county held the top position until recently when a 15 per cent reduction in its farm land valuations was granted by its Board of Review after the Logan County Farm Bureau had vigorously campaigned for the reduction.

The relationship of vauations on city and country property has been determined and re-determined in 16 counties so far this year by the I. A. A. department of taxation and statistics. Four of these have made reductions wholly or partly in accordance with protests made by the County Farm Bureaus.

Following is a summary in alphabetical order of the present status in each of the 16 counties:

Cass Cass county had a reduction in 1923 of somewhat more than 13 per cent. This year it got a further reduction of 10 per cent. This makes a little over 22 per cent reduction in land valuations since 1922.

Champaign In Champaign county, a reduction of over 18 per cent was obtained in 1923. This year the Champaign County Farm Bureau asked for more complete equalization. The Board of Review is giving a partial equalization by increasing valuations on property in the business district of the city of Champaign.

"This will help the situation," says Mr. Watson, "but it will not fully remedy the inequality."

Clay Clay county had a reduction in 1923 in farm land valuations of a little less than 20 per cent, which was not sufficient to remedy the wide inequality in that county.

"The Clay County Farm Bureau asked again for equalization, but the Board thus far has refused to act further," states Mr. Watson.

Fifty-one land owners have filed formal complaints against the assessments of their property, with the possible purpose of testing the right of the Board of Review to leave the present inequalities uncorrected.

Clinton In 1923, Clinton county had a reduction of nearly seven per cent. Since this was insufficient to equalize valuations, further reductions were asked for this year by the Clinton County Farm Bureau, but it has been refused by the Board of Review.

Very slight changes were made in valuations in DuPage county valuations last year. In order to remedy the inequality between real farm land and city property, the DuPage County Farm Bureau gave its land-owning members a statement of the facts and an opportunity to file formal complaints against the assessments on their property. If more careful consideration of the facts justify such action, DuPage county also may have opportunity to find out whether land taxes can be collected on the wide inequalities existing.

Du Page

Edgar Investigation in Edgar county disclosed that real estate valuations of county and city property are substantially fair and that both are not far from the average of the state. Edgar county had a reduction last year of about 10 per cent in valuations of farm lands.

Hancock Investigation in Hancock county also disclosed fair uniformity in valuations in farm and city real estate. Hancock county had a reduction last year of about 14 per cent.

Kane In 1923, Kane county farm lands were reduced nearly seven per cent. This reduction was inadequate to produce uniformity between city and country real estate. As in DuPage county, the Kane County Farm Bureau gave its members a statement of facts and an opportunity to file formal complaints. This action had some effect since the Board of Review has announced that it is ordering a reduction practically equal to the amount made last year. Even though substantial equality of the two classes of property has not been secured, the result in Kane county is a notable victory for the Farm Bureau.

Lake Lake county lands had a reduction last year of nearly seven per cent. Because of the large amount of lake shore, industrial and resort property which is classified as lands, it is extremely difficult to determine whether assessments of farm lands and city property are fair in Lake county. More time has probably been spent in this county by the department of taxation and statistics than in any other county in the state and the question is still under consideration.

Logan Farm lands in Logan county had practically no reduction in 1923 thus leaving this county as the highest assessed per acre of any county in the state. Led by the Logan County Farm Bureau, and with the active assistance of the county treasurer, a campaign to secure reduction was started. The Farm Bureau filed petitions from a large number of landowners in the county protesting against valuations which forced them to pay for state taxes an amount estimated from $12,000 to $15,000 more than their share each year.

The Logan County Farm Bureau asked for a 15 per cent reduction in valuations which has been granted by the Board of Review.

Marion Marion county lands were reduced about 18 per cent in valuations in 1923. This was insufficient to restore equality in that county, especially with property in the city of Centralia. The Marion County Farm Bureau again asked for equalization and the Board of Review now has the matter under consideration.

Montgomery In 1923, Montgomery county land was reduced in assessed valuations about 13 per cent, an amount which was insufficient to equalize valuations of farm land and city property. The Montgomery County Farm Bureau took the matter up this year with the Board of Review which has since granted a 10 per cent reduction in addition to that made last year.

Morgan Morgan county is one of the few counties of the state in which land valuations were increased last year. An investigation of the relative valuation of city and country property has shown that there is not much inequality between the two classes. Both are assessed higher than the average of the state. Both might well be reduced somewhat if the city of Jacksonville could get sufficient tax income from lower valuations.

Peoria In 1923, the assessors of Peoria county, on the recommendation of the county treasurer, reduced valuations of farm lands an average of 20 to 25 per cent. Investigation by the Peoria County Farm Bureau showed that this reduction was justified. This information was given to the Board of Review. Over the protest of the Farm Bureau, the Board of Review increased the assessors' figures more than 15 per cent, leaving a net reduction of less than seven per cent.

Similar investigation this year by the department of taxation and statistics of the I. A. A. has confirmed the figures secured last year and has shown that city property, chiefly in the city of Peoria, is assessed 11 per cent lower than the average of farm lands. This information was given to the Board of Review in a hearing at which the Farm Bureau asked again for an equalization. The Board of Review is relying in part upon the county treasurer, who now says that he recommended a 25 per cent reduction not believing it justified. Thus far the Board of Review refuses to act. All the members of the Board of Review are from the city of Peoria. The farmers of Peoria county are not represented on the Board of Review.

Rock Island In 1923, the valuations of farm lands in Rock Island county were reduced less than three per cent. Because of the fact that property in the city of Rock Island was assessed on a much higher level of valuations than was true of the city of Moline, the valuations of farm lands as a whole were not much out of line with the valuations of city property as a whole. Late in 1923, however, the Board of Review made a heavy reduction in valuations of Rock Island city property. Investigation this year shows that farm lands are now assessed at somewhat higher valuations than is true of the average city property.

The difference, however, does not seem sufficient to warrant action at this time.

Saline In 1923, the valuations of farm land in Saline county as a whole were slightly increased. Investigation this year disclosed the fact that valuations of city and country property were relatively fair, except that the city of Harrisburg is assessed on a much lower basis than either farm lands or other city and village property. Upon a statement of these facts, the Saline County Farm Bureau asked for equalization and the Board of Review has the matter under consideration.

Vermilion Farm land valuations in Vermilion county were reduced less than five per cent in 1923. This result came about largely because of the illegal interference of the county treasurer with the assessors in the performance of their duties. The Board of Review refused to correct the inequalities which were then disclosed between city and country properties. Similar investigation made this year confirmed the figures secured last year. The Vermilion County Farm Bureau again presented these facts to the Board of Review and again asked for equalization.

The recent reduction of 15 per cent in Logan county has left Vermilion county farm lands assessed at the highest average per acre of any county in Illinois. The Board of Review still has the matter under consideration.

THE LIARS' CORNER

TRAVEL IS BROADENING, WE HEAR

Dear Editor:—A few years ago while traveling through the state of Kansas, I saw an interesting demonstration of corn husking. The husker was a strong, muscular fellow and, as the saying goes, quite a local celebrity. I happened by the farm where he was working early one morning, and so got a fine view of his method of procedure.

The husker wore a suit of asbestos clothes, which was quite a novelty to me. Following him closely was a one-horse wagon driven by a man and boy, and containing food and a keg of ice water for use as the work progressed. Around the husker's body was a yerking belt containing the husking pins. These pins, owing to their rapid use, soon became so hot that the husker had to drop them from time to time and take another from his belt. The boy would pick them up, immerse them in the ice water and return them to the revolving belt. It took about one dozen pins to do the work. Two or three wagons followed the husker to take care of the corn as it came with lightning-like rapidity from his hands.

I didn't tarry long in the vicinity, because I saw a number of men, members of the Cornhuskers' Union, and the ugly looks on their faces led me to believe that trouble was brewing for the corn husking prodigy. However, I learned before leaving that 8,000 bushels of corn was an average day's work, but with a favorable wind this man-machine would some days husk 9,000 bushels to his credit. Great difficulty was experienced in getting teams enough to take care of the corn as it came from the nimble fingers of the husker.

I haven't been in the state of Kansas since. However, when I was about half way across the state of Iowa, a man dropped suddenly from a dark passing cloud. Much astonished, I asked him where he came from, and he replied that he blew over in a cyclone from Kansas. "Well," I exclaimed, "the Lord must have been with you." "If he was he was going some," the fellow retorted, and as he spoke I recognized him as the marvelous corn husker. I drove on—fled, as it were, for the prairies of good old Illinois.—Tom Johnston, Morrisonville, Illinois.

U. S. D. A. RESEARCH REPORT JUSTIFIES I.A.A. TAX PROGRAM

Government Study In 26 States Shows Taxes Have Generally Increased While Rents Decrease

Complete justification of the taxation program of the Illinois Agricultural Association is shown by the following summary of a long study of the farm tax situation recently given out by the United States Department of Agriculture covering all agricultural states.

State and county real estate taxes since 1920 have absorbed a large proportion of the income from rent on farms in various parts of the United States, says the United States Department of Agriculture. There is reason to believe, indeed, the department says, that taxes on many of the less favored farms have absorbed all the income from rent.

This conclusion is based on a tax study made in 26 states for the year 1919 and on the fact that since that year taxes have generally increased while rents have been reduced. Local rather than State taxes are held responsible for the greater part of the burden.

Affects All Farmers

It is believed the general outline sketch of the tax situation revealed by the study throws light on the tax problems as it affects farmers in all parts of the country. In the southern areas studied, real estate taxes were found to have absorbed about 10 per cent of the net cash rent from farms in 1919. In 9 North Central States property taxes consumed from 12 to 25 per cent of the net rent in the same year. In Macoupin County, Illinois, property taxes consumed 18.2 per cent of the net rent in 1919.

In Western States the ratio varied from less than 10 per cent in California to 38 per cent in one county in Oregon. Tax ratios were higher in some States where no ad valorem taxes were levied for the State purpose than in other States where such taxes were levied.

Cash Rent Basis

Taxes are compared with cash rents by the department because cash rents are the best available index of the earning power of farm real estate. Land values alone, the department points out, are not reliable indexes of taxpaying ability because they are based not only on present earning power but on anticipated increases in earnings. Current farm land earnings, in fact, are usually the basis for only a small part of the farm land valuation. On the farms in this study the rent in most cases accounted for less than half the census valuation. The rest of the valuation was attributable to other factors, the chief of which in most cases probably was the expectation of increased future earnings.

Present taxing methods which take land valuations without considering farm earnings as the basis of taxation are objectionable, says the department. Land values, it points out, include anticipation of future earnings which may never be realized. Such anticipations in any case add nothing to the farmer's present ability to pay taxes. Annual income is usually the only source from which taxes can be paid. As average cash rents are the best index of the earning power of farm real estate, the truest measure of the tax burden the farmer is carrying is the ratio between average taxes and average cash rents.

Hit Indiana Hard

It is pointed out that 1919 was a favorable year for agriculture. Since then farm earnings have declined, but land valuations on which taxes are based have not declined proportionately. Taxes are levied without particular reference to land income. As a result the tax burden today is heavier than ever. A recent survey of more than 100 farms of Indiana showed that the ratio of taxes to rents increased almost threefold from 1919 to 1923.

Valuations for tax purposes, of property other than real estate, the department notes, are usually based primarily on annual earnings. Farm real estate taxes which are not related to annual earnings, therefore, put the farmer at a distinct disadvantage. Moreover, the department found that in 10 counties where taxes on farm property were compared with taxes on urban property, the assessed valuation of urban real estate was less than the capitalized annual income from that property, whereas in 8 of the same counties farm real estate was assessed at a higher rate than the capitalized annual income.

This fact appears to indicate that farm real estate in 1920 bore heavier taxes than most urban real estate in the counties covered by the study. It is not known how much anticipated income figured in the valuations of the urban land. That they figured to some extent, just as they did in the case of farm land, seems probable in view of the fact that most cities are increasing in population. Farm lands apparently paid taxes on this element of anticipated future income, while urban land did not.

Watson Explains Situation

Referring to the conclusion of the Department of Agriculture stated above, that farm real estate in 1920 bore heavier taxes relative to rental income, than most urban real estate, J. C. Watson, director of taxation and statistics of the Illinois Agricultural Association, points out that the comparison relates only to the gross rental income of the two classes of property. There is every reason to believe that the conclusion stated was true of most counties in Illinois in which there are cities of considerable size.

If it was true in 1920, Mr. Watson states, the fall in values and rentals of farm lands and in prices of farm products, contrasted with the sharp increase in values and rentals of city property, has made the tax burden subsequent to the year 1920 relatively heavier on farm lands than it was in that year. If the amount of taxes levied on lands and city property could be related to net rental income or to net income, Mr. Watson points out, the contrast would be much worse.

The facts brought out by the Department of Agriculture amply justify the taxation program of the Illinois Agricultural Association, which is, first to secure uniformity in valuations of farm and urban real estate on the basis of fair cash selling values, as required by present laws, and, second to secure such changes in the constitution and revenue laws of the State as will relate taxes to net income, whether from real estate, intangible property, or personal services.

Limestone Discount Certificate

This Certifies that Mr. .....
Address .....
being a member, in good standing of the undersigned
County Farm Bureau
Is Entitled to a discount of ten cents (10c) per ton when paying for the agricultural limestone which we are today ordering for him from .....
Quarry Company
This Certificate being in accordance with an agreement between the said Quarry Company and the Illinois Agricultural Association (the latter acting on behalf of the Illinois County Farm Bureaus), will be accepted by the said Quarry Company as part payment to the extent of ten cents (10c) per ton of the regular current price for said agricultural limestone if it accompanies a remittance for the balance of the amount made within fifteen (15) days after date of invoice.
..... County Farm Bureau
By .....
Title .....
Farm Bureau Member will please fill in form on reverse side of the Certificate

The above facsimile of the new limestone discount certificate represents a saving to farm bureau members of at least $60,000 a year according to J. R. Bent, director of the phosphate-limestone department, and who, in co-operation with the advisory committee to that department consisting of Stanley Castle, Alton, chairman; H. T. Marshall, Sereno; Frank I. Mann, Gilman, and Melvin Thomas, Charleston, have succeeded in getting practically all of the principal limestone quarries which supply Illinois farmers to discount limestone 10 cents a ton to farm bureau members. Each certificate means a $4 cash saving when filed in at the county farm bureau office and enclosed with the check to the quarry company for the limestone. Illinois farm bureau members are now able to pocket $60,000 annually that was formerly going to limestone producers. Organization wins again!

MRS. SEWELL LAUDS AMERICAN FARMER AS REFINED CITIZEN

Eulogizes Farm Wife As The "Presiding Spirit of Farm Home—Who Has Really Seen Life"

Emphasizing the fact that 87 per cent of those mentioned in Who's Who today were born on farm homes, Mrs. C. W. Sewell, of Indiana, in her talk at the I. A. A. picnic, praised the farm home and the agricultural industry as the basis of American prosperity.

"There is no denying the truth of the statement that these leaders in Who's Who were not the result of accident, luck or magic," said Mrs. Sewell. "Agricultural conditions and environment moulded the characters of these individuals."

Farm Develops Leaders

"The foot of the ladder of success is always crowded with those who will always be followers. Rural life develops leadership in the character of the boy sent half or quarter of a mile from all aid with three or four horses and some more or less complicated piece of machinery. As he plows row after row of the far-reaching battalions of corn he has time to think untrammeled by companion or distracting influence and a future statesman or captain of finance in in the making out there on a corn belt farm.

Hard Work on Farm

"There are no eight hour days on the farm. The cropping season is, in the main, a rush season and he does not learn to listen for a whistle to begin or end his day's toil. No captain of finance ever came from the boy who laid down his tools on the stroke of the hour and this fact alone explains many of the 87 per cent.

"Let us not forget the presiding spirit of the farm home, the wife and mother," Mrs. Sewell appealed to her audience as she eulogized the farm - wife and mother. "She it is who is upholding the morale of the farm family today and bolstering up the tired faith of the farmer.

Praises Country Woman

"The farm woman does not understand bridge or golf, but the world's problems cannot all be lifted by the daintily manicured hands of women who have never lifted anything heavier than a bridge card or a golf club. And this plain country woman, with sun-bonneted little lassies or blue overalled lads on either side of her, is a figure of national importance. She is the woman who has trudged across the ploughed field some stormy winter night to help her sister in the hour of trial. She has tenderly dressed the new born babe or silently, reverently composed the limbs of the dead. She has harnessed horses, milked cows, learned the rude surgery of the farm or carried baby lambs and baby pigs into her clean, warm kitchen to save them from perishing; she it is who has really seen life."

The Indiana woman pointed to the fact that agriculture today is far from a profitable condition, that 40 per cent of the farm land is tilled by tenantry and that this condition is driving the best young men and women from the farm to the city with the result of a serious deficit in the establishment of the new homes which are to provide the rural and city leadership of tomorrow.

Have Ridiculed Farmer

"The farmer has been ridiculed, and cartooned as an uneducated, unshaven, grasping, stingy individual, who wants everything his own way," said Mrs. Sewell as she defended the farmer. "On the contrary he is quite likely a refined, retiring, suitably dressed business man, who works long hard hours and pays his high taxes and supports his church and community enterprises to the best of his ability, who asks no exorbitant unfair advantage of his government or his fellow men.

Farmer is True American

He is a true American and he has certain rights. He furnishes food and raw materials that are indispensable. He has a right to the cost of production plus a fair profit, as any other manufacturer. He is entitled to a comfortable home with the refinements of books, magazines and music and the luxury of a bath tub, to the acquiring of a competence for old age, and to give his children, whose efforts are capitalized in the farm business, an education and the advantages they so richly deserve."

Last Chance To Buy
WOOL BLANKETS
Going Fast

60 sold since last issue of the RECORD.

These blankets, made up for the I. A. A., are pure wool, 6-lb., double blankets, 72 x 84 inches.

Colors—Gray and White checks, Blue and White checks.

These blankets cannot be duplicated on the open market today.

TO FARM BUREAU MEMBERS.....$11.00
TO NON-FARM BUREAU MEMBERS.$13.00

Send your order early, through your county Farm Bureau. Cash must accompany order. These blankets will be sold out immediately. No more to be made by the I. A. A.

MARSHALL-PUTNAM BEATS MORGAN IN CHAMPIONSHIP TILT

Galesburg District Winners Trounce Morgan County Baseball Team After An All-Victorious Season

Visitors at the I. A. A. picnic in Lincoln had the opportunity to witness the first Farm Bureau baseball championship ever played in Illinois and perhaps in the entire United States.

In the morning an exhibition game was scheduled between Cass and Logan county Farm Bureau teams but Menard county substituted for Cass and took the small end of a 14 to 2 score. The game was one-sided but served the purpose of warming up the rooters for the afternoon tussle.

Baseball fans were in their natural element in the afternoon as they watched Marshall - Putnam Farm Bureau give Morgan county a drubbing to the tune of 6 to 0 and walk off with the Illinois Farm Bureau Baseball championship, after an all-victorious season.

Ideal Baseball Weather

With an ideal baseball setting, 90 in the shade and the sun burning down with intensity, both teams got warmed into form early in the game. The Morgan boys batted first and threatened to score after a combination of two bunglies by Marshall-Putnam infielders and two scratch hits but Halblibe and his team mates settled down and worked out of a hole.

Again in the second inning Morgan got a runner on third only to have him die there as the result of a fast double play, Halblibe to Clausen to W. Grifith.

The first three innings the Marshall-Putnam batters faced the Morgan county pitcher they walked quite regularly back to the bench. They hit the ball but it always landed in a Morgan player's hands. But true to the prediction of a Marshall-Putnam player the champions of the north end of the state opened up a barrage of hits and base running in the fourth inning that resulted in 3 runs.

Score in Sixth

After that inning the game belonged to the champions. Their hits came again in the sixth inning when safeties meant runs. The scoring ended after the second onslaught of the winners and for two and a half innings both teams exhibited good baseball for the fans.

Dairymen Getting Less Than In 1923

Illinois dairymen, on the average, are receiving six cents less per pound for butter this August than they did in August, 1923, according to A. D. Lynch, director of the I. A. A. dairy marketing department. Each week 120 dairy farmers in 44 Illinois counties report by mail the current price of butter fat in their localities. This data gives Lynch a check on the effectiveness of the 15 co-operative dairy arencies in Illinois and shows what various cream buying companies are paying in different localities. Farm bureau members receive this information through their county farm advisers.

FAIR VISITORS SEE ARRAY OF EXHIBITS BY FARM BUREAUS

First Prize Goes To Wills County; Grundy Second; Kendall Third; Some Job To Pick Winners

Thousands of visitors at the Central States Fair and Exposition, at Aurora, who studied the exhibits of 12 county farm bureaus, came away convinced of the invaluable worth of the county Farm Bureau unit.

The 12 Farm Bureau exhibits arranged in a group in the women's building made up a display representative of Farm Bureau work in Illinois and furnished farmers and their families a bird's eye view of constructive farm practices and activities.

Wills County Farm Bureau, with an exhibit showing the comparison of corn produced from disease free seed and disease free soil, took first prize. The display showed the results of careful selection for disease free seed, both as to quality of corn produced and as to yield per acre. Methods of conducting germination tests, keeping of records and samples of corn root rot and other diseases were included in the blue ribbon exhibit.

Exhibit in Motion

Grundy county which styled itself as "The Sweet Clover County" won 2nd on a unique exhibit displaying sweet clover as the "key to soil fertility." A miniature threshing outfit which was actually in motion added reality to the array of pictures, signs, samples and banners.

Kendall county took 3rd place on its exhibit showing the effect of using limestone in building up soil and producing crops. In comparison to the wise use of limestone the disastrous effect upon the soil of not using limestone to produce legume crops was shown.

Telling the story of the largest cow testing association in Illinois, the Boone County Farm Bureau took 4th prize. The display showed the equipment, methods of sampling and weighing, organization, ways of shipping and other details in testing association work.

Champaign Cleans Up

Champaign county, the home of the original certified Manchu variety of soy bean seed, cleaned up 1st, 2nd, 3rd and 4th on certified seed; 1st, 2nd and 3rd on uncertified seed and annexed 5th prize among the county exhibits. Paul Butlin of Seymour, who won sweepstakes last fall in competition with samples from all parts of the United States and Canada, got 1st prize on the certified samples.

Kane county, the county of community clubs, displayed an exhibit which illustrated the four objects of a community club: Development of local talent for leadership, a community spirit, an agricultural program and a community social life.

Real samples of ideal poultry raising practices were on display in the DuPage county booth. Samples of unbalanced rations, mongrel flocks and inadequate housing facilities were compared to model methods of poultry production.

The Bureau county exhibit was another that showed by picture and banner how the Farm Bureau and home bureau works through boys' and girls' clubs to develop the four objects of community clubs.

The DeKalb booth was another that emphasized the importance of using only pure, clean seeds. Samples of hay crops and grain crops made up the exhibit.

An exhibit portraying the dangers to human health from bovine tuberculosis, the methods of eradication and the progress made in McHenry county was displayed by the McHenry County Farm Bureau.

The LaSalle county corner demonstrated the road to profit in hog production by vaccination to prevent cholera.

The Whiteside county booth told the world that its county believes "it pays to advertise." The exhibit was a small school in journalism, telling the story of the Whiteside County Farm Bureau through its weekly paper, The Whiteside County Farmer.

Sam G. Smith, Anchor, and Reuben G. Bright, Hudson, crack horseshoe pitchers of McLean county, winners of the state Farm Bureau championship cup.

MURPHY OUTLINES FARMERS' STATUS

(Continued from page 1)

Agricultural Association picnic. We are in solemn conference this day because your inalienable rights have been invaded. Not only you, but all agricultural people find themselves today in economic bondage by reason of the projection across the current of the natural flow of economic laws of artificial obstructions and interferences which have resulted in material advantage to labor, industry and commerce, and to corresponding disadvantages to the nation's basic industry. Our agricultural purposes are peaceful, but at the same time determined and just."

McNary-Haugen Bill Sound

Continuing, Mr. Murphy stated that the principle of the McNary-Haugen bill was sound and that the American Council of Agriculture is going to keep the principle from becoming the football of partisan politics.

Under the present economic structure of our country, he said that 40,000,000 farmers, 35 per cent of the nation's population, is wearing economic chains. He gave his reasons for the failure of the McNary-Haugen bill; told of the sincerity of the fundamental cause; pointed out that the case of agriculture should be stated clearly, that the people want the truth, and that the fault with our economic structure should be attributed to the nation's statesmen. He said that the farmer's production cannot be controlled but that industry and labor have means of controlling their production.

At the Whiteside County Fair a Better Baby Conference will be conducted by the Whiteside County Tuberculosis Society. Emphasis is placed upon the fact that this is a conference, not a contest, and that children not so strong will be as welcome as the stronger ones.

Marshall-Putnam Farm Bureau recently conducted a boys' and girls' calf club tour. Several farms in the two counties were visited where cattle judging demonstrations were made.

Several limestone companies are giving free, aside from freight charges, five tons of limestone to each of 65 Montgomery county boys who belong to an alfalfa club.

Farm Adviser Checkley of Logan county, wheel horse on the state picnic committee, appointed three ministers in Lincoln to pick out the "Biggest Liar So Far" in the I. A. A. RECORD Liars' Contest. It was decided that D. C. Shepler, a real, honest-to-goodness, public spirited worker of the Logan County Farm Bureau, should have the 18-inch tin medal with the adorning three yards of purple ribbon (shown above) as his award for the entry: "I never told a lie."

Adviser Checkley made the award during the community singing and the Picnic Edition of the RECORD contained a big story about it. The story quoted one of the ministers as follows: "There was considerable apparent and intentional lack of dishonesty in the batch of falsehoods."

Unfortunately, Mr. Shepler got run over by an auto during the morning and nearly got laid up in the hospital. His misfortune nearly wrecked the conspiracy.

"Observations of the Growth of Boys' and Girls' Club Work," by John W. Coverdale, Secretary of the Grain Marketing Company.

Algonquin, Ill.
August 27, 1924.

The Ill. Agricultural Ass'n.,
608 South Dearborn,
Chicago, Ill.
Dear Sirs:—

The Canada thistles that I wrote you about on the C. & N. W. Ry. have all been cut and they made a clean job of it.

Am very much obliged for your prompt action in this matter.

Yours truly,
(Signed) B. B. Stewart.

John C. Watson, I. A. A. director of taxation and statistics, will attend the national tax conference in St. Louis, Sept. 15 to 19. This meeting is attended by taxation administrators of various states and cities and by teachers, students and professors of economics. It has been an annual affair for the last 15 years.

Dick Denzig won the homely man contest at the Marshall-Putnam Farm Bureau picnic. The pig-calling prize went to Louis Boyle.

RAIN DIDN'T KEEP FARMERS AWAY FROM 21ST DISTRICT MEET

Seventy-two Farm Bureau Representatives Discuss Various Problems; Boast Area Testing for T. B.

A downpour of rain wasn't enough to prevent farm bureau executive committeemen and delegates from attending the 21st district conference at Taylorville, August 20. Seventy-two farmers from Macoupin, Montgomery, Christian and Sangamon counties plowed through mud in their cars or came by train to Taylorville for the meeting.

R. A. Cowles, treasurer of the I. A. A., made a short talk in the forenoon explaining the present status of the Grain Marketing Company and the position of the I. A. A. toward the big merger. To safeguard its 63,000 Illinois farm bureau members, the I. A. A. has maintained a neutral and open-minded stand on the new grain company, he said. A thorough investigation by the best legal counsel available is now being made by the Association. This investigation is made as a matter of sound business practice and not particularly with the intention of prejudicing I. A. A. members against the grain company.

Eat Free Dinner

After the morning meeting the sixty-five farm bureau boosters were treated to a real farm bureau dinner in the Methodist church. The meal was "on" the Christian County Farm Bureau, smokes and all.

Variety was the spice of the afternoon meeting. Mr. Cowles reviewed the organization of the American Council of Agriculture, giving as the purpose of the Council, "to secure economic equality for agriculture with capital and labor." The widely scattered character of the industry, the millions of individuals involved, and the impossibility of limiting production were given by Mr. Cowles as the reasons why agriculture has not been unified as have labor and capital.

The Council aims to overcome this natural obstruction to unification by legislative protection for farmers such as labor and capital have enjoyed from laws which allow them to compete in American protected markets.

Want Efficient Service

Sam Sorrells, executive committeeman for the 21st district, reviewed the activities of the I. A. A. as they affect farmers of central Illinois. The sentiment of the general discussion which followed was to require more efficient service from the I. A. A. and its several departments without establishing additional departments or projects.

Short talks on area testing for tuberculosis were made by county veterinarians Hess of Montgomery county and Montgomery of Christian county. Farmers who took part in the discussion of the tuberculosis eradication problems were united in endorsing a continuance of the campaign against bovine tuberculosis.

The following names were taken in answer to the roll call:

Macoupin County: J. F. Leeper, C. H. Leeper, E. Leeper, J. P. Enslow, L. C. Bates, Dale Dewa, G. W. Wrightman, H. J. Shults, C. M. Shults, W. A. Shults, H. W. Reis, E. W. Rusk and Roy Bates. Total 13.

Montgomery County: R. E. Gifford, A. E. Satterlee, H. G. Lingle, Walter Satterlee, Alden Snyder, W. H. Turner, Lewis Lessman, Howard Turner, Sam Sorrells, H. A. Cress, Dr. Geo. Hess, Geo. C. Simon and wife, M. E. Roberts and wife. Total 15.

Sangamon County: John Stout, F. L. Stout, I. A. Madden, A. D. Van Meter, J. F. Greenwood and wife, Fred Darcy. Total 7.

Christian County: Glenn Hunter, C. R. McCloskey, G. A. Wacker, M. C. Durbin, Dwight Hart, T. A. Ostermeier, Harold Gordon, Elmer Waddell, Bart Hall, Wm. Pearson, George Spates, Herbert Gebhart, Nelson Waddle, Chris Munzenmaier, Fay Hubbard, C. W. Rayhill, C. B. Norris, Frank Kincaid, Wm. Shannon, Frank Garwood, E. E. McVicker, T. H. Langes, Ray Beaty, Wm. Palmer H. E. Kendle, Andrew Burgess, J. H. Gebhart, C. E. Hay, L. E. Nash, R. K. Shepherd, H. S. Armstrong, Henry Kessler, Wm. Engelman, Con Curtin, W. A. Mateer, Wm. Shaw and Dr. R. S. Montgomery. Total 37.

FARMERS PAY 70 PER CENT SCHOOL TAX, SURVEY SHOWS

I. A. A. Investigates 200 Districts; Send 10,000 Questionaires To Determine Rural Viewpoint

That fully 70 per cent of the community and township high school taxes in Illinois is paid by farmers is information disclosed by a report covering an all-summer survey of the Illinois farmers' educational problem made by the Illinois Agricultural Association in co-operation with the Illinois Educational Commission which was created by the Illinois legislature to go over the entire school situation, make investigations, formulate recommendations and report its findings to the next meeting of the General Assembly.

The report, which draws this particular information from the books of county clerks in 35 counties, further shows that although Illinois farmers pay 70 per cent of the community and township high school taxes, they furnish but 40 per cent of the high school pupils. The 35 counties where investigations were made represent fully one-half of the community and township high schools in the state.

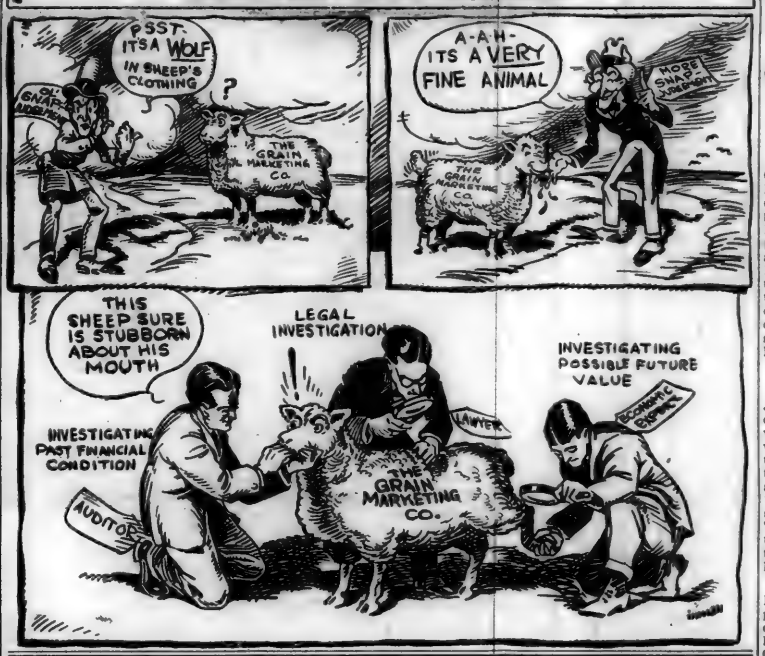
Survey Not Complete

Out of the 100 school districts reported upon, three districts showed that city people paid more than their proportionate share of the taxes. Only three showed urban and country folks paying equally. In the 94 remaining districts, the farmers paid much more than their share as is indicated by the 70 per cent average for the 100 districts reported upon. Further information will be available when data is summarized on another 100 school districts investigated this summer, although the first 100 is taken as representative of the entire state.

It was the aim of the Illinois Agricultural Association, through its educational committee consisting of J. L. Whisnand, Charleston, chairman; A. C. Everingham, Hutsonville and E. W. Rusk of Carlinville, to determine where and how the farmer stands on the school question.

Use 10,000 Questionaires

Ten thousand questionaires were mailed to Illinois farm bureau members in 94 counties of the state by Dr. G. W. Willett, superintendent of the Lyons County High School at La Grange, Ill., who was employed to manage the investigation in connection with certain research work of his at the University of Michigan. In addition, a University of Chicago student in education, C. B. Althaus, was engaged to investigate personally the farmers' angle by visiting as many school districts as possible during the summer.



He investigated nearly 300 school districts in 35 counties ranging from Pulaski in the south to the Wisconsin line in the north. With his personal investigations plus a high percentage of returns from the 10,000 queries to farmers furnishing authentic data, the report is given high praise by W. W. Lewton, chairman of the Illinois Educational Commission, as being the most complete and obviously valuable information ever obtained on the Illinois educational situation.

Problems Interest Farmers

In summarizing the information revealed by the questionaires sent to farmers, Dr. Willett set down the following points:

(Continued on page 4)

HOW THE I. A. A. PROCEEDS

Farmers' Auditing Co-op Establishes Springfield Branch

On Sept. 1 the Illinois Agricultural Co-operatives Association, the farmers co-operative auditing company, opened in the Sangamon County Farm Bureau office, in Springfield, the first of several district offices which are to be established throughout the state.

The opening of the branch office in Springfield is in keeping with a plan to centralize activities of the auditing association by districts, according to Geo. R. Wicker, general manager of the co-op. Organization by districts will also minimize traveling expenses incurred in the routine of making audits for farmers' co-operatives.

The I. A. C. A. headquarters will remain permanently in Chicago. Since its organization the association has directed operations from its central office with the I. A. A.

With the membership of the auditing co-operative now past 60, more farmers' organizations are making application for the service. As development makes it necessary other district offices will be established, until every section of the state has the services of expert auditing and accounting, according to Mr. Wicker. A branch office will be opened in the northwest district sometime this fall, probably at Rockford or Freeport.

F. A. Gougler, director of the poultry and egg marketing department is the proud father of Mr. Gougler, Jr., a recent arrival at the Gougler home. Thanks for the cigars, old top!

Four and one-half per cent is the new rate that intermediate credit banks will charge co-operative marketing associations.

I.A.A. SPEAKERS FIND FARM BUREAU SPIRIT RUNS AT HIGH LEVEL

Thompson, Everingham, Barton and Metzger Talk At Many Meetings; Baseball Is Feature

Four speakers, President Sam H. Thompson, Quincy; Frank D. Barton, Cornell; A. C. Everingham, Hutsonville; and G. E. Metzger, I. A. A. organization director, have spoken at more Farm Bureau picnics than any other four men in the state, judging from the I. A. A. speakers bureau date list.

Farm Bureau picnic attendance has been larger this year, on the average, than for any year according to A. C. Everingham.

"Baseball has been a popular feature this year," said Mr. Everingham. "The crowds, taken as a whole, have been the largest I have ever had.

"I don't think the spirit and morale of the Farm Bureau was ever better than was indicated at the picnics at which I spoke," he said.

Mr. Everingham has spoken at 12 county picnics and has three still on his list.

His picnics have been as follows:

Date	County	Town	Estimated Attendance
July	4—La Salle—Ottawa		2,000
August	14—Calhoun—Hardin		2,500
	16—Greene—Whitehall		1,500
	20—Knox—Galesburg	(8,000 cars)	30,000
	21—Cumberland—Greenup		800
	22—Menard—Old Salem		1,200
	23—Henderson—Burlington, Iowa		1,200
	27—Gallatin—Ridgway		3,000
	28—Jackson—Murphysboro		3,000
	29—Warren—Monmouth		5,000
	30—Brown—Mt. Sterling		4,000
Sept.	6—Hancock—Carthage		—
	17—DeWitt—Clinton		—
	27—Mercer—Aledo		—

President Sam H. Thompson has spoken at three county picnics as follows:

Date	County	Town	Estimated Attendance
August	26—Whiteside—Morrison		5,000
	27—Lawrence—Bridgport		—

Springfield Milk Co-op Prepares For Marketing Contract

At a recent meeting of the organizing board of directors of the Springfield Co-operative Milk Producers Association a set of by-laws and a marketing agreement were considered and adopted. A. D. Lynch, director of the I. A. A. dairy marketing department met with the board and assisted in analyzing and explaining the practical working principles of a marketing agreement.

The association is not yet incorporated and will not be chartered until a certain number of producers, representing a majority of the milk tributaries to the Springfield market, have signed the association agreement and marketing contract.

The milk producers at Springfield have been organized informally for the last five years, according to Mr. Lynch, who believes thoroughly in the principle of "looking before leaping" in organizing co-operative associations. In this time they have learned to work together, have developed leadership and have learned that their organization was not quite solid enough to give the best results. With the period of experimenting safely passed, Mr. Lynch believes the Springfield dairymen are ready for a new, closely unified co-operative under the co-operative marketing act.

The Twin City Milk Producers Association, a farmers' cooperative which pools more than 80 per cent of the milk produced in the Twin City section, recently made contracts with all the distributors of St. Paul and Minneapolis, under which the pool will supply all the milk used by the distributors.

PEORIA COUNTY TAX FIGHT RAGES WHILE CUT IS "PENDING"

City-Manned Board of Review Distrusts Watson's Figures; He Offers to Leave Data With a Committee

The battle between the Peoria County Farm Bureau and the Board of Review wages merrily on. The Board of Review has fired a volley at the Peoria County Farm Bureau in the city newspapers in an effort to win public, and especially city, favor. The Peoria County Farm Bureau, in turn, has stated its position through the newspapers of the county, but the 11 per cent reduction on farm land valuations is still "pending." The Board of Review consists of three city men.

Ask 11 Per Cent Cut

Following an investigation by John C. Watson, I. A. A. statistician and authority on taxes, in which careful comparison of sales values of city and country real estate in Peoria county were made, the Peoria County Farm Bureau asked the Board of Review for an 11 per cent average cut in the assessed valuations on farm lands. This reduction in rural land valuation was calculated to equalize taxes on town lots and country lands.

Eighty-five members of the Farm Bureau filed legal complaints against the unjust difference in real estate values and were later called in before the Peoria County Board of Review for hearings. In the hearing before the Board these men stated that their complaint was that the scale of valuations between city real estate and farm land was not equal for taxation purposes.

The Board of Review challenged the difference of 11 per cent as stated in the complaints filed by Farm Bureau members and asked Mr. Watson to return and explain his method of measuring the disparity. On the first available date, Aug. 15, he returned to Peoria for this purpose, but found that the Board of Review had arranged to be in the country that day. He appeared again on Aug. 19, which was the first of two days when land owners who had filed complaints were called in by the Board.

Watson Explains Method

In showing how he arrived at his conclusions, Mr. Watson cited opinions from leading authorities on property tax, and the practice of tax administrators in Connecticut, Wisconsin, Kansas and other states. The same method was in use in Illinois under former Governor Lowden's administration. Mr. Watson contended that the method used by the Farm Bureau was the only one which avoided estimates of values by persons who were thinking of tax valuations when they made their estimates, that if fairly used it would disclose the facts with approximate accuracy, and that the Farm Bureau and the Illinois Agricultural Association had used this method fairly.

Saving of $16,500

The fact is that for state and county taxes alone, allowing for an increase in county rates sufficient to produce the same amount of tax, the net saving in taxes to land owners in Peoria county which would come from an average reduction of 11 per cent in valuations of farm lands would amount to more than $16,500 per year to Peoria county farmers. Nor would saving be restricted to state and county wide

An Explanation

The American Farm Bureau Federation News Letter, which goes to county agents or farm advisers and Farm Bureau workers all over the nation, carried a statement in its issue of last week that "the chairman of the Illinois Grain Marketing Committee, H. E. Goembel, sent his wheat to this company", meaning The Grain Marketing Company.

Mr. Goembel states emphatically that he did not ship his grain to The Grain Marketing Company. He states that he shipped to James E. Bennett & Co. and The Grain Marketing Company bought the carload on the Chicago Board of Trade.

As chairman of the I. A. A. Grain Marketing committee, Mr. Goembel wants it understood that he is in full accord with the stand taken by the Illinois Agricultural Association in its demand for essential facts before attempting to determine the Association's attitude toward the promotion of The Grain Marketing Company in the state.

"I had a conference with Mr. Coverdale covering certain phases of the I. A. A. investigation," explains Mr. Goembel. "During our conversation, Mr. Coverdale mentioned that The Grain Marketing Company was handling considerable wet grain and that it was being processed at a low cost. I was interested in what it would cost me to get my grain processed. He said that if I would give him the number of the car, he would have it traced and a check on the various costs made. But I did not ship to The Grain Marketing Company—the car was bought by them on the Board of Trade."

—o—

Driving Around

G. E. Metzger, organization director, tells the following story:

"I sometimes feel that a great many farmers get to the point where they do a great deal like a friend of mine who bought a new Ford. I met this friend some time ago, and I asked him:

"How is the new Liz?"

"'Oh, just fine,' he said.

"How far have you driven it?" I asked him.

"'Four thousand miles.'

"How long have you had it?

"'Four months'.

"You must have been on a long trip to have driven your car 4,000 miles in four months.

"'No, I haven't been on a trip. I haven't been anywhere. I have just been driving around.'

"I sometimes think that quite often we farmers operate for a period of weeks, or months, or sometimes years, and suddenly wake up to the fact that we have just been driving around."

We're Starting Something

In the column to the right and under the heading "The Voice of the Members" are a few letters from members and former members telling their views.

"The Voice of the Members" column is new with this issue of the RECORD. Maybe we are starting something we can't finish, but we don't think so. We think Farm Bureau folks will make good use of the column.

The membership is cordially invited to express opinions in this column. And it is not our intention to censor the material printed under its heading. Constructive criticism is best. Destructive criticism helps get a load off somebody's chest, but it does not build. The I. A. A. needs builders, and the builders are the members.

Let us call a spade a spade, and take the opinions for what they are worth. What do you think of Mr. Wienecke's suggestion in his letter? Let us have **YOUR** opinions.

—o—

Vote or Shut Up

A University of Chicago professor who has just returned from a trip in Europe, where he made observations along lines of political economics, reports that the ideal republic of today is Czecho-Slovakia.

And the reason for this is that every voter must vote or pay a fine, he tells us.

Here in the United States we would not miss the revenue we lost when the Volstead act went in if we collected a dollar from every eligible voter who failed to vote.

Every person who has the right should vote. And this applies to Farm Bureau members particularly. As recognized leaders in agriculture, Farm Bureau members should make it their patriotic duty to "have a say" on election day.

Vote or shut up!

—o—

Be Ready To Answer

Get ready to answer questions on the Farm Bureau, folks! For there's an essay contest coming, and when the school students start writing essays, they'll be prodding all of us for "dope". The subjects for this nation-wide contest are: "Why dad should belong to the Farm Bureau" or "Why dad is a Farm Bureau member."

Get ready to answer questions, folks, for we will all be in this contest. The kids will be in the front line trenches and parents, school teachers, farm advisers and the rest of us re-inforcing them with ammunition.

Keep your powder dry by being ready to answer questions.

—o—

Getting Together

To bring about better co-operation and understanding between the leaders in the Illinois Grain Dealers Association, representing the farmers' elevators of the state to which many Farm Bureau members are associated, and the leaders in the Illinois Agricultural Association, an all-day conference between the two groups is being called jointly for October 2, the day preceding the next regular I. A. A. executive committee meeting.

A more complete understanding, which is conducive to whole-hearted co-operation, should result from this meeting. The personal contact between the two bodies of men, plus an airing of views by both, will do much to bring the farmers' elevators and the Farm Bureau where they belong—closer together.

—o—

The Voter's Yardstick

Farm Bureau members ask the I. A. A. WHO they should vote for. The I. A. A. is absolutely, definitely and infallibly non-partisan. Let that be understood.

But, **WHAT** Farm Bureau members should vote for is different. Every candidate for state or national office should be measured with the yard stick of equality for agriculture.

The American Council of Agriculture is taking steps to see that candidates for such offices are pledged to help agriculture obtain equality with industry and labor. Equality for agriculture is an economic question and it is the intention of the Council that it shall not become the football of partisan politics.

Stand your equality for agriculture measuring stick up alongside your candidate. Is he a friend to agriculture, and will he remain a friend after he gets your vote?

But vote, by all means, vote!

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

Carlyle, Ill., Aug. 10, 1924.

Mr. H. C. Butcher, Director of Information.
Dear Sir: In regard to the merger of the five big grain companies, in my opinion this is meant to mislead the farmers. I believe in organization and co-operative buying and selling, but I have no faith in an organization gotten up by these speculators for the "good" of the farmer unless the farmers have absolute control.

I believe in the Farm Bureau and I think it wise that the Farm Bureau investigate before giving their opinion on the merger. The plan seems simpleton to me, as in the past these speculators opposed all farm organizations, and now they are wanting to form an organization "for the good of the farmer."

I believe their aim is to sell us farmers some worthless stock or some unprofitable elevators. I honestly believe the merger is to be of more benefit to the speculator than to the farmer. It will only be good for the few at the head that are on the pay roll.

Sincerely yours,
Nic Isaak.

We're After the Facts, Nic.

(Fifty letters to persons who had dropped their Farm Bureau membership during the summer were mailed out a few days before the RECORD went to press. These following replies had been received.)

Tiskilwa, Ill., Sept. 6, 1924.

Dear Mr. Butcher:
My reason for not renewing my membership in the Farm Bureau is that I am not farming any more. Of course it is all right to be a member, but I cannot afford to spend the money for the same while not farming.

Yours truly,
Louis E. Gingery.

He Quit Farming.

Ashmore, Ill., Sept. 5, 1924.

Dear Sir:
In regard to why I did not renew my membership in the Farm Bureau, I have moved to town. Am now in a meat market, and don't feel that it would pay me to stay in any longer.

L. R. Miller.

And So Did Mr. Miller.

Barrington, Ill.

Dear Sirs:
Per request on the other side, all I can say is, I do not feel as though I get fifteen dollars, value received, per year, from the Farm Bureau. My suggestion is that you send a man, who is well informed in farming in general, and have him visit us occasionally, so if they have a question they can ask him about it. You know a farmer will not take the time or trouble to write to you. I refer to the majority.

Respectfully,
Chas. Weinecke.

P. S. The rest of the family are through with dinner while I wrote this.

Sorry You Missed Your Dinner, Chas.

Macomb, Ill., Sept. 7, 1924.

Dear Sirs:
In reply to your question will say that the reason I did not renew was because I lost all I had on the farm with bad luck, and moved to town, and felt I did not need it any more. I was unable to keep up the expense. But I will say that I think it a fine thing.

Yours respectfully,
F. L. Leftridge.

Hard Luck, Mr. Leftridge.

THE LIARS' CORNER

WHERE IS THIS MELON PATCH?

Dear Sir:
I haven't imagination enough to tell lies, but here is an absolutely truthful happening that I have a hard time getting people to believe.

I was working for a fellow one time who raised very fine watermelons. One day he sent me to the patch to get a melon, and as I was going to help eat it, of course I picked one of the largest melons I could find.

I tried to carry the thing home, but I could not lift it. So I got a pole and pried it loose from the vine and started it rolling down hill toward the house. The hill was quite steep, and the melon got to rolling so fast that it didn't stop when it reached the bottom, but rolled on against the house and tore off one room. The blow caused the melon to break open, and the juice of it drowned 22 ducks and 14 geese.—Gust Hess, Teutopolis, Illinois.

HERE'S ONE FROM COLORADO

Dear Editor:
Our neighbor, Mike B., is a small man, weighing only about 125 pounds, but we must all admit that he is, as he modestly says, "Hell for stout." To prove his prowess, he tells of a time when he and a companion were herding a thousand sheep, when a terrible blizzard struck them. They succeeded in getting the sheep to within half a mile of camp, but the poor things could get no further, so each man gathered up a sheep under each arm, carried it to camp, and returned for two more. By morning they had carried the whole thousand head to camp.

On another occasion, Mike went jack rabbit hunting with some of his friends, and he got so far ahead of them that he would stop and count the rabbits he was carrying. He had 45, and the rabbits averaged 8 pounds apiece.—Mrs. Pearl Underwood, New Castle, Colorado.

SOME GUN!

Dear Editor:
One day recently I was out hunting with a friend, when he made a slighting remark about my gun, so of course, I had to show him what a good gun it was. I noticed a crow on a fence post near a schoolhouse, about a quarter of a mile down the road, so I took aim carefully and shot at it. The bullet killed the crow, went through both sides of the brick schoolhouse and went down a row of potatoes on the other side of the house and plowed them out better than breaking plow. All we had to do was walk down the row and pick up the potatoes.—Ralph Paul, Route No. 5, Lincoln, Illinois.

Not so bad, eh? But we need some more yarns to swap. Come on—send us in your tallest ones. You may win the platinum ice pick when we decide on the winners at the Annual Meeting next January. Fish stories are not barred.—Editor.

KANKAKEE FARMERS FIND PROFIT IN CITY MARKET

Several links in the chain of middlemen, who each adds an "expense plus" profit to the ultimate cost of most every man-made commodity, have been removed by the farmers around Kankakee who make up the farmers' market of that city. And, in doing so, they have put a "big business" practice into effect; that is, "the customer is always right," the maxim upon which Marshall Field built up what is probably the world's greatest link of the chain of middlemen.

The removal of those links seems to have resulted in more cash to the farmer-marketer without causing strife or friction with the city merchants—a point worthy of some consideration. Those merchants who have been more-or-less displaced by the direct-to-the-consumer farmers' market apparently look upon it in a broad sense.

On the last Saturday of August, 44 farmer-salesmen who had commodities to sell that day, took in over their booth-counters an average of $48.20 each. About 1,100 people visited the market during the day; Kankakee is a city of around 17,000 population.

Four Years Old

How the farmers around Kankakee got into the direct-to-the consumer marketing business is almost a yarn in itself. Four years ago, several farmers got together and were selling along the curb, but curb markets are unsatisfactory for several apparent reasons. There is the dirt, the ever-flying dust, the flies, public handling—and other conditions which are not conducive to the selling of produce in a sanitary manner.

There came an offer by a local merchant to sell his three-story brick building to the Kankakee County Crop and Soil Improvement Association, in other words, the Kankakee County Farm Bureau under a name of 1912 vintage. The merchant wanted $18,000 and he got it. Not long ago the Farm Bureau was offered $27,000 for the building.

It was a surprise to the merchants when the farmers bought the building. Seventy-two booths approximately six by six feet square were divided off and an indoor farmers' market was begun. The farmer-merchants pay 50 cents for a booth on Wednesdays and $1 on Saturdays. None but Farm Bureau members can participate.

The two upper floors were rented out for storage and the basement was converted into storage spaces for the farmers who had some products left over from time to time. Then, too, the storage space made it handy for farmers to haul in their stuff any time during the week and in large loads.

Brings Out Co-operation

Last year, 1923, an average of 94 farmers sold produce on the market each week. In 1920, the first year of operation, an average of 18 sellers constituted the market. In 1921, there were 40 and in 1922, six more per week availed themselves of the selling advantages offered by the market. Now the building is paying for itself and a nice revenue comes to the Kankakee County Crop and Soil Improvement Association.

"We have found that this market is a good place to bring out the co-operation there is in a man or woman," said John S. Collier, the farm adviser, and who has been there in that capacity for 13 years—the longest continuous period of service of any county agent in the United States. "For example, one farmer voluntarily helps sell a dozen pounds of his neighbor's butter who is in another booth down the aisle. In return, the neighbor takes a few dozen eggs and each man is sold out sooner.

"Customer Is Always Right"

"Our market is meant to function on the principle that the customer is always right," he added. "We keep a set of scales in the center of the market floor where anyone who pleases can weigh what he buys after he buys it."

"Who establishes the price for each day's market?" he was asked.

"The evening before each market day," he replied, "a range of prices on the commodities in season is compiled in accordance with general market conditions. It is merely a suggested range for prices—nothing compulsory. But we try to sell within that range.

"Last Saturday, 1,100 people visited the market. Cars were jammed in the streets; they always are on market days. But August is not our busy month; from November to April is our busy season.

They Have Their Troubles, Too

"But don't get the impression that everything is always lovely," he said. "We have our troubles. Any group of farmers planning to start such a market should make a careful survey of local conditions. They should find out from first hand inquiries from buyers, sellers and competitors just what each thinks of the farmers' market."

They sell almost every conceivable product grown by farmers. One lady, Mrs. Wm. E. Tanner, happened to bring in a bouquet of flowers from her garden one day, and someone offered her a quarter for it. That gave her an idea. Now she brings in 18 to 20 bouquets and sells them all.

Lots of pies, cakes and other home-baked goods are brought in for sale. Besides the usual market offerings of fresh vegetables and such stuff, several farm wives have developed a paying clientele among the city-folks for country-made cottage cheese, butter and buttermilk. Fresh country milk and cream sell well. Honey, quartered beeves, mutton, pork, dressed chickens, cooking apples and what not make up the aggregate offerings to the buyers. The dairy products all come from cows declared free from bovine tuberculosis. None other is allowed.

And the customers are loyal.

This trophy is to be given by the I. A. A. to the farmers' shipping association in Illinois sustaining the smallest loss on live stock in transit during the six months' period from July 1 to Dec. 31, 1924. During this time a minimum of 20 cars of stock must be shipped to Producers to qualify a shippers' association for the contest.

One lady has about 25 pounds of her own make of butter to sell each Saturday. It's so well liked that it's gone in practically no time. They line up for it! Two thousand pounds of butter are sold there every market day, according to Mr. Collier.

One man grows broomcorn on his farm, harvests his crop, makes brooms and sells 'em on the Kankakee farmers' market. He sold 900 last year.

Another man, Armand J. Pallissard of St. Anne, has developed a small packing plant on his farm because he sells so many butchered hogs. He sold 102 last year. He did his own butchering, too.

Meat Market Likes It

A talk with various city merchants indicated that most of them think well of the farmers' market. Many of them think it's an asset to their business.

A meat market man with whom the farmers' market competed quite keenly, looked at the proposition broadly. He said he was in favor of the market, although it actually competed with him.

"Farmers have a right to sell that way, why should I object?" he said. "Even if I do lose some trade, I have the satisfaction of knowing the farmers hereabouts are getting a taste of the problems of butchering and selling meat. They trust me more; they understand my troubles more, see? That's something. Then, too, when more people are in town, we get ours. In fact, we look forward to Wednesdays and Saturdays as better business days than the others.

A groceryman was not so favorable toward it.

"Oh, the farmers' market, you mean? Oh, yes," the groceryman said. "Lots of farmers have started in on it, but when they find out about all the detail work they drop out again. They have to buy wrapping paper and string and be on the job and do a lot of things they never thought of before. Then they have to do something with their perishables, you know. That's the trouble of it. When they see they can't sell all their stuff, they begin to cut prices. That's what hurts us. And it hurts them. That's bad stuff, you betcha. Yeah, it hurts my business, all right. And my vegetables are just as fresh as theirs, but people won't believe it. Ain't that funny?"

Hardware Man Says It's Fine

The hardware dealer was sure it brought more trade to town.

"We get our share, and that's all we ask," he said. "More people come to town and up town on market days and when they come to market, they're in a buying mood. It's all right with us. My mother buys over there. She likes the fresh cream and vegetables. But she says she's got to watch her step, or the first thing she knows she'll be buying last week's cream.

"I think the market's O. K.," the hardware man continued, "because it brings me more business. Of course, it doesn't compete with hardware selling much anyway. But here's an illustration of how we get our trade from it. That man who sells so many hogs over there, Mr. Pillissard, has bought about $50 worth of butchering equipment from this store. I wouldn't have had this business if all the people in the city had bought meat butchered in Chicago, would I? It makes more local trading, see?"

A harness dealer said that the market brings more people to town and he couldn't sell harness with the farmers out in the country.

"I notice a little better business on market days," the harness dealer said.

And so the queries went; where the goods sold by the farmers competed directly with the city merchant, excepting in the case of the meat market man, there was some little feeling. Otherwise, there was universal acceptance of the farmers' market as a good thing for business, the city and the farmers participating.

Last Chance To Buy
WOOL BLANKETS
Going Fast

Only 280 left.

These blankets, made up for the I. A. A., are pure wool, 6-lb., double blankets, 72 x 84 inches.

Colors—Gray and White checks, Blue and White checks.

These blankets cannot be duplicated on the open market today.

TO FARM BUREAU MEMBERS.....$11.00
TO NON-FARM BUREAU MEMBERS..$13.00

Send your order now, through your county Farm Bureau. Cash must accompany order. These blankets will be sold out immediately. No more to be made by the I. A. A.

TAX FIGHT RAGES IN PEORIA COUNTY

(Continued from page 1)

taxes, though most of it would come in such taxes.

In view of the obvious fact that his figures were in question, and of the equally obvious fact that the Farm Bureau would question the purpose of the Board of Review in checking over his figures, Mr. Watson withdrew his offer, which had stood until that time, that the Board of Review could examine all of the material and data which had been compiled by the Farm Bureau and the Illinois Agricultural Association.

Committee to Get Facts

Pointing out that the Board of Review ought to desire to get the facts, regardless of what they are, he submitted a new offer which would avoid questions of motives and would secure substantial agreement as to the facts. His offer was that the Board of Review ask the Peoria Association of Commerce to appoint a representative, the Farm Bureau to appoint one, and that the Board itself appoint one, the three representatives thus chosen to determine under rules of their own choosing, adopted before beginning their work, the average percentage of actual selling values of farm lands and town and city lots now used in valuations of the same for taxation purposes, and that all elements represented in the investigation agree to abide by the result.

The chairman of the Board of Review, Mr. Kircher, whose fairness throughout the controversy is recognized by the Farm Bureau, replied that the Board would consider the offer. As yet the Board has not stated its decision.

Want Square Deal

The Farm Bureau has no desire to increase taxes on city property. It asks for no advantage or favor for farmers over other people, but it demands and will continue to demand that any disadvantage suffered by farmers in the assessments of their property be removed. It asks that the facts be determined in such a way as to convince all elements of Peoria county people, and that any corrections be made which may be necessary to put all property on a substantially uniform basis of valuations, as the laws of the state and the courts require.

Such a program will secure justice for smaller property owners in the city of Peoria and in the smaller towns and villages for their property also, as the investigation reveals, and is admitted by the Peoria County Board of Review, is assessed at a much higher average percentage of selling values than larger and more valuable properties.

Tri-Party Parley To Be In Chicago

On Sept. 26 there will meet in Chicago in joint conference representatives of the American Farm Bureau Federation, the Agricultural Service of the Federal Board for Vocational Education and the Extension Service of the United States Department of Agriculture.

The idea of calling this conference originated at a joint conference between the heads of the Agricultural Division of the Federal Board for Vocational Education and the department heads of the Farm Bureau. At this meeting ways and means of co-ordinating the efforts of the two groups were formulated and the coming conference was suggested.

The purpose of the meeting on Sept. 26 is to more closely correlate the work of the three groups so that each may have an intimate understanding of the work of the other two.

Present Directors Ask Old Timers In

All ex-executive committeemen of the Illinois Agricultural Association are invited to attend any executive committee meetings. Whenever any of the 29 old executives happen to be in Chicago during a meeting, they are cordially asked by the present executives to come into the meetings. The date of the next meeting is set for Oct. 3.

This year the champion corn huskers of the corn belt are to have a chance to win their spurs in a state and an interstate contest. The contests in Illinois and Indiana will be sponsored by Prairie Farmer. Wallace's Farmer will conduct a similar contest in Iowa, Nebraska Farmer in Nebraska, and The Farmer in Minnesota and South Dakota.

The winners in these state contests will fight it out in a big interstate contest, with liberal prizes, moving picture machines grinding away, and perhaps with a running story of the contest broadcast by radio.

U. S. D. A. reports for July show 34,451 cattle in 4,041 Illinois herds were given the test for tuberculosis, with 1,593 reacting.

"SPEND A WEEK IN DAIRYLAND," IS CRY OF SHOW MANAGERS

Annual Exposition Is Within Reach of Illinois Farmers; Plan Trips Into Wisconsin Dairy Regions

If present plans materialize there will be a general exodus of Illinois dairymen into Wisconsin for the National Dairy Exposition, the annual premier event in dairy circles of North America, which is scheduled for Sept. 27 to Oct. 4, at the state fair grounds in Milwaukee.

This is the first time in several years that the Dairy Show has been held within reach of Illinois farmers, and with this fact in mind the dairy marketing department of the I. A. A. and other organizations are making special arrangements for Illinois Day at the show, Wednesday, Oct. 1. Farmers and dairymen from all over Illinois are arranging to make the trip to Milwaukee in groups with their farm advisers, either by train or automobile.

The dairy cattle show will be the headliner attraction. Illinois farmers who attend the show will see there the best the United States and Canada have to offer in beautiful and productive dairy cattle of the five major dairy breeds. The dairy industry in America is comparatively new but in the few decades that dairymen of this country have been breeding they have developed many qualities in dairy animals that their fellow breeders in Europe have failed to bring out in centuries.

One of these qualities is refinement and beauty. A second is excessively high production. At the National Dairy Show these two qualities in dairy cattle can be seen, combined, in the best show herd animals in the world.

Other major attractions will be the National Dairy Cattlemens' Conference; the National Dairy Judging contest for college students; a conference for creamery men; a Farmers' Dairy Judging contest; National Junior Dairy Judging contest and a grade cow Sale.

Leaders to Speak

The National Conference of dairy cattlemen is to be held on the Exposition Grounds, Wednesday, Oct. 1. This conference is to disseminate and develop a national understanding of sanitary requirements for moving cattle between states and to develop rules of integrity governing exchange and sale of dairy cattle. Every state wherein dairying is now an important branch of agriculture will be represented at this conference.

Some of the leading dairymen who will be on the dairy conference program are: Ex-Gov. Frank O. Lowden, who will talk on cow testing records and how they affect permanent records of the dairy industry; J. R. Mohler, Chief of T. B. Education Division, Washington, D. C., who will explain federal rulings on cattle transportation; Prof. H. H. Kildee, Iowa, speaking on uniform judging of dairy cattle; and several others prominent in state and national dairy work.

The contest for national dairy judging honors among colleges is an old, well established event and will be hotly contested for by teams from 30 colleges and universities from the United States and Canada.

Have Farmers' Contest

The farmers' contest this year is a new one in which only farmers and dairymen actually engaged in production of dairy products may enter. Teams will be entered by counties from many dairy sections.

Arrangements are being made for special cars from Chicago for those who wish to go by train From all points in Illinois fare and a third rates will prevail. Those who prefer to drive will find excellent roads all the way, not only to Milwaukee but into the heart of all Wisconsin's dairy regions.

"Spend a Week in Dairyland" has been the slogan of the management of the Dairy Exposition and nothing has been left undone to make the week a profitable one. Those who are planning on the trip into Dairyland should see their farm adviser for information regarding reduced rates, routes to take and other details.

I.A.A. Boosts "Why Join Farm Bureau" Contest

FARMERS IN 20TH DISTRICT ASK FOR HARD ROAD FACTS

Conference Requests Information On $100,000,000 Bond Issue and Approves Grain Merger Probe

Farm Bureau representatives from Mason, Menard, Cass, Morgan, Scott, Greene, Jersey, Pike and Brown counties met at Jacksonville, Aug. 29, for a district conference on farm problems.

Discussion of the Grain Marketing Company, the American Council of Agriculture, legislative problems and the $100,000,000 bond issue for hard roads occupied the major portion of attention of the 50 farmers present. An inspirational address by Frank J. Kernel, farmer-banker of Jacksonville, on the "Future of Agriculture" and local problems made up the balance of the program.

Discuss Grain Merger

Earl C. Smith of Detroit, district committeeman, after calling the meeting to order and enumerating the questions to be considered, explained his position in asking for the I. A. A. investigation of the Grain Marketing Company, which is being made.

R. A. Cowles, I. A. A. treasurer and secretary of the American Council of Agriculture, explained the Grain Marketing Company question from its beginning, with the initial proposal of several large grain companies to sell their marketing facilities to farmers' organizations, up to the present time.

Referring to the giant merger as an "innovation of the grain trade to dispose of their businesses," Mr. Cowles stated that one of the principal objects of the I. A. A. investigation, now being made, is to locate the exact seat of control of the Grain Marketing Company, and emphasized that the open-minded attitude is being maintained by I. A. A. officials.

A motion was passed commending the action of the I. A. A. for investigating The Grain Marketing Company.

Investigate Road Bonds

A request for expression of opinion on the question of securing information on the $100,000,000 bond issue for hard roads was made by Mr. Smith. The meeting voted to instruct Mr. Smith to ask the I. A. A. department of statistics to furnish the desired information on the subject.

Mr. Cowles outlined the aims and purposes of the American Council of Agriculture in a discussion of the effort which the Council is making toward equality legislation for agriculture. He stated that equality for agriculture is fundamentally economic and not political.

Each of the nine County Farm Bureaus were represented among the 50 officers and farmer members who attended the meeting. Oct. 24 is the date set for the next meeting.

FARM BUREAU SPIRIT RUNS AT HIGH LEVEL

(Continued from page 1)

President Thompson is also scheduled to speak at the Piatt County Farm Bureau picnic and at the Adams County Farm Bureau picnic at Camp Point.

Frank D. Barton of Cornell, I.A.A. executive, has six picnics on his scalp belt, as follows:

Effingham county at Effingham; Scott county at the Platt County Farm Bureau picnic and at the Adams County Farm Bureau picnic at Camp Point.

Frank D. Barton of Cornell, I.A.A. executive, has six picnics on his scalp belt, as follows:

Effingham county at Effingham; Scott county at Winchester, estimated attendance 2,000; Cass county, at Virginia, 2,000; Edwards county, Albion, 1,000; Marion county, Salem, 200; Douglas county, Arcola, 200.

C. E. Metzger, I. A. A. organization director, is always on the jump filling speaking or meeting engagements. Here is his list of picnics:

Date	County	Town	Estimated Attendance
June	9—DuPage	Roselle (Farmers' Elevator)	600
	10—Ogle—Oregon (Annual meeting)		300
August	1—Rock—Evansville, Wis. (County fair)		600
	2—DeKalb—Sycamore (Farmers' Elevator)		300
	14—Pike—New Canton		3,000
	21—Randolph—Sparta		2,500
	22—Saline—Eldorado		500
	24—Monroe—Columbia		500
	27—Moultrie—Sullivan		4,000
Sept.	15—Christian—Taylorville		
	30—Jefferson—Mt. Vernon		

Listen In!

FARM RADIO PROGRAM
Over KYW—Wave Length 536
Central Standard Time 7:20

I. A. A. radio followers will find September a much better month than August for receiving our farm programs since there is likely to be less static in the air. Better throw a little more wood on the fire these frosty evenings, lay in a supply of pop corn and tune in on KYW! There will be five more farm radio programs sent from KYW before the end of September. I. A. A. people will appear on WLS programs from time to time, too.

The information department would like to know how many I. A. A. members are getting the farm programs. Do you tune in on KYW programs Do you like 'em when you do get 'em? Write and tell us what you think of the programs.

September 16—"With the Farm Bureau East of the Alleghenies," by E. P. Cohill, of the American Farm Bureau Federation Executive Committee and president of the Maryland Farm Bureau Federation.

"School Days," by C. V. Gregory, Editor of Prairie Farmer.

September 19—"Boys' and Girls' Club Work in the South," by H. J. Schwietert, General Development Agent, Illinois Central Railroad.

"What we Saw at the State Fair This Week," by Arthur C. Page, Editor, Orange Judd Illinois Farmer.

September 23—"Monthly Analysis of Farm Markets," by H. W. Moorhouse, of the Howard-Moorhouse Agricultural Business Service.

"Vocational Agricultural Training," by Dr. C. H. Lane, Chief, Agricultural Education Service, Federal Board for Vocational Education, Washington, D. C.

September 26—"Transportation of Farm Products," by O. W. Sandberg, Director of Transportation, American Farm Bureau Federation.

Talk on Vocational Education by Dr. C. H. Lane, Chief Agricultural Education Service, Federal Board for Vocational Education, Washington, D. C.

September 30—"Please Help Yourself," by John A. Kotal, Secretary, United Master Butchers of America, under auspices of the National Live Stock and Meat Board.

"Observations of the Growth of Boys and Girls' Club Work," by John W. Coverdale, Secretary of the Grain Marketing Company.

File Complaint Of Overcharge Against C. P. & St. L. Road

Charging the Chicago, Peoria & St. Louis Railroad Company with misinterpretation and wrong application of rules on mixed shipments of live stock, our I. A. A. transportation department has filed an overcharge complaint with the Illinois Commerce Commission.

The complaint covers three mixed shipments of live stock from Hettick, Ill., to East St. Louis, two consisting of a mixture of cattle and calves and the other consisting of a mixture of cattle, calves and hogs.

On one of the first mentioned shipments the C. P. & St. L. assessed and collected charges on the basis of cattle minimum weight of 22,000 pounds and the cattle rate of 14 cents, making the charge $30.80, which covered the cattle only. The calves, although loaded in the same car, were charged on the basis of 5,630 pounds, less carload rate, making a charge for the calves of $33.22 or a total charge on the shipment of $64.02.

The transportation department contends that the proper and reasonable charge to cover both cattle and calves in this shipment, under the tariffs then in effect, is on the basis of cattle minimum weight of 22,000 pounds and cattle rate of 14 cents, making a total charge of $30.80, with similar charges on other shipments.

The case is very similar to one recently decided against the L. & N. railroad after a litigation with the I. A. A. for a two-year period. No date has been set for a hearing before the Commerce Commission.

Popular opinion predicts a good corn shortage next spring.

RADIO FANS HEAR WHISNAND TALK ON SCHOOL PROBLEMS

"Public schools are predominantly community institutions, locally supported, locally conducted and controlled," said J. L. Whisnand, I. A. A. executive committeeman from Charleston, in a radio talk on the Farm Bureau program over station KYW recently. "It has been left to the states to exercise their powers over educational matters. Each state has developed and built up its own school system, with its own good points and its own shortcomings."

J. L. Whisnand.

Mr. Whisnand, who is chairman of the I. A. A. educational committee, was speaking on the subject, "The Farmers' School Problems." Although he has now retired to the management of his farming interests in Coles county, his experience in educational problems has been as a teacher and county school superintendent.

"The states have copied each other's good points and profited by each other's mistakes," continued Mr. Whisnand, "and while standing out individually we are surprised and even amazed to know how closely related they are to each other fundamentally after a century and a half of development.

"The educational committee of the Illinois Agricultural Association is making a careful and comprehensive survey of the rural school situation in Illinois upon behalf of the farmers' school interests. The principal angle of this survey is nearly completed. It has met with a hearty response from rural folks. A rather superficial examination of the survey so far shows that the farmer heartily endorses education, is willing to contribute his share to the cause, is on the square in matters of taxation, willing to pay for what he gets, and wants the other fellow to do the same. It further shows that the farmer is not particularly educating his children to stay on the farm, but to take their places in life along with other folks wherever they may be thrown.

"One point brought out in the answers to the questionaire is that the farmers want better teachers in the rural schools. Before this can be brought about a great many changes must be made in school matters, chief among which is the enlargement of facilities in our teachers' colleges and universities.

"Since a large per cent of our farmer boys and girls go on through high schools, teachers' colleges or universities and since as large a per cent of country boys and girls as any other group are honor students, and since such a large per cent of farm boys and girls succeed on the farm, in business, in professions, in art and in trades, I feel that the technique of the rural schools is the technique of our high schools and universities," Mr. Whisnand said in closing. All the country boys and girls need is a fair chance with other boys and girls and you will see them give an excellent account of themselves."

HERE'S DOPE ON EXECUTIVE COMMITTEE'S MEET, SEPT. 5

1. Heard financial report on I. A. A. Accepted and approved.

2. In order to bring about better feeling and co-operation between leaders of Illinois Grain Dealers Association and of the I. A. A., a joint conference for the executive committees of the two organizations is being called for Thursday, Oct. 2, at Chicago, which is the day preceding the regular I. A. A. executive committee meeting. The meeting will be called jointly by the two organizations.

3. Decided that I. A. A. should investigate the farm insurance field with a view toward assembling valuable data on general farm insurance rates in Illinois.

4. Ordered an investigation into the facts concerning the proposed $100,000,000 bond issue which comes up for voting this fall. The facts are to be gotten by John C. Watson, director of taxation and statistics, and L. J. Quasey, director of transportation, and published in the RECORD. The investigation is to be strictly non-political and the facts found are to be compiled solely as a basis for intelligent consideration of the bond issue by Farm Bureau members.

5. Heard report of educational committee on its school investigation, a detailed report of which is in this RECORD. Report accepted.

6. Decided that the I. A. A. should pay for as much as 50 per cent of the first auditing cost of any county farm bureau when done by the Illinois Agricultural Co-operatives Association. Where there are numerous commercial activities of a county farm bureau, such auditing cost thereby incurred is to be borne wholly by the county organization. The finance committee is to determine the extent of which I. A. A. will help bear first auditing costs in individual cases.

7. Set date for next annual meeting as Thursday and Friday, Jan. 15 and 16, 1925, at the University of Illinois, which is during Farmers' Week. Place of meeting had been determined previously.

8. J. P. Stout, Chatham, president of the Sangamon County Farm Bureau and on the advisory committee to the farm mechanics department of the University of Illinois, and Prof. E. W. Lehman, head of that department, informed the executive committee of the progress made by the state committee on the "Relation of Electricity to Agriculture" in Illinois.

9. As a good citizenship movement, and to be entirely divorced from politics, the executive committee urged that all farmers vote. "Get out the vote" was the theme.

Farmers Purchase Electric Railway

Five farmers' elevators and the County Farm Bureaus in Kendall and Grundy counties have formed a stock company and purchased the Fox & Illinois Union Electric Railway which was to have been junked by its former owners. Operations under the new management started Sept. 8.

Because the line has been operating unprofitably for the last several years the Illinois Commerce Commission granted permission to junk it. This action was regarded as a disaster for farmers along the road since it would have left over 1,000 farms in the richest agricultural sections of Kendall and Grundy counties with no railway service within 12 miles. The management of the five farmers' elevators took the lead in organizing the farmers' company to purchase the railway, without which their elevators would have been isolated from all railroads and totally useless.

Protest against placing a 25 per cent ad valorem tax on nitrate of soda, which is largely used in the fertilizer industry and purchased for fertilizer purposes direct by the farmers, was made to the customs division of the U. S. treasury department recently by the A. F. B. F.

The Iowa Farm Bureau Federation has wired President Coolidge asking that Secretary Wallace be instructed to appoint the agricultural commission which the President promised in a recent speech.

The De Witt County Farm Bureau sold advertising slides to 20 business concerns and purchased a new movie outfit with the proceeds, agreeing to show the slides every time the machine is used. The De Witt Bureau is now showing, "Out of the Shadows," a T. B. eradication film.

There are over 10,000 agricultural co-operatives in the United States doing an annual business of over $2,000,000,000.

I.A.A. WILL AWARD 13 CASH PRIZES IN BIG ESSAY CONTEST

Local Business and County Farm Bureaus Will Co-operate On National Essay Competition

Every boy and girl in Illinois who goes to school in any grade up to the second year in high school is eligible to enter a nation-wide essay contest which is to be conducted between Oct. 1 and Nov. 10, by the American Farm Bureau Federation.

Already a lot of farmer boys and girls have donned their thinking caps and are "on their marks" awaiting the final shot which will tell them to "go." They have their choice of two subjects for their essay. They can write on "Why Dad Should Join the Farm Bureau" or "Why Dad is a Farm Bureau Member."

Free Trips to Chicago

The American Farm Bureau Federation is offering as prizes a free trip to Chicago for the contest winner in each of the national farm Bureau regional districts. But before Illinois boys and girls get to that they have many chances to win prizes in the county and state contests.

The Illinois Agricultural Association is going to give 13 cash prizes for the best essays written by boys and girls in Illinois. The writer of the best essay will get $25 in cash. The second best will win $15 and the third $5. The next 10 best essays will win $3 cash prizes for the boys and girls who write them.

Offer Local Prizes

Every County Farm Bureau in the state is considering offering prizes for the best essays in the county. The complete list of County Farm Bureaus offering prizes will be announced later. County Farm Bureaus, co-operating with local banks and other local business firms, will give prizes of $10, $5 and $2.50 for first, second and third places. In addition five $2 and five $1 cash prizes will be offered for those essays coming after the first three prizes.

After the contest winners are picked from the various counties and states the American Farm Bureau Federation will award, in each of the four regional districts, one national prize, the winner to get a free trip to the annual meeting of the Federation, which will be in Chicago Dec. 8, 9 and 10.

Essays will be judged on the following points: 1. Facts on the subject. 2. How the story is told. 3. English, spelling and punctuation. 4. General appearance and neatness.

For additional information, see your Farm Adviser or county superintendent of schools and watch the RECORD for developments.

FARMERS PAY HEAVY TAX, SURVEY SHOWS

(Continued from page 1)

1. Universal interest is being shown by Illinois farmers in their educational problems.

2. Practically all farmers who answered the questionaires intend to send their children to high school.

3. A majority of farmers are opposed to consolidated schools under existing conditions.

4. A majority favor the continuation of the one room school.

One phase of the Illinois Agricultural Association investigation dealt with the quality and training of the rural school teacher. Taking the 70 questionaire replies received from rural school teachers in Whiteside county, Ill., it was found that 66 of the 70 reporting were high school graduates; about one-third had never attended a country school; two-thirds preferred to teach in the city or town schools; 17 were teaching for their first year and 47 were teaching for their first year at their present school.

COVERDALE, SILVER TAKE GRAIN JOBS; A.F.B.F. O.K.'S DEAL

President Thompson Against Indorsement; Awaits Final Decision of I. A. A. Investigation

The resignation of John W. Coverdale as secretary of the American Farm Bureau Federation and of Gray Silver, Washington representative, who have both been with the American Farm Bureau Federation since its inception in 1920, was presented to and accepted by the executive committee of the American Farm Bureau Federation in its regular session in Chicago Sept. 15-17.

Both men stated in their resignations that they wished to devote full time to their duties with the Grain Marketing Company of which Silver is president and Coverdale secretary-treasurer. A resolution of indorsement of the Grain Marketing Company was also passed by the executive committee.

Thompson Against Indorsement

Sam H. Thompson, Quincy, president of the Illinois Agricultural Association and a member of the executive committee of the American Farm Bureau Federation, stood solidly throughout the three-day session as being against indorsement of the Grain Marketing Company at this time. He voted against indorsement.

President Thompson, who was originally appointed on the special committee created in the spring to consider the proposal of the five old-line grain companies, did not help prepare or concur in the report of the special committee which recommended the Grain Marketing Company to the Executive Committee.

When the Illinois Agricultural Association investigation was announced, Mr. Thompson asked to be relieved as a member of the special grain marketing committee of the American Farm Bureau Federation pending the investigation which has not yet been completed.

Reid Succeeds Silver

Following the resignation of Mr. Coverdale, Gray Silver, who has guided the legislative activities of the A. F. B. F. for four years, presented his resignation in order to devote entire time to his new job as president of the Grain Marketing Company. Mr. Silver's resignation was accepted upon his agreeing to act as counselor to the Legislative Department.

E. B. Reid was named as acting director of the Washington office. Mr. Reid has been assistant Washington representative for three years.

The executive committee went into session at ten o'clock at the general offices of the American Farm Bureau Federation in Chicago, on Monday morning, September 15, 1924. Roll call showed the following present:

President O. E. Bradfute, Vice President J. F. Reed, Secretary John W. Coverdale; Members George M. Putnam, New Hampshire; S. McLean Buckingham, Connecticut; Ralph Snyder, Kansas; S. H. Thompson, Illinois; C. E. Hearst, Iowa; A. C. Hardison, California; Frank Evans, Utah; Chas. E. Gibson, Jr., Colorado; E. P. Cohill, Maryland. Others present were L. G. Michael,

(Continued on page 4)

THOMPSONIGRAMS:

Agriculture today must be placed on a business basis.

Increased land value is undependable; profit must now come from the product of the land.

The farmers' dollar is now worth exactly 83 cents.

Farmers do not want special legislation, but something must be done to place farming on a more sound basis.

Farmers should be sure of some returns the same as people in other lines of business.

In these five terse sentences, President Sam H. Thompson, in an address before the Quincy Rotary, summed up the present agricultural situation and urged every possible means to put farming on a firmer basis.

Lynch Furnishes Butter "Hoopla" For Radio Fans

Many of our I. A. A. members may have heard A. D. Lynch, director of the dairy marketing department, when station WLS broadcast five minutes worth of his merry, rollicking "hoopla" from their Springfield station during the fair.

Lynch started out by trying to decide why a black cow could eat green grass and give white milk and finally decided that the reason a red cow could eat green grass and give white milk was the same rule working backwards—like when a white man is kicked by a cow and gets black and blue spots he gets so mad he sees green.

"All dairy sections have had plenty of rain this last summer," Mr. Lynch's voice carried out seriously after his hilarious beginning. "As a result the pastures have been regular banquet halls for the cows. The summer has been cool and the flies weren't bad. In the northwest many grain farmers turned to milking cows to make back some of their losses in grain farming. The result is that we now have a surplus in storage holdings of 156,000,000 pounds of creamery butter.

"That looks like enough to keep our waffles and pancakes and bread buttered for a long time but it is customary to have a surplus of about 102,000,000 pounds of creamery butter on Sept. 1. That has been the average for the last five years. But that still leaves a surplus of 54,000,000. If it isn't eaten before next May it will mean lower prices and losses in the whole dairy industry."

Calculating on the increase in population, which will consume 35,000,000 pounds and allowing 6,250,000 for a running surplus, Mr. Lynch managed to cut the surplus down to about an even 13,000,000 pounds.

"When you think of it that is only a drop in the bucket or about two ounces per person. Why not every farmer eat a little more butter? At least every farmer who has been defeating his own dairy industry by eating butter substitutes should cut them out and eat real dairy products. Thank you," Lynch said and his "hoopla" ended.

AROUSING THEIR INTEREST IN DAD'S BUSINESS

Essay Contestants: Write the information department of the I. A. A. for "dope" for your essays, and see or phone your Farm Adviser.

Farm Taxes Cut In Whiteside County

The Board of Review in Whiteside county joined the parade of "farm tax slashers" when they granted the request of the Whiteside County Farm Bureau for a cut in the valuation of farm lands. The reduction, effective in next year's taxes, amounts to an average of 12 per cent for the entire county. Cuts varied from five per cent in Portland township to 20 per cent in Clyde township.

Last May the Whiteside County Farm Bureau appointed a committee to go before the Board of Review and present a petition asking for a reduction in taxes on farm lands. The committee appointed was R. A. Norrish, chairman; Harry Rowland, Newton; H. C. Hull, Prophetstown; A. S. Durward, Ustick; J. W. Johnson, Tampico.

The committee decided to go before the Board of Review with the facts pertaining to taxation, valuation of farm property and earning power of farm lands.

Each member of the committee secured a number of affidavits regarding the income of farms and the taxable valuation. With this information in hand the committee from the Farm Bureau met with the Board of Review.

The Board considered the request, went over affidavits taken from a number of farms in all parts of the county, and after considerable deliberation and study on the assessed valuations of land in the various townships, made a report to President R. A. Norrish of the Farm Bureau, officially announcing the requested reduction.

Only 14 per cent of the alfalfa acreage of the United States is found east of the states bordering on the Mississippi river.

Watson Speaks At National Tax Meet

J. C. Watson, director of the department of taxation and statistics, attended the national tax conference held in the Chase hotel in St. Louis last week at which 400 tax administrators and students in taxation from over the United States were gathered. Mr. Watson was appointed as the representative of Illinois on the resolutions committee and was also made one of seven members of a sub-committee appointed to pass on resolutions for recommendation to the full committee.

In a round table discussion of "Methods of Improving Property Tax," Mr. Watson spoke on: "Suggestions for Improving the Assessments of Agricultural Lands."

Sell Reactors On Open Market Now

As a result of a change in the method of selling reactors to the tuberculin test, the average salvage value has been increased $7.85 per head, according to records kept by the Chicago Producers since the new method of selling went into effect Aug. 1.

Under the plan of sale now used, reactors are sold on an open market subject to a post mortem examination. Formerly all reactors were purchased by the Chicago Packing Company.

The open market plan was first suggested last January by M. H. Peterson, director of the I. A. A. tuberculosis eradication project. Since then the Live Stock Exchange has promoted and finally adopted the plan.

The Ursa Farmers' Shipping Association, Adams county, has shipped over 20 cars of stock without a loss since July 1, making it a strong contender for the I. A. A. safety loading trophy.

FARMERS' CO-OPS CONTINUE TO SIGN FOR AUDIT SERVICE

I.A.C.A. Membership Reaches 70; Collection Counsel To Be Inaugurated; 20 Audits Completed

The latest additions to the membership roll of the Illinois Agricultural Co-operatives Association, which already numbers 70, are Madison County Farm Bureau, Brown County Shippers' Association, Mt. Sterling Co-operative Company, Hartsburg Grain, Coal and Lumber Company, Atoona Co-operative Grain Company, Godfrey Farmers' Elevator Company and Scott County Farm Bureau, according to V. Vaniman, organizing director for the auditing co-op.

For the past four months Mr. Vaniman has been meeting with farmers' organizations throughout Illinois, explaining the co-operative nature of the auditing and accounting service which is provided at cost to the member associations.

"I find that the decision of the I. A. A., at its last executive meeting, to pay 50 per cent of the auditing expenses of Farm Bureaus, except in counties where subsidiary activities of the Farm Bureau make an unusually extensive audit necessary, is causing Farm Bureaus to send in the signed membership contracts," said Mr. Vaniman.

"Our organization proposes to render an auditing service to co-operative associations and will give expert advice on a system of accounting. The plan will bring about a tendency for a uniform classification of accounts and a comparative analysis can be made with other similar businesses over the state."

The auditing association will operate very much like the Bankers' Clearing House Association in the large cities where auditors are maintained to check affairs of members. Farmers are being shown that the audit of accounts will be as beneficial to them as the plan is to bankers.

Mr. Vaniman has been working in Stark and Mason counties in the interests of the I. A. C. A. since Sept. 23.

The comparative analysis feature of the audit service is still expected to be one of the most valuable benefits to its members. The real value of comparative analysis will increase with the number of audits.

One of the new services which Geo. R. Wicker, general manager of the audit association, expects to establish soon is a collection service for the co-operatives for which audits are made. A system of letters will be supplied, by the I. A. C. A. as a part of the regular audit service, to help in the collection of outstanding accounts.

Twenty audits have been completed to date by Mr. Wicker and his assistants, F. E. Ringham and J. W. King. The Marshall-Putnam County Farm Bureau accounts have been audited this week by Mr. King and those of the McHenry County Farmers' Co-operative Grain Company have been examined by Mr. Ringham.

Goat raising interests of the southwest have adopted the name "chevon" as a special name for goat meat. It is comparable to pork, beef and mutton and is a contraction of two French words meaning goat mutton.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

The A. F. B. F. Grain Marketing Resolution

WHEREAS, The Farm Bureau's legislative program on co-operative marketing during the past four years, resulting in the passage of the Capper-Volstead act, which authorizes the farmers to get together in a co-operative way for the marketing of their products; the passage of the Intermediate Credits act, providing finances for co-operative marketing; the amendment to the Federal Warehousing act authorizing the development of public warehouses from the largest warehouse down to the farm granary, we find the growing interest in need of a further step in the marketing program, which will allow them to more fully avail themselves of these various legislative provisions and provide a merchandising organization for the purpose of better and more economical distribution of their grain, and

WHEREAS, A proposal to establish a co-operative grain sales agency which would contract with four of the leading grain companies for the necessary physical equipment and the services of their managers and necessary employees, was placed before the Executive Committee of the American Farm Bureau Federation last June, and

WHEREAS, The special Grain Marketing Committee appointed by the A. F. B. F. has made its report to the Executive Committee, wherein it finds the Grain Marketing Company to be duly set up and established according to the sentiment expressed by the Executive Committee last June, which "carries out the policies of protecting the interests of the consumer as well as providing advantages for the producers," and

WHEREAS, It has studied thoroughly the organization of the company, its purposes and accomplishments to date as presented by the Grain Committee, be it therefore

RESOLVED, That the Executive Committee also does hereby endorse, commend and urge the use of the Grain Marketing Company to farmers everywhere, either through their co-operative elevators, pools, agencies, private elevators, or directly, and that they may participate in the patronage dividends and thus market their grain at cost.

—o—

Our Position

The Illinois Agricultural Association respectfully recognizes and respects its relationship as a unit of our national organization, the American Farm Bureau Federation.

In questions which are particularly vital to Illinois farm bureau members, the Illinois Agricultural Association has in the past raised a questioning voice when necessary which usually has led to a better solution of those vital questions. With the sting of the well-known failure of the United States Grain Growers burning extra deep in Illinois, is it to be wondered at that the Illinois Agricultural Association is proceeding with extra caution when another grain marketing problem comes up for consideration?

In its grain marketing resolution, printed above, which was not passed unanimously, the executive committee of the American Farm Bureau Federation "endorses, commends and urges the use of the facilities of the Grain Marketing Company everywhere —."

It is well known that the Illinois Agricultural Association is investigating this grain marketing step along unbiased business, legal and economic angles. This investigation has been carried on with diligence. Those having the investigation in hand will make a report at the earliest possible moment. Certain important data has not been furnished our Association by the Grain Marketing Company, although specific request has been made for it.

As a matter of accepted business prudence, such a large venture should not be gone into hastily. The facts on the business side in particular should be delved into deeply for herein may lie the success or failure of any business enterprise.

The investigation is being continued and a full report will be given to Illinois farm bureau members just as soon as it is completed.

—o—

That Fight's Over—Where's the Next One?

Pittsburgh plus is no more.

There will be no long drawn out legal battle as many people expected. The dominating steel companies have cried quits. They've cried quits, but in doing so they've crossed their fingers, if one looks closely.

Crossed fingers, the framing of a legal loophole, is seen in a part of the phraseology of the United States Steel corporation compliance: "In so far as it is practicable to do so" and "without admitting the validity of said order or the jurisdiction of the commission to make the same."

At the federal trade commission, the belief is expressed that the case is now entirely closed. It is recognized that Pittsburgh plus has not been in practice for some time—especially since the fight against it became so hot.

Close co-operation in the Middle West has made it possible to carry the Pittsburgh case to a victorious close. The Farm Bureau, through the American Farm Bureau Federation and the Illinois Agricultural Association, has devoted considerable time and energy in the fight. It has worked shoulder to shoulder with all interests knowing that victory would benefit all in the Middle West.

Looking to the future—looking for another fight equally as great—the Farm Bureau will have to devote even greater resource to get a useable waterway to the Gulf and to the Atlantic. That is the next major problem.

—o—

Why Howl!

The food-consuming East set up a fearful howl during the recent McNary-Haugen bill campaign. They said its enactment would increase the cost of living to the serious detriment of the East.

Just how much the raising of the price of a bushel of wheat affects the cost of a loaf of bread is now shown by authentic government figures.

The Bureau of Agricultural Economics made an investigation into the retail price of bread in seven cities and kept careful records on bread prices in these cities from October, 1922, to March, 1923.

In the report on the investigation which has been made public recently, the cost of a one-pound loaf of bread bought in New York during the period cost on the average 9.75 cents—retail. Of this total cost, it was found that the wheat which went into the one-pound loaf cost a cent and a half. And in Minneapolis, one of the seven cities investigated, the wheat cost 1.53 cents and the one-pound loaf 9 cents. In Kansas City it was 1.43 cents, in Chicago 1.53 cents, in New Orleans 1.43 cents, in San Francisco 1.41 cents and in Boston 1.50 cents.

This investigation shows that the farmer who produces the wheat gets only 15 to 18 per cent of the retail price of bread. The value of the flour in a loaf of bread is entirely submerged in the service cost of getting that loaf to the consumer.

"It is apparent from these figures that to increase the price of wheat to the ratio price proposed by the McNary-Haugen bill would have increased the cost of living very, very little," says George N. Peek, president of the American Council of Agriculture. "An increase of 25 cents a bushel in the price of wheat would increase the cost of producing a one-pound loaf of bread about three-tenths of one per cent (.003 per cent).

"This would impose no hardship on any one. On the other hand, it would mean an annual increase of $200,000,000 in the buying power of the farmer."

Our opponents who lambasted the McNary-Haugen bill behind the smoke screen of "higher food costs" are now predicting better business and general industrial prosperity because wheat has risen to around $1.29. They have been active through the city papers in claiming that the farmers are now able and ready to buy and that industry will awake from its semi-dormant life and will hum along, cog meshing into cog, with the increase in the wheat price.

What if the McNary-Haugen bill had been enacted? The ratio price for September wheat would have been around $1.53. Would not have the industrial sections enjoyed even more activity than the $1.29 price is bringing?

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

Dear Editor: That fellow Chas. Weinecke of Barrington, Ill., who wrote in the Record last time that he missed his dinner while he wrote you that he did not get his $15 worth out of the Farm Bureau must have missed a lot of other things besides his dinner. I think the way to get my $15 worth out of the Farm Bureau is to get right into things. I lined my upper 40 two years ago upon the advice of the Farm Bureau, and I have been more than repaid from the better yields. As for a man to come around to see each one of us farmers, that's the Farm Adviser's job and we can make it easier for him if we'll go half way. The I. A. A. is O. K. We must admit our shortcomings and try to repair them. The farmer must be organized.

G. B. B., McLean County.

That's the way we feel, G. B. B.—Editor.

How would you sell the Farm Bureau if you were to go after a good neighbor who does not belong? Following are some letters from members telling their ideas. Write and tell us yours.

Dear Sir: If the farmers don't organize and work as one man they will become the same as the peasants of Europe.

W. Kern, Bristol, Ill.

Dear Sir: In reply to your question, what would I like to have the Farm Bureau do for me, I will say, first, that the question might be answered usually by asking: "What CAN the Farm Bureau do for me?" I have always been of the opinion that the Farm Bureau could not accomplish very much by working with farmers individually, but I think much can be done working with them as a unit.

Coming back to your question of "What would I like for the Farm Bureau to do for me." The Farm Bureau working as a unit is in a position to do this: they represent me before all national and state legislative bodies that enact measures that affect my welfare, such as tariffs, taxes, transportation, highways, etc. As a unit they do not only demand but command recognition relative to rights and privileges that would place agriculture on an equal basis with all the other great industries of our country. Unless the Farm Bureau is backed up by the men and women, who not only till the soil but who own it as well, little will ever be accomplished. We must give the Bureau our individual support if we expect any benefits from it. In short, my answer to your question is this: Work to complete the organization as fully as possible; work with it as a unit.

J. Jay Owen, Lacon, Ill.

Good letter, Jay.—Editor.

Dear Sir: In selling a Farm Bureau membership to a neighbor who is not a member, I would:

First, appeal to him for the need of an organization.

Second, tell him some of the things the Farm Bureau has done, such as getting farm land value reduced, etc.

Third, talk to him about co-operation, the need of every farmer backing his organization, team work, etc.

Fourth, tell him or remind him what other organizations are doing to get things the way of legislation and the need of the farm interest being looked after.

Many other things could be said.

A. A. Hill, Decatur, Ill.

Another good one, A. A.—Editor.

Dear Sir: Practically all other trades, business and professions have their associations and organizations, why not the farmer have the Farm Bureau?

J. J. Elred, Carrollton, Ill.

Here are some answers on "Why did you quit the Farm Bureau?" All the replies received from the 50 letters sent to as many former members were answered by men who had quit farming. This leads us to believe that farm bureau casualties are largely those who quit farming.

Dear Editor: Down and out. Quit farming—nothing to it. Wm. Darlington, Grafton, Ill.

Illinois Agricultural Association:

I was compelled to quit farming on account of ill health. That is my only reason for dropping out of the County Farm Bureau and the I. A. A. I believe in both and wish them success.

Eli Henderson, New Lenox, Ill.

Dear Sir: I am very much interested in the County Farm Bureau work, and have done quite a lot of work in getting Farm Bureau memberships in the campaigns. I had to quit farming on account of my wife's health, and moved to Tucson, Arizona. We are now doing nicely out here.

W. A. Riaetter, Tucson, Ariz.

Dear Sir: In regard to me not renewing my membership in the County Farm Bureau, I have moved from Illinois to Cass County, Indiana, and will have my membership in this state.

Hoping this will answer your question all right.

Floyd Boldry, Twelve Mile, Ind.

THE LIARS' CORNER

WE'VE HEARD KANSAS IS A GREAT STATE FOR EXPERIENCES

Dear Editor:

I am now a citizen of Illinois, but while we lived in the state of Kansas we had some pretty tough experiences trying to raise a few different kinds of grain but it was always a failure. Finally we concluded to put the whole farm into popcorn. We had an enormous crop which, when picked, filled our cribs. The children playing with matches around the cribs set them on fire. The heat popped the corn, leaving a huge white drift where the cribs had been. We had an old blind horse out in the yard, and when he saw that big white pile he thought it was a snow bank and lay down by it and froze to death.—Levi A. Martin, St. Anne, Ill.

A WINDY ONE

Dear Sir: Speaking of big storms, we had a wind storm this summer that was pretty severe. It may not have been the most severe we have had, but it caused us some concern. It was a wind storm, which came up so suddenly that even the animals in the barnyard didn't have time to find shelter. We had a flock of fine chickens, and this wind was so violent that it blew the feathers off of them just like an ordinary wind blows leaves off of trees in the fall.

A chicken-eating sow had evidently been roving around the neighborhood, the chicken yard, and she was blown so full of feathers she looked like a porcupine. She was so astonished and frightened at her appearance that it was three days before we could catch her and de-feather her. The experience completely cured her of chicken eating.

After the storm we gathered up several dry-picked chickens. Being both modest and humane, we made clothes for them to wear until they feathered out again.—Elmer L. Waddell, Taylorville, Ill.

ADAMS COUNTY FARMERS OPERATE A $1,000,000 CO-OP

A farmers' shipping association that does an annual business of $1,000,000 for its members is unusual, even among those operating on the county plan. But over at Quincy, Ill., the Adams County Shippers' Association actually does it. Last year, 689 cars of stock were shipped through the association.

Volume of business alone doesn't make a shipping association successful. But in this association of Adams county shippers, the large volume of business seems to have followed in the wake of good service and simplicity of organization, coupled with the fact that Adams County Farm Bureau members are automatically members of the shippers' association.

Started in 1919

The plan of organization of this association may be of more than ordinary significance. Its origin was only the natural outgrowth of a long felt need of Adams county live stock men for closer co-operation in their marketing problems. A small group of them got together back in September, 1919, and from their number elected the following men as the board of directors for the first Adams County Shipping Association; L. F. Allison, president; G. J. Bockhold, vice-president; L. O. Grieser, secretary-treasurer; all three of whom have held these offices continuously since that time; E. L. Anderson and Fred Uhland.

This board was given full power to direct the activities of the association. It selects the county manager, fixes his bond, stipulates his commission and directs the expenditure of all funds. It meets regularly each month or more often if necessary. Today the association operates under practically the same plan.

It works on the county plan, which means there is a county manager in the central Farm Bureau office in Quincy and local shippers or managers who handle shipments from points throughout the county while the county manager takes care of shipments from Quincy.

Farmers Select Managers

When a community decides to establish a local shipping unit, those who are interested meet and select a committee of three who appoint a man for the work in that territory.

The appointment of a local manager must be endorsed by the board of directors of the county association, which is composed of one bona fide farmer elected from each local shipping point.

The duties of the local manager are to list live stock for shipment, notify farmers when a shipment is to be made, and to mark load and bill out the stock. He makes out invoices of each shipment in triplicate, one copy going to the county manager, one to the commission company to which the stock is consigned, and the other to his own records.

Carry Own Insurance

After the local manager gets the stock in the car and billed out, his responsibility for the shipment ends and settlements of losses or other troubles become those of the county manager. However, the Adams county association has a scheme for effectually covering their losses in transit. For a few months after the association began to ship, insurance was carried in a commercial insurance company. But the managers soon found that the premiums amounted to more than the losses so the board of directors decided to furnish their own insurance by a sinking fund collected along with the general shipping charge.

"We charge three cents per hundred for insurance on hogs and sheep and one cent on cattle in shipments containing stock belonging to more than one person," explained county manager C. C. Mast, who has held that position since the shippers organized. "Then we collect an association fee of eight cents per hundred after freight, insurance and inspection charges and yardage and feed charges have been deducted."

In carload lots of one man's feeding the insurance is one-half that for mixed shipments and the association fee is three cents per hundred. They have found that this arrangement is only fair to the carlot shipper because there is less work in figuring up the accounts and the danger of loss in transit is only about half as great as when several bunches of strange stock are shipped in the same car. Carlot shippers also have the privilege of canceling the insurance.

Managers Get Bonus

"We offer a bonus of a dollar a car to local managers for every car they ship without a loss," Mr. Mast explained in telling how they cut down their losses. "Right now we've got one man, W. A. Hill, shipper at Ursa, who is out for the I. A. A. Safety Loading Cup. He's shipped about twenty cars and hasn't had a loss."

"I don't have much trouble with losses," 'Mr. Mac' McNeal, manager for shipping stations at Paloma and Coatsburg, said. "You've got to be careful in handling stock in the pens and in loading. Most losses are on mixed shipments where you get a lot of strange animals in the same car. They fight and tear around more than when all the load is shipped by one farmer."

"You bet I like it best," 'Mr. Mac' said when asked if he liked the county plan of shippers' co-operative. He likes it because it relieves him of the detail work and centralizes farmers' marketing powers. "But business fell off a lot when we changed from the old $1 membership plan to the 'every member a Farm Bureau member' plan. I think the next step the Producers must take is to do order buying. As long as the packers do their buying on order we can't do much to fix the prices," he said.

Non-Members Pay Fee

Of the eight cent association fee one cent is used to cover office expenses and the remaining seven cents is divided between the local manager and the county manager. Three-fourths goes to the local manager as a commission for arranging cars, calling shippers, weighing, loading and billing out the shipments. An excess fee of five cents per hundred is charged to all shippers who are not Farm Bureau members. This is in addition to the regular eight cent fee.

"We don't really make any attempt to grade stock when we ship," said Mr. Mast. "We ship almost entirely to the Producers, mostly at East St. Louis and they do all the grading that has to be done. I don't think five cars a year that are shipped through the association are consigned outside the Producers."

C. C. Mast, manager of the Adams County Shippers' Association, lowering with one finger, one of the handy loading chutes which they use in Adams county. A sand box which can barely be seen down behind the fence, keeps the chute in perfect balance.

After the stock is sold at the market the buyer mails a copy of the account sales to the local manager and one copy to the county office. The county manager figures the home charges on each lot shipped and issues a check to the owner for the amount.

"Some farmers don't believe in the county plan," the manager of one local shippers' unit said in answer to how the shippers liked the scheme. "They think the accounts and checks ought to come back to the local managers. They don't want their money to get any further from them than absolutely necessary.

Likes County Plan

"But I think the whole success of the co-operative livestock shipping business depends upon that very thing," this particular shipper continued. "It does away with petty squabbles and relieves the local manager of the detail work. If pro-rating the returns on a carload of stock was left up to the local manager, he wouldn't do it. He'd leave it to the commission company and they'd charge the farmer their price for the service. As it is, the county manager saves enough on the expense of pro-rating to pay the salary of the clerk who does it.

"And pro-rating the receipts doesn't take up all his time, either, for he keeps all the records of the county association."

All the money received for shipments through the Adams County Shippers' Association is deposited at the stockyards bank to the credit of one bank at Quincy for the use of the association. It takes about a week for the checks to make the rounds. "This makes our daily balance stand around $8,000," said manager Mast. "And we collect a nice piece of interest from it. Sometimes our balance runs a little low when shipments are not heavy. We get around that by borrowing a little from our savings account at three per cent so as to keep up our balance."

Use Radio Now

The local managers used to get daily market reports by wire but this year the county association purchased two radio sets which they installed for the local managers. 'Mr. Mac' has one of these in his own home. About noon or a little before he gets the market quotations, although he misses them sometimes because he can't tune in right.

During the five years that the Adams County Shippers' Association has been operating it has gradually purchased many local marketing facilities. At Ursa, Paloma and Coatsburg, the association owns its scales. At several stations it has made improvements in the stock yards, built loading chutes and installed engines and pumps to improve the watering service during hot weather. Most of this work has been done to protect the insurance fund, since the association is responsible for the stock from the time it is unloaded at the yards and pays all claims in full when loss occurs.

Solve Shrinkage Problem

"We find a great deal of complaint in regard to shrinks is due to careless weighing at home," said the county manager. "As an illustration, at some of our stations we nearly always have a gain, at others the stock holds its weight, while at others we practically always get from medium to heavy shrinks. In checking up for over a year or so we found that this was largely due to home weighing of stock. That is the reason why we were compelled to buy our own scales at several stations.

"We should be glad to go one step further and have our hogs weighed together, especially by grades, at the markets in order to save excess shrink and break of the scales, by scaling in a mixed lot consisting numerous shippers. We are doing this some now, but as a rule the farmer objects to this method unless he thoroughly understands the saving."

Have Their Troubles Too

But things don't always go just right with the Adams county shippers. They have their ups and downs as all farmers' co-ops do. Local grievances sometimes stir up a little mud in the pool. The committee of three, selected by the local members, settle minor grievances. If they can't be smoothed out by the local committee it is taken to the county office.

Then there are the independent buying that shipping associations have always to contend with. Some farmers break away and sell outside the association occasionally. "I tell my shippers that they are cutting their own throat when they sell through individual buyers," 'Mr. Mac' explained his views of holding his shippers together. He believes absolutely in sticking together on their marketing problems.

"Well, sometimes I think it pays to ship through them," replied one farmer, who was asked for his opinion of the shippers' association. "Then sometimes I think it doesn't. It's about a fifty-fifty chance whether you ship through the association or through one of these buyers. If you ship through the association you have to stand for freight, and feed, and yardage and all such costs. But if you sell to a buyer he pays you a little less right on the spot and stands shipping expenses himself. I guess there's a lot of luck on how you hit the market too."

Figures Tell Story

Some carlot shippers wonder whether they can afford to ship through the Adams County Shippers' Association. The association manager gives them a comparison of shipping expenses through and around the association showing that a carload of stock can be shipped through the association at a saving of $8.50. At the same time the shipper has the advantage of insurance that protects his stock from the time it is unloaded at the local yards until it is sold on the central market, has been saved the trouble of loading, billing and caring for the stock until departure of the train and has co-operated on the farmers' stock marketing program.

Even with their difficulties, the Adams County Shippers have an organization that has gone a long way toward solving their live stock marketing problems. It has gone beyond the first stages of co-operation and attained that degree of success which is the result of a long-time program, carefully planned and carried out.

Such organizations do not spring up mushroom fashion. They come only after years of persistent co-operation to realize a worthy purpose.

AGRICULTURE NEEDS LEADER LIKE GOMPERS, SAYS WATSON

Denouncing the present agricultural situation as a "deplorable condition" and advocating economic protection for agriculture by applying the principles of the McNary-Haugen bill, C. B. Watson, vice-president of the I. A. A., speaking at their annual Farm Bureau picnic recently, told Stephenson county farmers that the greatest need of agriculture today is a leader of "the Samuel Gompers type."

C. B. Watson

"Agriculture needs a man who will fight with all his heart and soul for the best interests of agriculture," declared Mr. Watson. "A man who will even fight selfishly as Samuel Gompers has fought with all his heart and soul for the best interests of labor in the United States.

"But that leader has not come; that leader has yet to be developed, but the day and I hope it will be soon, he will come forth and lift agriculture to a position equal with commerce and industry. Under the leadership of such a one, the American farmers will stand shoulder to shoulder and forge to that place where they may secure just returns for their efforts."

In his talk Mr. Watson advocated development of waterways, especially the St. Lawrence water route, to cut the present cost of transporting our mid-western agricultural products to the Atlantic coast.

Should Distribute Taxes

Touching on the problem of taxation, the I. A. A. executive stated that taxes would never be reduced very much. "Public improvements, and there are more of them now than ever, must be kept up," he said. "We want them kept up, but I believe they can be more evenly distributed.

"More property should be made taxable. Intangible property should be taxed along with real estate. It should be arranged so the burden will fall on all instead of those who can least stand it.

"We must know more about legislation. We must have a greater voice in our government. Many laws have come into conflict with the old natural law of supply and demand. We have protected commerce and industry with tariffs, and we have protected labor with immigration laws; but there has been little or no consideration shown for agriculture.

"The others are established on a domestic basis; agriculture still operates on the unprotected world basis. It must be equalized. Agriculture must be raised to their level, or intelligent farmers will quit the business, and American agriculturists will be reduced to a peasantry."

Farm Bureau Spirit Splendid; Rummel

"There has been a splendid spirit indicated at all the Farm Bureau meetings I have attended this summer," states W. E. D. Rummel, editor of the community service department of the Orange Judd Illinois Farmer, in talking of the general Farm Bureau morale recently.

Mr. Rummel is an old hand in Farm Bureau work. He has spoken in most of the counties in Illinois and is well acquainted with Farm Bureau work in other states, especially in Vermont, New Hampshire and Maine where he was a leader in organization work for the American Farm Bureau Federation. He is a middle-west man, however.

A large number of Farm Bureau meetings, including county Farm Bureau picnics, have been addressed by Mr. Rummel during the summer. As head of his community service department Mr. Rummel says:

"We have done our best to help all who have asked for help and the response of the Farm Bureau to our community work has been most gratifying.

"I am glad that the business men of the state are co-operating with the farmers in many meetings and picnics, which is as it should be. The times point to a greater need than ever for civic consciousness and community building.

"In these meetings I have sought to dwell upon the need of more thinking and better organization among farmers. Farm life and farming as a business will not rise to the highest point until farmers all put their shoulders to the wheel and 'heave-o-heave.' I have met a large number of the old wheel horses of organized agriculture, and Co. have found them taking a lively interest in Farm Bureau work this year. The one safeguard for independence and personal liberty for farmers is the development of a healthy community spirit throughout the length and breadth of the land."

Following are the farm bureau gatherings addressed by Mr. Rummel:

	Attendance
May 7, 8, 9, 19, 20, 21, 22, 23 Warren County Farm Bureau meeting	1350
May 24 Elizabeth Jo Daviess County	300
May 27 Menominee, Jo Daviess County	275
May 28 Galena, Chamber of Commerce and Farm Bureau Banquet	200
May 29 Warren, Jo Daviess Co.	275
May 30 Pleasant Valley, Jo Daviess Co.	300
June 12 Paris, Edgar County Annual Farm Bureau Picnic	1200
June 26 Community Farm Bureau meeting at residence of O. L. Hatch, Stark Co.	1250
June 28 Elgin, Annual Farm Bureau picnic, Kane Co.	1200
July 12 Kaneville, Community Farm Bureau picnic	300
Aug. 19 Palestine, Annual Farm Bureau picnic, Crawford Co.	1000
Aug. 22 Marshall-Putnam Co. Annual Farm Bureau picnic Campus John Swaney High School	2000
Sept. 13 Ogle Co. Annual Farm Bureau picnic	

Edgar county, the only accredited tuberculosis free county in Illinois, has appropriated funds to continue eradication work. Farmers there don't believe in quitting the job even if the county is practically free of bovine tuberculosis.

In Livingston county, the first "once over" test for tuberculosis in cattle was completed last month, after two years of continuous testing. Out of 3,598 herds containing 26,326 head of cattle, 659 were condemned. The county veterinarian has started the second test in an effort to speedily make Livingston an accredited county.

FARMERS OF 13TH DISTRICT MEET IN LIVELY CONFERENCE

Discuss Community Problems; "Dad" Wise Tells of Trip Abroad; Cowles Explains Grain Merger

Farmers from Lee, Ogle, Whiteside, Stephenson, Jo Daviess and Carroll counties assembled for a district Farm Bureau conference at Freeport, Sept. 16, with C. E. Bamborough, I. A. A. executive committeeman, presiding.

R. A. Cowles, I. A. A. treasurer, who spoke at the conference described it as "one of the best I ever attended" and Mr. Bamborough characterized it as a "crackerjack."

The discussions were confined chiefly to the farmers' problems within their own respective communities. Mr. Bamborough had previously arranged for the following short talks:

"The Farmer as a Citizen," W. L. Reigle, Lee County. "The Farmers in Unison or Organization," L. R. Birdsall, Whiteside County. "The Farmer in Business," Albert L. Getz, Carroll County. "The Farmer in Politics," T. F. Ellis, Stephenson County.

The High Lights

The following high lights from these addresses show the trend of the speakers' minds:

"The farmer is an outstanding example of Loyalty." "The farmer is more ready and willing to respond to worthy calls than others." "A satisfactory and profitable agriculture stabilizes good citizenship." "Home influence, good reading, examples set by parents, an economic condition is good citizenship." "Mark of good citizenship is expressed by the use of the ballot." "It behooves the farmer to vote at every opportunity he has." "Vote intelligently," "Vote for the one that is pledged to safeguard your special interest, **Agriculture.** That is the reason organized capital, organized industry and organized labor have been 'sitting pretty' while the disorganized farmers have been compelled to take what the other fellows were willing to give to us."

Farm Adviser "Dad" Wise, Whiteside county, told very interestingly of the experience of the world's champion dairy judging team as they visited places of interest in England, Scotland, France, Switzerland and the Islands of Jersey and Guernsey.

Find Well Bred Stock

Their chief interest was, of course, in the agriculture of these countries. In telling of his impressions of European farming Mr. Wise stated that one of the most noticeable things was that the livestock was all well bred and well cared for in all of the places they visited.

Mr. Cowles was called upon for information regarding the Grain Marketing Company and the attitude of the I. A. A. toward it. Stating that the investigation by the I. A. A. committee is still proceeding, he expressed his disappointment that the vender companies who are entering this co-operative enterprise are very slow about submitting to the investigating committee such figures as would be required by the stock exchange if the stock were listed with them for sale. He believes that any individuals or associations considering investing or entering into co-operative relations with such an organization should be entitled to such information.

Whether these elevator properties are really worth the amount they are held at and whether it is really necessary for the farmers to purchase them at all and how the management of the business may be developed and controlled are problems on which more information must be obtained before the I. A. A. will indorse the organization.

"While it may be embarrassing," said Mr. Cowles, "to hold off while some others are entering into the plan, yet it might be much more embarrassing to indorse something that would prove detrimental later."

By official and unanimous vote the district conference resolved to endorse the policy of the I. A. A. in thoroughly investigating and withholding its decision until that investigation is complete.

Eighty farmers and advisers attended the first of several seed corn selection meetings being held by the University of Illinois.

Extract from Letter from Knox County Farm Bureau

Galesburg, Ill., August 19, 1924.

W. D. Peery of Hermon, Ill., reports that the M. & St. L. Railroad got busy and cut the thistles along the right of way before they went into bloom.

(Signed) L. R. Marchant, Adviser.

Here Is the Final Settlement of Another Case

Sept. 18, 1924.

Mr. Frank Butsow, Chencyville, Ill.
Dear Sir:

RE: Claim against C. M. & St. P. Fire Damage.

In accordance with our letter of Aug. 18 and your reply thereto, we have obtained the railroad company's check in the amount of $150 in payment of this claim and attach same hereto.

We trust this matter has been handled to your entire satisfaction.

Yours very truly,
TRANSPORTATION DEPT.
L. J. Quasey, Director

Listen In!

Tune in on KYW the evening of October 3, Farm Bureau folks, for that is the night when two I. A. A. executive committeemen put forth their views on two vitally important phases of farm bureau work. Here is the rest of the September program and the October list:

September 30—"Please Help Yourself," by John A. Kotal, Secretary, United Master Butchers of America under auspices of the National Live Stock and Meat Board.

"Observations of the Growth of Boys' and Girls' Club Work" by John W. Coverdale, Secretary of the Grain Marketing Company.

October 3—"Rural Community Building," by Frank D. Barton, Cornell, Executive Committeeman of the I. A. A.

"Putting Business in Farming," by Chauncey B. Watson, De Kalb, Vice-President of I. A. A.

October 7—American Farm Bureau Federation feature.

"Vocational Agriculture in Twelve North Central States," by J. A. Linke, Supervisor of Vocational Agriculture, North Central Region.

October 10—"Better Boys and Better Calves," by Earl Cooper, Holstein-Friesian Association of America.

"Stunts for Your Evenings' Programs," by Paul A. Potter, Assistant Editor, Orange Judd Illinois Farmer.

October 14—"Painting and Housing of Farm Machinery," by F. A. Wirt, Editor, Case Eagle, Racine, Wis.

American Farm Bureau Federation feature.

October 17—Boys' and Girls' Club Feature, by A. D. Folker, Montgomery Ward & Co.

"What Cattle Feeders Are Talking About," by M. C. Waterman, Editorial Staff of the Orange Judd Illinois Farmer.

October 21—American Farm Bureau feature.

"Plugging Leaks in Co-ops," by George R. Wicker, Mgr., Illinois Agricultural Co-operatives Association, and Director of the Illinois Agricultural Association Dept. of Co-operative Accounting.

October 24—"What the National Boys' and Girls' Club Congress Means to America," by G. L. Noble, Secretary, National Committee on Boys' and Girls' Club Work.

"Farmers' Produce Markets," by Arthur C. Page, Editor, Orange Judd Illinois Farmer.

October 28—"Monthly Analysis of Farm Markets," by H. W. Moorhouse, Howard-Moorhouse Agricultural Business Service.

American Farm Bureau Federation feature.

October 31—"Farm Juniors at the International Live Stock Exposition," by B. H. Heide, Gen. Mgr., International Live Stock Exposition.

"What the Illinois Farm Bureau Are Doing," by H. C. Butcher, Director of Information, I. A. A.

One of the many activities of George H. Crawford, an Iowa cow tester for a two-county association, is the regular job of weighing babies and judging bible reading contests. He says the life of a dairyman isn't all drudgery.

Marshall-Putnam Farm Bureau ordered another 350 tons of limestone last week.

In Vermilion county over 16,000 cattle have been tested for tuberculosis.

Half of the farm homes in Sweden are equipped with electricity.

A. F. B. F. OFFICIALS TAKE GRAIN JOBS

(Continued from page 1)

U. S. Department of Agriculture; Murray D. Lincoln, secretary of the Ohio Farm Bureau Federation; Gray Silver and E. B. Reid of the Washington office.

Following the president's report came the report of the treasurer, which gave a digest of the financial situation. In this report it was shown that the Federation had been operated some $10,000 under the total budget set at the first of the year and $14,300 of the Federation's indebtedness had been liquidated this year.

For Farmers' Bill

A general discussion of pending farm legislation was carried on by the executive committee following the report made by Gray Silver on Monday afternoon. During this discussion a resolution made by C. E. Hearst was passed by the committee, which empowered the legislative committee to make a draft of the bill which is to be presented in the next Congress. Mr. Hearst's resolution called for a re-draft by the A. F. B. F. legislative committee of the McNary-Haugen bill along such lines that would more likely insure its passage.

Following the report of the Finance Department showing several states delinquent in matters of accounting to the national office for membership dues collected, the following report was made by the Finance Sub-Committee of which President Thompson is a member:

Your Finance Committee has examined the present status of the various states with respect to their financial obligations to the American Farm Bureau Federation, and we beg leave to call the board's attention to the fact that a number of states are in arrears, some having wholly failed to make any payment of dues to the A. F. B. F. for the present year.

We call the board's attention to the provision in the constitution which empowers the board to suspend such states, and we urge that appropriate action be taken to the end that it may be speedily determined what states may properly participate in the ensuing convention of the American Federation. And we suggest that the board empower the president to communicate with the several delinquent states on behalf of the board and to call attention to their delinquency and to the penalty which is provided by the constitution.

In view of the fact that our convention will be held in less than three months from the present date we urge that this matter be acted upon promptly and that the several delinquent states be communicated with at once.

We further suggest that the president compile a report of his findings respecting the delinquent states so that the same may be available to the credentials committee of the convention when appointed, in order that such committee may act intelligently upon the credentials of the several delegates.

Child Labor Bill

Following the discussion of the amendment to the Constitution, which gives the Federal Government power to prohibit the labor of persons under the age of eighteen years, the executive committee of the American Farm Bureau Federation passed the following resolution:

"Whereas, Congress has passed an amendment to the Constitution which would give that body power to prohibit the labor of persons under the age of 18 years and to prescribe the conditions of such labor and ratification of this action is now before the state legislatures, and

"Whereas, The opportunity to discourage or prohibit this sort of federal interference—speaking in farm mother of Congress— has pasted for the moment beyond the activities of the American Farm Bureau Federation and has become almost entirely a state question, and

"Whereas, The proposed amendment will give Congress blanket authority to pass stringent child labor laws on this subject which is already covered adequately and according to local conditions in a majority of states.

"We urge the State Farm Bureau Federation to impress upon their legislatures the desirability of defeating the ratification of the child labor amendment."

At this meeting of the executive committee the Farm Bureau went on record along with other organizations urging that every American citizen vote at the coming fall election. The form of the executive committee's mind went on record in the following resolution:

"Whereas, The records of the poll books at the various rural voting precincts show on the average a light representation of farm vote, and

"Whereas, it is highly important that agriculture express itself at the polls,

"Therefore, be it Resolved, That the A. F. B. F. urge the rural people to attend the elections this year and "xpress themselves by ballot in the selection of all the officials regardless of party affiliation."

Details for the final arrangement of the program for the sixth annual meeting of the American Farm Bureau Federation, which will be held in Chicago, December 8, 9 and 10, were left in the hands of President Bradfute.

NEVER SAY DIE!

Two frogs fell into a bucket of cream
And must paddle to keep afloat;
But one soon tired and drowned to death
With a gurgling sigh in his throat.

The other paddled away all night
And not a sigh did he utter;
But with the dawn of the morning light
He rode an isle of butter.

The flies came thick to his island home
And he gobbled a breakfast snappy;
The milkmaid, scared, upset the bucket
And the froggie hopped away happy.

A moral we all can learn right now
And hasten at once to apply:
Success will come in difficult times
If we paddle and never say die.

—By A. D. Lynch,
Director of Dairy Marketing,
I. A. A.

Valuation of Farm Lands Cut 10 Per Cent In Vermilion

Farm land valuations in Vermilion county got a 10 per cent slash when the Board of Review met in Danville, early in September, to consider the equalization of real estate valuations between city and country property as requested by the Vermilion County Farm Bureau.

The 10 per cent reduction followed a hearing of the case, before the Board of Review, on Sept. 3. Previous to that time, John C. Watson, I. A. A. representative on taxation matters, had appeared before the Board with data showing the unfairness of the valuations of farm lands.

In 1923 the Board of Review did considerable equalizing on tax valuations which, however, made no material change in the cut of about five per cent in total valuations by assessors. The recent reduction of 15 per cent in Logan county had left Vermilion county farm lands assessed at the highest average per acre of any county in Illinois.

The late cut by the Board of Review places Vermilion county farm lands in more favorable circumstances, according to Mr. Watson. Although still somewhat above the average level of the county, the disparity between urban and rural lands is considerably reduced.

Farm Folks Hear Editor of Prairie Farmer On Radio

"A good teacher backed by a community that is interested in its schools will make a good school anywhere." This fundamental statement, heard by thousands of farm folks as it was carried along the ether lanes from station KYW, Chicago, came from W. Floyd Keepers, assistant editor of the Prairie Farmer, as he talked about "School Days" on the I. A. A. farm program recently.

Mr. Keepers spoke with authority on school problems for he was substituting on the KYW program for C. V. Gregory, Prairie Farmer editor, and president of the grade school board at Wheaton, Ill., whose knowledge of school questions comes from a long study of farmers' educational difficulties. At the last minute Mr. Gregory was called to Springfield to attend a Farmers' Institute meeting, and Mr. Keepers was called on to give the talk. Could you tell by their voices?

"It is rather astonishing to read of college-trained teachers teaching in one-room country schools," the Prairie Farmer representative told his audience. "Yet there are a number of such teachers in the country schools of Illinois. Trained teachers cost more, of course. But a good teacher is always worth more than she costs. Every country district should keep its teacher—if she is a good teacher—even at an increase in salary.

"I wonder how much a good school means to a child? And what a vast difference there is between a good school and a poor or an indifferent one—if we deprive our children of the best school opportunity we can give them, we have taken something out of their lives that we can never replace. The best is none too good for your children and for the children of your neighbors. Let's make the children's school-days days of real opportunity, every one of which will count in giving them the best of preparation for leading a happy, successful life."

The number of counties in Illinois now doing organized tuberculosis eradication work has advanced to 61 with the addition of Fulton and Marion counties when they recently appropriated funds for the work which will begin as soon as veterinarians can be secured.

During the first year of operation, the gasoline tax in Indiana yielded $4,500,000 with a total collection expense of $6,046.

ILLINOIS AND IOWA LEAD OTHER STATES IN ESSAY CONTEST

New York Is Close Second; Boys and Girls From 19 State Farm Bureaus Are Entered

With 11 counties entered from each state, Illinois and Iowa were in the lead among the states entered in the American Farm Bureau Federation essay contest on Sept. 23.

Up to that time the following Illinois counties had notified H. R. Kibler, at the American Farm Bureau Federation offices in Chicago, of their entry into the contest, which is open to all boys and girls of the public schools up to and including the second year in high school:

Shelby, Clark, Whiteside, Vermilion, Ogle, Johnson, Henry, Lee, Cass, McLean and Henderson. In each of these counties, either the Farm Bureau or co-operating business firms are offering prizes for the best essays on either of the two optional subjects, "Why Dad is a Farm Bureau Member" or "Why Dad Should Join the Farm Bureau."

Many States In

The contest has assumed sizable proportions with counties from 19 State Farm Bureaus entered and the probability of many more joining before the contest closes. New York is running Illinois and Iowa a close second with eight County Farm Bureaus in the contest.

Broom County Farm Bureau (New York), which has the distinction of being the first County Farm Bureau ever organized, is into the contest to stay 'til the last, according to Mr. Kibler. The entry of Harrison county, Iowa, was the first to be received at A. F. B. F. headquarters.

Throughout Illinois, in the counties that are conducting essay contests, county superintendents and public school teachers are promoting the contest along with their regular school work.

Ten From Each County

"There should be at least 25 Illinois counties in the contest when it opens on October 1," Mr. Kibler stated. "And there must be at least 10 contestants entered from a county to make it eligible for the regional prizes."

The first prize essay in each Illinois county will be considered by the I. A. A. committee of judges for the state championship, after the contest closes Nov. 10. Immediately after the close of the contest a local committee will choose the prize winners in the counties and forward the names of the winners to the I. A. A. and the American Farm Bureau Federation.

The judges for the latter organization will then select the winners in each of the four national regional districts from these county winners, regardless of how the state championship has been decided. The four regional winners will be given a free trip to the annual meeting of the American Farm Bureau Federation in Chicago, Dec. 8, 9, and 10. A national sweepstakes winner may be chosen from the regional champions at that time, according to Mr. Kibler.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday—October 11, 1924 | Number 20

INVESTIGATION ENDS IN REPORT AGAINST BIG GRAIN MERGER

I.A.A. Executives Have Busy Three Days; Meet Farmers Grain Dealers'; Hear Report On Big Bond Issue

After hearing the report of the all summer investigation into the consolidation of the four old line grain companies into the Grain Marketing Company, the executive committee of the I. A. A. last Friday unanimously voted against it.

The chief objections to the so-called co-operative which has been incorporated for $26,000,000 are contained in the report of the grain marketing committee which was accepted by the unanimous vote. The members of the grain marketing committee, H. E. Goembel, Hooppole, chairman, A. R. Wright, Varna, I. A. Madden, Springfield and W. A. McNeill, Chandlerville, were in session all day Wednesday, Oct. 1, going over the comprehensive investigational survey which had been assembled by experts in grain marketing, in the legal phases and in the financial side.

Hold Evening Session

The following report, the one given by the grain marketing committee, was adopted by the executive committee in an evening session Friday, October 3, after both bodies had carefully considered all the facts that had been gathered.

Following is the resolution:

"The Illinois Agricultural Association is not in a position to express an opinion as to the value and utility of the warehousing facilities which the Grain Marketing Company has under contract to purchase. The officers of the Grain Marketing Company have not made available the records and data necessary to determine the exact or even approximate values even though request has been made therefor.

"The facilities now under lease and to be purchased by the Grain Marketing Company in the Chicago district have in our opinion been acquired by the old line grain companies for the purpose of speculative control of grain. The need and location of facilities for such control is substantially different from the requirements of an association organized to co-operatively merchandise grain.

Buying Is Speculative

"The Grain Marketing Company has and proposes in the future to buy the grain of members and non-members and sell such grain to the best possible advantage. Such a plan subjects the company to the possibility of loss as well as profit and is therefore speculative. True co-operative merchandising of grain or any other agricultural commodity will seek to eliminate speculation and avoid the hazards thereof. We believe that the Grain Marketing Company in its plan of operation violates this cardinal principle.

"Such a grain marketing program as is proposed affects the virtue and security of the preferred stock which is proposed to be offered to the farmer producers. The common stock issue, one million one dollar shares, is comparatively small and if issued in full could not absorb all possible losses in which event the preferred stock contribution of capital would be called upon to absorb such possible losses from such speculation. It appears to us, therefore, that such a plan of financing is unsound.

"The method of grower-control

(Continued on page 4)

Grain Dealers And I.A.A. Get Together

How the farmers' co-operative elevators and the Farm Bureau could work together better was the chief topic of discussion at the joint meeting of the executive committees of the I. A. A. and the Farmers Grain Dealers' Association of Illinois, representing over 500 Illinois farmers' elevators.

A committee on mutual relations, the purpose of which is to co-ordinate as much as possible the agricultural betterment work under way by both organizations, was ordered appointed by unanimous vote of the two committees during the joint session. Sam H. Thompson, president of the Illinois Agricultural Association, and Fred A. Mudge, Peru, president of the Illinois Grain Dealers' Association, were empowered to appoint two committeemen from their respective organizations to act on the mutual relations committee. Both presidents are to be ex-officio members of the committee.

Shippers Making Records in I.A.A. Safety Contest

Farmers' live stock shipping associations in Illinois are making records in the I. A. A. safety loading and shipping contest, according to an official report from L. B. Mann, assistant manager for the Chicago Producers. The report includes records on the 20 associations highest in number of loads shipped to the Chicago Producers from July 1 to Sept. 27.

A comparison of losses sustained by local and county associations on these shipments to the Chicago Producers shows that shippers at Victoria, Sheffield and Mt. Morris each have 100 per cent clean loss and damage records. These local units have shipped 15, 14 and 12 car loads of stock with no losses.

According to unofficial reports, the Ursa shippers, in Adams county, have consigned 25 cars to the St. Louis Producers with no losses.

The largest number of shipments to the Chicago Producers have come from associations at Mt. Carroll, Rockford and Warren counties, which have shipped 37, 36 and 29 car loads. While their losses are large, the percentage of loss is not necessarily greater than many other associations.

The 21 inch silver trophy being offered to the winning association at the end of the year will be awarded on the basis of the least percentage of loss or damage on a total of not less than 20 cars shipped by the competing association.

No More Blankets

"Yes, we have no more blankets," this from the irate secretary to Wm. E. Hedgcock, director of the livestock marketing department, both of whom begged the I. A. A. information department to send broadcast the announcement that the I. A. A. has no more wool blankets for sale. "It sure pays to advertise," says Hedgcock. "We've returned, to date, $378 on orders we couldn't fill."

AT THE HELM OF THE I. A. A.

The film which is being made to show the activities of the I. A. A. would never be complete unless it had an action picture of the executive committee. Here we have one of the snaps from the movie film (much enlarged, of course) which shows Presidents Thompson in a characteristic posture.

Starting down the table at the left is Earl C. Smith, Detroit; G. F. Tullock, Rockford; Curt Anderson, Xenia; R. F. Kerr, Iroquois, J. E. Lingenfelter, Lawrenceville; (Samuel Sorrels of Raymond is just beyond Mr. Lingenfelter and cannot be seen); President Sam H. Thompson, Quincy (standing); Secretary George A. Fox, Sycamore; A. R. Wright, Varna; I. L. Whisnand, Charleston; C. E. Bamborough, Pale; Stanley Castle, Alton; H. E. Goembel, Hooppole; and Frank D. Barton, Cornell. Just over Mr. Smith's head at the left is a bit of C. E. Hay, Taylorville, president of the Association of Farm Advisers of Illinois. The white face way down in the left corner is W. H. Moody of Port Byron, C. B. Watson, vice-president, is next the wall back of President Thompson. R. A. Cowles, treasurer, is back in the right corner. The wee portion of a head in front of Mr. Cowles is Miss Grace Schecter, secretary to Mr. Fox, who takes down considerable of all the conversation in shorthand.

New Tariff Rule Granted On Stone

As the result of an exception to the class rate tariff, recently obtained by the transportation department of the I. A. A., Illinois farmers along the C. & E. I., Wabash, C. B. & Q., I. C., and other roads from Greencastle, Ind., will be able to get stone shipped in much cheaper than heretofore.

The exception, effective Oct. 25, 1924, will permit the application of combination rates over various junction points on railroad lines that do not now participate in any through rates on agricultural limestone.

The new rule will doubtless stimulate competition for farmers' trade in limestone, according to L. J. Quasey, director of the I. A. A. transportation department, by farmers near the source of supply.

Hold Conference at Peoria

Every county in the 16th district was represented at the Farm Bureau district conference held in Peoria, Oct. 7. Live stock marketing problems, seed corn selection, and the Grain Marketing Company were the chief topics of discussion. The conference voted endorsement of the conservative stand taken by the I. A. A. on the grain merger and particularly commended President Sam Thompson for his action. The conference was too late to get a full account of it in this Record.

Farmers' Auditing Company May Open Campaign Branch

With the applications of the Athens Farmers' Elevator Company, the Livingston County Farm Bureau and the Pike County Farm Bureau for membership in the Illinois Agricultural Co-operatives Association, Geo. R. Wicker, general manager of the association, announces a total membership of 72 farmers' companies.

Since the opening of the branch office in Springfield, early in September, responsibility for much of the detail work in that section of the state has been assumed by J. W. King, in charge of the branch, according to Mr. Wicker. This arrangement makes it possible for the Chicago office to devote more time to auditing and examining co-ops in other sections of the state.

F. E. Ringham, assistant to Mr. Wicker, has just completed audits for farmers' elevators in Iroquois and McHenry counties and is beginning an audit for the Chicago Producers.

With a steady increase in membership from farmers' companies in the east central part of the state, it is possible that a district office will be established in Champaign.

Midwest Officials Meet

Midwest Farm Bureau presidents and secretaries were scheduled to meet in Chicago, Oct. 9 and 10. A report on the legislative outlook was to be made by R. A. Cowles, I. A. A. treasurer and secretary of the American Council of Agriculture.

Development of the Grain Marketing Company, a study of the constitution of the American Farm Bureau Federation, relationships between the Farm Bureau and co-operative marketing and the Farm Bureau and extension work were other chief topics to be considered.

Kibler Attends Radio Meet

H. R. Kibler, director of information for the American Farm Bureau Federation, served on the advisory committee at the Third National Radio Conference in Washington, D. C., this week. Herbert Hoover, who called the conference, asked Mr. Kibler to attend because he has been instrumental in developing farm radio programs.

TWENTY ILLINOIS COUNTIES ENTERED IN ESSAY CONTEST

Many Letters Requesting Information Indicate Unusual Interest; Prairie State Leads; Iowa Second

"Will you please send me information concerning the Farm Bureau that will help me with my essay on 'Why Dad Should Join the Farm Bureau,'" and "Please send me 'dope' for my essays on 'Why Dad Should Join the Farm Bureau,' or 'Why Dad is a Farm Bureau Member,'" — these extracts from actual letters are fair samples of the dozens of letters that have been coming to the I. A. A. information department since the Farm Bureau essay contest was launched.

The letters come from boys, girls, school teachers, farm advisers, office secretaries and Farm Bureau presidents requesting information as to the sources of material for use in the essays and indicate a lot of interest in the contest.

Iowa Is Second

Illinois can now boast of being in the lead among the state Farm Bureaus with the most counties entered. With the entry of Jo Daviess County Farm Bureau in the contest Illinois takes the lead with 20 counties entered. The nearest competitor is Iowa with 15 counties.

The American Farm Bureau Federation headquarters have been swamped with hundreds of letters requesting material about the Farm Bureau and in all cases a limited supply of information has been sent in reply. But the essay contest director has been impressing on county Farm Bureaus and contestants that the essays should be written largely from the local viewpoint.

While the boys and girls compete among themselves to write the best essay, a keen rivalry is being developed among the county Farm Bureaus to see which one can get the most publicity on the essay contest.

Each county Bureau is filing with the department of information of the American Farm Bureau a complete set of clippings from the local papers. These clippings are to be measured up and honorable mention will be given the county showing the greatest total of column inches of space.

The October issue of the McLean County Farm Bureau News came out with a complete description of how the contest will be conducted and published five prize-winning essays written in a similar contest several years ago.

Schools Help Too

Over in Whiteside county, H. B. Price, county superintendent of schools, is boosting the contest through the local schools. The teachers in Henry county are likewise pushing it.

In Ogle county the Farm Bureau got back of the contest as soon as it opened. Vermilion, Clark and Johnson county Farm Bureaus jumped at it, and so on down the list of 20 Illinois counties.

Many inquiries have been received by the I. A. A. regarding the length of essays, size of paper to be used, whether essays should be written with a typewriter and whether city school children are eligible for the contest.

H. R. Kibler, essay contest director for the American Farm Bureau Federation, says in answer to the first question that neither a maximum nor a minimum has

(Continued on page 3)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or mis-sent copy, please indicate key number on address as is required by law.

To Find Profits in Grain Marketing Since 1920

The Federal Trade Commission is continuing its investigation into the margins and profits of terminal grain middlemen in the principal markets in the United States upon request of the Illinois Agricultural Association.

When investigating the Grain Marketing Company, it was found that the Federal Trade Commission had ascertained the profits—which amounted to from 3 to 8 cents per bushel for wheat on the Chicago market—on grain down to and including the year 1920. The I. A. A. asked that these figures be brought down to date and the Federal Trade Commission has agreed to do so starting with the Chicago market.

—o—

We Need Strong Communities

Frank D. Barton of Cornell, Livingston county, in talking on the Farm Bureau radio program October 3, emphasized the value of good, strong community organizations as the greatest factor toward a successful Farm Bureau. Here is the way he puts it:

"It is found that in the counties where rural communities are organized, the program of the Farm Bureau is more nearly carried out than in communities where the individual member is left to work alone on the program.

"The greatest source of dissatisfaction arising among the members is because they do not avail themselves of the many helpful activities that are theirs for the asking.

"Community organization with good live community meetings affords the opportunity for the farm adviser to meet the Farm Bureau membership in groups and take up the farm problems common to the community and also a chance for the individual member to take up his individual problem with the adviser after such meeting."

—o—

The Council Reports Progress

Although we haven't said a great deal about the McNary-Haugen bill recently, we have by no means forgotten it. The executive committee reiterated its stand for it in the meeting of October 3.

The American Council of Agriculture reports that a large number of senators and representatives have been pledged for the bill. All those who voted for the bill when it was defeated have already pledged their continued support of some measure which would carry out the "spirit" embodied in the McNary-Haugen bill.

The "spirit" of the McNary-Haugen bill is—an American price for the American consumption, independent of the world price for the surplus.

—o—

"Quality Members"

Give this a thought:

Is the Farm Bureau gradually resolving itself onto a "selective membership" basis?

In many Illinois counties a committee goes over a prospective list of farmers before a re-organization campaign and culls off the "undesirables"—those kickers and chronic knockers who can't push an ounce but can drag back worse than a balky mule.

Will it be customary to vote on prospective members as is now the custom in lodges?

Advanced Farm Bureau thinkers are talking of "quality members" these days.

—o—

Here's Another Thompsonigram

It's President Thompson talking:

"We can't wait for Moses to come out from somewhere and do the things we (the farmers) want done. A lot of hard work must be done and you are going to know how it is done. The hardest thing in the world is to get people engaged in the agricultural industry to see their opportunities. I feel sorry for the man who apologizes because he belongs to the Farm Bureau. I wish he didn't belong." (Picked up by Adviser Fahrnkopf at 17th district meeting at Bloomington.)

—o—

The Farm Bureaus Are True Representatives of Agriculture

Perhaps you saw the I. A. A. exhibit sometime this summer. It has been shown at the Aurora fair, the state picnic and the state fair at Springfield. It is estimated that about 20,000 people saw it at Aurora, most of those who attended the state picnic saw it—that's about 12,000 more—and we think at least 75,000 people saw it at Springfield. A conservative estimate would be that 100,000 people have seen it—and they usually stopped to study its message once it attracted their attention.

The exhibit was a huge map of Illinois, 10 feet wide and about 20 long. The Wabash, Ohio, Illinois and Mississippi rivers were shown by actually running water. Lake Michigan, the part that bites out a chunk of Illinois, was also shown with real water. The whole map was covered with grass, and, while it was not exactly true as to the topographical features of all parts of the state, it made a pretty sight and attracted a lot of attention because of its naturalness.

On the grass were placed a number of miniature buildings representing the Illinois co-operative organizations. The model home and farm buildings of "Mr. Farm Bureau Member" were in a prominent position. The services of the I. A. A. were chief features.

The Illinois Chamber of Commerce asked the Illinois Agricultural Association to bring its exhibit to the Illinois Products Exposition wherein the wonderful resources of Illinois will be on display from October 9 to 18, in Chicago. The I. A. A. is to represent agriculture. . . .

Therein lies the point of this editorial.

It is becoming more and more customary for the Farm Bureau, county, state and national, to be regarded as true representatives of agriculture. When business men want agriculture represented, they come to the Farm Bureau organization. This is especially true in the counties. And it is as it should be.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

How would you "sell" the Farm Bureau if you were to go after a good neighbor who does not belong? We printed some letters on this topic last time, but here's another good one:

Dear Friend: Will answer your letter received a few days ago. Thank you for your questions. I don't want to sell my membership in the Farm Bureau. I sure think the farmers are gone without some organization or means of sticking together. We must have an organization or sooner or later have the price set down on what we raise to sell. We are gone until that happens. I wish every land owner or renter were Farm Bureau members and would cleave together as they should. We could then do anything in reason.

L. D. Henard, Buncombe, Ill.

Organization counts, ESPECIALLY if we all use it, Mr. Henard.—Ed.

Dear Director:

I feel that the farmers need very much to co-operate or work hand, head and heart together in every line not only in buying but in selling farm products. But what has always puzzled me is how to bring it about because so many farmers are so close run financially that they cannot hold their crops but must sell as soon as harvested. While there are a good many that can hold until they please to sell and I have seen good business men hold too long and lose much by not understanding that when there was a great demand for a product that was the time to sell and not to buy while when the price was low and there was plenty of a farm product was the time to co-operate and help each other if possible financially to be able to hold that product from the speculator and in the farmer's hand until all could get a price that would pay all expenses and a small profit at least.

We need co-operation on these lines mentioned but who will produce the remedy for our ills?

E. E. Linhart, Carrier Mills, Ill.

Hand, head and heart—that's a good point, E. E.—Ed.

Dear Sir:

Received your letter today and in reply would say that my personal opinion is that the high cost of labor, compared with the returns we farmers get for our produce is our greatest problem.

We have to pay at least $45 a month for hired man and from $20 to $24 a month for hired girl. And by the time the hired help and some extra day laborers are paid, the renter's profit is gone. We must pay from 30 to 50 cents an hour for common labor and in one case during the winter months I had to pay $3.00 for 7 hours, man labor at shredding corn fodder. From 9 to 4 o'clock was called a day.

Another problem is the 7 per cent interest we must pay for loans.

Another problem has been buying corn from 85 to 95 cents a bushel for corn to feed to hogs and sell for 6½ cents per pound, thereby losing about 3 cents a pound on all hogs fed. However, this has been proportioned a little better now by hogs going up a little.

J. B. Leib, Astoria, Illinois.

And that isn't all of 'em either, eh, Mr. Leib?—Ed.

Dear Sir:

In reply to your question: "What has the Farm Bureau done for you?"—so far I cannot see where it has done me any good and I am not for it any more.

When I can see where it is helping me and I can afford to, I will do all I can for it, but I couldn't now if I wanted to.

Hoping this will be the answer you are looking for as it is my idea of it, I remain,

Floyd W. Renner, Walnut, Ill.

Did you ever hear of a doctor always saving ALL of his patients, Mr. Renner?—Ed.

Dear Sir: I think the largest problem of agriculture is to get a fair remuneration for its labor and capital invested.

The fact that this government has gone on record denying the American farmer the protection necessary to give him a fair remuneration seems to me to compel us to unite along the same lines as labor and capital, and practically all other industries are now organized, and demand for our products a suitable price that will enable us to exist and compare favorably with other lines.

H. H. Holsinger, De Long, Ill.

Another argument for stronger organization—stick and fight, folks, we're doing our durndest.—Ed.

Dear Sir: As I see it a farmer should expect many things from co-operative marketing. Not over night or even in a month or a year, but in time. Of course most farmers expect greater prices for their produce, but we must also decrease our selling cost. A reduction of freight, commission, etc., would mean much toward increased profits.

We should expect to contract to sell all our products thru this organization.

We must expect resistance. Old line commission men and speculators are now spending large sums to defeat co-operative marketing. Why? Their fat profits will be thrown to the farmer.

We can expect recognition from the public if we control the marketing of our goods.

Nearly all manufacturers, wholesalers and retailers are members of their respective organizations, whereby they can set a price on their goods. Organized labor says, "We demand so much—"; why not the farmer?

What can we expect from co-operative marketing? It is the only way to meet competition, for as long as we do not have a voice in marketing, we are competing with an organized world. We farmers each stand alone against the various obstacles that are too great to overcome unless we use the modern method of getting our share by co-operative marketing.

Wilbur H. Gehring, Edwardsville, Ill.

And here's still another—a clincher.—Ed.

THE LIARS' CONTEST
IT IS!

Dear Sir: I have been trying to tell the truth for several years regarding improved methods of farming and Farm Bureau activities and hope I have assisted somewhat in getting this great work across.

In order to compete in your column I enter the following:

After observing Farm Bureau work from all angles I have come to the conclusion that it hasn't done any good. Sweet clover will grow well upon acid soil. There is no use in crop rotation as corn will grow better and bigger when planted year after year on the same field. There is nothing to treating oats for smut or spraying fruit trees for insects.

The Farm Bureau had nothing to do with legislative work, tax equalization, or railroad rate reduction. It has done nothing to promote co-operation or a live stock commission association. It fought the Capper-Tincher bill and McNary-Haugen bill, tried to raise railroad rates, worked for Pittsburgh Plus and against the Deep Waterway. As a whole it worked against the best interests of agriculture.

If this ain't one, then what is?

O. L. Hatch, Rosciawa Farm, Kewanee, Ill.

BOYS FROM BUREAU REPRESENT ILLINOIS IN JUDGING CONTEST

Iowa Team Wins; 250 Boys and Girls Attend Club Camp at National Dairy Show

The national junior cattle judging team, which goes to London, England, next June to duplicate the stunt that "Dad" Wise and his Whiteside county boys put over last summer, will not be made up of Illinois boys. Instead that team will be composed of three Iowa boys, Harlan Leonard, Lester Olsen and Raymond Monahan, winners of the championship junior dairy judging title of America.

These three Iowa lads won the right to represent the United States by defeating teams from 19 other states at the boys' and girls' club judging contest held in conjunction with the National Dairy Exposition in Milwaukee last week.

Illinois state was represented in the contest by three boys from Bureau county, Orville Plum, Walnut; Virgil Hurst, Manilus; and Wendell Keener, Princeton, who were coached by C. M. Hatland, teacher of vocational agriculture at Walnut, and J. B. Haberkorn, assistant farm adviser in Bureau county.

Nebraska Was Second

The boys from Bureau county landed in Milwaukee the forenoon of Sept. 28, after a frosty 185 mile drive, with high hopes of repeating the feat of "Dad" Wise and his boys at the big show in Syracuse a year ago. But, somehow, when the smoke had cleared away after the battle, the Iowa team walked away with the honors with Nebraska mighty close upon their heels.

Regardless of their winnings the Illinois boys got a real taste of what boys' and girls' club work means during their stay at the boys' and girls' club camp at the National Dairy Show.

When they landed at the camp they were met by Wakelin McNeel, camp director, a jovial fellow who loves boys and girls and their club work. He made them at home and helped them get "thawed out." They couldn't have been there long without making friends with "Mack." He made a hit with every boy and girl in the club camp as this clipping, from the 4-H Dairyland S'news, the daily camp paper, shows:

"Every club member on the grounds knows and likes Wakelin McNeel, assistant state club leader of Wisconsin, who is working day and night to make them comfortable and happy. Three hundred new friends are his reward for sinking himself in service."

The Illinois boys hadn't been at the camp grounds long until they learned that the "publicity man" was on the job. He got the accompanying picture of them in "stock judging clothes" and pumped them all he could.

Types of Club Work

After that they began to learn more about how the camp was managed.

The boys' and girls' club work at the National Dairy Exposition embraces four types of activity: The dairy cattle judging contest, the dairy demonstration team contest, club cattle exhibit and the boys' and girls' club camp.

These four branches of the work are combined to give the boys and girls an opportunity to learn more about dairy cattle, to see the many educational exhibits and demonstrations which are a part of the National Dairy Show and to improve and help develop the dairy industry of the country.

Any boy or girl under 21 who is a bona fide member of a club project in breeding or growing dairy stock is eligible to enter any of the several contests.

The camp headquarters, dormitory, kitchen and dining room were all under the big race track stadium at Milwaukee. On the ground floor of the building were 150 calves—Holsteins, Ayrshires, Jerseys, Guernseys, and Brown Swiss—on exhibition in the National Boys' and Girls' Calf Club contest.

Alarm Clocks Unnecessary

Sleeping quarters for the boys were directly above these 150 calves, a situation which made alarm clocks altogether unnecessary when the hungry, homesick, calves began bawling about three o'clock each morning. The girls' dormitory was in another building.

Feeding the boys and girls three good squares a day was no small task. With some 75 boys and girls and their coaches attending the camp for the dairy cattle judging contest, an equal number there for the demonstrations and enough more caring for the 150 calves to bring the total to more than 250, the camp cook, Mrs. George Mason, had a real sizable family for which to provide.

"We serve 'em breakfast at 7:30, dinner at 12:00 and supper at 5:30," said Mrs. Mason who apparently is as fond of boys and girls as is "Mack" McNeel and the meals she dishes out are evidence enough of this fact.

Her "grocery list" for one meal included 50 gallons of milk, 50 dozen eggs, nine bushels of Irish potatoes, 50 pounds of rice for pudding and 60 loaves of bread to say nothing of correspondingly large orders of butter, cheese, meat and ice cream.

Lots of Entertainment

During their stay at the camp the boys and girls got a lot of free entertainment outside of the fair grounds. On Sunday afternoon they took a trip to the Washington Park Zoo under the guidance of T. L. Bewick, state club leader in Wisconsin. A lot of them had gone to church that morning, too. At night they had their own church at club headquarters.

On Monday night Mr. Bewick took more than 150 of them to the Rialto theater where they saw the "Covered Wagon" as the guests of the Milwaukee Kiwanians. The next night the Rotarians of Milwaukee "theatered" them at the Palace.

Have Health Contests

In other contests beside the dairy judging contest which the Iowa boys won, the demonstration contest title went to Raymond Nixon and Olin Brown of Nebraska while a Minnesota girl and a Pennsylvania boy copped the prizes for being the healthiest individuals.

When the camp broke up at the close of the National Dairy Show the 250 boys and girls who had come from 30 states were more or less glad to go home—back to their school lessons and work—but not a one of them would have traded his trip for anything. It was an event in each of their lives long to be remembered—the fine cattle, the splendid government exhibits, the display of dairy machinery and equipment and best of all a better understanding of their 4-H emblem, which stands for training and development of their head, heart, hands and health.

The 4-H emblem, official flag that floats above all boys' and girls' club camps.

The Bureau county junior dairy judging team and coaches. These boys represented Illinois in the contest at the National dairy show. Left to right—Orville Plum, Walnut; J. B. Haberkorn, coach and associate adviser Bureau county; Virgil Hurst, Manilus; C. M. Hatland, vocational agriculture teacher at Walnut, coach; and Wendell Keener, Princeton.

Member Writes His Approval of T.B. Work

Prophetstown, Ill.
Sept. 30, 1924.

I. A. A. RECORD,
Gentlemen:

With reference to your article regarding the change in the handling of reactors, I compliment our Mr. Petersen for putting this over. I called his attention to this matter some time ago as I have had charge of T. B. work in my township and we are better than 98 per cent tested and as I saw all of the returns from the sale of reactors I think there was a plain case of steal. I am satisfied if we had handled it this way at the start the farmers would have received thousands of dollars that went into the pockets of Stockyard parasites.

All the other departments of the I. A. A. that I have worked with are rendering a real service.

Respectfully yours,
(Signed) W. H. Lamont.

TWENTY COUNTIES IN ESSAY CONTEST

(Continued from page 1)

been set for the length of articles. The length of essays will depend upon the individuals writing them. Those who can express a lot in a few words should do so. Those who need a lot of space to explain their ideas have the privilege of using it.

There have been no specifications as to what kind of paper should be used or how it shall be written. The contest director suggests that standard 8½x11 paper, with the essay written either with typewriter or pen and ink is desirable.

The subject of the essays, "Why Dad is a Farm Bureau Member" and "Why Dad Should Join the Farm Bureau" makes the contest open to all school children up to and including the first two years in high school whether they live in the country or city. The suggestion has been made that individual counties might in some cases bar essays written by city school children.

Illinois counties now in the contest are: Clark, Whiteside, Vermilion, Ogle, Johnson, Henry, Lee, Cass, DeWitt, McDonough, Macon, Grundy, Livingston, Pope, Carroll, Kendall, Henderson, McLean, Bond and Jo Daviess.

Inequality Shown In Council's Book

The American Council of Agriculture, created at a conference of national and state agricultural organizations last July at St. Paul, has prepared a leaflet pointing out the inequality that has been imposed on American agriculture through legislative enactments favoring other lines, and is calling upon farmers and their friends to help remedy it.

The principal undertaking of the Council is that of continuing the campaign which was waged before the last session of Congress to secure for agriculture the same benefits of the American principle of protection that have been extended to American industry and labor.

Candidates for election to Congress are being asked to pledge themselves to "vote for and actively support legislation equality with American industry and labor." The circular being distributed by the Council urges that "Men and women alike should actively support candidates, regardless of their party affiliation, who do so commit themselves and should defeat those who do not."

The leaflet contains the principal points of two addresses on the agricultural situation. One, by F. W. Murphy, lawyer and farmer of Wheaton, Minn., was the keynote address of the St. Paul farm conference. The other was given by Geo. N. Peek, president of the Council, at the Iowa State Fair. These point out what the Council believes must be done before American Agriculture can stand upon a sound foundation.

Two maps are used in the leaflet with very graphic effect. One shows how members of the House of Representatives voted on the McNary-Haugen farm relief bill, while the other shows the vote on the tariff bill of 1922. On the latter, agriculture is shown to have stood by the industrial east, but the east failed to stand by agriculture on the farm relief measure.

Copies of the leaflet can be secured from secretaries of all farm organizations or direct from the Council headquarters at 608 S. Dearborn Street, Chicago.

25,705,063 Did Not Cast Vote In 1920. How About You?

The executive committee of the American Farm Bureau Federation at its September meeting in Chicago adopted strong resolutions calling upon all qualified voters of the nation to vote at the coming election.

The population of the United States in 1920, twenty-one years of age and over, was 60,886,520. Of this number 26,713,832 persons voted for president, and 8,467,625 were disqualified from voting. The stay-at-home and absentee voters, therefore, numbered 25,705,063.

John C. Watson, director of taxation and statistics for the Illinois Agricultural Association, has furnished similar figures for this state.

In Illinois the total population in 1920 was 6,485,280. Of this number 3,944,197 were 21 years of age or over. Out of these 3,944,197 people eligible to vote for president that year, 2,094,714 went to the polls. The number of disqualified voters was 478,482. The stay-at-home and absentee voters for the state therefore, numbered 1,371,001.

Vermilion To Clean Up

If plans for tuberculosis eradication, laid at a general meeting in Danville, Oct. 7, are followed out, Vermilion county will soon be in the modified-accredited tuberculosis free list.

Arrangements have been made by M. H. Petersen, director of the I. A. A. tuberculosis eradication project, Dr. J. S. Crabtree, government veterinarian, and Dr. J. J. Lintner, in charge of government testing in Illinois, to make a clean-up campaign.

Plans are to get a dozen government veterinarians to clean up the work in one week's time.

FARM BUREAUS IN 18TH DISTRICT OKEY I. A. A. GRAIN PROBE

Express Approval of Stand Taken By Association Officials; Watson Helps Discuss Tax Problems

Farm Bureau representatives from Clark, Iroquois and Vermilion counties, meeting in district conference at Danville, Sept. 29, were unanimous in approving the I. A. A. investigation into the Grain Marketing Company and praised President Thompson and other officials of the association for the stand they have taken in demanding more complete information before voting either for or against the grain merging plan.

The important events in the grain marketing industry, during the last two years, were reviewed briefly by R. A. Cowles, treasurer of the I. A. A., after which he went into a thorough discussion of the whole Grain Marketing Company proposition since its formal inception last spring.

Cowles Raised Questions

He expressed his personal opinion that big financial interests are back of the merging companies. "The Illinois Agricultural Association has assumed responsibility of passing upon the grain merger for our County Farm Bureaus," he said, "but we are not going to pass on it until all questions—legal, economic and personnel—can be settled. We want to know in whom the control is vested. Whether the farmers or someone else will control it.

"Are the properties of the Grain Marketing Company located right, is the volume of storage in excess of usefulness and are we going to back a company that will try to buy grain as cheaply as it can—which will be reflected in the price the farmers get?" These questions were included among others raised by Mr. Cowles and which the investigation made by the I. A. A. has answered.

Following Mr. Cowles' talk the resolution endorsing the I. A. A. investigation was submitted and passed. It read:

We, the representatives of the County Farm Bureaus of the 18th Congressional district, assembled in a meeting called by the director of said district in Danville, Ill., do commend and approve the position taken by the officers and directors of the Illinois Agricultural Association in requiring before approving or disapproving the Grain Marketing Company, such information as ordinary business prudence would require.

Signed:
C. R. Findley, Chairman.
J. G. Snedeker.
G. W. Lenhart.
Resolutions Committee.

John C. Watson, director of taxation and statistics for the I. A. A., talked briefly of the $100,000,000 bond issue for hard roads, which will be voted on at the coming November election.

Mr. Watson stated that it was not his purpose to argue either for or against the bond issue but rather to furnish facts and figures on both sides of the question so that voters might cast their ballot with a more thorough understanding.

He raised and answered questions regarding the gasoline tax, the sums involved in the hard roads bond issue, methods of payment and others regarding taxation matters which farmers want to know.

In attendance at the meeting were: W. W. Merritt, farm adviser; Elder Lee, J. G. Snedeker and J. H. Mauer, Clark county; R. F. Karr, 18th district executive committeeman, L. W. Wise, farm adviser, H. C. Pendergrass, F. W. Schroeder and A. J. Gilfillan, Iroquois county; and J. C. Jones, G. W. Lenhart, Otis Kercher, farm adviser, C. R. Finley and Charles Juvenall, Vermilion county.

In Whiteside county, over 50 enthusiastic dairymen and their families recently went on a trip of inspection to a leading dairy farm. Judging demonstrations, a study of the milk plant and a picnic were the principal features of the occasion.

In Iroquois county, 16,500 cattle have been tested for tuberculosis during the 13-month period just ended. County veterinarian Herron has begun retesting.

A hen at Purdue University has laid 1,341 eggs.

I. A. A. EXECUTIVES GIVE THEIR VIEWS TO KYW RADIO FANS

Watson Says "Put Business Into Farming"; Barton Tells of Rural Community Building

Many Farm Bureau members in Illinois and surrounding states who tuned in on the I. A. A. farm program over station KYW, Chicago, Friday night, Oct. 3, heard C. B. Watson, vice-president of the I. A. A. and Frank D. Barton, executive committeeman from the 17th district, express their views on modern rural conditions.

Mr. Barton put forth his views of "Rural Community Building."

"I believe that the day is past when agriculture can hope to succeed with each one interested in production of foods working individually, and that we must work together in organizations," he said. "I believe that in our great state the Farm Bureau is the most important factor in farm organization."

Need Community Organization

He described the form of rural organization in earlier days, relating how the community centered around the school and the community church. He reminded his scattered audience that the automobile has revolutionized our rural communities and pointed to the fact that many leaders in rural community work now recognize the need of rebuilding our rural community life.

"Our Farm Bureau leaders have begun to realize as never before the importance of building and maintaining our rural communities as a dominant factor in our reorganization work and in putting over the Farm Bureau program," he continued. "The county Farm Bureau has in a goodly number of cases builded community organizations and in many instances has helped to maintain the old community organizations that have been kept alive through the efforts of the rural church and leadership formerly developed."

Train Future Leaders

In closing Mr. Barton expressed the need of rural community building in the present day, first, "to give our young people a cleaner and more wholesome entertainment and recreation" and thus "keep them on our farms;" second, to maintain our community churches and third, to develop future leadership for our nation as we have in the past.

"The only hope that I have that this may be accomplished is through farm organizations," Mr. Barton concluded, "aided by and working with the building of stronger rural community organizations."

Mr. Watson jumped into the middle of his subject "Putting Business Into Farming," landing with no little pressure on those forces which have protected organized labor and industry to the detriment of agriculture.

The basic weakness in the business of farming, he said, is that the farmer does not have the machinery provided by legislation to put his industry on an equality with business and labor.

Must Overhaul System

"Putting business into farming requires a complete overhauling of our merchandising system," Mr. Watson told his audience. "The farmer must so organize his business that his products will meet consumptive demand with an available supply. The dumping of live stock, grain and other products on the markets must cease. We have not yet mastered the ABC's of co-operative marketing.

"The millions of dollars of those forces who would keep agriculture helpless have made the farmers' task exceedingly difficult. Not only in putting business into farming must the farmer merchandise live stock, grain and other products, but he must study future requirements and world-wide conditions and so adapt his business to intelligent production.

"To adjust these conditions we need business in farming in order that farming may be put on an equality with industry and labor."

Listen In!

FARM RADIO PROGRAM

Over KYW—Wave Length 536

Central Standard Time 7:20

Get in tune with these stations on Tuesday and Friday evenings, Farm Bureau folks, and hear their farm talks. You'll be particularly interested in hearing R. A. Cowles, I. A. A. treasurer, next Tuesday night on "The Farmer and Legislation," and Geo. R. Wicker when he talks on "Plugging Leaks in Co-ops."

Oct. 14—"The Farmer and Legislation," R. A. Cowles, treasurer of the Illinois Agricultural Association, **from station WLS, between 8:00 and 9:00 o'clock.**

Oct. 14—"Painting and Housing of Farm Machinery," by F. A. Wirt, Editor, Case Eagle, Racine, Wis. American Farm Bureau Federation feature.

Oct. 17—Boys' and Girls' Club Feature, by A. D. Folker, Montgomery Ward & Co.

"What Cattle Feeders Are Talking About," by D. C. Waterman, Editorial Staff of the Orange Judd Illinois Farmer.

Oct. 21—American Farm Bureau feature.

"Plugging Leaks in Co-ops" by George R. Wicker, Mgr., Illinois Agricultural Co-operatives Association and Director of the Illinois Agricultural Association Dept. of Co-operative Accounting.

Oct. 24—"What the National Boys' and Girls' Club Congress Means to America," by G. L. Noble, Secretary, National Committee on Boys' and Girls' Club Work.

"Farmers' Produce Markets," by Arthur C. Page, Editor, Orange Judd Illinois Farmer.

Oct. 28—"Monthly Analysis of Farm Markets," by H. W. Moorhouse, Howard-Moorhouse Agricultural Business Service.

American Farm Bureau Federation feature.

Oct. 31—"Farm Juniors at the International Live Stock Exposition," by B. H. Heide, Gen. Mgr., International Live Stock Exposition.

"What the Illinois Farm Bureaus Are Doing," by H. C. Butcher, Director of Information, I. A. A.

More than 370,000 radio sets are in use on farms in the United States today.

Here's another sample of transportation department work:

Mr. L. E. McKinzie, Adviser,
Schuyler County Farm Bureau,
Rushville, Illinois.
Dear Sir:

We have your letter of Aug. 21 in which you enclosed freight bill on a carload of limestone from Consumers Company to Mr. C. V. Bader.

We have checked this over and find that Mr. Bader has been overcharged. We will gladly take this up with the railroad for adjustment.

Very truly yours,
Transportation Department.
(Signed) L. J. Quasey, Director.

And one of more recent date:

Mr. L. E. McKinzie, Adviser,
Schuyler County Farm Bureau,
Rushville, Illinois.
Dear Sir:

We are pleased to attach draft from the C. B. & Q. Railroad Company for $9.31 in full settlement of Mr. C. V. Bader's claim for overcharge on a shipment of agricultural limestone, Aug. 16, C. N. J. car 84176.

If we can be of further service to you, kindly advise.

Very truly yours,
Transportation Department,
(Signed) L. J. Quasey, Director.

And an extract from another:

Mr. E. H. Kirkpatrick,
Roseville, Ill.
Dear Sir:

We are sending you herewith the railroad company's check for $55 in full settlement for Holstein heifer killed on C. B. & Q. tracks on account of defective right of way fences.

(Signed) Transportation Department.

REPORT IS AGAINST BIG GRAIN MERGER

(Continued from page 1)

set up by the Grain Marketing Company is in part illegal and impracticable. These defects can possibly be corrected by amendment to the by-laws but no steps have yet been taken.

"The Illinois Agricultural Association officers have been hopeful that the Grain Marketing Company would provide a co-operative selling agency for co-operative grain associations and grain producers who are not in other associations. We do not believe the Grain Marketing Company as now set up will meet these needs."

Wednesday, Thursday and Friday, October 1, 2 and 3, were busy days for the I. A. A. executives and officers. Several were in Chicago on Wednesday for special committee meetings and many could not get home until Saturday because of the night session Friday.

Meet Grain Dealers'

Thursday a joint meeting of the executive committees of the I. A. A. and the Farmers Grain Dealers' Association of Illinois, representing over 500 farmers' co-operative elevators, was held in the I. A. A. office. This meeting resulted in a much better understanding between the heads of the two organizations. Good will and a desire to co-operate by both bodies was expressed. It was decided that a committee on mutual relations should be appointed to better co-ordinate the work of the two organizations. Sam H. Thompson and Fred A. Mudge, presidents of the two organizations, were each empowered to select two men from his respective organization with the presidents acting ex-officio on the mutual relations committee. President Thompson has not made his selection as the Record goes to press.

The regular monthly treasurer's report by R. A. Cowles was presented by him and received by the executives.

Educational Committee Report

The educational committee, consisting of J. L. Whisnand, Charleston, chairman, A. C. Everingham, Hutsonville and E. W. Rusk, Carlinville, received more information from Dr. G. W. Willett and C. B. Althaus concerning the school survey conducted during the summer. The report of this committee to the executive committee states that Dr. Willett's final report on the 10,000 questionnaires sent out to farmers seeking facts on many pertinent school questions will be in full form within the next few weeks.

"It will contain some rather interesting facts and will show that our reports are based upon information gathered from a very representative group of farmers from all parts of the state and representing about all possible contingencies which may arise," reads a part of the educational committee report.

Dr. Willett's survey of the questionnaires will supplement the work of C. B. Althaus who traveled about Illinois from Pulaski county in the south to the Wisconsin line in the north, gathering data from county clerks on school taxes. Mr. Althaus reported that he has compiled his findings on 190 township and community high schools with 35 more yet to complete. This will give complete information on 225 schools.

Findings Vary Little

The findings on the 190 township and community high schools remain practically the same as the first report which summarized his work in 100 such schools. In that report it was disclosed that an average of 70 per cent of township and community high school taxes is paid by farmers and that the farmers furnish but 40 per cent of the pupils in the township and community high schools. The added finding with the 90 additional schools to the original 100 shows a variation of less than 1 per cent from the original findings which substantiates the accuracy of the survey.

Friday, October 3, was the regular monthly meeting of the executive committee. The roll call showed the following committeemen present: G. F. Tullock, Rockford; C. E. Bamborough, Polo; W. H. Moody, Port Byron; H. E. Goembel, Hooppole; A. R. Wright; Varna; F. D. Barton, Cornell; R. F. Karr, Iroquois; J. L. Whisnand, Charleston; Earl C. Smith, Detroit; Samuel Sorrells, Raymond; Stanley Castle, Alton; J. E. Lingenfelter, Lawrenceville; Curt Anderson, Xenia; Vernon Lessley, Sparta.

Endorse A. F. B. F. Action

The report of the legislative committee — Frank D. Barton, Cornell, chairman, H. E. Goembel, Hooppole and A. C. Everingham, Hutsonville,—covered three main subjects. Its recommendation that the Illinois Agricultural Association endorse the action of the American Farm Bureau Federation position on the child labor amendment was received and passed with full accord. The text of this resolution is contained elsewhere in this issue.

The Adams County Farm Bureau had brought to the attention of the legislative committee the necessity of a change in the Illinois game laws removing the protection of rabbits and making a closed season for a term of years on quail. The executive committee favored the action of the legislative committee in its report that it would give the game laws due consideration in the coming session of the legislature.

Report on Hard Roads

The third subject reported on by the legislative committee was a summary of the findings on the One Hundred Million Dollar Road Bond Issue. The text of the resolution adopted is as follows:

"Accepting all estimates of probable receipts and expenditures directly or indirectly made for road construction, as outlined in the latest report of the Division of Highways, Department of Public Works and Buildings, of the State of Illinois, we believe:

"1. That probable motor fee collections at the present license fee rates will be sufficient to pay the interest on the bonds and retire the bonds of both the existing Sixty Million Dollar Bond Issue and the proposed One Hundred Million Dollar Bond Issue.

"2. That the probable revenue available from motor fee collections from the sale of bonds under the proposed law and from anticipated Federal Aid Appropriations will not be sufficient, after other expenses are met, to construct the total mileage of roads projected under the present Sixty Million Dollar Road Bond Issue Law and the proposed One Hundred Million Dollar Road Bond Issue Law.

"3. That probable motor fee collections at present rates will not be sufficient, after meeting other necessary expenses, to maintain the total mileage of roads which can be constructed with present contemplated revenues, especially after payments begin on the principal of the proposed One Hundred Million Dollar Bond Issue.

"We believe that the type of road construction now being used in the Illinois system of highways is the best and most permanent in the United States.

I. A. A. On Radio

A report by the advisory committee of the department of information,—R. F. Karr, Iroquois, chairman; L. O. Wise, Morrison and J. M. Beckett, Blue Mound —brought out that the I. A. A. will be "on the air" from one of the St. Louis radio stations beginning in November.

The live stock committee with George F. Tullock, Rockford, chairman, Samuel Sorrells, Raymond, A. D. Lingenfelter, Lawrenceville, present, reported that the 500 blankets on hand the middle of the summer had been sold and that several money orders and checks for blankets have had to be returned.

Secretary Fox On The Air

Geo. A. Fox, secretary of the I. A. A., was scheduled to speak over radio station KYW, Thursday night, Oct. 9. This was too late to get his talk in the Record. The gist of his talk was to be "Illinois, the Nation's Food Basket."

ILLINOIS GROWERS ORGANIZE COTTON MARKETING CO-OP

Incorporation Is Final Step In Forming Non-Stock, Non-Profit Concern at Mound City

An Illinois Cotton Growers' Co-operative Association is now a real going concern with headquarters at Mound City, Pulaski county. Articles of incorporation were submitted to Louis T. Emerson, secretary of state, and the legal set-up has been attended to, creating the first co-operative cotton marketing corporation in Illinois.

From Mound City the new co-op will conduct its cotton marketing program handling only cotton grown by members of the association. The first bale of cotton was ginned around Oct. 1. Its purposes as outlined in the articles of incorporation are:

Non-Profit Co-op

To be a non-profit co-operative agricultural association without capital stock, organized for the mutual help and benefit of its members; to promote the general welfare of its members and to provide better and more economical methods of marketing the cotton and cotton products of its members through co-operation; to act as agent for its members in handling and marketing their cotton and cotton products and in supplying to its members, machinery, equipment and supplies; and to co-operate with other associations or individuals engaged in similar purposes.

The incorporation of the company is the final step in an organization program that has been developing since early last spring when an organization committee was instructed to survey the situation with a view to determining whether a need for the marketing pool really existed.

The report of this committee at a July meeting was favorable to the organization of a marketing pool. Cotton growers decided at that time to consider more fully the formation of a pool and after considerable study of its real need and possibility of success met in Mound City, July 22, to take definite action toward incorporation.

1,500 Acres In Pool

A minimum of 1,500 acres was set as the necessary acreage which should be signed into the pool before incorporation would be advisable. Four hundred acres were signed up at that meeting and the balance contracted for since then.

The Illinois pool will probably market its product through the Cotton Growers Association of Arkansas, which is a member of the National Cotton Growers' Exchange, according to G. E. Metzger, organization director of the I. A. A., who has been assisting in organizing the association of Illinois growers.

I.A.A. Backs A.F.B.F. In Child Labor Stand

We, the legislative committee, recommend that the Illinois Agricultural Association endorse the action of the American Farm Bureau Federation as expressed in the following resolution:

WHEREAS, Congress has passed an amendment to the Constitution which would give that body "power to prohibit the labor of persons under the age of 18 years and to prescribe the conditions of such labor," and the ratification of this action is now before the state legislatures, and

WHEREAS, the opportunity to discourage or prohibit this sort of federal interference —making a farm mother of Congress—has passed for the moment beyond the activities of the American Farm Bureau Federation and has become entirely a state question, and

WHEREAS, the proposed amendment will give Congress blanket authority to pass stringent and far-flung laws on this subject which is already covered adequately and according to local conditions in a majority of states,

We URGE THE STATE FARM BUREAU FEDERATIONS to impress upon their legislatures the desirability of defeating the ratification of the child labor amendment.

BRADFUTE URGES CO-OPERATION AT KEWANEE PICNIC

Henry, Stark and Bureau County Farm Bureaus Rub Shoulders With Business Men For a Day

"He who would co-operate must first adjust himself so other men can co-operate with him."—President O. E. Bradfute.

Talking co-operation is one thing, and actually doing it is another.

This, from O. E. Bradfute, president of the American Farm Bureau Federation, was the core of an apple of thought tossed vigorously into the minds of a grandstand full of a part of 8,000 Henry, Stark and Bureau county farmers who picnicked at the Kewanee fair grounds in the second annual tri-county farmers' and business men's get-together at Kewanee, Oct. 15.

O. E. Bradfute

While farmers and business men rubbed shoulders for the day, President Bradfute made the most of his opportunity to hurl a farm organization sales talk and a plan for co-operation into the thoughts of both. He used as an illustration the fact that Kewanee business men and the county Farm Bureaus of Henry, Stark and Bureau counties are sowing seeds of co-operation in their large community through such informal "chin-fests" as the annual tri-county picnic.

Must Co-operate Both Ways

President Bradfute was introduced by W. E. Gould, local banker, member of the board of directors of the Grain Marketing Company, and chairman of the speaker's committee for the occasion, following an analysis of farm business trends by Frank Ridgway, agricultural writer of the Chicago Tribune.

"Twelve business men can go into a room with twelve separate opinions on a common problem," said President Bradfute, as he got into the meat of his talk. "After an hour's discussion they can come out of the room and have their problem completely settled. Twelve farmers can sit down likewise, but they will come out after twelve hours deliberation and have twelve separate opinions. Co-operation among farmers will come easier when farmers learn to co-operate both ways. Too many of us are willing to co-operate only when the other fellow does a thing our way.

"Many of us are groping about to co-operate, but have different ideas in our minds as to what co-operation really is. If I were to ask 100 men in this audience each to write on a sheet of paper his idea of co-operation, I dare say I would get 100 different ideas.

Bradfute's Yardstick

"Let me tell you of my measuring stick of co-operation. It can be boiled down to this: He who would co-operate must first adjust himself so other men can co-operate with him."

As one of the first steps of co-operation, he pointed to the necessity of farmers backing their organization. Get back of your county Farm Bureaus and your state organization, the Illinois Ag-

(Continued on page 6)

Vote! Vote! Vote! On Tuesday, Nov. 4

Political strife has reached its height The last six weeks has been a period of rapid growth for party claims. The press, as well as the air, has been full of them. Since this is the last issue of the Record before election, you will find in this issue an extensive report by the American Council of Agriculture on the "Equality for Agriculture" program and a detailed statement compiled by the American Farm Bureau Federation showing the past vote of all Illinois Congressmen on paramount agricultural measures.

Of course you know the I. A. A. is absolutely non-political; it gets behind issues without regard to party politics. All Farm Bureau members, and every farmer for that matter, should know the attitude of every candidate toward agriculture. This information is in this Record. Read it and THINK, and then VOTE. VOTE on Tuesday, Nov. 4. VOTE FOR AGRICULTURE.

Midwest Officials Discuss Problems

The presidents and secretaries from nine state Farm Bureaus met at the American Farm Bureau Federation headquarters, Oct. 9 and 10, to consider matters of special interest to the Midwest group of states, including Illinois, Iowa, Missouri, Nebraska, Ohio, Indiana, South Dakota and Minnesota.

After a lengthy discussion of the Grain Marketing Company the delegates voted to endorse the big merger. However, Illinois, Indiana and Wisconsin dissented from the vote of approval.

In addition to the thorough discussion of the Grain Marketing Company, the Midwest presidents and secretaries discussed various problems affecting the Midwest state Farm Bureau federation.

Some time was spent in the discussion of the constitution of the A. F. B. F. in relation of equitable representation of members on the governing body. The idea was advanced by some that since the Midwest state federation contributed the largest percentage of financial support to the national organization that these states be given greater representation on the governing board.

R. A. Cowles, treasurer of the I. A. A. and secretary of the American Council of Agriculture, told of the work, purpose and plan of the Council.

Iroquois To Reorganize

One hundred Farm Bureau leaders from all parts of Iroquois county attended a meeting at Watseka, Oct. 15, to lay plans for the immediate reorganization of the Iroquois County Farm Bureau.

Principal speakers at the meeting were V. Vaniman, now organization director for the Illinois Agricultural Co-operative Association; J. C. Sailor, formerly director of organization with the I.A.A.; H. L. Hough, farmer at Mason; and G. E. Metzger, I. A. A. organization director.

Mr. Hough was made director of the campaign with Fred Halm, Peru, and W. D. Owen, La Rose, as his assistants. Under the management of these men an intensive reorganization drive by townships will be made.

THE 63,000 THINKING FARMER EXHIBIT

Two hundred and seventy-five thousand people, from country and city, have seen this display.

City Folks Marvel At Show of 63,000 Thinking Farmers

Under a canopy emblazoned around the edge with the letters: "Illinois Agricultural Association —63,000 *thinking* farmers," the vast throngs of city and some country people, who visited the Illinois Products Exposition at Chicago last week saw how the I. A. A. represents its 63,000 *thinking* farmers at places where the farmer should be represented.

Thirty-three cities of Illinois, through the Chambers of Commerce of each of those cities, put on extensive displays showing many products produced and manufactured in Illinois. The I. A. A. exhibit showed the agricultural resources of Illinois and the part the I. A. A. plays in representing the farming industry.

A painting in which the artist had depicted a typical Illinois farming scene—a cozy farm house, a good barn and silo, chickens, pigs, beef and dairy cattle, horses, sheep and all that goes with the average farm—attracted city and country visitors alike. In front of the canvas and lying flat like a table was a map of Illinois 10 feet wide and 20 long upon which were miniature buildings representing the various co-operative organizations in which the I.A.A. is interested. The exhibit occupied a prominent triangular space, 20 feet on a side.

The map is the one shown at the Aurora fair, the state picnic, and the state fair at Springfield. A green-shaded flood light under the canopy gave an effect of twilight which stopped the visitors and kept them looking.

The Knox County Farm Bureau, through the Galesburg Chamber of Commerce, showed the wide variety of products grown in Knox county. City folks were heard to say upon several occasions that they wished such fine vegetables as were shown in the Knox County Farm Bureau exhibit could be bought in the Chicago stores. L. R. Marchant, farm adviser of Knox county, spent two days in getting the exhibit set up.

Co-op Ships 29 Cars Spuds

Twenty-nine car loads of Bluff Brand, Irish Cobbler potatoes were shipped from Belleville, St. Clair county, by the Belleville Co-operative Potato Marketing Association from early August to Oct. 15, this year. This potato co-op is a local branch of the Illinois Fruit Exchange. The potatoes were sacked in bags bearing the brand: "Illini, St. Clair County, Bluff Brand, Cobblers," and were shipped as far as Mobile, Ala.

Committee of Five To Choose Winning Farm Bureau Essays

The five judges who will determine the prize winners in Illinois in the Farm Bureau essay contest, have been named. They will serve as the official I. A. A. committee and will choose the state winners in Illinois.

The committee includes Francis G. Blair, state superintendent of schools; C. V. Gregory, editor of Prairie Farmer; Sam H. Thompson, president of the I. A. A.; Arthur C. Page, editor of the Orange Judd Illinois Farmer; and C. E. Hay, Christian county farm adviser and president of the Illinois Farm Advisers' Association.

After the close of the contest on Nov. 10, a committee of judges in each of the 21 Illinois counties in the contest will choose a first prize essay for the county. From these 21 prize winners the I. A. A. committee will pick the state champions and award the 13 cash prizes given by the I. A. A.

"The contest in Illinois as well as in other states has surpassed all our expectations," said H. R. Kibler, directing the contest for the American Farm Bureau Federation. "We had hoped to get, in all, about 100 counties into the contest. It looks now as though we might have 175. They average about 70 contestants to the county so far. We didn't expect them to average more than 20 to the county."

The rivalry between county Farm Bureaus for first place in amount of publicity secured on the contest is mounting. Counties are commencing to send in large batches of clippings from their local papers of stories carried on the contest. In addition to form stories sent out by the A. F. B. F. many counties are building separate local stories.

Thousands of requests from individual farm boys and girls for material concerning the Farm Bureau have been received by the national office and the state organizations report similar flood of requests. Several state federations have published separate booklets containing just the information the contestants should have.

Within another week the total number of contestants by states and counties will be available and will be sent out to newspapers.

Executives Meet

The next regular executive committee meeting is set for Friday, No. 7. The present executives have a standing invitation to all ex-committeemen to attend whenever they happen to be in Chicago.

ILLINOIS FIGHTERS WHIPPING ENEMY, TEST DATA SHOWS

I.A.A. Has First Figures Proving Progress in Statewide Project to Eradicate T.B.; Reactors Decreasing

That treacherous enemy of people and live stock is on the retreat in Illinois.

The enemy has been putting up a stubborn guerilla warfare against regiments of trained fighters in battles all over the nation.

The enemy is bovine tuberculosis, the disease which causes an annual stock loss in the United States of approximately $40,000,000.

The white flag of complete submission has by no means been hung up by the enemy, although in some areas in Illinois it has retreated so far that it is likely never to regain its lost ground.

Eradication Started in 1918

In Illinois, where the enemy originally gained unchallenged advancement in the thickly cattle-populated milk producing areas, especially before its opponents became aware of its distressing strength and severe leeching power upon the farmers' resources, the first attacks against it began after April 1, 1918, when owners of purebred herds started to test their cattle under the accredited plan.

From that starting point until July 1, 1921—a little over three years—an average of slightly more than nine out of every hundred purebred cattle were found to be traitors to the people's cause, not only concealing the enemy, but helping it spread its forces to other strongholds. Those cattle which reacted were promptly weeded out and disposed of.

Area Testing in 1921

The fighters of bovine tuberculosis, beginning July 1, 1921, marshalled their forces under one supreme command — the United States Department of Agriculture. Under this direction, a co-operative, area testing plan was worked out whereby the battles would be directed and waged systematically by trained fighters.

The battle front in Illinois grew from no counties conducting area work on July 1, 1921 to 61 testing on July 1, 1924. The first fiscal year ending July 1, 1922, brought Edgar (the first Illinois county to become accredited), McLean, Montgomery, Tazewell, and Woodford. The next year brought in Boone, Champaign, Crawford, Livingston, Vermillion and Whiteside counties. By July 1, 1923, Adams, Bureau, Christian, Clark, Coles, Cumberland, DeKalb, DeWitt, Douglas, Du Page, Ford, Fulton, Greene, Grundy, Hancock, Henderson, Iroquois, Jo Daviess, Kane, Kankakee, Kendall, Knox, Lake, LaSalle, Lee, Logan, Macon, Madison, Marion, Marshall, McDonough, McHenry, Menard, Mercer, Monroe, Morgan, Moultrie, Ogle, Peoria, Putnam, Rock Island, Scott, St. Clair, Stephenson, Wabash, Warren, Will and Winnebago counties.

Reactors Decreasing Now

During the three-year period from July 1, 1921 to July 1, 1924, instead of nine reactors in every hundred, there were only slightly more than five to the hundred. This means that the enemy is being pushed back.

M. H. Petersen, in charge of the tuberculosis eradication project of the Illinois Agricultural Association, has compiled the accompanying tables from data se-

Gougler; special representative on Tuberculosis Eradication, M. H. Petersen; Legal Counsel, Donald Kirkpatrick; Cooperative Accounting, Geo. R. Wicker.

A Powerful Organization

The Farm Bureau people of Illinois are welded together into what is probably the most powerful state farm organization in the United States. The unusual power of the Illinois Agricultural Association is largely due to the fact that each of the 63,000 Farm Bureau members pays $15 dues each year, of which $4.50 is retained by the state organization. That is the reason the Illinois Agricultural Association can take hold vigorously of many things which other state farm organizations must sidestep on account of lack of funds.

Outstanding among the services rendered by the Illinois Agricultural Association is the fair readjustment of farm taxes. In 1923, over two million dollars were saved to the farmers of Illinois by taxation alone. This department has started on the tremendous problem of making a thorough research, county by county. It has cost money, but the returns have been a hundredfold.

A live transportation department has been of great service, especially to live stock farmers, the savings during the current year being estimated at around a quarter of a million dollars.

Many Illinois farmers think that the greatest service rendered is the pooling arrangement for buying limestone and rock phosphate at the lowest possible price.

In addition to the services mentioned in the foregoing, the Illinois people assist in the usual extension work which characterizes Farm Bureau activities in the ordinary state. These services interest the average farmer greatly, although in the long run they tend to benefit financially the people in the cities as much as the farmers. In our opinion, the work done by the Illinois people on taxation and freight rates has been the outstanding contribution. This is the kind of work which so many state Farm Bureaus overlook because of the fact that they are under-financed or dominated by a state extension department which does not always have the strictly farmer point of view.

—Reprinted from Wallace's Farmer of Oct. 17, 1924.

Two Good Booklets

Two booklets, each of them telling of the accomplishments of the Farm Bureau, have been got out by the Knox and Iroquois County Farm Bureaus. One, that of the Knox County Farm Bureau, is entitled "Record and Some Accomplishments." It is filled with charts and figures showing activities and progress. Both books are good ones.

The Iroquois County Farm Bureau booklet is called "Ten Years of Service," and it opens with an appropriate moral which we wish to pass on to you:

"The Farm Bureau is here to stay.

"It is as necessary and fills as important a place in farming as the self binder.

"Our pioneer forefathers had few contacts with the outside world. Their problem was to subdue the prairies, drain the swamps, and produce the bare necessities of life for their families.

"Fortunately, their wants were few and easily satisfied; their pleasures were rare and their rewards small. It was a case of each man and each family fighting to wrest fuel, food and a home from the forces of nature. They lived in the age of the cradle, the reaper, the tallow dip, and the ox team.

"In the past century, we have passed from a nation producing food merely for ourselves to the surplus producing nation of the world.

"Every farmer in the United States produces an average of 12 tons of food per year. Farmers of the rest of the world produce only 1.4 tons of food per year.

"One-third of our population produces ample food for our own country with an ample surplus to export. In India 75 per cent and in Russia 85 per cent of the people are food producers.

"Improved machinery, improved seed, stock and methods in farming have been chief factors in this change.

"When we became a surplus-producing nation, we not only released half our farm population for other work, but we came into competition in the markets of the world with cheap labor living on low standards in other surplus producing countries.

"It is not mere chance that there are 15,000,000 automobiles in the United States: Nearly a third of which are on the farms. It is because of those economies and efficiencies in the production of the bare necessities of life, which release two-thirds of our population, that we are able to produce those things which add to the comfort and happiness of living.

"With these changes have come new problems—problems that the pioneer working alone could not solve. Individual effort must be replaced by co-operative effort.

"The Farm Bureau stands for progress, for adequate returns for our labor and products in order that we may maintain an American standard of living on our farms and in our farm homes."

—o—

About the Promises—

In this issue of the Record, the last one before the big election, there is extensive information regarding the agricultural leanings of the three presidential candidates as well as of the congressional candidates. Much of this information has been assembled by the American Council of Agriculture in the furtherance of its purpose of organization.

The more detailed data in the chart shows whether the Illinois Congressmen have consistently supported agriculture.

No effort is being made to interpret the information herein conveyed. There are many promises. Read over and study over the information and you will at least be better informed before you vote.

Better save this issue for future reference. The chart is specially valuable.

And don't forget to VOTE!

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national unit—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

Here are two letters. Read both of them. Do you get the moral?

Dear Sir:
I have been a member of the Farm Bureau for about five years and understand there is a Farm Adviser in our county, but am not acquainted with him.
Do not expect to sign again.
M. D. Frederick, Milledgeville, Ill.

There are two sides to every question. Before printing the above letter, we frankly asked the Farm Adviser in Mr. Frederick's county (Carroll) to reply. It follows:

Dear Mr. Butcher:
I have your letter about the copy you received from Mr. Frederick. You can readily understand, of course, how it is possible for a man to have this experience.
We have approximately a thousand members and a county agent always has lots of things to do aside from visiting his membership, so I practically never visit members except on request. Since this man has never requested a visit, and since he doesn't attend our meetings which we have held at Milledgeville, consequently, he hasn't come in contact with this office. The Farm Bureau proposition requires co-operation on both sides. The man who gets acquainted with us, naturally is going to get service, while the man who keeps himself aloof will get little from the county organization.
It might be well for you to emphasize these facts in your reply to Mr. Frederick. I am glad you told me of this instance; perhaps I will have an opportunity to drop in and see him.
With best wishes, I am
Sincerely yours,
G. R. Bliss, County Agricultural Agent.
Carroll County Farm Bureau.

The Farm Bureau it like a cafeteria; the food is there for you, but you have to help yourself.

We asked a few farmers what they considered the largest problem of agriculture today. Here are some of the replies:

Dear Sir: The largest problem of agriculture today is insidious competitors.
The farmer has many insidious competitors. They used to be grasshoppers, worms, English sparrows, chinch bugs and other insects which nearly subdued agriculture, but today agriculture is perpetually menaced on every side. When one enemy is overcome, new ones appear. Since the war the farmer's problem is to injunction by his insidious competitors, which are all classes of people living off him and giving him no return for his labor.
All classes of people in other occupations are receiving good wages and don't give a tinker's damn for the agricultural man.
E. G. Gum, Tamaico, Ill.

Dear Sir: The hardest problem I have is the money part of it. What ever we farmers have to sell we have to ask some man what he will give us and take his price. That price is whatever he is of a mind to give us—which generally is small prices. When we go to buy what we have to buy, such as fencing and grass seed, we have to ask some man what price he will take. I feel we will get along much better if all we farmers would get our shoulder to the wheel to get to where we can have some say-so about the price of what products we have to sell—our cattle, sheep, hogs and mules. I have some mules now I have fed two years and can't get a bid on them.
Sam C. Kelley, Goreville, Ill.

Dear Sir: In answer to your question "What is the largest problem of agriculture?"—there are many hard problems. The two largest in my estimation are how to secure a profitable production and how to put more business into marketing.
Dee Walters, Robinson, Ill.

Dear Sir: Received your letter of the 26th and will say in answer to your question that co-operative marketing seems in many ways. It saves buying some middle men commissions and also gets the farmers closer in touch with each other.
H. R. Hawkins, Bowan, Ill.

Dear Sir: I read the "Voice of the Members" letters in the last issue of the RECORD, and will say that among them are some good things to be noted. One thing to be remembered is the necessity of continuous effort. No organization ever won the first and last victory all at once.
Co-operative marketing is going to have a long, hard pull, but in time it may win. A national marketing machine will solve the problem. One obstacle in the way of co-operative marketing is that too much knowledge is obtained in advance as to how much grain is produced, and how many hogs and cattle raised, fed and fattened. These reports must be given but not broadcasted to all corners of the earth. Until the reports are regulated, the speculators have the advantage, for they can buy as they get the reports.
We have been talking co-operative marketing, but what has been done? Just as soon as anyone tries to do something someone else tries to blow the whole thing up. The U. S. Government could set up the machinery if it would do so and bond officers to do bidding as it should be done. The bureaus are in their infancy as yet—just beginning to crawl. Soon they will walk and talk.
Albert W. Koeber, Hamilton, Ill.

Now then, Mr. Farm Bureau member, you have read what these men have written—what do YOU think? Write your thoughts on paper and send them in for this column. We can print a few each time.—Editor.

THE LIARS' CONTEST

SOME MORE OF ELMER'S INVENTIONS

Dear Editor:
About a year ago, while I was at the International Live Stock Show, I visited Swift's packing plant. The superintendent told me they saved everything of the pig but his squeal and the curl in his tail.
I thought, "What an economic loss!" Being of a scientific and investigating turn of mind, I decided to see if I couldn't cash in on these by-products. I found there was a substance in the pig's tail which caused it to curl. I used this extract of pig's tail and produced the "Wonderful Pigtail Marceller."
Now the ladies, instead of paying $25 for a permanent wave, can buy a $2.00 bottle of "Pigtail Marceller," and their hair will have as many waves as the ocean.
A friend of mine sent his girl a bottle. As they use their clock for a medicine chest, she set it in the clock and it wound up the clock so tight it wouldn't run 'til they took the bottle out. Now when he wants the clock wound he uncorks the Pig-tailer and it's wound for eight days. He tried it on his watch, too, but it put a marcel in the hair-spring and cost him $5 to get it fixed.
I next investigated the pig's squeal. I found that when a pig gets hungry there is a certain gland which secretes in the stomach and causes the pig to squeal.
A noted criminologist says this is the most outstanding discovery since the fingerprint.
Whenever a criminal is captured we put him on a starvation diet, shoot some "Squeal Secretion" into him, and he will invariably squeal on his comrades, and the whole caboodle are soon put in the pen.
Elmer Waddell, Taylorville, Ill.

(Mr. Coolidge—Continued)

Northwest. The Intermediate Credit banks have loaned over $86,000,000 to individuals and co-operative marketing associations, which assisted directly and indirectly over 500,000 farmers.

Notwithstanding all this, agriculture was subjected to an era of most serious depression. Several of its great staples like cotton, cattle, hogs, corn, and wheat, suffered from low prices, due to overproduction, unbalanced conditions between costs and sale prices in agriculture, industry, and labor, and the disorganization of the markets of the world. But for the enormous buying power which the high wages of industry put behind the market for American food products, especially meat, the agricultural regions would have experienced even a far more severe financial crisis.

Due to a change in the world supply, prices of products have begun to improve, even so far as to increase land values. The government rendered a great deal of assistance and private enterprise co-operated, but the fundamental remedy was provided, as it always must be provided, not so much through the enactment of legislative laws as through the working out of economic laws. Because the farmers have thoroughly realized this, they have on the whole opposed price fixing by legislation. While maintaining that sound position, they have seen a partial relief come in a natural way, as it was bound to come.

We now need in agriculture more organization, co-operation, and diversification. The farmer should have the benefit of legislation providing for flood control and development of inland waterways, better navigation east and south from the Great Lakes, reclamation, and especially relief for those who can not meet their payments on irrigation projects. But the main problem is marketing. Co-operative effort, re-organization of the freight-rate structure, good business, and good wages in manufacturing, and the settlement of European affairs will all help to provide better market conditions.

The Republican platform recognizes that agriculture should be on a basis of economic equality with other industries. This is easy to say, but the farmers themselves and their advisers have never been able to agree on a plan to provide it by law. Now that nature and economic law have given some temporary relief, I propose, therefore, to appoint a committee to investigate and report measures to the Congress in December that may help secure this result which we all desire. I want profitable agriculture established permanently. I want to see the dollar of the farmer always purchase as much as any other dollar.

A wise, skilled, and unselfish leadership can do more than anything else to rescue agriculture. The farmer needs leaders who will stay with him, who have tact and the courage necessary for management, and who have the fidelity to refuse political preferment and business opportunity. There are such leaders. In the sacrifices they make to serve the farmer lies the greatest hope for his salvation.

(Mr. La Follette—Continued)

the appearance last winter in Washington of the leaders of practically all of the farm organizations of the country standing together shoulder to shoulder asking for legislation which would give some measure of relief to the basic industry of agriculture. I recognized there at that time the representatives of the great national organizations such as:

American Farm Bureau Federation.
American Wheat Growers Associated, Inc.
Farmers' Educational and Co-operative Union of America.
National Grange.
National Live Stock Producers Association.
National Producers' Alliance.
National Co-operative Milk Producers' Federation.

Representatives of the state farm bureau organizations of the great corn belt states were also on hand and were unanimous in their support. Progressive business men who dared to speak in opposition to the speculative system too were present and gave valuable aid to the farmers.

It is inconceivable that the matured judgment of the organized agricultural movement of the country could have been treated with the utter disdain which was accorded to the farm relief measures, by both of the major political parties at the last session of Congress. It is gratifying that the farmers can put the responsibility for the failure of farm relief legislation just where it belongs. President Coolidge himself sounded the death knell of legislation for the relief of agriculture in his first message at the opening of the last session of Congress.

The combination of the reactionary leaders of both parties to defeat farm relief legislation in Congress furnishes an example of what I mean by the monopoly control of both the Republican and Democratic parties and of the government itself. If further proof was needed to convince the American people that both parties are in complete control of the monopoly system, your experience last winter in Washington should be sufficient.

We must increase the purchasing power of the farmers' dollar. The low exchange value of the farmers' products is appalling. My attention has recently been called to the figures prepared by the National Industrial Conference board showing the exchange value per acre to the farmer. Articles bought by the farmers at retail rather than at wholesale prices were used as the bases of computation. The exchange value for the last four years compared with 1914, on wheat, corn, beef cattle and hogs were as follows:

	1914	1920	1921	1922	1923	Average
Wheat	100	54	41	46	41	45
Corn	100	58	48	63	69	57
Beef Cattle	100	60	50	49	48	51
Hogs	100	76	59	62	51	62

4-Year average 53

Such a deep seated distressing condition stretching over several years is not to be remedied by a temporary flurry in the speculative market caused by a world shortage and accentuated by an easy money market inviting speculation. Farmers are entitled to their prudent cost of production plus a reasonable profit for their products.

Congress would be in session today working for the relief of agriculture and for the settlers on reclamation projects if the resolution, which I introduced and forced to a roll call just before the adjournment of the last session, had been adopted. This resolution provides that Congress should be called together in special session and should not adjourn until legislation for the relief of agriculture and the reduction of freight rates had been enacted.

You may say to the members of the great farm organizations which are now banded together to demand relief to agriculture that if the progressives are invested with the responsibility of administration of this government that we will do more than enact legislation such as is contemplated in the McNary-Haugen and Norris-Sinclair bills.

The Federal Reserve act shall be so amended and administered as to render it impossible for a deflation policy such as was instituted in 1920 by the Democratic administration and carried out by the present Republican administration which paralyzed agriculture throughout the country. Such an infamous crime, must never again be perpetrated.

Freight costs upon agriculture and upon business generally will be reduced. The Progressives are pledged to the repeal of the Esch-Cummins law.

The Fordney-McCumber tariff which adds millions to the cost of living of the farmers and the people generally over and above reasonable protection to American industry will be reduced.

Genuine farmer representation will be given to the farmers of the United States on the Interstate Commerce commission, the Federal Reserve board and all of the other governmental boards and commissions which vitally concern the farmers.

The Progressives recognize the great strides which have been made by the farmers themselves through co-operative marketing. It shall be our purpose if invested with power to render every assistance of the government during the transition period from the speculative system of marketing to the co-operative system of distribution of the farm products of the country. It is in the co-operative system that lies the path to complete emancipation of the farmer of the country. The farmers' co-operative system must not fail. With co-operative marketing organizations financed by co-operative banks and credit institutions all in the hands of the farmers themselves, it will not fail.

With kindest personal regards to yourself and to the members of the great organizations for which you speak, I am

Yours very sincerely,
(Signed) Robert M. La Follette.

(Mr. Davis—Continued)

To secure for the farmer credits suitable for his needs.

This is our platform and our program; and, if elected, I propose with the aid of a Democratic Congress to put it into effect.

This program is made up of both administration and legislation. I am not sure that of these, honest and effective administration is not the more important. No law, however beneficial in its purposes, can accomplish good results if it is badly administered. It is quite as important to the farmers of the United States that existing agencies should be administered to their interest as it is that new laws should be passed for their aid and benefit.

While the farmer shares the general interest of every citizen in good government he has a peculiar interest in some of its activities. The Department of Agriculture, created in 1889 under a Democratic president, and presided over in its early days by a great citizen of Nebraska, J. Sterling Morton, has done much for the welfare of the American farmer. Unquestionably, it can and it should do more. It has devoted the larger share of its activity in the past to problems of production; it should be stimulated now to think in terms of marketing and distribution.

The farmer should be aided in the study of his costs and assisted in building up nation-wide systems of co-operative marketing. The Department should be rid of political influence, and presided over by a Secretary competent, courageous and loyal to the best interests of agriculture, and care should be taken to see that its entire personnel is of the same character.

(Mr. La Follette—Continued)

Council Asks: "Would You Call Special Session?"

Under date of Oct. 6, 1924, the American Council of Agriculture, through R. A. Cowles, secretary, wrote identical letters to each of the three presidential nominees asking the attitude of each toward the calling of a special session of Congress if adequate agricultural legislation is not passed in the December session. The replies excepting that of Mr. La Follette which is embodied in his letter to Mr. Cowles, beginning in the middle of page 3, column 1, to these letters are as follows:

(TELEGRAM)

1924, Oct. 20, P. M. 9:31.

Nashville, Tenn., 20.
Hon. Lincoln Dixon:

Democratic headquarters Auditorium Hotel, Chicago, Ill.—You are authorized by me to inform the American Council of Agriculture or any one else that if I am elected president of the United States I will call a special session of Congress for the purpose of considering the legislative needs of the country and those questions of pressing importance. Among the most vital of these are the steps to be taken on behalf of agriculture and those engaged in that fundamental industry.

John W. Davis.

THE WHITE HOUSE
Washington, October 13, 1924.

My Dear Mr. Cowles:

Your letter of October 6th which was sent to the President by the direction of the American Council of Agriculture, has been received and noted. In reply, your attention is called to the Platform of the Republican Party and also to the President's Speech of Acceptance, copies of which I enclose, showing the President's attitude towards agriculture.

Sincerely yours,
(Signed) C. B. Slemp,
Secretary to the President.

Mr. R. A. Cowles, Secretary,
American Council of Agriculture,
Chicago, Illinois.

THE WHITE HOUSE
Washington, October 20, 1924.

My Dear Mr. Peek:

I have your letter to the President, asking him to give assurance that in the event of his election, and in the further event that the next session of Congress shall fail to enact remedial legislation dealing with the agricultural depression, he will call a special session of Congress after March 4th, for the purpose of dealing with this situation.

While it would be improper to pledge the Presidential office a long time in advance to the calling of special sessions of the Congress, you are at liberty to say that the President would at all times take every reasonable government action to promote the welfare of agriculture. He has every expectation that whatever legislation may now be required will be enacted at the next session of the Congress.

Most sincerely yours,
(Signed) C. B. Slemp,
Secretary to the President.

Mr. George N. Peek,
President, American Council of Agriculture,
Chicago, Illinois.

How Illinois Congressional Candidates Stand

This information has been compiled and furnished by the American Council of Agriculture to its member organization, the Illinois Agricultural Association, for the information of its Farm Bureau members and other friends of agriculture.

The following candidates for re-election to Congress from Illinois supported and voted for the McNary-Haugen bill, which was designed to give agriculture equality with industry and labor, in the last session of Congress and thereby showed themselves as favorable to the enactment of legislation to place agriculture on an equality with industry and labor:

Frank R. Reid, Aurora	11th dist.
Chas. E. Fuller, Belvidere	12th dist.
Edw. J. King, Galesburg	15th dist.
Wm. E. Hull, Peoria	16th dist.
Frank H. Funk, Bloomington	17th dist.
Wm. P. Holoday, Georgetown	18th dist.
J. Earl Major, Hillsboro	21st dist.
Wm. M. Arnold, Robinson	23rd dist.
Thos. S. Williams, Louisville	24th dist.
Edw. E. Denison, Marion	26th dist.
Rich. B. Yates, Springfield	At Large
Hy. R. Rathbone, Kenilworth	At Large

The following candidates for election to Congress from your state have made formal expression to the American Council of Agriculture of willingness to vote for and support legislation that will afford agriculture equality with industry and labor:

Elmer Whitmore, Chicago	1st dist.
John P. Reed, Chicago	10th dist.
Geo. Chant, Elmhurst	11th dist.
Wm. G. Curtis, Stockton	13th dist.
W. A. Schaeffer, Rock Island	14th dist.
H. E. Schmiedeskamp, Quincy	15th dist.
Frank H. Funk, Bloomington	17th dist.
Harry A. Crawford, Lincoln	17th dist.
Jas. P. Miller, Ridgeville	18th dist.
Edw. F. Poorman, Mattoon	19th dist.
Guy L. Shaw, Beardstown	20th dist.
Hy T. Rainey, Carrollton	20th dist.
J. Earl Major, Hillsboro	21st dist.
Roy F. Boyd, Madison	22nd dist.
H. L. Boillinger, Salem	22rd dist.
D. W. Kennedy, DuQuoin	25th dist.
Hy. R. Rathbone, Kenilworth	At Large

The following candidates for re-election to Congress from your state opposed the enactment of the McNary-Haugen bill in the last session of Congress.

Morton D. Hull, Chicago	2nd dist.
E. W. Sproul, Chicago	3rd dist.
Thos. A. Doyle, Chicago	4th dist.
A. H. Sabath, Chicago	5th dist.
Jas. R. Buckley, Chicago	6th dist.
M. A. Michaelson, Chicago	7th dist.
F. A. Britten, Chicago	9th dist.
C. R. Chindblom, Chicago	10th dist.
Hy T. Rainey, Carrollton	20th dist.

The following candidates for re-election to Congress from your state failed to vote on the enactment of the McNary-Haugen bill in the last session of Congress and have not otherwise given indication of their position as favoring the enactment of legislation to place agriculture upon an equality with industry and labor:

Martin B. Madden, Chicago	1st dist.
Stanley H. Kunz, Chicago	8th dist.

Council Gives "Agricultural Equality Report"

This report is furnished by the American Council of Agriculture to its member organization, the Illinois Agricultural Association, for the information of Illinois farm bureau members and other friends of agriculture. (It will be remembered by farm bureau members that the American Council of Agriculture was formed last spring at the St. Paul conference after the defeat of the McNary-Haugen bill. The sole purpose of the Council was definitely made to be the obtaining of legislation putting agriculture on an equality with industry and labor along the lines of the McNary-Haugen bill. The Council has been active and has secured pledges favorable to agricultural equality from Congressional candidates all over the country. This report covers the Council's activity in Illinois.)

"Agriculture asks an American price for the American requirement, independent of the world price for the surplus," is the slogan of the American Council of Agriculture.

Following are the three party platforms on agriculture:

Republican

In dealing with agriculture, the Republican party recognizes that we are faced with a fundamental national problem, and that the prosperity and welfare of the Nation as a whole is dependent upon the prosperity and welfare of our agricultural population.

We recognize that agricultural activities are still struggling with adverse conditions that have brought deep distress. We pledge the party to take whatever steps are necessary to bring back a balanced condition between agriculture, industry and labor, which was destroyed by the Democratic party through an unfortunate administration of legislation passed as war measures.

We affirm that under the Republican administration the problems of the farmer have received more serious consideration than ever before, both by definite executive action and by congressional action, not only in the field of general legislation but also in the enactment of laws to meet emergency situations.

The restoration of general prosperity and of the purchasing power of our people through tariff protection has resulted in an increased domestic consumption of food products, and the prices of many agricultural commodities are above the world price level by reason of direct tariff protection.

Under the leadership of the President at a most critical time a corporation was organized by private capital making available $100,000,000 to assist the farmers of the Northwest.

Realizing the disturbance in the agricultural export market, the result of the financial depression in Europe, and appreciating that the export field would be enormously improved by economic rehabilitation and the resulting increased consuming power, sympathetic support and direction were given to the work of the American representatives on the European Reparations commission.

The revival in 1921 of the War Finance corporation, with loans of over $300,000,000, averted a complete collapse in the agricultural industry.

We have established new intermediate credit banks for agriculture and increased the capital of the Federal Farm Loan system. Emergency loans have been granted to drought-stricken areas.

We have enacted into law the Co-operative Marketing act, the Grain Futures and Packer Control acts; given to agriculture direct representation on the Federal Reserve board and on the Federal Trade commission.

We have greatly strengthened our foreign marketing service for the disposal of our agricultural products.

The crux of the problem from the standpoint of the farmer is the net profit he receives after his outlay. The process of bringing the average prices of what he buys and what he sells closer together can be indirectly expedited by reduction in taxes, steady employment in industry and stability in business. This process can be directly expedited by lower freight rates, by better marketing through co-operative effort and a more scientific organization of the physical and human machinery of distribution and by a greater diversification of farm products.

We promise every assistance in the reorganization of the marketing system on sounder and more economical lines and, where diversification is needed, government assistance during the period of transition.

We favor adequate tariff protection to such of our agricultural products as are threatened by foreign competition.

We favor, without putting the government into business, the establishment of a federal system of organization for co-operative marketing of farm products.

The vigorous efforts of this administration towards broadening our exports market will be continued.

The Republican party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industry to insure its prosperity and success.

Progressive

We favor drastic reduction of the exorbitant duties on manufactures provided in the Fordney-McCumber tariff legislation, the prohibiting of gambling by speculators and profiteers in agricultural products; the reconstruction of the Federal Reserve and Federal Farm Loan systems so as to eliminate control by usurers, speculators and international financiers, and to make the credit of the nation available upon fair terms to all and without discrimination to business men, farmers and homebuilders. We advocate the calling of a special session of Congress to pass legislation for the relief of American agriculture. We favor such further legislation as may be needful or helpful in promoting and protecting co-operative enterprises. We demand that the Interstate Commerce commission proceed forthwith to reduce by an approximation to pre-war levels the present freight rates on agricultural products, including live stock, and upon the materials required upon American farms for agricultural purposes.

Democrat

During the four years of Republican government, the economic condition of the American farmer has changed from comfort to bankruptcy, with all its attendant miseries. The chief causes of this are:

(a) The Republican party policy of isolation in international affairs has prevented Europe from getting back to its normal balance, and, by leaving unsolved the economic problems abroad, has driven the European city population from industrial activities to the soil in large numbers in order to earn the mere necessaries of life. This has deprived the American farmer of his normal export trade.

(b) The Republican policy of a prohibitive tariff, exemplified in the Fordney-McCumber law, which has forced the American farmer, with his export market debilitated, to buy manufactured goods at sustained high domestic levels, thereby making him the victim of the profiteer.

(c) The Republican policy of high transportation rates, both rail and water, which has made it impossible for the farmer to ship his produce to market at even a living profit.

To offset these policies and their disastrous results, and to restore the farmer again to economic equality with other industrialists, we pledge ourselves:

(a) To adopt an international policy of such co-operation by direct official instead of indirect and evasive unofficial means as will re-establish the farmer's export market by restoring the industrial balance in Europe and the normal flow of international trade with the settlement of Europe's economic problems.

(b) To adjust the tariff so that the farmer and all classes can buy again in a competitive manufacturer's market.

(c) To readjust and lower rail and water rates, which will make our markets, both for the buyer and the seller, national and international, instead of regional and local.

(d) To bring about the early completion of internal waterway systems for transportation and to develop our water powers for cheaper fertilizer and for use on our farms.

(e) To stimulate by every proper governmental activity the progress of the co-operative marketing movement and the establishment of an export marketing corporation or commission, in order that the exportable surplus may not establish the price of the whole crop.

(f) To secure for the farmer credits suitable for his needs.

(g) By the establishment of these policies and others naturally supplementary thereto to reduce the margin between what the producer receives for his products and the consumer has to pay for his supplies, to the end that we secure an equality for agriculture.

What the Three Candidates Say For Agriculture

Mr. Coolidge

(From his address of acceptance, Aug. 14, 1924.)

I am for protection because it maintains American standards of living and of business, for agriculture, industry and labor. I am in favor of the elastic provisions of our tariff law. I propose to administer them, not politically, but judicially. As the business of the world becomes stabilized, without throwing all our economic system into confusion, we can raise or lower specific schedules to meet the requirements of a scientific adjustment.

I confess that my inheritance and personal experience have bred in me a keen interest in the welfare of agriculture. Perhaps the very hardships that those who have been engaged in it have encountered have caused it to be the chief source of that independence and stalwart citizenship which has contributed so lavishly to the glory of American life. It constitutes an element in our Nation of such importance as to be worthy of the utmost solicitude and concern. One of our first thoughts in 1921 was for its relief and revival. As many as 15 laws have been passed to assist and support this fundamental industry. Through the War Finance corporation it has been extended credits of between $300,000,000 and $400,000,000. In addition to this, government activity provided about $50,000,000 from private sources for the relief of the cattle industry, and in the early spring of this year a $10,000,000 corporation was formed, which it was estimated could furnish $100,000,000 for diversification and financial relief in the

(To Mr. Coolidge—Page 4.)

Mr. La Follette

Sioux Falls, So. Dakota,
October 18, 1924.

Mr. Robert A. Cowles, Secretary,
American Council of Agriculture,
1200 Transportation Building,
Chicago, Illinois.

My Dear Mr. Cowles:—

Your kind letter of October 6th has been received, asking if I am elected President whether I would further the enactment of adequate laws insuring equality for agriculture, and specifically in the event of the failure of the short session of Congress to enact such remedial farm relief legislation, whether I shall call a special session of Congress to enact such legislation.

I have already answered both of your questions. In my public addresses throughout the country I have stated, and I now repeat that I stand firmly for the principle of agricultural equality which underlies both the McNary-Haugen and Norris-Sinclair bills.

I recognize that the paramount immediate issue before the people of this country today is the restoration of agriculture. To that end I shall call a special session of Congress to pass legislation for agricultural relief.

Much has been said by those who have sought to becloud the issues involved in farm relief legislation that the farmers themselves were not in agreement on the subject. During my rather extended service in the Senate, I have seen nothing more heartening than

(To Mr. La Follette—Page 4.)

Mr. Davis

(From his Omaha address.)

The Democratic party has a definite program by means of which we hope to restore the farmer to the economic equality of which he has been unjustly deprived. We undertake:

To adopt an international policy of such co-operation, by direct official instead of indirect and evasive unofficial means, as will re-establish the farmer's export market by restoring the industrial balance in Europe and the normal flow of international trade with the settlement of Europe's economic problems.

To adjust the tariff so that the farmer and all other classes can buy again in a competitive market.

To reduce taxation, both direct and indirect, and by strict economy to lighten the burdens of government.

To readjust and lower rail and water rates, which will make our markets, both for the buyer and the seller, national and international instead of regional and local.

To bring about the early completion of internal waterways systems for transportation, and to develop our water powers for cheaper fertilizer and use on our farms.

To stimulate by every governmental activity the progress of the co-operative marketing movement and the establishment of an export marketing corporation or commission in order that the exportable surplus may not establish the price of the whole crop.

(To Mr. Davis—Page 4.)

FARMERS TALK OVER VARIOUS PROBLEMS AT DISTRICT MEET

Workman's Compensation Law, Poultry Marketing and Live Stock Matters Are High Lights

Farmers from Clay, Gallatin, White, Saline, Johnson, Pope and Edwards counties, meeting at Shawneetown, Oct. 14, for their third district Farm Bureau conference of the year, discussed a variety of farm problems, chief of which were the Workman's Compensation Law as it is related to the Farm Bureau, Shipping associations, individual farmers and live stock producers; poultry and egg marketing, led by F. A. Gougler, director of I. A. A. poultry affairs; and live stock shipping association questions of bookkeeping and pro-rating.

At the morning session of the conference, Farm Bureau representatives discussed informally the Workman's Compensation Law, which protects employees in case of injury sustained while discharging regular duties for their employer. Questions as to the liability of individual farmers and farmers' co-operative organizations were raised. Thos. A. Daily, local lawyer, expressed the opinion that farmers are not affected by the law in their individual business but become liable when their co-operatives hire employees.

To Protect Advisers

The delegates suggested that a blanket insurance policy should be obtained for the protection of farm advisers. Such a blanket policy has been arranged by the I. A. A. to protect co-operative shipping association managers.

At the afternoon meeting, Mr. Gougler talked on several phases of the poultry business. He first explained methods of feeding hens to increase egg production, giving several balanced ration formulas for scratch feeds and bran mashes.

"If you want to make your hens lay you've got to make them exercise," he said. "That's why a scratch feed of corn chop, whole oats and whole wheat should be fed in a litter of straw where the hens will have to exercise to get it."

One-half Non-layers

In answer to the question of which is most important—culling the laying flock or proper feeding—Mr. Gougler said that in the average farm flock 50 per cent of the hens could be eliminated as non-layers, which makes the practice of culling a very important one.

A dry mash of bran, shorts, corn meal and tankage is also essential for the laying flock, according to Mr. Gougler. Skim milk or good buttermilk can take the place of tankage.

Mr. Gougler predicted that co-operative egg marketing is coming within a very few years and described a plan for marketing eggs co-operatively in Illinois. "Three things are essential for successful co-operative egg marketing," he said. "First, volume of business; second, good roads over which to haul the eggs to local markets, and third, good rail transportation to central markets."

Next Meet at Vienna

The next 24th district conference will be held at Vienna, Johnson county, Dec. 2.

Included in a set of resolutions passed by the conference were the following:

Be it resolved that the I. A. A. be urged to investigate the proposition of working men's compensation insurance for farm advisers and shipping association employees.

Be it resolved that the members assembled go on record as indorsing the plan of co-operative egg and poultry marketing as laid out by F. A. Gougler.

Whereas there will come before the next session of the Illinois legislature for ratification or rejection the so-called child labor amendment to the constitution of the United States and whereas this amendment is a clear evasion of the rights of the individual states and even of the individual citizens of the states and is destined to train our children for a life of idleness rather than a life of honest labor without which the business of Agriculture can never succeed, therefore

Be it resolved that the delegates to the 24th District Conference of the Illinois Agricultural Association go on record as opposed to this amendment and urge the loyal Farm Bureau members to join with the I. A. A. in actively opposing the amendment.

The following delegates and members were present; Gallatin County, Geo. Scherrer, M. Feehrer, L. L. Pinnell, Robt. Crunk, Thos. Aud, Geo. Gabel, Arthur Maloney, R. J. Awalt, M. Henson, Thos. Daily, T. C. Downen, Floyd Ramsey, Preston Elliott, C. W. Simpson, Harry Scott, M. Wiseheart, Frank Gabel, Jno. Coleman, Chas. Green, Mrs. Chas. Green.

Saline County: P. T. Baker, and Adviser J. E. Whitchurch.

White County: Ed. Creighton, Otto Casebier, and John A. Puntrey.

Edwards County: Bert Perkins.

Johnson County: Norman Casper, Charles Marshall, and James G. McCall.

Clay County: Curt Anderson.

Pope County: L. Kimmel and A. H. Floyd.

Egyptian Seed Co-op Grows

"Our membership has voluntarily increased twelve and one-half per cent since the opening of the harvest season," says Curt Anderson, I. A. A. director from the 24th district, in describing the condition of the Egyptian Seed Growers association, of which he is manager.

The Egyptian Seed Growers, with a membership of about 800, markets 35 per cent of the red top seed produced in southeastern Illinois.

The U. S. department of agriculture is putting on an intensive campaign to eradicate common barberry from Mason county.

Farmers in Iroquois county have ordered 800 tons of limestone through their Farm Bureau.

Ninety per cent of the cattle in Grundy county have been tested for tuberculosis.

Chicago Producers Get More Praise

"Of all the concerns handling live stock on the Chicago market, the returns sent in by the Chicago Producers on reacting cattle to my office are among the most complete and prompt," says J. J. Lintner, inspector in charge of tuberculosis eradication in Illinois. "Such co-operation makes it possible to get indemnity returns back to the farmer in a short time."

Agriculture Must Depend Upon Its Own Forces, Cowles

"Restoration of agriculture to a position of economic parity with industry and labor under our American protective system—stabilized on a basis of fair returns and remuneration to those engaged in agriculture—is the greatest immediate problem of all farm organizations," R. A. Cowles, I. A. A. treasurer, said in a talk broadcast from station WLS, Oct. 21.

"Since harvest there has been substantial improvement in the prices of small grain," he said in part. "This reflects direct world crop conditions as may be noted from the many reports appearing in the press. Some European countries have suffered failure in their wheat crop as well as in substitutes for wheat with serious shortage occurring in exportable surplus of other countries, notably in Canada. It appears that our farmers are to benefit through the misfortunes of the European farmers and not through any happenings over which they, or their farm organizations, have control. The same conditions that have brought about temporary price improvement—world's crop conditions—are as likely to bring about the reverse conditions next crop season. There can be no assurance of a continuation of stability of present prices.

"There should be no misinterpretation by farmers or farm organizations of existing conditions.

"The problem confronting agriculture is the nation's problem. But the nation—our Congress and the administration charged with the responsibility of government—or any group other than agriculture is not going to restore agriculture to stability. Agriculture must depend upon its own forces and upon an agricultural-minded Congress.

"It is the duty of every farmer to work for and secure the election of congressmen, without regard to party label, who have proven themselves to be sensible to the serious situation existing in agriculture."

WICKER TELLS HOW TO PLUG LEAKS IN CO-OPS

George R. Wicker, director of co-operative accounting and general manager of the Illinois Agricultural Co-operatives Association through which the newly created I. A. A. accounting department audits and renders business advisory service to 74 organizations, all of which have joined since spring, put some of his long years of experience with co-operative enterprises into the air Tuesday night, Oct. 21, when he told of "Plugging Leaks in Co-ops" over the KYW Farm Bureau program.

"Inadequate capitalization is one of the leading causes of co-op disasters," he said in opening. "It results in incurring a burden of indebtedness in the early stages of the organization which weakens its structure and is a constant and often an increasing drain on its resources. In an enterprise requiring facilities or an investment in merchandise, adequate capital should be provided, and further provision should be made for increasing the investment by retaining each year a portion of the net income resulting from operations. The accumulation of surplus is sound financing for the accommodation of increasing business and is a provision reserved from conditions of prosperity to meet the possibility of losses in times of adversity.

Co-ops Too Liberal With Cash

"One of the most commonly abused practices by co-operatives," he continued, "particularly those engaged in merchandising operations, is the indiscriminate extension of credit. It is a common occurrence to find accounts receivable on their books in an amount greater than their paid in capital. The percentage of losses from uncollectible accounts is generally not large, but the loss of the use of capital tied up in inactive accounts, computed in terms of current rates of interest, is a drag upon the life blood of the association.

"Probably the greatest and most direct cause of failure is mismanagement. There is nothing magical in co-operation. The principals are not endowed with any inherent assurances of success. In co-operatives, as in other privately owned enterprises, success is dependent upon wise administration and efficient management. Proper organization and sufficient capital are only the instrumentalities through and with which co-operative associations seek to accomplish certain and definite purposes for which they are organized.

Need More Than High Ideals

"High ideals and unselfish purpose constitute a most excellent background—but business, under competitive conditions, the success or failure of which is measured in dollars and cents, requires ability, training and experience, and the employment of recognized high standard business methods. It is encouraging to note that co-operatives have recognized this fact and that today there is a widespread and growing interest on the part of officers, managers and members to look into better business methods, better accounting practices, and the study of proper financing.

"Some co-operatives have failed. That fact is neither surprising nor alarming, since bank failures are more numerous than failures of co-operatives. On the whole, the co-operative movement has been remarkably successful.

"It is my opinion, after many years of active and varied experience, that co-operative organization, recognizing the reward of individual effort with a fair return to capital employed, all subject to collective control for proportionate benefits, offers the only solution to a present problem, and is the hope of a successful agriculture. And so, with faces set toward the attainment of high ideals but with our feet planted firmly on the ground of conservative, constructive, practical effort, co-operative organizations will find a place in the industrial life and activities of the Nation as successful participants of the greatest business on earth — that of furnishing the food and clothing supply of the human family."

Complete 31 Audits

The Illinois Agricultural Co-operatives Association, the six-months' old farmers' co-operative auditing company, has completed audits for 31 member organizations, says Geo. R. Wicker, manager. Five association auditors have made 31 examinations and are at present in the midst of 11 more. The accounts of the Chicago Producers are among the 11 and next month will see the completion of an audit for the National Producers.

Mason county farmers ordered 2,000 tons of limestone through the Farm Bureau during September.

The College of Agriculture will conduct a campaign this winter to replace scrub bulls with good purebred sires.

The second annual Swine Day will be held at the University of Illinois, Oct. 31.

Jersey county farmers sowed 1,500 acres of alfalfa this year.

THREE-YEAR CYCLE OF REORGANIZATION WINDS UP THIS YEAR

Membership Drives by Local Farm Bureau People Is One I. A. A.'s Best Assets, Thinks Metzger

Editor's Note: This is the fifth of a series of similar articles to be written by I. A. A. department directors telling of the work done in each department.

By G. E. Metzger,
Director, Organization Department

The organization department occupies a responsible position among the other departments of the Illinois Agricultural Association. Since the income of the Association is dependent entirely upon the membership dues, the size of the membership in the Association controls pretty largely the finances of the organization, the size of the budget, the amount and kind of services and the general moral strength which every organization must have to make it a successful going institution.

G. E. Metzger

The policy of the Illinois Agricultural Association is such that any farmer residing in any county which has an organized county Farm Bureau must be a member of that county Farm Bureau to become a member of the state Association. In counties without county Farm Bureau organization, or in a few counties with county Farm Bureau organizations which are not affiliated with the I. A. A., a farmer may become a member of the state Association independent of membership in a county Farm Bureau.

Co-operation with Local Bureaus

Such being the policy of the Association it becomes necessary and desirable that the organization department in all its membership work co-operate very closely and thoroughly with the county Farm Bureau organizations. In the past that co-operation has been both pleasant and fruitful. Joint memberships are written in the county and national organizations for a period of three years. In 1922, 39 counties came up for reorganization, in 1923, 45 counties, and 1924 is considered by the department as a lean year, as only eight counties had to reorganize so that at this time the three-year cycle of reorganization is almost completed.

The Reorganization Plan

It necessarily follows that where the reorganization of ninety-two county Farm Bureaus is involved, conditions in those counties will vary somewhat and any plan that is going to be successful must necessarily be general in its terms and must be broad enough to be adapted to fit local conditions. It is the work of the organization department to make a survey of the field and determine as accurately as possible what the conditions are in the various counties and, after the survey has been completed, formulate a plan which can be followed throughout the state and be workable in all counties and will meet with general satisfaction in the north end of the state or the south end, or on the east or west sides.

Two general plans have been followed during the past six years in the organization work in this state. The first plan involved a number of paid state solicitors who went out in teams and signed up membership in the county. This plan was successful in building a strong organization which functioned throughout the first three-year period in a very satisfactory manner.

Local People Sell Bureau

The second plan, which is now in use, in fundamentally different from the first in that it provides that the local people in any given community should take care of the signing up end of the work. In the first place it places the responsibility where it belongs, on the local community. Secondly, if properly administered it tends to bring before the leaders in various communities of the state the active work of the county and state organizations and get it so clearly defined in their minds that these leaders function more or less in the capacity of a walking encyclopedia who can give out a lot of general information to the inquiring Farm Bureau members, Non-Farm Bureau members or business men.

After a three-year trial of this plan, I consider that the participation of 3,500 to 4,000 farmers, who actually put over the membership drives in this state, is one of the greatest assets of the Illinois Agricultural Association.

I heard a writer of the economist's column of a great newspaper say the other day, that it was largely his business to gather the information published by other economists and jazz it up in such a way that a greater per cent of the reading public would digest these facts.

Assembles Selling Points

I believe the position of the director of organization is somewhat similar to this writer, as it seems to be necessary that the department assemble the detailed information from the other departments of organization and from the county Farm Bureaus and put it in such form that it can be used as a talking or selling point.

It has been said that to sell well one must be thoroughly sold himself. This is exactly what the department of organization tries to do at all times and it is the fundamental principle upon which the department is based.

To be a good Farm Bureau member every farmer should at least have an understanding of the general problems which confront him. I believe these problems can be well sized up under about four heads:

Legislation — One Big Problem

First, is the matter of legislation. Up until the last few years the middle west farmer has not thought much of the importance of legislation with respect to his business. Through organization industries learned this lesson long ago. It was not until the farmer attempted to solve some of the big problems in an organized way that he conceived the importance of legislation to his industry. Many of the failures of farmers' co-operative organizations in the past have been largely due to the fact that they did not have adequate legislation for legal protection. A great deal of that immediately necessary legislation has been secured by farmers' organizations presenting such needs before national and state legislatures.

Distribution—Second Problem

Perhaps the second great problem of the farmer is the matter of distribution of his own products. This matter might be approached from several angles, the most important of which perhaps is co-operative marketing. The transportation of these products is another important phase of distribution. It has long been recognized by agricultural leaders that if the farmer is to succeed in stabilizing the commodities of his own production that it is going to be necessary that he accept and put into operation the principle of other great industries—namely, that he follow his commodities at least part of the way to the consumer. This is the aim of co-operative marketing by which the farmer comes into intimate relation with the problem of transportation.

The third great problem I believe to be the matter of taxation. The percentage of the farmer's income which is consumed by taxation of one kind or another has greatly increased during the past few years. A study of the situation has revealed important facts which have heretofore been discussed quite fully through the columns of this paper. It will always be one of the problems of farmers as well as representatives of other industry to study the cost of government as it affects their business and the citizenship of the country in general.

Must Cut Production Costs

The fourth great problem of the farmer is the matter of economy in production. The question the producer will always have before him. There seems to be some relative standard as to what the consuming public can afford to pay and will pay for a given commodity. Such standards are not fixing prices in any sense of the word but they bear direct relationship to the earnings of labor and other industry. Thus it is important that the lowest possible cost of production price prevails on their individual farms. As I see it, this is largely the work of the county Farm Bureau. Information, which does not necessarily tend to increase the total production but to cut the cost of production, is available at these various county Farm Bureau offices on the best systems of farming.

Department Ready for Service

Farm organizations should always keep in mind that a part of their work is a campaign of education and that the campaign should go forward in an organized way so that satisfactory results may be obtained at the lowest possible cost.

The organization department also functions under the general policies of the I. A. A. in securing satisfactory memberships in co-operative marketing organizations after a proper survey has been made and proper forms of organization have been recommended by other departments of the Association.

This is a brief outline of the work of this department and we make it a point to stand ready at all times to be at your service.

The Mason County Farm Bureau board has set five cents per bushel as a fair price for paying corn huskers. Free board is to go with the five cent wage.

ILLINOIS FIGHTERS WHIPPING ENEMY

(Continued from page 1)

cured from the books of the U. S. D. A. inspector in charge of tuberculosis eradication in Illinois. Since grade cattle were not tested previous to July 1, 1921, no record is available on them, but a comparison of the number of reactors among purebred cattle during the two three-year periods shows that 40.5 per cent less reactors were found during the latter period.

Angus Are Lowest

A study of the accompanying table reveals for the first time percentage of reactors found in each breed. It will be seen that the Aberdeen Angus have the lowest per cent of reactors. This is explained by the fact that most of the purebred Angus herds were tested under the accredited herd plan and got fairly well cleared up before July 1, 1921.

Holsteins have shown the largest number of reactors, but, according to Mr. Petersen, there is good reason for their leading. He enumerates the reason for their leadership as follows: (1) Holsteins have been the chief breed brought into dairy districts where infestation has been worst; (2) Cattle bootleggers have made it a practice of picking up reacting Holsteins in other states and selling them in Illinois; (3) Holsteins are the most numerous in the Chicago milk district where the infestation is the worst. Bad cattle have been brought in this area, infesting the cattle already there.

Mr. Petersen in interpreting his figures, and comparing the first three-year period with the second, points out that as a state, Illinois is at least well on the way toward practical eradication of bovine tuberculosis.

Mississippi Valley Is America's Food Basket, Says Fox

Many I. A. A. folks heard Secretary Geo. A. Fox when he spoke from station KYW recently in behalf of the Illinois Chamber of Commerce and told of the Illinois Products Exposition, the magnificent industrial show of Illinois which was on in Chicago, Oct. 9 to 18.

"The basic resources of Illinois are its splendid people, its natural wealth and its advantageous position in the nation," he told his distant listeners. "In all three it is favored beyond estimation. The Mississippi Valley is the food basket of America. The possibility for future development and expansion of Illinois widens the horizon of present achievement into a vision which thrills the active leadership in all industry throughout the state."

A Diversified Wealth

The I. A. A. executive referred to the vast mineral wealth of Illinois, its net-work of railroad systems, the immense wealth of its manufacturing centers and its ever growing population, each of which he linked with the important agricultural industry in Illinois, of which he said:

May Produce Indefinitely

"In the past, the farms of Illinois have furnished much of the food for its people with a surplus of some crops. The 237,000 farm units consume large quantities of manufactured products. Will the consumptive power of its farms continue as industry develops?

"The answer is written in the pages of our splendid educational institutions and in an intelligent farm population. Education and experimentation have discovered a new resource in these rich lands. Illinois farm lands may be made to produce food indefinitely but not without scientific methods of production. Without scientific farming, these lands can be mined and become waste places as has been done in many other sections. Modern education has discovered how to preserve productivity.

"It is cheering information to know that intelligent farmers may perpetuate this source of the State's wealth. The universities, high schools, extension service of the state and nation, Farm Bureaus, through their leaders and their specially trained Advisers, are making a substantial program in maintaining a system of agriculture which will perpetuate this great natural resource and insure to the State a prosperous, intelligent and contented country-side. Industry and commerce may well join hands with the farmer in building for a healthy, economic balance of prosperity for all time."

TABLE 1

(Showing record of T. B. tests made in Illinois from April 1, 1918 to July 1, 1924.)

Breed	No. Purebreds Tested	Reacted	Per Cent Reactors
Aberdeen-Angus	1,060	200	18.50
Brown Swiss	813	83	10.30
Guernsey	1,604	95	5.29
Hereford-Horned	1,550	72	4.63
Hereford-Polled	2,273	18	0.79
Holstein	8,901	1,510	16.96
Jersey	2,498	131	5.24
Red Polled	579	57	9.84
Shorthorn	9,167	927	10.11
	28,470	3,093	9.07

Beginnig on July 1, 1921, all cattle, whether purebreds or grades were tested under the co-operative plan. The following table shows the increase in testing for the three-year period from July 1, 1921 to July 1, 1924. The average per cent of reactors among purebreds in Table 1 is 9.07% and in Table 2 is 5.4%, a reduction of 40.5% in the number of reactors in three years.

The average per cent of infection of both grades and purebreds on July 1, 1924 was 9.1%.

TABLE 2

Breed	Cattle Tested Pure-bred	Grade	Reacted Pure-bred.	Grade	Per cent Reactors Pure-bred	Grade
Aberdeen-Angus	3,255	3,685	150	236	4.600	6.40
Ayrshire	127	125	5	9	3.085	7.20
Brown Swiss	3,650	2,917	85	318	3.200	10.90
Dutch Belted	29	19	1	1	3.500	5.30
Galloway	1	9	0	0	0.000	0.00
Guernsey	2,380	4,645	74	413	2.700	9.00
Hereford-Horned	6,574	5,069	123	339	1.800	6.70
Hereford-Polled	1,970	295	10	3	0.050	0.05
Holstein	33,720	64,775	2,991	9,369	8.900	14.40
Jersey	7,880	16,924	152	1,266	1.900	7.40
Mixed		437		63		14.70
Red Polled	1,890	1,115	29	95	1.500	8.50
Shorthorn-Horned	29,613	50,208	1,307	4,870	4.400	9.70
Shorthorn-Polled	104	2,262	2	350	1.800	15.00
Total, all breeds	90,671	152,575	4,928	17,330	5.400	11.30

A comparison of the percentage of reactors among the purebreds in Table 1 and Table 2 shows the progress made in ridding these herds of tuberculosis where a systematic, thorough cleanup has been practiced.

FARM CO-OPERATION URGED BY BRADFUTE

(Continued from Page One)

ricultural Association, and push, push, push, he said.

"Do you know that since the American Farm Bureau Federation has been organized, more favorable farm legislation has been passed in Congress than there was in 20 years previous? And that farmers are represented on important federal boards now whereas before the farmers had a real functioning organization the farmers were left completely out?

Bureau Represents Farmer

"The farmer, through the American Farm Bureau Federation and your Illinois Agricultural Association, has been able to present his viewpoint in places where he has never been heard before. And the other classes want to know the farmer viewpoint. I, as your national president, have been invited to speak before such varied groups as retail drygoods people, railroad executives, bankers and even a marine organization. What interest can a farmer have in ships you ask?

"Do you know that right now 10,000,000 bushels of wheat are leaving the United States every week for Europe? And do you know that the farmer pays the transportation cost on this wheat as it goes across the sea? And, above all, a large percentage of that wheat is carried in vessels sailing under flags other than Old Glory. Surely the farmer is vitally interested in such things which seem so distant as sea transportation. And your county Farm Bureau, the Illinois Agricultural Association and the American Farm Bureau Federation are the means of the farmer speaking his part in the nation's affairs.

Power in United Action

"Last Saturday I sat in conference with President Coolidge upon his invitation. He wanted the farmers' viewpoint, and I told him what over one million farmer-members of the American Farm Bureau Federation had expressed through their representative organization. He listened. And what may be surprising to you, he talked back. Many call him 'Silent Cal,' but I found him holding up his end of the conversation. As an individual farmer from my own farm near Xenia, Ohio, I would never have had so much as an audience with the President, much less an invitation to go see him. Without the power of united action behind me, President Coolidge would not have had our viewpoint on agricultural conditions.

Presidents Say Co-operate

"Do you know that the last three presidents of the United States have said that farmers must organize and co-operate to protect themselves? The supreme court has said so, as have governors of many states.

"Since the beginning of the American Farm Bureau Federation, Co-operative organizations have been formed in a national way to handle such commodities as cotton, tobacco, wool to some extent, fruit and vegetables, live stock, and our latest venture is in grain marketing. The Grain Marketing Company is open to criticism by the membership and they can change it any way they see fit."

Our agricultural problems will never be worked out unless the farmers themselves take an active part in affairs, both in and by means of their organization.

Earl C. Smith On Radio

Illinois Farm Bureau people, who tune in on station KYW Nov. 7, at 8:20 P. M., will hear Earl C. Smith, Detroit, Ill., I. A. A. executive committeeman from the 20th district. KYW will be broadcasting his talk on "Farm Bureau Loyalty."

The board of supervisors in Lake county have voted to renew a $4,000 appropriation to continue the work of eradicating bovine tuberculosis.

Schuyler County Farm Bureau has ordered 720 tons of limestone this fall for farmers in that county.

Professor W. H. Smith,
University of Illinois,
Urbana, Ill.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday—November 8, 1924 | Number 22

ILL-MO CREAMERY PUTS OLD COMPANY ON A PAYING BASIS

Farmers' Co-op Now Making Quality Product—Illini Brand Butter

What is better than bread and butter?

This is the appetizing slogan of the Ill-Mo Dairy Company of East St. Louis, a farmer-owned co-operative creamery and makers of Illini brand butter, a product rapidly growing in popularity among butter consumers in the St. Louis district.

A. E. Richardson

One year ago there was no Ill-Mo Dairy Company. In its stead was a bankrupt milk marketing company, the old Illinois-Missouri Milk Producers' Association.

How the 6,000 farmer-members of the Illinois-Missouri Milk Producers' Association suddenly woke up and found that they owed themselves $130,000 for unpaid milk shipments has been heralded the length and breadth of Illinois and Missouri as an example of farmers' co-ops that slid into the chasm of bankruptcy and bad repute.

Co-operation Looked Bad

That was back in the fall of 1922 when, to the milk producers of the St. Louis district, the future of co-operative marketing looked dark. In the face of their milk co-op failure it seemed that the hopes of the co-operative effort were blasted for good.

But the principles of co-operation are bigger than was this Illinois-Missouri milk association. An advisory committee appointed by O. E. Bradfute, president of the American Farm Bureau Federation, outlined a plan to pay off the debts of the old company and, with legal, financial and advisory help from the Illinois Agricultural Association, organized, to accomplish this, the present Ill-Mo Dairy Company.

Today the Ill-Mo company, less than 12 months old, stands as a monument to a co-operative marketing spirit that refused to admit defeat.

Took Over Old Company

The Ill-Mo creamery took over the facilities owned by the old milk marketing company and opened its doors to the cream shipping world Jan. 1, 1924. No cream came that day, nor the next, but on Jan. 3, three cans arrived and Ill-Mo creamery business started.

"Maybe you think I wasn't tickled to see that first can of cream," said A. E. Richardson, who was delegated by the advisory committee to manage the creamery, and he laughed as he looked back on the incident. "It was frozen hard as a brick and there was nothing funny about it then. We'd been operating a creamery for two whole days without a pound of cream."

January 4 came and with it came more cans of cream, Jan. 5 arrived with a further increase in shipments and so on, day after day, business picked up until the peak was reached in May and June. The largest number of cans received in one day was 130.

30,000 Pounds Per Month

Once the cream shipments began arriving in satisfactory volume the Ill-Mo dairy company turned its attention to producing a quality butter product. The plant is equipped with every

(Continued on page 2, col. 2)

Late Bulletin:

The re-election of Calvin Coolidge to succeed himself as president of the United States and the general republican landslide places keen interest from an agricultural viewpoint, upon the selection of the next Secretary of Agriculture. The responsibility for the department of agriculture rests with the incoming administration. This department is one of the most important from the standpoint of the country as a whole. It represents the nation's largest and most important industry. Recognition of farm organizations, in conference on the selection of a new Secretary, appears to us as entirely proper in order that the new Secretary shall have the confidence and fullest co-operation of organized agriculture.

Essays Pour In As Contest Nears End

Several hundred boys and girls in 22 Illinois counties have turned over, to their respective county Farm Bureaus, essays on "Why Dad is a Farm Bureau Member" or "Why Dad Should Join the Farm Bureau."

The last week has been the final and busiest lap of the whole contest. During the week hundreds and hundreds of names of boys and girls have poured into the office of H. R. Kibler, director of the national contest. They came from each of the 27 farm bureau states conducting county contests.

In Illinois, La Salle county reported 142 in their contest, the largest number turned in by any Illinois county so far. Macon county is one that is running La Salle a close race and there may be other counties with large entries, which have not been reported.

Contest Closes Nov. 10

November 10 is the last day that essays can be received as the contest officially closes that day. Nearly all counties have selected their committee of judges, which will soon choose the winners in each county.

Copies of the first prize essays in each county will be mailed to the I. A. A. contest director and to the American Farm Bureau Federation. The I. A. A. judges, C. V. Gregory, editor of Prairie Farmer; Arthur C. Page, editor of Orange Judd Illinois Farmer; Francis G. Blair, state school superintendent; C. E. Hay, farm adviser in Christian county; and President Sam Thompson, will pick, from the 22 county winners, the essays for which the I. A. A. prizes will be awarded.

84 Co-ops in I. A. C. A.

More farmers' elevator companies have subscribed for the auditing services of the Illinois Agricultural Co-operatives Association than any other class of farmer co-ops, according to Geo. R. Wicker, general manager of the audit service. Thirty-eight of the 84 organizations in the association are farmers' elevators.

Farm Bureaus are second, 28 county Farm Bureaus, having subscribed for the auditing and accounting service. County live stock shipping associations total eight. Three live stock terminal agencies, three dairy associations and four miscellaneous organizations complete the list.

I.A.A. Annual Meeting Set For Jan. 16 and 17

Thursday and Friday, Jan. 16 and 17, are the days of the I. A. A. annual meeting. This year's meeting will be held in connection with Farmers' Week at the University of Illinois. Don't forget the date—better mark it on the calendar. An unusual program is already being planned.

A WORTHY COMMENDATION

Dean and Professor Emeritus
College of Agriculture
University of Illinois

THE MAPLES
E. DAVENPORT
WOODLAND, MICHIGAN

S. H. Thompson, President,
Illinois Agricultural Association,
Quincy, Illinois.

Dear Mr. Thompson:

I am writing to express my congratulations and my keen satisfaction that you, as president of the Illinois Agricultural Association and an Illinois man, had the foresight and the courage to stand out against the grain marketing scheme that took over a large machine of another's building.

You have done agriculture and your (our) good State a great service and after the craze passes the reconstruction of sound agricultural policies will be rebuilt upon and around such wise men as yourself who refuse to be stampeded.

Faithfully yours,

E. Davenport.

PRESIDENT COOLIDGE ARRANGES TO ATTEND INTERNATIONAL SHOW

To Be 25th Anniversary; U.S.D.A. Will Award Official Medals

The International Live Stock Exposition will celebrate its 25th anniversary at the Chicago Union Stock Yards, Nov. 29 to Dec. 6, with what promises to be one of the greatest gathering of agricultural forces ever assembled in the history of the basic industry.

President Coolidge has consented to attend the International Show and speak a number of times during a week's stay in Chicago. High officials in the United States Department of Agriculture will be present as well as many prominent men from agricultural colleges and universities.

U. S. D. A. To Award Medals

In commemoration of the importance of this event, Congress has, by special act, authorised the United States Department of Agriculture to award official medals to all winners of first prizes and championships in the live stock competitions at the coming show. The Department itself will fill an entire exhibit hall with a display of its various lines of activity.

The exposition will be international in character as well as in name. In addition to the Canadian exhibits and delegations, several foreign countries are expected to be represented. Four famous live stock judges from Great Britain, four from Canada, and one from the Argentine are coming to act as arbitors in the various contests among breeders and feeders.

Railroads To Reduce Fare

Brilliant evening entertainments will be held each night in the arena, featuring a society horse show and a program of exciting and entertaining events. There will be something of interest and value during the international for every member of the family, both urban and rural dwellers. Reduced railroad rates will be in effect during the week of the show.

The social side, always an important feature of the International, will be especially stressed on this quarter-century anniversary with a full program of reunions, banquets and formal meetings. The International offers an unrivaled opportunity for the stock men and farmers to meet their old friends and make new acquaintances which will prove invaluable in the future. Boys' and girls' club exhibits will be an important feature for the youngsters.

Advanced indications are that the exhibits of live stock and crops will far surpass the notable arrays of former shows. Illinois farmers, favored by the nearness of their residence, should take advantage of the reduced rates and attend the coming International in even greater numbers than on former occasions.

Hedgcock Studies Marketing Work In Ohio and Indiana

Wm. E. Hedgcock, director of the livestock marketing department, has made a week's study of the livestock marketing situation in Ohio and Indiana. He has been finding out first hand the most successful co-operative practices on various markets with a view toward applying the more practical ideas to Illinois problems.

He visited the Ohio and Indiana Farm Bureau Federations. It is his opinion that the Producer live stock marketing work is well established in Ohio and Indiana.

Mr. Hedgcock made a similar trip to Iowa and Minnesota some time ago.

Mutual Relations Committee Formed

The committee on mutual relations between the Farmers Grain Dealers' Association of Illinois and the Illinois Agricultural Association has been appointed.

D. H. Allen of Delvan, C. H. Bonnell of Rosemond and Fred A. Mudge of Peru are to represent the Farmers Grain Dealers' and H. E. Goembel of Hooppole, A. R. Wright of Varna, both of whom are members of I. A. A. grain marketing committee, and Sam H. Thompson, I. A. A. president, will represent the Illinois Agricultural Association.

The first meeting of this committee will be held Thursday, Nov. 13. The next issue of the Record will carry a complete account of the proceedings of the meeting.

It is expected that a plan for marketing grain will be considered whereby both organizations can work together. The Farmers Grain Dealers' have not indorsed the Grain Marketing Company, either.

COOLIDGE REQUESTS FARM BUREAUS HELP HIM PICK SECRETARY

President Thompson Wants Time Taken To Get Best Man Possible

President Coolidge has taken the farm organizations into counsel for the selection of a Secretary of Agriculture to fill the vacancy left by the death of Henry C. Wallace.

A telegram from President Coolidge was received by O. E. Bradfute, president of the American Farm Bureau Federation, asking that he get in touch with the state farm bureau organizations and get their suggestions for a new secretary. President Bradfute immediately relayed President Coolidge's message to each state president.

Sam H. Thompson, I. A. A. president, has replied by wire from Quincy to President Bradfute as follows:

"I wish to acknowledge receipt of telegram requesting me to recommend names of men best qualified to fill position of Secretary of Agriculture. Would suggest time be given for careful consideration and mature thought so that this most important position to the agricultural interests of America will be filled by the very best man possible."

Executives Will Consider Men

Over the telephone from Quincy Tuesday morning, Nov. 4, President Thompson stated that it is very essential that time enough be allowed for careful consideration to be given so the farm organizations, especially the state units of the Farm Bureau, will not be competing against each other. The recommendation of the I. A. A. will be taken up when the executive committee meets Friday, Nov. 7, which is two days after the Record goes to press.

The American Live Stock Association, the National Grange, the Farmers' Union and the American Farm Bureau Federation are the farm organizations asked by President Coolidge to make a suggestion.

Washington Meet Suggested

A movement is on foot as the Record goes to press to have representatives of the principal farm organizations meet in Washington, D. C., on Nov. 10 to make a unified recommendation.

Among those prominently mentioned for the post at this time are:

H. M. Gore, Assistant Secretary, now acting Secretary of Agriculture and candidate for Governor of West Virginia; A. W. Gilbert, Commissioner of Agriculture for Massachusetts; L. J. Taber, Master of the National Grange; Frank O. Lowden, former Governor of Illinois; Samuel Adams, editor of Public Opinion, Washington, D. C., and formerly publisher of a fruit journal; J. W. Coverdale, treasurer of the American Farm Bureau Federation and secretary-treasurer of the Grain Marketing Company; Murray D. Lincoln, secretary of the Ohio Farm Bureau Federation; J. R. Howard, formerly and successively president of the American Farm Bureau Federation and the Transportation Institute; C. H. March, Litchfield, Minn., banker and state Republican campaign manager for Minnesota; Dr. John Lee Coulter, president of the North Dakota Agricultural College.

Lowden Says "No"

Frank O. Lowden, formerly governor of Illinois, and a man

I. A. A. Office

General Office and Assistant to Secretary, J. H. Kelker; Organization, G. E. Metzger; Information, H. C. Butcher; Transportation, L. J. Quasey; Taxation and Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, Wm. E. Hedgcock; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, F. A. Gougler; special representative on Tuberculosis Eradication, M. H. Petersen; Legal Counsel, Donald Kirkpatrick; Co-operative Accounting, Geo. R. Wicker.

The Great Leader of Agriculture Is Dead

The death of Henry C. Wallace, late secretary of agriculture, removes from agricultural leadership a man who has long been a true and useful friend of agriculture. He was a real friend of farmers and showed it in his work at Washington.

His department was charged with great responsibilities, the execution and administration of which automatically established precedents upon which the Department will undoubtedly be influenced in years to come. His handling of the new legislation concerning live stock and grain marketing has established an outstanding precedent which must be maintained.

The late Secretary was especially close to farm bureau work. When he was in Chicago only a little more than two months ago, he talked to and with the executive committee and the directors who happened to be in the city. He made friends of every man of them. Such was his personality.

The Illinois Agricultural Association extends its deepest sympathy to the family of Mr. Wallace.

—o—

Free Speech at the Annual Meeting

This is a good time to be thinking about who should be your delegate at the annual I. A. A. meeting. He should be a man who has the basic needs of agriculture well in mind, and one who can put forth his ideas.

More time is being allotted for open discussion in the program of this year's annual meeting than ever before. Any man with constructive ideas who cares to put them forward will have an opportunity to express himself.

—o—

Meet Gas Warfare With Facts

Someone has said that marketing is war. It certainly is. It is a war of wits and fists, money and intrigue. When farmers begin to engage in co-operative marketing such as has been begun in scores of vicinities in Illinois, they automatically become soldiers for their co-operative organizations.

We should qualify the word "soldiers." Some farmers become true soldiers in every sense of the word; some become soldiers because their neighbors do; some are "conscientious objectors," who, after being drafted, upon seeing the first flare of war, are ready to give up the battle, tell all they know to the enemy, or turn traitor helping the enemy carry on its gas attack.

It is unfortunate that many farmer-co-operators do not realize when they join a co-op that they are integral parts of their co-operative organization—that they are soldiers fighting in the first line trenches—and in failing to realize this fact they often listen to and many times succumb to vitriolic attacks made by the gas regiments of the enemy.

The chief attack of the enemy of co-operative organizations comes through the hiring of paid fighters with tongues of falsity, spite and destruction from which shoot pointed gas attacks into the ranks of the largely unsuspecting army of the co-operators. The co-operators, not being trained to be good enough soldiers to meet such attacks with the true facts, are often repulsed in argument by the persistent and apparently authoritative assault of the enemy. The enemy gains a foothold—possibly a traitor or two flops along the way—and before expert re-inforcements of men who actually know the facts, and who are prepared to interpret facts in their true meanings, can arrive to offset the enemy's penetration, considerable harm has been done.

Every soldier should be armed with the facts which are, after all, the most effective weapons against the enemy because facts label lies in their true light and establish confidence in the soldier who bears them. Even if the facts are not favorable to his organization, they are then of greater value, because such facts can be applied to a constructive purpose in building the fighting machine where it is of known weakness.

Arm every co-operator with the facts about his organization, and whether such information is favorable or unfavorable, if the body of men with whom he has thrown his energies has set out to accomplish a worthy purpose, the facts will ultimately become the guiding star toward a successful co-operative marketing organization.

The same logic applies to all farm organizations, whether co-operative or not. It applies particularly to the I. A. A. If any member has anything on his chest or would like to have more information concerning any activity or project of this association, a letter to the information department will bring as complete an answer as it is possible to give. Farm Bureau members should keep abreast with the activities of the I. A. A. by reading the Record. It is the word-movie of facts picturing the organization's progress in biweekly intervals. Keep posted on I. A. A. actions through the Record and be an armed soldier. Don't be an unarmed gas absorber, ready to run at the smell of powder.

AGRICULTURE MOURNS

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

Dear Sir:

Co-operation is the word under which the largest problem of American agriculture can be headed. The American farmers can raise the crops and unless they are united they can have their prices dictated to them by the grain speculators, the heads of the milk industries, or the main men who hold positions which enable them to make the farmers easy prey and add to their own personal fortunes.

The laboring men are united into unions and so are all the people of industry and they dictate their own terms and get them. Why not the farmer? He is getting united better every day and in union there is strength, but to have this strength there must be co-operation. Did you ever watch an ill trained team stuck with a load in a mud hole? One horse goes up and the other flies back. That's just what the American farmers have been doing. All are willing to pull but until they learn to pull together they can accomplish little. They must unite and then co-operate to sell their grain; to market their produce and live stock and to elect a few "honest-to-God" dirt farmers to run a great nation of sturdy "clod-hoppers" in their own good way. Let's all get together and pull together. Then we will have successful co-operation and a problem solved.

Glenn C. Francis, Altamont, Ill.

What do YOU expect from co-operative marketing? Write and tell us.

THE LIARS' CORNER

"Ho! for Kansas, land that restores us
When houses choke us and big books bore us!"
—Vachel Lindsay of Springfield, Ill.

For the Liars' Corner:

Our friend Ralph Snyder, President of the Kansas Farm Bureau Federation, who made such a noble contribution to the Corner some time ago, must have been too modest to tell us about the Kentuckian, who, with his wife and son, migrated to Kansas in the early days when the majesty of the law was upheld with the rope and gun.

Soon after the Kentuckian arrived in Kansas, his son Zeke was found in company with a horse that belonged to one of the custodians of the law. Zeke was promptly presented with a lariat cravat and elevated to a high position.

His father concluded that a man behind a tree in Kentucky with a Winchester was safer than a man on the open prairies of Kansas with a strange horse; hence, he and his wife returned to their native state.

Being a modest Kentuckian, he hesitated, upon returning to Kentucky, to speak of the lofty position his son had attained in so short a time, so he explained why his son had not returned by the following tale:

Soon after the family arrived in Kansas, they began preparing for their spring planting. Seed corn had been brought from Kentucky and Zeke and his father started to make a cornfield of the prairies that had known nothing but buffalo grass and jack rabbits. The old man led off with the hoe and chopped a hole in the sod for the first hill of corn. Zeke followed with the seed and proceeded to drop and cover the first kernel while the old man prepared for the second hill of corn.

The corn planting had not gone far, when, upon hearing a yell from Zeke, he looked back to see a huge stalk of corn popping from the earth with Zeke astride one of the leaves. Zeke's yells were not a jump, but the time Zeke was fully 50 feet in air and rising rapidly. Apparently he was afraid to jump and started to climb down the stalk but it grew faster than he could climb and it soon became evident to the old man that Zeke was losing ground.

Realising that an emergency was at hand the old man rushed to the house for his trusty axe to fell the stalk. The first stroke was a mighty blow and the axe sunk to the handle in the huge corn stalk. The old man loosened his grip on the handle to spit on his hands but the axe traveled out of sight practically as rapidly to the house and called his wife, and together they undertook to saw down the huge stalk with the cross cut saw, but all they accomplished was a slight scratching as the stalk moved toward the sky.

Realising that their only hope was that their son might live until the stalk matured when he might succeed in climbing to the ground, the parents settled down to their long wait during the hot Kansas summer. Occasionally particles of corn would drop to the ground which renewed their faith that their son still lived.

As fall approached the stalk ceased to grow and began to show signs of maturity. The huge telescope which had been used in the mountains of Kentucky to detect the approach of revenue agents, was brought out and turned on the stalk as high as it would reach and an endless watch was set up for the approach of Zeke.

But their last hopes were blasted when one day a terrific Kansas tornado came along and twisted the stalk from the ground. Mother and pa ran into the air until the tornado passed and then fell to the west with a crash that shook the sod houses to pieces and spread death and destruction wherever it touched.

Abandoning all hope of finding their son alive the father started to see if they could find his remains. Two groups of curious Kansans were organized, one to search along the north side and the other along the south side of the mammoth stalk, and the search began.

Proceeding opposite each other by communicating with horns the little groups proceeded to the west. Progress was slow because detours had to be made around the huge cars. Many of these cars were miles in length with kernels large enough to supply the entire State of Kentucky with moonshine. At one place an entire Indian village was discovered and days were spent examining the carcasses of dead Indians to make sure that Zeke's remains were not among them. With the only means of identification a bullet hole through the jaw, from the reverse order's ride, progress was slow and it was well toward spring when the parties reached the western border of Kansas.

At one place a huge ear of corn had been driven directly into the ground where the stalk fell; the pith in the cob had shrunken and through the center of the cob oil and gas were gushing out sufficient to form a good sized river.

As the parties neared Colorado they saw smoke in the direction of the mountains and at night fires were visible. Fearing prairie fires they camped until the danger passed, but the fires increased and it soon became evident that the huge stalk was afire, and they concluded it had fallen across a volcano in the Rocky Mountains. The fire soon reached the points where the searching parties were encamped and the heat became so intense that all the members of the parties were cremated with the exception of the old Kentuckian who took refuge in a vase constructed in a huge kernel of corn. For a while the heat was so intense that he thought he must surely perish but suddenly the huge kernel popped and he was projected through the air at a terrific rate of speed, finally falling into a river. As he came to the surface he saw his wife on the bank fishing and he swam for home.

He warned his wife of the approaching fire and they took to the hills until the conflagration was over. As they were returning to the sod house a Kansas windstorm arose and scattered the ashes of the famous stalk to the four winds of heaven.

Heartbroken by their loss and terrorized by the strange phenomenon they had observed, they made haste to return to Kentucky where philosophers of the hills assured them that it was a mistake to plant corn bred to produce a crop on the impoverished hills of Kentucky on the fertile prairies of Kansas.

I. A. Maddox, Farm Adviser,
Sangamon County Farm Bureau, Springfield, Ill.

P. S. Don't put this in the "Liars' Corner." No real liar ever got into a corner.

WHISNAND AND FOX EXPLAIN TWO I.A.A. ACTIONS AT DECATUR

Farm Bureau From 19th District Will Meet Once More

The Macon County Farm Bureau was host to the Farm Bureau representatives of Piatt, DeWitt, Champaign, Douglas, Coles, Shelby and Moultrie counties, when the second meeting of the year for the 19th district was held at Decatur Oct. 23. E. P. Imboden, president of the Macon County Farm Bureau, was chief receiver for the host. J. L. Whisnand, executive committeeman, presided and led the talks by explaining the results of the school survey made during the summer under the direction of the I. A. A. educational committee of which he is chairman.

J. W. Whisnand

The results of the survey, Mr. Whisnand pointed out, indicate that farmers have a big problem in getting their school affairs set right. The survey, which was made in co-operation with the Illinois Educational commission, will be used in formulating school and tax legislation.

Gives Final Survey Facts

"Ten per cent of the 10,000 questionnaires which were sent to Illinois farmers in the spring were answered," said Mr. Whisnand. "These show that 22 per cent of the farmers who answered Hve in township high school districts and 22 per cent in community high school districts. Forty-one per cent live in non-high school districts and five per cent in consolidated school districts; 60 per cent had no children in high school; 89 per cent approved the present courses of study; 88 per cent had children who went from home to school; 12 per cent had children who stayed away from home to go to school; 76 per cent were not in favor of consolidated schools; 77 per cent favored retaining the one-room school while only two per cent favored doing away with community schools and 96 per cent of the farmers who have children are preparing to send them to high school."

Say Uniform Text Books Needed

J. F. Watkins and L. H. Cassity, both of Macon county, led a short discussion on the necessity for uniform text books in rural schools.

C. A. Ewing, local lawyer of Decatur, set the farm bureau representatives to thinking in a talk in which he touched on the necessity for religious instruction in schools, advocated a code of ethics for all schools whether public or parochial, and lauded the Farm Bureau for its work. He said that farmers should realize they have some duties as citizens and that they should take a more active part in civic affairs.

Fox Talks Grain Merger

In the afternoon, George A. Fox, executive secretary of the I. A. A., explained the attitude of this organization toward the Grain Marketing Company.

Mr. Fox pointed out, among other things, that the principal object of co-operative marketing is to eliminate speculation and wide fluctuations in prices. As a possible alternative plan, Mr. Fox brought attention to the meeting of the executive committees of the Farmers Grain Dealers' Association of Illinois and of the I. A. A. at which it was agreed that the two organizations would work together as much as possible in the future. The Grain Dealers' Association has a grain marketing plan already partially in operation which will be submitted to the I. A. A. for consideration.

In Coles County Next

It was voted that Coles county should have the third and last district meeting at a date to be determined by the Coles County Farm Bureau and Mr. Whisnand.

Group singing and songs by a Decatur quartette furnished diversion at the dinner under the genial direction of E. P. Imboden.

Following are the names of those present at dinner: Macon county—C. A. Ewing, E. P. Imboden, E. H. Walworth (farm adviser), J. F. Watkins, Decatur; J. C. Batchelder, Harristown; Henry Shafer, Illiopolis; L. H. Cassity, Oreana; J. M. Beckett and H. C. Bean, Blue Mound; Moultrie county—C. C. Turner (farm adviser), Sullivan; T. P. Ellis, Lovington; J. H. Sharp and Geo. Falk, Bethany; Shelby county—Chas. J. Robinson (farm adviser), Shelbyville; Carl D. Middleton, Assumption; Louis Buhler, Shelbyville; Coles county—J. L. Whisnand and Melvin Thomas (farm adviser), Charleston; Douglas county—G. E. Ewing, Arcola; F. W. Garrett and J. W. Coslet, Tuscola; Champaign county—C. C. Burns (farm adviser), Champaign; E. E. Smith, Urbana; DeWitt county—O. M. Allyn (farm adviser), Clinton; M. E. Goken, Lane; Piatt county—S. S. Davis (farm adviser), Monticello; I. W. Gants and Alva A. Reed, Deland.

ILL-MO CREAMERY ON PAYING BASIS

(Continued from page 1)

needed device for modern butter making and has turned out, on an average, for the last five months more than 30,000 pounds of butter each month.

The problem of marketing 15 tons of butter every 30 days has been no small one in competition with older and larger commercial creameries. The Illini carton was adopted last spring and by June sales under this brand had increased until they totaled 11,395 pounds during the month and have continued to increase until during October, Illini sales were over 15,000 pounds.

The balance of the output, except for 24,000 pounds which is now on hand, has been sold on the open butter market at from 1.9 cents to 3.6 under the price received for that sold as Illini butter. The total number of pounds manufactured since Feb. 1 is over 250,000 pounds.

Cater To Farm Market

"Three-fourths of our Illini brand butter is sold through country stores in the milk district around St. Louis," Manager Richardson said in describing how they manage their Illini sales. "Our motto isn't exactly 'ship us your cream and we'll ship you our butter' because our cream comes from beyond the milk territory which extends about fifty miles every direction from St. Louis and we sell most of our Illini butter in the milk territory to farmers who market their whole milk and buy our butter. That is the market we cater to.

"One of our men gives all of his time to getting orders in towns in the milk district. We've got a butter wagon now that keeps busy handling these orders."

Cream shipments to the Ill-Mo company come from 147 stations in Illinois and 65 stations in Missouri. Altogether, 1,068 individual shippers have consigned cream to the St. Louis co-op since February. Several customers ship their cream regularly, a distance of about 150 miles by rail.

Keep Careful Records

Check-ups on the number of pounds of butter on hand, the amount churned, amount of buttermilk sold, pounds of butter delivered and other details are made twice daily, at the beginning of the day's work and at the end of the day.

This practice of rigid accuracy in recording sales and keeping accounts is one reason why the Ill-Mo company is making money. In the words of Manager Richardson, "This creamery business isn't all velvet." Only by hard business practices can a creamery prosper.

The Ill-Mo Dairy Company is making a winning fight in spite of a big handicap. But its managers, who believe in co-operation and are able to learn by past mistakes, see the time not far distant when it will be on its feet as strong as the Rock of Gibraltar because it is operated on true co-operative principles.

Thompsonigrams:

These four statements were taken from President Thompson's address in Morris, Grundy county, last week:

Service and personal sacrifice by the unpaid members of the Illinois Agricultural Association are the forces that have made the organization a powerful one.

The late Secretary of Agriculture, H. C. Wallace, called the I. A. A. the strongest farm organization in the United States, and after thinking that over to find the cause, I am convinced that it is because of our strong county Farm Bureaus.

The biggest job we farmers have before us is to put agriculture on a business basis.

The time has come when someone must speak for the farmers in an organized way among other groups. That is what the I. A. A. does.

"Co-operate and Be Loyal to Your Farm Organization," Smith

Earl C. Smith, executive committeeman from the 20th district, speaks from radio station KYW Friday night, Nov. 7, on "Farm Bureau Loyalty." Part of this issue of the RECORD will be off the press and mailed before he makes his talk but we got a copy of his "speech," submitted to KYW, and are giving you some of the meat of it here.

Earl C. Smith

"Farming is made up of two fundamental factors, production and marketing," says Mr. Smith, in part. "There are many other sub-factors that enter into the successful operation of a farm but all other operations are secondary or in support of production and marketing. Farm organization is the natural result of the present day unity of capital, industry and labor."

Farm Bureaus Not Radical

"Our Farm Bureau program is not radical as many misinformed people profess to believe, but is constructive and beneficial not only to those whose interests are from the soil but to all peoples. Without a successful and profitable agriculture our nation cannot prosper for any length of time. Since 40 cents of each American dollar represents the purchasing power of the American farmer, it would behoove all persons engaged in industry to study and become acquainted with the problems of agriculture for their personal benefit.

"It would not take a very close study on any person's part to reveal that the biggest problem confronting agriculture today is the subnormal purchasing power of the farmer's dollar. One of the major projects of the Farm Bureaus, and especially of the Illinois Agricultural Association and the American Farm Bureau Federation, is to endeavor to give American farmers an American price for the American consumption of farm products and a world price for the surplus which is sold in the world market. That is the meaning of agricultural equality—a much used expression during the recent campaign.

The carton in which Illini butter is sold

All three presidential candidates promise, if elected, to give agriculture equality with industry and labor.

Represent Farm Industry

"Although it is in its infancy when compared with other organizations of like character, the Farm Bureau stands today recognized by officials in both state and natipn as the representatives of the largest industry in our country when viewed from either number of population employed or value of product.

"The Producers Live Stock Commission Association, a farmers' marketing enterprise fostered by the county, state and national units of the Farm Bureau, now is successfully operating on thirteen of our largest live stock markets. This would have been impossible without the support of farm organization.

Praises I. A. A.

"The successful efforts of the Illinois Agricultural Association, the farm bureau unit of Illinois, with respect to tax reduction and transportation relief are outstanding."

He reviews the accomplishments of the American Farm Bureau Federation, the I. A. A. and local units of the Farm Bureau in stabilizing prices, in establishing co-operative marketing, in legislative matters, and in increasing the production of our farms.

Watch for Poison Bait

"All of these achievements were, and others will be, made possible only in proportion to the extent that farmers co-operate and are loyal to their organization," according to the I. A. A. director. "I would admonish you, Mr. Farmer, to beware of all bait thrown out by the competitor of any of your co-operatives. Farm leaders know of such bait, and it is mighty poison stuff, too.

"Various ways and means are being employed to break down the morale of co-operative organizations. Only to the extent of your full co-operation will they succeed.

Elect Capable Leaders

"Give them your loyal support. Attend your local meetings. See that your most capable men are elected to represent you. Make the farmer who has thus far failed to join his county Farm Bureau see how he is standing in the way of your future as well as his own. Resent all destructive criticism of your organization as though it were personal, which, in reality, it is. Court constructive criticism and see to it that your leaders profit thereby.

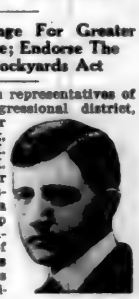
"It is my belief that only with the full co-operation and steadfast loyalty of the American farmer to his organization can we look forward with assurance to a profitable and permanent agriculture."

November 10 to 15 is to be "Boost the Farm Bureau Week" in Massachusetts and Connecticut. Special attention will be devoted to development of local units and broadcasting the accomplishments of our American Farm Bureau Federation.

Many counties in Ohio are making a systematic "clean-up" following the second three-year organization campaign. The idea is to sign up as members any isolated farmers or groups of farmers who were missed in re-organization.

A farm woman in every school district in the state, holding a membership in the Farm Bureau, is the goal of a membership campaign which is now under way, launched by the women's committee of the Iowa Farm Bureau Federation.

A reduction of four dollars a ton on sheet steel was announced recently by the Inland Steel Company, the leading independent producer in the Chicago district.



Farmers in Iroquois county have ordered 800 tons of limestone through their Farm Bureau.

Farmers all over the country are being asked to grow trees on waste land.

BUREAUS ASK TO CHANGE BOUNDARY LINE OF DISTRICTS

Would Arrange For Greater Convenience; Endorse The Packer-Stockyards Act

Farm Bureau representatives of the 15th congressional district, called together in Galesburg, Oct. 25, by H. E. Goembel, I. A. A. director from that district, took a definite step toward a general revision of boundary lines of districts from which directors of the Illinois Agricultural Association are elected. According to their suggestion redistricting would be effected regardless of Congressional districts.

H. E. Goembel

A resolution stating that, "under existing rules of the Illinois Agricultural Association, many of the districts from which state directors are elected cover counties brought together from a wide range, making it inconvenient for attendance at district meetings," was passed and sent to the executive committee of the I. A. A., with the request that "district boundaries be changed to suit the convenience of Farm Bureaus."

Endorse Packer-Stockyard Act

Mr. Goembel, in discussing the Grain Marketing Company, explained the claim of this company that they had marketed his grain. His grain was sold through his local elevator, shipped to a commission firm in Chicago and purchased from this firm by the Grain Marketing Company.

The resolutions committee composed of J. R. Shinn, Fulton county farm adviser; John Swarts, Knox county; and L. C. Warner, Henry county, recommended that plans be prepared by the I. A. A. to put grain marketing on an orderly contract basis.

Want Co-op Marketing

This recommendation came in view of the fact that there is a widespread demand among farmers for co-operative grain marketing in Illinois and with the idea of later affiliating with a nationwide grain marketing organization.

A brief note of condolence at the loss of agriculture's faithful friend, H. C. Wallace, was sent to the late Secretary's family.

These delegates attended the meeting:

Henry county—Geo. Broman, L. C. Warner, H. E. Goembel, A. A. Nelson, Benjamin Downs, Elmer Erickson, Martin Rehn, Roy Ferguson, Heber Smith, Frank Good, Glen Good, Adviser J. W. Whisnand; Knox county—John Swarts, Robert Gibbs, C. E. Hartcook, Adviser L. R. Marchant, Adviser A. R. Kemp; Schuyler county adviser, L. E. McKenzie and Fulton county advisers J. R. Shinn and Price.

Farmers Not Buying Much New Equipment

That profits on the average Illinois farm the last few years have been too small to permit the owner to buy adequate new equipment for farming operations, or even just a few luxuries in many cases, is a fact revealed in a summary of 70 letters from farmers scattered over one-third of the counties in Illinois.

The letters are from farm owners of radio sets, who are serving as reporters for the "What's Doing in Illinois" news talk given by the I. A. A. information department from KYW once each month.

The letters from radio reporters show that: Farmers like to hear radio discussions that will make them think, they like snappy music, want radio market news on time and weather reports while they eat dinner and would like to have less static and less politics.

Ninety-nine thousand, five hundred and fifty-five pounds of wool have been sold through the pool promoted by the I. A. A. live stock marketing department and the National Wool Warehouse and Storage Company.

14TH DISTRICT FARM BUREAUS EXCHANGE IDEAS AT MEETING

Shipping Associations, Community Work and Grain Merger Discussed

When I. A. A. executive committeeman W. H. Moody opened the 14th district Farm Bureau conference at Macomb, Oct. 22, by announcing that the meeting would be devoted largely to a discussion of local and state-wide problems, he started something, according to the report sent in by acting secretary, L. A. Null, McDonough county.

W. H. Moody

The 35 or 40 representatives present took Mr. Moody at his word and turned the meeting into a profitable free-for-all talk fest. Exchange of ideas on community work following a talk by R. C. Doneghue, McDonough county adviser, and discussion of organization work, led by G. E. Metzger, I. A. A. organization director, came in for a good share of attention.

See Shipping Mistakes

Discussion of shipping associations revealed the following common weaknesses in management: Lax methods of keeping books, no regular and dependable audits of official records, little or no control over managers, failure of directors to direct and a prevailing rule that the shipper having the largest consignment designates the commission firm to which the load of stock shall go.

To remove these common flaws in management, to tie the shipping associations and the Farm Bureau closer together, to ship to the Producers—these suggestions formed the substance of recommendations made to improve general operation of shipping associations in the rich live stock producing sections of the 14th district.

Vision Feeds F. B. Spirit

In an address that centered chiefly around the vision that is necessary to keep the farm bureau spirit alive, President Sam H. Thompson placed the responsibility for organization and reconstruction of the agricultural industry squarely on the shoulders of the individual farm bureau members.

The present deflation of land and agricultural products is driving farmers into organization, he said. To solve the inequalities imposed upon them, they must put farming on a business basis.

Mr. Thompson reviewed step by step the investigation made by the I. A. A. into the Grain Marketing Company and explained his stand all along. The conference voted a unanimous approval of his action regarding the merger.

The following representatives were present:

McDonough county—M. L. Hunt, C. E. Wallace, W. R. Clawson, Ralph E. Wilson, H. P. Hunter, Frank Stump, O. B. Twaddle, Jas. H. Mullen, L. A. Null, R. C. Doneghue, J. E. Stickle, A. A. Meesmore, C. P. Kline, J. O. Gardner, H. R. Miner, Ellis Conner.

Henderson county—C. C. Painter, C. W. Cooper, Ernest Walker.

Hancock county—J. H. Lloyd, W. O. Kunkel, W. B. Curtis, Geo. H. Dobson.

Rock Island county—W. H. Moody, F. X. Zeigler.

Warren county—H. R. Jewell, A. A. Olson, M. S. Smith, J. W. Sprout, Carl Stewart.

Mercer county—C. H. Belting.

The Kewanee Farm Bureau Community Club, a subsidiary organization of the Henry County Farm Bureau, is opening a farmers' produce market in Kewanee. Selling space is to be limited to members of the Henry, Knox, Bureau and Stark County Farm Bureaus.

Co-operative horse marketing will be continued by the North Dakota Farm Bureau Federation this year. This service has been provided for the last three years. During this time it has built up strong eastern demand for the marketable type of horses produced in North Dakota.

Attention, Cornhuskers! Here's Your Chance

Ford county needs corn huskers according to a letter from George T. Swaim, the farm adviser. Anyone looking for a place to pick corn should get in touch with Mr. Swaim at Gibson City.

Dedicate Muscle Shoals To Farmer Purposes, Says Reid

When the Senate convenes in Washington, Dec. 2, disposition of the Muscle Shoals proposition is the first subject to be considered. The subject was made the first order of business to be taken up and nothing can take its place.

The Farm Bureau, during the last several years, has openly and actively advocated certain fundamental principles which it believes should be adopted in the utilization and development of Muscle Shoals. "We have no idea of abandoning the struggle to secure the dedication of this project to farmer purposes along the economic lines laid down in the Ford tender," said E. H. Reid, acting Washington representative of the American Farm Bureau Federation.

"American farmers pay about $12 per ton tax on nitrate shipped in from Chile and the proper operation of the Muscle Shoals project would not only reduce the cost of manufacturing nitrates, but would force the Chileans to remove all or a part of the tax our farmers pay to support the Chilean government."

Boys Do Testing In DeKalb County

At the conference of farm advisers from the northern district in Chicago last week, Tom Roberts, adviser in DeKalb county, described a plan recently started in his county to promote dairy herd improvement association work. This project is commonly referred to as cow testing association work but has been renamed to avoid confusion with T. B. testing.

Under the plan explained by Adviser Roberts, high school boys do the testing as part of their work in high school agricultural courses. A boy, who is assigned to test a herd of cows, arranges to be at the dairy for any two successive milkings. He weighs and tests the milk and also weighs and analyzes the cows' feed.

He is paid for his services which are performed under the supervision of Smith-Hughes instructors co-operating with the Farm Bureau. The plan seems to be proving very satisfactory after a two-month trial, according to Mr. Roberts.

A. F. B. F. Annual Meeting

Final details for the sixth annual meeting of the American Farm Bureau Federation are being whipped into shape. The annual meeting this year will be in the Congress Hotel, Chicago, on Dec. 8, 9 and 10.

Discussion of organization and finance, research and transportation, publicity, legislation and taxation, co-operative marketing, rural life and home and community development along with boys' and girls' club work, will be in the limelight. These subjects will be handled by sub-committees.

The annual farm bureau banquet will also be a leading feature of the program.

Government veterinarians in 61 Illinois counties tested 43,438 cattle for tuberculosis during September, according to U. S. D. A. report. Out of this number, 1,982 were reactors. In September, 1923, only 27,436 cattle were tested.

The University of Illinois will hold a boys' and girls' club leaders' school of instruction at the University next January. It is to be held especially for local club leaders.

Eighty Illinois counties had boys' and girls' clubs last year.

Listen In!

I. A. A. radio patriots will have a chance to hear many good radio programs during the frosty evenings of November. Stations KYW and WLS, Chicago, are broadcasting regular farm talks by leading agriculturalists of the country. Here are their November programs.

From Station KYW:

Nov. 11—"Farm Leases," by D. C. Waterman, Director of Orange Judd Illinois Farmer Service Bureau.

"Grain Marketing Review," by J. W. Coverdale, Secretary-Treasurer, Grain Marketing Company.

Nov. 14—Special Program. The broadcasting of a "Fathers and Sons Banquet," held under the auspices of the State Board of Vocational Education. This program will start at eight o'clock sharp and continue for one hour.

Nov. 18—"Review of Live Stock Markets," by J. D. Harper, information department of the National Live Stock Producers Association.

"Where Our Lumber Comes From," by Theodore M. Knappen, Director of Research of the National Lumber Manufacturers Association, Washington, D. C.

Nov. 21—"When the Prairie Schooners Stopped," by Arthur C. Page, Editor, Orange Judd Illinois Farmer.

"All Set for the Third National Boys' and Girls' Club Congress," by G. L. Noble, Secretary, National Committee on Boys' and Girls' Club Work.

Nov. 25—"Monthly Analysis of Farm Markets," by H. W. Moorehouse, Howard-Moorehouse Agricultural Business Service.

"What the Illinois Farm Bureaus Are Doing," by H. C. Butcher, Director of Information, Illinois Agricultural Association.

Nov. 28—"A. B. F. Radio Community Meeting"—this will be a special one hour program starting at eight o'clock.

From Station WLS:

Nov. 4—"A Brief History of the Dairy Cow in America" Earl Cooper, Holstein-Friesian Association of America.

"Do You Believe in Price Fixing of Farm Products," by The Inquisitive Broadcaster.

Nov. 5—"Development of Co-operative Live Stock Marketing," C. A. Stewart, Secretary, National Live Stock Producers.

"Hog Fillickerings," E. B. Heaton, Sears Roebuck Agricultural Foundation.

Nov. 7 — "Selling $150,000,000 Worth of Cotton," C. B. Howard, General Manager, American Cotton Growers Exchange.

"John Turnipseed," Prairie Farmer Feature.

Nov. 11—"Growing Into the Dairy Business," C. M. Long, Holstein-Friesian Association of America.

"Will the Tractor Ever Replace All Horses on the Farm?" by The Inquisitive Broadcaster.

Nov. 12—"Development of Co-operative Live Stock Marketing," C. A. Stewart, Secretary, National Live Stock Producers.

"Turkey Talk," Marilla Adams, Agricultural News Service, Chicago.

Nov. 14—"The Pencil as a Farm Implement," M. L. Mosher, Department of Farm Organization and Management, University of Illinois.

"How Our Co-operatives Help to Finance Our Members," A. B. Bing, Secretary, North Carolina Cotton Growers' Association.

"John Turnipseed," Prairie Farmer Feature.

COOLIDGE REQUESTS FARM BUREAUS HELP

(Continued from page 1)

who has been very prominently mentioned for the position, has declared through the public press that he will turn down the job if it is offered to him because he feels, he states, that he can do more good for the farmer outside the Department of Agriculture than he can in it. Several farm organizations had urged him to accept if he were offered the place.

The county Farm Bureaus represented in the 12th district meeting at Morris, Oct. 29, passed a resolution urging Lowden to accept the post if offered him. The Indiana Farm Bureau Federation had also urged Lowden to accept.

Another Claim Settled

Extract from letter to Arthur Butzow, Rossville, Ill.:

We are sending you herewith the Railroad Company's check for $190 in settlement of your claim against them for fire damage to clover meadow, March 27, 1924.

Trusting this matter has been handled to your entire satisfaction and that we may continue to serve you, we are,

Yours very truly,

Transportation Department.

Dairymen and I.A.A. To Work Together

In accordance with the I. A. A. policy of extending its services to any group or organization of agricultural people, a joint meeting of the I. A. A. directors and the executive committee of the Chicago Milk Producers' Association was held recently. Now the two organizations can best work together for the benefit of dairymen in the Chicago territory was the chief topic of discussion.

Farmers Don't Like Consolidated School, Questionnaires Show

One thousand replies to the school questionnaire sent out to Illinois farm bureau members by the I. A. A. educational committee, indicate that farmers are decidedly against consolidation of schools.

An analysis of the answers from farmers shows that 75.4 per cent of them object to consolidated schools while the other 24.6 per cent favor consolidation.

Classification of the reasons given against consolidation puts them as follows, in order of importance: bad roads, other schools systems satisfactory, distance from home is too great, consolidated schools are too expensive to maintain, difficulty in getting children to and from school, increased taxes, impracticability, buildings not located right and too hard on little folks.

Judging by the returns, there is little difference of opinion in northern, central or southern sections of Illinois, all three of which were touched by the survey.

Corn Husking Contest

Prairie Farmer is promoting an Illinois-Indiana corn husking contest to be held in Sangamon county, Ill., in November. Huskers who want to enter should write to Prairie Farmer for entry blanks. These must be filled out, after a husking trial under rules specified in the entry blanks. From the lists sent in contestants will be selected for the contest at Springfield.

Several county Farm Bureaus are holding local husking contests to determine county champions. In other states Wallace's Farmer, Nebraska Farmer and The Farmer, at St. Paul, are promoting contests. An inter-state contest will be held later to pick the grand champion huskers of the Middle-West.

New York Seeks Recruits

In New York, county farm bureau members are forming committees to visit neighbors and invite them to join the Farm Bureau. Farmers are asked to support the Bureau not only because of the facilities which it offers them for self help on matters of state and national importance, but because the local Bureau acts as an agricultural service station for all farmers of the county.

Set Calf Club Record

A new top was reached for the series of auctions of club calves, held in Chicago this fall under the supervision of the International Live Stock Exposition, when a purebred Aberdeen-Angus steer, grown by Ferrel Ogden, Hindsboro, Ill., sold recently for $15 per hundred. His steer came from the same strains that produced "Broadus White Socks," a grand champion at the 1923 International.

The Vermont Maple Products Co-operative Exchange, working with the support of the Vermont Farm Bureau and through Farm Bureaus in other states, is to sell 50,000 gallons of the finest and purest maple syrup obtainable. The Exchange advises middle-western farm bureau members to order direct from the Exchange at Essex Junction, Vermont, or better still to pool orders through their local Farm Bureau.

Less than half the corn in Whiteside county will be dry enough to crib, thinks Glen L. Buck, assistant farm adviser there.

FARMERS REQUEST LOWDEN TO ACCEPT CABINET POSITION

Debate Farm Problems at Conference; Sam Thompson Praises Members

Taxation problems, the Grain Marketing Company and the $100,000,000 bond issue for hard roads were three principal topics that vied for the attention of 70 farm bureau representatives who met in Morris, Grundy county, Oct. 29, for a district conference, called by their district representative, G. F. Tullock. Discussions of these subjects were led in order by J. C. Watson, I. A. A. taxation and statistics specialist; President Sam H. Thompson, and Frank Barton, chairman of the I. A. A. legislative committee.

Geo. F. Tullock

A resolution was passed and wired to former Governor Lowden, requesting that he accept the appointment as successor to the late Secretary of Agriculture, H. C. Wallace, in case he should be asked to serve as the next Secretary of Agriculture.

At the morning session of the conference, Mr. Watson explained something of the tax situation which farmers are facing.

Want Uniform Taxation

"The idea of uniform taxation is the underlying principle upon which the I. A. A. tax work is being done," he said. "We are now looking toward the future and recognize that because lands are easily taxed they are very likely to be over-taxed. To prevent this, county Farm Bureaus should guard their members in all tax matters.

"I am convinced that we must discontinue the issue of tax-free securities," he said in discussing tax-free bonds, "because such a practice shifts a large amount of the tax burden on to those who do not hold the tax exempt bonds."

Mr. Watson advocated a tax on net income based on producing power of property and on income from personal services.

Mr. Thompson made an address in which he praised the work of the Farm Bureaus in Illinois. He paid a tribute to the social life of rural communities and credited the Farm Bureau for the high type of social activity in our country communities.

Members Make I. A. A. Strong

"Service and personal sacrifice by the unpaid members of the Illinois Agricultural Association are the forces that have made our organization a powerful one," he declared, "and I am proud to say that in no state will you find such strong county Farm Bureaus as those in Illinois."

The biggest job the farmer faces is putting agriculture on a business basis, Mr. Thompson thinks. In this period of changing conditions farmers must apply business methods to transportation and distribution of their products just as other big industries do.

"The time has come when some one must speak for the farmers in an organized way," he said. "That is what our I. A. A. is for. Through it the farmers of Illinois can employ the best brains of the country to represent them with other groups."

A vote unanimously approving his stand on the grain merger, was accorded Mr. Thompson by the Farm Bureau representatives.

Hillsdale county, Michigan, the first county in the United States to undertake eradication of bovine tuberculosis and the first to receive the 10 cent premium for hogs from a T. B. free county, has appropriated money to begin a systematic campaign for eradication of tuberculosis in all poultry flocks in the county.

In Kendall county, 43 business men, from towns and cities, are members of the Farm Bureau. The list includes men from every line of trade—druggists, surgeons, bankers, manufacturers, publishers and others.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday—November 22, 1924 | Number 23

LAKE COUNTY FARM BUREAU DOES SOME RIGID RE-TRENCHING

54 Members Pledged To Clean Up $3,200 Shortage—They Did

Three years ago the Farm Bureau in Lake county was in a bad way financially, in spite of the fact that it is one of the oldest farm bureau units in this state. Today it is one of the strongest Farm Bureaus in Illinois, and is financially stable.

The Lake County Farm Bureau is no exception to the rule that back of most worth-while institutions there is a period of pioneering that has made later prosperity possible. The story there centers around 54 members of the Farm Bureau who had the faith and confidence to sign their names on the dotted line of an agreement in guarantee thereby assuring the financial security of their Lake County Farm Bureau.

A Little Past History

It was in the fall of 1921 when they came abruptly up against a serious shortage of funds. How it came about that the Lake County Bureau owed the I. A. A. $3,200 on unpaid memberships already collected isn't of concern now. And whether the deficiency accumulated through mis-management, was resultant of the hard times following the World War or what not—that is history, long since set down in the hazy past by the loyal members of the Lake County Farm Bureau.

Their signed-up membership at that time was around 1,250, the paid-up membership around 600. Therein lay the "why" of their inability to meet a $3,200 obligation to the Illinois Agricultural Association. Theirs was an organization long on quantity but short on quality. It is far different today.

"We didn't really have the membership we thought we had," reflected H. E. Flood, who was president of the Lake County Farm Bureau back in 1921.

Took Bull By His Horns

Realizing the unfairness of the 650 signed but non-paying members in not carrying their just share of the load in their county Farm Bureau, as well as in avoiding payment of dues to the state association, the executive committee of the Lake County Bureau "took the bull by the horns" and determined to wipe out the aggravating $3,200 shortage.

A general meeting of the members was called by President Flood and a committee appointed to confer with I. A. A. officers. At a joint conference the situation was reviewed from the beginning. Together they laid plans for making a genuine clean-up of the entire affair.

"Low as the morale of the Farm Bureau at that time now seems," said Mr. Flood, "we had and still have a lot of mighty loyal members in our Farm Bureau. Our members now are quality members."

Dug Into Their Pockets

And to illustrate his point he related how at one time, during the war, 24 men attached their names to three notes of $5,000 each, advanced toward purchasing a carload of sugar, and how they dug into their pockets to square up the $800 loss which came when sugar dropped 10 cents a pound while they waited for it to be delivered.

These same loyal members, in a local way, got behind the clean-up on back dues. Altogether they collected $1,500,

(Continued on page 4, column 2.)

Beg Your Pardon!

In the last RECORD the dates of the I. A. A. annual meeting were printed as Jan. 16 and 17. It should have been 15 and 16. Please make the change on your calendar. If you have marked the former ones up, if not, better jot down the correct ones.

In speaking of the annual meeting, attention should be directed to the rule passed by the executive committee in its meeting of Nov. 7, pertaining to Section 2, Article III of the constitution of the Illinois Agricultural Association. This rule was passed to regulate the number of delegates from each county Farm Bureau.

The rule follows:

"No credit to be allowed for collections reported made for the current year for which remittances are not made before the close of the fiscal year.

"No credit to be allowed, as heretofore, for amounts received between close of fiscal year and date of annual meeting.

"Credits allowed shall never entitle a county to representation in excess of actual membership."

I.A.C.A. Membership Nears Century Mark

The latest membership figure for the Illinois Agricultural Co-operatives Association, the farmers' co-operative auditing company, is now 95 and promises to go over the 100 mark within a few days, if Organization Director Vaniman's prediction holds good.

The most recent membership contract to be received was that of the DeWitt County Farmers' Fire Insurance Company, the first insurance company to subscribe for the audit service. Since Nov. 1 seven Farm Bureaus, four farmers' elevator companies and one dairy co-op have sent in their contracts.

Meanwhile the work of making audits goes on, according to Geo. R. Wicker, general manager. The 46th examination is now in progress and a large number of examinations have been scheduled for December.

Farm Bureau Prexy On Farm Commission

O. E. Bradfute, president of the American Farm Bureau Federation, has been named by Calvin Coolidge, President of the United States, as a member of an Agricultural Conference Committee of nine members appointed to study the questions of farm legislation. This committee is to complete its study and report back to the present Congress. The first meeting was scheduled for Monday, Nov. 17, at the White House.

Those invited by the President to serve are:

Robert D. Carey, Careyhurst, Wyoming, former governor.

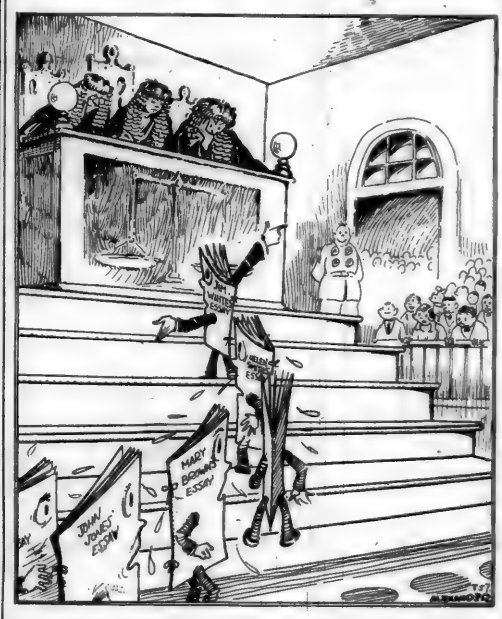
O. E. Bradfute, president of the A. F. B. F.

Chas. S. Barrett, chairman, National Board of Farm Organizations, Union City, Pennsylvania.

Louis J. Taber, Master of the National Grange, Columbus, Ohio.

Ralph P. Merritt, president, Sun Maid Raisin Growers, Fresno, California.

R. W. Thatcher, director of the New York Experiment Stations, Geneva, New York.



W. C. Coffey, Dean of the College of Agriculture and director of the Experiment Station of the University of Minnesota, St. Paul.

Fred H. Bixby, president, American National Live Stock Association, Long Beach, California.

William M. Jardine, president, Kansas Agricultural College, Manhattan, Kansas.

IN JUDGMENT

Watson Represents Farmers' Interests On Tax Committee

The Illinois Educational Commission has called together representatives of civic, professional and trade organizations within the state for the purpose of considering the problems of revenue and taxation with particular reference to the proposal of an amendment to the constitution of Illinois.

J. C. Watson

A subcommittee of eight was appointed to be responsible for a report on the problem to the larger group of representatives. On this subcommittee the Illinois Agricultural Association is represented by John C. Watson, director of the department of taxation and statistics.

It is thought that whatever proposal is made by the subcommittee, of which Mr. Watson is a member, will have the general support of most of the civic, professional and trade organizations, thus assuring good possibilities of passage by the legislature.

Want Watson In Missouri

The Missouri Farm Bureau Federation has requested the assistance of John C. Watson, director of taxation and statistics, in a tax hearing before the Missouri State Tax Commission on Dec. 16. Missouri hopes to follow the trail of the I.A.A. in tax reduction.

Preacher For A.F.B.F.

Reverend John Acheson, well known farm bureau minister of Princeville, Peoria county, has been invited by President Bradfute of the American Farm Bureau Federation to deliver the invocation address at the annual A. F. B. F. meeting of Dec. 8, 9 and 10.

I.A.A. To Breakfast Illinois Boys and Girls In Chicago

"Last call for breakfast!"

This is the call that will usher about 75 Illinois farm boys and girls into a breakfast entertainment Dec. 3, given them by the Illinois Agricultural Association officials when they come to Chicago to attend the International Live Stock Exposition.

Last year the Illinois Agricultural Association entertained the 70 boys and girls of Illinois who earned trips to the big Chicago stock show as rewards for superior club work.

Souvenirs will be given.

New Members In Iroquois

Under the direction of Fred Halm and H. L. Hough, the reorganization of Iroquois County Farm Bureau is going forward in good shape. Old members are signing up and many new members are enrolling.

A series of community meetings have been held in several townships in the county. Several reels of farm movies and talks by Iroquois men and representatives of the I. A. A. feature these meetings at which no solicitation for membership is made.

The purpose of these meetings is merely to tell the public the aims of the Farm Bureau and to show the past accomplishments of the organization.

Illinois now has a 500-pound butter fat cow club. It was organized by the College of Agriculture co-operating with county Farm Bureaus and dairy herd improvement associations.

EAT THAT BUTTER SURPLUS

EXECUTIVES PREVAIL UPON SAM THOMPSON FOR SECRETARY POST

I.A.A. Urges "Our Sam" Despite His Hesitancy—His Name Up

Following President Coolidge's invitation to all state farm bureaus asking for each state's recommendation for the next secretary of agriculture, the I. A. A. executive committee prevailed upon President Sam H. Thompson for his permission to recommend his name to President Coolidge.

Sam Thompson

President Thompson hesitated, and in hesitating, as he, himself, later said, "one who hesitates is lost," became the candidate of the I. A. A. for the nation's most important agricultural post.

Unanimous indorsement was accorded him. The executive committee then took steps to bring his name before President Coolidge.

The action of the executive committee urging President Thompson for the agricultural post was kept secret for several days, it being the desire not to create an impression that the Illinois Agricultural Association wishes to force a "favorite son" into the limelight.

His name has now been brought to President Coolidge's attention.

Born On Farm

President Thompson was born on a 40-acre farm in Gilmer township, Adams county, Aug. 18, 1863. He was the youngest of a family of five children, three girls and two boys. He grew to manhood on this farm and was educated in the local public school, attending school until 21 years old. He married Miss Lemmie Dickhut four years later and the same year purchased an 80-acre farm for $75 an acre, going in debt for the entire amount. Four boys and three girls were born to the Thompsons while on this farm, five of whom are now married and living on farms in the same neighborhood. Two are still at home, though the youngest is now in his last year in the agricultural college of the University of Illinois.

Mr. Thompson has been engaged in grain and live stock farming nearly all his life. He has acquired adjoining land to his first 80-acre farm until now he has a 500-acre farm.

Tax Collector at 22

Mr. Thompson began taking part in public affairs when he became a tax collector at 22 years. He held local, township and county offices. He was a commissioner for nine years, supervisor six years, elected to the General Assembly in 1916, became active in farm bureau work in 1915. He has been one of the state's strongest advocates for organization of farmers. "Sam" was active in the organization of the Illinois Agricultural Association in 1917 and of the American Farm Bureau Federation a year later. He served as an executive committeeman for the 20th Congressional district for three years.

In that capacity he was chair-

President Coolidge's Attitude Toward Farming

Every citizen among us has a personal concern in the welfare of the farmer.

The fortunes of all of us will in the end go up or down with his.

If we ever permit our farming population to fall to the level of a mere agricultural peasantry they will carry down with them the general social and economic level.

The farmer is not only a producer; he is likewise a merchant. It does him no good to get quantity production—in fact, it may do him harm—unless he also can have scientific marketing.—CALVIN COOLIDGE in speech at Washington to representatives of Land Grant Colleges, Nov. 13, 1924.

—o—

The Status of Farm Legislation as Seen by a City Newspaper Writer

What will be the status of farm legislation when Congress re-convenes in December? This is a question being asked by many farmers. Here is a discourse presented by a well-known feature writer of the metropolitan press—William Hard. The article appeared in The Daily News, Chicago, and is reprinted through the kind permission of C. H. Dennis, managing editor.

BY WILLIAM HARD

The farmer is coming back to the corridors of congress next month in the role of a ruthless collector of promissory notes.

His pockets are bulging with these notes. They were given to him by the republican convention last summer in Cleveland and by the democratic convention last summer in New York.

The farmer, it seems, took these notes seriously. They are numerous and they are large. The efforts of the farmer to collect on them from the approaching "short session" of congress will give to that session some of its most serious and some of its most ludicrous moments.

Each party has pledged itself to the hilt to the farmer on propositions which it will find itself much embarrassed to deliver—or even to try to deliver.

The American Farm Bureau Federation nevertheless is going to demand delivery.

Drama and Comedy Due

The scenes which will ensue when this delivery is attempted, or evaded, will provide many columns of intense drama and also of high and low comedy.

The president, it is profoundly believed, is unalterably opposed to taking the government into buying and selling on behalf of the farmer.

The McNary-Haugen bill for taking the government into that sort of thing was defeated in the last session of this congress by a combination, or concurrence, of eastern republicans and of eastern and southern democrats.

The legislative record of the democrats is heavily against such proposals as the McNary-Haugen bill.

Nevertheless, in an interval between fights about the Ku-Klux Klan and the league of nations in Madison Square Garden in New York last June, the democrats managed in their convention platform to indorse the idea of "an export corporation in order that the exportable surplus (of farm products) may not establish the price of the whole crop."

Will the democrats in congress now honor and pay the promissory note thus given to the farmer by the democratic delegates in New York?

That is the question which the American Farm Bureau Federation is going to explore as soon as congress re-convenes.

"The resolution of the American Farm Bureau Federation in favor of the principle of the McNary-Haugen bill still stands and still guides the legislative policy of the federation," says E. B. Reid of the federation's Washington office.

Federation to Meet Here

The federation will hold a meeting in Chicago early in December. At that time it may possibly declare itself in favor not only of the McNary-Haugen bill once more but also of the Williams bill for governmental aid in encouraging the development of co-operative marketing.

It may decide to combine those two bills into one bill with federation support behind it.

Both platforms of last summer—republican as well as democratic—promised governmental aid to the farmer in the matter of co-operative marketing.

It is believed in Washington that the president's new proposed agricultural commission, when it makes its report, will stress the need of more and better co-operative marketing in this country.

The problem is, however:

Are we really going to need to pay out governmental money in this country to hire governmental tutors to teach persons how to organize co-operative societies when the colossal co-operative system of Great Britain came to its present proportions without one trace of governmental advice and without one pennyworth of governmental expense?

That is the criticism which numerous democrats and republicans in congress will launch against the proposal.

In the meantime there will be other proposals equally controversial and equally difficult to accomplish but all pledged and promised by the platforms of both parties.

Lower Freight Rates Promised

Both platforms, for instance, promise the farmer that he will have lower freight rates.

This can be done only by a statute of congress, passed through both houses and signed by the president, overruling and overriding the present views of the interstate commerce commission.

Such a blow to the commission would manifestly totally destroy its prestige and authority as a scientific technical neutral governing body.

Yet that is what both parties are in practice now bound to do, or else eat the words which they uttered in the farm planks of their platforms last summer.

The republicans, moreover, are pledged to take action to give "adequate" protection to all our agricultural products that may be threatened by foreign competition, and many of them, such as butter and vegetable oils, are in fact at this moment so threatened.

The republicans are pledged also to give governmental aid to "diversification" of crops, wherever such "diversification" is needed, and it is needed in many large spots throughout the country.

Pledged to Waterway Systems

The democrats are pledged further to bring about new internal waterway systems in order to carry the farmer's products to market more cheaply.

The democrats are also pledged to lower the tariff for the farmer, while the republicans are pledged to raise it for him.

Both parties, however, are agreed on one final, comprehensive, remarkable idea.

They both are pledged by their platforms to establish an "economic equality" between agriculture and industry. This means, if it means anything, that there shall be a consistency and a correspondence between agricultural prices and industrial prices.

But that is just what the McNary-Haugen bill endeavors to do by means of its export corporation, and nobody has come forward with any other thinkable method for doing it.

Veto by President Seen

Yet even if the democrats should now vote for the McNary-Haugen bill and put it through congress, the president presumably would veto it in accordance with his frequently expressed principles and in defiance of the worship offered to the word "equality" at Cleveland.

The whole situation then becomes this:

The farmer has the promissory notes in his pocket and he morally is in a strong position and has the best of the argument, but in his efforts to cash the notes he is likely to discover, along with some solvency, a certain considerable amount of moral and legislative bankruptcy among makers of platform planks and passers of laws.

"I want to see a good farmer on a good farm raise a good crop and secure a good price."—President Coolidge.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. Tell us your grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

Voice of the Members Column: Our Farm Bureau must exert itself for membership and my opinion is to pay local men for their services instead of hiring men from a distance, for in my county the state solicitors visited only good prospects, and the result was a smaller membership.

Our officials of the I. A. A. and the A. F. B. F. have obtained much through legislation but there are not enough members to co-operate.

M. N. Reinhart, President,
Adams County Farm Bureau, Fowler, Ill.

Dear Sir: In regard to the Farm Bureau, this is the best work that has been done in this part of Egypt. Our adviser is a hard-working man. He would sooner work than eat. Farmers are mostly all hauling limestone now. We all have to keep our noses to the grindstone 16 hours a day to make ends meet.

John H. Huelsmann, President,
Clinton County Farm Bureau, Breese, Ill.

Dear Sir: Forward, Farm Bureau! And success in every respect is my hope and wish. How to make it more successful is now a great question. My idea as well as the idea of some others with whom I have talked is: Reduce dues to $10 instead of $15, thereby increasing our number of members; let the dues be divided, $6.50 for the county and $3.50 for the I. A. A. dues or something along that line. Then place the dues on a sliding scale, each man paying according to membership and farming interests. Yet a more even deal to be to place it onto the regular taxes and have the County Agent paid like other county officers, if such were possible.

W. F. Engelman, President,
Christian County Farm Bureau, Nokomis, Ill.

Dear Members: The Farm Bureau is looked upon in a variety of ways. Some look for the social benefits and in a measure find satisfaction in the picnic, tours, moving pictures, etc. The educational features, such as soil and crop demonstration meetings, with good speakers, appeal to some. Others look for the financial gain only. The Farm Bureau has several, many of these through the purchasing of seeds, coal, feeds and apples, at a great saving. Then there are those who look for NOTHING, and claim they are getting it. We also find a goodly number of those who see all these things, and, realizing the value of united effort and the power of co-operation, see, in the future, the possibilities of the Farm Bureau.

It shall bring about these conditions which the farm folk need as much and see sincerely desire. These things, however, come slowly; it takes time, yes, even years of united effort, to perfect an organization and unite so vast an army of people who have been laboring single-handed for so many years. It will come about, but the oak grows slowly, through years of stormy weather, from the little acorn to the great monarch of the forest.

D. H. Minto, President,
Lake County Farm Bureau, Antioch, Ill.

Amboy, Illinois, Oct. 27, 1924.

Dear Mr. Butcher:

The stamped envelope adheres to the stamp so closely that I can't get them apart so I feel obliged to use this letter for reply.

I am interested in your definition of "News" but since the construction of Route 2 through Amboy commenced there are so many dogs running around nearly all the dogs have been run over and killed—at least the kind that bites men and that gets all chewed up by a man in very seance. If that was the worst that could be said about the auto it would not be so bad but they don't only run around, they run over our chickens; they run after moonshine; they run off with our girls; they run their owners in debt and they run down so fast the mortgagee can't realize much on his security when the notes come due.

If Amboy and Lee county farmers are better off than some of their neighbors—and we believe they are a fact—it may be attributed to the late development of the dairy industry. Amboy has a five-year-old, farmer-owned milk evaporating plant. The maximum capacity of 2,000 cases a day has not as yet been tested but during the past season there has been a 25 per cent increase over last season. The men operating the factory know how to make salable milk and it goes out as soon as it is ready for shipment—no stock on hand and the farmer gets his money every month. Having the cash he need not ask his merchant for credit and the merchant may in turn pay cash to the wholesaler. At the same time the dairy farmer—or diversified farmer—is maintaining the fertility of his farm much better than the "all grain" farmer can do.

Yours truly,
W. A. Green, Amboy, Lee county.

Mr. Van Heeren has written the letter below in response to the question, "What benefits should a farmer expect from co-operative marketing?"

Dear Sir:

You asked me to answer on back of enclosed letter but George Jr. has made use of it, so will pin this reply to said letter.

"What benefits should a farmer expect from co-operative marketing?"

One benefit farmer should expect from co-operative marketing would be a better market for farm products.

For example: I have about 16 acres of potatoes this year and yield is good and potatoes excellent. I have tried to sell to nearly every hotel, restaurant and grocery store in town and no one wants potatoes. The price is from 35 to 50 cents per bushel.

I paid a hired man to limestone the ground used for the potatoes, and paid for clover seed, sown and plowed under, on ground used for potatoes. Paid $1.50 per bushel for some of seed potatoes bought from Co-operative Market company. Paid 1.20 per bushel for some seed at grocery store, better than seed bought at Co-op for $1.50. Some of seed, I raised last year and stored in the cellar and furnished stove and fuel to keep it from freezing during the winter, and some I got elsewhere. Spent many weary hours cutting over 200 bushels of seed. Paid $1.00 per acre for use of planter. After planting, went over potatoes eleven times, paying a hired man $40 per month besides his board, room and laundry. Paid $120 for a potato digger, besides the work of digging, picking up, weighing and hauling and unloading.

Why and how do grocers have potatoes shipped in cheaper than home grown ones, and why should farmers trade at home instead of mail order houses, when home folks will not trade with farmers, or, if so, skin them? Can farmers afford such markets for farm products?

I think the subject of markets for farm products should receive much consideration in co-operative marketing and is one of the benefits a farmer should expect.

George Van Heeren, Freeport, Ill.

Dear Sir:

"What benefits should a farmer expect from co-operative marketing?"

He has a right to expect his farm products to be marketed in the best way possible and on a cost basis.

Herman and Fred Vehslage, Havana, Ill.

Dear Sir:

I received your letter in regard to co-operative marketing, and in reply will say that I think the farmer would be benefitted by it. All other laborers are benefitted by a union and I think the farmer would be also. He could set a price for his farm products and get it, the same as other organized laborers do.

William Hays, Pekin, Ill.

ESSAY JUDGES MEET NOV. 25 TO CHOOSE ILLINOIS CHAMPIONS

National Committee Convenes Nov. 22 To Pick Four Regional Winners

One anxious boy or girl champion in each of the 22 Illinois counties entered in the farm bureau essay contest eagerly awaits the announcement of the winning essays. For these boys and girls, Nov. 25 is an important date. On that day the judging committee will pick the winners for Illinois and award, in 13 cash prizes, the $75 given by the Illinois Agricultural Association.

November 22 is no less important a date for the 156 county champions, including the 22 from Illinois, who represent their respective counties from 27 states with prize winning essays. That day the judging committee of the American Farm Bureau Federation will meet to begin the task of choosing four national regional winners in the contest on "Why Dad Should Belong to the Farm Bureau."

The National Judges

This committee consists of H. F. Harrington, director of the Medill School of Journalism, Northwestern University; Mrs. Grace Viall Gray, home economics specialist for the National Live Stock and Meat Board; and Frank Ridgway, agricultural editor for the Chicago Tribune.

The director of the contest for the American Farm Bureau Federation says the winners will be announced in plenty of time to allow them to arrange for their free trip to the annual meeting of the A. F. B. F. in Chicago, Dec. 8, 9 and 10. One winner in each of the four national regions of the organization will be given such a free trip.

On the committee to select winners for Illinois are C. V. Gregory, editor of Prairie Farmer; Arthur C. Page, editor Orange Judd Illinois Farmer; Sam H. Thompson, I. A. A. president; C. E. Hay, farm adviser of Christian county; and J. E. Hill, state supervisor of agricultural education. Mr. Hill is taking the place of Francis G. Blair, state superintendent of schools, who was unexpectedly called out of the state.

Some County Winners

Essays written by the following county champions had been received by Monday, Nov. 17, by the I. A. A. information department to be considered for state championships: LaVeta McQuigg, Sciota, McDonough county; Dorothy Heckman, Cerro Gordo, Macon county; Curtis Weathers, Ford county; and Everett A. Sancken, Saunemin, Livingston county. The names of winners in other counties have not yet been received.

There was a last minute rush by many boys and girls to enter the contest just as it closed Nov. 10. There were 156 counties from 27 farm bureau states that got in under the deadline. Eleven of the counties entered more than 100 each. Hillsboro county, New Hampshire, entered the largest number of names, having 273 contestants.

Macon county with 130 names entered and LaSalle county with 153 led in Illinois.

Wide-Spread Interest

Something of the wide interest aroused by the contest is shown by the number of newspaper clippings received by both the I. A. A. and the American Farm Bureau Federation. Hundreds of them have been pouring into the information departments of these two organizations. More than 4,000 requests for material on the Farm Bureau were received by H. R. Kibler, contest director for the A. F. B. F., and a proportionately large number came to the I. A. A. from Illinois boys and girls. In answer to these Illinois requests 1,200 specially prepared booklets and sheets of information were mailed to contest directors in the 22 Illinois counties that promoted the contest.

One of the valuable helps has been the interest aroused in the schools in the contest. Several school teachers have enrolled every one of their pupils. Local business men have sponsored the essay contest and many have cooperated with the county Farm Bureau in offering county prizes for the best essay in that particular county.

Announce Winners Later

Aside from the tremendous publicity value to the Farm Bureau, county, state and national, and the interest which will unquestionably be aroused among the parents of the boys and girls and the subsequent help in organization drives, is the value which comes to the boys and girls themselves. They are the ones, after all, who are enjoying the contest most thoroughly.

The next issue of the RECORD will carry a complete list of county, state and national winners in the contests.

Pooled Insurance Will Save Money For Shipping Units

Pooling insurance through the Illinois Agricultural Association will save considerable money for shipping associations, according to Wm. E. Hedgcock, director of the live stock marketing department.

Wm. E. Hedgcock

An arrangement with the Fidelity and Casualty Company of New York, through Franklin. N. Burns, Chicago agent, has been completed whereby insurance covering the liabilities possible under the Illinois Workmen's Compensation law can be obtained by individual shipping associations at its exact pro-rate share of the cost as purchased by all.

Absorbs Liability

The Workmen's Compensation law provides that if an employe is injured in the course of his occupation, the employer is liable for all expenses and for indemnities as set forth in the law. This kind of insurance absorbs the liability from the shipping association.

"The plan can be extended to take in any shipping association in the state which wishes protection," Mr. Burns stated, "and simply by paying the charge based on its actual payroll for the year. To make the plan uniform, all payrolls are figured from the time of taking the insurance up to Dec. 31, 1925."

How It's Figured

An example of how this plan works for the Blank Shipping Association is shown by Mr. Burns as follows:

Managers payroll—Nov. 14, 1924 to Dec. 31, 1925	$600
Payroll for other help—Nov. 14, 1924 to Dec. 31, 1925	400
Total payroll	$1,000

"In the case 75 per cent of the shipments are hogs and sheep and 25 per cent of the shipments are cattle:

$750 payroll @ $0.62 per $100	$5.10
250 payroll @ 1.89 per $100	4.72
	$9.82

"This $9.82 represents the cost of insurance up to Dec. 31, 1925, on the payroll as estimated. To purchase this insurance individually would cost the Blank Shipping Association the minimum premium of $27.00.

"Shipping associations which take advantage of the I. A. A. plan not only benefit by the lowest possible cost but relieve their responsible managements from trouble and possible financial loss in case an employee should be injured."

Six Saved $107.64

Six associations have already taken protection under the I. A. A. blanket insurance policy. These six paid a total of $90.67 through the I. A. A., whereas under the old system the same protection would have cost them $198.31, according to Mr. Hedgcock. This means a saving of $107.64 for the six associations. There are 531 live stock shipping associations in Illinois, which indicates that a tremendous saving can be effected if others sign up under the new plan.

Application blanks may be obtained by writing Mr. Hedgcock, care the I. A. A.

Montgomery County Owns Its Farm Bureau Building

Not many county Farm Bureaus own their office buildings and still fewer can boast ownership of a building constructed and designed especially for the convenience of farmers and the Farm Bureau. Such a building is owned by the Montgomery County Farm Bureau at Hillsboro, Ill.

A little over two years ago the Montgomery county Bureau and the Farmers' Mutual Fire and Cyclone Insurance Company decided they could erect and occupy the same building to mutual advantage. A lot was purchased jointly and a handsome two-story brick building erected at a total cost of $10,000, including the lot. It is now known as the Farmers' building.

The street on which the Farmers' building is located is a real farmers' street, according to Sam Sorrells, Raymond, executive committeeman from the 21st district, who furnished the accompanying picture of their farm bureau building. You can almost recognize a figure back of the Ford. That is Farm Adviser A. E. Snyder.

The Farm Bureau occupies the entire first floor of the building. A large reception room, furnished with chairs, tables, desks and seed shelves, where farmers meet to visit and transact business; four offices occupied by the Farm Bureau, a government veterinarian, the Farm Loan Board and the manager of the county shipping association; and a basement with plenty of storage space, are features which make the building especially adapted to the needs of the Farm Bureau.

Plan Survey of Chicago's Poultry And Egg Market

A survey of the Chicago markets for the purpose of collecting information concerning poultry and egg marketing, and with the possibility of creating special markets for high quality poultry products, is to be undertaken by the poultry and egg department, according to the report made by C. E. Bamborough, Polo, committeeman for the 13th district and chairman of the advisory committee for that department.

C. E. Bamborough

"This work should be in the nature of a very detailed survey," Mr. Bamborough reported. "Information thus collected would be exceedingly valuable to a marketing association for poultry and eggs."

F. A. Gougler, director of that department, has attended the farm advisers' conferences held at Centralia, Decatur, Chicago and Galesburg, where he has shown the film "Unscrambled Eggs" which portrays a Minnesota co-operative egg marketing association from hen to housewife.

Counties Ask Help

Requests have been coming to the department asking assistance to look into the possibilities of setting up co-operative poultry and egg marketing associations in DeKalb, Fulton and Hancock counties.

The farm-to-farm survey to dig out the rock bottom facts which will some day form a basis for a state-wide poultry and egg marketing project has been continuing in Wayne county. Two townships have been completed in the survey and two others are more than half finished. Wayne county was taken as typical for southern Illinois. No work has been done yet in collecting information from egg dealers, but it is hoped by Mr. Gougler that this phase of the survey can be gone into at an early date.

F. A. Gougler

A bulletin showing the results of the poultry and egg survey will be printed about the first of the year, Mr. Gougler says.

Producers Pay Best

The Iowa Co-operative Shippers have just recently made public the results of a study of returns from 1,010 cars of hogs showing a comparison of returns on stock shipped direct to the Chicago Producers and to old line commission companies.

Sixteen old line firms received cars from the Iowa shippers at the same time as did the Producers, with the following results:

Producers cars secured $7.07 net per hundred weight while the others netted $6.93. For a load of 17,000 pounds the owners consigning to the Producers netted $23.49 more returns direct from account sales and in addition a refund averaging about $5.34. This makes an advantage of $28.83 a car in favor of the Producers.

Chicago Producers Grow

The records of the Chicago Producers shows an increase in their business. Comparing the records of last year with those of the last four months the Chicago Producers' cattle market shows a gain of 22 per cent, the calf department shows 38 per cent gain and the sheep department a gain of 25 per cent. Due to the decrease of 18 per cent in number of hogs coming to market, this department has not had an unusual growth.

The Chicago Producers now have a special "out" hog salesman. This salesman, Randall Grimes, formerly with the St. Louis Producers, gives all his time to sale of "out" hogs.

For the week ending Nov. 14, Chicago Producers handled 74 cars of cattle, 287 cars hogs, 36 cars sheep for a total of 397.

Pass 12,000 Car Mark

During the week ending Nov. 14, Missouri shippers consigned 148 cars of live stock to the St. Louis Producers. Illinois shippers consigned 101 and Iowa 39. Shipments from all other states totaled 26 for a grand total of 314, exclusive of stocker and feeder purchases.

With 44 cars received Monday, Nov. 17, the St. Louis Producers passed the 12,000 car mark for the year. The goal for this year is 14,000 cars.

S. S. Seller, Wabash county, Ill., topped the St. Louis hog market through the Producers, Nov. 12, with 70 head weighing 230 pounds and selling for $9.85.

On Nov. 13, Ralph A. Woods, Fulton county, Ill., was with the St. Louis Producers for the hog market top of $9.70. His 80 head averaged 233 pounds.

PICK COMMITTEE TO REPRESENT ILLINOIS AT A.F.B.F. MEETING

I.A.A. To Help Farm Bureaus File Applications For Tax Exemption

At least four and possibly five I. A. A. executives will represent the Illinois Agricultural Association at the annual meeting of the American Farm Bureau Federation at Chicago, Dec. 8, 9 and 10.

President Sam Thompson, Quincy; Vice-President Watson, DeKalb; Frank D. Barton, Cornell, and Earl C. Smith, Detroit, executive committeemen for the 17th and 20th districts, respectively, were chosen by the entire executive committee as the I. A. A. spokesmen in the national conclave.

A. R. Wright of Varna, committeeman from the 15th district, was selected in case the I. A. A. is entitled to five directors. Whether or not a fifth director is required depends upon the number of paid-up memberships yet to be transmitted from the I. A. A. to the national organization. In a report to the executive committee, Secretary Fox said that $28,000, representing 56,000 memberships, had been transmitted to the A. F. B. F. up until Nov. 1. Probably $3,000 more will be transmitted by the annual meeting.

Discuss Tax Exemptions

Treasurer Cowles and George R. Wicker, director of co-operative accounting, gave a joint report on the status of tax exemptions for county Farm Bureaus and co-operative associations. Both men, as well as Geo. E. Frazier, Chicago, audit counsel for the I. A. A., had been to Washington, D. C., in an effort to secure rebates for a number of county Farm Bureaus and farmers' elevators which have turned their collections over to the I. A. A. Since the proper preparing of accounts is necessary before claims can be presented, and expert knowledge of presentation necessary, the following recommendation was submitted by the finance committee:

"We, your finance committee, have had called to our attention the fact that a large majority of the county Farm Bureaus have failed to file federal income and capital stock returns. The form of organization of county Farm Bureaus is such that they are exempt from payment of tax, but the law requires that evidence of exemption be filed with the proper authorities. Failure to comply with these regulations makes a county Farm Bureau liable to the imposition of penalties. In view of the facilities now available in the offices of the Illinois Agricultural Association, and whereas the preparation of the necessary documents by the officers of each individual Farm Bureau would require a knowledge of law not readily available to them, your finance committee moves the adoption of the following resolution:

"**Moved, that the Illinois Agricultural Association offer all affiliated Farm Bureaus its services in the preparation and presentation of applications for exemption and that no charge be made for representing Farm Bureaus before the Internal Revenue Bureau; and, further, that charges be made only in such cases as require additional expense in securing data and information required in the preparation of reports and briefs.**"

The resolution was passed.

A budget committee was elected, consisting of President Thompson, Secretary Fox and the members of the present finance committee, who are: Frank D. Barton, Cornell, chairman; Earl C. Smith, Detroit, and W. H. Moody, Port Byron. This committee will dictate where the Farm Bureau members' money shall be invested for bettering agriculture during 1925.

Contest Postponed

The Illinois-Indiana corn shucking contest, scheduled to be staged in Sangamon county, Ill., Nov. 14, was postponed on account of bad weather. The later date of Nov. 21 was set.

RADIO FANS! TUNE ON WCK, ST. LOUIS, WEDNESDAYS AT 7:40

I.A.A. Will Provide Farm Program For Benefit of Southern Members

Radio fans in southern Illinois who have experienced difficulty in receiving the Chicago radio casting stations, will now have an opportunity to hear I. A. A. speakers and men who are interested in farming through the inauguration on Wednesday night, Nov. 26 at 7:40 of the Illinois Agricultural Association farm program over WCK, the Stix, Baer & Fuller station at St. Louis.

Stanley Castle

Stanley Castle of Alton, executive committeeman for the 22nd district, will officially open the I. A. A. program over WCK and he will also tell of how the Illinois Agricultural Association is helping to re-build the southern Illinois soils. A. D. Lynch, director of the dairy marketing department, will talk immediately after Mr. Castle giving a word-picture on what he terms: "The Dairyman's Paradise."

The I. A. A. radio program over WCK will be given every Wednesday evening from 7:40 to 8:00 during the winter. When holiday events happen to come on Wednesdays, such as Christmas Eve and New Year's Eve, the I. A. A. program will be shifted to some other night. The RECORD will contain full information on I. A. A. speakers.

The East St. Louis Producers, the Missouri Farm Bureau Federation and the Ill-Mo Dairy Company of E. St. Louis have been invited to provide speakers for the I. A. A. program.

Listen In!

I. A. A. Farm Program

From Station WCK, St. Louis
Time: Wednesday evenings, 7:40-8:00

(This program is arranged particularly for the benefit of southern Illinois farm bureau members who have had difficulty in hearing the Chicago stations. Letters and suggestions would be appreciated. Address the I. A. A. department of information.)

Nov. 26—Official opening of I.A.A. farm program over WCK by Stanley Castle of Alton, Madison county. Mr. Castle is executive committeeman for the 22nd district and chairman of the advisory committee for the phosphate-limestone department. His principal talk will be on "Re-building our Southern Illinois Soils" with special reference to the work done by the phosphate-limestone department.

"The Dairyman's Paradise," by A. D. Lynch, director of dairy marketing of the I. A. A.

Dec. 3—"What the St. Louis Producers Are Doing," by A. D. Wright, manager of the Producers Live Stock Commission Association, National Stock Yards, Ill.

"Why Cream Tests Vary," by A. E. Richardson, general manager, Ill-Mo Dairy Company, E. St. Louis.

Dec. 10—Dairy talk by G. Edwin Popkess, editor of the Dairyman's Journal, E. St. Louis, Ill.

Dec. 17—Samuel Sorrells of Raymond, Montgomery county, executive committeeman for the 21st district and chairman of the live stock marketing committee of the I.A.A., on the activities of live stock marketing department.

"News About the Nation's First Live Stock Producers Market," by W. T. Angle, director of information Producers Live Stock Commission Association, National Stock Yards, Ill.

This is the last of the November program over KYW:

Nov. 25—"Monthly Analysis of Farm Markets," by H. W. Moorehouse, Howard-Moorehouse Agricultural Business Service.

"What the Illinois Farm Bureaus Are Doing," by H. C. Butcher, Director of Information, Illinois Agricultural Association.

Nov. 28—"A. F. B. F. Radio Community Meeting"—this will be a special one hour program starting at eight o'clock.

Attention, Radio Owners!

When you hear an Illinois Agricultural Association man speak over the radio, please write and tell us. It takes considerable time and effort to prepare and give radio talks—much more than the casual tuner-in appreciates—and the only way to check up on whether or not the I. A. A. talks are reaching the goal—which is YOU—is by the letters or cards received from radio owners.

20th District Farm Bureaus Hold Meet

Sixty-five farm bureau members from the 20th Congressional district met in Jacksonville, Morgan county, Oct. 31, for the last conference of the year. The meeting was called by executive committeeman Earl C. Smith, Detroit, who presided.

At the morning session, Geo. A. Fox, I. A. A. executive secretary, explained the stand taken by the Illinois Agricultural Association on the Grain Marketing Company.

A luncheon and round table discussion of projects that are of special interest to farmers followed the morning program. Plans for the coming year were outlined.

LAKE COUNTY FARM BUREAU RE-TRENCHES

(Continued from page 1.)

practically a half of what they owed the I. A. A.

In the meantime, however, the I. A. A. was not left holding the sack. A promissory note was drawn up for the $3,200 with two years in which to pay. The note was signed by President Flood and Secretary E. B. Jordan. To make the note absolutely good an "agreement in guarantee" was executed and signed by these 54 loyal Lake County Farm Bureau members:

W. E. Watkins, farm adviser at that time; G. R. White, D. H. Minto, now president of the Lake County Farm Bureau; L. A. Huebach, now treasurer; Ralph Rouse, H. E. Flood, Elliott P. Bacon, W. F. Burh, John G. Wirts, L. W. Wakefield, R. F. Rouse, present vice-president; E. Wilcox, Gordon Ray, Earl H. Kane, Robert R. Rouse, H. A. Eggers, Albert E. Dyer, LeRoy Kane, Arthur Holland, Park Allanson, R. J. Lill, Paul H. Allanson, J. W. Cooper, Edward Gosswiller, H. C. Ames, E. B. Jordan, Andrew Effinger, Douglas V. Wait, A. O. Rockenbach, Leslie Bonner, Fred W. Brown, C. F. Richards, E. F. Clark, Geo. Koppenhoefer, John Strahan, Emmet W. King, Henry Olson, F. H. Faulkner, F. L. Newell, Wm. C. Dillon, Fred Grabbe, John E. Barrett, E. J. Giss, R. B. Dixon, H. K. Vose, Ney Lamb, Wm. F. Flood, E. Lossman, G. T. McCullough, John Thomas, R. E. Thomas, E. E. Marsh, L. J. Metcalf, F. Gripton.

Assured Payment of Note

The agreement of guarantee signed by these men bound them to the extent of $100 in paying off the obligation to the state association in the event it was not paid with funds acquired from other sources. Their confidence in the principles of the Farm Bureau was not to be in vain.

Because they got back of their organization in a business-like way they were able to meet the note when it came due. In addition to $1,000 in back dues collected by local members, $1,500 from the same source was obtained by a lengthy solicitation made by M. J. Wright of Woodstock, McHenry county, and E. R. Moore, a booster in the Lake County Bureau.

Another plan which proved profitable was the staging of a "Farm Bureau Day" at the Lake County Fair. The fair was turned over to the members of the Farm Bureau for the day. Their share was to be 25 per cent of the gate receipts. There was a big expense in promoting the affair, as there was in making all their collections, but receipts were nearly $1,000 and the net profit was $700.

90 Per Cent Paid Up

And then came their first reorganization in the fall of 1922. It gave them 670 members, according to Farm Adviser J. J. Doerschuk, 90 per cent of whom have paid their membership fees.

With money acquired from three major sources, collection of back dues, holding of a "Farm Bureau Day" at the County Fair and a re-organization on a quality basis, along with organized and orderly support of its members, the Lake County Farm Bureau was able to put itself back on a substantial basis. The $3,200 note was cancelled Oct. 3, 1924.

Stronger Than Before

And with the cancellation of that note, it might be said that the Lake County Farm Bureau came into a new era. Not that it had been flat on its back, busted, broke, stuck in the mud or crying for help—the situation was never that. But these Lake county farmers came out of that period of hard times not only free of debt but with a far better organization than they had before they were forced to retrench.

With less than half their former membership, built now on a 'cream' instead of a 'skimmilk' foundation, they have one of the strongest Farm Bureaus in Illinois. The reason is best told in the words of a Lake County Farm Bureau member, who said, "It's because we are determined that our Farm Bureau shall not fall down."

This picture was taken in the office of the Lake County Farm Bureau at the time of its re-organization in 1922. Top row, left to right: Blanche Osborne, office secretary; L. A. Heubsch, treasurer; J. J. Doerschuk, farm adviser; E. B. Jordan, former secretary; M. J. Wright, McHenry county, who helped in re-organizing.. Bottom row: E. P. Bacon, vice-president at time of re-organization; D. H. Minto, president, and H. E. Flood, former president, who was made honorary member of the executive committee.

URGE SAM THOMPSON FOR SECRETARY POST

(Continued from page 1.)

man of the I. A. A. legislative committee from the time it was organized and was chairman of the finance committee. In January, 1923, he was elected president of the Illinois Agricultural Association and still holds this position. He is also a member of the executive committee of the American Farm Bureau Federation.

"Sam" Is a Methodist

Mr. Thompson is a strong church man, having been united with the Methodist Episcopal church when 12 years old and having worked actively in the church and Sunday school ever since.

In 1918, he gave up his active farm life to move into Quincy, where he was elected president of the Broadway Bank of Quincy, which position he now holds. He has always been identified with the improvements and progressive ideas of modern agriculture, and has been public spirited in serving his community.

President Thompson is held in high regard by his associates. The insistence of the I. A. A. executive committee that he become a candidate for the agricultural post came as a recognition of his leadership. It was the unanimous sentiment of the executive committee that no man could be a truer representative of farming interests than could "Sam."

Farm Bureaus In Little Egypt Hold District Meeting

Farm Bureaus of the 25th Congressional district met in Marion, Nov. 14, for the 4th and last district conference of the year, called by Executive Committeeman Vernon Lessley. Unfortunately, rain and bad roads prevented Mr. Lessley and many others from attending the meeting, but twenty-five representatives from Williamson, Jackson and Franklin counties were there.

Vernon Lessley

At the morning session, Williamson county adviser W. K. Galeener, presiding, opened an exchange of ideas on the use of limestone and phosphate in building up the fertility of soils in southern Illinois. Farmers in this section generally recognize the value to their farms in extensive use of sweet clover and other legumes.

Talk Grain Marketing

An explanation of the grain merger, whereby four old line grain companies merged and offered to sell their properties to farming interests, was made by L. A. Evans, auditor for the I. A. A. Mr. Evans gave as the reasons for the refusal of that association to endorse the grain merger, the fact that the merger companies would not provide the information asked for relative to the status of their business during each of the last five years and the belief that the Grain Marketing Company was not being operated on truly co-operative principles.

To End Rabbit Menace

The revision of state game laws got considerable attention at the afternoon meeting. Farmers generally are disgusted with the closed season on rabbits. These pests have increased until young fruit orchards cannot be planted with safety because the rabbits kill the trees by nibbling the bark off the tender young trunks.

The conference voted to request the legislative department of the Illinois Agricultural Association to secure repeal of the closed season on rabbits and to further protect quail.

The following farm bureau members attended the meeting: A. M. Spitznass, A. H. Braeking, E. E. Feurer, F. H. Ruhe, Jacob Krumrey, R. O. Spitznass, E. A. Fry, H. C. Klope, W. L. Elliott, J. F. Collins, Carl Oeth, H. J. Dahmer, Farm Adviser W. K. Galeener, Marion county. H. A. DeWerff, farm adviser, D. M. Parkhill, Glen Hamilton, Matt House, E. J. Avis, J. R. Kelly, Sam Webb, Franklin county. Fred Dietz, Louis Dietz, Jr., Philip Dietz, C. J. Thomas, farm adviser, Jackson county.

EAT SURPLUS, SAVE PRICE

I.A.A. LIVE STOCK DEPARTMENT SELLS 93,637 POUNDS WOOL

Prices Highest In Years; Expect Increased Production Next Year

Four hundred and twenty Illinois farmers have sold wool through the pool promoted this year by the Illinois Agricultural Association, according to Wm. E. Hedgcock, director of the live stock marketing department.

The 93,637 pounds brought a gross return to farmers of $40,202.83. Prices ranged from 34.5 to 51.2 cents per pound, depending upon the grade, the bulk selling between 40.5 to 51.2 cents. In all cases the National Wool Warehouse and Storage Company, which handled the wool, received top prices for all grades on the day its was sold.

Prices Have Been Good

Most of the clip was sold Sept. 4 to 23, some as late as the first week in October, at an exceptionally good price. Through the pool, wool sold as high as 15 and 25 cents in some cases, above the prevailing local prices at the time it was clipped.

A second pool is now being made to care for the large amount of wool yet on Illinois farms. Consignments for this second pool must be made immediately, according to the National Wool Warehouse and Storage Company's management, who say the present price is somewhat above the September market.

Why Pool Pays

Mr. Hedgcock points out several advantages to the farmer in pooling his wool crop: (1) The pool eliminates the small local dealer who otherwise would buy the wool and ship either to a larger dealer or direct to a commission firm. In either case the dealers are eliminated and their charges for handling saved to the farmer. (2) "Tags" sold for 11.4 cents per pound through the pool. Dealers would have paid nothing. (3) By selling through the pool the shipper gets the mill price less freight, storage and insurance charges. It is the most direct way of marketing possible.

First Pool in 1919

The I. A. A. wool pool originated in 1919 when farmers were getting as low as 10 and 12 cents per pound for their clip. The I. A. A. took up the problem and established a pooling plan which has been maintained each year.

In 1921 and 1922 the I. A. A. had nearly a half million pounds of wool converted into blankets in order to improve the market price of the product. The last of these blankets were sold early this fall.

Due to the extremely low prices of wool in recent years the production of this staple product in Illinois has been materially reduced. With a much improved price this year indications point toward a marked increase in the 1925 wool crop.

Co-op Short Course

Completion of plans whereby managers of co-operatives can get a four-weeks' course in co-operative marketing at low cost will be one of the major activities of the International Institute of Co-operation when it meets in Chicago Dec. 4. The Institute was formed by leading agricultural economists at Cleveland during the summer for the purpose of spreading the gospel of co-operation to managers and directors of co-ops and students, both graduate and under-graduate, who are interested in co-operative marketing.

Geo. R. Wicker, director of co-operative accounting, represents the Illinois Agricultural Association. He is secretary of the Institute's organization committee.

Fred Diehl, farm bureau member in Carroll county, has just received $25 in settlement for loss on two young hogs which were killed on the C. M. & St. Paul right-of-way along his farm. His hogs got through the railroad's fence which was badly in need of repair. The claim was collected through the I. A. A. transportation department.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday—December 6, 1924 | Number 24

COUNCIL CONVENES TO DRAFT BILL FOR AID OF AGRICULTURE

Organizations Aim To Prevent Recurrence of Farm Products Depression

By a declaration that the agricultural depression has not been totally abated nor the cause of depression removed through the circumstances of increased prices on some farm products, the legislative committee of the American Council of Agriculture was directed by the conference of farm organizations, meeting in Chicago, Monday, Dec. 1, to continue its efforts to secure the enactment of national legislation bill to improve farming conditions and guard against the recurrence of depression.

George N. Peek

"A depression as extensive and as serious, or vastly more so," declared George N. Peek, president of the Council in opening the conference, "is likely to result again just as soon as world crop production conditions become normal unless action is taken that will give American agriculture the benefit of the American protective principle." Confirmation of this statement was made by practically all subsequent speakers.

50 Organizations Attend

The conference of farm organization representatives called under the auspices of the American Council of Agriculture convened with representatives from fifteen states and some forty or fifty farm organizations attending.

The legislative committee of the Council, which embraces representation from practically all sections and numerous types of farm organizations, was instructed to ask for early conference with the agricultural commission appointed by President Coolidge to enlist the co-operation of that body with the view of securing Congressional action in the present session.

Must Prevent Recurrence

The admission of all three political parties of the fact that American agriculture is not upon an equality with American industry and labor was cited as national acknowledgement that something definite and satisfactory must be developed and put into effect if a recurrence of the agricultural depression is to be escaped. Legislation designed to satisfactorily effect disposal of surplus crop production without effect upon the domestic market is to be the aim, according to a resolution adopted at the close of the conference.

I. A. A. representatives at the conference were F. D. Barton, Cornell, 17th district committeeman and Treasurer R. A. Cowles.

I. A. A. Backs Census

Many inquiries have come to the I. A. A. regarding the agricultural census soon to be made. In answer to these inquiries the I. A. A. legal department reports: (1) The census questions must be answered honestly. (2) Other business is likewise subjected to a similar census. (3) The Farm Bureaus and I. A. A. should back the census because it will furnish valuable agricultural statistics.

Fare and One-Half To Annual Meeting

Illinois people will be able to travel to the annual meeting of the I. A. A. at Urbana, Jan. 15 and 16, for fare and one-half, according to a late announcement of the Western Passenger Association.

Open rate of fare and one-half for the round trip, with minimum excursion fare of $1.00, has been authorized for those attending the annual I. A. A. meeting and the annual Farmers' Week program.

These rates will be allowed from all points in Illinois and from St. Louis, Mo., between Jan. 10 and 17 with final return limit of Jan. 19. No stop-overs to be allowed.

"No credentials are required to obtain these rates," says L. J. Quasey, director of the I. A. A. transportation department, who asked for the cut rates. "Anyone going to Champaign or Urbana that week can enjoy the reduced fare."

Adjust Fertilizer Troubles Through I. A. A., Says Bent

One of the principal duties of the phosphate-limestone department is that of providing to the county Farm Bureaus and the individual I. A. A. members careful supervision of limestone shipments as to quality of stone and service rendered by the producing companies.

Recently several shipments of bad stone got away from one of the plants. When complaints came in through the Farm Bureau, J. R. Bent, director of the department, got busy with the sales force of the company concerned. The trouble was located and satisfactory adjustment made through refunds and discounts in weights and payments.

"The producing companies appreciate having these adjustments handled through one channel," Mr. Bent stated. "They feel that such a method insures uniform justice and fair play to themselves as well as to the purchaser. It is also the best means of correcting unsatisfactory conditions and lessening their recurrence in the future.

Farmers Meet Town Men

About 650 people attended a farmer-business man's banquet in Peoria last month, the first occasion of the kind ever put on in Peoria. The crowd was so great that plans to show pictures on the screen had to be abandoned because there was not enough room to erect a screen.

The Association of Commerce presented a $25 prize to Lloyd Graham, Elmwood, champion pig grower. He got a free trip to the International Live Stock Show in Chicago this week.

Speeches were made by C. R. Ford, president of the Ford County Farm Bureau, Eugene Brown, president of Association of Commerce, E. I. Pilchard, boys' and girls' club leader, University of Illinois and Dean H. W. Mumford, college of Agriculture, University of Illinois.

Continue Tax Hearing

The first court hearing in the Madison county tax litigation, in which 200 farmers paid two-thirds of their 1922 land taxes and refused to pay the remaining one-third on the ground, as admitted last year by the Chairman of the Board of Review, that real estate in cities and towns of Madison county is valued at one-third less than rural lands, was held in Edwardsville, Madison county seat, Nov. 21. No decision was reached and the case was continued for a second hearing on Dec. 22.

THREE IN A THOUSAND

Here are the three champion essay writers of Illinois. Above—Dorothy Heckman, first prize winner; left—Marjorie Cline, winner of second prize; right—Ruth Kassebier, third prize winner.

1924 Has Been Busy Year For Fruit and Vegetable Division

The work of the fruit and vegetable marketing department of the I. A. A. during the year 1924 has centered largely around a survey of the producing counties, according to A. B. Leeper, director of the department. The purpose of the study has been to determine in which counties it is advisable to set up marketing organizations.

"We have obtained definite knowledge of the products, varieties and tonnage at shipping points in 30 counties," Mr. Leeper says in a recent report. "We have organized seven local shipping associations, under the new Co-operative Marketing Act of Illinois, in Johnson, Williamson, Jackson, Madison, Pike and Jasper counties and have assisted in marketing either through local associations or Farm Bureaus in 17 counties."

Castle and Lynch Lead Off On Down State Air Program

Stanley Castle of Alton, I. A. A. executive committeeman from the 22nd Congressional district, officially opened the series of I. A. A. farm radio programs over station WCK, St. Louis, when, on the evening of Nov. 26, he told WCK listeners how rundown farms can be rebuilt through the use of commercial fertilisers.

A. D. Lynch, director of the I. A. A. dairy marketing department, helped the I. A. A. committeeman dedicate the first program as well as all succeeding ones to "a better agriculture."

"Farming has been full of trials these last few years," Mr. Castle said. "At times we farmers have become morally and physically depressed. Often times a word of encouragement such as may come over this radio program would be most appreciated."

Mr. Lynch described what he chose to call "The Dairymen's Paradise." This land of paradise for dairymen would probably be "a land where milk is the money standard and where cows are the idols for worshippers," according to Lynch. That dairymen cannot think individually about marketing their dairy products and get very far was one of the principal "clinchers" of his talk.

Wright Outlines Ultimate Goal of Producers' Plan

"The plan of the Producer agencies is to unite the live stock producers and feeders of the country into an organization, looking forward to orderly marketing of live stock," H. D. Wright, manager of the E. St. Louis Producers, told WCK radio farmers last Wednesday night, Dec. 3, as he spoke on the regular I. A. A. farm program from that station at St. Louis.

"The only practical way we see to accomplish this is to get control of all the live stock shipments to the terminal markets now established, so that we will be able to control shipments and eventually direct them to the markets where needed, at a price satisfactory to the producer.

"Government statistics show that farmer-controlled live stock selling agencies handled over 150,000 cars of stock during the year 1923," the E. St. Louis Producer representative said in closing. "While there has been a decrease in volume received at most markets the co-operative agencies have shown a steady growth and 1924 will probably be a much larger year than 1923, with receipts reaching well over the 200,000 car mark."

I.A.A. Breakfasts Club Champions

Some eighty odd Illinois boys and girls, winners in various boys' and girls' club work projects during the last year, were breakfasted Wednesday morning, Dec. 3, at the Great Northern Hotel, Chicago, by I. A. A. officials and departmental directors.

These boys and girls cashed in on free-trip awards to the International Stock Show as rewards for superior achievement in club work. During the week in Chicago they followed a social schedule rivaling that of the Prince of Wales during his recent trip to the U. S. A.

Last year the I. A. A. entertained the club boys and girls at an evening banquet but due to the intensive schedule of their visit to the Live Stock Show only a breakfast date could be squeezed in. Practically all of the young folks here this year are from farm bureau families.

The last farm bureau conference for the 24th Congressional district has been called by Executive Committeeman Curt Anderson for Dec. 2, at Vienna.

MACON COUNTY GIRL WINS FARM BUREAU ESSAY WRITING TILT

Dorothy Heckman Gets $25 Prize; Midwest Honors To Iowa Girl

As essay writers Illinois school girls put Illinois school boys to shame, if the results of the farm bureau essay contest in the state are to be used as a basis for judgment, for out of approximately 1,000 pupils, mostly boys, who entered the contest in 23 Illinois counties, 13 girls won their way to county championships and three to state championships.

Dorothy Heckman of Cerro Gordo in Macon county won the first prize and gets the $25 awarded by the Illinois Agricultural Association. Her essay was entitled "Why Dad is a Farm Bureau Member" and was less than 300 words long. The second prize and the $15 award was won by Marjorie Cline of Virginia in Cass county. Third prize went to Ruth M. Kaesebier of Emden in Logan county, who wrote on "Why Dad Should Belong to the Farm Bureau."

In the national contest, conducted by the American Farm Bureau Federation by regional districts, honors were more evenly divided among the boys and girls.

Iowa Girl Midwest Winner

In the eastern region, James McCann, Chateaugay, New York, won first prize. In the southern region, Wallace Collins, Berlin, Maryland, won highest honors. Ellen Edmonds, Birkenfield, Oregon, was winner put in the great Northwest and in the Middle West, the section which includes Illinois, an Iowa girl, Rose Dale Jackson, Mediapolis, reigns as the supreme essay writer. As a reward for their winnings each of these sectional winners will attend the American Farm Bureau Federation annual meeting in Chicago, Dec. 8, 9 and 10, at the expense of the national organization.

There were 23 essays, one from each county, in the state-wide contest in Illinois. The ten essays which placed 4th to 13th inclusive each won a $3 check for its writer and were not classified in definite order. The judges had a hard enough day's work to select the first three winners in proper order. The remaining essays were each given honorable mention as exemplifying the high purposes of the Farm Bureau.

Winners Get Checks

Three-dollar checks were mailed to each of the following boys and girls whose essays placed 4th to 13th inclusive:

Faith Dishong, Lee Center, Lee county; Wilbur McIntyre, Bellflower, McLean county; Raymond Markert, Mason county; Herman W. Dittmar, Jo Daviess county; Adeline Stevenson, Biggsville, Henderson county; Hazel Wilde, Oregon, Ogle county; Iona Henry, Streator, LaSalle county; Harold Kellenberger, Litchfield, Montgomery county; Elbert McCarthy, Kinsman, Grundy county and Edwin Leverich, Danville, Vermilion county.

Honorable mention was given LaVeta McQuigg, Scotia, McDonough county; Curtis Weathers, Ford county; Everett A. Sancken, Saunemin, Livingston county; Roberta Zeller, New Douglas, Bond county; Kirby Todd, Clinton, DeWitt county; Martha Gerhardt, Mendon, Adams county; Oscar Hemlink, Geneseo, Henry county; Opal Rixie, Rosebud, Pope county; Frieda Hintz,

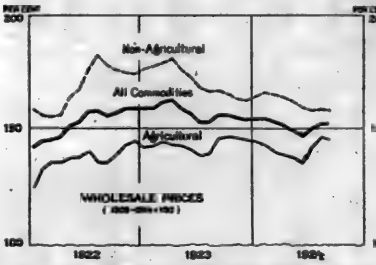
The Slipping Clutch vs. the Three-In-One Gear

If the McNary-Haugen bill did nothing more than awaken public sentiment to the fact that there is a difference in the farmer's dollar and the non-farmer's dollar, all the time, money and energy put upon it were well invested.



The McNary-Haugen bill has blazed a trail in the public's brain. In the wake of the trail there is common knowledge that the farmer's dollar is worth less than is right. The farmer's dollar is something like a slipping clutch on an automobile. The clutch fails to get the full efficiency out of the power expended; the farmer's dollar returns only 87 per cent efficiency. The non-farmers' dollar these days is like a three-in-one gear in a Ford. The engine runs no faster, but the gear brings extra mileage.

The task of the agricultural commission recently appointed by President Coolidge is to help tighten the slipping clutch in the farmer's car so it can have a fair chance of keeping up with the three-in-one gear of the non-farmer. The President went on record during the recent campaign that the inequality between the two kinds of dollars must be equalized. That is an achievement of the McNary-Haugen campaign in itself.

This inequality is shown by the chart herewith reproduced. The chart is a Bureau of Labor Statistics wholesale price index, classified by the bureau into agricultural and non-agricultural commodities. The years 1909 to 1914 are taken as a basis for comparison. In other words, to use a continuation of the partially drawn figure of the clutch and the gear, the basis line of 100 in the chart could be taken as meaning the average speed of all automobiles (dollars) from 1909 to 1914. The line labeled agricultural, then, means that the farmer's car's clutch has been slipping at various amounts since the beginning of 1922. The three-in-one gear non-agricultural car has been ahead all during the period. The average speed of all cars (all commodities) is shown by the heavy black line in the middle.

A minute's study of the chart shows that there has been a recent tendency of the agricultural line to rise toward the non-agricultural level. This has been caused by the increase in farm products prices during the summer and fall, but at the tail end of the agricultural level we find a sudden downward trend.

The after-election boom, which came after the chart was made, is undoubtedly causing the non-agricultural line to turn upward sharply. From observation the indications are that the agricultural line is running about level with its last point. The resultant widening between the lines means that the three-in-one geared car is getting way ahead of the car with the slipping clutch, and illustrates the present need for enactment of legislation embodying principles such as underlied the actual mechanics of the McNary-Haugen bill.

Solemn consideration of this chart pictures the tremendous task of the agricultural commission and at the same time shows a great field of endeavor for all farm organizations. The Illinois Agricultural Association has been in the front trenches battling to bring these upper and lower lines together. Even the fortunate occurrence of a world shortage this year has not brought the lines to equality. As long as this inequality exists, the I. A. A. will continue to help tighten the screws on the slipping clutch.

—o—

A Warning

Every little while some new promotion scheme is launched in connection with ground rock phosphate properties or operations in Tennessee. Some of these schemes have not seemed to be based upon honest objects. Others are honest in purpose but are founded upon unsound business principles or form. Nearly always such plans seem to center around the idea that the Illinois farmer is the big game to be bagged.

There are indications that promotion projects are in the making at this time.

Farm Bureau and farm bureau members should not allow themselves to be tied up at one end of a contract without knowing that the fellow at the other end can and will make good and that the contract will prove to be worth while to the phosphate user or investor. This applies whether the scheme is one of bond or stock selling or one of phosphate rock selling, especially if the latter is for future delivery.

The I. A. A. maintains a phosphate-limestone department whose business it is to keep informed on all developments in the phosphate field and be able to give intelligent and unbiased advice to its members and the Bureaus. Before being led into any such schemes be sure and make use of this service which is yours for the asking. Wild cat schemes of any kind are not only disastrous to the victim but are unfair to legitimate, honest producers in the industry.

—o—

An Acorn Today; An Oak Tree Tomorrow

The essay contest is over. It has planted seeds of thought in the nimble brains of approximately 1,000 Illinois boys and girls who competed. An application of the old adage, "From little acorns, giant oak trees grow" is fitting here. The farm bureau thoughts germinated in the minds of these 1,000 boys and girls will grow into untold value for the Farm Bureau and its work.

The planting and growth of many of these seeds of thought has without a doubt caused sprouting among other members of the families. Some of the letters from the winning contestants who wrote on "Why Dad *Should* Belong to the Farm Bureau," reveals that fathers who have been non-members have seen a little more light and have even signified their intention of joining.

The Farm Bureau is an acorn today; it will be an oak tree tomorrow.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievance, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

To Voice of Members: Instead of merging in board of trade, why not merge all farm organizations into one national federation so when Congress and the President want to know what the farmers want they could speak through Sam Thompson like organized labor speaks through Sam Gompers.

Helmer Hanson, Newark, Illinois.

Voice of the Members:

I shall undertake to set forth what I believe is a fair and straightforward answer to the letters which were printed in the last Record written by W. F. Engelman, president of the Christian County Farm Bureau of Nokomis. Mr. Engelman's letter referred specifically to reduction from $15 to $10 of farm bureau dues.

This letter is to point out the several superior advantages of the $15 membership. It should not be construed in any way as being antagonistic to Mr. Engelman. He has merely brought up a question which should be answered for the benefit of all the members.

$15 vs. $10

The organization department has had considerable experience working with various county Farm Bureaus on the matter of the amount of dues. It costs about so much per member to run a County Farm Bureau and render service. The size of the county, condition of the roads, concentration of the membership, etc., are factors regulating this cost.

Two things induce a farmer to join the Farm Bureau:

1. Knowledge of the need of agricultural economic and social life of a general organization, and his duty to support such an organization both morally and financially.

2. Individual and collective benefit of the services offered by the organization.

I point out these two matters as a basis for my argument to follow.

A good farm bureau member looks at the cost of the service in the light of value received. This, I believe has been fully proven in our experience in several counties. There is also a psychological viewpoint with respect to the amount of membership fee. Any man with any business ability would far rather belong to an organization which has some assets back of it than to an organization which is broke. He would also far rather join an organization which is well fixed financially than to help lift a bankrupt one "out of the hole." Hence, the argument for a membership fee sufficiently large to properly carry on the work of an organization.

Assets Main Prestige

For a Farm Bureau to properly hold its membership it is also necessary that it render real service. This service costs money. The weakest county Farm Bureau today is a financial wreck and failed to render the kind of service which their membership requires.

The argument, of course, always presented in connection with the reduced membership fee is that more men will join. There are two viewpoints which may be taken of that statement:

In the first place, our experience does not bear out any truth in that argument. For instance, in the last membership campaign one county reduced its dues on the strength of a feeling that it would get a larger membership. After a strenuous campaign that county was only able to sign up 87 per cent of its former membership. Hence, the reduction in the dues seemingly had no effect whatever.

Three other counties increased their membership dues from $10 to $15 per year and in all three cases a greater percentage of the old membership was signed up than did the county that reduced the dues.

The second viewpoint is that even should the reduction in dues increase the number of members it would call for increased service from the county Farm Bureau office and also the I. A. A. on less funds. It costs more to serve 1,200 men in a county Farm Bureau than it does to serve 600. On the basis of the division suggested by Mr. Engelman a county Farm Bureau with 1,200 members would have an income of $7,800.00. On the $15.00 basis an equal amount of income could be obtained from 780 members. Certainly a better service could be rendered on that income to 780 members than could possibly be rendered to 1,200.

$15 Means More Service

From our experience and observation, it is not the amount of dues that keeps a man out of a county Farm Bureau in 95 per cent of the cases. We all record the fact, of course, that it is quite often used as a reason why a man does not join, but in reality it is more an excuse than a reason.

I am convinced that a farmer who is sold on organization will join a county Farm Bureau and the Illinois Agricultural Association no matter what the dues, so long as they are within reason; but if he is not sold on organization it is a hard matter to get him in even though the dues be only one dollar a year.

I believe that the membership in general in the Illinois Agricultural Association will agree that $15 per year dues in the County Farm Bureau and the Illinois Agricultural Association is not out of line with the dues paid in other organizations of a similar nature representing other industries. There is no excuse to be made from a standpoint of service or of dollars and cents on the membership of these organizations. The county Farm Bureaus in Illinois and the Illinois Agricultural Association have paid many times the annual dues in the savings that have been effected through the various lines of service which the organization offers.

G. E. Metzger, director,
Organization Department, I. A. A.

"Voice of Members" Column: The relationship of the farm bureau member to his Farm Bureau can be expressed in three words,—he is it. If the farmer who becomes a member by signing the membership contract fully realizes the necessity for farmer organization, and that the Farm Bureau is his own organization, in which he is one of the units, he will think and speak of it as his own.

Too many members have seen only one or two things of value in the Farm Bureau,—those brought them a direct saving in money,—and have failed to see the benefits to agriculture as a whole. Accomplishments of a general nature that may be of far greater value than any direct savings are overlooked by too many of us simply because we look only for direct cash savings.

Direct Benefits Least Important

In any co-operative or organized effort it is easy to forget that it is team work that moves the load. In the old fashioned barn raising when the man in charge said, "Heave Ho!" and all lifted at once, it was the combined force that put the big timbers in place. Team work did what no one working alone could have accomplished. Each one did his bit when he was called. In the Farm Bureau the call to defend the organization against mistaken ideas of service comes in various ways and places. With the lack of experience in organization among us farmers it is not to be wondered at that some of us are confused by the enormous strides made in legislation, tax questions, freight rates, and co-operative marketing, and the activities within the county for more efficient methods of crop and live stock production.

This is an age in which agriculture must be made a business instead of just a means of existence. As a business it should pay interest on the capital and labor invested. The farmers are the only ones that can make it do so.

6TH ANNUAL A.F.B.F. CONVENTION SLATED FOR DEC. 8, 9 AND 10

Subcommittees Will Settle Questions; To Broadcast Programs By Radio

When the hand of time rings up Dec. 8, 1924 there will be convening in Chicago, at the Congress Hotel, one of the most important meetings of farmers America has ever held.

The occasion will be the 6th annual meeting of the American Farm Bureau Federation. The convention lasts three days, Dec. 8, 9 and 10, during which some of the weightiest problems ever to face the directors of the Federation will be threshed out by agricultural leaders.

Handle Many Problems

The complete program for the several sessions has been announced by the program committee. Aside from the regular program that has characterized annual A. F. B. F. meetings in years before, there has been arranged plans for a detailed study of the many problems which should be discussed.

To accomplish the detailed plan of handling questions the Board of Directors will be divided into six subcommittees. To these special committees will be assigned special matters which they will settle in three periods set aside for that purpose. Problems of organization and finance, research and transportation, publicity, legislation and taxation, rural life and co-operative marketing are the principal ones to come up. Community development and boys' and girls' club work will also be included.

Banquet on Tuesday

On Tuesday evening, Dec. 9, the delegates and farm bureau leaders from all over the United States will lay aside their heavy and vexing problems while they attend the 6th annual A. F. B. F. banquet.

Radio will play its part in this 6th annual convention. By special arrangements with station KYW, the opening address of President Bradfute, which will commence at 10:15 sharp, Monday morning, Dec. 8, will be broadcast. Arrangements have also been completed with this same station to broadcast the entire program on banquet night.

MACON COUNTY GIRL WINS ESSAY TILT

(Continued from page 1)

Prophetstown, Whiteside county and Margaret Catherine Schnapp, Talulla, Menard county.

Three judges, Arthur C. Page, editor of Orange Judd Illinois Farmer, C. E. Hay, president of the Farm Advisers' Association of Illinois, and J. E. Hill, head of vocational agriculture department at Springfield, spent an entire day in choosing the best essays. Immediately after announcing the results of the contest the judges issued the following statement:

Statement of the Judges

"We find a great deal of merit in these essays, and highly commend those boys and girls who have put in thorough effort to seek out the facts about the Farm Bureau.

"We are pleased to see the breadth of vision concerning the nature and purpose of the Farm Bureau as a national, state and county work, by which it is shown to be not only a means of increasing profits in dollars and cents, but building a basis for more abundant country life.

"The first and second prize winners particularly bring out an idea which is the foundation of successful Farm Bureau operation in a county, state and national way, and that is that after all, while live stock, crops, soil, laws, marketing, etc., need careful attention, folks themselves are of highest value, and the ultimate job of the farm bureau is developing rural life."

First Prize Paper

Here is the essay picked by the judges as the one best typifying the ideals and purposes of the farm bureau movement.

By Dorothy Heckman,
Macon County

The farmers have begun to think. They think farming is equal to any other business. They want other folks to know this. So they have begun to organize. The Farm Bureau is the result.

The Farm Bureau as it is organized to-day includes county, state and nation. These working together stand for profitable farming and social welfare. The members consist of farmers who look forward to the future for results, not only in money, but in developing a higher type of rural life.

In Illinois alone there are sixty-three thousand Farm Bureau members. My Dad is one of them. He is a booster for the Farm Bureau, first; because its program of work has put on a campaign of education to have farmers test cattle for tuberculosis. It has made possible for farmers to get free tests under the supervision of the United States Department of Agriculture. Also to get pay for two-thirds of the loss of cattle that prove to have the disease.

Second; For encouraging the raising of soybeans as a commercial crop to fight the chinch bug.

Third; For conducting corn disease plots to make possible the best choice of seed corn to plant.

Fourth; Because a general practice has been brought about in sowing wheat after the fly-free date, which has saved farmers thousands of dollars.

Fifth; Because co-operative shipping associations have been established to improve the marketing of live stock.

And last; perhaps the best thing of all the Farm Bureau is doing is the building of better community life through co-operating with the Home Bureau and organizing boys' and girls' clubs. The Farm Bureau believes in developing the resources of the farm. This can be done by giving higher standards for rural living. The live stock, the crops, and the soil all need careful attention but the folks themselves are of more value than all.

Because the Farm Bureau is doing and believes all these things, My Dad is a member and a booster for the Farm Bureau.

In McDonough county, shipping associations have consigned 63 carloads of stock to the Chicago Producers Commission Company since July 1.

Forty boys' and girls' in Knox county begin feeding their baby beef club calves on **Jan. 1, 1925.**

Fourteen of the best essay writers in Illinois. Some of them didn't send their pictures in time to get them in with this bunch. (1) Iona Henry, (2) Curtis Weathers, (3) Oscar Hamlik, (4) Roberta Zeller, (5) Margaret Catherine Schnapp, (6) LaVeta McQuigg, (7) Opal Rixie, (8) Hazel Wilde, (9) Adeline Stevenson, (10) Kirby Todd, (11) Elbert McCarthy, (12) Everett A. Sancken, (13) Faith Dishong, (14) Herman Dittmar.

(Continued from page 2)

I have had considerable experience in soliciting work and in some sections have called on far more men who would not join than who would. The opposite was usually the case, however, the number being somewhat in proportion to a desire to do their part in this great work. In some cases the membership fee was the thing objected to, but, in my judgment, much the same argument would have been used in most cases regardless of the amount of the fee. I like an organization independent of local tax support, an organization financed by farmers themselves and obligated to no taxpayer opposed to our work. A sliding scale for membership fees based on land owned or operated, as sometimes advocated, would necessitate a revisal of fees each year, be a source of eternal dissatisfaction, and require a tremendous amount of work. A $15 annual membership fee is none too high considering the capital and labor invested on the average farm. Other business combines and labor organizations have succeeded because of representative membership with fees large enough to adequately finance their undertakings.

Finds $15 Fee Is Not High

More efficient production is the fundamental program of our Farm Bureau, but we must co-operate in merchandising our products. Co-operative marketing is not setting prices on our commodities, but it should afford a means of regulating the flow of our products from the farm to the markets in accordance with demands of time and place, and should cheapen the cost of distribution.

O. L. Hateh

If all members of the Farm Bureau would co-operate fully, recognize and patronize the successful co-operative marketing projects as their own, sufficient of the flow of our products to market would be in our hands where we have an inalienable right to have it. The glutted market periods would soon disappear and we would come into our own without any injury to the consuming public.

The Farm Bureau and its affiliated organizations are children of our own production. Let's protect them, help them to grow, and the farm will be a healthy and profitable abiding place in our old age.

Yours for successful co-operation.
O. L. Hateh, President.
Stark County Farm Bureau.

At Quincy, 34 business men are members of the Adams County Farm Bureau.

Seventy-three herds representing 1,600 head of cattle in the neighborhood of Waukegan and Zion were given the tuberculin test in one week recently.

Richardson Tells Radio Bugs Why Cream Tests Vary

Down in East St. Louis A. E. Richardson manages the Ill-Mo Dairy Company. Sometimes Ill-Mo patrons, like others, kick on cream tests. Mr. Richardson, as do all creamerymen, knows that there are reasons for variations in cream tests. When he was asked to tell radio fans "Why Cream Tests Vary" he was glad to accept. Read, in part, how he explained the puzzle over WCK last Wednesday evening, Dec. 3.

"There isn't any secret about making good butter now-a-days, with the modern equipment of the up-to-date creamery," the Ill-Mo manager told the listening dairymen. "To make good butter, start with the cow. Clean udder, clean flank, clean hands and clean clothes. This is not sentiment, it is the only way to keep down bacteria, which destroys butter flavor.

Flavor Counts Big

"In judging butter, flavor counts 45 per cent, body and grain 25 per cent, color 15 per cent, salt 10 per cent, and neatness of package 5 per cent. So you see why I talk of flavor first. There are other elements which contribute very largely to the butter flavor, such as barn odors, metallic flavor and using vessels improperly tinned, weedy feed, and many others.

The acidity of cream is caused by bacteria, which multiply rapidly in warm weather. Cream should be kept at about 50 degrees. Always properly cool the fresh cream before it is put into the can with that of previous days.

"Lots of loss is caused by foamy cream. Extra care for the cream is well paid for if a can or two foams over and is lost in transit.

Effect For Every Cause

"The variation in the test of cream is probably the cause of more misunderstanding between the producers and the creameries than any other one thing. The causes of the cream test varying does not seem to be very well understood, but remember, for every effect there is a cause. It might be the condition of the cow, condition of the milk, condition of the separator or the condition of the cream."

I.A.A. ACCOUNTING DEPARTMENT HELPS 101 MEMBER CO-OPS

Make Applications for Income Tax Exemption; Schedule 53 Audits

The response of co-operative associations and Farm Bureaus in Illinois to the plan of organization of the Illinois Agricultural Co-operatives Association has been very encouraging, according to a statement by Geo. E. Wicker, general manager of the auditing co-op.

Vernon Vaniman

Under the direction of Vernon Vaniman, organization representative, the membership has reached 101 farmers' organizations, including 42 farmers' elevators, 36 county Farm Bureaus, nine live stock shipping associations, five dairy co-operative companies, three live stock marketing agencies, two insurance companies and four miscellaneous organizations.

Up to Dec. 1, 53 examinations have been scheduled and the management is making an effort to meet the requirements of the various organizations at the close of their fiscal period. With one or two exceptions this has been done. The number of examinations which come in January will not permit examinations and reports to be completed before the annual meetings of the different organizations.

Busy With Income Taxes

During the past month, the accounting department has been engaged in securing information from Farm Bureaus required for the purpose of making applications for exemption from income taxes. A number of such applications have been prepared and sent out for signatures of the officers of the Farm Bureaus and others are being prepared as soon as the required information can be secured, says Mr. Wicker.

A bulletin was recently prepared and sent out to all farm advisers covering quite fully the provisions of the Revenue Act and regulations issued thereunder as applying to co-operative associations and other agricultural organizations.

Attention of farm advisers is called to the fact that this bulletin covers most of the inquiries which are being made with reference to the requirements of co-operative associations and farm bureaus to make returns for income and capital stock tax, unless they are expressly exempt.

The bulletin also covers quite specifically the requirements of the Commissioner of Internal Revenue for the exemption of the associations and procedure necessary thereto. Any questions not answered by this bulletin will be given special attention if addressed to the Accounting Division of the Illinois Agricultural Association.

Hear Vaniman on Radio

Mr. Vaniman outlined the need of proper audting of co-ops to KYW radio folks Tuesday night, Dec. 2. He explained that the I. A. C. A. is to operate on a co-operative basis for farmers just as a bankers' clearing house operates in large cities.

"The value of a good audit in increasing the loyalty of the stockholders is not to be overlooked," was one of his statements. "Any number of directors have stated that it would be worth $5 to $10 per year, per stockholder to their association if each stockholder were loyal to his own co-op."

Farmers who are looking ahead and keeping abreast with the times appreciate the need of better business methods for co-operatives, he said. They are looking forward to the time when there will be more co-operation between co-operatives and they expect their auditing service to hasten its coming.

The Danville National Farm Loan Association has nearly $1,000,000 farm loans in force in Vermilion county.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

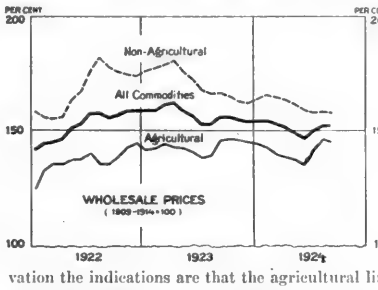
The Slipping Clutch vs. the Three-In-One Gear

If the McNary-Haugen bill did nothing more than awaken public sentiment to the fact that there is a difference in the farmer's dollar and the non-farmer's dollar, all the time, money and energy put upon it were well invested.



The McNary-Haugen bill has blazed a trail in the public's brain. In the wake of the trail there is common knowledge that the farmer's dollar is worth less than is right. The farmer's dollar is something like a slipping clutch on an automobile. The clutch fails to get the full efficiency out of the power expended; the farmer's dollar returns only 87 per cent efficiency. The non-farmers' dollar these days is like a three-in-one gear in a Ford. The engine runs no faster, but the gear brings extra mileage.

The task of the agricultural commission recently appointed by President Coolidge is to help tighten the slipping clutch in the farmer's car so it can have a fair chance of keeping up with the three-in-one gear of the non-farmer. The President went on record during the recent campaign that the inequality between the two kinds of dollars must be equalized. That is an achievement of the McNary-Haugen campaign in itself.

This inequality is shown by the chart herewith reproduced. The chart is a Bureau of Labor Statistics wholesale price index, classified by the bureau into agricultural and non-agricultural commodities. The years 1909 to 1914 are taken as a basis for comparison. In other words, to use a continuation of the partially drawn figure of the clutch and the gear, the basis line of 100 in the chart could be taken as meaning the average speed of all automobiles (dollars) from 1909 to 1914. The line labeled agricultural, then, means that the farmer's car's clutch has been slipping at various amounts since the beginning of 1922. The three-in-one gear non-agricultural car has been ahead all during the period. The average speed of all cars (all commodities) is shown by the heavy black line in the middle.

A minute's study of the chart shows that there has been a recent tendency of the agricultural line to rise toward the non-agricultural level. This has been caused by the increase in farm products prices during the summer and fall, but at the tail end of the agricultural level we find a sudden downward trend.

The after-election boom, which came after the chart was made, is undoubtedly causing the non-agricultural line to turn upward sharply. From observation the indications are that the agricultural line is running about level with its last point. The resultant widening between the lines means that the three-in-one geared car is getting way ahead of the car with the slipping clutch, and illustrates the present need for enactment of legislation embodying principles such as underlied the actual mechanics of the McNary-Haugen bill.

Solemn consideration of this chart pictures the tremendous task of the agricultural commission and at the same time shows a great field of endeavor for all farm organizations. The Illinois Agricultural Association has been in the front trenches battling to bring these upper and lower lines together. Even the fortunate occurrence of a world shortage this year has not brought the lines to equality. As long as this inequality exists, the I. A. A. will continue to help tighten the screws on the slipping clutch.

—o—

A Warning

Every little while some new promotion scheme is launched in connection with ground rock phosphate properties or operations in Tennessee. Some of these schemes have not seemed to be based upon honest objects. Others are honest in purpose but are founded upon unsound business principles or form. Nearly always such plans seem to center around the idea that the Illinois farmer is the big game to be bagged.

There are indications that promotion projects are in the making at this time.

Farm Bureau and farm bureau members should not allow themselves to be tied up at one end of a contract without knowing that the fellow at the other end can and will make good and that the contract will prove to be worth while to the phosphate user or investor. This applies whether the scheme is one of bond or stock selling or one of phosphate rock selling, especially if the latter is for future delivery.

The I. A. A. maintains a phosphate-limestone department whose business it is to keep informed on all developments in the phosphate field and be able to give intelligent and unbiased advice to its members and the Bureaus. Before being led into any such schemes be sure and make use of this service which is yours for the asking. Wild cat schemes of any kind are not only disastrous to the victim but are unfair to legitimate, honest producers in the industry.

—o—

An Acorn Today; An Oak Tree Tomorrow

The essay contest is over. It has planted seeds of thought in the nimble brains of approximately 1,000 Illinois boys and girls who competed. An application of the old adage, "From little acorns, giant oak trees grow" is fitting here. The farm bureau thoughts germinated in the minds of these 1,000 boys and girls will grow into untold value for the Farm Bureau and its work.

The planting and growth of many of these seeds of thought has without a doubt caused sprouting among other members of the families. Some of the letters from the winning contestants who wrote on "Why Dad *Should* Belong to the Farm Bureau," reveals that fathers who have been non-members have seen a little more light and have even signified their intention of joining.

The Farm Bureau is an acorn today; it will be an oak tree tomorrow.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national unit—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

To Voice of Members: Instead of merging in board of trade, why not merge all farm organizations into one national federation so when Congress and the President want to know what the farmers want they could speak through Sam Thompson like organized labor speaks through Sam Gompers.

Heimer Hanson, Newark, Illinois.

Voice of the Members:

I shall undertake to set forth what I believe in a fair and straightforward answer to the letters which were printed in the last Record written by W. F. Engelman, president of the Christina County Farm Bureau of Nokomis. Mr. Engelman's letter referred specifically to reduction from $15 to $10 of farm bureau dues.

This letter is to point out the several superior advantages of the $15 membership. It should not be construed in any way as being antagonistic to Mr. Engelman. He has merely brought up a question which should be answered for the benefit of all the members.

$15 vs. $10

The organization department has had considerable experience working with various county Farm Bureaus on the matter of the amount of dues. It costs about so much per member to run a County Farm Bureau and render service. The size of the county, condition of the roads, concentration of the membership, etc., are factors regulating this cost.

Two things induce a farmer to join the Farm Bureau:

1. Knowledge of the need of agricultural economic and social life of a general farm organization, and his duty to support such an organization both morally and financially.

2. Individual and collective benefit of the services offered by the organization.

I point out these two matters as a basis for my argument to follow.

A good farm bureau member looks at the cost of the service in the light of value received. This, I believe has been fully proven in our experience in several counties. There is also a psychological viewpoint with respect to the amount of membership fee. Any man with any business ability would far rather belong to an organization which has some assets back of it than to an organization which is broke. He would also far rather join an organization which is well financially than to help lift a bankrupt one "out of the hole." Hence, the argument for a membership fee sufficiently large to properly carry on the work of an organization.

Assets Main Prestige

For a Farm Bureau to properly hold its membership it is also necessary that it render real service. This service costs money. The wisest county Farm Bureau leaders in a financial way find it hard to render the kind of service which their membership requires.

The argument, of course, always presented in connection with the reduced membership fee is that more men will join. There are two viewpoints which may be taken of that statement:

In the first place, our experience does not bear out any truth in that argument. For instance, in the last membership campaign one county reduced its dues on the strength of a feeling that it would get a larger membership. After the campaign that county was only able to sign up 60 per cent of its former membership. Hence, the reduction in the dues seemingly had no effect whatever.

Three other counties increased their membership dues from $10 to $15 per year and in all three cases a greater percentage of the old membership was signed up than did the county that reduced the dues.

The second viewpoint is that even should the reduction in dues increase the number of members it would call for increased service from the county Farm Bureau office and also the I. A. A. on less funds. It costs more to serve 1,200 men in a county Farm Bureau than it does to serve 600. On the basis of the division suggested by Mr. Engelman a county Farm Bureau with 1,200 members would have an income of $7,800.60. On the $15.00 basis an equal amount of income could be obtained from 780 members. Certainly a better service could be rendered on that income to 780 members than could possibly be rendered to 1,200.

$15 Means More Service

From our experience and observation, it is not the amount of dues that keeps a man out of a county Farm Bureau in 95 per cent of the cases. We all recognize the fact, of course, that it is quite often used as a reason why a man does not join, but in reality it is more an excuse than a reason.

I am convinced that a farmer who is sold on organization will join a county Farm Bureau and the Illinois Agricultural Association no matter what the dues, so long as they are within reason; but if he is not sold on organization it is a hard matter to get him in even though the dues be only one dollar a year.

I believe that a membership in general in the Illinois Agricultural Association will agree that $15 per year dues in the County Farm Bureau and the Illinois Agricultural Association is not out of line with the dues paid in other organizations of a similar nature representing other industries. There is no excuse to be made from a standpoint of service or of dollars and cents saved the membership of these organizations. The county Farm Bureaus in Illinois and the Illinois Agricultural Association have paid many times their annual dues in savings that have been effected through the various lines of service which the organization offers.

G. E. Metzger, director,
Organization Department, I. A. A.

"Voice of Members" Column: The relationship of the farm bureau member to his Farm Bureau can be expressed in three words.—he is it. If the farmer who becomes a member by signing the membership contract fully realizes the necessity for farmer organization, and that the Farm Bureau is his own organization, in which he is one of the units, he will think and speak of it as his own.

Too many members have seen only one or two things of value in the Farm Bureau. These things which have brought them a direct saving of money—and have failed to see the benefits to agriculture as a whole. Accomplishments of a greater nature that may be of far greater value than any direct savings are overlooked by too many of us simply because we look only for direct cash savings.

Direct Benefits Least Important

In any co-operative or organized effort it is easy to forget that it is team work that moves the load. In the old-fashioned log rolling bee the man in charge said, "Heave Ho," and all lifted at once, it was their combined force that put the big timbers in place. Team work did what no one working alone could have accomplished. Each one did his part when he was called. In the Farm Bureau the call to defend the organization against mistaken ideas of service comes in various ways and places. With the lack of experience in organization among us farmers, it is not to be wondered at that some of us are confused by the enormous strides made in legislation, tax questions, freight rates, and co-operative marketing, and the activities within the county for more efficient methods of crop and live stock production.

This is an age in which agriculture must be made a business instead of just a means of existence. As a business it should pay interest on the capital and labor invested. The farmers are the only ones that can make it do so.

(Continued on page 3, column 3)

6TH ANNUAL A.F.B.F. CONVENTION SLATED FOR DEC. 8, 9 AND 10

Subcommittees Will Settle Questions; To Broadcast Programs By Radio

When the hand of time rings up Dec. 8, 1924 there will be convening in Chicago, at the Congress Hotel, one of the most important meetings of farmers America has ever held.

The occasion will be the 6th annual meeting of the American Farm Bureau Federation. The convention lasts three days, Dec. 8, 9 and 10, during which some of the weightiest problems ever to face the directors of the Federation will be threshed out by agricultural leaders.

Handle Many Problems

The complete program for the several sessions has been announced by the program committee. Aside from the regular program that has characterized annual A. F. B. F. meetings in years beforç, there has been arranged plans for a detailed study of the many problems which should be discussed.

To accomplish the detailed plan of handling questions the Board of Directors will be divided into six subcommittees. To these special committees will be assigned special matters which they will settle in three periods set aside for that purpose. Problems of organization and finance, research and transportation, publicity, legislation and taxation, rural life and co-operative marketing are the principal ones to come up. Community development and boys' and girls' club work will also be included.

Banquet on Tuesday

On Tuesday evening, Dec. 9, the delegates and farm bureau leaders from all over the United States will lay aside their heavy and vexing problems while they attend the 6th annual A. F. B. F. banquet.

Radio will play its part in this 6th annual convention. By special arrangements with station KYW, the opening address of President Bradfute, which will commence at 10:15 sharp, Monday morning, Dec. 8, will be broadcast. Arrangements have also been completed with this same station to broadcast the entire program on banquet night.

MACON COUNTY GIRL WINS ESSAY TILT

(Continued from page 1)

Prophetstown, Whiteside county and Margaret Catherine Schnapp, Talulla, Menard county.

Three judges, Arthur C. Page, editor of Orange Judd Illinois Farmer, C. E. Hay, president of the Farm Advisers' Association of Illinois, and J. E. Hill, head of vocational agriculture department at Springfield, spent an entire day in choosing the best essays. Immediately after announcing the results of the contest the judges issued the following statement:

Statement of the Judges

"We find a great deal of merit in these essays, and highly commend those boys and girls who have put in thorough effort to seek out the facts about the Farm Bureau.

"We are pleased to see the breadth of vision concerning the nature and purpose of the Farm Bureau as a national, state and county work, by which it is shown to be not only a means of increasing profits in dollars and cents, but building a basis for more abundant country life.

"The first and second prize winners particularly bring out an idea which is the foundation of successful Farm Bureau operation in a county, state and national way, and that is that after all, while live stock, crops, soil, laws, marketing, etc., need careful attention, folks themselves are of highest value, and the ultimate job of the farm bureau is developing rural life."

First Prize Paper

Here is the essay picked by the judges as the one best typifying the ideals and purposes of the farm bureau movement.

By Dorothy Heckman,
Macon County

The farmers have begun to think. They think farming is equal to any other business. They want other folks to know this. So they have begun to organize. The Farm Bureau is the result.

The Farm Bureau as it is organized to-day includes county, state and nation. These working together stand for profitable farming and social welfare. The members consist of farmers who look forward to the future for results, not only in money, but in developing a higher type of rural life.

In Illinois alone there are sixty-three thousand Farm Bureau members. My Dad is one of them. He is a booster for the Farm Bureau, first; because its program of work has put on a campaign of education to have farmers test cattle for tuberculosis. It has made possible for farmers to get free tests under the supervision of the United States Department of Agriculture. Also to get pay for two-thirds of the loss of cattle that prove to have the disease.

Second; For encouraging the raising of soybeans as a commercial crop to fight the chinch bug.

Third; For conducting corn disease plots to make possible the best choice of seed corn to plant.

Fourth; Because a general practice has been brought about in sowing wheat after the fly-free date, which has saved farmers thousands of dollars.

Fifth; Because co-operative shipping associations have been established to improve the marketing of live stock.

And last; perhaps the best thing of all the Farm Bureau is doing is the building of better community life through co-operating with the Home Bureau and organizing boys' and girls' clubs. The Farm Bureau believes in developing the resources of the farm. This can be done by giving higher standards for rural living. The live stock, the crops, and the soil all need careful attention but the folks themselves are of more value than all.

Because the Farm Bureau is doing and believes all these things, My Dad is a member and a booster for the Farm Bureau.

In McDonough county, shipping associations have consigned 63 carloads of stock to the Chicago Producers Commission Company since July 1.

Forty boys' and girls' in Knox county begin feeding their baby beef club calves on **Jan. 1, 1925.**

Fourteen of the best essay writers in Illinois. Some of them didn't send their pictures in time to get them in with this bunch. (1) Iona Henry, (2) Curtis Weathers, (3) Oscar Hanlik, (4) Roberta Zeller, (5) Margaret Catharine Schnapp, (6) LaVeta McQuigg, (7) Opal Rixie, (8) Hazel Wilde, (9) Adeline Stevenson, (10) Kirby Todd, (11) Elbert McCarthy, (12) Everett A. Sancken, (13) Faith Dishong, (14) Herman Dittmar.

(Continued from page 2)

I have had considerable experience in soliciting work and in some sections have called on far more men who would not join than who would. The opposite was usually the case, however, the number being somewhat in proportion to a desire to do their part in this great work. In some cases the membership fee was the thing objected to, but, in my judgment, much the same argument would have been used in most cases regardless of the amount of the fee. I like an organization independent of local tax support, an organization financed by farmers themselves and obligated to no taxpayer opposed to our work. A sliding scale for membership fees based on land owned or operated, as sometimes advocated, would necessitate a revisal of fees each year, be a source of eternal dissatisfaction, and require a tremendous amount of work. A $15 annual membership fee is none too high considering the capital and labor invested on the average farm; other business combines and labor organizations have succeeded because of representative membership with fees large enough to adequately finance their undertakings.

Finds $15 Fee Is Not High

More efficient production is the fundamental program of our Farm Bureau, but we must co-operate in merchandising our products. Co-operative marketing is not setting prices on our commodities, but it should afford a means of regulating the flow of our products from the farm to the markets in accordance with demands of time and place, and should cheapen the cost of distribution.

If all members of the Farm Bureau would co-operate fully, recognize and patronize the successful co-operative marketing projects on their own, sufficient of the flow of our products to market would be in our hands where we have an inalienable right to have it. The glutted market periods would soon disappear and we would come into our own without any injury to the consuming public.

O. L. Hatch

The Farm Bureau and its affiliated organizations are children of our own production. Let's protect them, help them to grow, and the farm will be a healthy and profitable abiding place in our old age.

Yours for successful co-operation.

O. L. Hatch, President,
Stark County Farm Bureau.

At Quincy, 34 business men are members of the Adams County Farm Bureau.

Seventy-three herds representing 1,600 head of cattle in the neighborhood of Waukegan and Zion were given the tuberculin test in one week recently.

Richardson Tells Radio Bugs Why Cream Tests Vary

Down in East St. Louis A. E. Richardson manages the Ill Mo Dairy Company. Sometimes Ill Mo patrons, like others, kick on cream tests. Mr. Richardson, to do alk creamerymen, knows that there are reasons for variations in cream tests. When he was asked to tell radio fans "Why Cream Tests Vary" he was glad to accept. Read, in part, how he explained the puzzle over WCK last Wednesday evening, Dec. 3:

"There isn't any secret about making good butter' nowadays with the modern equipment of the up-to-date creamery," the Ill Mo manager told the listening dairymen. "To make good butter start with the cow. Clean udder, clean flank, clean hands and clean clothes. This is not sentiment. It is the only way to keep down bacteria, which destroys butter flavor.

Flavor Counts Big

"In judging butter, flavor counts 45 per cent, body and grain 25 per cent, color 15 per cent, salt 10 per cent, and neatness of package 5 per cent. So you see why I talk of flavor first. There are other elements which contribute very largely to the butter flavor, such as barn odors, metallic flavor and using vessels improperly tinned, weedy feed, and many others.

"The acidity of cream is caused by bacteria, which multiply rapidly in warm weather. Cream should be kept at about 50 degrees. Always properly cool the fresh cream before it is put into the can with that of previous days.

"Loss of loss is caused by lofty cream. Extra care for the cream is well paid for if a can or two foams over and is lost in transit.

Effect For Every Cause

"The variation in the test of cream is probably the cause of more misunderstanding between the producers and the creameries than any other one thing. The causes of the cream test varying does not seem to be very well understood, but remember, for every effect there is a cause. It might be the condition of the cow, condition of the milk, condition of the separator or condition of the cream."

I.A.A. ACCOUNTING DEPARTMENT HELPS 101 MEMBER CO-OPS

Make Applications for Income Tax Exemption; Schedule 53 Audits

Vernon Vaniman

The response of co-operative associations and Farm Bureaus in Illinois to the plan of organization of the Illinois Agricultural Co-operatives Association has been very encouraging, according to a statement by Geo. R Wicker, general manager of the auditing co-op.

Under the direction of Vernon Vaniman, organization representative, the membership has reached 101 farmers' organizations, including 42 farmers' elevators, 36 county Farm Bureaus, nine live stock shipping associations, five dairy co-operative companies, three live stock marketing agencies, two insurance companies and four miscellaneous organizations.

Up to Dec. 1, 53 examinations have been scheduled and the management is making an effort to meet the requirements of the various organizations at the close of their fiscal period. With one or two exceptions this has been done. The number of examinations which come in January will not permit examinations and reports to be completed before the annual meetings of the different organizations.

Busy With Income Taxes

During the past month, the accounting department has been engaged in securing information from Farm Bureaus required for the purpose of making applications for exemption from income taxes. A number of such applications have been prepared and sent out for signatures of the officers of the Farm Bureaus and others are being prepared as soon as the required information can be secured, says Mr. Wicker.

A bulletin was recently prepared and sent out to all farm advisers covering quite fully the provisions of the Revenue Act and regulations issued thereunder as applying to co-operative associations and other agricultural organizations.

Attention of farm advisers is called to the fact that this bulletin covers most of the inquiries which are being made with reference to the requirements of co-operative associations and farm bureaus to make returns for income and capital stock tax, unless they are expressly exempt.

The bulletin also covers quite specifically the requirements of the Commissioner of Internal Revenue for the exemption of the associations and procedure necessary thereto. Any questions not answered by this bulletin will be given special attention if addressed to the Accounting Division of the Illinois Agricultural Association.

Hear Vaniman on Radio

Mr. Vaniman outlined the need of proper auditing of co-ops to KYW radio folks Tuesday night, Dec. 2. He explained that the I. A. C. A. is to operate on a co-operative basis for farmers just as a bankers' clearing house operates in large cities.

"The value of a good audit in increasing the loyalty of the stockholders is not to be overlooked," was one of his statements. "Any number of directors have stated that it would be worth $5 to $10 per year, per stockholder to their association if each stockholder were loyal to his own co-op."

Farmers who are looking ahead and keeping abreast with the times appreciate the need of better business methods for co-operatives, he said. They are looking forward to the time when there will be more co-operation between co-operatives and they expect their auditing service to hasten its coming.

The Danville National Farm Loan Association has nearly $1,000,000 farm loans in force in Vermilion county.

FARM BUREAU ESSAY WRITERS TELL HOW CONTEST HELPS THEM

Boys and Girls Appreciate Prizes; Believe In Farm Organizations

After the county judging committees had announced the winners in each county the I. A. A. sent letters of congratulation to the winners asking for their pictures and letters telling of the benefits they got out of the essay contest. The letters and pictures of some of the boys and girls weren't received in time to get in this RECORD but here are a few "snapshots" and "crosscuts" taken from the replies. Read what 10 future members say about the Farm Bureau.

"I wish to thank you for your congratulations on my essay. I looked up some of the things the Farm Bureau is doing and this helped me to remember them. I learned more about the Farm Bureau and more of the benefits it is to the farmers. My father is a member of the Farm Bureau and gets the I. A. A. RECORD."

Dorothy Heckman,
Cerro Gordo, Ill.

"I received your letter of congratulation for which I am sending my thanks and also for the prize I won in the state contest. I think I derived quite a little benefit by entering as I think it will be quite an encouragement in entering again some time. I also think it quite interesting as well as educational."

Marjorie Cline,
Virginia, Ill.

Prize Buys Class Pins

"My father not being a farmer or a farm bureau member, I knew little if anything about it. Our class at school was striving to get some money with which to buy pins. When we heard of the contest we decided to choose some one to take part. I was chosen. I enjoyed studying the subject because it was something new and helpful. I am very thankful for having won first in Logan county and third in Illinois because with the prize money our class is able to pay for the pins. Kindly send the next issue of the the I. A. A. RECORD."

Ruth Kaesebier, Emden, Ill.

"I can assure you that I have obtained several benefits from this contest. I learned about the works of the Farm Bureau of which before I was not so well informed. I think one should know of the great organization of our country and the Farm Bureau is a great active organization. I also learned self-confidence which will make me want to try again. Please send me an issue of the I. A. A. RECORD because my father is not a member of the Farm Bureau."

Margaret Catherine Schnapp,
Tallula, Ill.

Shows His Dad

"The prize money made a nice addition to my bank account, besides I think the practice of writing essays is a help in school work. I give my Ag teacher credit for my success, as he explained the subject so well. I would like to have a copy of your paper to show my Dad. Perhaps all these arguments will induce him to become a member of the Farm Bureau."

Everett A. Sancken, Saunemin, Ill.

"It has been interesting to me to know how the Farm Bureau has benefited my Dad. I have learned in writing this essay that the farmers should co-operate and get behind their organization and boost."

Adeline Stevenson, Biggsville, Ill.

His Dad Will Join

"I did learn a lot from writing my essay. I learned how neatness counts. I got the benefit of learning more about the Farm Bureau because I looked into the subject more thoroughly. But best of all I now have the best side of an argument with my father. He is now a business man but soon expects to be a farmer of Michigan and I argued that he should join the Farm Bureau after he becomes a farmer. I now receive his attention, a thing impossible before I won the prize of Jo Daviess county. Please send me an issue of the RECORD."

Herman W. Dittmar,
Woodbine, Ill.

"From this contest I have learned more good works that the Farm Bureau has done because I have read about it. I have got some benefits from it. My father is a farm bureau member so we get the RECORD. I thank you for your congratulations."

Elbert McCarthy, Kinsman, Ill.

Going To Join Farm Bureau

"In looking up facts for my essay I learned that there were more benefits derived from being a farm bureau member than I realized. I am only 14 now but when I am a man I will be a member of the Farm Bureau. In writing my essay I find that I have enlarged my vocabulary and increased my knowledge in English and spelling."

Kirby Todd, Clinton, Ill.

"The farm bureau essay contest has proved a great success because it has stimulated the interest of farm boys and girls in agriculture, the greatest industry. Please send me the next issue of the RECORD."

Oscar Hamlink, Geneseo, Ill.

Listen In!

WLS Lines Up I.A.A. Men For Short Course On Air

Radio station WLS, under the direction of E. L. Bill, formerly director of the I. A. A. information department, has arranged a comprehensive farm bureau short course of 16 farm radio talks to be given by I. A. A. representatives. The series will start with a talk on the evening of Dec. 19 by President S. H. Thompson and close on Jan. 13 with a final farm bureau address by G. E. Metzger, director of organization.

President Thompson's opener will be "A Bird's Eye View of the Illinois Agricultural Association." His talk as well as all others on the evening schedule will begin at 8:30 o'clock.

On Dec. 23 at the same hour, Chauncy B. Watson, I. A. A. vice-president, DeKalb, Ill., will take up the chain where Mr. Thompson left off, telling all radio tuners-in of "The Farm Bureau as a Cog In the Nation's Mechanism." Treasurer Cowles comes along in 3rd place on Dec. 26 with "What the Farm Bureau Member Gets for His Money."

Noonday Programs Too

The first noonday program of the series comes on Jan. 2 when J. R. Bent, director of phosphate-limestone problems relates his experience in "Helping Agriculture to Permanency" via commercial fertilizers. All noonday programs begin at 12:30.

The same day, but on the evening schedule, J. C. Watson, taxation and statistics director, talks on "Saving Money for Illinois Farmers."

"The Farm Bureau's Milky Way" subject falls to your dairy marketing specialist, A. D. Lynch on the mid-day program, Jan. 5. The next night, Jan. 6, L. J. Quasey, transportation director, tells "What the Farm Bureau Has Done and Is Doing to Solve the Farmers' Transportation Problems."

Fruit Talks Scheduled

Discussion of "The More-Dollars-On-The-Tree and Less-Cost-At-The-Greeks Activity of the Farm Bureau" falls to A. B. Leeper, fruit and vegetable representative of the I. A. A. His talk is scheduled for 12:30, Jan. 7.

At the same time, Jan. 8, M. H. Peterson, in charge T. B. eradication gets his turn with "Clean Hearts and Herds."

Donald Kirkpatrick tells about "Handling the Farmer's Legal Problems" at 12:30, Jan. 9 and the evening of that day Geo. R. Wicker, general manager of the I. A. C. A. and director of co-operative accounting, describes the "20th Century Co-operative."

"Farm Bureauitis" Ends Series

On Jan. 12, during the noon hour, Wm. E. Hedgcock, live stock marketing, comes in for his "Shortening the Hoof-to-Frying-Pan Train via the Farm Bureau" talk.

At 12:30, Jan. 13, H. C. Butcher, information director, will talk on "The Farmer and His Local Newspaper." At 8:30 P. M. the same day the chain winds up with Metzger's final "Farm Bureauitis" talk.

I. A. A. Farm Program

From Station WCK, St. Louis
Time: Wednesday evenings, 7:40-8:00

(This program is arranged particularly for the benefit of southern Illinois farm bureau members who have had difficulty in hearing the Chicago stations. Letters and suggestions would be appreciated. Address the I. A. A. department of information.)

Dec. 10—Dairy talk by G. Edwin Popkess, editor of the Dairyman's Journal, E. St. Louis, Ill.

"What the Illinois Grange is Doing at Belleville This Week," by Paul Potter, Ass't. Editor, Orange Judd Illinois Farmer.

Dec. 17—Samuel Sorrells of Raymond, Montgomery county, executive committeeman for the 21st district and chairman of the live stock marketing committee of the I. A. A., on the activities of live stock marketing department.

"News About the Nation's First Live Stock Producers Market," by W. T. Angle, director of information Producers Live Stock Commission Association, National Stock Yards, Ill.

Washington County's Only I.A.A. Member Is Busy Man

To Martin H. Schaeffer of Hoyleton, Ill., goes the distinction of being the only member of the Illinois Agricultural Association in Washington county. Young Schaeffer, he is not yet 22 years old, paid his first membership in the I. A. A. when he was 18 and has since kept up his membership.

If you go into Washington county today and ask who Martin H. Schaeffer is, chances are ten to one he will be designated as president of the Washington County Farmers' Institute, president of the Washington County Milk Producers' Association, teacher of the Bend school, official agriculture editor for local papers, chief poultry culler of the neighborhood or maybe the individual who you ask will describe him simply as chief-cook-and-bottle-washer in all farm improvement work.

Martin Schaeffer

"I was born in a log cabin, graduated from public school and went to the normal University at Carbondale, intending to leave the farm," this Washington county leader admitted. "But after studying agriculture and finding that it has such an interesting scientific side it became the most fascinating thing in the world to me."

Realizing the disadvantage to which Washington county farmers are put without a Farm Bureau, Schaeffer began to talk Farm Bureau. That was previous to 1922 but the agricultural depression made such organization unwise at that time. He thinks it won't be long now until they will have a Washington County Farm Bureau.

Some of the neighbors made fun of young Schaeffer when he went away to school to study "book farming" but they've changed their minds. Now they follow his example and spread a little more lime, sow a little more sweet clover and make their cows give just a little more milk.

Most of his better-farming work is done "after hours" for he teaches school during the day and then culls chickens, writes for the papers, and makes plans for Farmers' Institute meetings. At the first Farmers' Institute Schaeffer attended there were six farmers present. Under his direction this attendance grew until at the last meeting, 2,000 farmers turned out.

Says Talks Were Good

Read what a representative of station WCK writes to the I. A. A. about the first air program over the St. Louis station:

Your two speakers on Wednesday night were very good indeed and we have received quite a few cards about them which I will mail as soon as I have them sorted out.

Our wave length has been changed to 273 meters.

Yours very truly,
Helen G. Hatfield,
Radio Station WCK.

From Station KYW, Chicago

Broadcast at 8:20 P. M.
(Incomplete for December)

Dec. 5—Broadcasting entire program as it is given at the annual American Farm Bureau Federation banquet, Congress Hotel, Chicago, 7:30 to 10:30 P. M.

Dec. 12—"Eleven Thousand Potato Club Boys Triple their Dads' Yields," by F. C. Gaylord, Associate in Horticulture, at Purdue University, La Fayette, Ind.

"Review of the A. F. B. F. annual meeting," by A. F. B. F. department of information.

Dec. 16—"The Farmer In Business," by C. E. Bamborough, Polo, Ill., I. A. A. executive committeeman from 13th Congressional district.

"How the State Grange Serves Agriculture," by Paul Potter, Ass't Editor of Orange Judd Illinois Farmer.

Dec. 19—Program by National Committee of boys' and girls' club work. In charge Guy L. Noble, national boys' and girls' clubs.

Dec. 22—"What the Farm Bureaus Are Doing in Illinois," by H. C. Butcher, director of I. A. A. department of information.

"Monthly Analysis of Farm Markets," by H. W. Moorhouse, Brookmeyer Agricultural Business Service.

Illinois Still In Lead

Illinois still refuses to relinquish its title to Iowa as the most staunch supporter of the Chicago Producers Commission Association. During October they were in the lead by ninety-nine cars, their total being 570 cars.

In the county class, Henry county, last year's champions, was setting a hot pace. To date, 173 carloads have been received from this county, 156 from Knox and 149 from Carroll.

The race of the shipping associations is considerably closer with Mount Carroll shipping association's 79 carloads placing them in first position. They are at the present time leading the Rockford Shipping Association by exactly 11 cars, which shipping associations until now has always been in first place since they have started shipping to the Producers.

For the week of Nov. 29 the Producers handled 100 per cent more hogs than any other firm in the yards, the total being 266 carloads.

Sheep Volume Grows

Chicago Producers are taking great pride in the record of their sheep department. This department has been in operation little over a year and a half and during that short space of time, has achieved such success that the Producers are regarded as one of the four leading sheep firms on the Chicago yards.

Indianapolis Producers Report

During the last two weeks of November, Illinois shipping associations have shipped 96 carloads of live stock to the Producers at Indianapolis, representing a business of well over $130,000. This, of course, does not represent all the business from Illinois, for in the twenty-two counties from which shipments were received during this time, there were many men who fed in carlots and shipped their own stock.

The twenty-two counties from which shipping associations consigned stock during the last half of November are: McLean, DeWitt, Macon, Piatt, Champaign, Iroquois, Edgar, Douglas, Moultrie, Christian, Shelby, Cumberland, Clark, Effingham, Crawford, Lawrence, Richland, Edwards, White, Coles, Jasper and Logan.

Feeders Are Interested

One of the most noticeable things at the market at this time is the number of men who are coming to market with curiosity whetted in regard to their own organization here. They are interested in the success of the Producers as well as being interested in the sale of the live stock which they bring with them when they come.

Some of the most recent visiting shippers have been Abe Hess of Edgar county, Floyd Barbee and Tonie Tyler of Clark, Oscar Anderson of Coles, K. O. Woody of Effingham, Jess Monohon of Iroquois, R. R. Shephard and T. W. Simpson of Christian, and Fred L. Gumm of Edgar.

From St. Louis Producers

The St. Louis Producers Association received and sold 280 cars of inbound stock Nov. 23 to Nov. 28, more cars than were handled by any other firm at the yards.

Noon, Thursday, Dec. 4, was the time set for the Boys' and Girls' Baby Beef Club of Macoupin county to sell their 44 head of Angus calves at public auction. This is their first Christmas Baby Beeves sale.

C. C. Mast, manager of Adams County Shippers' Association, Quincy, Ill., sold one load of hogs through the St. Louis Producers on Nov. 28 at $9.25 per cwt., the top for the day.

RAILROAD TROUBLES SETTLED FOR BUREAU MEMBERS BY I.A.A.

Service Includes All Troubles Arising Between Farmers And Railroads

The transportation department of the I. A. A. collects many claims for I. A. A. members and settles many troubles arising between railroads and farmers whose land lies along the right of way. Collection of claims and settlement of all troubles between farmers and railroad companies is one of the principal services for which the I. A. A. maintains the transportation department. This service is free to I. A. A. members.

It would take an entire volume to give space to all the claims handled by the department but three cases just recently settled are fairly representative of hundreds of others.

Got Fences Repaired

Late in December, 1923, Otto Heur of Bensenville, Ill., had a valuable cow killed on the C. M. & St. P. right of way. The animal got through a hole in the right of way fence during the night. The transportation department collected $100 damages for Mr. Heur. But the railroad company was slow in fixing the fence and only after persistent efforts by the transportation department, were the fences finally put in repair.

Under date of Nov. 27, 1924, Mr. Heur writes:

The fence is fixed on both sides of the track now. I thank you very much for your trouble and I stick to the Association now.

Bad Fence For Years

Another case just settled is that of the Meyer Bros., of Zearing, Ill. For several years they had been trying to get fences along the C. M. & St. P. repaired but no steps were taken by the company to make improvement. Early this fall Mr. Quasey took the matter up with the C. M. & St. P. officials.

This extract from a letter of Meyer Bros., dated Nov. 25, 1924, shows that settlement has been made:

They are now working on the fence. I am sure thankful for what you have done for me in getting this fence fixed. I sure will do all I can to boost the I. A. A., as you did me a good turn in getting this fence fixed.

Collect $500 Damages

And here is another claim which involves a flood gate of poor construction. A faulty flood gate of the B. & O. railroad company gave way to flood waters, resulting in much damage to Dan DeLorme's field crops at Caseyville, Ill. The damage was done early in the summer and claim for loss taken up with Mr. Quasey through the St. Clair County Farm Bureau where B. W. Tillman is adviser.

On Nov. 27, Mr. DeLorme wrote to Mr. Quasey as follows:

I have received a draft for $500 and thank you very much for the interest you showed in helping settle my claim.

These three examples of claims that have been handled only illustrate the services for which the transportation department is maintained by the I. A. A., Mr. Quasey says. The department is the Illinois farmer's hired hand. It performs the services requested by I. A. A. members as regards collection of overcharges on freight hauls, furnishing freight rates between shipping points, collection of damages from death of live stock, fire loss, crop loss or any difficulty arising between the farmer and the railroad.

Whatever your difference with the railroad may be, send in a description of your trouble and we will settle it if at all possible, the department advises. The only way to realize on your I. A. A. membership dues is to use the services provided.

MR. V. VANIMAN,
1210 SPRINGFIELD AVE.,
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | Issued Every Other Saturday—December 20, 1924 | Number 25

CHANGE CONSTITUTION; RE-ELECT BRADFUTE AT A.F.B.F. ANNUAL MEET

Greater Power Given States Which Pay Most Money To National Body

A special meeting of the I. A. A. executive committee has been called by President Thompson for Friday, Dec. 19.

Drastic changes in the constitution which have been fought for by the Illinois Agricultural Association and the other midwest federations since the Farm Bureau was founded six years ago and the re-election of O. E. Bradfute of Xenia, Ohio as president were the highlights of the sixth annual convention of the American Farm Bureau Federation at the Congress hotel in Chicago, Dec. 8, 9 and 10. Forty-nine voting delegates representing 35 state farm bureau federations were seated.

O. E. Bradfute

The chief change in the constitution made it possible for the states which pay the most dues to have more to say about how the American Farm Bureau Federation shall aid the farmers. All amendments to the constitution were passed with unanimous votes of the voting delegates present, but to become officially enacted each amendment must be ratified by two-thirds of the state federations. The midwest group became entitled thereby to one more director, making four representatives for the central region with the other three regions — southern, eastern and western—each retaining three.

Two-Year Terms

Another change was in the length of term of office for the president and vice-president to two years rather than one. This change will take effect for the officers who are elected at the 1925 annual meeting and does not lengthen the term of the present incumbent. The name of the executive committee was changed to board of directors. Executive committeemen of the national organization will be designated as directors in the future. Provision was made for approximately one-half of the directors to serve two years so that better continuity of work underway from one year to the next can be maintained.

Move to Guarantee Dues

Provision was made in another constitutional amendment for closer check-up between the national office and the state federations in order that all the dues payable to the American Farm Bureau Federation shall be paid over promptly. By this amendment it will be necessary in the future for treasurers of state federations to give bond conditioned upon accounting for and paying over to the American Farm Bureau the dues payable in compliance with the conditions of membership. In enforcing the obligation of such a bond, the national organization will have authority to audit the financial transactions between the states and the members. It is thought that this amendment will force payment from some of the state federations which have not paid in the 50-cent portions due the American Farm Bureau.

In the election of officers,

(Continued on page 3, col. 3)

PRESIDENT THOMPSON'S CHRISTMAS MESSAGE

CHRISTMAS is almost upon us once again. The spirit of the season should be of special significance to every member of the Farm Bureau. As a member of this great organization—county, state and national units—I wonder if YOU have ever stopped to think of the great common cause which exists between the farm bureau movement and Christianity. There is a great, invisible tie that binds the Farm Bureau and Christianity together. Perhaps it is wrong to say that the two are bound together. Quite possibly it would be more correct to say that the two are one—they telescope or overlap each other.

The Farm Bureau as an organization reflects the advanced thought of a Christian civilization. Christianity is working through this agency to serve the needs of farm people in building up a better rural life by making it more profitable through efficient production and working out a better plan of distribution which will contribute to the building up and maintaining of a strong community life which is essential to peace and happiness, both of which are the basis of contentment.

The little folks who gather under the Christmas trees of today will live to see the time when their own sons and daughters will benefit from the farm bureau projects now under way. We must look to the future to see many of our most coveted awards. The older men in the farm bureau movement will not live to see the day when the benefits from some of our present-day farm bureau projects have

(Continued on Page 2, Column 1)

THREE LEGISLATIVE PROJECTS OUTLINED BY I.A.A. COMMITTEE

Constitutional Amendment, Gas Tax, and Tuberculosis Are Main Issues

Three major legislative projects to be supported by the legislative committee at the coming session of the state legislature are: an amendment to the Illinois constitution to make possible some later constructive revenue legislation, a gasoline tax on motor driven vehicles in lieu of taxes already levied, and an expansion of the present effort toward eradication of tuberculosis in cattle.

A. C. Everingham

These three projects were outlined in an announcement made by the committee early in December. The members of the I. A. A. legislative committee are Frank Barton, Cornell; H. E. Goembel, Hooppole, and A. C. Everingham, Hutsonville.

Want School Changes

"In order to obtain constructive revenue legislation," the announcement stated, "it is necessary that there be an amendment to our constitution. The survey of Illinois school conditions made during the summer in co-operation with the Illinois Educational Commission revealed that beneficial school changes hinge on revenue alterations. The Illinois Agricultural Association in joining hands with organizations representing other industries in the state for the drafting of an amendment which will allow revenue changes.

"The Illinois Agricultural Association is for a gasoline tax on motor driven vehicles, providing the gas tax money is used in lieu of taxes already levied. A thorough study has shown us that the gasoline tax is a just tax. Auto drivers pay as they ride, and they pay in proportion to the amount they use the highways.

Continue T. B. Eradication

"We are for a continuation and expansion of the present tuberculosis eradication campaign. If the present work which has already been started in 58 Illinois counties is allowed to lull because of lack of state or federal funds, much of the money and time spent in the past by the counties, the state and the nation, and by the Illinois Agricultural Association, will have been wasted. A let up now would allow the disease to regain much of its foothold."

Sorrells and Angle Furnish Co-op Live Stock Air Program

Sam Sorrells, Montgomery county, I. A. A. executive committeeman from the 21st district, and W. T. Angle, director of information for the Producers Live Stock Commission Association at National Stock Yards, Ill., were speakers on the farm program over WCK last Wednesday evening, Dec. 17.

In his talk on co-operative live stock shipping associations in Illinois, Mr. Sorrells said in part:

"The extensive development of co-operative live stock shipping associations is proof of results that are satisfactory to the thousands of live stock producers, who now annually market their stock through their own shipping associations, and the continual organization of shipping associations indicates that the movement is past the experimental stage."

The work of the I. A. A. live stock marketing department in helping associations install the best systems of bookkeeping, in obtaining insurance policy for protection under the Workman's Compensation Law, in working with the University and in other ways was commended and recommended by Sorrells.

Mr. Angle's part of the program was a "News Talk About the Nation's First Live Stock Producers Market."

Hold Conferences In Four Districts

Quarterly farm bureau conferences in four different dstricts were scheduled for this week but came too late for detailed accounts in this RECORD.

Down in Springfield, on Dec. 17, executive committeeman Sam Sorrells called farm bureau members of the 21st district together for their last periodical "powwow," while in Edwardsville, 22nd district farmers were holding one called by Stanley Castle.

Over at Morrison, Whiteside county, 13th district, farmers were meeting at the call of C. E. Bamborough.

H. E. Goembel, called a 15th district conference for Dec. 19, in Galesburg.

Resolution Favors National Unison

At the annual meeting of the Livingston County Farm Bureau at Pontiac, Dec. 12, two days after the A. F. B. F. annual meeting, the following resolution was passed:

WHEREAS, we regard the County Farm Bureaus, State Associations and American Farm Bureau Federation as integral and indispensible parts of the whole Farm Bureau movement, and

WHEREAS, certain policies of the American Farm Bureau Federation in the past have caused serious dissatisfaction and criticisms, and

WHEREAS, we believe that the remedy can and must be worked out by leaders within the movement,

BE IT RESOLVED, that the Livingston County Farm Bureau commend the Illinois Agricultural Association voting delegates on their stand in the annual meeting of the American Farm Bureau Federation and pledge our full support to the Farm Bureau movement, County, State and National.

Farm Bureau Radio Program Opened by President Thompson

How farm people may expect to solve their marketing problems and put the agricultural industry on a sound basis was the substance of President Sam Thompson's radio talk over station WLS, Dec. 19, which opened the series of 16 talks to be given by I. A. A. officials during the next three weeks.

That organization is the major factor in putting the farming industry on a more stable basis is President Thompson's contention, which he told to WLS listeners in these words:

"I am 61 years old, have been engaged in farming all my life, have been studying the farmers' problems at close range based on actual experience which brought me to the conclusion that through organization alone could the farmer ever expect to put farming on a sound business basis."

I. A. A. Is Against Child Labor Law

Leading farm organizations all over the country have declared their opposition to the so-called "child labor amendment," which, if passed, would give Congress power to regulate the work which children under 18 years of age may do. Readers of the RECORD will remember that the I. A. A. is also opposed to the measure and will fight for a negative vote on it at the coming General Assembly.

Railroads Offer Reduced Rate To Annual Meetings

In the last issue of the RECORD appeared the announcement that the Western Passenger Association has granted a rate of fare and a half, round trip, to the annual I. A. A. meeting and Farmers' Week at Urbana and Champaign, effective Jan. 10 to 19, inclusive.

The following announcement from the Western Passenger Association will give more completely the conditions under which these rates will be applicable. They will be effective only from points along roads which are included in the Western Passenger Association.

This reduction will apply from points in Illinois; also from St. Louis, Mo., when over the regular round trip is $1 or more.

No stop-overs will be allowed.

No certificates will be required as the individual lines will publish tariffs authorizing agents to sell tickets on the reduced fare basis.

It will be necessary to travel the same route on the return trip.

For those traveling over lines that are not in the Western Passenger Association territory, it will be to their advantage to buy a single fare to the nearest junction point connecting with the line offering the reduced fare, then buy round trip ticket from that point.

The following is a list of the railroads on which the reduced fares will apply: Chicago & Northwestern; Chicago, Milwaukee & St. Paul; Chicago, Rock Island & Pacific; Chicago, Burlington & Quincy; Minneapolis & St. Louis; Soo Line; Chicago Great Western; Illinois Central; Chicago & Eastern Illinois; Wabash Railway; Chicago & Alton; Atchison, Topeka & Santa Fe.

It may be possible that some of the lines listed above may feel they are not sufficiently interested to warrant the issuing of tariffs granting the reduction. It will be advisable for those concerned to inquire of the station agent regarding the reduced fares so that in the event some line has taken no action they can purchase a ticket to the nearest junction point of another line. In this way we believe the situation can be handled to the best advantage.

They Like Farm Programs

In a letter to station WCK, which broadcasts the regular Wednesday evening farm program for the I. A. A., Mr. and Mrs. Fred Stillman, New Athens, Ill., say: "We listened in on the agricultural program which you broadcast yesterday evening. It was just fine; couldn't have been better. Could you please send us the poem Mr. Richardson recited at the end of his talk. We enjoyed it very much."

Shelby County Live Stock Men Hold 1st Annual Get-together

Sixty members of 12 local live stock shipping associations in Shelby county turned out for an all day meeting, called by Farm Adviser C. J. Robinson, to get acquainted and discuss marketing problems.

Wm. E. Hedgcock, I. A. A. live stock marketing director, and F. H. Kelley, fieldman for Indianapolis Producers, both talked on live stock marketing problems. Fifty-two live stock men were present for the free farm bureau dinner and more than 60 attended the afternoon meeting at which they voted to make the meeting an annual affair.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 16, 1931, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1931.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, C. B. Watson, DeKalb.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

President Thompson's Christmas Message

(Continued from page 1)

given maximum returns. But their sons and daughters, and grandsons and granddaughters, will be reaping much as a result of these activities. If we of today build and administrate our organization well, those who follow will have an organization greater than we dare dream today. They, in turn, can serve for future generations.

The movement should be kept national in character. In no other way can be attained the results that are offered through the broader service speaking for American agriculture. We can afford to meet with disappointment and even seeming defeat for the time being in our efforts to overcome obstacles and things that hinder if it clears our vision and puts us squarely behind the task of making it what it should be so that it will function effectively in the interest of all of its members.

Henry C. Wallace, our great and sincere friend who died in the service of agriculture, has often said that true co-operation is no more than "applied Christianity." A cornerstone in the foundation of the Farm Bureau is the whole-hearted co-operation of neighbor to neighbor. If a farmer in any community becomes sick and cannot plow his fields, or needs assistance in any way that is worthy, who is it that helps him? It is his neighbors, of course. I have seen it happen many times. It is natural that co-operation be a cornerstone of a great farmers' organization like the Farm Bureau. In performing neighborly acts, we are applying Christianity. We should co-operate to set aright things that do not appear right. To break away would be un-Christian.

In the affairs of the various units of our great farm bureau organization we must not forget that Christianity can be applied in our relationships with other organizations or other units of our big family. We must look to the future over and above any obstacles of the present and obvious errors of the past and apply the Christian spirit of Christmas in our relations with one another. Thus will the Farm Bureau go on into posterity like Christianity.

—o—

Right Under the Guns

When President Coolidge gave his notable speech at the International Live Stock Exposition, he was literally talking into the muzzle of the guns that have been shooting hell-fire into the co-operative live stock marketing organizations. Before a large group of old time commission men, President Coolidge gave unqualified recognition to co-operative marketing of an orderly and centralized character as a substitute for the haphazard and wasteful distribution methods of the past.

President Coolidge showed that he is acquainted with the present status of co-operative marketing of live stock. He stated that the principle of co-operation in producing, financing, buying and marketing must be encouraged to the utmost practical development. He pointed out further that the farmer must be released from the individualistic and competitive conditions under which agriculture has been conducted in the past.

President Coolidge's good will toward co-operative marketing should be a great boon to the movement. The National Live Stock Producers Association reports that live stock producers and local shipping association managers who have been at its office and at the yards are unanimous in their approval of President Coolidge's stand.

The growing confidence of the shippers in their own co-operative commission agency is seen in the record breaking receipts of the Chicago Producers. In the week ending Dec. 5, this organization handled 573 carloads of stock, a record for the Union Stock Yards. This figure beat their former record of 552 cars.

That's getting to be quite a husky farm bureau baby, folks.

—o—

Tune In!

If you are one of those farm bureau folks who owns a radio, you should not overlook the talks being given these wintry noons and evenings by I. A. A. officials and directors. President Thompson will have started the series off by the time you have received this RECORD. He puts forth the larger viewpoint of the Illinois Agricultural Association, a thing that many of us need to get. His talk is followed at later dates by Vice-President Watson, Treasurer Cowles and Secretary Fox. Then will come talks by the various departmental directors, each telling of his own work. Someone has rather aptly termed this series as a "short course" on a great farm organization. Tune in and know more about your organization.

And while you are tuning, don't forget that there is an Illinois Agricultural Association farm program broadcast every week from St. Louis over Station WCK. There is still another which is handled in co-operation with the American Farm Bureau Federation over KYW at Chicago. If you have a radio, you should know more about your organization's worth than it ever has been possible before. The schedules of the talks appear in the RECORD.

—o—

A Real Program

The shipping association movement in the United States during the last 12 years has made rapid growth, and at the present time the live stock marketing department's figures show there are 3,900 such associations actively engaged in marketing live stock in the United States.

The percentage of live stock being shipped to the various terminal markets by the shipping associations will vary from 15 to 65 per cent, which shows the importance of the shipping association to the live stock producer. It has been found that the shipping association returns more net dollars to the farmer than when he markets his live stock through the old channels.

The Illinois Agricultural Association, through its live stock marketing department, is working to help strengthen the shipping associations of Illinois as it is believed that the stabilization and success of our live stock markets depend upon the strength and co-operative mindedness of our various shipping associations.

With this thought in mind we are endorsing the resolutions passed by the officers and managers at the second annual shipping association conference of Champaign county, Dec. 12. The resolutions follow:

The general committee in charge of the second annual conference of livestock shipping associations in Champaign county make the following recommendations for the consideration of the representatives of the local livestock shipping associations in the betterment of work for the coming year:

Things urged:

That officers and directors of local shipping associations carry on an educational program during the coming year on the following things:

1. That each local shipping association hold a demonstration during this winter on grading hogs.
2. That officers and directors of local shipping associations hire local managers that are co-operative minded. That is that the manager have an understanding and sympathy with the larger principles necessary in advancing co-operative marketing of livestock. If a manager is not in sympathy with these things it is hard for him to put them in practice. It is also more probable that he will keep still when he ought to be of service in explaining.
3. That local carload individual shippers be urged to ship thru their local co-operative shipping associations.
4. That shipping association officials attempt to correct the practice of several men in the community making up carloads of their own stock for shipment. This is not co-operation, but the lack of co-operation and results in several different forms of evil.
5. Draw attention to the fact that shipping associations should make their reports on capital stock tax and claim exemption according to the requirements of the Federal Revenue Act for incorporated and unincorporated associations by July 31 of each year. Income tax reports for co-operative associations establishing exemption must be filed by the 15th of the 3rd month following the close of the business year. After exemption is established it is not necessary to file an income tax return but all shipping associations must make capital stock tax report.
6. The committee recommends that there should be more regular meetings of the boards of directors of local associations and greater activity in the local problems for the betterment of co-operation.
7. It is recommended that boards of directors of local shipping associations take up the questions of incorporation for their consideration.
8. It is recommended that local associations pay attention to planning in detail good annual meetings for the complete report and explanation of the co-operative business of the association.

In this connection good dinners and speakers may add to the attendance and interest.

(Signed) A. O. Peters, general chairman; B. F. Rayburn, secretary; H. W. Holl, chairman round table and W. H. Odell, reception.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

"Voice of the Members" Column: I have studied the view points of many farm or agricultural conditions and difficulties from every angle, and I believe these very conditions can be solved if only wisdom or intelligence are combined with energy and thrift, backed by Federal Loan Banks, and proper advisement or supervision of Farm Bureaus, and of leading agricultural papers. But here are the main and foremost problems. I think, which if attacked at the right time and with the proper advantage or appliance, will do more to benefit the farmers of Illinois than all other suggestions combined. Here is my suggested program:

1. The $100,000,000 road bond issue should be carefully and economically planned and executed, and all county roads, linking with state roads, should be properly graded and finished off with a thick layer of crushed rock, which would certainly lift the state of Illinois completely out of the mud, while at the same time it would reduce truck transportation expenses to farmers living on or near these hard roads, and would make the district open markets easily accessable for d[illegible].

2. A co-operative marketing system, where the buying and selling is in direct contact with the consumer and producer, to eliminate handlers' and middlemen's profits.

3. Immediate reduction on all farm machinery prices, say to at least one-half, and co-operating farming communities dealing directly with factories manufacturing farming implements, to curb the profits of agents and hardware dealers.

4. Reduction of freight and transportation rates by the railroads on all large consignments or full car load lots destined to distant markets, and better service rendered by the railroads to the farmers, when large production warrants more cars and quick transportation during busy seasons.

5. Encouraging farmers to buy and sow only pure seeds, and also buy and raise pure-bred or registered stock, and advising farmers to rid themselves immediately of all impure seeds and scrubby stock.

6. Proper housing and sheltering of all stock and of all farming implements.

7. Interests of agriculture should be taught in rural or district schools, and the best of educational facilities made available in well-established farming communities.

8. Advertising, used by the farmers as a sales medium, and daily market reports by selling directly to consumers from the farm.

9. Keeping in touch with, or investigating farming and marketing conditions in other states, or in foreign lands, thereby possibly solving in helping to remedy existing home-market difficulties like surpluses, and keeping in contact with distant or foreign markets in cases of crop shortage or in cases of shortage of farm products.

10. General or diversified, scientific and economic farming methods and systems, and rotating the yielding farm acreage. The advice of the Farm Bureau as to the best methods of creating and building up poor soils to increase the value of unproductive agricultural regions.

11. Encouraging farmers to buy the most necessary up-to-date farming implements and co-operating (if necessary thru expense) in buying high priced farm implements infrequently used, during all seasons of the year.

12. Encouraging prospering farmers to utilize farming implements (like tractors or trucks) to the best and most necessary advantage to cut operating expenses to a minimum. Also advising land owners to assist their tenants in a practical or creative way and manner which will tend to increase the land value, and to increase crop production without additional expense in wages for hired help, or otherwise.

13. Tax should be reduced for all tenant farmers, and for all land owning farmers, according to the distance or accessibility to markets, and according to the nature and productivity of agricultural regions.

14. Complete budget system by all farmers, showing tax and income tabulations, plus agricultural operations on said farms—which would place farmers on an equal footing like banking debits or credits, or other industrial lines.

15. Formation of agricultural associations to build and to maintain farmer-controlled grain elevators, mills, warehouses, shipping stations, dairies, etc., same being controlled by shares or stocks, and with the aid of Federal Farm Loans, governed by proper advisement and supervision of able, intelligent and talented farm leaders, and the full and hearty support and co-operation of clear-visioned members selected from well established farming communities.

Adolph Dyroff, Dupo, St. Clair County

FARMERS' PROBLEMS ARE ECONOMIC, NOT POLITICAL: BRADFUTE

Leaders See Need of Merchant Marine; Favor Export Corporation

Immediately after the opening invocation by Rev. John Acheson of Princeville, Ill., President O. E. Bradfute roused the delegates to the 6th annual American Farm Bureau Federation meeting into action with an address in which he sketched the principal problems before American agriculture and the Farm Bureau today.

"If I might be allowed to summarize the objects of this organization in one word, that word would be—service." This was one of President Bradfute's opening statements.

Problems are Economic

"I do not doubt that most of the farmers' problems are economic rather than political and we will make the greatest progress toward their solution by applying sound business principles which have been used by other industries," he said.

"Agriculture has seen many depressions and has always come back. It will again come back but the supreme question which we are interested in now is—will it reach and hold its proper level?"

"As we now enter upon our work of three days' sessions, we are depending on each director to carry his full share of the load," he concluded. "Let us tackle all our problems in the spirit of co-operation, with cool heads and warm hearts—fully realizing that unity means success, while discord means defeat."

Need Merchant Marine

At the afternoon session Commissioner W. H. Hill of the United States Shipping Board talked on the development of the American Merchant Marine. He said among other things, "As farmers we are interested in America's extending her commerce to the uttermost parts of the world. Ready markets are what we need to make the prices such that we will profit in the production. Foreign countries are our competitors in these markets. If we depend on foreign ships to carry our exports, our products will not be the first to reach those markets. We should have our own Merchant Marine for this work."

Following Mr. Hill, C. W. Hunt, farmer member of the Federal Trade Commission, appointed to this commission as the result of Farm Bureau request for farmer representation, told the purpose of the commission and described its relation to agriculture.

The evening of the first day of the convention was turned over to the delegates as an open forum. President Bradfute called for nominations for chairman of the meeting. Sam Thompson, our I. A. A. head, was unanimously chosen.

Talk of Export Corporation

Geo. N. Peek, president of the American Council of Agriculture, was scheduled for an "Equality for Agriculture" address, the only portion of the program arranged beforehand. After his talk which centered around enacting legislation similar to the McNary-Haugen bill, the delegates spent nearly three hours in rapid fire discussion of the general agricultural situation. Most of the contributions were along the line of legislation such as the American Council of Agriculture advocates, namely, creation of a farmers' export corporation, by act of congress, to stabilize the markets of farm commodities.

Probably 90 per cent of the delegates who voiced their opinions are strongly in favor of such an export corporation. The arguments of those few who dissented from such a policy failed to alter the opinions of those who were even only slightly inclined toward national legislation similar to the McNary-Haugen bill.

At the morning session of the second day, just before the delegates separated into sectional conferences for consideration of

(Continued on page 4, col. 4)

A BIG BREAKFAST WITH ILLINOIS FOLKS

One hundred and forty-seven people, including 81 boys' and girls' club members of Illinois, got in on this breakfast when the I. A. A. entertained the club folks at the Great Northern Hotel during their visit to the International Live Stock Show. Sam Thompson said the way they work and sing together shows that they are learning the meaning of "co-operation."

RE-ELECT BRADFUTE AT A. F. B. F. ANNUAL MEET

(Continued from page 1)

President Bradfute, who had served two terms, was placed in nomination by E. B. Cornwall, president of the Vermont Farm Bureau Federation. In his nomination speech, Mr. Cornwall drew attention to President Coolidge's selection of Mr. Bradfute on the agricultural commission. M. L. Noon, president of the Michigan Farm Bureau Federation, seconded Mr. Bradfute's nomination.

Only One Opposes Bradfute

Geo. C. Jewett of Spokane, Washington, formerly president of the American Wheat Growers' Association, but now a member of the Federal Farm Loan Board, was nominated for the presidency by Ralph Snyder, president of the Kansas Farm Bureau Federation. Mr. Snyder stated that "we have come to a parting of the ways" and suggested that it would be worthy of the voting delegates to put in a president who had not been mixed up in the many controversies. The final vote stood: Bradfute 35, Jewett 11 and three blanks.

"Our Sam" Refuses

Sam H. Thompson, president of the I. A. A., was nominated for the vice-presidency by Edw. A. O'Neal, president of the Alabama Farm Bureau Federation. Mr. Thompson immediately arose and withdrew his name. J. F. Reed, the past vice-president, had been nominated. Mr. O'Neal, the nominator of "Our Sam," was then nominated by W. T. Harris, the voting delegate from Kentucky. Mr. O'Neal has been a member of the executive committee of the American Farm Bureau and was one of the few southern farm bureau leaders who helped at Washington during the McNary-Haugen fight last spring. He was elected.

President Thompson retained his seat as a director for the midwest group. Chas. E. Hearst, president of the Iowa Farm Bureau Federation, was also re-elected. J. F. Reed, of Minnesota, the retiring vice-president, was put in and M. L. Noon, president of Michigan Farm Bureau Federation, became the fourth director, pending the ratification of the amendment which allows an extra director for each 100,000 paid-up membership.

No Secretary Hired Yet

The new board of directors went into executive session the day after the convention closed with the purpose of fixing the budgets for the various departments and hiring a secretary to take the place of J. W. Coverdale, who resigned during the summer to become treasurer of the Grain Marketing Company. A. R. Simpson, who had been director of finance, was made treasurer. Mr. Coverdale had been secretary and treasurer. It is expected that action will be taken by the board when it meets Jan. 29, 1925.

Below is printed the substance of resolutions presented by a committee on resolutions and later adopted by the voting delegates. These resolutions are important because they are the guiding hand which is to direct the actions of the A. F. B. F. officials and board of directors through the coming year.

Co-operative Marketing

1. A. F. B. F. pledges continued support to all co-operative marketing enterprises.
2. A. F. B. F. pledges to support co-operative marketing, to aid in establishing a national wool co-operative agency and endorses President Coolidge's principle of orderly production and orderly marketing.

Department of Agriculture

1. Authorizes A. F. B. F. president to call a conference to make not more than three recommendations to President Coolidge for the appointment of Secretary of Agriculture.
2. Approval of government crop reports.

Legislation and Taxation

Taxation: Reaffirmation of principles on which A. F. B. F. tax work has been based, namely:

1. Income as a basis of ability to support federal government.
2. Rate should be progressive—larger the income the higher the rate.
3. A portion, not to exceed 25 per cent, of tax budget should be raised by consumption taxes.

Other taxation policies:

1. Endorsement of President's economy program.
2. Favor abolition of federal estate tax.
3. Opposed to shifting tax burden from income to consumption tax.
4. Deductions and exemptions should be first offset against tax free income.
5. Money derived from stock dividend sales should be taxed as if dividends had been paid in cash.
6. Approval of gift tax.
7. Recommend that Congress plug holes in the income tax law.
8. Amend McFadden bill by striking out provision legalizing stock dividends.
9. Restriction on issuance of tax free securities.
10. Urge study of state and local tax methods, state and local committees.
11. Modification of law so banks and their stockholders may be taxed as other corporations and individuals.

Legislation: Immediate development of Muscle Shoals to produce fertilizer for farms.

Marjorie Cline (left) and her aunt, Lula Case, both members of the Willing Workers Poultry Club in Cass county. Marjorie is champion essay writer in Cass county and second prize winner in Illinois. Her aunt holds a blue ribbon, which she won on her pen of Barred Rocks at the B. & O. poultry club show.

1. Opposition to additional burdens on parcel post system to increase salaries of postal employees.
2. Opposition to Child Labor bill.
3. Support of pure seed laws.
4. Limit bankers' charge to 2 per cent in addition to what they pay for federal reserve money.
5. Support of Vestal Standard Container bill, to decrease cost of distribution.
6. Support of Truth-In-Fabric legislation.
7. Favor postal libraries.
8. Opposition to branch banking as provided in McFadden bill.
9. Recommendation to make possible loans of four months under intermediate credits act and a higher maximum loan on warehouse receipts.
10. Endorsement of farmers' export corporation as described elsewhere in this issue of the Record.

Transportation and Research

Policies are as follows:

1. Endorse plan of Shippers' Regional Advisory Boards.
2. Urge fullest co-operation between state and county Farm Bureaus and the federal government.
3. Favor public representation on Railroad labor board.
4. Favor development of inland waterways. (Specific mention given to Mississippi, Missouri and Ohio river systems.)
5. Approve reduction of freight rates on agricultural products.
6. Substitute effective operation for present state of arbitration of St. Lawrence-Great Lakes Waterway.
7. Endorse under joint administration of state and federal authorities building good roads as an asset to farm people.
8. Favor American Merchant Marine.

Organization and Finance

1. Vigorous prosecution of organization through state and county Farm Bureaus.
2. Each state should have an organization or field service department headed by a competent director.
3. Recognition of plan getting members in connection with commodity marketing made possible identity of individual as a farm bureau member is not interfered with.
4. Urge enactment of state laws making it possible to incorporate all units of the Farm Bureau.
5. Urge a well balanced agricultural community program to meet need of the farm bureau family membership.
6. Regard failure to transmit membership funds to state and national organization as a misappropriation of funds and officer should be held accountable therefor under the law.
7. Urge method to transmit dues regularly each month and direct executive committee to bring about strict compliance with this requirement.

Publicity

1. Favors appropriation of funds to adequately meet publicity requirements of state and national organizations.
2. Closer co-ordination of all publicity work.
3. Favor making uniform all public statements of Farm Bureau policies.
4. Endorse National Farm Radio Council.

Home and Community

1. Full development of the Home and Community department of the A. F. B. F.
2. Urge co-operation of Farm Bureaus to further: Better citizenship, good community music, rural health, vocational education in agriculture and Boys' and Girls' Club work.

Other Departments

Appreciate President Bradfute's appointment to Agricultural Conference and look for constructive recommendations from that body.

Approve development of economical electric power on the farm.

Place enforcement of butter standards in hands of U. S. D. A.

Endorse T. B. eradication program.

NEW LEGISLATIVE PLAN SUBMITTED BY FARM COUNCIL

Would Create Export Corporation Avoiding Flaws of The McNary-Haugen Bill

Following the conference of representatives of some 40 or 50 farm organizations in Chicago, Dec. 1 and 2, at the call of the American Council of Agriculture, steps have been taken to place before President Coolidge's agricultural commission a plan for stabilization of American agriculture by securing for it equal opportunity with industry and labor.

The American Council of Agriculture was created at St. Paul, last July, by state and national farm organizations as their agency of united effort and expression. In this capacity the Council is now to present to Congress, through the lately created agricultural commission, a plan devised to take the place of so-called McNary-Haugen legislation.

Plan Export Corporation

The plan proposes the creation of a farmers' export corporation to dispose of surplus farm commodities. The extent of government participation in the corporation would be limited to the minimum necessary to a comprehensive grant of power.

The export corporation proposal differs from the McNary-Haugen bill in several respects. It eliminates the ratio price feature. It eliminates the powers conferred upon the President to fix tariff rates at will. It aims to secure benefits of existing tariff schedules instead of creating new ones. The corporation would be set up to buy exportable surpluses when the existence of surpluses causes the markets for domestic consumption to fall below American price levels.

Proponents of the export corporation rely upon this plan to make it possible for farmers to sell their major farm crops at American prices rather than at prices set by world markets.

Would Aid Co-operatives

The farmers' export corporation is designed to supplement co-operative marketing. The adoption of the plan, those who have studied it point out, would aid co-operative marketing organizations to function effectively.

At present co-operative associations are not able to operate effectively because they are not able to dispose of surplus products and assess the losses on this portion of the commodity back upon the benefitted producer, without penalizing organization members to the benefit of non-members. Under the proposed plan these costs incurred in disposing of surpluses would be automatically and unavoidably absorbed by all producers.

Plan Goes To Commission

A Council legislative committee, on which national and state organizations are represented, was provided for at the Chicago conference. The new legislative program in rough outline was presented and tentatively approved and arrangements made for submitting it to the various farm organizations for further approval. As soon as responses are received, the proposal with an accompanying brief will be submitted by the American Council of Agriculture to each member of the President's agricultural commission.

It is hoped that when it is submitted the commission will recommend to the present session of Congress the enactment of legislation which will prevent further depression of agriculture before Congress could again take action.

I.A.C.A. Reaches 105 Mark

Farmers' co-op organizations applying for audit service in the Illinois Agricultural Co-operatives Association now number **105.** General manager, Geo. R. Wicker, with his staff of accountants have made 60 examinations, more than 50 of which are complete. Grain elevators lead in membership with 44 and Farm Bureaus are second with 39.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

President Thompson's Christmas Message

(Continued from page 1)

given maximum returns. But their sons and daughters, and grandsons and granddaughters, will be reaping much as a result of these activities. If we of today build and administrate our organization well, those who follow will have an organization greater than we dare dream today. They, in turn, can serve for future generations.

The movement should be kept national in character. In no other way can be attained the results that are offered through the broader service speaking for American agriculture. We can afford to meet with disappointment and even seeming defeat for the time being in our efforts to overcome obstacles and things that hinder if it clears our vision and puts us squarely behind the task of making it what it should be so that it will function effectively in the interest of all of its members.

Henry C. Wallace, our great and sincere friend who died in the service of agriculture, has often said that true co-operation is no more than "applied Christianity." A cornerstone in the foundation of the Farm Bureau is the whole-hearted co-operation of neighbor to neighbor. If a farmer in any community becomes sick and cannot plow his fields, or needs assistance in any way that is worthy, who is it that helps him? It is his neighbors, of course. I have seen it happen many times. It is natural that co-operation be a cornerstone of a great farmers' organization like the Farm Bureau. In performing neighberly acts, we are applying Christianity. We should co-operate to set aright things that do not appear right. To break away would be un-Christian.

In the affairs of the various units of our great farm bureau organization we must not forget that Christianity can be applied in our relationships with other organizations or other units of our big family. We must look to the future over and above any obstacles of the present and obvious errors of the past and apply the Christian spirit of Christmas in our relations with one another. Thus will the Farm Bureau go on into posterity like Christianity.

—o—

Right Under the Guns

When President Coolidge gave his notable speech at the International Live Stock Exposition, he was literally talking into the muzzle of the guns that have been shooting hell-fire into the co-operative live stock marketing organizations. Before a large group of old time commission men, President Coolidge gave unqualified recognition to co-operative marketing of an orderly and centralized character as a substitute for the haphazard and wasteful distribution methods of the past.

President Coolidge showed that he is acquainted with the present status of co-operative marketing of live stock. He stated that the principle of co-operation in producing, financing, buying and marketing must be encouraged to the utmost practical development. He pointed out further that the farmer must be released from the individualistic and competitive conditions under which agriculture has been conducted in the past.

President Coolidge's good will toward co-operative marketing should be a great boon to the movement. The National Live Stock Producers Association reports that live stock producers and local shipping association managers who have been at its office and at the yards are unanimous in their approval of President Coolidge's stand.

The growing confidence of the shippers in their own co-operative commission agency is seen in the record breaking receipts of the Chicago Producers. In the week ending Dec. 5, this organization handled 573 carloads of stock, a record for the Union Stock Yards. This figure beat their former record of 552 cars.

That's getting to be quite a husky farm bureau baby, folks.

—o—

Tune In!

If you are one of those farm bureau folks who owns a radio, you should not overlook the talks being given these wintry noons and evenings by I. A. A. officials and directors. President Thompson will have started the series off by the time you have received this Record. He puts forth the larger viewpoint of the Illinois Agricultural Association, a thing that many of us need to get. His talk is followed at later dates by Vice-President Watson, Treasurer Cowles and Secretary Fox. Then will come talks by the various departmental directors, each telling of his own work. Someone has rather aptly termed this series as a "short course" on a great farm organization. Tune in and know more about your organization.

And while you are tuning, don't forget that there is an Illinois Agricultural Association farm program broadcast every week from St. Louis over Station WCK. There is still another which is handled in co-operation with the American Farm Bureau Federation over KYW at Chicago. If you have a radio, you should know more about your organization's worth than it ever has been possible before. The schedules of the talks appear in the Record.

—o—

A Real Program

The shipping association movement in the United States during the last 12 years has made rapid growth, and at the present time the live stock marketing department's figures show there are 3,900 such associations actively engaged in marketing live stock in the United States.

The percentage of live stock being shipped to the various terminal markets by the shipping associations will vary from 15 to 65 per cent, which shows the importance of the shipping association to the live stock producer. It has been found that the shipping association returns more net dollars to the farmer than when he markets his live stock through the old channels.

The Illinois Agricultural Association, through its live stock marketing department, is working to help strengthen the shipping associations of Illinois as it is believed that the stabilization and success of our live stock markets depend upon the strength and co-operative mindedness of our various shipping associations.

With this thought in mind we are endorsing the resolutions passed by the officers and managers at the second annual shipping association conference of Champaign county, Dec. 12. The resolutions follow:

The general committee in charge of the second annual conference of livestock shipping associations in Champaign county make the following recommendations for the consideration of the representatives of the local livestock shipping associations in the betterment of work for the coming year:

Things urged:

That officers and directors of local shipping associations carry on an educational program during the coming year on the following things:

1. That each local shipping association hold a demonstration during this winter on grading hogs.
2. That officers and directors of local shipping associations hire local managers that are co-operative minded. That is that the manager have an understanding, and sympathy with the larger principles necessary in advancing co-operative marketing of livestock. If a manager is not in sympathy with these things it is hard for him to put them in practice. It is also more probable that he will keep still when he ought to be of service in explaining.
3. That local carload individual shippers be urged to ship thru their local co-operative shipping associations.
4. That shipping association officials attempt to correct the practice of several men in the community making up carloads of their own stock for shipment. This is not co-operation, but the lack of co-operation and results in several different forms of evil.
5. Draw attention to the fact that shipping associations should make their reports on capital stock tax and establish exemption according to the requirements of the Federal Revenue Act for incorporated and unincorporated associations by July 31 of each year. Income tax reports for co-operative associations establishing exemption must be filed by the 15th of the 3rd month following the close of the business year. After exemption is established it is not necessary to file an income tax return but all shipping associations must make capital stock tax report.
6. The committee recommends that there should be more regular meetings of the boards of directors of local associations and greater activity in the local problems for the betterment of co-operation.
7. It is recommended that boards of directors of local shipping associations take up the questions of incorporation for their consideration.
8. It is recommended that local associations pay attention to planning in detail good annual meetings for the complete report and explanation of the co-operative business of the association.

In this connection good dinners and speakers may add to the attendance and interest.

(Signed) A. O. Peters, general chairman; H. F. Rayburn, secretary; H. W. Hoff, chairman round table and W. H. Odell, reception.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

"Voice of the Members" Column: I have studied the view points of remedying farm or agricultural conditions and difficulties from every angle, and I believe these very conditions can be solved if only wisdom or intelligence are combined with energy and thrift, backed by Federal Loan Banks, and proper advisement or supervision of Farm Bureaus, and of leading agricultural papers. But here are the main and foremost problems. I think, which if used at the right time and with the proper advantage or appliance, will do more to benefit the farmers of Illinois than all other suggestions combined. Here is my suggested program:

1. The $100,000,000 road bond issue should be carefully and scientifically planned and executed, and all county roads, linking with state roads, should be properly graded and finished off with a thick layer of crushed rock, which would eventually lift the state of Illinois completely out of the mud, while at the same time it would reduce truck transportation expenses to farmers living or near these hard roads, and would [illegible] open markets easily accessible for c[illegible]

2. A co-operative marketing syste[illegible] and selling in direct contact with the consumer and producer, to eliminate handlers' and middlemen's profits.

3. Immediate reduction on all farm machinery prices, say to at least one-half, and co-operating farming communities dealing direct with any factories manufacturing farming implements, to curb the profits of agents and hardware dealers.

4. Reduction of freight and transportation rates by the railroads on all large consignments or full car load lots destined to far distant markets, and better service rendered by the railroads to the farmers, when large production warrants more cars and quick transportation during busy seasons.

5. Encouraging farmers to buy and sow only pure seeds, and also buy and raise pure-bred or registered stock, and advising farmers to rid themselves immediately of all impure seeds and scrubby stock.

6. Proper housing and sheltering of all stock and of all farming implements.

7. Interests of agriculture should be taught in rural or district schools, and the best of educational facilities made available in well-established farming communities.

8. Advertising, used by the farmers as a sales medium, and daily market reports by selling directly to consumers from the farm.

9. Keeping in touch with, or investigating farming and marketing conditions in other states, or in foreign lands, thereby possibly solving in helping to remedy existing home-market difficulties like surpluses, and keeping in contact with distant or foreign markets in cases of crop shortage or in cases of shortage of farm production.

10. General or diversified, scientific and economic farming methods and systems, and rotating the yielding farm acreage. The advice of the Farm Bureau as to the best methods of treating and building up poor soils to increase the value of unproductive agricultural lands.

11. Encouraging farmers to buy the most necessary up-to-date farming implements and co-operating (if necessary thru loans) in buying high priced farm implements infrequently used, during all seasons of the year.

12. Encouraging prospering farmers to utilize farming implements (like tractors or trucks) to the best and most necessary advantage to cut operating expenses to a minimum. Also advising land owners to assist their tenants in a most creative and beneficial way and manner which will result in increased land value, and to increase crop production without additional expense in wages for hired help, or otherwise.

13. Tax should be reduced for all tenant farmers, and for all land owning farmers, according to the distance or accessibility to markets, and according to the nature and productivity of agricultural regions.

14. Complete budget system by all farmers, showing tax and income tabulations, plus agricultural operations on said farms—which would place farmers on an equal footing like banking debits or credits, or other industrial lines.

15. Formation of agricultural associations to build and to maintain farmer-controlled grain elevators, mills, warehouses, shipping stations, dairies, etc., same being controlled by shares or stocks, and with the aid of Federal Farm Loans, governed by proper advisement and supervision of able, intelligent and talented farm leaders, and the full and hearty support and co-operation of clear-visioned members selected from well established farming communities.

Adolph Dyroff, Dupo, St. Clair County

FARMERS' PROBLEMS ARE ECONOMIC, NOT POLITICAL: BRADFUTE

Leaders See Need of Merchant Marine; Favor Export Corporation

Immediately after the opening invocation by Rev. John Acheson of Princeville, Ill., President O. E. Bradfute roused the delegates to the 6th annual American Farm Bureau Federation meeting into action with an address in which he sketched the principal problems before American agriculture and the Farm Bureau today.

"If I might be allowed to summarize the objects of this organization in one word, that word would be—service." This was one of President Bradfute's opening statements.

Problems are Economic

"I do not doubt that most of the farmers' problems are economic rather than political and we will make the greatest progress toward their solution by applying sound business principles which have been used by other industries," he said.

"Agriculture has seen many depressions and has always come back. It will again come back but the supreme question which we are interested in now is—will it reach and hold its proper level?"

"As we now enter upon our work of three days' sessions, we are depending on each director to carry his full share of the load," he concluded. "Let us tackle all our problems in the spirit of co-operation, with cool heads and warm hearts—fully realizing that unity means success, while discord means defeat."

Need Merchant Marine

At the afternoon session Commissioner W. H. Hill of the United States Shipping Board talked on the development of the American Merchant Marine. He said among other things, "As farmers we are interested in America's extending her commerce to the uttermost parts of the world. Ready markets are what we need to make the prices such that we will profit in the production. Foreign countries are our competitors in these markets. If we depend on foreign ships to carry our exports, our products will not be the first to [illegible] markets. We should [illegible] an Merchant Marine [illegible]."

Following Mr. Hill, C. W. Hunt, farmer member of the Federal Trade Commission, appointed to this commission as the result of Farm Bureau request for farmer representation, told the purpose of the commission and described its relation to agriculture.

The evening of the first day of the convention was turned over to the delegates as an open forum. President Bradfute called for nominations for chairman of the meeting. Sam Thompson, our I. A. A. head, was unanimously chosen.

Talk of Export Corporation

Geo. N. Peek, president of the American Council of Agriculture, was scheduled for an "Equality for Agriculture" address, the only portion of the program arranged beforehand. After his talk which centered around enacting legislation similar to the McNary-Haugen bill, the delegates spent nearly three hours in rapid fire discussion of the general agricultural situation. Most of the contributions were along the line of legislation such as the American Council of Agriculture advocates, namely, creation of a farmers' export corporation, by act of congress, to stabilize the markets of farm commodities.

Probably 90 per cent of the delegates who voiced their opinions are strongly in favor of such an export corporation. The arguments of those few who dissented from such a policy failed to alter the opinions of those who were even only slightly inclined toward national legislation similar to the McNary-Haugen bill.

At the morning session of the second day, just before the delegates separated into sectional conferences for consideration of

(Continued on page 4, col. 4)

A BIG BREAKFAST WITH ILLINOIS FOLKS

One hundred and forty-seven people, including 81 boys' and girls' club members of Illinois, got in on this breakfast when the I. A. A. entertained the club folks at the Great Northern Hotel during their visit to the International Live Stock Show. Sam Thompson said the way they work and sing together shows that they are learning the meaning of "co-operation."

RE-ELECT BRADFUTE AT A. F. B. F. ANNUAL MEET

(Continued from page 1)

President Bradfute, who had served two terms, was placed in nomination by E. B. Cornwall, president of the Vermont Farm Bureau Federation. In his nomination speech, Mr. Cornwall drew attention to President Coolidge's selection of Mr. Bradfute on the agricultural commission. M. L. Noon, president of the Michigan Farm Bureau Federation, seconded Mr. Bradfute's nomination.

Only One Opposes Bradfute

Geo. C. Jewett of Spokane, Washington, formerly president of the American Wheat Growers' Association, but now a member of the Federal Farm Loan Board, was nominated for the presidency by Ralph Snyder, president of the Kansas Farm Bureau Federation. Mr. Snyder stated that "we have come to a parting of the ways" and suggested that it would be worthy of the voting delegates to put in a president who had not been mixed up in the many controversies. The final vote stood: Bradfute 35, Jewett 11 and three blanks.

"Our Sam" Refuses

Sam H. Thompson, president of the I. A. A., was nominated for the vice-presidency by Edw. A. O'Neal, president of the Alabama Farm Bureau Federation. Mr. Thompson immediately arose and withdrew his name. J. F. Reed, the past vice-president, had been nominated. Mr. O'Neal, the nominator of "Our Sam," was then nominated by W. T. Harris, the voting delegate from Kentucky. Mr. O'Neal has been a member of the executive committee of the American Farm Bureau and was one of the few southern farm bureau leaders who helped at Washington during the McNary-Haugen fight last spring. He was elected.

President Thompson retained his seat as a director for the midwest group. Chas. E. Hearst, president of the Iowa Farm Bureau Federation, was also re-elected. J. F. Reed, of Minnesota, the retiring vice-president, was put in and M. L. Noon, president of Michigan Farm Bureau Federation, became the fourth director, pending the ratification of the amendment which allows an extra director for each 100,000 paid-up membership.

No Secretary Hired Yet

The new board of directors went into executive session the day after the convention closed with the purpose of fixing the budgets for the various departments and hiring a secretary to take the place of J. W. Coverdale, who resigned during the summer to become treasurer of the Grain Marketing Company. A. R. Simpson, who had been director of finance, was made treasurer. Mr. Coverdale had been secretary and treasurer. It is expected that action will be taken by the board when it meets Jan. 29, 1925.

Below is printed the substance of resolutions presented by a committee on resolutions and later adopted by the voting delegates. These resolutions are important because they are the guiding hand which is to direct the actions of the A. F. B. F. officials and board of directors through the coming year.

Co-operative Marketing

1. A. F. B. F. pledges continued support to all co-operative marketing enterprises.
2. A. F. B. F. pledges to support co-operative marketing, to aid in establishing a national wool co-operative agency and endorses President Coolidge's principle of orderly production and orderly marketing.

Department of Agriculture

1. Authorizes A. F. B. F. president to call a conference to make not more than three recommendations to President Coolidge for the appointment of Secretary of Agriculture.
2. Approval of government crop reports.

Legislation and Taxation

Taxation: Reaffirmation of principles on which A. F. B. F. tax work has been based, namely:

1. Income as a basis of ability to support federal government.
2. Rate should be progressive—larger the income the higher the rate.
3. A portion, not to exceed 25 per cent, of tax budget should be raised by consumption taxes.

Other taxation policies:

1. Endorsement of President's economy program.
2. Favor abolition of federal estate tax.
3. Opposed to shifting tax burden from income to consumption tax.
4. Deductions and exemptions should be first offset against tax free income.
5. Money derived from stock dividend sales should be taxed as if dividends had been paid in cash.
6. Approval of gift tax.
7. Recommend that Congress plug holes in the income tax law.
8. Amend McFadden bill by striking out provision legalizing stock dividends.
9. Restriction on issuance of tax free securities.
10. Urge study of state and local tax methods, state and local committees.
11. Modification of law so banks and their stockholders may be taxed as other corporations and individuals.

Legislation: Immediate development of Muscle Shoals to produce fertilizer for farms.

Marjorie Cline (left) and her aunt, Lula Case, both members of the Willing Workers Poultry Club in Cass county. Marjorie is champion essay writer in Cass county and second prize winner in Illinois. Her aunt holds a blue ribbon, which she won on her pen of Barred Rocks at the B. & O. poultry club show.

1. Opposition to additional burdens on parcel post system to increase salaries of postal employees.
2. Opposition to Child Labor bill.
3. Support of pure seed laws.
4. Limit bankers' charge to 2 per cent in addition to what they pay for federal reserve money.
5. Support of Vestal Standard Container bill, to decrease cost of distribution.
6. Support of Truth-In-Fabric legislation.
7. Favor postal libraries.
8. Opposition to branch banking as provided in McFadden bill.
9. Recommendation to make possible loans of four months under intermediate credits act and a higher maximum loan on warehouse receipts.
10. Endorsement of farmers' export corporation as described elsewhere in this issue of the Record.

Transportation and Research

Policies are as follows:

1. Endorse plan of Shippers' Regional Advisory Boards.
2. Urge fullest co-operation between state and county Farm Bureaus and the federal government.
3. Favor public representation on railroad labor board.
4. Favor development of inland waterways. (Specific mention given to Mississippi, Missouri and Ohio river systems.)
5. Approve reduction of freight rates on agricultural products.
6. Substitute effective operation for present state of arbitration of St. Lawrence-Great Lakes Waterway.
7. Endorse under joint administration of state and federal authorities building good roads as an asset to farm people.
8. Favor American Merchant Marine.

Organization and Finance

1. Vigorous prosecution of organization through state and county Farm Bureaus.
2. Each state should have an organization or field service department headed by a competent director.
3. Recognition of plan getting members in connection with community activities desirable if identity of individual as a farm bureau member is not interfered with.
4. Urge enactment of state laws making it possible to incorporate all units of the Farm Bureau.
5. Urge a well balanced agricultural community program to meet need of the farm bureau family membership.
6. Regard failure to transmit membership funds to state and national organization as a misappropriation of funds and officer should be held accountable therefor under the law.
7. Urge method to transmit dues regularly each month and direct executive committee to bring about strict compliance with this requirement.

Publicity

1. Favors appropriation of funds to adequately meet publicity requirements of state and national organizations.
2. Closer co-ordination of all publicity work.
3. Favor making uniform all public statements of Farm Bureau policies.
4. Endorse National Farm Radio Council.

Home and Community

1. Full development of the Home and Community department of the A. F. B. F.
2. Urge co-operation of Farm Bureaus to further: Better citizenship, good community music, rural health, vocational education in agriculture and Boys' and Girls' Club work.

Other Departments

Appreciate President Bradfute's appointment to Agricultural Conference and look for constructive recommendations from that body.

Approve development of economical electric power on the farm.

Place enforcement of butter standards in hands of U. S. D. A.

Endorse T. B. eradication program.

NEW LEGISLATIVE PLAN SUBMITTED BY FARM COUNCIL

Would Create Export Corporation Avoiding Flaws of The McNary-Haugen Bill

Following the conference of representatives of some 40 or 50 farm organizations in Chicago, Dec. 1 and 2, at the call of the American Council of Agriculture, steps have been taken to place before President Coolidge's agricultural commission a plan for stabilization of American agriculture by securing for it equal opportunity with industry and labor.

The American Council of Agriculture was created at St. Paul, last July, by state and national farm organizations as their agency of united effort and expression. In this capacity the Council is now to present to Congress, through the lately created agricultural commission, a plan devised to take the place of so-called McNary-Haugen legislation.

Plan Export Corporation

The plan proposes the creation of a farmers' export corporation to dispose of surplus farm commodities. The extent of government participation in the corporation would be limited to the minimum necessary to a comprehensive grant of power.

The export corporation proposal differs from the McNary-Haugen bill in several respects. It eliminates the ratio price feature. It eliminates the powers conferred upon the President to fix tariff rates at will. It aims to secure benefits of existing tariff schedules instead of creating new ones. The corporation would be set up to buy exportable surpluses when the existence of surpluses causes the markets for domestic consumption to fall below American price levels.

Proponents of the export corporation rely upon this plan to make it possible for farmers to sell their major farm crops at American prices rather than at prices set by world markets.

Would Aid Co-operatives

The farmers' export corporation is designed to supplement co-operative marketing. The adoption of the plan, those who have studied it point out, would aid co-operative marketing organizations to function effectively.

At present co-operative associations are not able to operate effectively because they are not able to dispose of surplus products and assess the losses on this portion of the commodity back upon the benefitted producer, without penalizing organization members to the benefit of non-members. Under the proposed plan these costs incurred in disposing of surpluses would be automatically and unavoidably absorbed by all producers.

Plan Goes To Commission

A Council legislative committee, on which national and state organizations are represented, was provided for at the Chicago conference. The new legislative program in rough outline was presented and tentatively approved and arrangements made for submitting it to the various farm organizations for further approval. As soon as responses are received, the proposal with an accompanying brief will be submitted by the American Council of Agriculture to each member of the President's agricultural commission.

It is hoped that when it is submitted the commission will recommend to the present session of Congress the enactment of legislation which will prevent further depression of agriculture before Congress could again take action.

I.A.C.A. Reaches 105 Mark

Farmers' co-op organizations applying for audit service in the Illinois Agricultural Co-operatives Association now number **105.** General manager, Geo. R. Wicker, with his staff of accountants have made 60 examinations, more than 50 of which are complete. Grain elevators lead in membership with 44 and Farm Bureaus are second with 39.

I.A.A. POULTRY HEADS LAY DOWN PRINCIPLES OF CO-OP MARKETING

Outline Plans Upon Which They Believe Combined Selling Will Work

After a long and careful study the I. A. A. poultry and egg marketing department has decided to give assistance on two plans for marketing poultry and poultry products.

Following a six-months' investigation of co-operative marketing methods practiced in other states, F. A. Gougler, I. A. A. poultry representative, has conferred with the advisory committee of the poultry department in outlining the best possible means of promoting and improving marketing methods in Illinois. The members of the poultry committee are C. E. Bamborough, Polo, chairman; Lyle Funk, Bloomington, and Frank Barrett, farm adviser, Litchfield.

The two plans designed by the committee, in co-operation with the transportation, organization, accounting and legal departments of the I. A. A., are explained as follows:

First, where there is only local demand for assistance along this line, I. A. A. officials will gladly look into the needs to consider the advisability of undertaking the project.

Conditions favorable to meeting a local situation require that a large number of farmers are eager for assistance in marketing their poultry products, and that these products can be handled through another co-operative already operating successfully, such as a creamery or milk plant, cheese factory or a general farm store. By making this kind of a combination it will be possible to handle poultry and eggs with the least overhead expenses.

Business Can Be Estimated

For example, under our Illinois conditions, if a co-operative of this type is organized with one hundred members, the amount of these products that will be handled yearly can be fairly well estimated.

On an average, our farms maintain approximately 125 hens and sell four dozen eggs per hen. Thus 500 dozen eggs will be sold per farm or about 16 cases annually. A hundred farmers then will sell around 1,600 cases, which is four car loads per year. On the average our farmers sell about 50 chickens per farm every year. The one hundred farmers may be expected to market through their association approximately 5,000 head of chickens per year which, is about 500 more than a car load.

The second form of organization is one of 1,000 members or more and may cover an entire county or more. It contemplates moving these products in car load lots from a central receiving point to terminal markets. Figuring on the same basis of farm sales as above such an organization will handle around forty car loads of eggs and fifteen to twenty cars of live poultry annually.

Involves Capital and Study

In order to set up such an organization considerable capital will be involved and conditions must be very favorable before the I. A. A. poultry marketing department will O. K. such an undertaking, according to Mr. Gougler, who said:

"We have had requests to go into counties to advise on such a project and after looking the situation over have been asked if it was advisable to undertake the project. Let me emphasize that it will take more than a mere visit to a county before we can determine when the time is favorable for such an undertaking. In order that Illinois farmers may understand what information we need to know before we can advise intelligently the following information must first be determined for the local community:"

1. Can 1,000 members be secured within an area of an average sized county?

2. What will be the volume and quality of product handled for these 1,000 farmers?

3. What are the present marketing facilities?

4. Are the farmers demanding co-op poultry and egg marketing?

5. If 1,000 members are secured what will be the co-operative spirit among them?

6. What are the transportation facilities within the county and to terminal markets?

7. What local factors may prevail that will influence the marketing of these commodities, such as an unusual local demand, found near coal mines, near large cities, heavy demand from hatcheries, etc?

8. What co-operation may be expected from local institutions?

"Considerable responsibility is involved when such a project as we have outlined is undertaken," states Mr. Gougler. "No effort or time should be spared in acquiring all the facts needed to answer the question 'Are we ready to organize?' Our poultry and egg marketing department stands ready to assist in making the initial study with any local or county groups which are looking toward marketing their poultry products along these lines."

Bamborough Broadcasts Plan

The above poultry marketing department study was the basis of Mr. Bamborough's radio talk over KYW, Dec. 16. He outlined the marketing plans as reproduced above.

"For years we have been producing and marketing our products in a disorderly, haphazard, unbusinesslike manner without much regard for efficient production and distribution of a quality product," was one of his opening remarks and another was "We are learning from big business the value of working together in commodity groups, co-ordinating with other groups, and all in turn affiliating into a larger and more efficient group in the production and distribution of our agricultural commodities. This is co-operation, a term that has never been fully understood nor appreciated by American farmers."

Listen In!

I. A. A. Farm Program

From Station WCK, St. Louis
Stix, Baer & Fuller
Time: Wednesday evenings,
7:40-8:00

(This program is arranged particularly for the benefit of southern Illinois farm bureau members who have had difficulty in hearing the Chicago stations. Letters and suggestions would be appreciated. Address the I. A. A. department of information.)

Dec. 26—"Growing Clover On Southern Illinois Soils," by Fred Oexner, Waterloo, Ill., Monroe county farm adviser.

Farm talk by B. W. Tillman, Belleville, Ill., St. Clair county farm adviser.

Jan. 2—"The Limestone Producer's Side of the Farmer's Fertilizer Problem," by E. J. Krause, St. Louis, vice-president of Columbia Quarry Company.

I.A.A. Men Lined Up On WLS Radio Short Course

President Sam Thompson on Dec. 19 started the series of farm bureau radio talks to be broadcast from station WLS, with his "Bird's Eye View of the I. A. A." But there are 15 more of these farm bureau talks to come before the last one on Jan. 13. Here is the schedule:

Dec. 23, 8:10 p. m.—C. B. Watson, vice president, "The Farm Bureau as a Vital Cog in the Nation's Mechanism."

Dec. 26, 8:10 p. m.—R. A. Cowles, treasurer, "The Farm Bureau's Major Project."

Dec. 30, 8:10 p. m.—Geo. A. Fox, executive secretary, "What the Farm Bureau Member Gets For His Money."

Jan. 2, 12:10 p. m.—J. R. Bent, director phosphate-limestone, "Helping Agriculture to Permanency."

Jan. 2, 8:10 p. m.—J. C. Watson, taxation and statistics, "Saving Money for Illinois Farmers."

Jan. 5, 12:30 p. m.—A. D. Lynch, director dairy marketing, "The Farm Bureau's Milky Way."

Jan. 6, 8:10 p. m.—L. J. Quasey, director transportation, "What the Farm Bureau Has Done and Is Doing to Solve the Farmers' Transportation Problems."

Jan. 7, 12:30 p. m.—A. B. Leeper, director fruit and vegetable marketing, "The More-Dollars-on-the-Tree and Less-Cost-at-the-Greeks Activity of the Farm Bureau."

Jan. 8, 12:30 p. m.—M. H. Petersen, in charge T. B. eradication, "Clean Hearts and Herds."

Jan. 9, 12:30 p. m.—Donald Kirkpatrick, I. A. A. legal counsel, "Handling the Farmer's Legal Problems."

Jan. 9, 8:10 p. m.—George R. Wicker, director of co-operative accounting, "The Twentieth Century Co-operative."

Jan. 12, 12:30 p. m.—Wm. E. Hedgcock, live stock marketing, "Shortening the Hoof-to-Frying-Pan Train Via the Farm Bureau."

Jan. 13, 12:30 p. m.—H. C. Butcher, director of information, "The Farmer and His Local Newspaper."

Jan. 13, 8:10 p. m.—G. E. Metzger, director organization, "Farm Bureaulitis."

Dec. 23, from KYW, 8:20 p. m.—"What Farm Bureaus Are Doing In Ill., by H. C. Butcher, I. A. A. information department.

Jan. 9—"Who's Doing the Chores?" by W. H. Moody, I. A. A. executive committeeman, Port Byron.

Make Reservations For Annual Meeting

Reservations for hotel rooms and banquet tickets for the annual meeting of the I. A. A. at the University of Illinois, Urbana, Jan. 15 and 16, should be made directly through the committee on reservations, Champaign County Farm Bureau, C. C. Burns, farm adviser, Champaign.

DID THE JUG DO IT?

Montgomery county's champion corn huskers. Left to right: Lee Hall, 4th; Earl Niehaus, 3rd; Henry Niehaus, father of Earl, 1st; Earl Denney, 5th; Pearl Mansfield, 2nd. The Niehauses and Earl Denney belong to the Montgomery County Farm Bureau. Farm Adviser Snyder says their husking contests aroused more enthusiasm than a first class horse race or ball game.

The following is an extract from a letter to Geo. A. Fox, I. A. A. executive secretary, written by Mary E. Aleshire, Art Extension Committee, Illinois Products Exposition:

Your display at the Illinois Products Exposition was one of fourteen exhibits selected by the art department as altogether suitable for such an Exposition.

The exhibits in this list were selected from the following standpoints: artistry, education and accuracy of the thing to be represented.

Few of the exhibits gave a really artistic appearance, still fewer were of real educational merit and very few did tell their own story. Most of them, unfortunately, were a conglomerate mass of things accumulated in the community represented, but in no way telling the story to the casual onlooker.

Editors In WCK Monopoly

Farm paper editors had a monopoly on the weekly I. A. A. farm radio program from WCK, Dec. 10, when G. Edwin Popkess, editor of the Dairyman's Journal talked on "Advertising on the Farm" and Paul Potter, assistant editor of the Orange Judd Illinois Farmer, told "What the Illinois Grange is Doing at Belleville This Week."

Rock Island Gets Iowan

Warren K. Allen, is the new farm adviser in Rock Island county, succeeding O. E. Ackerson, who recently resigned to enter the life insurance business. Allen's ability to serve the members of the Rock Island County Farm Bureau has been acquired by experience in school teaching and five year's experience as county agent in Keokuk county, Iowa.

Mary Kopp, Auburn, captured the blue ribbon in the Sangamon county calf show with her 1,075 pound steer, which brought 40 cents per pound or a gross return of $430 in the public auction at the National Stock Yards. Forty-one other Sangamon county boys and girls sold their calves in the same sale at an average of $140.88 per head.

At the annual meeting, held in Chicago two weeks ago, the National County Agents' Association refused to endorse the Grain Marketing Company.

Co-op Marketing Replaces Ox Cart

"The ox cart was a good method of transportation in its time," said A. B. Leeper, I. A. A. fruit and vegetable marketing director and manager of the Illinois Fruit Growers' Exchange, in a recent radio talk over WLS. "But in this day of airplanes it is considered out of date. The pony express in its day was considered a wonderful means of communication, but folks, compare it if you will, with the methods of communication used today. When seated in your homes, listening to words conveyed through the air, you realize the progress made. Those farmers who say they are individualists and employ the same methods of marketing used in the ox cart and pony express days do not fit in very well with modern co-operative marketing."

St. Louis Makes Record

December 5 was the last day of the 49th week of business for the St. Louis Producers during the present year, and a memorable one because of the fact it marked the closing of the largest week's business ever handled by the Association, 375 cars.

The 375 cars represented 18 per cent of the total receipts at the Yards and a larger carlot of business than the four largest old line firms on the market that week. Illinois led all other states with 164 cars to her credit, while Missouri had 147 and Iowa 43 cars, with the truck-in department and other states totaling 21 cars.

Adams county, Ill., led all other counties with 20 cars and Monroe county, Mo., a close second with 18 cars. Sangamon couaty, Ill., was third with 16 cars, Fulton and Macoupin counties tying for fourth place with 15 cars each.

J. M. Laws, manager of the Lewistown Shipping Association, with 10 car loads, led all other organizations in number of cars consigned for the week.

Chicago Hangs Up Record

The 573 cars handled during the week of December 1st to 6th by the Chicago Producers constituted a new record for receipts handled by one commission agency at the Chicago yards. This record superceded the record of 552 cars, also made by the Producers. This record of 573 cars is just 100 cars more than were handled by the next highest commission firm.

Safety Contest Competition

First place in the shipping associations' safety contest, sponsored by both the National Live Stock Producers and the Illinois Agricultural Association, is now held by the North Henderson Shipping Association. This association, in the 18 loads which have been shipped to the Chicago Producers, has experienced the loss of one crippled hog. The Lee County Shipping Association of Amboy is in second place with two crippled sheep and one crippled hog.

The final award will not be made until after the first of the year when the record of associations in Illinois, which are shipping to the various Producers agencies are compiled. The winner of the Illinois contest will then enter into competition with the champions of the other states in order to decide who is to gain possession of the 18 inch silver trophy awarded by the National Live Stock Producers Association.

News From Indianapolis

Transportation claims, filed by the transportation and claim department of the Indianapolis Producers, amounted on Dec. 1 to $15,043.70 of which $6,809.89 has been collected and $899.54 has been cancelled. These claims not only reimburse for actual losses but also stimulate the railroad service, according to G. E. Ayer, director of the transportation and claim department.

The Indianapolis market requires careful watching from a transportation standpoint because of being served by branch lines through junction points with through trunk lines. It is inevitable that delays will occur at these connecting line stations if a transportation program is not arranged to promptly move consignments through junction stations.

Ewing On Producer Board

Charles E. Ewing, Decatur, Ill., was recently elected by the Chicago Live Stock Producers Commission Association, as a member of the governing board of seven directors. His appointment fills the vacancy caused by the resignation of W. S. Hill, South Dakota, who accepted a federal appointment, and gives Illinois stockmen three representatives on the board.

PROBLEMS ARE NOT POLITICAL: BRADFUTE

(Continued from page 3)

departmental problems, E. H. Cunningham, member of the Federal Reserve Board, Washington, D. C., addressed the entire convention.

Reviewing the economic conditions of the past year, he said, "The year as a whole will probably show a good improvement in the conditions of the farmer. Final statistics will show that it has been a year of decreased production with an increase in prices that will leave but small advantage in net returns over that of 1923."

Credit Is Satisfactory

He stated that the credit situation in the country at the present time is satisfactory but warned against a period of possible speculation and over-extension not justified by the present status of Agriculture.

"Budgets and Taxation" was the subject discussed by B. L. Young, Speaker of the House of Representatives, from Boston, Mass., at the banquet Tuesday evening. He drew attention to the wisdom of outlining on the budget plan the expenditures for a year, calculating the probable income and estimating the amount of probable expenditures.

Hear Mrs. Sewell

Mrs. Chas. W. Sewell, well known chairman of the Indiana Home and Community committee, was also on the banquet program. She reminded the delegates that the Farm Bureau is a valuable organization, doing many things to help the farmers, but also pointed out that as long as the women are not drafted into service to the fullest extent, then just so long will the Farm Bureau fail to make the most of its resources.

Howard M. Gore, Secretary of Agriculture, scheduled to speak on "Agricultural Progress," was prevented by illness from filling the engagement but sent a letter of greeting.

The entire third day of the convention was taken up with the election of officers and consideration of resolutions, prepared in the several group conferences.

I.A.A. POULTRY HEADS LAY DOWN PRINCIPLES OF CO-OP MARKETING

Outline Plans Upon Which They Believe Combined Selling Will Work

After a long and careful study the I. A. A. poultry and egg marketing department has decided to give assistance on two plans for marketing poultry and poultry products.

Following a six-months' investigation of co-operative marketing methods practiced in other states, F. A. Gougler, I. A. A. poultry representative, has conferred with the advisory committee of the poultry department in outlining the best possible means of promoting and improving the [illegible] in Illinois. The members of the poultry committee are C. E. Bamborough, Polo, chairman; Lyle Funk, Bloomington, and Frank Barrett, farm adviser, Litchfield.

The two plans designed by the committee, in co-operation with the transportation, organization, accounting and legal departments of the I. A. A., are explained as follows:

First, where there is only local demand for assistance along this line, I. A. A. officials will gladly look into the needs to consider the advisibility of undertaking the project.

Conditions favorable to meeting a local situation require that a large number of farmers are eager for assistance in marketing their poultry products, and that these products can be handled through another co-operative already operating successfully, such as a creamery or milk plant, cheese factory or a general farm store. By making this kind of a combination it will be possible to handle poultry and eggs with the least overhead expenses.

Business Can Be Estimated

For example, under our Illinois conditions, if a co-operative of this type is organized with one hundred members, the amount of these products that will be handled yearly can be fairly well estimated.

On an average, our farms maintain approximately 125 hens and sell four dozen eggs per hen. Thus 500 dozen eggs will be sold per farm or about 16 cases annually. A hundred farmers then will sell around 1,600 cases, which is four car loads per year. On the average our farmers sell about 50 chickens per farm every year. The one hundred farmers may be expected to market through their association approximately 5,000 head of chickens per year which, is about 500 more than a car load.

The second form of organization is one of 1,000 members or more and may cover an entire county or more. It contemplates moving these products in car load lots from a central receiving point to terminal markets. Figuring on the same basis of farm sales as above such an organization will handle around forty car loads of eggs and fifteen to twenty cars of live poultry annually.

Involves Capital and Study

In order to set up such an organization considerable capital will be involved and conditions must be very favorable before the I. A. A. poultry marketing department will O. K. such an undertaking, according to Mr. Gougler, who said:

"We have had requests to go into counties to advise on such a project and after looking the situation over have been asked if it was advisable to undertake the project. Let me emphasize that it will take more than a mere visit to a county before we can determine when the time is favorable for such an undertaking. In order that Illinois farmers may understand what information we need to know before we can advise intelligently the following information must first be determined for the local community:"

1. Can 1,000 members be secured within an area of an average sized county?

2. What will be the volume and quality of product handled for these 1,000 farmers?

3. What are the present marketing facilities?

4. Are the farmers demanding co-op poultry and egg marketing?

5. If 1,000 members are secured what will be the co-operative spirit among them?

6. What are the transportation facilities within the county and to terminal markets?

7. What local factors may prevail that will influence the marketing of these commodities, such as an unusual local demand, found near coal mines, near large cities, heavy demand from hatcheries, etc?

8. What co-operation may be [illegible] from local organizations?

"Considerable responsibility is involved when such a project as we have outlined is undertaken," states Mr. Gougler. "No effort or time should be spared in acquiring all the facts needed to answer the question 'Are we ready to organize?' Our poultry and egg marketing department stands ready to assist in making the initial study with any local or county groups which are looking toward marketing their poultry products along these lines."

Bamborough Broadcasts Plan

The above poultry marketing department study was the basis of Mr. Bamborough's radio talk over KYW, Dec. 16. He outlined the marketing plans as are produced above.

"For years we have been producing and marketing our products in a disorderly, haphazard, unbusinesslike manner without much regard for efficient production and distribution of a quality product," was one of his opening remarks and another was "We are learning from big business the value of working together in commodity groups, co-ordinating with other groups, and all in turn affiliating into a larger and more efficient group in the production and distribution of our agricultural commodities. This is co-operation, a term that has never been fully understood nor appreciated by American farmers."

MISS MARY G. BURWASH, LIBRARIAN,
COLLEGE OF AGRICULTURE,
UNIVERSITY OF ILLINOIS,
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday—January 3, 1925 | Number 1

'T WILL BE GREAT TIME AT U. WHEN DELEGATES TOOT IN

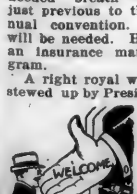
Dean Mumford Will Extend Official Handshake of University; A Busy Two Days

'T will be a hot time in the old town when all the farm bureau folks gather at Urbana during Farmers' Week for the annual I. A. A. meeting and the first annual meeting of the I. A. C. A., the organization which functions as a department of the I. A. A. and furnishes auditing and business advisory service to farmers when they get in business together. The I. A. C. A. meeting comes on Wednesday, the 14th, while the I. A. A. convention is the 15th and 16th.

Dean H. W. Mumford

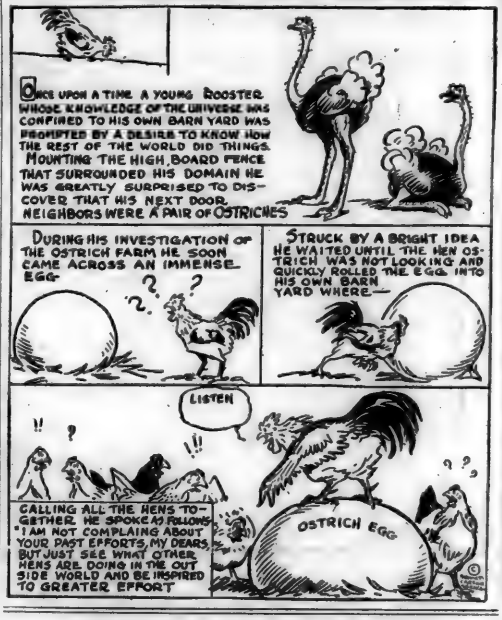
When the delegates get seated for the first time in the I. A. A. meeting on Thursday, Dean H. W. Mumford will give the official handshake of the University and turn over the proverbial keys to the University to President Thompson and the delegates.

President Thompson expresses the hope that every delegate from every county will bring another member along for company so that as many farmers as possible can get an inside look at the heart of his state farm bureau organization. President Thompson suggests that every delegate be empowered with authority to grab his neighbor by the heels and drag him along.



With every station agent in the state of Illinois supposed to have been instructed by his superiors that any and all farmers going to Champaign or Urbana on or between Jan. 10 to 19 should be allowed to ride at fare and one-half, it is expected that many who otherwise would not have gone because of padlocked purse strings, will now heed the conductor's call and get aboard.

Now is the time to make all your plans for the meeting. You may be like this fellow in the illustration trying to catch his train. No one should chance running for a train and wasting much needed breath just previous to the I. A. A. annual convention. No doubt it will be needed. However, there's an insurance man on the program.



A right royal welcome is being stewed up by President Kinley and Dean Mumford at the University. The University has charge of the entertainment during the convention and from rumors that have drifted Chicago-way it appears that special preparations are being

(Continued on page 3, col. 4)

ATTEND THE ANNUAL MEETING!

PROGRAM, 10TH ANNUAL MEETING ILLINOIS AGRICULTURAL ASSOCIATION

January 15 and 16, 1925

(All general meetings will be in Auditorium. Banquet will be in First Methodist Church, Champaign.)

Thursday, Jan. 15

10:00 A. M. Invocation.
Music.
Address of welcome—Dean H. W. Mumford.
10:30 A. M. President's address—S. H. Thompson.
Secretary's report—Geo. A. Fox.
Treasurer's report—R. A. Cowles.
Appointment of committees.
12:00 Luncheon.
1:00 P. M. Music.
"Our Educational System"—Geo. W. Willett, principal of Lyons Township high school, LaGrange, Ill., and director of I. A. A. school survey made during the summer.
Discussion led by J. L. Whisnand, chairman, educational committee, I. A. A.
2:30 P. M. Grain Marketing.
Address—Hon. T. A. Crerar, president, United Grain Growers, Inc., of Canada.
Discussion led by H. E. Goembel, chairman I. A. A. grain marketing committee.
4:00 P. M. Nomination of executive committee.
6:00 P. M. Banquet.
6:30 P. M. Playlet by cast from Menard County Farm Bureau.
Address—David Kinley, Ph. D., L. L. D., president, University of Illinois.
Music.
Address—"The Agricultural Situation, Past and Present," Chas. J. Brand, Consulting Specialist in Marketing, United States Department of Agriculture.
Election of officers.

Friday, January 16

9:00 A. M. Music.
Reading.
Address—"Problems of Revenue in Illinois,"—Walter F. Dodd, Chicago, chairman of conference on revenue amendment.
Discussion led by John C. Watson, I. A. A. director of taxation and statistics.
10:30 A. M. Address—"Insurance As It Relates to Farmers" by Erwin A. Myers, insurance counsellor, Chicago.
12:00 Luncheon.
1:15 P. M. Music.
Discussion of programs of work of departments (Geo. A. Fox in the chair).
Report of resolutions committee.
Report of other committees and discussion.

INTERNATIONAL CO-OP GRAIN MARKETING AUTHORITY TO HEADLINE I. A. A. MEETING; McNARY-HAUGEN POLISHER SCHEDULED, TOO

Hon. T. A. Crerar, President, United Grain Growers Inc. of Canada, Was Formerly Member of Canadian Parliament; Chas. J. Brand Was Late Secretary Wallace's Right Hand Man.

A Canadian wheat marketing authority of international reputation will be the outstanding attraction at the 10th annual meeting of the I. A. A. when the delegates convene in the Auditorium at the University of Illinois Jan. 15 and 16 to shape the destinies of this organization for 1925 and the future.

Hon. T. A. Crerar

Hon. T. A. Crerar, president of the Canadian Wheat Growers', Inc., Winnipeg, is the authority. It is expected that he will draw liberally from his years of practical experience in co-operative grain marketing in Canada for the benefit of Illinois farm bureau members. He has been a Member of the Canadian Parliament from which he retired to go into co-operative wheat marketing. Following his talk an open discussion will give opportunity for delegates to express their views as to what the I. A. A. should undertake in 1925 and in the future along grain marketing lines.

Delegates to Have Reports by Jan. 10

Delegates to the annual convention should receive their annual reports of the I. A. A. about Jan. 10. This year the year books are being printed earlier in order that each delegate can study up on all the activities of the association before the annual meeting. The book is complete excepting for that of the treasurer which cannot be made in detail until after Jan. 1 when the auditors complete their work.

The title of report was changed this year to read "Annual Report for 1924 and Proposed Program" rather than just "Annual Reports." On the cover is printed "an organization of *thinking* farmers."

District Meetings Jerk Members From Back to Front Seats

When some energetic journalist attempts to write a history of the Illinois Agricultural Association some 25 or 50 years hence, he will dig back into the archives of the order and find that it was in 1924 that the membership pulled up from the back seats into the orchestra pit right next the scenes of greatest activity.

The year 1924 will go down in I. A. A. history as the one wherein the membership had the opportunity of voicing its approval or disapproval, by means of a constitutional requirement of three meetings in each district each year, of projects under way in the state association or the national organization. It also will be remembered as the year in which the members could get quicker action than they could in previous years when the annual meetings were the principal reflectors of the thought of the membership.

The possibility of having each I. A. A. director appear before the members in each district during 1925 will be discussed sometime during the annual meeting. It is thought that some pre-arranged schedule of district meetings for the entire year would be more satisfactory.

Meetings Nearly All Completed

Four district meetings held during December practically wound up the required three-to-a-district per year as decided upon at the last annual conven-

(Continued on page 3, col. 2)

The farmer's school problems are also to be in the limelight this year. The I. A. A. educational committee, headed by J. L. Whisnand, executive committeeman representing the 19th district, will be loaded with facts which were obtained in the school survey made during the summer. Geo. W. Willet, the director of that survey and who is principal of the Lyons Township high school at LaGrange, Ill., will present the main address.

At the banquet in the evening of the first day, Chas. J. Brand, consulting specialist in marketing of the United States Department of Agriculture, Washington, D. C., will present an address on "The Agricultural Situation, Past and Present." It will be remembered by many farm bureau folks that it was Mr. Brand to whom the late secretary Wallace turned for the polishing of the framework of the McNary-Haugen bill.

Chas. J. Brand

Taxation problems and revenue matters are at the top of the bill of fare for Friday. Walter F. Dodd of Chicago, chairman of a state-wide committee of tax authorities created for the purpose of working out and submitting a revenue amendment to the Illinois constitution, will be the main speaker on this subject. J. C. Watson, director of taxation and statistics of the I. A. A., is also on this committee. He will be on deck for the open-house discussion on tax matters which will follow.

To Talk Insurance

Problems of farmers in insurance matters will be dealt with by Mr. Erwin A. Myers of Chicago, an insurance counsellor experienced in farmers' mutual insurance companies. It is expected that some action will be taken at the meeting providing for the I. A. A. to formulate some plan for re-insurance for mutuals during 1925.

Perhaps the most important session of the two days will be in the discussion of programs of work of departments with Secretary Fox in the chair. Delegates will prescribe the definite lines of work for departments at this time. Proposed programs will be offered by each department.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, C. B. Watson, DeKalb.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

Directors of Departments
I. A. A. Office

General Office and Assistant to Secretary, J. H. Kelker; Organization, G. E. Metzger; Information, H. C. Butcher; Transportation, L. J. Quasey; Taxation and Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, Wm. E. Hedgcock; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, F. A. Gougler; special representative on Tuberculosis Eradication, M. H. Petersen; Legal Counsel, Donald Kirkpatrick; Co-operative Accounting, Geo. R. Wicker.

Happy New Year!

To every farm bureau member who gets the RECORD, the officials and directors of departments of the I. A. A. extend a hearty and sincere wish for a happy and prosperous New Year.

—o—

Our Yearly Conclave

Interest is running high in the coming annual meeting of the I. A. A. This convention will be one of the most important in this organization's years of active history.

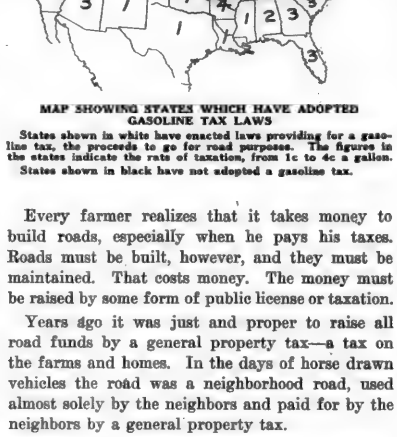
Every farm bureau member who can possibly get away from his farm should attend. Even though you are represented by capable delegates, there are many, many things in which every individual will be interested and in which you will have a voice.

The eyes of the farm organizations of the nation are on the Illinois Agricultural Association.

—o—

Its First Annual Meeting

Probably the reddest ear in the I. A. A. wagon load of accomplishments in 1924 is the organization of the auditing and business advisory service for farmers' co-operative organizations.



The first annual meeting of this body, which functions as the department of co-operative accounting of the I. A. A., will be held at Urbana on the 14th, the day before the I. A. A. meeting. An extensive program has been arranged which should be interesting to co-operative managers and officers. The meeting will be held in the Illinois Students' Union building. A full outline of the program appears in this RECORD.

—o—

The Gas Tax

As announced in the last issue of the RECORD, the Illinois Agricultural Association will propose and support a tax on gasoline in the coming session of the state legislature. In supporting a gas tax, the Illinois Agricultural Association is specific in its statement that revenue derived from a gas tax must supplant some of the present tax already levied. The I. A. A. is not for a gas tax in addition to present taxes; it is for a gas tax in place of some present property tax. Another plank in the I. A. A. gas tax platform is that tax should be paid on gasoline used on the public highways and not that used upon the farm.

Many people do not realize the extent of the gas tax in the United States. The accompanying map shows this very plainly.

MAP SHOWING STATES WHICH HAVE ADOPTED GASOLINE TAX LAWS

States shown in white have enacted laws providing for a gasoline tax, the proceeds to go for road purposes. The figures in the states indicate the rate of taxation, from 1c to 4c a gallon. States shown in black have not adopted a gasoline tax.

Every farmer realizes that it takes money to build roads, especially when he pays his taxes. Roads must be built, however, and they must be maintained. That costs money. The money must be raised by some form of public license or taxation.

Years ago it was just and proper to raise all road funds by a general property tax—a tax on the farms and homes. In the days of horse drawn vehicles the road was a neighborhood road, used almost solely by the neighbors and paid for by the neighbors by a general property tax.

Today, with the automobile, the motor truck and the bus, the road is not a neighborhood, or town road, but a county, a state, a national highway, used by everybody, from everywhere.

Under these changed conditions, with the general property tax at a prohibitive point, it is simply common sense and common fairness to say that the people who use the roads and get most of the benefit from them, the motor vehicle owners, should pay a fair share of the cost.

—o—

Getting Together

A large part of the work of the phosphate-limestone department of the I. A. A. has been to bring the producers of phosphate and agricultural limestone to a better understanding of the needs of farmers who use such fertilizers and the conditions under which these fertilizers can be brought into more general use. On the other hand, this department has had the responsibility of bringing to the farmers, through the county Farm Bureaus, a better understanding of the conditions under which these fertilizers are produced and the facts that govern a continuance of an efficient and sufficient supply.

Trying to get buyers and sellers of any commodity to see the problems of the other, it makes no difference whether the commodity be hogs, beads, helium or labor, is about as difficult as it would be for some hardy individual to get out in No Man's Land and try to stop a war. Buyers and sellers are, as a rule, two natural, dyed-in-the-wool opponents.

But in the phosphate-limestone work there are indications that both sides appreciate efforts designed to bring buyer and seller together. As an example, the following is a quotation from a letter received from J. H. Werner, general manager of the Charles Stone Company at Marion, Illinois. It is addressed to J. R. Bent, director of that department.

"Your very interesting talk at the meeting was a source of much information and enlightenment for me. I feel that I have gained much in the conference and feel that you, in behalf of the Farm Bureaus, have brought us (limestone producers) to a closer and keener interest in the farmers throughout the state. Your service has been a valuable one to us, even while serving them."

For Your Information

The Illinois-Missouri Co-operative Milk Producers' Association, which was organized by the farmers of the St. Louis district during 1921, had filed against it but recently, for a second time in the last two years, an involuntary petition in bankruptcy. The first petition was filed in December, 1922. The association had a large number of creditors and the great majority of these creditors agreed to a funding plan offered by the association. A small group of creditors, however, refused the funding plan offered, which is responsible for the second proceeding.

Since the first bankruptcy proceeding, a second company was formed by the farmers of the St. Louis territory, which is called the Ill-Mo Dairy Company. This company has been carrying on a successful creamery business in the territory and will continue to do so unaffected by the bankruptcy proceeding against the Illinois-Missouri Milk Producers Association.

This second proceeding in the bankruptcy court will probably clear up the situation as to the old marketing association and give the milk farmers of the St. Louis territory an opportunity to market co-operatively the fluid milk and dairy products through the Ill-Mo Dairy Company.

In order that any misinformed persons may be set aright, it should be stated that the Illinois-Missouri Co-operative Milk Producers Association was not an enterprise of the Illinois Agricultural Association. However, the I. A. A. had a hand in the formation of the Ill-Mo Dairy Company and is looking confidently ahead to its success.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

Voice of the Members: We hear so much about what the Farm Bureau has done, by some, but we also hear from others less informed that they can't see where it has benefited them. This is the common argument so much discussed by those for and against the farm bureau movement.

In reality there is only one logical side and that is for the movement. The man arguing against has no basis for an argument, other than ignorance due to lack of information, based on positive facts. Affirmative information is available in any good farm paper, farm bureau publication or co-operative literature.

The trouble with the man who argues against the Farm Bureau is that he does not read material that will keep him informed, because he seems to have the feeling that if he becomes so informed, and his neighbors who are for the movement find it out, he will be asked to become a member. This would cost him $15.00 a year! As I see it, the seat of the trouble with the objectors lies in the pocket book.

—A. A. Appel, Cobden, Illinois, Union County.

SIT TIGHT!

A farmer may grin
Or he may puff and blow
If he sells his produce
At cost, or below.

He may fondly think
He can go it alone,
But as well swim the ocean
Tied fast to a stone!

The Farm Bureau transport
And its swift fleet of boats
Will pull him across
As it does all the shotes.

There is cotton, tobacco
Fruit, 'taters and cream—
They have reached a safe port
At last, it would seem.

But one ship is floundering
And that is the grain;
It's a shame that the big fish
Get most of the gain.

Mr. Doubter is here
Altho not very stout,
He likes throwing stones
At co-ops round about.

These stones to Sir Doubter
Appear very neat,
But when we look close—
They are made by a cheat.

Let's stick to our standard—
The co-ops are right!
And let's all board the Farm Bureau
Ship and sit tight.

O. L. Hatch, president,
Stark County Farm Bureau.

IMPROVE FARMERS' ECONOMIC CONDITION, LIFE STANDARD: FOX

Addresses Nation's Land Economists; Stresses Co-operation With Industry, Commerce

Speaking on "The Platform of Organized Agriculture" before a group of the nation's foremost land economists in session at Chicago, Dec. 29, under the auspices of the American Farm Economics Association, Geo. A. Fox, I.A.A. secretary, first said that there are many abuses to the term, "organized agriculture."

Geo. A. Fox

"Agriculture consists of the farms and the farmers producing products," said Mr. Fox. "The business of each of these units of production involves many problems, some of which are common to all. Many of these problems can be met more effectively by collective action and some of them can only be solved by united effort. Wherever and however farmers unite to serve the interests of these groups by collective or group action, we have organized agriculture.

Gives Reason for Organizing

"The underlying purposes of organized agriculture is to improve the farmers' economic condition and his standard of living," said Mr. Fox. "He is not interested in the higher wages for labor unless it will result in better returns for his own labor. He is not interested in greater reward for managerial ability unless he may also share in proportionately larger returns for his own managerial ability. He is not interested in large returns on capital investment unless he is included with other capitalists. The farmer is a laborer, a manager and a capitalist. This combination, plus the environment with which he is surrounded and limited, creates a distinct group interest which is peculiar to agriculture and which must not be compromised, which should never be confused with the interest of other groups, or the interest of the general public."

Mr. Fox suggested to the economists that the activities of organized agriculture must of necessity be limited strictly to the welfare of the farm group. These activities will be found to be largely economic in character. He stated further that much effort has been fruitless because of a tendency of some farm organizations to engage in almost every activity under the sun, and to a lack of self reliance, that is, failure to rely on farmers themselves for leadership and financial support. He stated that singleness of purpose, development of leadership among farmers, and financial independence are necessary parts of a sound policy.

He also stated that one of the largest jobs of farm organizations today is to co-operate with industry, commerce, labor and the general public for the mutual benefit of all, but agriculture must be on its toes continually to guard its own interests.

The program of procedure that has been found most practical in the experience of Mr. Fox was outlined by him as follows:

"Many programs of work of farm organizations have gone on the rocks. Many efforts have been made to correct evils that never existed. Many attempts have been made to make gold out of brass. The basis for any activity is intelligence. A survey of every problem and need is the first step. Formulation of a course of procedure based upon facts, experience, and sound reason follows. With this sort of a background, initiative and freedom of action in the interest of the group to be served, will yield results. A part of this program is well supplied by other agencies. Our educational institutions and our governmental departments can and do render valuable help. They are very necessary agencies to the program of organized agriculture. They are, however, the creation of all the people representing the common interests of all the people. To make intelligence available, to free it from prejudice, and give it the impetus necessary for practical application, is probably the most important part of the program. Organized agriculture does this thing."

Economic Adjustment Essential

A third suggestion made by Mr. Fox dealt with economic adjustment. He said that the problem of agriculture is to perpetuate production on the established farms of the country and to insure thereon a standard of living which will foster and continue a class of citizenship in keeping with national security. The best lands of the nation are under cultivation. They have an established investment value to the owners. The welfare of the industry requires confidence in the stability of this capital investment.

In closing he stated: "If agriculture's goal is to preserve and perpetuate the food producing resources of our agricultural lands, to sustain the investment value of our farms and to insure an intelligent and contented rural population, the business operations of the farm must be reasonably prosperous. I am not willing to accept nor to acquiesce in the theory that industry, labor, and agriculture cannot thrive and prosper side by side. If the American people do not accept the challenge to establish equality for agriculture and prosperity for all its essential groups, they have met the first great defeat in our country's history."

FOUR DISTRICT MEETS

(Continued from page 1, col. 4)

tion at Galesburg. These were held at Edwardsville, Springfield, Morrison and Galesburg, Dec. 15, 17, 18 and 19, respectively.

At Edwardsville the meeting was largely devoted to consideration of the annual meeting of the American Farm Bureau Federation and was based upon a personal recital of events by Stanley Castle of Alton, executive committeeman for the 22nd district. Inter-relation of the Farm Bureau and closely allied organizations, grain marketing and community organization were among the other questions discussed.

Advocate Withdrawal

Sangamon, Macoupin, Montgomery and Christian county representatives, the counties which embrace the 21st district, met at Springfield. A resolution was passed expressing that district's attitude toward the American Farm Bureau Federation. It follows:

"Whereas, the American Farm Bureau Federation has adopted a grain marketing policy which is contrary to our ideas of co-operative marketing, and

"Whereas, the Illinois Agricultural Association has after a thorough investigation adopted resolutions condemning this grain marketing policy, holding that it is not only non-co-operative but that it stands in the way of a co-operative grain marketing program for Illinois, and

"Whereas, there have been other evidences that the American Farm Bureau Federation has not represented the interests of the farmers of Illinois, therefore be it

"Resolved, that we do not favor continued support of the American Farm Bureau Federation under its present administration, and that our support be withdrawn until such time as the constitution of the A. F. B. F. is changed so that control of the organization is entirely vested in farmer members who maintain regularly organized county Farm Bureaus controlled by their farmer members, and

"Be it further resolved, that we direct an executive committeeman, Scott Sorrells, to use his best efforts to secure action favorable to this resolution by the executive committee of the I. A. A."

Whiteside, Lee, Ogle, Carroll, Stephenson and Jo Daviess representatives talked over current problems at Morrison. Legislation, taxation, co-operative live stock marketing, local co-operation and organization were the high lights.

At the 15th district meeting at Galesburg Dec. 19, B. H. Taylor, president of the Fulton County Farm Bureau, was supported to be executive committeeman for that district when the election occurs.

Membership Is On Increase In Illinois

The membership of the I. A. A. which took such a tumble during the great depression has hit the bottom and is on the upward swing. According to the figures of G. E. Metzger, I. A. A. organization director, farmers are coming back into the fold who withdrew during the depression. There is a steady trickle of voluntary memberships all over the state, mostly from farmers who drop in the farm bureau office and sign up without being solicited.

Reveal Consumption Butter Substitute; Lynch Scores Users

"There is no substitute for dairy butter."

So declares A. D. Lynch, I. A. A. dairy marketing director. A survey just completed under his direction, on the consumption of so-called "butter substitutes" among city and rural families throughout Illinois, in co-operation with farm advisers in 33 counties, reveals surprising figures as to the amount of oleo and similar vegetable fats actually consumed by city and country dwellers in these counties.

Farm families are almost as great offenders in the use of substitutes for dairy butter as city people, the marketing expert discovers. According to the farm advisers consulted, average estimates indicate that farm people eat 2.81 pounds of oleo per family per year, compared with 2.94 pounds for their city cousins, over the same period of time.

"The farmer, especially the dairy farmer, who buys butter substitutes in place of genuine butter is competing against his own industry," asserts Lynch. "Every pound of oleo bought gives a market to the South Sea Islander for his cocoanuts and takes the sale of so much butter away from some Illinois dairyman.

"In addition to that the user of substitutes is deprivng himself and his family of the health-giving vitamines which genuine butter alone can yield."

EXECUTIVES DISCUSS RELATIONS A.F.B.F.

The special meeting of the I. A. A. executive committee on Dec. 19 resulted in the appointment of a sub-committee to draw up a resolution stating the administration's viewpoint on the relationship of the I. A. A. and the American Farm Bureau Federation.

Due to the storms which played havoc with train service and communication, R. F. Karr, 18th district; Earl C. Smith, 20th district; Stanley Castle, 22nd district; and Vernon Lessley, 25th district, were unable to attend. J. E. Lingenfelter, representing the 23rd district, was detained because of sickness.

The meeting was a closed one and was given over to discussion of the I. A. A. relationship with the national organization. The sub-committee will submit its resolution to the executive committee when it holds its next regular meeting, Jan. 9.

Buys a Newspaper

F. E. Charles, assistant in the information department since June, has bought a half interest in a newspaper in Republic, Kansas, and has left the ranks of the I. A. A. to take up his own W. G. N.

Gerald Jenny, an agricultural graduate of the University of Wisconsin, took Mr. Charles' place, starting December 29. Mr. Jenny has been writing news of the Badger school for press services.

Mercer County Farm Bureau has been conducting a "rat drive," distributing 800 pounds of poison in all parts of the county free of charge.

The Marshall-Putnam bureau is holding an all day school for hog raisers Jan. 6. A representative of the University of Illinois will conduct the school.

PLANNING BIG TIME

(Continued from page 1, col. 1)

made for farm bureau folks. The Champaign County Farm Bureau and the Champaign Chamber of Commerce are taking care of all details.

Old friends will meet old friends during the convention. The Inman hotel will be headquarters and the scene of much farm bureau hilarity. The University cake-eaters will have to take a back seat while the farm folks are there. "There'll be a hot time in the old town tonight" and "Hail, hail, the gang's all here" will be first on the song list.

President Thompson will open the convention, and, following the custom of other years, will turn over the executive management to A. C. Everingham of Hutsonville, a member of the I. A. A. legislative committee, and who is right at home presiding at I. A. A. annual meetings. Then will come Secretary Fox's report telling the who, what, where, why, when and how the I. A. A. did thus-and-so during the past year. Then Treasurer Cowles will hold the floor with his financial report fresh from the auditors.

Following the day's events will be a banquet in the First Methodist Church, the only hall large enough to hold the great dairy farmer, who buys butter substitutes in place of genuine butter is competing against his own industry," asserts Lynch. "Every pound of oleo bought gives a market to the South Sea Islander for his cocoanuts and takes the sale of so much butter away from some Illinois dairyman.

"In addition to that the user of substitutes is deprivng himself and his family of the health-giving vitamines which genuine butter alone can yield."

group. A playlet by the Menard County Farm Bureau will feature the banquet entertainment. According to the press agent of the show, which is titled "The Redemption of Hiram Homebrew," the stupendous production opens to the tunes of "Three O'clock in the Morning" and the actual time is said to be that of the organization of the Menard County Farm Bureau on Nov. 15, 1919. Time of first scene is 3 A. M. The playlet goes into deepest tragedy and emerges at spots with lightest comedy. Hiram is "again" the Farm Bureau and has a hard lot at home. Romeo, the hired man, falls in love with Merry Homebrew, the villian's daughter, and they elope. There's a hot chase for the elopers and then—attend the annual meeting and find out.

There will be a fine brand of oratory when Chas. J. Brand of the United States Department of Agriculture gives those present a practical economists' viewpoint on the farmers' troubles. Mr. Brand has the facts as well as the oratory. And after Mr. Brand talks, there'll be the annual election of officers.

After the election the business of the convention will continue, problems will be pondered and possibly solved, disagreements will arise and arguments will no doubt ensue, but when it's all over, and everyone is off for home, the old farm bureau spirit of co-operation will be there stronger than ever.

FIRST ANNUAL MEET OF I.A.C.A. SET FOR 14TH, IN CHAMPAIGN

Will Review Growth and Developments of Past Year; Elect Officers for Next Year

The first annual meeting of the Illinois Agricultural Co-operatives Association is to be held in Champaign, on Wednesday, Jan. 14. A review of the business of the past year, election of officers and a program including addresses by several leading authorities on co-operative auditing are scheduled.

Geo. E. Wicker

The co-operatives association was organized last spring under the direction of the I. A. A. and has since functioned as a co-operative accounting department of the I. A. A. The organization was incorporated early in June and at that time elected the following officers to serve until the first annual election: Henry McGough, Maple Park, president; L. P. McMillen, Rock Falls, vice-president; and H. J. Shafer, Illiopolis; O. B. Goble, Charleston, and Geo. L. Potter, Pontiac, directors.

The auditing association is the first of its kind ever organized in Illinois. Its purpose is to provide agricultural co-operatives with expert auditing, accounting and business advisory service at actual cost. Much of this service parallels that of bankers' clearing houses.

Service Filling A Need

That this service has been welcomed by managers and directors of co-operatives is shown by the steady growth in membership. From the start last June it has grown to the present membership of 117. This growth is largely due to the field work of V. Vaniman, who has been meeting with the directors of farmers' co-ops since last summer, explaining the purpose of the service.

117

The roll of member co-ops now includes 53 farmers' elevators, 39 county Farm Bureaus, nine live stock shipping associations, three live stock terminal marketing agencies, three supply companies, one seed company and one fruit association.

Sixty Businesses Audited

The accounts of more than 60 co-ops have been examined by Geo. R. Wicker, general manager, and his staff of accountants. Fifty of these are complete and the others are to be finished at the close of their fiscal years. To handle the auditing with greater efficiency, a Springfield branch office was opened last September, with J. W. King in charge.

The meeting at Champaign will be called to order at 10:00 A. M. by President McGongh. The report of Manager Wicker covering operations of the I. A. C. A. between June 1 and Nov. 30, 1924, will follow, after which F. E. Ringham, assistant manager, will report on the 60 field examinations that have been made.

To Dig Into Fundamentals

At the afternoon session, Geo. E. Frazer, consulting accountant for the I. A. A., will talk on "The Status of the Illinois Agricultural Co-operatives Association under the Federal Revenue Act." Dr. C. L. Stewart, professor of economics at the University, will talk on "Comparative Statistics in Operation of Co-operatives Associations."

The field organization work of the Co-operatives Association will be covered by Mr. Vaniman. Prof. H. H. Baily, of the accounting department of the University, will speak on "Accounting Needs of Co-operatives Associations." Election of officers and other business will follow.

655832

NEW EXPORT PLAN OFFERED TO REPLACE McNARY-HAUGEN BILL

Coolidge's Commission Given Outline of Plan to Divert Surplus; Body Meets Jan. 5

There is no chance for agriculture to rise to parity with industry and labor in the American protective system unless steps are taken to maintain an American price for major farm commodities that are now held to world price levels because a normal surplus above domestic needs is annually produced, according to the memorandum on the agricultural situation that has been presented by the American Council of Agriculture to the President's Agricultural Conference which re-convenes Jan. 5 at Washington.

An outline of a remedial plan accompanies the memorandum. Under it, producers would be enabled to divert a surplus to the world market at world prices at their own expense, in order to enjoy the domestic market for the remainder at a price reflecting existing and future tariff schedules. A farmers' export corporation created by government charter, but financed by all the producers directly benefited by it, is proposed as the agency through which this would be done.

Surplus Always With Us

Robert A. Cowles, treasurer of the I. A. A. and secretary of the Council, points out that the Council's memo clearly shows that a surplus for export of corn, cotton, wheat and pork is no new thing in America,—that the United States has been on an export basis with these crops since the Civil War. Statistical tables are given showing that production of them has declined per capita of total population in the United States below the average of several decades before. Disparity between industrial and agricultural prices since 1920 is due, it is contended by the Council, to the height of the former rather than the low levels of the latter in dollars and cents compared with pre-war.

Figures are quoted to show that the world has absorbed farm exports from the United States in greater volume and at a higher "dollar" price than in pre-war years, while prices of goods and services for which farm crops exchange are maintained on a level relatively much higher than before the war. This the Council says is in large measure due to protective legislation in the United States made effective by the fact that industry and labor are organized to an extent impossible for agriculture without aid.

Can't Control Acreage

The memorandum sets aside as "fantastic and impossible" the suggestion that farmers can render the exportable surplus nonexistent by controlling acreage, and supports its position by governmental statistics showing total lack of fixed relation between acreage and yield of principal crops in recent years. It challenges the wisdom of such a policy, which would "either involve wholesale farm abandonment, or shifts to other lines of production that would be seriously embarrassed as a consequence."

Two important agencies are needed to meet the situation, in the view of the Council;—a workable device to divert the surplus, the costs to be borne by all the producers benefited; and a co-operative association of producers which would be effective, with the problem of the surplus removed, in sustaining and stabilizing the domestic price to the extent of the tariff. Voluntary co-operatives cannot handle the surplus unaided, it is pointed out, since they would be compelled to assess the export losses upon their membership for the benefit of non-members,—an inequality that would tend to destroy the association that attempted it.

Eliminates "Ratio Price"

The proposed plan differs from the McNary-Haugen bill that was before the last session of Congress chiefly in the reduction of the extent to which the government engages in business, and in the elimination of the "ratio price" features of the former export corporation plan. The point is made that existing tariff schedules are in theory intended to equalize differences in costs of production between this and competing foreign countries. The Council asks the Agricultural Conference to devise and recommend a system that shall make such schedules actually answer this purpose for agriculture.

The views and plan submitted were adopted in principle at the open meeting of the American Council of Agriculture held in Chicago on December 1 and 2, in which representatives of forty national and state or district farm organizations participated. The Council defines itself as a temporary agency of leading national and state farm organizations, formed for the single purpose of securing an American price for the American consumption of farm products, independent of the world price for the surplus.

McLean County Milk Body Closes Door To All Non-Members

Only McLean County Farm Bureau members are eligible to membership in the McLean County Milk Producers' Association, organized and incorporated recently at Bloomington, according to A. D. Lynch, I. A. A. dairy marketing director, who assisted in setting up the organization.

At a meeting of incorporating members Dec. 23 at Bloomington the following nine men were elected directors: E. O. Ropp, Guy Hilton, Jay Wright, Wm. Welch, Conrad Schafer, F. J. Basting, V. U. Crain, W. H. Foster and H. R. Mason. From these E. O. Ropp was elected president, Guy Hilton vice-president and Jay Wright secretary-treasurer.

A Bargaining Organization

The organization plans to increase its membership but does not propose to sign up its membership on a marketing agreement at this time. It is planned to use the organization as a medium for studying and analyzing the dairy problems of the membership. Cattle improvement, better quality, and consumer requirements of the Bloomington market are pertinent questions at this time. It will act as a bargaining or service body for its members in selling to Bloomington dealers.

Some individual members may pool their feed purchases to obtain car lot price advantages.

HANDLE 28 PERCENT OF LOCAL BUSINESS

"During the last two weeks the Producers at Indianapolis have handled 28 per cent of the business of the Yards," reports D. L. Swanson, manager of the Indianapolis Producers. "Many visitors arrive every day and almost without exception they are loud in praise of the Producers. Below is a list of Illinois counties and the number of cars of live stock consigned by Shipping Associations from each to COMPETITORS of their own organization on this market.

Piatt	11	Coles	6
Champaign	5	Douglas	5
Shelby	3	Christian	3
Cumberland	1	Edgar	1
Effingham	1		

"Mr. Farm Bureau Member, are you a resident of one of these counties and does your shipping association patronize your competitor in your effort to create a better system of live stock marketing? If so, do you know why? Does the reason appear to be legitimate, and if so, will you write the Producers at Indianapolis the facts as you have them?"

Producer Facts

There are 526 shipping associations in Illinois. Producer terminals have handled approximately 90,000 carloads of livestock in 1924. The total refund by producer terminals in 1923 was $350,000; the membership in producer organizations is 325,000. The approximate saving in market expense is 35 per cent.

Jan. 12, 12:30 P. M.—Wm. E. Hedgcock, director, live stock marketing. "Shortening the Hoof-To-Frying-Pan Train Via the Farm Bureau."

Jan. 13, 12:30 P. M.—H. C. Butcher, director of information. "The Farmer and His Local Newspaper."

Jan. 13, 8:10 P. M.—G. E. Metzger, director, organization "Farm Beauties."

Congress recently passed a bill increasing the appropriation for T. B. testing $150,000 and allowing an additional $40,000 for operating expenses.

About 50 boys and girls in Henry county joined the calf club and began feeding their calves Jan. 1.

Monroe county begins organized T. B. testing Jan. 1. Dr. W. L. Boogy is the veterinarian in charge.

The 2nd annual Pike County Poultry Show is scheduled for Jan. 8, 9 and 10.

All Railroads Grant Fare and a Half To I.A.A. Annual Meeting

In a letter sent to all parts of the state, the transportation department of the I. A. A. recently announced special rates of fare and a half to the annual I. A. A. meeting and Farmers' Week in Urbana. The reduced rates apply over all railroads from all points in Illinois and from St. Louis, Mo.

"This information serves to clear up an unsatisfactory condition that has existed previously on account of only a part of the Illinois lines originally granting the reduction," a part of the letter reads. "No certificates are required to get reduced fares. The reduction is an open rate. Be sure to consult railroad agents in your territory some time previous to the time of the meeting to find out if they have received word. The tariffs may not be received by them and the agent would be without knowledge until the day previous to the meeting, thus causing a lot of confusion."

Originally the excursion rates were granted by the Western Passenger Association, which includes only 12 railroads operating in Illinois. The new tariffs will apply between Jan. 10 and 19 and to either Urbana or Champaign from all points in the state.

A. F. B. F. FIGHTS HIGHER P. P. RATES

That American farmers as a class are opposed to the proposed increases in postal rates which would allow for higher salaries of postal clerks the country over, is the statement of the American Farm Bureau Federation from its Washington, D. C., headquarters.

President Coolidge last spring vetoed the proposal of Congress at its previous session to increase postal salaries, and strong attempts are being made during the present Congressional session to pass the bill over his veto.

The American Farm Bureau Federation objects to the proposed measure on the basis that the bill is not well considered and that it is more political than economic. It is felt that the passage of the bill would mean discrimination against the farmers, as the changes in parcel post rates would be out of proportion to changes in other classes of mail, and agricultural business is one of the heaviest patrons of the fourth class mail service. The measure suggests no increases in the rates on first or second class mail. The bill proposes to raise the salaries of post office employees about $68,000,000.

In view of the fact that Postmaster-General New in his report to Congress said that the cost of handling parcel post mail is much less than is popularly believed, American Farm Bureau officials point out that increases in these rates would work additional hardships on the farmers of the nation, who feel that they already are over-taxed, especially from the standpoint of local and state taxes.

Parcel Post the Goat

"Not only is it proposed to make the parcel post bear more than its proportionate increase," E. B. Reid, Washington A. F. B. F. representative, declares, "but the bill would deny the local county seat or small town newspaper the right of free delivery within the county. These papers have more rural circulation than anything else. Yet such a move on the part of Congress would enable the city dailies to circulate into the small towns and country even more than at present, thus throttling many more country newspapers which generally have been a losing proposition for some time."

In Missouri, farm bureau representatives recently appeared before the state tax commission in an organised way, asking for relief from their present inequitable tax burden.

APPROPRIATE $100,000 TO CURB MYSTERIOUS POULTRY EPIDEMIC

Congress Moves Quickly After Farm Bureau and Others Urge Immediate Action.

Even Congress can act quickly. Within 36 hours from the time that the American Farm Bureau Federation, co-operating with national poultry interests, appealed to Congress to remedy the newly-developed poultry evil in the Middle West, that legislative body authorized the appropriation of $100,000 to fight "poultry flu," which has spread like wildfire in the last few weeks.

Illinois is among the 10 middle western states against which eastern cities and states have raised embargoes on the shipment of poultry. Directors of the Illinois Poultry and Egg Shippers' association, however, believe that Illinois was placed on the embargo list largely because of promiscuous shipments out of Chicago, coming from the West and Northwest. H. B. Patton, secretary-treasurer, is enlisting the support of his local shippers, the Illinois Agricultural Association, the agricultural college of the University of Illinois, and the State Department of Agriculture, in an effort to secure a reconsideration of the embargo.

Disease Spreads Rapidly

"Poultry flu" is a virulent, infectious disease which has appeared in the United States for the first time and has already killed hundreds of thousands of fowl. Relief from the epidemic can only be obtained by following strictly the rules which have been issued by the federal Department of Agriculture in regard to the interstate shipment of poultry and the disinfection of coops and cars. The plague has been definitely diagnosed by federal authorities and must not be confused with "Canadian flu," a milder disease from which poultry may recover.

The epidemic is very easily carried from one flock to another, all classes of fowl, including pigeons and birds, being subject to it. Sparrows, robins, and other common birds take and carry the pest, thus transporting the germ from one farm to the other.

According to the Department of Agriculture, the fowl pest is characterized by "its extremely infectious nature, its rapidly progressing course, and high mortality. Depression and loss of appetite, followed by prostration, are outstanding symptoms. The comb and wattles usually become purple and sometimes swollen. Sticky exudate may pass the eyelids together, clog the nasal passages, and even obstruct the windpipe, causing labored breathing. A greenish yellow diarrhea may be present.

Urge Burning Dead Stock

"Since treatment of affected birds is futile, the aim should be to prevent so far as possible the spread of infection," federal authorities warn. "The first fowls showing symptoms should be destroyed by a method which would guard against the contamination of the premises. The carcasses should be burned or buried deep. The healthy fowls should be moved to new quarters if possible and carefully watched for signs of disease. Houses and runs should be thoroughly cleaned at frequent intervals and disinfected with carbolic acid in five per cent solution. The drinking water may be made antiseptic by adding one-third teaspoon of permanganate of potash to each gallon."

John R. Mohler, chief of the federal Bureau of Animal Industry, who has successfully ridded this country several times of foot-and-mouth disease, and Senator Royal S. Copeland, another authority on sanitation, state that this disease of poultry is not communicable to humans, and that one's health is not endangered in handling infected chickens. Copeland further asserts that "cooking the fowl would kill any of the germs present." The belief that it is dangerous to eat such infected poultry and even eggs has become rather widely accepted, to the general detriment of the poultry industry.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday—January 24, 1925 | Number 2

EXECUTIVE COMMITTEE GAINS FOUR NEW MEN; FOUR ARE RE-ELECTED

Inquisitive Reporter Interviews Committeemen and Learns Their Achievement Record

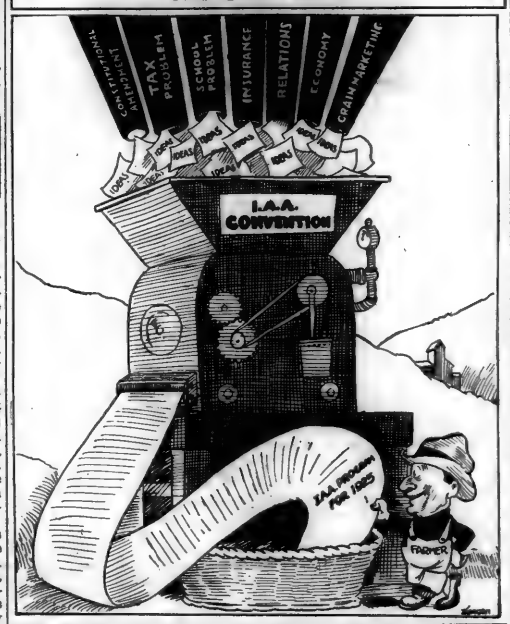
Our "63,000 thinking farmers" will want to know something about their newly-elected executive committeemen. We have therefore assembled the following facts concerning them for your information.

William Webb, of Lockport, Will county, was elected executive committeeman for Congressional districts 10-11. Webb is known especially for the experimental plot which he runs for the government. Pedigreed seed corn is his hobby. He tills 180 acres. The man from Lockport has a modern farm home and he advocates a wider use of all farm conveniences. He was director of the 11th State Farmers' Institute and is now on the Advisory Board for the University of Illinois.

William Webb

Canton, in Fulton county, claims B. H. Taylor, the new executive committeeman for the 15th district. Taylor succeeds H. E. Goembel, the man who was chosen vice-president of the I. A. A. He also is president of the Fulton County Farm Bureau and a Producers booster. He must be camera shy; the photographer couldn't corral him at Champaign.

An Absentee Winner



W. L. Cope, of Tonti, Marion county, has the distinction of getting elected to the executive committee while on his home farm. He didn't have a picture of himself when we wired for one. He will represent the 23d district, succeeding J. E. Lingenfelter, Lawrenceville. Cope was born on the same farm which he now operates with his sons and he says that this farm has always been his home. Growing fruit has taken most of his time, but he is interested in farm problems and is looking toward their solution.

The man to succeed Vernon Lessley as executive committeeman from the 25th district is R. K. Loomis, of Makanda, Union county. Loomis's heart lies in the fruit and vegetable business and is strong for shipping associations. He has been a director in the Illinois Fruit Growers Exchange since its organization.

R. K. Loomis

THE GRIST MILL

Lay Plans for Second Farm Bureau Baseball Season at Annual Meet

Plans were laid by a group of farm bureau baseball enthusiasts at a meeting during the I. A. A. annual convention at Champaign to continue the scheduling of baseball games between farm bureau teams as was started last year.

It was decided that the constitution of the Farm Bureau Baseball Association should be rewritten so that all points such as that of eligibility would be more clearly defined. G. R. Kline of Cass County was elected president. Information can be obtained from either Kline or G. E. Metzger, I. A. A. organization director.

"Watch the Books" Is Keynote at Champaign Annual Meet of I.A.C.A.

Election of officers for the coming year, and talks and discussions on the auditing problems of farmers' co-operatives featured the first annual meeting of the Illinois Agricultural Co-operative Association, held in connection with the tenth annual I. A. A. meeting during Farmers' Week at the Illinois College of Agriculture at Champaign.

The I. A. C. A., as it is known in co-operative circles, is a separate organization set up and put in functioning order last June by the Illinois Agricultural Association, the parent organization. The I. A. C. A. is operated under control of co-operative associations as one of the 12 departments of the I. A. A. From a no-membership start in June, the I. A. C. A. had on Jan. 1, 1925, 112 member co-operatives, classified into 49 farmers' elevators, 39 county farm associations, four dairy associations, three terminal live stock bureaus; nine live stock shipping marketing agencies, three mutual insurance companies, three farmers' supply companies, one fruit exchange and one seed growers' association.

Why Co-ops Fail

"One of the big reasons for failures in co-operative organizations," said Geo. R. Wicker, general manager, in his report, "is that the boards of directors have not been accurately informed as to the financial condition of their associations. The I. A. C. A. is there to provide simple but effective book systems and to help the local manager conduct them." Wicker expressed the sentiment of the directors of the organization when he said that the present membership and status of the I. A. C. A. exceeds by far the brightest hopes of a year ago. Instead of 50 or 60 member co-operatives as expected by this time,

(Continued on page 7, col. 4)

"Sam" Just Gets His Hat Hung, Then It's Time to Hop Again

President Thompson had no sooner than got his hat hung on the hall tree in the Broadway Bank of Quincy after the annual meeting when he found that he was wanted down at Washington, D. C. to appear before President Coolidge's Agricultural Commission.

He left the I. A. A. office Monday, Jan. 19 for the capital city where he will be in the front line trenches trying to get the Commission to see the need of equality for agriculture. Several representatives of the American Council of Agriculture, the organization formed last spring to secure if possible the "spirit" of the McNary-Haugen bill, will also be there.

The Council has drawn up an export corporation bill that is drawing considerable comment. It is along the lines of the McNary-Haugen Bill, but is much simpler, the Council states.

Farm Advisers Pick J. H. Lloyd for Prexy

The Illinois Farm Advisers' association assembled in annual meeting during Farmers' Week at Champaign. Election of officers resulted in the choice of J. H. Lloyd, adviser of Hancock county, as president. Harrison Fahrnkopf, McLean county adviser, was elected vice-president, and B. W. Tillman, St. Clair county, secretary. C. C. Burns, farm adviser for Champaign county, was chosen treasurer.

J. H. Lloyd

The farm advisers' president is invited to attend all the I. A. A. executive committee meetings.

DELEGATES UNANIMOUSLY PICK "OUR SAM" AS PRESIDENT FOR THIRD TERM; GOEMBEL CHOSEN AS VICE-PRESIDENT IN CLOSE RACE

Tenth Annual Conclave Hailed as I.A.A.'s Most Constructive Meeting; Treasurer's Report Shows Net Worth $253,910.07, Gain of $39,189.96 During Year in Spite of More Activities

Sam H. Thompson of Quincy, farmer and banker, was elected to his third successive term as president of the Illinois Agricultural Association by a unanimous vote and without an opponent at the tenth annual meeting held Jan. 15 and 16 in connection with the University of Illinois Farmers' Week.

H. E. Goembel of Hooppole was elected to the vice-presidency by a vote of 76-74 over Earl C. Smith of Detroit, executive committeeman representing the 20th district. Mr. Goembel was executive committeeman representing the 15th district during the past year. Immediately following the announcement of the 76-74 vote, Mr. Smith arose and moved that a unanimous vote be accorded Mr. Goembel. Mr. Smith's two-year term as an executive does not terminate until the next annual meeting.

"Our Sam"

Actions Few, But Decisive

The chief official actions taken by the 157 delegates who represented the entire membership were (1) thanked the Champaign County Farm Bureau, the College of Agriculture, the Chambers of Commerce of Champaign and Urbana and the citizens of the Illinois Twin Cities for the kind hospitality extended; (2) directed the officers and executive committee of the I. A. A. to do everything in their power to secure legislation that will both in spirit and practice give equality to agriculture; (3) favored a gasoline tax providing that the funds thus secured be used for the maintenance of the State Aid system of roads as provided by law and that the gas law tax be levied in lieu of the present tax authorized by the counties for the maintenance of State Aid roads; (4) recommended the passage of such laws and the making of such appropriations as will carry forward the program of eradication of bovine tuberculosis as rapidly as possible; (5) urged the greatest possible speed upon the state and federal departments of agriculture in settling claims for indemnities and deplored the apparent delay in the settlement of such claims in the past; (6) endorsed the action of the I.A.A. executive committee and the American Farm Bureau Federation opposing the Child Labor amendment to the United States constitution; (7) voted to stay with the American Farm Bureau Federation, but sharply criticised it for the "attempt of those of the present and past administration to play politics or use the influence of the American Farm Bureau Federation to further any commercial or selfish interest"; (8) favored an amendment to the Illinois constitution enabling legislatures to pass such laws as will equitably distribute tax burden; (9) endorsed the I. A. A. stand on the Grain Marketing Company, the $26,000,000 merger; and (10) pledged their loyalty and support to the Illinois Agricultural Association. The full text of these resolutions appears on page 2.

H. E. Goembel

Constitution Amended

The I. A. A. constitution was amended by the delegates to permit more delegates in the future. Section 2 of Article III of the I. A. A. constitution had stipulated that there should be one delegate for each county having a majority of the membership dues paid in to the I. A. A. "and one additional delegate for each 1,000 paid-members or one-third fraction

(Continued on page 8, col.

Keep This RECORD; It Is an Important One

Did you miss the RECORD last week? The Jan. 17 issue was held over and dated Jan. 24 in order that the news of the annual meeting could be placed in the hands of each member as quickly as possible.

This issue contains summarized reports covering the 1924 work and 1925 program for each of the departments. Keep this RECORD handy so you can have it to refer to when you want to know what the I. A. A. is doing. The next issue will be dated Feb. 14. We will be back on regular schedule then.

Greatest Representation in History Is Record of Delegate Attendance

Delegates, who were entitled to vote at the tenth annual meeting, numbered 157 — more than ever before. The credentials committee, which consisted of W. H. Moody, Port Byron, Rock Island county, chairman; C. E. Bamborough, Polo, Ogle county; and C. B. Watson, DeKalb, DeKalb county, officially approved of the following delegates who were in attendance:

Adams: D. H. Myers, Mendon, and Perry Journey, Plainville; Bond: Frank Pothast, Greenville; Boone: Phil. H. Sanford, Garden Prairie, and Julian Larson, Poplar Grove; Brown: Fred Six, Versailles, R. F. D. 4 and Chas. H. Snyder, Versailles, R. F. D. 3; Bureau: J. J. Shugart, Princeton, and Otto Weisenberger, Zearing; Carroll: Geo. R. Norris, Lanark, and Ren Williamson, Mt. Carroll; Cass: Geo. R. Cline, Virginia, and W. A. McNeill, Chandlerville; Champaign: E. J. Tabaka, Ivesdale, and Ira Laverick, Broadlands.

Christian: Dwight Hart, Edinburg, and W. N. Grimes, Rosemond; Clark: T. N. Wright, Casey, and Geo. McElyea, Xenia; Clinton: C. C. Hofsommer, Breese; Coles: O. B. Goble, Charleston, and Ed. Niemeyer, Humboldt; Cook: Herman Schwake, Arlington Heights, and D. A. Nietefeld, Homewood; Crawford: N. F. Goodwin, Palestine; Cumberland: Frank Hackley, Trilla.

DeKalb: H. J. White, Somonauk, and A. J. Plapp, Malta; DeWitt: L. G. Heiler, Farmer City, and M. L. Pilchard, Farmer City; Douglas:

Directors of Departments
I. A. A. Office

General Office and Assistant to Secretary, J. H. Kelker; Organization, G. E. Metzger; Information, H. C. Butcher; Transportation, L. J. Quasey; Taxation and Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, Wm. E. Hedgcock; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, F. A. Gougler; special representative on Tuberculosis Eradication, M. H. Peterman; Legal Counsel, Donald Kirkpatrick; Co-operative Accounting, Geo. R. Wicker.

The I. A. A. Constitution Amended

Article III, Section 2 of the constitution of the Illinois Agriculture Association was amended to read as follows:

"Each county Farm Bureau, the majority of the members of which are also paid-up members of the Illinois Agriculture Association, shall be entitled to representation on the board of delegates by one voting delegate, and one additional voting delegate for each 500 paid-up members, or major portion thereof, in the Illinois Agricultural Association."

—o—

The Resolutions

Resolutions passed by the delegates assembled in the tenth annual meeting follow:

Thank You!

We, the board of delegates of the Illinois Agricultural Association, assembled at Urbana in our tenth annual meeting, do hereby express their hearty appreciation for the hospitality extended by the Champaign County Farm Bureau, the College of Agriculture of the University of Illinois, the Chambers of Commerce of Champaign and Urbana, and the citizens of the Twin Cities of Illinois and surrounding community and for their co-operation in making the meeting a success.

Equality for Agriculture

We believe the paramount issue before the American people today to be the securing of a true equality for agriculture with industry and labor. We, therefore, to do everything in their power to secure legislation that will both in spirit and practice give such equality.

Gasoline Tax

In view of the fact that a tax on gasoline has been levied by thirty-seven states of the Union for the maintenance of highways, compelling citizens of Illinois to contribute to the maintenance of the roads when purchasing gasoline in said states without receiving in return any contribution from non-residents using Illinois highways; and recognizing the fairness of such tax for road purposes we recommend the levying of a tax on gasoline used in motor vehicles upon the highways in Illinois. However, we favor the levying of such tax only if the funds thus secured be used for the maintenance of the State Aid System of roads as provided by law, and if such tax is levied in lieu of the present tax authorized by the counties for the maintenance of State Aid roads. We oppose the levying of such tax as an additional tax which would materially add to the total tax burden already unbearably heavy upon our people.

T. B. Eradication

We recommend the passage of such laws and the making of such appropriations as will carry forward the program for the eradication of bovine tuberculosis in the State of Illinois as rapidly as possible thereby ridding the State, at the earliest possible date, of the menace to the live stock industry and to the health of our people, especially our children.

We urge the greatest possible speed upon the State and Federal Department of Agriculture in settling the claims for indemnities for condemned animals and deplore the apparent delay in the settlement of such claims in the past.

Child Labor Amendment

We endorse the action of the Executive Committee of the Illinois Agriculture Association, and of the American Farm Bureau Federation in their annual meeting assembled in opposition to the Child Labor Amendment to the Constitution of the United States.

American Farm Bureau Federation

Inasmuch as the Executive Committee have formulated a policy as regards their relations to the American Farm Bureau Federation as follows:

"Whereas the initial effort of our government in behalf of the farmer has resulted in the County Farm Bureau movement, and

"Whereas the County Farm Bureaus have been convinced of the need of State and National Associations to solve the larger problems of organized agriculture, and

"Whereas we believe the County, State and National units to be integral and necessary parts of the entire Farm Bureau movement, all of which should function exclusively in the interest of agriculture, and

"Whereas the American Farm Bureau Federation became recognized as the spokesman in a National way for the Farm Bureau movement, and

"Whereas we have grave fear that it is the purpose of the commercial interests of our country to dominate the policies of the American Farm Bureau Federation and use its influence to their advantage instead of permitting it to function to the advantage of its membership who contribute to its support, and

"Whereas, there is agitation in some counties favoring withdrawal from the American Farm Bureau Federation, therefore

"Be it resolved that we look with exceeding disfavor upon any evidence of the attempt of those of the present or past administration to play politics or use the influence of the American Farm Bureau Federation to further any commercial or selfish interests; that we do not favor disruption of the American Farm Bureau Federation and the establishment of a precedent of withdrawal, believing existing evils may be corrected to better advantage from within the organization and that we recommend continued support to the American Farm Bureau Federation at this time."

We, therefore, direct the officers and executive committee to use every prerogative at their command to the end that the American Farm Bureau Federation shall purge itself of all evil influences that seem to exist at this time.

Constitutional Amendment

Recognizing the limitations imposed upon the legislature by the present Constitution preventing adequate legislation to equalize the tax burden, we favor the adoption of such an amendment to said Constitution as will enable legislature to pass such laws as will equitably distribute said burden.

The Grain Merger

We indorse the action of the Executive Committee of the Illinois Agricultural Association relative to the Grain Marketing Company as embodied in the following resolution:

The Illinois Agricultural Association is not in a position to express an opinion as to the value and utility of the warehousing facilities which the Grain Marketing Company has under contract to purchase. The officers of the Grain Marketing Company have not made available the records and data necessary to determine the exact or even approximate values even though request has been made therefor.

The facilities now under lease and to be purchased by the Grain Marketing Company in the Chicago district have in our opinion been acquired by the old line grain companies for the purpose of speculative control of grain. The need and location of facilities for such control is substantially different from the requirements of an association organized to co-operatively merchandise grain.

The Grain Marketing Company has and proposes in the future to buy the grain of members and non-members and sell such grain to the best possible advantage. Such a plan subjects the company to the possibility of loss as well as profit and is therefore speculative. True co-operative merchandising of grain or any other agricultural commodity will seek to eliminate speculation and avoid the hazards thereof. We believe that the Grain Marketing Company in its plan of operation violates this cardinal principle.

Such a grain marketing program as is proposed affects the virtue and security of the preferred stock which is proposed to be offered to the farmer producers. The common stock issue, one million one dollar shares, is comparatively small and if issued in full could not absorb all possible losses in which event the preferred stock contribution of capital would be called upon to absorb such possible losses from such speculation. It appears to us, therefore, that such a plan of financing is unsound.

The method of grower-control set up by the Grain Marketing Company is in part illegal and impracticable. These defects can possibly be corrected by amendment to the by-laws but no steps have yet been taken.

The Illinois Agricultural Association officers have been hopeful that the Grain Marketing Company would provide a co-operative selling agency for co-operative grain associations and grain producers who are not in other associations. We do not believe the Grain Marketing Company as now set up will meet these needs.

Loyalty and Co-operation

Whereas, in any organization of this character differences of opinion as regards matters of policy usually exist, and

Whereas the Illinois Agricultural Association have obtained their present enviable position in the agricultural world through loyalty and co-operation of the farmers of Illinois, therefore

Be it Resolved that we urge a continuation of such undivided support and loyalty as will assure the continued growth and influence for the betterment of agriculture in this state.

The Voice of the Members

Members are invited to speak their minds in this column. As many letters from members will be printed each issue as space will permit. Letters should be short and snappy; all must be signed to be printed. All constructive criticism of the Farm Bureau—county, state or national units—is welcomed. If you have any grievances, praise or suggestions, here is the place to tell them. It's your column, make it what you will. Address letters to H. C. Butcher, I. A. A. Record, 608 S. Dearborn, Chicago.

AN ANSWER TO MR. DYROFF

Adolph Dyroff in a recent issue manifests his enthusiasm that should be carried in every farmers heart for his own work. However, we cannot agree with some of the ideas in his article.

His proposal to have consumer and producers come in immediate contact with each other is impractical today. The most successful co-operatives in the world do not deal "directly." Some one must handle the commodities and to assume that we will gain the great goal that way might lead to disappointment. The most successful city marketing place run by farmers handle only an insignificant percentage of that produced. If the farmers will, the route to the eater can be shortened materially, but direct buying is to remain limited.

The suggestion to reduce farm machinery one-half is fine, but—until you can show the manufacturer where he can buy his iron and labor and freight for half he simply cannot follow the suggestion.

Until farmers are willing to pay more for pure seeds, some farmer will not take the trouble to produce better or pure seeds. We need to teach the users of seed to be willing to pay for the extra work in it.

We agree with most of Mr. Dyroff's suggestions but the solution means a lot of hard work for every man who sees the vision of a better agriculture. It means creating a desire in every farmer to co-operate, to practice the golden rule, to give more of their time and money to the solution of the problems that single individuals cannot do alone. The Grange movement built solidly because they developed that spirit of co-operation. It is not easy, but we are not asking for something easy. The old colored fellow spoke the truth when he said, "If you is gwine any whare, the only way is to start from whare you is."

—F. E. Fuller, Farm Adviser, Marshall-Putnam Farm Bureau.

—o—

THE FARMER WALT MASON

My neighbors all say the Farm Bureau of Stark is a very safe place for the farmers to park. It gives us the facts on agrarian matter, that if followed will make our pockets grow fatter. Hog sanitation is one of the best—if you follow the rules you will not have to guess. Sweet clover and limestone for soil that is worn, will fix it up fine for wheat, barley or corn; but if you want weeds or bunch grass to grow—worn soil is the berries for them, as you know. The Farm Bureau tells us just how to spray trees, so we can eat apples whenever we please. Our boy's and girl's club work we view with great pride; it is making young farmers wherever it's tried. Tho in testing our cattle we're lagging behind, we're going to make that all up, never mind; for we all know Stark county is up and alive—just watch us progress in nineteen twenty-five!

—O. L. Hatch, president, Stark County Farm Bureau.

ANNUAL REPORTS ON PROJECTS SUMMARIZED FOR ALL MEMBERS

POULTRY DEPARTMENT URGES EGG GRADING AS MARKETING MOVE

Movie Film and Bulletin to Be Used in Bringing Work of the I. A. A. to the Fore

Illinois' egg marketing system is on the up-grade. Developments during 1924 point to it, according to F. A. Gougler, I.A.A. poultry and egg marketing director. His predecessor, J. D. Harper, early in the year outlined a platform consisting of the following planks:

F. A. Gougler

1. Get all egg buyers to purchase on a graded basis.

2. Help Farm Bureaus to set up co-operative poultry and egg marketing associations where volume of business and demand warrant it.

3. Conduct a survey through the state to get at poultry and egg figures.

4. Promote the Illinois Accredited Hatchery plan.

5. Co-operate with the University of Illinois on flock standardization.

Practical Plans Suggested

Careful study of the graded-egg-buying system has brought the department to the conclusion that there are two practical ways of making egg-trading more popular—(1) Law enactment; (2) organize to market eggs co-operatively and provide for their grading. The latter system is believed by far the more practicable, and it is felt that the farmers can handle the grading problem effectively themselves, once the start is made.

Gougler has studied co-operative egg marketing in the Middle West in an effort to adopt a policy devoted to the best interests of the Illinois poultryman. Surveys are being continued in the country, in towns, and in terminal markets. Educational work leading up to organization also is on the program, in two plans. One is a two-reel film which shows every detail of a co-operative egg marketing association at work and the other is in the form of a bulletin for use in organization work.

In co-operation with the State Department of Agriculture and the University of Illinois, the department of poultry and egg marketing succeeded in getting the accredited hatchery work during the year.

Adopt Plans for 1925

Here's the 1925 program:

1. Assist counties desiring co-operative marketing agencies, by finding out whether conditions warrant it.

2. Then help in forming such organization.

3. Investigate poultry and egg marketing at our terminal markets.

4. Co-operate with present marketing agencies in insisting on more and more purchases of eggs on graded basis.

5. Work for legislation favorable to the industry.

6. Improve farm flock conditions.

7. Select 15 to 20 farm men and women from the district concerned and school them in marketing methods.

Apply Science to Business

That Illinois farmers are applying science to their business is borne out by a report of Illinois Farm Bureau Serum Association at its second annual meeting at Champaign, Jan. 14, when it was stated that 15,000,000 cubic centimeters of serum for hog vaccination were bought and used in nine months of 1924 by members through 35 county farm bureaus, which purchased the serum co-operatively through the association.

The serum association is a subsidiary of the Illinois Agricultural Association. O. B. Goble of Charleston was elected president for 1925.

Revenue, Gas Tax, T. B. Eradication: I. A. A. Projects

Investigating and outlining policies for the coming year have taken up the time of the I. A. A. Legislative Committee, consisting of F. D. Barton, A. C. Everingham, and H. E. Goembel. The committee also devoted its entire strength in co-operating with other farm organizations in an effort to secure the enactment of the McNary-Haugen Bill by Congress. Though the effort failed, it nevertheless brought the inequality of agriculture before the mind of the public.

Revenue, a gasoline tax, and continuation and expansion of the effort toward eradicating bovine tuberculosis, are the three major projects upon which the committee will center its efforts for legislation during the next session of the state General Assembly.

The committee seeks legislation designed to repeal the closed season on rabbits and to secure the greatest possible protection on quail and other game birds beneficial to farmers.

Revenue reform, the committee believes jointly with the educational committee, is essential before permanent solution of the school question can be made. The committee will favor measures of interest to the public generally and farmers particularly. It will oppose legislation against the welfare of agriculture. Ratification of the child labor amendment will be opposed.

BOOKS REVEAL SAFE TREASURY BALANCE FOR ASSOCIATION

State Farm Bureau Strength Due to Recognition of Need for Funds to Carry on Work

"It is reassuring to note," reports R. A. Cowles, treasurer of the I. A. A. and director of the finance department, "that during the past year the income of the association has been well up to estimates and that expenditures for all accounts have been within current income. This evidences the continuing healthy financial condition of your institution, and of the Farm Bureau in Illinois.

R. A. Cowles

"During the year, added interest and activity among our Farm Bureaus in the business-like attention given to securing liquidation of current and past due joint membership accounts, has become general. Substantial additions to income have resulted in every case. It is a pleasure to report that the activity has been initiated within the Farm Bureaus, and the director of this department with the co-operation of the legal department, as required, has only been called upon to give counsel and advice and has given personal service where requested.

"The worthwhile program of work of the Farm Bureau requires funds in hand and dependable income to assure its accomplishment. We have early come to recognize and accept this fact in Illinois, which may account in great part for the strength of the Farm Bureau movement in our state. Compared to its program of work, financial program and business practices are of secondary importance. They are, however, the solid foundation upon which the superstructure must rest and relative importance be recognized. The Farm Bureau, with an established sound business program, becomes a permanent super farm organization that need fear no competition in its field."

I. A. A. NOW A FORCE SQUARING AGAINST STATE INTERESTS

Organization Director Points Out That Business World Now Listens to the I.A.A.

The Illinois Agricultural Association and the Farm Bureaus are now well established in the minds of the farmers and have a ranking place among the business interests of state and county. G. E. Metzger, director of organization, says so. This recognition, he declares, has done much to maintain and increase membership in many counties where organization campaigns were carried on over a year ago. Seven counties were re-organized.

G. E. Metzger

The department has gathered much information of a general nature for the benefit of the fieldmen. County Farm Bureaus, too, were helped with summaries of the general accomplishments of the I. A. A., in cases where these counties contemplated publishing special bulletins.

The organization department in 1924 helped to put several marketing movements on their feet. The director co-operated with a group of cotton men in Pulaski, Johnson, and Union counties in making a survey organization and setting up a co-operative marketing organization for handling Illinois cotton.

Co-operated With Other Departments

The dairy marketing, poultry and egg marketing, and the live stock departments have enlisted the co-operation of the organization department on various occasions. The Illinois Fruit Growers' Exchange, now in the midst of reorganization, has been given much assistance through our fruit and vegetable marketing department.

The craving for a real Farm Bureau sport last season grew into a demand for baseball. The Marshall-Putnam Farm Bureau had the championship team and won the trophy awarded by the I. A. A.

To Stress Community Organization

Metzger counts community organization an increasingly important project. He pledges more attention to it in his program of work for 1925. A start has already been made, however. Several counties have taken up community organization as a minor project.

The Homestead Films Company is making a new two-reel picture for the organization department. This film is designed especially for use in re-organization campaigns during the next three-year period. The picture dwells on the general work of the association and the county Farm Bureaus.

In co-operation with the department of information, an exhibit was designed to set forth the I. A. A. services to co-operative marketing organizations, county Farm Bureaus, and the individual farm bureau member. About 190,000 people saw the exhibit displayed at the Aurora fair, State fair, annual picnic of the I. A. A. at Lincoln and Illinois Products Exposition at Chicago. The department also engineered the annual picnic, held August 26.

Furnish Speakers

The Speakers' Bureau has been active in locating men to address district conference meetings and has supplied speakers to county Farm Bureaus for gatherings and conventions, both business and social. Demand for this type of service is increasing.

The coming year calls for the re-organization of 40 county Farm Bureaus.

American farmers should not be content to be the packhorses of the American civilization.—R. A. Hoey, at I. A. A. annual meeting.

Grain Committee Refused to Endorse Old-Line Merger

None of the various proposals for the marketing of grain, as presented by the many outside forces, have been endorsed as practicable by the grain marketing committee, which has considered all plans carefully. It also was deemed best not to employ a regular grain marketing director.

The Illinois Agricultural Association authorized an investigation of the Grain Marketing Company as to the following:

1. National public policy. A statement of the legal requirements to be met for federal approval; a statement of the legal steps for the approval of this merger by the authorities of the state of Illinois.

2. The place of the merger in the cycle of grain marketing. Relations of facilities of merger to marketing facilities in Chicago, Kansas City, Omaha, and other cities; statement of relationship of merger to farmers' co-operative elevators in territory served.

3. Valuation and earning capacity. Values indicated by audit reports of each company in the combine; statement of properties secured and alienated by each of the companies in last five years; statement of earnings of each of the companies in last five years;

4. Investigation of proposed economies.

5. Investigation of proposed plan. Analysis of legal features of proposed by-laws and contract; analysis of experience, reliability, and cost of management personnel to be taken over from the former companies.

The I. A. A. considers the method of grower-control set up by the Grain Marketing Company in part illegal and impracticable.

44,000 PIECES CAME INTO OFFICE; 28,392 LETTERS SENT IN '24

I. A. A. Has a Real Business Office Handling Business of Members; Office Manager a Busy Man

Employment and supervision of office employes, purchase and proper accounting for supplies used by the various departments, providing for efficient filing, mail, and telephone service, and directing the office routine work generally, make up the work falling to J. H. Kelker, assistant to the executive secretary.

J. H. Kelker

Any Farm Bureau member wondering how much business is carried on by his state organization should drop in on the I. A. A. general offices in Chicago and see the mail and correspondence received and sent out. Last year the office received a total of 44,000 pieces of mail and itself mailed no less than 28,392 typewritten letters, to say nothing of nearly a quarter million sheets mimeographed for the use of the various departments in the year's activities.

The department has effected considerable savings in the purchase of paper and other supplies, for those Farm Bureaus wishing to avail themselves of the buying power of the I. A. A.

Here is a list of the more particular activities of the director:

Auditing of all bills presented.

Preparation of monthly financial statements for use of the executive committee in estimating budget income and expenditures.

Assistance of I. A. A. exhibit at fairs and expositions.

Arrangements for the annual meeting.

Entertainment of the Illinois boys' and girls' club members at the International Live Stock Exposition at Chicago.

Arrangements for the President's Conference.

Handling of miscellaneous correspondence and claims.

FOX TRACES CONTROL OF I. A. A. TO SHOW MEMBER'S CONTACTS

District Meetings a Good Thing and Should Be Continued; No Place for Petty Jealousy

"Let me sketch the contact of the individual member of the Illinois Agricultural Association for the purpose of determining what activities shall be undertaken and how prosecuted," said Geo. A. Fox at the conclusion of his annual secretary's report to the delegates at the annual meeting, the gist of which is contained in the summarized reports printed herewith. "The members of the Illinois Agricultural Association are all members of county Farm Bureaus. These county Farm Bureaus co-operating with the Illinois Agricultural Association select delegates to the annual meeting, who, in turn, select from each Congressional district an executive committeeman to constitute an executive committee. The delegates as a whole select your president and vice-president.

Geo. A. Fox

"The member speaks first through his Farm Bureau in selecting the delegates. Through the Farm Bureau and delegates he speaks to his executive committeeman and his president. This is orderly procedure and in the past five years has worked fairly well to give expression to the individual member. It has not worked perfectly but it has realized for you a certain stability and achieved some worthwhile results.

"Last year you recognized the need for closer contact between members. Farm Bureaus and your executive committeemen. You conducted district conferences to form a contact with your representative on the executive committee of the state association. These conferences have been a good thing. They offer possibilities of an even closer contact. I hope in the coming year we shall develop these district conferences to a larger degree of usefulness. It must be obvious to everyone that with over 60,000 members scattered over the state that only in this orderly way can individual members express their needs.

I. A. A. Works with Groups

"It is just as true that to render the best service to the members, the state association must work with organized groups. Through county Farm Bureaus, co-operative service can and should be made available to other farm groups, such as shipping associations, elevators, dairy organizations, farmers mutual fire insurance companies, community clubs, etc. Wherever county, district or state associations are functioning for any of those other local groups, co-operation and affiliation is desirable and should be sought.

No Place for Petty Jealousy

There is no place in the farmer family for petty jealousy, selfish ambition or personal aggrandizement. Only through co-ordinated efforts on the part of individual farmers and groups of farmers can the most effective service be rendered to the agriculture of this state.

The Illinois Agricultural Association was organized to serve the farmers of Illinois. It must never lose sight of this fact. However, a full realization of service to its members can only be had by co-operation with similar groups in other states and with national units. A friendly and proper relationship must be maintained if the state association is to meet the needs of its members in the solution of the wider than state problems.

I. A. A. REPEATS $2,000,000 TAX SAVING FOR FARMERS IN 1924

CREDITS COUNTY FARM BUREAUS FOR CLEAN-HERD DRIVE

Both Farm and City Dwellers Need to be Sold on Purpose of Work, Petersen Declares

To foster and encourage the tuberculin testing of cattle in Illinois; to help owners of tuberculosis-free herds keep their herds clean; to improve our relations with other states; and to co-operate with the State and Federal Departments of Agriculture in serving the best interests of the greatest number of our members—these are the purposes to which the tuberculosis eradication project of the Illinois Agricultural Association is dedicated. M. H. Petersen, special representative on the work, declares that "this has been made possible through the sincere efforts of the directing department heads, A. D. Lynch of the dairy marketing department, C. A. Stewart of the live stock marketing department and his successor, Wm. E. Hedgcock, and the advisory committees under whose supervision the work has been carried on."

M. H. Petersen

The county Farm Bureaus are responsible for most of the work done in bringing the need for a systematic T. B. clean-up home to the herd owners throughout the state. And men in charge of the work in the state declare that the rapid increase in both the number of counties doing area testing and the number of cattle tested is due largely to the efforts of the Illinois Agricultural Association. Petersen helped to prepare the way for area testing in 49 counties in 1924. Today Illinois claims one-fifth of all the counties conducting area testing in the United States, with 63 counties having appropriations.

Publicity Essential

Favorable public opinion, the department believes, must be moulded by a properly planned campaign of publicity. Accordingly, two objects have been kept in view in releasing information bearing on the importance of eradicating the bovine plague. Testing must be popularized among farmers as well as city dwellers, as both parties are vitally concerned. Farmers, breeders, and officials in other states must be kept informed as to the real condition of the health of Illinois cattle. The aim is to "tell the world" of the strides made in cleaning up Illinois herds, so that by the time we have become a cattle-selling state, prospects will be sold on the desirability and safety of buying cattle in Illinois.

It was realized early in 1924 that the cattle buyer needs a contract for full protection. Accordingly, a contract which fixes the responsibility in cattle purchases was drawn up with the help of the legal department and has been successfully used for the past eight months.

Milk Ordinances Demanded

More and more towns want help in drawing up ordinances regulating the production and sale of milk. A number of these ordinances have been formulated with the help of the I. A. A., the most important phase being a requirement that all milk come from cattle under state and federal supervision for tuberculosis.

Local stock yards in 89 counties have been surveyed as to sanitary conditions, especially with respect to sources of T. B. infection. The transportation department is taking action where necessary to improve existing conditions.

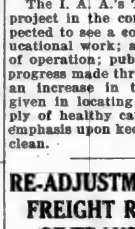
The I. A. A. secured indemnity totaling $9,440 on 124 claims made by farmers who failed to receive such indemnity for reactors.

Demand Sixty-day Retest

Public sentiment now demands that cattle coming into our state be retested. The 60-day rule therefore applies on all cattle brought over the line. Illegal traffic in untested cattle from other states has largely been curbed, due to the efficient efforts of vigilance committees, co-operating with Petersen.

Much of the routine educational program connected with the work, it was felt, should properly be handled by the State Department of Agriculture. The I. A. A. has successfully prevailed upon the State Secretary of Agriculture to purchase and distribute the motion films explaining tuberculosis eradication, and to publish pamphlets and posters showing the needs and benefits of cleaning up T. B. in cattle.

To stimulate favorable sentiment, much time was spent in addressing civic and commercial organizations, women's clubs, medical and bankers' associations, and religious societies, as well as farmers' organizations.



Future Full of Work

The I. A. A.'s T. B. eradication project in the coming year is expected to see a continuance of educational work; an expanded field of operation; publicity concerning progress made throughout Illinois; an increase in the field service given in locating sources of supply of healthy cattle; and special emphasis upon keeping clean herds clean.

RE-ADJUSTMENTS IN FREIGHT RATES, AIM OF TRANSPORTATION

I.A.A. Curbs Rate Advances and Looks Into Road Problem; Opposes P. P. Increase

Illinois farmers shall not pay more than their fair share of transportation costs; and they must have efficient transportation service. These are the things for which the transportation department, under the direction of L. J. Quasey, stands and works.

L. J. Quasey

The department has taken an active part in 10 hearings before several freight association and railroad rate committees, concerning the adjustment of rates on agricultural products. Fifty-seven conferences were held throughout the year concerning various matters—mostly with individual railroads or railroad committees.

The department co-operated with the University of Illinois, which held a series of nine live stock shipping association schools at various points throughout the state. Information was given by the I. A. A. department concerning the many transportation problems encountered in the every-day business of a shipping association, from the ordering of cars down to the filing of claims for loss, damage, or overcharge.

The department took steps in opposing the proposed increase in parcel post rates.

Extensive work was done, in co-operation with the department of taxation and statistics, in the investigation of the state hard road construction program, and report made of the findings.

Re-adjustments of freight rates have been proposed by the railroads in territory both to the east and to the west of Illinois. These re-adjustments are for the most part in the nature of increases and although live stock and grain rates and export and import rates are not now directly involved, it is reasonable to assume that an effort will be made to increase them at some later time. Other farm products will be affected by the proposed changes. The department believes that a re-adjustment downward should be made of rates on all farm products and it will endeavor to work to that end during the coming year.

SLUM KIDDIES ENJOY FARM BUREAU HOMES

Two hundred six boys and girls from the slums of Chicago were given free two-weeks' outings in the homes of Illinois farm bureau members during the summer of 1924. In this project the I. A. A. co-operated with civic and semi-public organizations to make it successful. 1924 was the fourth year in which the project has been run, and about 1,400 children have thus had a chance to see real farm life with its invigorating atmosphere—through Farm Bureau effort.

Miss Grace Schecter, secretary to Mr. Fox, served as Outing Secretary last year.

DROP OLD PLAN OF BUYING PHOSPHATE; SERVICE STRESSED

Soil Fertility and Profitable Agricultural Production Are the Aims of Department

Much progress in standardizing methods of buying limestone for Farm Bureau members; closer business relationship between limestone producers and Farm Bureaus; and extensive changes in the department's relation to the phosphate supply — these are the outstanding features of the phosphate-limestone department, of which J. R. Bent is director, for the year 1924.

J. R. Bent

The functions of the department are:

1. Investigation of factors influencing the present and future supplies of agricultural limestone and crude ground rock phosphate.
2. Acting as a bureau of information concerning the trade, for the county Farm Bureaus.
3. Acting as representative for the county Farm Bureaus and individual members in negotiating with the commercial producers of limestone and phosphate in general trade and in correcting abuses.
4. Giving specific advice to local units as to advisability of developing farmer-owned limestone plants or storage facilities.
5. Assisting where most advantageous in the collective purchasing of crude materials.
6. Keeping public officials and other necessary agencies correctly informed about all movements aimed at better maintenance of soil fertility and profitable agricultural production.

Need Bureau for Greatest Limestone Use

District conferences conducted by the department throughout Illinois revealed the fact that the Farm Bureaus have been and must be in the future, the most effective agency for the promotion of limestone use on Illinois farms. In view of the fact that a large proportion of the fertilizer business is pooled through the Farm Bureau, many of the contracting companies have agreed to furnish Farm Bureau purchasers with limestone at special prices, amounting to a maximum of 10 cents per ton. The new plan has proved popular and has helped to increase the ranks of Farm Bureau members in the state.

New Phosphate Basis

Radical departures were made in the phosphate purchasing policy. The plan of collective bargaining as used in the four years from 1920 to 1923 was abandoned, and companies were left to do their own soliciting of business among the farmers of the state. At the same time, the department's function in supervising the quality and service rendered by the producing companies, formerly limited to but a few companies, was extended to cover all of the producing plants and companies now operating in the Tennessee field. Bent counts this a distinct step in advance, although 1924 was a subnormal year in the amount of crude ground rock phosphate used in Illinois.

Illinois, Indiana, and Iowa limestone fields were visited by the director from time to time. Quarry conditions and methods of handling the fertilizer were inspected, and records kept. Limestone deposits in Illinois and phosphate deposits in Tennessee also have been investigated as to available sources for future supplies.

The Future

Marked improvements in transportation facilities, insuring prompt shipments of fertilizer during 1924, have rendered the storage problem a minor one, Bent points out. It is becoming more and more evident, however, that as time goes on, provision must be made for distribution of shipments over a wider period of time, if production is to be made efficient and economical.

Though it carries its fresh problems, the outlook for 1925 is promising. Continued friendly relations, co-operation, and standardized business methods are necessary to stabilize the traffic in limestone and phosphate.

CLEARING HOUSE ON BAR DECISIONS, AIM OF LEGAL COUNSEL

Service to Marketing Departments and Farm Bureaus Is Work Falling to Kirkpatrick

Service to the interests of organized agriculture in Illinois has been the watchword of this department in 1924, operating under the direction of Donald Kirkpatrick, I. A. A. legal counsel. The Grain Marketing Company was examined as to articles of incorporation, by-laws, and contracts, and a report was made to the I. A. A. grain committee.

D. Kirkpatrick

In investigating the Co-operative Marketing Act passed by the Illinois Legislature in 1923, the department discovered that the act carries certain provisions of power which co-operatives might misuse to their later disadvantage. On this basis, recommendations will be made to the legislative committee.

Helped Marketing Departments

In co-operation with the live-stock, dairy, and fruit and vegetable marketing departments, the legal department has urged the use of marketing contracts for all co-operatives except live stock shipping associations. Uniformity of contracts where possible has been insisted upon, and uniformity of provision has been advocated.

Incorporation of a co-operative with or without capital stock is allowable under the Illinois Co-operative Marketing Act of 1923, belief to the contrary notwithstanding. The legal department therefore has advised the issuance of preferred stock, limited to the right parties, where substantial capital is needed.

Co-ops Need Legal Advice

The legal department points out that frequent advice on local legal matters is essential if the co-operative is to function properly. The department accordingly advises all co-operatives to have and use legal advisers of their own, locally speaking. Co-operative buying enterprises are not encouraged, as the first function of the local is to market its stock successfully. The department believes in strict adherence to the commodity marketing basis.

Helps County Farm Bureaus

The legal department will continue to give legal counsel to the association in matters pertaining to the association's business. And it wants to serve as a clearing house for all new decisions handed down in the courts of the state, so as to advise all co-operatives under its jurisdiction.

ILLINOIS FARMERS LAST YEAR SAVED 2 MILLION IN TAXES

More Uniform Assessments of Real Estate Secured; Need of Tax Reform Seen

Problems of taxation, including the closely related analysis of public finances, took up the major portion of time for the department of taxation and statistics, headed by J. C. Watson, director.

J. C. Watson

Efforts to secure substantial uniformity in assessments of real estate in certain counties were continued from the previous year. The investigations disclosed that in many counties, farm lands were assessed at a higher percentage of their selling value than was true of town and city lots. Reduction in valuations of farm lands was effected in several counties. Watson declares that "there can be no doubt that, on the whole, the two classes of real estate are now more nearly on a uniform basis of valuations than has existed since the great fall in prices of farm products and farm lands began in 1920."

Effected Reduction in Taxes

Farmers were saved $2,000,000 in taxes in 1924 over what they would have been charged if assessments had been based on 1922 valuations. The department believes that "nearly all the saving in taxes last year is likely to be repeated this year."

Illinois' tax system is antiquated and inequitable, says Watson. Substantial progress has been made by the association, however, in bringing together representatives of all important organizations in a common effort to improve the system.

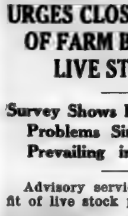
The Illinois Educational Commission last summer appointed an Advisory Council of 19 persons representing various organizations of the state. The director of the taxation department, and J. L. Whisnand, executive committeeman from the 19th district, also chairman of the school commission of the I. A. A., were appointed to the Council to represent the association.

Constitution Needs Amendment

Conferences brought out the belief of practically all parties concerned that amendment of the revenue sections of the state constitution is necessary before any great improvement can be made in the revenue system of the state. Discussions will continue until the larger number of organizations in the state will concur with the Commission in its campaign to improve the state tax system through legislative action.

The director of the department also presented the problems of taxation before a number of meetings and conferences, including the annual Farmers' Week, the Tri-State Development Congress at Duluth, and the annual convention of the Ohio Farm Bureau Federation at Columbus. He also gave a radio talk on taxation over WLS Chicago.

Announces Future Program



The department proposes to continue its efforts to discover the facts and to secure equalization of values in any counties having serious inequalities. It proposes to continue its analysis of taxes extended on lands. It will undertake a limited amount of work in Farm Bureau counties where desired. And it proposes to give much of its time to a consideration of legislative matters, and more especially to work with the committee of which Watson, representing the I. A. A. is a member, concerning recommendations relating to an amendment of the revenue sections of the State Constitution.

NATIONAL PRECEDENT ESTABLISHED IN FORMATION OF I. A. C. A.

URGES CLOSER UNION OF FARM BUREAU AND LIVE STOCK CO-OPS

Survey Shows Illinois Shipping Problems Similar to Those Prevailing in Other States

Advisory service for the benefit of live stock producers of Illinois, and promotion of the co-operative marketing of live stock through the shipping associations and Producers commission associations located on the terminal markets, make up the work of the live stock marketing department, of which Wm. E. Hedgcock is director. This work was divided into the following branches: Live stock co-operative shipping associations, producers commission associations, field service, wool pool, blankets, tuberculosis eradication, Illinois Farm Bureau Serum Association, and stockers and feeders.

Wm. E. Hedgcock

Shipping associations numbering 526, well distributed over Illinois, are members of the Illinois Agricultural Association. The department's service lies in strengthening these and developing the service which they should be able to render to their various communities.

A survey was conducted by the department during the year to learn the status of live stock shipping associations and their activities in the states of Iowa, Minnesota, Ohio, and Indiana, as well as Illinois. It was found that shipping problems in Illinois are similar in most respects to those in other states.

In all the states visited it was the consensus of those interested in the co-operative marketing of live stock that the shipping associations should be organized on a strong, efficient business basis and should keep accurate accounts; that they should be incorporated and the managers bonded; that the board of directors should designate the policies of the shipping association and instruct the manager in regard to the consigning of the live stock; also that it was a mistake to permit a shipping association manager to purchase and ship live stock in his own name, and that no one should be employed as manager of a shipping association who was not in hearty accord with the co-operative marketing plan. The lack of proper records is surprising. Indications are that a large number of shipping associations do not keep any record of their year's business.

Farm Bureaus Active

"The Farm Bureaus of Illinois have been very active in promoting the organization of shipping associations," states Hedgcock. "The department has found the Farm Bureaus to be of great assistance in promoting the educational campaign, to build up and strengthen the shipping associations and the co-operative marketing of live stock.

"It is our firm conviction that there must be a definite relationship existing between the Farm Bureau and the shipping association. The department has co-operated with the extension department of the University of Illinois in conducting nine shipping association schools in different sections of the state, and due to the interest taken in these schools it is planned to hold a larger number of schools in 1925. Through the co-operation of the extension department we find it is possible to promote the accounting work and develop the business efficiency of the shipping associations of the state with greater rapidity."

Three Producers' associations and nine shipping associations now receive the auditing service of the I. A. C. A.

The low spread obtaining between the price of feed and of live stock through the year just past has kept the outlook from being very hopeful, the director's report points out. It is his belief, however, that the situation "can be aided materially by helping develop a more orderly system of marketing.

Want System in Marketing

"We are convinced that any program which includes a more orderly system of marketing requires that the live stock be handled by the producer from the farm to the packer. The most satisfactory method will be to strengthen and develop our co-operative live stock shipping associations and our co-operative live stock marketing agencies (the Producers Commission Associations) and educate the live stock producer to patronize his own co-operative marketing agencies.

"In planning our 1925 program of work we desire to build upon the work that the department has been conducting in the past. In order to strengthen our shipping associations and co-operative marketing agencies it will be necessary to conduct an educational campaign in order that our shipping associations may handle a larger bulk of the live stock produced in the various communities. We must encourage the home grading of live stock by the shipping associations in order to reduce the cost and confusion of marketing. We must encourage the associations using efficient business methods, which will include: Accounting systems; closer attention given to the shipping associations by the boards of directors; incorporating of the associations and bonding the manager; and the employing of efficient, co-operative-minded managers. The program of work also includes the promoting of the wool pool; the locating of stockers and feeders; co-operating with existing agencies in the eradication of tuberculosis; encouraging boys and girls club work; aiding our Farm Bureaus in purchasing a good quality of serum at a reasonable price through the Illinois Farm Bureau Serum Association; and the co-operating with other agencies promoting better live stock marketing conditions in the state."

"TELL THE WORLD" IS INFORMATION BUREAU SLOGAN

Facts, and Not Propaganda, Is Department Watchword; Clippings Show the Results

Publication of the I. A. A. Record, information service to the press, advertising and publicity service to co-operative marketing organizations, and arrangement of radio talks, make up the work of the department of information, of which H. C. Butcher is director. This department is charged with the responsibility of keeping the work of the I. A. A. before 63,000 farmer members, as well as all Illinois and more remotely, the United States.

H. C. Butcher

The Record circulates among all Farm Bureau members in Illinois and is designed to give the news of the association to its readers, and to record trends which may affect the association's policies.

Information service concerning the activities and developments of the I. A. A. goes to the United Press, Associated Press, United News, and International News Service; the farm papers in this and surrounding states; and farm pages of daily newspapers. Each week several news stories about the association's progress are mailed to each of the 92 Farm Bureaus in Illinois. These stories are used with additional local angles in Farm Bureau bulletins and house organs, as well as in the local press.

The department also edits the Illinois Fruit Exchange News for the Illinois Fruit Growers' Exchange, published at Centralia.

F. E. Charles resigned as assistant director at the end of the year to take up a paper in Republic county, Kansas. He was succeeded on Jan. 1 by Gerald Jenny.

Gerald Jenny

In 1922, 5,155 clippings concerning the I.A.A. were received from a bureau which covers practically all of the daily and weekly newspapers in the state and about one-half the dailies and weeklies in the United States. In 1923, there were 2,813, and in 1924 over three times as many were returned as in 1923. These 8,582 clippings accumulating in 1924 represent 777,380 stories about the Illinois Agricultural Association which were actually printed. This increase indicates that the I. A. A. is climbing the ladder into the nation's news and that its great program of work is therefore coming to the attention of more people more often than ever before.

The director makes the following recommendations for work in 1925:

1. Continually improve the Record with a view toward making it a stronger and more interesting connecting link between members and the association.
2. Give county Farm Bureaus specific help in publicity problems.
3. Assist co-operative marketing organizations in publicity and advertising problems on a cost basis.
4. Keep pace with radio development.
5. Make the Illinois Agricultural Association the best known and most admired farm organization in the United States, both to farm and city people.

FRUIT PROGRAM SEES GROWER AIDS IF IT IS PROPERLY HANDLED

Survey Made Last Year Shows Illinois in Favorable Position; also Room for Improvement

A. B. Leeper, director of the fruit and vegetable marketing department, located at Centralia, Illinois, opened up both guns on the year's work by developing a plan for co-operative marketing of fruits and vegetables in Illinois. A plan which is believed sound and workable was devised with the help of leading growers and the horticultural department of the College of Agriculture.

A. B. Leeper

The Illinois Fruit Growers' Exchange was incorporated under the new Co-operative Marketing Act of Illinois on February 29, 1924. This farmer organization has marketed products from 24 shipping points in 16 Illinois counties in 1924.

Much time was spent by this department in making a survey of the fruit and vegetable producing counties, with the purpose of determining where marketing associations should be organized.

What Survey Showed

The survey disclosed among other things the following:

1. Illinois is near the center of population and has better transport facilities than any other section producing these crops.
2. Favorable climatic conditions obtain over almost the entire state.
3. If proper crops are grown, the harvest season comes when there is less competition than in most other producing sections.
4. Illinois farmers are not taking advantage of this condition.
5. Perishable crops for local trade are produced in every county.
6. Many sections in the state produce a surplus, which, however, is not produced in sufficient quantities to market in carlots. The grower loses.
7. In such sections farmers should either reduce their production to a local consumption basis, or increase it to provide for a volume of business which will insure proper handling, moving and refrigerating.
8. In some sections the crops are not of the best marketable variety. In others the harvest season does not correspond with the seasonal demand for the crops grown.

Products in Demand

General observations on the tree fruit status, as revealed by the same survey, show that as a whole, the country is not producing enough fruits and green vegetables to meet the demand. But no matter what the crop, market conditions and demands must be considered if it is to be grown at a profit. Only eight of the 30 counties surveyed are producing small fruits and vegetables in quantities sufficient to market them properly. Where the state's hard-road building program is working to the disadvantage of producers, marketing methods should be changed to meet the new conditions.

Recommendations

Leeper recommends the following program for 1925:

1. Re-organization of all existing organizations under the standard type recommended by the I. A. A.
2. Organization of other shipping points which can meet the I. A. A. requirements.
3. Proper supervision of such new marketing organizations by the I. A. A.
4. Completion of the survey begun last year.
5. Special attention to roadside and truck marketing.
6. Greater use of the information and advice coming from the department, on the part of the fruit and vegetable growers.

DAIRY INDUSTRY IN NEED OF ADJUSTMENT FOR BEST EFFICIENCY

Lynch Says Federate, Watch Cost of Dairy Production; Outlines Plans for 1925

The department of dairy marketing has had much grist to grind, but A. D. Lynch, the director, has it all processed and packaged properly. Here's his program:

A. D. Lynch

1. MARKETING SERVICE.
   a. Field service.
      (1) Investigational. Use surveys to determine marketing needs of communities.
      (2) Educational. Acquaint dairymen with the possibilities of co-operative marketing; formulate policies.
   b. Organization.
      (1) Work out best possible plans for prospective institutions.
      (2) Assist in acquiring suitable site.
      (3) Assist board in choosing machinery, equipment, supplies.
      (4) Help locate personnel: managers, accountants, employees.
   c. Merchandising.
      (1) Particular attention to grading and to efficient quality production.
      (2) Sales service at terminals, including the location of markets and the development of outlets for dairy products.
      (3) Advertising; outline publicity campaigns.

Better marketing methods is the need for most farmer-owned Illinois cheese factories. The problem of marketing Illinois cheese is growing, and the state now ranks third in cheese production.

2. STATISTICAL.
   a. Accounting.
      (1) Provide uniform accounting systems.
      (2) Formulate summaries and reports for directors and managers.
      (3) Interpretation, analysis, and advice on financial statements.
   b. Marketing information on butterfat, fluid milk, condensed milk, including advice on which products are likely to show largest earnings.

(Continued on page 7, col. 2)

SUCCESS MARKS WORK OF CO-OP AUDIT BODY; NEAR FIRST MILESTONE

Member Organizations Get Books Audited; Special Help Is Given on Tax Returns

The department of co-operative accounting, George R. Wicker, director, was established in May of 1924, to meet a definite and general demand on the part of co-operative associations in Illinois for improved accounting methods and better business practices.

Geo. R. Wicker

The work of the department includes the auditing of books of member organizations; recommendations for the improvement of accounting systems; appraisals of real estate, buildings, and equipment; inventories of stock; special service as to income tax returns, capital stock tax returns, state corporation tax assessments, and commercial reports; service as to federal income tax exemptions and claims for abatement and refund; statistics and comparative analysis; and business advisory service. Any agricultural organization, Farm Bureau, or co-operative association may acquire membership in the Illinois Agricultural Co-operatives Association upon application of its officers and the acceptance thereof by the properly elected officers of this association.

The department actively engaged in its work on June 1, 1924, and so far has completed the examination of 43 co-operative associations and Farm Bureaus. It has extended its services to Illinois Farm Bureaus with respect to filing returns for income tax and capital stock tax, and has presented applications for exemption in all cases where the necessary information has been supplied.

Wicker wishes to extend the facilities of the new department to the affiliated Farm Bureaus and invites their co-operation. The staff members will be glad to attend district conferences and other meetings of a general character when appointments can properly be made.

In September, 1924, a branch office was opened at Springfield in the offices of the Sangamon county Farm Bureau. J. W. King was appointed as resident district examiner. Branch offices at other centrally located points are contemplated as soon as sufficient membership warrants further extensions. Closer contact thus will be assured.

"Improved accounting systems, better bookkeeping procedure, more uniformity, and the recognition and adoption of more efficient business methods will do much to raise the general business standard of co-operative associations," says Wicker in his report. "Along this line of advance, we propose to introduce and conform co-operative associations to the clearing house plan employed by banks for the protection of their depositors and for mutual benefits.

"We are looking ahead to the time when co-operative associations will work together to advance their common interests."

BOTH SIDES OF GRAIN MERGER EXPLAINED AT BLOOMINGTON MEET

BLOOMINGTON PANTAGRAPH'S REPORT ON MEETING RE-PRINTED TO PRESENT I. A. A. MEMBERS WITH UNBIASED FACTS

McLean County Farm Bureau Called Meeting After Stock Salesmen for Grain Marketing Company Had Worked in County Several Weeks.

(In order that all farm bureau members in Illinois may know both sides of the meeting called for Jan. 12 by the McLean County Farm Bureau for the purpose of discussing the facts concerning the Grain Marketing Company at which I. A. A. officials, President Thompson in particular, and officials of the Grain Marketing Company were invited, the Record is re-printing the reports given on the meeting by the Bloomington Pantagraph through its agricultural department.—Editor.)

GRAY SILVER AND GEO. A. FOX PRESENT ARGUMENTS IN BIG MERGER CONTROVERSY

(Monday, Jan. 12. 1925.)

The Pantagraph's Agricultural Department.

Four hundred farmers heard the arguments for and against the Grain Marketing Company and its plan of buying the facilities of merged Chicago grain companies, in the meeting called by the McLean County Farm Bureau in the high school Saturday evening. Each one was judge and jury, the decision to be whether or not he personally will support the marketing concern in its coming campaign to sell stock.

Gray Silver, formerly Washington representative of the American Farm Bureau Federation and now president of the Grain Marketing company presented an appeal for farmer support. He was aided by Henry S. Ballard (a lawyer).

Geo. A. Fox, secretary of the Illinois Agricultural Association, told why the state farm bureau federation disapproves of the proposition and refuses endorsement. He was aided by Geo. E. Frazer, Donald Kirkpatrick and Geo. E. Wicker, all employees of the I.A.A.

Started Last July

Mr. Ballard, first on the program, told of the development of the Grain Marketing Company. He is connected with the Ohio Farm Bureau Federation and has had experience in co-operative wool marketing. The Grain Marketing Company was incorporated July 15, 1924. Officers were elected on July 20. The contract between the merging grain concerns and the company was made on July 28. The Grain Marketing Company began to function on August 5. The following points were made by Mr. Ballard:

This plan is fundamentally the application of business principles to co-operative marketing by farmers themselves. It is a corporation under the co-operative marketing act of the State of Illinois, organized so that the producers may have absolute control of the corporation, organized in such a manner that the board of directors is directly responsible to the stockholders, organized so that the stockholders may absolutely determine the policy of the organization.

The contract between the company and the Chicago grain firms is such that the company secures the physical properties of the three leading grain firms in the country and expert management of these properties.

There are 1,000,000 shares of common stock of the value of $1 per share. And 1,000,000 shares of Class A preferred stock of the value of $25 each. And 500,000 shares of Class B preferred stock of the value of $50 each, this class not for general sale but to be used to secure working capital and to issue in exchange for the properties acquired.

Farmers can't control the company unless they belong, however. They must become identified with the concern to have any voice in its management.

Every possible legal precaution that can be taken to set up an organization that would be invulnerable to attack has been taken.

Gray Silver Speaks

Gray Silver drew a picture of the background of events leading up to the organization of the Grain Marketing Company. He recalled the development of industry by the protective system, the organization of the National Grange, the awakening of the fact that industry had been developed to a high plain and agriculture had been neglected, the Roosevelt country life committee, the organization of the farm bureau movement and the American Farm Bureau Federation. Through it all was the evident need on the part of agriculture for greater remuneration.

He recalled the formation of the farmers' elevator movement, but declared that farmers' elevators are today competing one with the other. That system will never give the farmers a larger share of the consumers' dollar, he declared. What was needed was a central or keystone organization through which all the elevators work, and that keystone organization is now perfected.

Grain Men Saw Co-operative Coming

The grain men saw the change coming, he said. They knew a new system of marketing would eventually succeed. They had watched the legislation for co-operative marketing. They recalled the loss that the brewing industry suffered when the prohibition amendment was ratified and they wanted to avoid such a loss to their own industry.

One thing is certain, Mr. Silver declared, and that is that here are splendid facilities, the best of management, and at a membership cost of a dollar and at a small cost per bushel you can buy it all. Keep in mind that this is the first time the farmer has had a chance of serving himself in this way, he stated.

Report Was Suppressed

When the American Farm Bureau Federation was seriously considering this marketing plan last June, John Coverdale, then secretary, mentioned to officials of the I. A. A. that a recognized economist had been employed to make a survey of the proposition, said Geo. A. Fox, secretary of the I. A. A., in presenting the other side of the argument. That report was received by Mr. Coverdale about the middle of June, but was never made available to the Illinois Agricultural Association. Mr. Sam Thompson, president of the I.A.A. and an executive of the A.F.B.F., never saw the report until September and then only on direct request. That report was suppressed, Mr. Fox declared.

No Facts Available

Mr. Fox then read copies of letters between the I. A. A. and Mr. Coverdale, in which the I. A. A. asked for information deemed necessary in arriving at any conclusions concerning the project. Auditors' reports of each of the merging concerns for the past five years were definitely asked for, and it was presumed that these auditors' reports would include profit and loss statements and might be a means of separating the cash transactions from the speculative transactions. The first request was written July 29, 1924, and was acknowledged and the auditors' reports promised within a week. No reports were received. A second letter was written August 15, and it was acknowledged and the reports promised as soon as the several other investigations would permit. A third request was written August 20, asking that the audits be made immediately available. There was no reply. The reports have not been received yet.

The I. A. A. Has Not Approved

"We recognize," Mr. Fox said, "that with $26,000,000 of stock to be sold, a good portion of it must be sold to farmers of Illinois. We have not, as an association, approved of the Grain Marketing company or the sale of its stock, and the reason is that we do not have in our possession information that would warrant approval. We do have a good deal of information that would tend in the other direction."

A Reasonable Request

Mr. Fox used only a portion of the 45 minutes allotted to the I. A. A. He then called upon George E. Frazer, former comptroller of the University of Illinois, and consulting accountant of the I. A. A.

Mr. Frazer promised that his story would be very short and it was. He was called in consultation by the I. A. A. and asked how he would secure a valuation of the properties involved in the merger transaction. He replied that the information could be secured from the audits of the companies involved. Such reports for less than a five-year period would be useless in determining an accurate valuation, he declared. Mr. Fox told him it would be a simple matter to secure the audits, for he had been promised all possible information. But the audits were not available and the valuation could not be determined. Mr. Frazer said he had experience in bank mergers and accounting, himself a certified public accountant, yet in all his experience he has never known a banker to put a dollar into an enterprise unless the enterprise laid all the figures on the table.

The Legal Side

Donald Kirkpatrick, legal counsel, was then called. He said that the set-up of the company is legally correct with some exceptions. The state constitution gives a vote to each share of stock, and the Class B stock given in exchange for the property, have voting power. It was agreed, however, that the Class B stock would be held in trust and deprived of voting power so the producers would control the concern, and it is quite probable that this is legally possible, he said. In the main, the legal set-up cannot be questioned.

The vital question is whether or not the organization is co-operative in that the grain will be handled to the best interest of the producers rather than in the interests of returning the utmost earnings on the properties, said Mr. Kirkpatrick.

Elevators Not Necessary

George R. Wicker, director of the co-operative auditing department of the I. A. A., had ten minutes on the program, which he declared entirely inadequate to present all his documentary evidence, but he did present the conclusions which he claimed are backed by documentary evidence.

His survey of terminal elevator and grain storage and handling in all principal markets has resulted in nothing that led him to believe that facilities such as those operated at the present ime by The Grain Marketing Company are necessary. Facilities are obtainable in all markets of the United States with the possible exception of Chicago, when wanted and for the period required, and at less than they can be owned. That is quite a general condition, he declared, a day by day condition. And he thought that same condition would be shown by the audited reports of the concerns involved in the merger.

Mr. Wicker also said it is highly necessary to avoid speculation in any co-operative marketing concern, for that has ruined more co-operatives than any other single thing.

Questions and Answers

In answer to a question. Mr. Silver said that the Grain Marketing Company does not speculate, but merchandises grain, and is merchandising more grain than any other company.

E. J. Carmody, a member of the McLean County Farm Bureau, asked why the audit reports were withheld from the I. A. A. Mr. Silver said that the information upon which the negotiation was based were supplied by the U. S. department of agriculture, information gathered by the government, and those figures have been free to anybody at all times and always have been. It was not a question of what those companies had earned in the past, but a question of what they could earn under the rules and regulations when filled with grain.

Not Buying Audits

And in further reply to this question, which was pressed by several of those present, Mr. Ballard explained that the Grain Marketing Company contract was to acquire the elevators of the firms and the management for a period of years. That is all that under the contract the firms involved were required to deliver to the Grain Marketing Company. The books and records and reports remain the private property of the vendors, they were not passed into the hands of the Grain Marketing Company and never will be. "We cannot take someone's private property and give it to someone else," he said. He indicated, however that access to these reports had been permitted the appraisal committee of the Grain Marketing Company. But as far as turning over the reports to the I.A.A. it was an impossibility, he said.

The question was pressed still further by farmers present, and Mr. Ballard said that in a conference with Mr. Fox last fall he was told that it was impossible to turn over the audits, but that he could get any information he wanted concerning the finances of the grain firms from either the tax income office or any of the Chicago banks. Mr. Frazer answered this argument by saying that the tax income office and the banks will not give out information concerning any firm when forbidden by the firm to give out such information.

Storage of Grain

E. D. Lawrence, member of the McLean County Farm Bureau, recalled that Mr. Silver had said that before the organization of the Grain Marketing Company the Chicago elevators involved were filled only 30 per cent of capacity as a rule, while they have been operated at 100 per cent capacity since the marketing company was organized. "How do farmers benefit by that change?" he was asked. Mr. Silver's answer was that storage is cheaper when the full capacity of a warehouse is utilized.

There developed many other questions and answers and arguments. One was concerning a certain district in Indiana that is reported to have been out of line with seaboard prices before the merger company started operating, and is now back in line again. This was claimed to be true by the merger people—they claimed they did raise the price level in that territory, but contrary arguments were presented by Clifford Gregory, editor of Prairie Farmer.

HOW GRAIN MERGER MEETING WAS CALLED; RESULTS PLEASE I. A. A. OFFICIALS

Jan 18, 1925

Pantagraph Ag. Department

A combination of circumstances and direct action on the part of the Grain Marketing Company thru its local representatives and friends, particularly Mrs. Antoinette Funk, resulted in calling the grain merger meeting here last Saturday, a report of which was given in yesterday's Pantagraph. The manner of calling that meeting is of as much general interest as the meeting itself. The I.A.A. officials who took part are well pleased with the result, altho having nothing to do with the arrangements.

Up until about a month ago the officers of the McLean County Farm Bureau knew nothing about the grain merger proposition being undertaken by the recently organized Grain Marketing Company except what they have read in the news letters of the American Farm Bureau Federation and the farm and daily press. They knew in a general way about the plan and that the American Farm Bureau executive committee approved of the plan, with the exception of Sam Thompson, the Illinois member. And they knew that the state association withheld its endorsement after making as much of an investigation as was permitted it. They knew that the state association, the Illinois Agricultural Association, had asked for information it considered vitally necessary and had not been able to secure that information. But they did not know any of the details.

A strict but publically known hands-off policy was maintained by the I. A. A.

Pressure Is Applied

But the situation in McLean county changed about a month ago. Agents of the Grain Marketing Company were sent here to make a survey for a stock selling campaign. They visited the farmers' elevators, got in touch with many of the farm bureau members and officers, called at least one general meeting. They presented their arguments, urged that it is a real co-operative plan and that it is a wonderful chance for farmers to perfect the biggest marketing agency in America, utilizing the skilled managerial ability of expert grain men. They argued that the plan was properly safeguarded in the interests of producers. They asserted that all information had been turned over to the Illinois Agricultural Association and there was no foundation for the I. A. A.'s stand. They pointed out that the public refusal of the I. A. A. was substantially a stand against the merger. Their arguments were such as to cause the membership of the I. A. A. to demand that the I. A. A. either take a strong stand against or for the merger proposition.

Confidence in the I. A. A. and its officers was shaken. Some of the local farm bureau men were "sold" on the merger plan and did not like the attitude of the I. A. A. in refusing to endorse, thus handicapping the merger company by destroying confidence of the farmers. Letters to the I. A. A. officers, and even visits to the I. A. A. office in Chicago, did not satisfy them.

Their position was that they saw a big and valuable co-operative movement in the making, backed by their national organization but not by their state association, and they lacked information that they deemed they should have.

Other local officers and members were by no means "sold" on the plan and they were willing to adhere to and support the I. A. A. stand even tho they did not have all the detailed information.

Farmers Should Know All

On December 27, in the annual meeting of the McLean County Farm Bureau, a resolution was passed without discussion which endorsed the stand taken by the I. A. A. officials.

The following week, however, Mrs. Antoinette Funk became a member of the County Farm Bureau and she demanded the right to appear before the executive committee. She argued that the farmers of McLean county should have an opportunity to know all the facts concerning the Grain Marketing Company and insisted that a meeting be called for that purpose. The directors, themselves not knowing as much about the affair as they would like, consented to the meeting. It was suggested that the I. A. A. should be represented in that meeting, and that was agreed. It was suggested that the I. A. A. should be asked about it before the meeting was called, but that was claimed to be entirely unnecessary by Mrs. Funk. So the meeting was called without previous notice or conference with the I. A. A., and it was widely advertised that the I. A. A. officers had been especially invited to appear.

An Unusual Situation

Officers of the I. A. A. found it advertised that they were invited to appear here. They had the choice of coming out in the open with all their information or of refusing to come at all and thus letting the Grain Marketing Company present only its side and letting the farmers get an unfavorable impression of the I. A. A.'s stand. It was an unusual and unpleasant situation for them for they did not want to actively fight the marketing company which would mean active opposition to

I.A.A. EXECUTIVES ASK PUBLIC INQUIRY INTO GRAIN MERGER

Formal Request Made of Illinois Commerce Commission to Determine Their Legality

A formal request to the Illinois Commerce Commission asking that a public inquiry be conducted by that body into the "legality and public policy" of permitting the four old-line grain companies to form the $26,000,000 merger, commonly known as the Grain Marketing Company, was ordered by the I. A. A. executive committee at its meeting of Jan. 10. It is known that farm bureau members have been solicited to buy stock in the merger. The formal request has been made.

BOTH SIDES OF MERGER EXPLAINED AT MEET

(Continued from page 6)

the American Farm Bureau Federation executives. And they did not know whether they would meet a friendly or hostile local arrangements committee, and in a meeting of this kind much depends on the arrangements. They came.

They found that it was not the intention of the local arrangements committe to be hostile or unfair to the I. A. A., but that Mrs. Funk was very insistent upon certain arrangements and that her wishes prevailed in some important matters such as the selection of the chairman.

Clifford Gregory, editor of Prairie Farmer, was advertised as one who had been invited to speak, but he was not permitted the platform altho he was given an opportunity to present one small piece of his evidence concerning the Grain Marketing Company in discussion.

Important Question

Men who have read every available bit of information on the merger in the American Farm Bureau news letters and in the press were most concerned over the facts in the matter of the I.A.A. statement that audit reports necessary in determining the value of the properties were withheld by the Grain Marketing Company. The agents and friends of the company have declared that the I. A. A. was provided with all the information it needed in arriving at the true value of the properties, or that the information was easily available.

It developed in the meeting that the audits were not given to the I. A. A. nor were available to the I. A. A. from any source, and the reason was that the Grain Marketing Company itself did not have audit reports of the concerns whose properties it has contracted to purchase. That development supports the I. A. A. statement, but shows that there was a good reason why the information was not turned over. It does bring up another question, however, and that is whether or not the Grain Marketing Company should have had those audit reports in order to enter into the purchase of those properties with safety to the producers.

The Net Result

Whether or not the Grain Marketing Company advanced its cause at the meeting is anybody's guess. Whether or not the Grain Marketing Company is pleased with the result remains to be seen.

But the Illinois Agricultural Association officers seemed to be well pleased as they departed for Chicago. Local men who have stood by the I. A. A., in their stand seem to be well pleased, judging from comments made immediately after the meeting and since then.

Some of those who have read all that has been published in the A. F. B. F. News Letters and the press have said that they learned nothing new concerning the merger itself, altho they learned many new features on the I. A. A. side of the question.

WHAT THE CAMERA GOT

On the eve of the first day of the annual meeting, I. A. A. officials, executive committeemen and directors, county Farm Bureau presidents and farm advisers met at a dinner for a big round-table and free-as-the-air-you-breathe discussion. President Thompson in opening the meeting said that any constructive criticisms of the I. A. A. would be welcome and that the only way farmers would ever get anywhere with their organization would be by mutual co-operation. During this session, the actual temper of the 87 counties which were represented in regard to withdrawing from the American Farm Bureau Federation was shown. A unanimous vote favored national unison. Spirited talks featured the meeting. The executive committee had voted to "stick and fight it out from the inside" at its last regular meeting. The opinion was expressed by many that this round-table meeting was the most constructive meeting in the history of the I. A. A.

DAIRY INDUSTRY NEEDS ADJUSTMENT

      (3) Dairy cattle breed associations.
      (4) Dairy marketing specialists in central west states.

General Dairy Situation

The center of dairy production is moving westward faster than the center of population. The East and the South are demanding sweet cream. At the same time the Chicago "milk shed" is becoming more and more an open market. This means culling the broader cows, more quality in production, more intensive organization, and adjustment in marketing Illinois dairy products. It can be done, says Lynch. "The dairyman who watches his costs and milks good cows will make money in 1925. Also, dairymen's service organizations should be improved by federating into a state organization, run on sound business bases."

I.A.A. Movie Titled: "Carry On! F. B."

"Carry On! Farm Bureau" is the title of the Homestead Film Company's moving picture taken during the summer to show the activities of the I. A. A.

Dave Thompson announces that the film is, in his opinion, a "humdinger."

The film is to be released through the organization department of the I. A. A. It will be ready for business sometime during this month, Mr. Thompson states.

Union County Bureau Plans Co-op Manure Buying; Use 650 Cars

An association to buy manure on a co-operative basis from stock yards is a project of Union County Farm Bureau.

G. E. Metzger, director of organization, met with the Union county folks at Anna, Jan. 20 for the purpose of helping lay preliminary plans for the purchasing group. Farm Bureau members are the only ones who will be taken in.

In a preliminary survey made by L. J. Quasey of the transportation department, it is estimated that the average cost for shipping a carload of manure from Chicago to Anna is approximately $20. From E. St. Louis to Anna, the minimum cost per car is $17.60, he finds. The difference between the two points is accounted for in that the transportation cost from E. St. Louis is based on weight, and from Chicago on straight carloads. Manure prices have advanced within recent years, Mr. Quasey finds. An average carload of Manure sells for around $35.

Approximately 650 carloads of manure will be used in a year by the Union county horticulturists, L. S. Foote, the Union county farm adviser, estimates.

"WATCH THE BOOKS" IS I.A.C.A. KEYNOTE

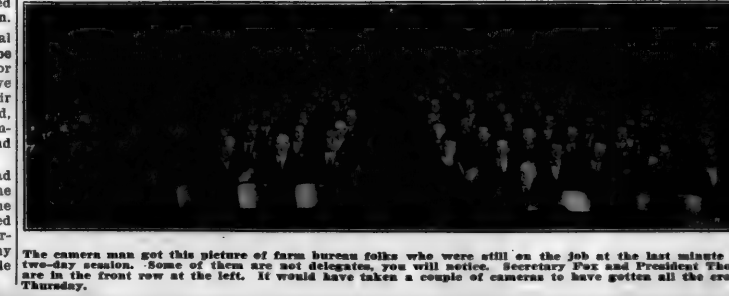
(Continued from page 1)

the present membership, he pointed out, stands at no less than 125 associations which secure I. A. C. A. auditing services.

F. E. Ringham, assistant manager, outlined the method of field examination in operation in the I. A. C. A. George E. Frazer, consulting accountant for the I. A. A. and former comptroller of the University of Illinois, gave a technical treatise on the status of Illinois co-ops under the federal revenue act, bringing out the point that exemptions under this law could be secured for farmers' elevators, provided the applications are drawn up correctly.

"Look Ahead," Vaniman Says

Vernon Vaniman, director of field organization, issued a clarion call for the co-operatives to look ahead. "Co-operatives will be left behind," he declared, "if they do not adopt adequate auditing and business advisory service."



H. H. Bally, university accounting specialist, expressed the thought that co-operative accounts should above all, be simple. If farmers' co-operatives really are to take on big business methods, he told his audience, they must keep accurate records. He also advanced the suggestion that the central I. A. C. A. office act as a clearing house for any information concerning the auditing facilities in other states. Dr. Stewart, professor of economics at the University, commended the I. A. C. A.

Elect Officers

The temporary board of directors who held offices since the formation of the service last June, were all re-elected at the annual meeting, as follows: Henry McGough, Maple Park, president; L. P. McMillen, Rock Falls, vice-president; O. B. Goble, Charleston, Henry Shaffer, Illiopolis, and G. L. Potter, Pontiac, directors; G. A. Fox, secretary, and R. A. Cowles, treasurer.

Forty-seven Illinois co-operatives were represented at the meeting.

YOU'LL NEED GOOD EYES TO SEE YOUR DELEGATE HERE

The camera man got this picture of farm bureau folks who were still on the job at the last minute of the two-day session. Some of them are not delegates, you will notice. Secretary Fox and President Thompson are in the front row at the left. It would have taken a couple of cameras to have gotten all the crowd on Thursday.

EDUCATION IN STATE NOT AS IT SHOULD BE SAYS I.A.A. COMMITTEE

Constructive Policies to Improve School System Is Aim of Educational Commission.

The educational situation in Illinois is not what it should be. The I. A. A. committee on education that points this out consists of the following: J. L. Whisnand, Charleston, chairman; A. C. Everingham, Hutsonville, and E. W. Rusk, Carlinville.

This committee early last year answered the call of the Illinois Educational Commission to sit in with it and other organizations in making investigations. Recommendations are to be made at the next bi-ennial meeting of the General Assembly.

BOTH SIDES OF GRAIN MERGER EXPLAINED AT BLOOMINGTON MEET

BLOOMINGTON PANTAGRAPH'S REPORT ON MEETING RE-PRINTED TO PRESENT I. A. A. MEMBERS WITH UNBIASED FACTS

McLean County Farm Bureau Called Meeting After Stock Salesmen for Grain Marketing Company Had Worked in County Several Weeks.

In order that all farm bureau members in Illinois may know both sides of the meeting called for Jan. 12 by the McLean County Farm Bureau for the purpose of discussing the facts concerning the Grain Marketing Company at which I. A. A. officials, President Thompson in particular, and officials of the Grain Marketing Company were invited, the Record is re-printing the reports given on the matter by the Bloomington Pantagraph through its agricultural department.—Editor.)

GRAY SILVER AND GEO. A. FOX PRESENT ARGUMENTS IN BIG MERGER CONTROVERSY

(Monday, Jan. 12, 1925.)

The Pantagraph's Agricultural Department.

Four hundred farmers heard the arguments for and against the Grain Marketing Company and its plan of buying the facilities of merged Chicago grain companies, in the meeting called by the McLean County Farm Bureau in the high school Saturday evening. Each one was judge and jury, the decision to be whether or not he personally will support the marketing concern in its coming campaign to sell stock.

Gray Silver, formerly Washington representative of the American Farm Bureau Federation and now president of the Grain Marketing company presented an appeal for farmer support. He was aided by Henry S. Ballard (a lawyer)

Geo. A. Fox, secretary of the Illinois Agricultural Association, told why the state farm bureau federation disapproves of the proposition and refuses endorsement. He was aided by Geo. E. Frazer, Donald Kirkpatrick and Geo. E. Wicker, all employees of the I.A.A.

Started Last July

Mr. Ballard, first on the program, told of the development of the Grain Marketing Company. He is connected with the Ohio Farm Bureau Federation and has had experience in co-operative wool marketing. The Grain Marketing Company was incorporated July 15, 1924. Officers were elected on July 20. The contract between the merging grain concerns and the company was made on July 28. The Grain Marketing Company began to function on August 5. The following points were made by Mr. Ballard

This plan is fundamentally the application of business principles to co-operative marketing by farmers themselves. It is a corporation under the co-operative marketing act of the State of Illinois, organized so that the producers may have absolute control of the corporation, organized in such a manner that the board of directors is directly responsible to the stockholders, organized so that the stockholders may absolutely determine the policy of the organization.

The contract between the company and the Chicago grain firms is such that the company secures the physical properties of the three leading grain firms in the country and expert management of these properties.

There are 1,000,000 shares of common stock of the value of $1 per share. And 1,000,000 shares of Class A preferred stock of the value of $25 each. And 500,000 shares of Class B preferred stock of the value of $50 each, this class not for general sale but to be used to secure working capital and to issue in exchange for the properties acquired.

Farmers can't control the company unless they belong, however. They must become identified with the concern to have any voice in its management.

Every possible legal precaution that can be taken to set up an organization that would be invulnerable to attack has been taken.

Gray Silver Speaks

Gray Silver drew a picture of the background of events leading up to the organization of the Grain Marketing Company. He recalled the development of industry by the protective system, the organization of the National Grange, the awakening of the fact that industry had been developed to a high plain and agriculture had been neglected, the Roosevelt country life committee, the organization of the farm bureau movement and the American Farm Bureau Federation. Through it all was the evident need on the part of agriculture for greater remuneration.

He recalled the formation of the farmers' elevator movement, but declared that farmers' elevators are today competing one with the other. That system will never give the farmers a larger share of the consumers' dollar, he declared. What was needed was a central or keystone organization through which all the elevators work, and that keystone organization is now perfected.

Grain Men Saw Co-operative Coming

The grain men saw the change coming, he said. They knew a new system of marketing would eventually succeed. They had watched the legislation for co-operative marketing. They recalled the loss that the brewing industry suffered when the prohibition amendment was ratified and they wanted to avoid such a loss to their own industry.

One thing is certain, Mr. Silver declared, and that is that here are splendid facilities, the best of management, and at a membership cost of a dollar and at a small cost per bushel you can buy it all. Keep in mind that this is the first time the farmer has had a chance of serving himself in this way, he stated.

Report Was Suppressed

When the American Farm Bureau Federation was seriously considering this marketing plan last June, John Coverdale, then secretary, mentioned to officials of the I. A. A. that a recognized economist had been employed to make a survey of the proposition, said Geo. A. Fox, secretary of the I. A. A., in presenting the other side of the argument. That report was received by Mr. Coverdale about the middle of June, but was never made available to the Illinois Agricultural Association. Mr. Sam Thompson, president of the I.A.A. and an executive of the A.F.B.F., never saw the report until September and then only on direct request. That report was suppressed, Mr. Fox declared.

No Facts Available

Mr. Fox then read copies of letters between the I. A. A. and Mr. Coverdale, in which the I. A. A. asked for information deemed necessary in arriving at any conclusions concerning the project. Auditors' reports of each of the merging concerns for the past five years were definitely asked for, and it was presumed that these auditors' reports would include profit and loss statements and might be a means of separating the cash transactions from the speculative transactions. The first request was written July 29, 1924, and was acknowledged and the auditors' reports promised within a week. No reports were received. A second letter was written August 15, and it was acknowledged and the reports promised as soon as the several other investigations would permit. A third request was written August 20, asking that the audits be made immediately available. There was no reply. The reports have not been received yet.

The I. A. A. Has Not Approved

"We recognize," Mr. Fox said, "that with $26,000,000 of stock to be sold, a good portion of it must be sold to farmers of Illinois. We have not, as an association, approved of the Grain Marketing company or the sale of its stock, and the reason is that we do not have in our possession information that would warrant approval. We do have a good deal of information that would tend in the other direction."

A Reasonable Request

Mr. Fox used only a portion of the 45 minutes allotted to the I. A. A. He then called upon George E. Frazer, former comptroller of the University of Illinois, and consulting accountant of the I. A. A.

Mr. Frazer promised that his story would be very short and it was. He was called in consultation by the I. A. A. and asked how he would secure a valuation of the properties involved in the merger transaction. He replied that the information could be secured from the audits of the companies involved. Such reports for less than a five-year period would be useless in determining an accurate valuation, he declared. Mr. Fox told him it would be a simple matter to secure the audits, for he had been promised all possible information. But the audits were not available and the valuation could not be determined. Mr. Frazer said he had experience in bank mergers and accounting, himself a certified public accountant, yet in all his experience he has never known a banker to put a dollar into an enterprise unless the enterprise laid all the figures on the table.

The Legal Side

Donald Kirkpatrick, legal counsel, was then called. He said that the set-up of the company is legally correct with some exceptions. The state constitution gives a vote to each share of stock, and the Class B stock given in exchange for the property, have voting power. It was agreed, however, that the Class B stock would be held in trust and deprived of voting power so the producers would control the concern, and it is quite probable that this is legally possible, he said. In the main, the legal set-up cannot be questioned.

The vital question is whether or not the organization is co-operative in that the grain will be handled to the best interest of the producers rather than in the interests of returning the utmost earnings on the properties, said Mr. Kirkpatrick.

Elevators Not Necessary

George R. Wicker, director of the co-operative auditing department of the I. A. A., had ten minutes on the program, which he declared entirely inadequate to present all his documentary evidence, but he did present the conclusions which he claimed are backed by documentary evidence.

His survey of terminal elevator and grain storage and handling in all principal markets has resulted in nothing that led him to believe that facilities such as those operated at the present time by The Grain Marketing Company are necessary. Facilities are obtainable in all markets of the United States with the possible exception of Chicago, when wanted and for the period required, and at less than they can be owned. That is quite a general condition, he declared, a day by day condition. And he thought that same condition would be shown by the audited reports of the concerns involved in the merger.

Mr. Wicker also said it is highly necessary to avoid speculation in any co-operative marketing concern, for that has ruined more co-operatives than any other single thing.

Questions and Answers

In answer to a question, Mr. Silver said that the Grain Marketing Company does not speculate, but merchandises grain, and is merchandising more grain than any other company.

E. J. Carmody, a member of the McLean County Farm Bureau, asked why the audit reports were withheld from the I. A. A. Mr. Silver said that the information upon which the negotiation was based were supplied by the U. S. department of agriculture, information gathered by the government, and those figures have been free to anybody at all times and always have been. It was not a question of what those companies had earned in the past, but a question of what they could earn under the rules and regulations when filled with grain.

Not Buying Audits

And in further reply to this question, which was pressed by several of those present, Mr. Ballard explained that the Grain Marketing Company contract was to acquire the elevators of the firms and the management for a period of years. That is all that under the contract the firms involved were required to deliver to the Grain Marketing Company. The books and records and reports remain the private property of the vendors, they were not passed into the hands of the Grain Marketing Company and never will be. "We cannot take someone's private property and give it to someone else," he said. He indicated, however that access to these reports had been permitted the appraisal committee of the Grain Marketing Company. But as far as turning over the reports to the I.A.A. it was an impossibility, he said.

The question was pressed still further by farmers present, and Mr. Ballard said that in a conference with Mr. Fox last fall he was told that it was impossible to turn over the audits, but that he could get any information he wanted concerning the finances of the grain firms from either the tax income office or any of the Chicago banks. Mr. Frazer answered this argument by saying that the tax income office and the banks will not give out information concerning any firm when forbidden by the firm to give out such information.

Storage of Grain

E. D. Lawrence, member of the McLean County Farm Bureau, recalled that Mr. Silver had said that before the organization of the Grain Marketing Company the Chicago elevators involved were filled only 30 per cent of capacity as a rule, while they have been operated at 100 per cent capacity since the marketing company was organized. "How do farmers benefit by that change?" he was asked. Mr. Silver's answer was that storage is cheaper when the full capacity of a warehouse is utilized.

There developed many other questions and answers and arguments. One was concerning a certain district in Indiana that is reported to have been out of line with seaboard prices before the merger company started operating, and is now back in line again. This was claimed to be true by the merger people—they claimed they did raise the price level in that territory, but contrary arguments were presented by Clifford Gregory, editor of Prairie Farmer.

HOW GRAIN MERGER MEETING WAS CALLED; RESULTS PLEASE I. A. A. OFFICIALS

Jan 13, 1925

Pantagraph Ag. Department

A combination of circumstances and direct action on the part of the Grain Marketing Company, thru its local representatives and friends, particularly Mrs. Antoinette Funk, resulted in calling the grain merger meeting here last Saturday, a report of which was given in yesterday's Pantagraph. The manner of calling that meeting is of as much general interest as the meeting itself. The I.A.A. officials who took part are well pleased with the result, altho having nothing to do with the arrangements.

Up until about a month ago the officers of the McLean County Farm Bureau knew nothing about the grain merger proposition being undertaken by the recently organized Grain Marketing Company except what they have read in the news letters of the American Farm Bureau Federation and the farm and daily press. They knew in a general way about the plan and that the American Farm Bureau executive committee approved of the plan, with the exception of Sam Thompson, the Illinois member. And they knew that the state association withheld its endorsement after making as much of an investigation as was permitted it. They knew that the state association, the Illinois Agricultural Association, had asked for information it considered vitally necessary and had not been able to secure that information. But they did not know any of the details.

A strict but publically known hands-off policy was maintained by the I. A. A.

Pressure Is Applied

But the situation in McLean county changed about a month ago. Agents of the Grain Marketing Company were sent here to make a survey for a stock selling campaign. They visited the farmers' elevators, got in touch with many of the farm bureau members and officers, called at least one general meeting. They presented their arguments, urged that it is a real co-operative plan and that it is a wonderful chance for farmers to perfect the biggest marketing agency in America, utilizing the skilled managerial ability of expert grain men. They argued that the plan was properly safeguarded in the interests of producers. They asserted that all information had been turned over to the Illinois Agricultural Association and there was no foundation for the I. A. A.'s stand. They pointed out that the public refusal of the I. A. A. was substantially a stand against the merger. Their arguments were such as to cause the membership of the I. A. A. to demand that the I. A. A. either take a strong stand against or for the merger proposition.

Confidence in the I. A. A. and its officers was shaken. Some of the local farm bureau men were "sold" on the merger plan and did not like the attitude of the I. A. A. in refusing to endorse, thus handicapping the merger company by destroying confidence of the farmers. Letters to the I. A. A. officers, and even visits to the I. A. A. office in Chicago, did not satisfy them.

Their position was that they saw a big and valuable co-operative movement in the making, backed by their national organization but not by their state association, and they lacked information that they deemed they should have.

Other local officers and members were by no means "sold" on the plan and they were willing to adhere to and support the I. A. A. stand even tho they did not have all the detailed information.

Farmers Should Know All

On December 27, in the annual meeting of the McLean County Farm Bureau, a resolution was passed without discussion which endorsed the stand taken by the I. A. A. officials.

The following week, however, Mrs. Antoinette Funk became a member of the County Farm Bureau and she demanded the right to appear before the executive committee. She argued that the farmers of McLean county should have an opportunity to know all the facts concerning the Grain Marketing Company and insisted that a meeting be called for that purpose. The directors, themselves not knowing as much about the affair as they would like, consented to the meeting. It was suggested that the I. A. A. should be represented in that meeting, and that was agreed. It was suggested that the I. A. A. should be asked about it before the meeting was called, but that was claimed to be entirely unnecessary by Mrs. Funk. So the meeting was called without previous notice or conference with the I. A. A., and it was widely advertised that the I. A. A. officers had been especially invited to appear.

An Unusual Situation

Officers of the I. A. A. found it advertised that they were invited to appear here. They had the choice of coming out in the open with all their information or of refusing to come at all and thus letting the Grain Marketing Company present only its side and letting the farmers get an unfavorable impression of the I. A. A.'s stand. It was an unusual and unpleasant situation for them for they did not want to actively fight the marketing company which would mean active opposition to

I.A.A. EXECUTIVES ASK PUBLIC INQUIRY INTO GRAIN MERGER

Formal Request Made of Illinois Commerce Commission to Determine Their Legality

A formal request to the Illinois Commerce Commission asking that a public inquiry be conducted by that body into the "legality and public policy" of permitting the four old-line grain companies to form the $26,000,000 merger, commonly known as the Grain Marketing Company, was ordered by the I. A. A. executive committee at its meeting of Jan. 10. It is known that farm bureau members have been solicited to buy stock in the merger. The formal request has been made.

BOTH SIDES OF MERGER EXPLAINED AT MEET

(Continued from page 6)

the American Farm Bureau Federation executives. And they did not know whether they would meet a friendly or hostile local arrangements committee, and in a meeting of this kind much depends on the arrangements. They came.

They found that it was not the intention of the local arrangements committe to be hostile or unfair to the I. A. A., but that Mrs. Funk was very insistent upon certain arrangements and that her wishes prevailed in some important matters such as the selection of the chairman.

Clifford Gregory, editor of Prairie Farmer, was advertised as one who had been invited to speak, but he was not permitted the platform altho he was given an opportunity to present one small piece of his evidence concerning the Grain Marketing Company in discussion.

Important Question

Men who have read every available bit of information on the merger in the American Farm Bureau news letters and in the press were most concerned over the facts in the matter of the I.A.A. statement that audit reports necessary in determining the value of the properties were withheld by the Grain Marketing Company. The agents and friends of the company have declared that the I. A. A. was provided with all the information it needed in arriving at the true value of the properties, or that the information was easily available.

It developed in the meeting that the audits were not given to the I. A. A. nor were available to the I. A. A. from any source, and the reason was that the Grain Marketing Company itself did not have audit reports of the concerns whose properties it has contracted to purchase. That development supports the I. A. A. statement, but shows that there was a good reason why the information was not turned over. It does bring up another question, however, and that is whether or not the Grain Marketing Company should have had those audit reports in order to enter into the purchase of those properties with safety to the producers.

The Net Result

Whether or not the Grain Marketing Company advanced its cause at the meeting is anybody's guess. Whether or not the Grain Marketing Company is pleased with the result remains to be seen.

But the Illinois Agricultural Association officers seemed to be well pleased as they departed for Chicago. Local men who have stood by the I. A. A., in their stand seem to be well pleased, judging from comments made immediately after the meeting and since then.

Some of those who have read all that has been published in the A. F. B. F. News Letters and the press have said that they learned nothing new concerning the merger itself, altho they learned many new features on the I. A. A. side of the question.

WHAT THE CAMERA GOT

On the eve of the first day of the annual meeting, I. A. A. officials, executive committeemen and directors, county Farm Bureau presidents and farm advisers met at a dinner for a big round-table and free-as-the-air-you-breathe discussion. President Thompson in opening the meeting said that any constructive criticisms of the I. A. A. would be welcome and that the only way farmers would ever get anywhere with their organization would be by mutual co-operation. During this session, the actual temper of the 87 counties which were represented in regard to withdrawing from the American Farm Bureau Federation was shown. A unanimous vote favored national unison. Spirited talks featured the meeting. The executive committee had voted to "stick and fight it out from the inside" at its last regular meeting. The opinion was expressed by many that this round-table meeting was the most constructive meeting in the history of the I. A. A.

DAIRY INDUSTRY NEEDS ADJUSTMENT

(Continued from page 5)

3. PROMOTE WELFARE OF DAIRY INDUSTRY.
   a. Publicity.
      (1) Press articles.
      (2) Talks, popular meetings, clubs, schools, radio.
   b. Protectional—Legislative.
   c. Correlate work of Illinois Co-operatives.
      (1) Harmonize policies.
      (2) Promote efficiency oy group action, including grading standards.
4. PUBLIC RELATIONS. Co-operation with other dairy institutions and agencies.
   a. State.
      (1) Illinois State Dairymen's Association.
      (2) Allied dairy interests.
      (3) Butter Improvement Association.
      (4) Dairy cattle breed associations.
      (5) Extension workers, University of Illinois.
      (6) High school agricultural teachers.
   b. National.
      (1) National Dairy Council.
      (2) American Association of Creamery Butter Manufacturers.
      (3) Dairy cattle breed associations.
      (4) Dairy marketing specialists in central west states.

General Dairy Situation

The center of dairy production is moving westward faster than the center of population. The East and the South are demanding sweet cream. At the same time the Chicago "milk shed" is becoming more and more an open market. This means culling the broader cows, more quality in production, more intensive organization, and adjustment in marketing Illinois dairy products. It can be done, says Lynch. "The dairyman who watches his costs and milks good cows will make money in 1925. Also, dairymen's service organizations should be improved by federating into a state organization, run on sound business bases."

I.A.A. Movie Titled: "Carry On! F. B."

"Carry On! Farm Bureau" is the title of the Homestead Film Company's moving picture taken during the summer to show the activities of the I. A. A.

Dave Thompson announces that the film is, in his opinion, a "humdinger."

The film is to be released through the organization department of the I. A. A. It will be ready for business sometime during this month, Mr. Thompson states.

Union County Bureau Plans Co-op Manure Buying; Use 650 Cars

An association to buy manure on a co-operative basis from stock yards is a project of Union County Farm Bureau.

G. E. Metzger, director of organization, met with the Union county folks at Anna, Jan. 20 for the purpose of helping lay preliminary plans for the purchasing group. Farm Bureau members are the only ones who will be taken in.

In a preliminary survey made by L. J. Quasey of the transportation department, it is estimated that the average cost for shipping a carload of manure from Chicago to Anna is approximately $20. From E. St. Louis to Anna, the minimum cost per car is $17.60, he finds. The difference between the two points is accounted for in that the transportation cost from E. St Louis is based on weight, and from Chicago on straight carloads. Manure prices have advanced within recent years, Mr. Quasey finds. An average carload of Manure sells for around $35.

Approximately 650 carloads of manure will be used in a year by the Union county horticulturists, L S. Foote, the Union county farm adviser, estimates.

"WATCH THE BOOKS" IS I.A.C.A. KEYNOTE

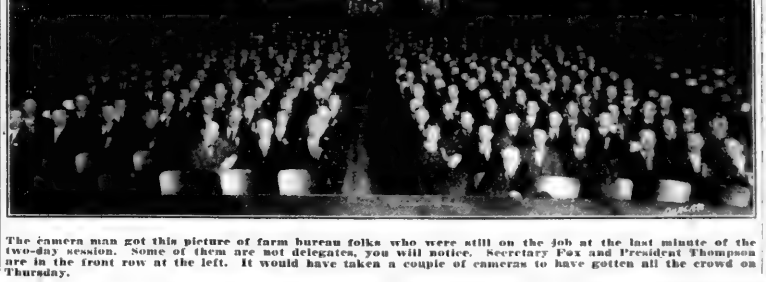
(Continued from page 1)

the present membership, he pointed out, stands at no less than 125 associations which secure I. A. C. A. auditing services.

F. E. Bingham, assistant manager, outlined the method of field examination in operation in the I. A. C. A. George E. Frazer, consulting accountant for the I. A. A. and former comptroller of the University of Illinois, gave a technical treatise on the status of Illinois co-ops under the federal revenue act, bringing out the point that exemptions under this law could be secured for farmers' elevators, provided the applications are drawn up correctly.

"Look Ahead," Vaniman Says

Vernon Vaniman, director of field organization, issued a clarion call for the co-operatives to look ahead. "Co-operatives will be left behind," he declared; "if they do not adopt adequate auditing and business advisory service."



H. H Baily, university accounting specialist, expressed the thought that co-operative accounts should above all, be simple. If farmers' co-operatives really are to take on big business methods, he told his audience, they must keep accurate records. He also advanced the suggestion that the central I. A. C. A. office act as a clearing house for any information concerning the auditing facilities in other states. Dr. Stewart, professor of economics at the University, commended the I. A. C. A.

Elect Officers

The temporary board of directors who held offices since the formation of the service last June, were all re-elected at the annual meeting, as follows: Henry McGough, Maple Park, president; L. P. McMillen, Rock Falls, vice-president; O. B. Goble, Charleston, Henry Shaffer, Illiopolis, and G. L. Potter, Pontiac, directors; G. A. Fox, secretary, and R. A. Cowles, treasurer.

Forty-seven Illinois co-operatives were represented at the meeting.

YOU'LL NEED GOOD EYES TO SEE YOUR DELEGATE HERE

The camera man got this picture of farm bureau folks who were still on the job at the last minute of the two-day session. Some of them are not delegates, you will notice. Secretary Fox and President Thompson are in the front row at the left. It would have taken a couple of cameras to have gotten all the crowd on Thursday.

EDUCATION IN STATE NOT AS IT SHOULD BE SAYS I.A.A. COMMITTEE

Constructive Policies to Improve School System Is Aim of Educational Commission.

The educational situation in Illinois is not what it should be. The I. A. A committee on education that points this out consists of the following: J. L. Whisnand, Charleston, chairman; A. C. Everingham, Hutsonville, and E. W. Rusk, Carlinville.

This committee early last year answered the call of the Illinois Educational Commission to sit in with it and other organizations in making investigations. Recommendations are to be made at the next biennial meeting of the General Assembly.

BALANCE SHEET SHOWS I. A. A. SAVED $39,189.96; RESERVE $253,910.07

"BEST MEETING IN HISTORY" IS CLAIM

(Continued from page 1)

'thereof." This was changed to allow an additional delegate for "each 500 paid-up members, or major fraction thereof."

157 Delegates On Deck

The meeting opened in the Auditorium of the University of Illinois on Thursday morning, Jan. 15, with 157 registered delegates in attendance besides the Farm Bureau presidents and farm advisers, from practically all of the 92 Farm Bureaus, the officials, and the executive committeemen, in attendance. With an estimated attendance of 1,200 at the Thursday morning session, the 1925 convention goes on record as the largest and most representative annual meet in the ten years of the Association's existence.

H. W. Mumford, dean of the College of Agriculture, in delivering the address of welcome urged his hearers to be encouraged by the accomplishments of farmers' organizations rather than by their mistakes. He stated that a revival of the fighting spirit was one of the most significant gains made by farmers during the year just ended.

President Gives Annual Address

"Our Sam" H. Thompson, in his annual presidential address said, among many other pertinent things, that because of the present day rapid transit facilities, the wholesome community life of farmers has diminished. "In the old days, community life centered around the home, the church, and the school, and we all gathered there regularly.

"The heads of families, the hired help, and practically the entire neighborhood joined in home-talent programs entertainment. This not only brought us together with the strangers that moved into the community, but it brought about that personal touch that is so necessary for the contentment and happiness which goes a long way toward keeping our boys and girls on the farm."

Need More Community Life

"People motor to larger centers these days, where they get entertainment that is commercialized for the purpose of making money rather than for upholding the high standards of living that contribute toward building up strong moral character.

"Every farmer should adopt better methods of bookkeeping in order to know just what his production costs are in all operations," was another of President Thompson's points. He reminded the delegates and all that "we have arrived at a stage in the history of American agriculture where we can no longer expect to buy a farm and look to an increase in the value of that farm from year to year to compensate us for the loss sustained in its operation." "Our Sam" commended the College of Agriculture and Dean Mumford for the work it has done through its extension department in co-operating with the county Farm Bureaus and the Illinois Agricultural Association. He also pointed to the need for continued organization on the part of farmers.

Saved Another $2,000,000

George A. Fox, executive secretary, in his report of the establishment of the Illinois Agricultural Co-operatives Association, the auditing and business advisory organization that functions as the I. A. A. department of co-operative accounting, as one of the outstanding accomplishments of the past year. In speaking of the activities of other departments, he said the following: "The department of taxation and statistics saved Illinois farmers over $2,000,000 in taxes in 1924 by bringing about partial equalization between assessed valuations on city and country property. Our live stock, dairy, and fruit and vegetable marketing departments have assisted county Farm Bureaus in setting up co-operative marketing organizations of all kinds and in drawing up contracts for them. The transportation department saves Illinois farmers at least $370,000 a year in freight rates by securing a reduction in the minimum carload weight requirements on hogs as well as changes in live stock mixed car requirements. By pooling limestone and phosphate orders, the phosphate-limestone department stabilized prices on these minerals and gained a 10-cent differential in favor of farm bureau members.

Pushed T. B. in 49 Counties

"The finance department advised and assisted county Farm Bureaus and co-operatives in matters involving finance administration. The association further helped to establish area testing for bovine tuberculosis in 49 counties. Establishing co-operative poultry and egg marketing associations, and advocating the purchase of eggs on a graded basis, are the outstanding accomplishments of the poultry marketing department. Publication of the I. A. A. RECORD, information service to the press, advertising and publicity service to co-operative marketing associations, and arrangement for radio talks make up the work of the department of information. The legal department has urged the use of marketing contracts."

It was brought out at the meeting that there was an increase in the state membership over the past year, the figure today standing at 63,000 farmers.

I. A. A. Financially Strong

The favorable financial condition reflected by the association's balance of $253,910.07 on Jan. 1, 1925, as pointed out by Treasurer Cowles, means "an established institution, farmer-owned and farmer-controlled, able and ready to execute with effectiveness any worthwhile progress within reasonable possibilities for the benefit of the farmers of Illinois."

George W. Willett, principal of Lyons Township high school at La Grange, Ill., and director of the I. A. A. school investigation, in talking during the afternoon of the first day on "Our Educational System," reported the findings of the school survey. The following points, he said, were determined by this survey: Farmers everywhere are taking unusual interest in educational matters; practically all intend to send their children to high school; the majority are opposed to consolidated schools under existing conditions; a large majority favor the continuance of a one-room school; most farmers want their children to remain on the farm. "The little red schoolhouse," said Willett, "is not so bad as it has often been pictured. Much depends upon the quality of the teacher in that school."

Crerar Sick; Couldn't Come

Events of the afternoon also included an address on grain marketing by R. A. Hoey, of Springfield, Manitoba, and a member of the Canadian Parliament. He substituted for the announced speaker, Hon. T. A. Crerar, who was detained because of physicians' urgent orders. Hoey outlined the successful operation of the recently organized Canadian wheat pool serving three provinces with 36,000 share-holders. Through the pool, he said, Dominion farmers have been able to get from 7 to 15 cents a bushel more than growers in the United States, for the first time in history.

In an open discussion from the floor on co-operative marketing, S. H. Greeley of Berkeley, Calif. for many years a member of the Chicago board of trade, declared in reference to the $26,000,000 grain merger, that no terminal co-operative marketing agency could succeed at the present time while warehousing owners continue to deal in grain. He stated that farmers should use the terminal warehouse to store grain and that warehouses should not have anything to do with the merchandising of grain.

Following the annual association banquet, David Kinley, president of the University of Illinois, told the gathering of 650 Farm Bureau folks that "it is the rural man and woman that typify the best in American life. Agriculture must remain prosperous because on its success rests the welfare of American life."

Hiram Gets Redeemed

The playlet on "The Redemption of Hiram Homebrew" as presented after the banquet by the Menard County Farm Bureau was a slapstick comedy of rare quality, bringing down the house time after time and at the same time driving home farm bureau points. G. E. Metzger, organization director, reports as the RECORD goes to press that he has received three letters asking for copies of the playlet.

Charles J. Brand, consulting specialist in marketing of the United States Department of Agriculture, then spoke on "The Agricultural Situation, Past and Present." While warning his audience that this year's improved situation in many lines of agriculture should not be regarded as representing a permanent and pronounced change for the better, he nevertheless emphasized, with some optimism as to the future, the improved purchasing power that has come to the producer during the past six months.

Farm Prosperity?—Nit!

"The past three years have shown," asserted Brand, "that general prosperity does not necessarily mean farm prosperity. Yet it always tends in that direction and if equality of opportunity exists, it finally ends in the farmers' sharing with industry, business, labor, and transportation in the good or ill that prevails in the nation.

"Four conditions should usually be sought in appraising the future outlook. They are sustained or increasing production, good crops at good prices in agriculture, sustained or increasing exports of both agricultural and industrial products, and adequate money or credit at reasonable rates.

"It is desirable, from the standpoint of the nation, that the American farmer attain such an economic position as will enable him, when conditions warrant such a course, to carry his crops and products from the lower priced to the higher priced seasons of the year and also from a year of low prices to later years of better prices."

Elect Four New Executives

Following Brand's talk, election of officers and executive committeemen took place. Executive committeemen to represent the odd-numbered Congressional districts were elected to two-year terms. They are: districts 10-11 (one representative allowed by constitution) William Webb, Lockport, Will county; 13th district, C. E. Bamborough, Polo, Ogle county (re-elected); 15th district, B. H. Taylor, Canton, Fulton county; 17th district, Frank D. Barton, Cornell, Livingston county (re-elected); 19th district, J. L. Whisnand, Charleston, Coles county (re-elected); 21st district, Samuel Sorrells, Raymond, Montgomery count (re-elected); 23rd district, W. L. Cope, Tonti, Marion county; 25th district, R. K. Loomis, Makanda, Union county.

Taxes Hit Farmers Hardest

The morning of January 16 saw everybody back in the Auditorium to "finish the job." Walter F. Dodd, Chicago, chairman of the Conference on Revenue Amendment, in introducing his subject, "The Problem of Revenue in Illinois," said, "The farmer is the one person in Illinois interested in the fair distribution of the cost of government. Under present conditions he is the hardest hit."

Declaring that the tax system should treat all classes of property and income fairly and that the present system fails to do so, Dodd said that "it is questionable whether much substantial improvement can be made under existing constitutional provisions. Property is not all alike and the problems of taxation in a growing and changing world cannot be met through detailed provisions of a substantially unchanging constitution, as framed in 1870.

Need Constitutional Amendment

"The natural solution is for all interests to agree upon a constitutional amendment untying the hands of the legislature. We have had enough experience with a legislature forbidden to make improvements.

"An outline of a general plan upon which all groups might agree would permit classification of real and personal property with exemptions; income taxation with classification as to amounts and classes of income, and with exemptions; the combination of classification of property with income taxes; severance taxes and other plans that the legislature may care to adopt."

"Insurance as Related to Farmers" was the subject of an address by E. A. Myers, Chicago, insurance counsellor. He stated it as his opinion that the Illinois Agricultural Association, in sponsoring the recent movement to improve the situation among the farm mutual insurance companies in Illinois, "is beginning one of the most important activities in its existence."

The report of the resolutions committee followed Myers' talk. All of the seven resolutions presented by the committe were adopted by the delegates after discussion and a slight change in one resolution.

Invited to Come Again

The convention remained in session through the noon hour on Friday and finished all business by 2. P. M. Thorough consideration of all matters, coupled with rapid action at the right time, marked the final session and made for the early closing.

Both Dean Mumford and the secretary of the local Association of Commerce urged the convention to come back to Champaign in 1926. This invitation will be considered by a committee later, President Thompson states. All committees for 1925 will be appointed by President Thompson within a few days. The first meeting of the executive committee will be Feb. 6.

ANNUAL REPORT OF TREASURER COWLES SHOWS STRONG FINANCIAL STANDING; OUTGROWTH OF RIGID BUDGET POLICY

Certified Public Accountant's Statement Says: "Books and Records Truthfully Show Financial Position of Association at December 31, 1924."

ILLINOIS AGRICULTURAL ASSOCIATION
Balance Sheet at December 31, 1924

ASSETS

Current Assets:			
Cash on Hand and in Bank			$ 36,901.51
Accounts Receivable:			
County Farm Bureaus for membership dues	$14,588.04		
County Farm Bureaus for miscellaneous items	1,772.40		
Phosphate Accounts	254.70		
Co-Operative Accounting Accts.	3,681.50		
Others	3,997.91

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday—February 14, 1925 | Number 3

UNITED AGRICULTURE NEEDED FOR BETTER MARKETING—LOWDEN

Stresses Organization of Forces in Speech to the Chicago Producers; Strikes Keynote

Optimism as to the future of the Chicago Producers Commission Association was expressed at the second annual meeting of the organization, held at the Union Stock Yards, Chicago, January 27. Over 200 delegates and visitors attended the meeting.

F. O. Lowden

A. Sykes, Ida Grove, Iowa, president of the association, opened the morning meeting with an address in which he pointed out the growing interest in co-operative marketing among shippers, as evidenced by the increased receipts to co-operative live stock selling agencies on all Producer markets, especially Chicago. He stated that the public was becoming convinced that co-operative marketing held the key to the solution of the farmers' problems, since President Coolidge himself has recognized the economic functions of the co-operative type of organization and its especial fitness to render service to farmers in the solution of their marketing problem.

S. W. Doty, general manager, in his annual report told what had been accomplished during the past year. The title of being the largest agency upon the Chicago yards was accorded to the Producers on the basis of the association's last year's report.

In the election of directors which followed, Pat. O'Donnell, Colo, Iowa; C. E. Ewing, Decatur, Illinois; and W. H. Wischow, Winona, Minnesota, were chosen to direct the policies of the association for the coming year.

Dairyman Gives Keynote Speech

Ex-Governor Frank O. Lowden, now president of the Holstein-Friesian Association of America and of the American Dairy Federation, in the afternoon addressed the assembly on "Co-operative Marketing of Live Stock." The need for farmer organization was the theme of his talk. He pleaded for a united agriculture and urged more efficiency in the marketing system.

Lowden compared the fluctuations in the prices of farm products with those of other raw materials like pig iron prices on which are steadier. He defined normal and market price and explained the supply which affects the market price as that part of a crop which farmers as a body offer on the market at any given price. It is this supply, he told his hearers, which economists mean when speaking of the law of supply and demand. As to a general over-supply of farm products, he said, "the world never had a surplus since the time of Pharaoh, and it has always been near starvation."

"All economists agree that there must be equality of informtaion if both parties to a transaction are to profit." He reminded his audience that there is much information concerning periodic world shortages which is wired to big corporations but which does not reach the producer. "There can be no equality of information," he warned, "until the farmers are organized along all the different lines concerned. Then they can afford to hire as good brains as the big corporations. To do this will be the cheapest investment they ever made."

The former governor scored the action of newspapers in playing up the fact that farm products in the United States last year had increased

(Continued on page 4, column 4)

OUR LEGISLATIVE PROGRAM

County Home Bureaus Federate and Elect Officers, Directors

Our "63,000 **thinking** farmers" making up the Illinois Agricultural Association now have a sister organization — the Illinois Home Bureau Federation.

During the annual Home Economics Extension Conference held at the University in conection with Farmers' Week, January 14 to 15, twenty county home bureaus of the state formed a federation. A constitution was adopted, and the following officers and directors were elected:

Mrs. Spencer Ewing, President Bloomington.

Mrs. Will Parks, first vice-president, Reynolds.

Mrs. H. M. Dunlap, second vice-president, Savoy.

Mrs. M. G. Lambert, secretary Ferris.

Mrs. T. O. Elliott, treasurer, Harrisburg.

Mrs. J. H. Bliss, director northern district, Aurora.

Mrs. F. H. Soldwedel, director central district, Pekin.

Mrs. H. J. Fauber, director southern district, Marion.

Mrs. Albert Mueller, director western district, Taylor Ridge.

The federation will have no official headquarters for the present, but committees will soon be announced. "The federation," writes Mrs. Ewing "feels that the Illinois Agricultural Association is a sort of big brother and is looking to them for much wise counsel and good advice especially along the lines of commerce and we shall need the benefit of your wisdom and experience."

ILLINOIS WINS AGAIN

Sixty-three litters in 27 counties of Illinois were successful in making the required weight of a ton in 180 days. "This gives Illinois the lead over all other states for the second consecutive year in the ton litter work.

Kendall county, Earl Price, farm adviser, is just three townships square but there are five community clubs in it.

Illinois Fruit Growers Hire Full-Time Sales Manager To Fill Need

That the co-operative selling of fruit and vegetables is growing in Illinois is shown by the necessity of securing a full-time sales manager for the Illinois Fruit Growers, Inc.

A special committee representing the Illinois Fruit Growers, Inc., consisting of I. D. Snedeker, Jerseyville, L. O. Day, Olney, and Manager Leeper, Centralia, as well as W. L. Cope and R. K. Loomis of the Fruit Growers executive committee who were in Chicago for the first meeting of I. A. A. executives, met at the I.A.A. office and hired J. O. Lawrence, formerly field manager of the Federated Fruit and Vegetable Growers, Inc., the national selling agency. Mr. Lawrence has been in the fruit selling game some time, and was recommended as having first hand knowledge of consumer requirements. He has at various times been stationed at Hastings, Florida; Aberleen, North Carolina and Huntington, West Virginia. In 1923 he was assistant sales manager at Centralia under E. C. Albion.

The Illinois Fruit Growers, Inc. has found a year-around need for a sales manager, A. B. Leeper, manager, declares.

To Popularize Illinois Fruits

The new sales manager will devote much of his time to popularizing Illinois fruits and vegetables thru promotion work. It is the desire of the special committee that the new sales manager get acquainted as soon as possible with every grower in every producing section so he will know first hand what he is selling and where it will best suit market conditions. He will also visit the buyers to find their likes and dislikes.

"We are making a special effort to sell in nearby markets," Manager Leeper said. "With a salesmanager on full time, the Illinois Fruit Growers should be able to do even better than before."

Better schools, better homes, and better children is the aim of Pulaski county Farm Bureau.

FOUR NEW COMMITTEEMEN PLUNGE INTO I. A. A. PROBLEMS AS EXECUTIVES START INTENSIVE LEGISLATIVE PROGRAM WITH 3 BIG PROJECTS

Support Gas Tax as Means of Reducing Burden on General Property; Constitutional Amendment Needed to Permit Equitable Distribution of Government Costs; T. B. Eradication Laws Wanted Re-coded with Compulsory Testing When 75 Per Cent Have Tested

THE four new executive committeemen elected by the delegates at the annual meeting at Champaign last month plunged into the concentrated and state-wide business affairs of the 63,000 membership of Illinois Agricultural Association when the first regular executive meeting was held Friday, Feb. 6.

F. D. Barton

After getting better acquainted with he old members, the committee got down to work for a busy business session during which the legislative program of the association received the most consideration. President Thompson presented his selection for the standing committees for this year, the personnel of which appears in the adjacent column, and his judgment was unanimously sustained by motion of the committee. The standing committees were left largely as they had been in 1924, thus insuring a continuity of service from the men who have given liberally of their time and thought to working out I. A. A. problems.

In all cases the farm advisers were replaced by other farm advisers. In pursuing this policy, President Thompson said he believed that more farm advisers would become intimately acquainted with the state associations' problems. Another point brought out by President Thompson was that he and Secretary Fox, in making up the committees, had endeavored to sprinkle the representation into all sections of the state. However, he stated, careful consideration must always be made for known experience and ability along certain lines.

Personnel of Standing Committees Named and Approved for This Year

The personnel of standing committees for 1925 was presented to the executive committee at its Feb. 6 meeting and approved. In each case, the first named in each committee is chairman. The appointments follow:

Organization: Earl C. Smith, Detroit; J. C. Sailor, Cissna Park; L. E. Birdsall, Sterling; C. C. Painter Stronghurst; F. A. Fisher, farm adviser, Mt. Carmel.

Information: R. F. Karr, Iroquois; J. M. Beckett, Blue Mound; F. E Fuller, farm adviser, Henry.

Phosphate-Limestone: Stanley Castle, Alton; H. T. Marshall, Serena; B. W. Tillman, farm adviser, Belleville.

Accounting: Curt Anderson, Xenia; Henry McGough, Maple Park; H Fahrnkopf, farm adviser, Bloomington.

Taxation and Education: J. L. Whisnand, Charleston; B. H. Taylor, Papatee, R. 35; D. J. Holterman, Sadorus.

Transportation: R. K. Loomis, Makanda; W. A. McNeill, Chandlerville; W. W. Wilson, farm adviser, Princeton.

Insurance: G. F. Tullock, Rockford; I. N. Hosford, Hamilton; Otis Kercher, farm adviser, Danville.

Live Stock: Samuel Sorrels, Raymond; J. W. Whisnand, farm adviser, Cambridge; Ray Arnold, Galesburg.

Fruit and Vegetable: W. L. Cope, Salem; L. L. Heller, farm adviser, Arlington Hts.; Oscar Pierson, Timewell..

Grain: H. E. Goembel, Hooppole; A. R. Wright, Varna; C. E. Hay, farm adviser, Taylorville; M. L. Hunt, Macomb.

Poultry: C. E. Bamborough, Polo; R. C. Doneghue, farm adviser, Macomb; Curt Anderson, Xenia.

T. B. Committee: A. R. Wright, Varna; Samuel Sorrells, Raymond; William Webb, Joliet, R. 1; Geo. Hunt, Woodstock; J. E. Watt, farm adviser, Geneva.

Dairy: William Webb, Joliet, R. 1; Jacob Olbrich, Harvard; A. E. Snyder, farm adviser, Hillsboro.

Legislative: F. D. Barton, Cornell; H. E. Goembel, Hooppole; A. C. Everingham, Hutsonville.

Finance: Wm. H. Moody, Port Byron; F. D. Barton, Cornell; Earl C. Smith, Detroit.

Legislative Lines Drawn

No changes were made in the legislative committee. As a result, the I. A. A. legislative program as decided upon by the 1924 executive committee and endorsed by specific resolutions at the annual meeting, was presented in tentative-detail form by chairman Barton for the legislative committee.

The Illinois Agricultural Association legislative program, as outlined in a previous issue of the RECORD, embodies three major projects:

I. An amendment to the revenue article of the present constitution to permit he General Assembly to establish an equitable system of taxation.

It was declared by President Thompson, and by John C. Watson, director of the department of Taxation and statistics, that an equitable taxation system is impossible under the limitations imposed by the present revenue article of the State Constitution. The burden of taxation, Mr. Watson stated, is crushing on real estate, whether urban or rural. Neither wealth in its intangible form nor income are carrying their share of the burden. The only solution lies in amending the revenue article, and until it is amended, the burden will fall more and more heavily on real estate.

All Must Co-operate

Mr. Watson pointed out that success in any attempt to amend the constitution requires the co-operation of the most important organizations of the state. The constant aim of the association has been to give and secure such co-operation, and thus far this purpose has been well achieved. It is necessary for every organization for the present to forget its own desires in revenue legislation and for all important organizations to unite in an attempt to give the General Assembly the necessary powers to enact such revenue acts from time to time as conditions may require.

II. A tax on gasoline to replace the present tax on property for the State Aid Roads.

In support of such a tax in Illinois is its enactment up to date in about 40 states of the Union. Illinois automobile users pay such a tax when they are in many other

(Continued on page 4, column 2)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 19, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association in five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

PLATFORM
Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, cial and educational interests of the farmers of Illinois and the tion, and to develop agriculture.

Another Advantage of Working Together

Eight serum salesmen waited outside the door to the A. A. executive committee's meeting room on Februy 2. Inside sat the board of directors of the Illinois rm Bureau Serum Association representing 48 county arm Bureaus which were in the market for serum for se of their members.

One by one the representatives of the serum companies were called into conference with the board. Each submitted a written bid for his company and signed a contract binding his company to stay with the bid. Three other companies bid by mail.

The board of directors, after making necessary investigations, will report the bids to the interested counties. From the companies recommended, the county Farm Bureaus can choose the serum which they think will serve their farm bureau members best in the prevention of hog cholera.

Quite a contrast to the olden days, isn't it?

It's another argument for farmers getting together—and sticking.

—o—

A Bit of Modern Agrarian History

A "Farmers Export Bill," which is really a re-draft of the original Mc-Nary-Haugen bill which was defeated by eastern and southern opponents in the previous session of Congress, has been introduced in both the Senate and the House. Quite possibly farm bureau members are in need of some explanation of the development since the McNary-Haugen campaign last year.

Most of us know that the legislation introduced in the last session of Congress and known as the McNary-Haugen bill was a measure that had its inception in no particular farm organization. It was proposed by individuals who had a sincere interest in improving the agricultural situation in America.

The movement rapidly gained support of various farm rganizations as its purpose became recognized. Among these was the Illinois Agricultural Association which became a recognized leader in the fight that followed.

Farm Bureau members in Illinois were largely responsible for the strength of public opinion in the Middle West which favored the bill even though certain interests were strongly against it. Meetings were held in several sections of Illinois which gave first-hand knowledge of the situation. Then a huge petition bearing some 50,000 names of all classes of Illinois citizens was taken by President Thompson down to President Coolidge as a sample of the sentiment.

In the meantime the Illinois Agricultural Association had sent a representative down to Washington—R. A. Cowles. There were representatives of other states and organizations there, too. They were fighting for the same thing, but were not bound together in any regular form other than through the bond of common purpose. The bill failed to pass in the House of Representatives in the closing days of that session.

Before adjournment of Congress, the men who had worked shoulder to shoulder at Washington in this effort and had done so at all times with complete unanimity, pledged themselves to meet at St. Paul soon thereafter for the purpose of creating a body to deal with this single subject.

The meeting at St. Paul was well attended. Representatives were there from many national and state organizations. Illinois was represented by several County Farm Bureau delegations as well as by official representatives of the Illinois Agricultural Association. I. A. A. men took active participation in the organization of the Council. A charter member of the Rock Island County Farm Bureau, George N. Peek of Moline, was elected president and R. A. Cowles, I. A. A. treasurer, became secretary of the Council.

The institution was set up in unique form and merely as a Council representing the farm organizations associated and to be associated with it. The American Council of Agriculture was deliberately created as a single-purpose organization. That purpose was to secure national legislation to bring about the practical disposal of the problem of surpluses of major agricultural commodities—to secure equality for agriculture with Industry and Labor. The Council was given office space by the I. A. A. and it made its headquarters here.

The Council occupies the field in a political sense, but is strictly non-partisan. The securing of legislation of such importance is in itself an undertaking of political nature.

Perhaps the major project of the Council has been its educational-publicity effort. The McNary-Haugen campaign in itself was well worth all the money farm organizations and individuals spent on it because it brought public attention to the unfortunately low value of the farmer's dollar. Considerable work was done by the Council during the campaign last fall to secure pledges from candidates for Congress supporting the spirit of the McNary-Haugen bill.

On December 1, 1924, the Council held an open meeting in Chicago at which many farm organizations were represented which were sincerely interested in its program. The meeting was well attended and free interchange of ideas and provisions to be incorporated into a new bill which would embody the spirit of the McNary-Haugen bill was had by all present. The executive committee of the Council was instructed to prepare such legislation as had been suggested at the meeting and to submit the proposal properly supported by brief and argument first to the President's Agricultural Conference and through it to Congress.

On December 17, the Council submitted its prepared memorandum to the members of the President's Agricultural Conference and later at the request of the chairman, Robert D. Carey, submitted a tentative draft of the proposed legislation.

January 20 was set as a date for a meeting with the President's Agricultural Conference at Washington. The following representatives of the Council, and also of their respective farm organizations, appeared before the Conference and presented "the case of agriculture" in a joint program: Geo. N. Peek, Moline, Ill., president of the Council; Frank W. Murphy, Wheaton, Minn., chairman of the Council's executive committee; R. A. Cowles, treasurer of the I. A. A. and secretary of the Council; Charles E. Hearst, president of the Iowa Farm Bureau Federation and chairman of the legislative committee of the American Farm Bureau Federation; Thomas Cashman, member of the executive committee of the Minnesota Farm Bureau Federation; William Hirth, member of the executive committee of the Missouri Farmers Association; William Settle, president of the Indiana Farm Bureau Federation and of the Indiana Wheat Growers' Association; S. H. Thompson, president of the Illinois Agricultural Association; Clifford N. Strawman, general manager of the American Wheat Growers Associated, Inc., and Newton Jenkins, legal counsel of the American Wheat Growers Associated, Inc.

The presentation required the forenoon and afternoon of the day and, as reported by Mr. Cowles, it is believed that all statements made were well supported and warranted by facts available and that opportunity was given the President's Agricultural Conference to have thoroughly studied and analyzed the merits of the proposal presented.

The group also appeared before the committees on agriculture of both the Senate and House in a joint evening meeting of these two committees. It is reported that certain ones of the Senators and Representatives who were at first critical came to see the merit of the proposal. The presentation was received with extraordinary interest and lasted well into the night.

The proposal which had been presented was then drawn up into a bill and became known as "The Farmers Export Bill." On February 3, it was introduced in the Senate by Senator Chas. L. McNary, a member of the Senate committee on agriculture (S. B. 4185). It was headed: "To prevent recurrence of agricultural depression; to place agricultural commodities upon an equality under the Tariff Laws with other commodities; to place agriculture on equality with Industry and Labor; and for other purposes."

On the same day the companion bill was introduced in the House by Congressman G. N. Haugen (H. R. 12127). The outline of the proposed bill as submitted to the President's Conference and the agricultural committees of the Senate and House, contained the following principal points:

(a) The creating of a Farm Export Corporation with powers to divert a surplus above domestic needs to the world market so that co-operative marketing associations, assisted by the buying activities of the farmers' export corporation, may be able to make the protective tariff effective in equalizing differences in cost of production of major farm commodities in the United States and in competing foreign countries.

(b) Power to collect from each unit of each commodity handled in this manner as it moves in trade an amount sufficient to prevent impairment of working capital.

(c) The corporation to be composed of 15 individuals, the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce, to represent the public interest; and twelve individuals appointed by the President, one from each of the twelve Federal Land Bank districts, from nominations made in each district by bona fide farm organizations. The life of the corporation to extend to June 30, 1930.

(d) Fifty million dollars to be advanced from the funds of the War Finance Corporation (this represents practically the earnings of this Corporation), returnable out of the equalization fees which will be collected in the manner prescribed in (b).

(e) The corporation would have a broad grant of general and special powers, is directed to do business through existing agencies, but authorized to deal directly. Powers would include authority to operate with a premium or bounty on exports if desired.

(f) Miscellaneous provisions including power of restriction of imports by proclamation of the President, utilization of services of government agencies in collection of equalization fees, and in other ways; penalty clauses, etc.

We are advised by the Council that the present short session of Congress, which automatically adjourns March 4, and all pending measures undisposed of in the session die with it, that there is little opportunity in the short time now available, with the many other measures pressing for attention, to get the bill passed in this session. It lies wholly within the discretion and pleasure of the administration's "steering committee" to give right of way or definite schedule to pending measures.

The Farmers Export Bill has sufficient individual support to secure its passage in this session, we are advised. The steering committee may or may not elect to exercise its powers to expedite enactment. The Council believes "not."

Representatives of the Council are now in Washington exerting their utmost effort to properly advance the bill. In case nothing is secured in this session, the Council has set as its purpose the preservation and maintenance of its present support, and be ready to carry the issue to the next Congress which convenes December 1, 1925.

—o—

Clerks At First Feared Cash Registers

Modern business practice recognizes the vital need for accounting records which will accurately and readily reveal the financial facts of a business enterprise. The cash register plays an important part in the business of today. It provides a simplified system of accounting for many businesses and is a part of a much more complete accounting system in many others.

However, when the cash register was first introduced clerks organized against it. They considered it a reflection on their honesty to be required to punch a machine to record the sales. They considered that it had been invented just to check up on them. The cash register is now considered necessary equipment in many business institutions.

Improvements are continually being made in systems of accounting just as there are improvements in radio and automobiles. Any system must be adapted to the business and not the business to the system. The system of accounting must not only be efficient from the standpoint of giving all the information necessary to the welfare of the business but from the standpoint of reducing the bookkeeping and auditing expense to a minimum.

There are two theories in regard to auditing. One is that an audit should simply certify to the correctness of the accounts and that the correct entries are made and the accounts properly classified.

Another theory is that an audit not only should include the above but should give facts, based on figures, relative to the general policies that should be adopted, point out where the leaks are in the business and also where improvements can be made.

It used to be that an auditor was never called in unless it was thought that somebody had gotten away with some money or when the business was in a bad condition. Now auditing is considered as essential for the protection of the manager and the board of directors. It has been said that a pedigree is not worth any more than the man that makes it. Likewise an audit does not stand for any more than the individual or organization that makes it.

Directors of farmers' co-operative associations are demanding the best in accounting and auditing service. They are interpreting auditing in the broadest sense.

They want an audit service that will give them the truth, the whole truth and nothing but the truth and also one that will not only protect the board of directors and the manager but will increase the confidence and loyalty of the stockholders.

Such is the service being rendered by the auditing and business advisory subsidiary of the Illinois Agricultural Association—the I. A. C. A.—which functions as the I. A. A. department of co-operative accounting.

NEWSPAPER'S STORY INFERS DUSKY GENTLEMAN IN MERGER WOODPILE

CHICAGO EVENING POST OF SAT., JAN. 31, CARRIES STORY ON PAGE ONE DISCLOSING INTERESTING NEWS ON $26,000,000 MERGER

Its Story Re-printed to Show Farm Bureau Members Facts as Related by Newspaper Having Leading Financial and Market Pages; Refutes Claim of Merger that it Caused the Increase in Grain Prices; Merged Interests Did Not Answer Questionnaire.

The Chicago Evening Post of Jan. 31, 1925 on page one carried the story which is re-printed below. It pertains to the $26,000,000 grain merger and represents the attitude of the Chicago newspaper which is recognized as having the leading financial and market report pages. The article is re-printed verbatim for the information of farm bureau members.

Since this article appeared in the Post, Senator Kessinger of Kane county introduced a resolution in the Senate asking for a state investigation of the Grain Marketing Company and Prairie Farmer has printed the suppressed Livingston report which was unfavorable to the merger and which President Thompson did not see until long after the deal had been completed. He was a member, as you no doubt remember, of the American Farm Bureau Federation which was appointed to consider the advisability of taking over the old-line companies and stood solidly against the deal.

The attitude of the Illinois Agricultural Association is the same now as when the results of its investigation were announced. The attitude is one of non-indorsement.

A searching investigation by the Illinois commerce commission into the operating methods of the $26,000,000 Grain Marketing corporation has been asked by the Illinois Agricultural association, the leading farmers' group in the state, it was learned today.

The outcome of the investigation is awaited eagerly, not only by the officers of the farmers' organization, who have asked for information repeatedly without satisfactory response, but by farmers' grain elevator men generally.

The Grain Marketing corporation was organized last July, ostensibly as a co-operative wheat sales venture for the benefit of grain-growing farmers. The corporation absorbed the properties of the Armour Grain company, the J. Rosenbaum Grain company, Rosenbaum Brothers and the Davis-Noland-Merrill Grain company. Since then claims that its operations have been responsible for the high price of wheat have been made repeatedly by Gray Silver West Virginia fruit grower, and other officers of the company, and have been ridiculed as impossible by those in close touch with the world grain situation.

Began Stock Promotion Work

Stock promotion work was begun for the new corporation shortly after its organization. Under the terms of the merger $4,000,000 in class A stock, with a par value of $25 a share, must be sold by July of this year in order to retire bank loans of that amount advanced for working capital.

The stock sales have thus far met with varying success. The leading Indiana, Illinois and Kansas farmers' organizations refused to indorse the corporation without more definite information as to the financial status of the merged elevator companies. Others were more favorably inclined. At present an intensive stock-selling campaign is in progress in Illinois and Iowa.

Plan of Organization in Brief

The plan of organization for the corporation may be summarized briefly as follows:

The four companies after leaving their elevator properties for the year beginning last July, are to sell and lease these properties, good will and business to the corporation for approximately $16,400,000, on the basis of an appraisal which has been in progress for some time, and is only now being completed.

The companies participating in the merger also agree to furnish a board of managers and $4,000,000 in working capital for the first year's operations.

Meanwhile, the Grain Marketing corporation agrees to dispose of $26,000,000 in stock in order to pay the purchase price set for the elevators, and furnish additional working capital. As stated earlier in the article, $4,000,000 in this stock is to be disposed of by July, 1925.

Business is to be conducted as in the past, with 8 per cent paid on the invested capital and all profits above that figure, after deductions for operating expenses; to be refunded to members on a patronage basis.

Has Been Storm Center

From the outset, according to co-operative and grain market leaders, the new company has been a storm center of controversy as to its real nature and purpose.

It has been charged variously the plan of organization takes in obsolete elevators at inflated basis of physical valuation and good will that the corporation is handling far in excess of the 50 per cent maximum in grain allowed by the Capper-Volstead act for non-members that the insurance rates on grain stored in the elevators affected are much higher than in modern structures and that the corporation as now constituted is in reality a big commission house rather than a true co-operative venture, which is taking advantage of the privileges afforded the farmers' sales groups by special legislation.

Refuses to Comment on Charges

Opportunity to comment on these charges was offered the corporation and declined.

The story of the attempt by the executive committe of the Illinois Agricultural association to obtain light on some of these phases of the merger was told today by George A. Fox, secretary of the association.

In July of this year the association's executive committee sought information from the Grain Marketing corporation as follows:

1. Does the financial record of each of the merging companies justify the conclusion that the merger will be a successful investment for farmers over the next five years?

2. Are the by-laws and contracts of the new company so drawn legally as to insure full and complete control of all the affairs by the board of directors elected solely by the farmer members?

3. Are the terminal and local elevators owned by the merger so situated that they can successfully serve the farmers in competition in all the grain markets in the United States?

Data Sought Repeatedly

This information, according to Fox, was sought repeatedly in the hope it would enable the I. A. A. to reach an independent conclusion on each of these vital questions.

"In the first place," Fox continued, "no information was given the I. A. A. as to the financial position of the merging companies, showing their profits or losses for the last five years.

"This was a fair business question—one any reliable banker would ask before passing on any investment proposition. Since no information was forthcoming, the Illinois Agricultural association could get no information as to the merger's possibilities for the next five years.

Three Months No Test

"The Illinois Agricultural association executives and officials realized the grain business is subject to wide fluctuations and feel certain no conclusion can be drawn by any reference to a short term of operation as, say, the last three months, when every grain trading firm has made great profits.

"If the merging companies have a satisfactory record on an average over a five-year period, they have had ample opportunity to furnish it to the executive committe of the Illinois Agricultural association for information of its farm bureau members whom it is seeking to protect.

"Refusal to furnish that information seems very significant.

Legal Control in Doubt

"As to the second point," Fox continued, "the Illinois Agricultural association has been given copies of the by-laws and contract for purchase and lease. From an examination of the papers furnished, it is quite evident legal control rests somewhere between the merging companies and the board of managers. At least it can be safely stated full and complete legal control, such as is absolutely necessary in any true co-operative organization, does not rest with the farmer-members or directors elected by farmer-members.

"In the third place, the Illinois Agricultural association has made careful survey of grain statistics as officially published by the United States bureau of markets, and from other official sources in the grain trade. This survey of business indicates the properties of the merged interests operated by the Grain Marketing corporation are not located or distributed advantageously under existing conditions of the grain trade, and that the present trend of general movement of grain points to a rapid decline of the utility and value of these properties in addition to obsolescence and natural depreciation.

"This business survey indicated the merged facilities can only be used advantageously where there is a rising market due to a world-wide grain catastrophe. Averages determined by normal operations over a term of years is the only information upon which a conclusion can be safely based."

The National Council of Farmers' Co-operative Marketing associaitions is the outgrowth of the co-operative marketing conference called a little over a year ago by former Governor Lowden. From the outset, this organization, thru Aaron Sapiro and other leaders, has opposed the new marketing corporation.

Sapiro ridiculed the claims of Gray Silver, made recently in Washington, that the marketing corporation was responsible for wheat price levels.

Holds Claim as Ridiculous

"The claims are ridiculous," he said. "What do they think they are? Do they think they created the world wheat shortage?

"What I object to most is their posing as a co-operative marketing association when they're operating as a straight commission house."

Specifically, Sapiro charged the marketing company violated the Capper-Volstead act by handling grain of non-members in excess of the 50 per cent allowed by the federal law, and in other ways operating just as any normal commission house does, and was doing this under cover of the privileges allowed co-operative farmers' organizations.

Sapiro's allegations, and those from other sources, were embodied in a questionnaire which, among other things, asked for a statement as to the percentage of non-member wheat handled by the corporation if it is not violating the Capper-Volstead act.

Questionnaire Not Answered

The questionnaire was submitted at the offices of the Grain Marketing corporation and assurance was given that they would be answered in writing by the following morning.

The questionnaire was called for at the appointed time, but a change of heart had occurred in the interval. The answers, it was announced, could not be given "now."

So the farmers' organizations and the other opponents of the corporation are awaiting the inquiry by the Illinois Commerce commission to ascertain whether the corporation is in reality a true co-operative organization.

DEMAND T. B. FREE MILK BY JULY 1

The first resolution ever passed by a co-operative organization of producers in Illinois imposing upon themselves the strict requirement that all herds within their organization shall be either accredited or on the way to accreditation by state and federal authorities was passed at a general meeting Feb. 9 of members of the Quincy Co-operative Milk Producers Association, according to A. D. Lynch, director of the department of dairy marketing, who addressed the group.

There are 92 herds represented in the association, Lynch says, and the restriction is to become effective on and after July 1, 1925.

Claim Department Makes Macoupin Farmer Smile; Strengthens F.B. Support

'Twas the tale of a lonesome shoat. Down in Macoupin county. Defective railroad fence. Shoat wiggled through. Got killed by locomotive, or otherwise annihilated. Charles Birkenmayer, Madora, ex-owner, demands redress. Wants market price of porker. Railroad turns deaf ear. What to do! Charles notifies I. A. A. transportation department. The fun begins. L. J. Quasey, director, investigates and later negotiates a five-spot from RR claim agent.

Tale tails off happily. Charles is satisfied. Writes to Quasey: "I could not afford not to belong to our Jersey county Farm Bureau, or to the Producers Live Stock company, and the bank, the store, and elevator. I just joined another organization in St. Louis recently—the Missouri Valley Implement and Hardware, which is $10.00 per year. The good speeches I heard by real he-men at their convention was worth the price. 'Good equipment makes a good farmer better.' Hope you are going good and have a big year, and I feel we are, if we only get good weather.

"Your booster,

"Chas. Birkenmayer."

Have you a tale to tell like this one? We are in the market for it. The RECORD is here to serve you.

I. A. C. A. MEMBERSHIP IS STEADILY GROWING

Knox county leads the state in the number of farmer co-ops holding membership in the I.A.C.A. Its seven members are the Williamsfield Live Stock Shipping Association; the Williamsfield Farmers Co-operative Association, Inc.; Altona Co-operative Grain Company; Gilson Farmers Co-operative Company; Knox county Farm Bureau; De Long Live Stock Shipping Association; and Rapatee Farmers Co-operative Grain Company.

135

The most recent farmer co-operative to join the ranks of the I. A. C. A. is the Savanna, Marcus, and Hickory Grove Live Stock Shipping Association, in Carroll county. This brings the total membership up to 135. "Farmers' co-operative associations," says Vernon Vaniman, field organizer, "are explaining one to another the auditing service and are appreciating the advantages of co-operating together."

Colusa Elevator Not In

It had been stated thru the I. A. A. information department that the farmers' elevator at Colusa in Hancock county had become a member of the I. A. C. A. This information was based on a request for an auditor and a definite date was set for his working on the Colusa elevator's books. This was taken as meaning that the Colusa elevator would sign the contract. When the auditor got there he found that other arrangements had been made for an audit and the contract had not been signed. Field Organizer Vaniman states that he will call on the board of directors in the near future.

FOUR COUNTIES HIRE FARM BOOKKEEPER

Another step in increasing farm efficiency has been taken by farm bureau members in four progressive Illinois counties.

No less than 232 farmers of Woodford, Livingston, Tazewell, and McLean counties have enrolled in the new four-county farm bureau management service, the first such project to be organized in America. M. L. Mosher, extension specialist in farm organization and management for the state college of agriculture, is to be its fieldman. The project itself is the outgrowth of a farm accounting project Mr. Mosher conducted during the six years that he served as farm adviser for the Woodford county Farm Bureau.

UTAH MAN CHOSEN TO REPLACE COVERDALE AS A.F.B.F. SECRETARY

Answers to Call of "Marketing Counsel;" Was Attorney for the Utah State Farm Bureau

Frank Evans of Salt Lake City, Utah, has been secured as the new secretary of the American Farm Bureau Federation. His title will be that of "marketing counsel." He will also perform the secretarial duties. President Thompson was on a special committee appointed by President Bradfute of the A. F. B. F. which recommended Mr. Evans.

In addition to the selection of Mr. Evans as general marketing counsel, the A. F. B. F. Executive Board at its last meeting announced the re-establishment of complete amity between the national office and the Indiana State Farm Bureau office; the appointment of E. P. Taylor as director of organization; the adoption of a resolution endorsing bills now in Congress which propose amendments of the packer-stock yard administration act which will prevent that act from prohibiting certain state government services in stock yards, and adoption of a resolution stating the Farm Bureau's position regarding pending legislation on the disposition of Muscle Shoals.

This Muscle Shoals resolution urges "first, that farmer board of control should be provided for; second, that reasonable limitation be placed on profits to be realized, and that if less power per ton of fertilizer is found practicable in future years, such development will be reflected in decreased tonnage of fertilizer rather than in sale or rental of the power."

E. P. Taylor, who was named director of organization of the A. F. B. F., has been in charge of organization field activities for the Federation for the past three years and has been actively in charge of the department of organization for the past six months.

Frank Evans, who has been named general marketing counsel, has served as the attorney for the Utah State Farm Bureau for three years, has been a director of the Utah State Farm Bureau for three years and has been member of the executive board of the A. F. B. F. for the same length of time. Mr. Evans, who is owner of farming interests in Utah and who has actively practiced law in Salt Lake City for the past 23 years, has been closely identified with development of co-operative marketing throughout the West. He has been organizing counsel for a great number of commodity associations in Utah and Idaho and other western states.

Presents Resolution Asking I. A. A. to Have I. C. C. Representative

Samuel Sorrells, executive committeeman for the 21st district, presented at the Feb. 6 meeting of the executives, a resolution passed by the Montgomery County Farm Bureau instructing him "to ask the I. A. A. executive committee to secure the services of a competent man to represent the farmers of Illinois before the Illinois Commerce Commission. His first job in to investigate the proposed raise in rates of the Illinois Telephone companies and to see if these companies are entitled to the raise. Secondly, to work to secure a ruling to compel telephone companies to transfer messages from one company line to another allowing them to charge sufficient toll to cover cost of transfer. Furthermore, that said representative be on hand at all times to investigate proposed rate increases by public utility companies and to secure the necessary information, facts and figures to protect the farmers' interests."

The executive committee voted to leave it up to the officers to determine the advisability of securing such representation and report back at the next executive committee meeting.

CHILD LABOR BILL FAILS

The child labor amendment to the Constitution has been beaten. The measure has fallen short of ratification by the necessary three-fourths of the state legislatures.

I.A.C.A. HEAD MADE TRUSTEE OF NEW CO-OP INSTITUTE

American Institute of Co-operation to Train for Co-op Management; O.K.'d by Economists

RECORD readers, who have been following up the rapid strides made by the Illinois Agricultural Co-operatives' Association since the time of its establishment last May, will be glad to hear that George E. Wicker, general manager of the farmers' auditing and advisory service company, has been elected to trusteeship for one year in the American Institute of Co-operation, recently incorporated under the laws of the District of Columbia, at Washington.

The Institute is a unique educational enterprise and it will train young men and women for careers in co-operative business undertakings. It will afford a medium thru which co-operative leaders may exchange experiences. It will demonstrate to colleges and universities that this new phase of business can be effectively taught in economic courses.

The project has the backing of organizations representing over 2,000,000 farmers. Agricultural co-operative associations already supporting it have an estimated annual turnover of more than $1,000,000,000. In addition it has the official sanction of organizations representing the state departments of agriculture, state bureaus of markets, teachers of agricultural economics and the U. S. Department of Agriculture.

Edw. B. Reid, representative of the A. F. B. F., Washington, D. C., and H. C. Taylor, chief of the federal bureau of agricultural economics, are among the incorporators of the movement.

Other national farm organizations with which the Illinois Agricultural Association participated in launching the Institute are:

The American Farm Economics Association; The National Association of Commissioners, Secretaries and Departments of Agriculture; The National Grange, Patrons of Husbandry; The American Farm Bureau Federation; Farmers' Educational and Co-operative Union of America; The National Co-operative Milk Producers' Federation; The National Board of Farm Organizations; National Association of Marketing Officials; The Sun-Maid Raisin Growers of California; The American Committee on the International Institute of Agriculture at Rome; The Federated Fruit and Vegetable Growers; The Staple Cotton Co-operative Association of Mississippi; The National Pecan Growers' Exchange; The Pennsylvania Farmers' Co-operative Federation; The Farmers' National Grain Dealers' Association.

DENMAN IS PRESIDENT NATIONAL PRODUCERS

The National Live Stock Producers Association, in annual meeting at Chicago recently, elected C. B. Denman president. Denman is president of the St. Louis Producers Commission Company and was the first president of the first Producer Commission Company organized.

A Sykes, Ida Grove, Iowa, president of the Chicago producers, was chosen vice-president of the National Producers. Harry G. Beale, Columbus, Ohio, was made secretary-treasurer. New directors elected to the board are Scot Meiks, representing the Cincinnati Producers, and H. H. Cable, for the Sioux City Producers.

Resolutions were adopted expressing appreciation of national and state Farm Bureau support; endorsing the administration of the Packer Stock Yard regulations; opposing country buying by packers; urging elimination of hog dockage; and urging the extension of the marketing service of the federal Department of Agriculture.

Delegates at the convention went on record as recognizing radio as an important means to reach live stock producers.

ORDER BY NAME

I. A. A. members who wish copies of some of the speeches made at the tenth annual meeting at Urbana may receive them by writing to the I. A. A. office. One pamphlet contains the speeches of R. A. Hoey, S. H. Greeley, and the grain marketing discussion. The other pamphlet has C. J. Brand's talk.

EXECUTIVE MEETS FOR YEAR'S WORK

(Continued from page 1)

states. The numerous tourists who cross Illinois pay nothing for the upkeep of Illinois roads. A gasoline tax is easily collected and administered. The cost of collection in other states is much less than one per cent of the amounts collected annually.

It was estimated by Mr. Watson of the department of taxation and statistics, that a tax of one cent per gallon on gasoline sold in Illinois would produce about $5,000,000 per year, and a tax of two cents per gallon would produce about $10,000,000 per year. These sums are for gasoline used solely for propelling motor vehicles on public roads, provision being made for refunds on gasoline used for agricultural purposes (tractors and stationary gasoline engines), and for industrial or domestic purposes.

Watson Says It's Fair

The fairness of a gasoline tax to replace the property tax for the maintenance and repair of the State Aid Roads was discussed by Mr. Watson. He pointed out the fact that at present property carries the entire burden of county and local government and most of the burden of state government. Property is now maintaining the State Aid Roads and other highways not included in the State hard road system. Automobile and truck owners receive all the benefits of government that other property owners receive. Through license fees they are building and maintaining hard pavements on less than 10 per cent of the primary or most important roads of the state. They are demanding good roads on the secondary and other highways of the state, though they now contribute very little toward the cost of maintaining such roads. If the automobile and truck owners, through a gasoline tax, assume the cost of maintaining the secondary system of highways known as State Aid Roads, property will still maintain between 40 per cent and 75 per cent of all the roads in every county in the state.

Has Means of Distribution

Figures were presented by Mr. Watson to show that a tax of two cents per gallon on gasoline could be distributed in such a way as to remove nearly all of the present property tax of more than $4,000,000 for State Aid Roads, and yet give nearly every county as much money as can now be raised by a property tax. A better system of distribution would give every county in the state more funds than it could now raise by the property tax and leave a sum of at least three million dollars for meeting the special needs of the State Aid Roads wherever such need is greatest, particularly in the counties having the larger cities of the state.

Would Relieve Farm Property

"The tax on Illinois property for State Aid Road purposes now amounts to more than four million dollars a year," said Mr. Watson. "The lowest tax rates for this purpose or no levies at all are usually found in the counties which have a large amount of city property. Maximum tax rates or rates approaching the maximum are found in most of the counties having relatively small amounts of city and village property. For these two reasons it is probable that the plan proposed by the Illinois Agricultural Association would relieve farm property of about one-half of the total tax saving, or at least two million dollars a year. The State Aid Road tax would be paid by those who use the roads most and who are most insistent in their demands for good roads. In considerable measure it would be paid by citizens of other states who use Illinois roads. It would be paid also by farm owners of motor vehicles, but they would usually gain both in the reduced property tax and in having better roads. The greater portion of the road system, as at present would be maintained by a property tax. The larger amount of money available under this plan should give the state better roads, and by increasing the mileage per gallon and decreasing the wear and tear on motor vehicles, should reduce the net cost of the system to those who pay the gasoline tax."

III. Continuation and expansion of the effort toward eradication of bovine tuberculosis.

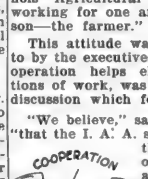
Legislation pursuits on tuberculosis eradication will be along the line of furthering the good work now so splendidly under way in its eradication. The legislative committee's report on this showed that a general re-coding of the several acts enacted at various times to further t. b. eradication, some of which are not clear and specific, will be sought. A bill will be supported which provides for compulsory testing, as well as embodying the old acts, when a substantial majority of herd-owners in a county have had their herds tested, probably 75 per cent. Other details will be sought in order to protect those who have done their patriotic duty and suffered their losses.

After Rabbits, Too

A bill has been introduced in the House of Representatives by Representative Tice, chairman Barton reported, that provides for a 12-month open season on rabbits. The I. A. A. is also behind this move.

"It ought to be a 13-month a year open season," Executive Taylor remarked. "They surely are becoming a pest down-state."

That even closer co-operation between University extension workers and I. A. A. directors and officials is in the offing is shown by a friendly visit of H. W. Mumford, dean of the College of Agriculture. The dean suggested that the I. A. A. program of work could be explained first-hand to all the farm advisers to good advantage if a representative of the association were present at the meetings of extension workers and farm advisers. This suggestion was agreed to.



Invited to University

Further, the I. A. A. directors are invited to be guests of the University, probably next fall, at which time the experimental and extension work will be gone over. This is in line with maintaining close connections between the two tremendous forces in Illinois agriculture.

"After all," the Dean said, "the College of Agriculture and the Illinois Agricultural Association are working for one and the same person—the farmer."

This attitude was heartily agreed to by the executives. That close co-operation helps eliminate duplications of work, was pointed out in a discussion which followed.

"We believe," said Secretary Fox, "that the I. A. A. should do nothing that the College of Agriculture can and will do, but of course we realize that the College of Agriculture is supported by money from all the tax-payers and of course that money could not be used to further the farmers' interest in such things as actual marketing of farm products, negotiations for the purchasing of fertilizers or reduction of taxes. These are economic problems that the I. A. A. must work on and which are undertaken and prosecuted purely in the interests of farmers who support the organizations."

A two-day session was set for March 5 and 6. All the directors will be called upon to present their 1925 programs of work to the executive committee. This will take the whole of the first day and the second will be devoted to regular business.

I. A. A. Membership by Belief, Farming by Choice, He Says

We asked the executive committeemen, when recently elected, to give us a brief summary of their life. Here's how C. E. Bamborough, Polo, 13th district, comes back at us: "Have been in a quandary as to which part of my life you wished summarized. Am somewhat reluctant to express my choice of an epitaph so early in the game. Perhaps the less said the better. As a preface I submit the following brief summary:

"A pharmacist by profession and education, being a graduate of Northwestern University. A FARMER by choice. A member of the Illinois Agricultural Association by belief and an executive committeeman for some unknown reason."

LOWDEN PLEADS FOR UNITED AGRICULTURE

(Continued from page 1)

$750,000,000. He pointed out that agricultural production in the United States still is out of balance and declared the present system of marketing farm products, where not done through co-operatives, as desperately unsound. "The time should come," he said, "when all farmers should get together in great conventions to preserve the balance among agricultural crops and to determine how much of each crop should be grown."

Lowden showed how the good pasture season last summer cost the dairy farmers of the nation over a half billion dollars in excess production, and how, at the same time, the drought in the corn belt made for a smaller but more valuable corn crop than in 1923. He deplored the lack of system in agricultural marketing and urged the Producers to talk over their problems with their local business men. He also commended the Producers for the good beginning they made in the marketing of live stock.

"If history teaches anything," declared the farm leader, "it teaches that permanent prosperity cannot come without farm prosperity. We cannot have a balanced agriculture, nor get agriculture back to a state of balance with other industries, without organization. This is a business man's problem as much as the farmer's. No nation has long survived the decay of its agriculture."

At a banquet of the Producers at which C. A. Stewart, secretary of the National Live Stock Producers Association, presided as toastmaster, Charles E. Ewing, Decatur, Illinois declared that "never before has there been such a group of leaders and students in the live stock world as now." For that reason, he said, the industry need not be discouraged over the outlook for the future.

T. J. Ritger, delegate from Dallas Center, Iowa, commended the Producers organization for its efficiency stating that "the alertness of the boys working in the yards gives the members confidence in the organization."

L. R. Marchant, Knox county farm adviser, in his speech stated that "the Chicago Producers Commission Association has demonstrated two things. First, many commission firms are maintained at the Chicago yards at high expense. The farmers have proved that they can do the marketing better than these private companies. Secondly, the marketing methods formerly used have been improved through the efforts of the Producers. More responsibility is being borne in the country now, and less by the selling agencies. The practice of grading stock at the local stockyards is good policy as it eliminates much terminal grief.

"Volume and brains will put the marketing program at the top. I have confidence in the organization that it will do the work, and in the shippers that they will provide the volume of business."

TWELVE LIVE STOCK SCHOOLS IN FEBRUARY

Live stock shipping association schools is the order of the day for the I. A. A. department of live stock marketing. Director Wm. E. Hedgcock has arranged for no less than 12 schools to be held through February in various parts of the state. During this week just coming to a close, institutes were held in Carlinville, Carbondale, Fairfield and Effingham. Next week's schedule includes the following schools: Urbana, Feb. 17; Decatur, Feb. 18; Jacksonville, Feb. 19; and Bloomington, Feb. 20. The following week's schedule will include Ottawa, Feb. 24; Galesburg, Feb. 25; Dixon, Feb. 26; and Rockford, Feb. 27.

"The I. A. A. has furnished speakers for a large number of annual shipping association meetings," says Hedgcock. "We will be glad to assist any association when called upon."

BEEMEN WILL BUZZ

A two-day beekeepers' short course has been arranged for Carbondale, Jackson county, February 23-24. It is believed that the fruit and truck industry will share with beemen in the benefits to be derived from the results of the short course. Prominent beemen will address the gathering.

"I congratulate the I. A. A. on the solidarity it has attained in the handling of crops."—Chas J. Brand, U. S. D. A.

PRESIDENT THOMPSON DATED TO START OFF FARM TALKS OVER KSD

I. A. A. Farm Programs which Formerly Were Broadcast Over WCK Now Changed to KSD

Radio fans, especially those in Southern Illinois, who have been following the I. A. A. farm programs over WCK at St. Louis, have probably been wondering what became of it. It was not possible to get an adequate announcement in the last RECORD because of it being a special edition and crammed to the edges. The developments since the last announcement have brought about a change from WCK to KSD, the St. Louis Post-Dispatch station, which is much stronger and of considerable more value for broadcasting farm programs because it has more "circulation." Considerable more farm bureau members can be reached over KSD.

The arrangements with KSD, which have previously been averse to farm talks other than market reports, were made thru the National Farm Radio Council, an organization of non-commercial and commercial farm organizations, and in which the American Farm Bureau Federation has membership. In fact, the National Farm Radio Council is a child of the information department of the American Farm Bureau Federation and was created to make it easier for farmers to get agricultural information over the air.

When the "child" grows up, it is planned to schedule speakers thru the central body for as many reliable radio stations as want them. At present negotiations are under way with several stations, one of them being KSD. Speakers representing the Illinois Agricultural Association will appear on the KSD program at various times according to the present rather tentative arrangement.

President Thompson will, according to present plans, lead off the program with a speech of special interest to farm bureau members Wednesday evening, Feb. 18, probably around 8 o'clock. This is a tentative announcement and may have to be changed. Watch your local newspapers for later announcements until the next RECORD comes out.

MEETS SUCCESS IN FEDERATION

Adams couny has met with success in its co-operative live stock shipping plan. Analysis of the annual statement of the Adams County Shippers Association reveals the interesting fact that $841,045.86 worth of live stock was shipped by this association during 1924 at an expense of slightly less than 2 per cent. The gross operating income for the association was $16,098.54, which includes $5,056.37 paid out to shippers for insurance. Organized on the county plan, the association is counted an outstanding example of the tendency toward consolidation among the successful co-operatives throughout the country, according to R. E. Miller, farm adviser.

PRODUCER FACTS

The Chicago Producers ranked in first place among all sales agencies at the Chicago stock yards by several thousand cars for 1924.

The Producers Live Stock Commission Association of the St. Louis National Stock Yards last year handled around 18 per cent of the total stock yard receipts at that market. Most of its 40,000 members live nearby in Illinois, Missouri and Iowa.

The National Live Stock Producers Association is handling about 2,000 cars of live stock per week and represents the largest live stock marketing agency in the United States.

FORMED 389 CLUBS IN 1924

One of the most far-reaching results of the past year's junior club work on Illinois farms was the formation of 389 local club organizations. This is the information coming from E. I. Pilchard, boys' club work specialist of the College of Agriculture, University of Illinois. Pilchard in his annual report states that these 389 community organizations, which are officered by the club members themselves, teach the lesson of co-operation and develop the youngsters for larger service in their communities.

NINE TOWNSHIPS AND NINE COMMUNITY CLUBS IN KENDALL COUNTY; THAT'S WHAT MAKES OUR LIFE WORTH LIVING, THE MEMBERS ARE SAYING

Inquisitive Reporter Drops in on Club Members; Finds Happy Farm Homes and Spirit of Co-operation Everywhere—Also Evidences of Leadership. Kendall County Is High in Bureau Membership

A day in the country is worth ten in the city. So thought we when giving Kendall County the once over not long ago.

Earl Price

"Come on down to Yorkville and see what our community clubs are doing," came the call from Earl Price, farm adviser. To Yorkville we went, all keyed up for a day's treat.

"Our farmers' clubs are live wire organizations," Price said as we motored out to visit some of the club members. "Everyone of them is a credit to its community, as it brings the people together and gives them a chance to talk over common problems."

It wasn't long before we came across farmer club members. What we had in store for our city-cloistered minds was more than a little. Every last club booster we talked to reflected community spirit—the joy of living, willingness to co-operate, ambition to forge ahead, and a readiness to tackle whatever problems are ahead. If this is the result of community club effort, thought we, let's get more of these farmers' societies throughout the length and breadth of Illinois. Sociability has few friends like the farmers' club.

But to the day's work. East of the Fox river lies Oswego, and around Oswego reside 30 or so farm families making up the East Oswego Progressive Farmers' Club. The first man in our tracks was Mr. Burkhart. We cornered him, telling him our mission. It wasn't long before he got thoroughly warmed up to our aim, and forthwith he told us what the club was up to.

The East Oswego club, we found out, started back in 1919, or at least before Adviser Price, the present incumbent, picked up the county halter strap in 1920. No particular hardships were encountered, Mr. Burkhart said, in getting club activities or membership under way. Everybody seemed ready for some strictly farmer's proposition, and to the meetings they all came—the youngsters, the old folks, the in-betweens in short, the whole family. It wasn't long then before the club got well established in the community, with its monthly meetings and programs.

Business Before Pleasure

The club meets once a month and usually has an attendance of around 100. Short business meetings precede the programs, and then the fun begins. Sometimes there is a question box, in which common problems are roundly thrashed out, or certain farm practices are explained by some member. Home talent is drawn upon in furnishing much of the entertainment through readings and musical programs. The community also boasts an orchestra of its own. Speakers from outside sources are often secured, and the farm adviser is a frequent contributor to such programs.

A novel way of caring for the multitudes month after month obtains in the East Oswego club. Most of the homes are spacious and so it is customary for the meetings to be held right in the farmers' own homes. Every month a committee of three families is appointed to look after the program for the following meeting. A fund of $7.50 is given the committee to provide for whatever expense-bearing feature is considered necessary. "This arrangement," said Mrs. J. D. Ebinger, wife of the club president, "is very satisfactory, as it always brings new groups together. We are glad to say that there are no cliques in our society. Our club takes in practically all the farm families in the neighborhood, and they all work together splendidly."

Take Turns Entertaining

Whoever plays host to the gathering, furnishes the refreshments when the meetings are held in the evening. Since the members rotate in playing host, each farm family does this about once every other year. It is only during the winter months of December, January, and February that the meetings are held during the day, with a generous dinner for a feed.

Each family member over 18 years

(Continued on page 2, col. 1)

He got Enough Out of a Dead Claim to Pay His Dues 4 Years

From all sections of the state they come—letters of recognition of services rendered by the I. A. A. through its transportation department. Here is one from a LaSalle County Farm Bureau member:

"I want to thank you for your efficient work in this department. I tried through the agent at Tonica (who admitted that there was an overcharge) to get this refund then later I took it up with the South Dakota end but was informed that I was not entitled to a refund. I had about given up when I saw in our Farm Bulletin what you had done for Mr. Walcott. I then called Mr. Cross of our Farm Bureau. The right man behind the gun is what counts."

"Very truly yours,
(Signed) J. J. Hornung, Ottawa."

Mr. Hornung received a draft for $64.58, covering two claims on cattle shipments—enough to pay his farm bureau membership for the next four years. Let the I. A. A. know what it can do for you.

TWENTY-FOUR STATES REJECT AMENDMENT

Although it is still possible for state legislatures to reconsider ratification of the twentieth amendment and to rescind previous action, indications are that the child labor bill goes on record as a defeat.

Twenty-nine states have taken legislative action, ratifying or refusing ratification. Of this number 24, by various forms of action, have refused to ratify. Four have ratified. In one, New Mexico, action is incomplete, one House having approved, the other not yet acted.

The states refusing ratification are: Connecticut, Delaware, Pennsylvania, Massachusetts, Georgia, Idaho, Indiana, Kansas, South Carolina, Louisiana, Montana, Oregon, Nevada, North Carolina, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, and Wyoming. The states of Arizona, Arkansas, California, and Wisconsin have ratified. The Senate of Arkansas, the first state to ratify, adopted January 27, by vote of 30 to 3, a resolution of reconsideration and rejection.

The General Assembly of Illinois is one of the 14 state legislatures now in session that have not yet acted legislatively.

TO BUY MANURE CO-OPERATIVELY

G. E. Metzger, director of organization, reports the organization of a farmers' co-operative buying association at Anna, Union county, which will purchase manure for fertilizer purposes. The Union County Farm Bureau is backing the project.

IS IT AN APPLE OR HORNETS' NEST?

WITH THE PATIENCE OF JOB

—Hanny in the St. Paul *Pioneer Press.*

Farm Bureau District Meetings Coming Soon; To Cover Much Ground

Farm Bureau district meetings will soon be under way. The first one has already been held in the 11th district, taking place at Wheaton, DuPage County, February 26. Wm. Webb, Joliet, is executive committeeman for this district, which includes the counties of McHenry, DuPage, Kane, and Will. The speakers included A. D. Lynch and F. A. Gougler, of the I. A. A.

Other Farm Bureau district meeting dates that have been definitely settled according to the I. A. A. organization department, G. E. Metzger, director, are: March 12, Charleston, J. L. Whisnand, Charleston, executive committeman for the 19th district. The speakers are Geo. R. Wicker, general manager of the I. A. C. A., F. A. Gougler, I. A. A. poultry and egg marketing director, and R. A. Cowles, I. A. A. treasurer.

March 12: Salem, W. L. Cope, Salem, executive committeeman for the 23d district. Geo. A. Fox, I. A. A. general secretary; A. D. Lynch, I. A. A. dairy marketing director; and L. J. Quasey, I. A. A. transportation director, are the speakers.

April 10: Jacksonville, H. C. Smith, Detroit, executive committeeman for the 20th district. President Sam Thompson, A. D. Lynch, and J. R. Bent, I. A. A. director of phosphate-limestone, are the speakers.

Other dates that have been set, but without definite location, are March 13 for the 22nd district, Stanley Castle, Alton, executive committeeman; and March 27 for the 18th district, R. F. Kahr, Iroquois, executive committeeman.

GRAIN COMMITTEE MEETING

The I. A. A. Grain committee has been meeting in the general offices during the past week—behind closed doors, however. H. E. Goembel, Hooppole, I. A. A. vice-president and chairman of the committee, states that when the committee is ready, it will report.

Commerce Commission Sets Feb. 25 to Hear I.A.A. on Grain Merger

The request of the Illinois Agricultural Association of the Illinois Commerce Commission asking that a public inquiry into the Grain Marketing Company, the $26,000,000 grain merger, has been received with favor by the Commission and a hearing was set for Feb. 25 in Chicago.

The Illinois Agricultural Association officials presented evidence to show why the grain merger should be investigated and urged that the Commission make such investigation for the protection of Illinois farmers who are being solicited to buy stock. The Illinois Commerce Commission has authority to decide whether any stock comes under "Blue Sky" or not. The hearing came too late to be reported in this issue.

Export Corporation Bill Gets Favorable Advance in Congress

A telegram from Washington just as the Record goes to press states that the Farmer's Export Corporation bill (the new McNary-Haugen) has been favorably reported to the House by the Committee on Agriculture. The Senate Committee on Agriculture and Forestry has also reported the bill out favorably. A special rule to hurry the bill was also requested by the House committee. Success or failure depends upon the Rules Committee. This is a critical time! Write your Congressman and Senator!!

Shelby County Farm Bureau has had eight farm account schools to date. Four or five more coming.

Henry County imported 285 acres of limestone last year. The farm bureau handled 171 of these carloads.

NEW SECRETARY SENDS GREETING TO ILLINOIS FARMERS THRU RECORD

Jardine Fought McNary-Haugen Bill; Repeat I. A. A. Stand of "Equality for Agriculture"

Upon learning that W. M. Jardine, president of the Kansas State Agricultural College, had been picked as the new Secretary of Agriculture, the information department of the I.A.A. wired him for a statement or message to the farm bureau members of Illinois. His greeting follows:

(Underwood & Underwood)
W. M. Jardine

"I am happy to extend my greetings to the farmers of Illinois, one of the great agricultural states of the Union. I shall enter upon my duties as Secretary of Agriculture with a profound interest in the welfare of American farming and of the American farmer and with, I trust, a practical understanding of his problems, desires, and hopes. I shall bend every effort in the direction of constructive achievement for agriculture. Farming in this country may be made, I am confident, a sound, attractive, permanently profitable business such as will retain on the farms men of managerial ability and broad rural interests. It will be my aim, with the help of forward-looking farmers throughout the country, to do everything possible toward this end. I bespeak your co-operation in this work for farming and for America."

(Signed) W. M. Jardine.

It appears timely, especially since Mr. Jardine will be mailed a marked copy of this issue of the Record, that one of the resolutions of the delegates of the Illinois Agricultural Association, which repeated the stand for "Equality for Agriculture," be repeated here. It follows:

"We believe the paramount issue before the American people today to be the securing of a true equality for agriculture with industry and labor. We, therefore, direct the executive committee of the Illinois Agricultural Association to do everything in their power to secure legislation that will both in spirit and practice give such equality."

Mr. Jardine was a vigorous opponent to the McNary-Haugen bill.

Report in Which I.A.A. Had Part Arousing Keen Interest at Springfield

Keen interest is being manifested by members of the General Assembly in the report of the Illinois Educational Commission which is expected soon, together with a bill providing for the appointment of a state board of education, to have general supervision over school affairs in Illinois.

The Illinois Educational Commission was assisted materially in obtaining data for this report by the educational survey conducted by the Illinois Agricultural Association last summer. This study of the farmer's school problem is regarded by W. W. Lewton of Cicero, Ill., chairman of the Commission, as being one of the most authoritative studies ever made into the school problem in this State.

Douglas County Farm Bureau ran a series of meetings in February to study seed corn, with the help of the farm adviser.

Knox County Farm Bureau leads the state in farm bureau paid-up membership—1,304 farmers belong to it.

Montgomery County Shipping Association in 1924 handled about 300 carloads of live stock and the East St. Louis Producers handled practically all of it.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, H. E. Goembel, Hooppole.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, Wm. E. Hedgcock; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, F. A. Gougler; special representative on Tuberculosis Eradication, M. H. Petersen; Legal Counsel, Donald Kirkpatrick; Co-operative Accounting, Geo. R. Wicker.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

One Year's Tax Saving Would Run the I. A. A. for Seven Years

The feat of the Illinois Agricultural Association and the county Farm Bureaus of again saving Illinois farmers another two million dollars on their taxes is one that has made a significant contribution to the association's remarkable standing among state and national farm organizations.

If Illinois farmers had paid their taxes on the 1922 assessments, they would have paid two million more than they did. J. C. Watson, our taxation director, makes the statement that "there can be no doubt that, on the whole, the two classes of real estate, city and farm, are now more nearly on a uniform basis of valuations than has existed since the great fall in the prices of farm products and farm lands in 1920." Do not overlook the fact that the two million dollars saved in one year repeats itself so long as the same assessment remains in force.

Two million dollars spread out over the 237,000 farms in Illinois means a saving of $8.04 to each one of our Illinois farms. In other words, every farm in Illinois was saved approximately $8.04 during 1924 by the Illinois Agricultural Association and the county Farm Bureaus. This saving would run the Illinois Agricultural Association and *all* its many activities for more than seven years. And the saving is a "repeater"!

Tax reduction is only one of the activities of this association. There are other projects under way which return great dividends also, but they do not show up so well as the tax saving.

Ask this fair question of yourself: "Does the I. A. A. pay?"

—o—

Continuing Our Tax Program

Most farm bureau members know that the Illinois Agricultural Association and the Farm Bureaus began studying taxation early in 1921, at which time the assessments of farm lands and farm personal property were at their highest point. Despite the collapse in the value of farm property, further increases in valuation were proposed. Believing that the facts would not warrant any further increases, the I. A. A. and the Farm Bureaus opposed such increases. The opposition resulted in actual decreases in many instances and forestalled advances in many others.

Now Illinois farmers are getting more of a square deal in the matter of land valuation for tax assessment than they have at any time in the last five years, according to J. C. Watson, our director of taxation and statistics.

The next move is to get the Illinois revenue laws changed through an amendment to the constitution. An amendment is absolutely necessary for a fair system of taxation in Illinois. The present constitution is of 1870 vintage and needs to be brought down to date.

If desirable changes can be secured they should eventually relieve farm land and urban real estate of the unfair portion of the intolerable burden which they are now carrying in some localities. This is one of the three major legislative objectives of the association.

The gas tax is a second one, and it dovetails well with the whole program of relieving property of some of its heavy burden.

Don't let the propagandists confuse you; the I. A. A. stands for a gas tax *in place* of some general property tax. We do not want it as an additional tax; it must displace, not add.

—o—

Thank You!

There is one organization in this country that the big corporations pay considerable attention to, and that is the Illinois Agricultural Association. The time used to be when the farmer had a claim against the railroad or the express company, that it was a long drawn out matter to get a settlement started and finished. Today, through the Farm Bureau Federation and the Illinois Agricultural Association, the claim of the farmer belonging to these organizations gets prompt attention. The following story is given as an illustration:

" 'Twas the tale of a lonesome shoat. Down in Macoupin county. Defective railroad fence. Shoat wiggled through. Got killed by locomotive, or otherwise annihilated. Charles Birkenmayer, Madora, ex-owner, demands redress. Wants pay for porker. Railroad turns deaf ear. What to do! Charles notifies I. A. A. transportation department. The fun begins. Investigation made and the railroad allows a five spot. Everybody happy."

It is to the interest of every farmer in this land to belong to the farm bureau organization. The stronger the organization, the greater the benefits. —Editorial from the "Rambler," Kewanee Star-Courier.

—o—

Spring Tonic

Here is a diagnosis of one of the ailments that are sapping the strength of many farmers' organizations whether local, county, state or nationwide. We offer it as a spring tonic to be taken whether needed or not:

"Get offended if you are not appointed on a committee; but if you are, do not attend the committee meetings.

"If you are asked by the chairman to give your opinion regarding some important matters, tell him you have nothing to say. After the meeting, tell everyone how things ought to be done.

"Do nothing more than is absolutely necessary; but when other members roll up their sleeves and unselfishly use their ability to help matters along, howl that the organization is run by a clique.

"Keep your eyes open for something wrong, and, when you find it, resign.

"At every opportunity threaten to resign, and then get your friends to.

"When you attend a meeting, vote to do something, and then go home and do the opposite."—The Live Stock Journal.

—o—

Every Member Is a Direct Member

There has always been some confusion in the minds of farm bureau members and even officials as to just how the county, state and national units of the whole farm bureau organization are linked together. In Illinois it is this way:

For example, let us say that John Jones is an individual member of the Peppy County Farm Bureau. He pays his dues to the Peppy County Farm Bureau which is under contract to receive $5 per member and transmit it on to the I. A. A. Mr. Jones' services from the state association are, in turn, performed through the Peppy County Farm Bureau. Each farm bureau member is a **direct** member of the Illinois Agricultural Association although he cannot belong to the I. A. A. unless he belongs to his county Farm Bureau. The I. A. A. is not a federation of counties.

However, the Illinois Agricultural Association is one of a federation of states which form the national unit, the American Farm Bureau Federation. The I. A. A. pays dues to the American Farm Bureau Federation at the rate of 50 cents for each of its members.

Remember this point: Every farm bureau member is a **direct** member of the Illinois Agricultural Association and it is **not** a federation of counties.

What's Wrong in This Editorial?

(Answer at bottom of page.)

The Illinois Agricultural Association reports a membership of sixty-five thousand farmers and a net worth of fifty thousand dollars. Among other things, this association is undertaking the organization of the co-operative movement among farmers of the state. Those who are remaining away from the county Farm Bureaus for one reason or another, soon are going to find themselves isolated and very lonesome.—Springfield State Journal.

—o—

Are You Classified Here?

An Attender—One who attends the meetings called by the Bureau.

Booster—One who speaks well of the Bureau on all occasions.

Doer—One who tries to follow the suggestions of the Bureau.

Friend—One who recognizes that the Bureau is trying to help the farmers.

Helper—One who answers the letters of inquiry from the Bureau.

Pillar—One who calls for help from the Bureau when he needs it.

Power—One who is the leading farmer of the community and is a member of the Bureau.

Promoter—One who is enthusiastic in his support of the Bureau and tells his neighbors of its work.

Server—One who accepts an office and tries hard to fill it.

Soldier—One who comes out when the Bureau is trying to show its strength.

Supporter—A landlord who belongs to the Bureau.

Wing—One who has a vision of the future of the Bureau.

Worker—One who comes, phones or writes to the office to give us helpful suggestions.

There with the Goods—One who has faith in the Bureau in face of failures.

Bucker—One who speaks evil of the Bureau on all occasions.

Deadhead—One who will not try anything suggested by the Bureau.

Faultfinder—One who finds fault with the Bureau's efforts to help the farmers.

Plague—One who asks for help when too late to do anything.

Hinderer—One who does not answer letters of inquiry from the Bureau.

Problem—The leading farmer of the community who does not belong to the Bureau.

Provoker—One who is indifferent in his support of the Bureau.

Sorehead—One who refuses to accept any office in the Bureau.

Slacker—One who will not turn out to help show strength.

Sponger—A landlord who does not belong, but whose tenants do.

Weight—One without a vision of the future of the Bureau.

—Whiteside County Farmer.

Be a Regular Patron

Whenever I happen to be in a city about meal time, I look for a good cafeteria. At such a place everything is to be found which tempts the palate. I gather my tray, necessary eating paraphernalia, and saunter slowly alongside the numerous palatable dishes. Here I take a plate of beefsteak, there a dish of salad, a piece of lemon pie, and so on until I finally round the corner and reach the teller. He checks quickly my dinner bill and the cash register emits a figure which startles me.

I glance over my shoulder toward some of the regular customers to see whether I have an honest to goodness country appetite or just why my bill should be so high. The inspection shows that the "regular" has just about the same amount of food that I have but his dinner bill is considerably less.

He was on his job and bought more efficiently than I. Why? Because he was a regular patron and was acquainted with food values in the cafeteria. I was not, thus he had me bested.

In the same manner, practically all farm bureau members agree that the farm bureau movement is an excellent thing, just as I do a cafeteria. However, some members get much more out of their memberships than others because they are regular patrons. The Farm Bureau is a **farm problem cafeteria.** We shall endeavor always to serve you courteously and efficiently. Strive to be a **regular patron.**—W. B. Bunn in Richland County Farm Bureau News Letter.

—o—

Answer to "What's Wrong in This Editorial?"—In the telegraphic transmission of one of the news stories which went out from the annual I. A. A. meeting, some of the figures got mixed up. Consequently many newspapers reported that the "net worth is $50,000." This is an error of $203,910.07. The balance of the Illinois Agricultural Association on Jan. 1, 1925, as found by independent auditors, was $253,910.07. Also, the membership really numbers closer to 63,000 rather than what is stated—and besides, it's 63,000 *thinking* farmers—not ordinary ones. The "isolated and very lonesome" part is strictly O. K. The spirit of the editorial is splendid and the errors are not the fault of its writer. Thank you, Springfield State Journal.

PREDICT MEMBERSHIP TO JUMP FROM 63,000 TO 75,000 THIS YEAR

COMMUNITY CLUBS SHOW LIVE SPIRIT

(Continued from page 1)

of age pays $1.00 per year to defray club expenses. The officers of the East Oswego Progressive Farmers' Club are: J. D. Ebinger, President; Zella Shoger, Vice-president; Courtney Smith, secretary; Mrs. Ed. Rink, treasurer; Mrs. Irwin Wolf, corresponding secretary.

J. D. Ebinger

Cares for the Sick, Too

The club has a unique extension project called the committee on sympathy and relief. Its object is to make sick calls among members of the community.

Ask any member of this club as to the best thing the organization does for the people and he will tell you that the sociability fostered by the meetings is the big thing they all have learned to appreciate. We asked Mr. Burkhart what he liked best and he said that "the club meetings knit the farm families together and make for better understanding." Coming to Oscar Shoger a little later and getting him started on the benefits of the club to the community, we heard this: "We all feel like one farm family and we like the meetings at the members' homes best. One member who was not a Farm Bureau member has dropped out. All the rest are loyal I. A. A. supporters."

Plenty of Eats

When asked what part the women play in the activities of the club, Shoger said, "They do the feeding. We always make it a point to invite any new neighbors in the community. Our programs have included senators, ministers, farm advisers, and members of the medical profession. We really like everything best. And no matter how rainy it may be, or what the weather is, there always is plenty of interest in the club and its doings."

The President Interviewed

We felt our day would not be complete without a word from the president of the Oswego society. Mr. Ebinger has resided in the community for 36 years. He said that the pioneer spirit, the spirit of settler days, when neighbors worked together for the common good, is coming back and that the community club is one of the ways to get this spirit back. He stressed the sociability feature of community club work and stated that the young people give the club strong support. "The club is a fine thing for the community, as it helps to knit together all the classes. There is no distinction among us. Rich and poor alike belong to the club. The ministers in our community are with us in our club affairs. The boys and girls, too, are helped to stay with the farm and they begin to see the advantages of farm life."

Another Club Visited

We did not limit ourselves to just one club in Kendall county but also got a brief slant at the Fox and Long Grove Community Club of Yorkville. This club was organized in 1921 and now has a membership of 35 to 40 families residing around Yorkville. It includes several retired farmers in Yorkville. The club, we were told, is for young and old. Everybody likes it. While it had a harder time getting started than many other farmer clubs do, the group nevertheless soon got well established and is there to stay.

Each member pays one dollar a year to support the organization. The meetings used to be held in the members' homes but these later grew too small to accommodate the gatherings—around 100 on the average. A community hall in Bristol is now being used—an abandoned church—and meetings are held once a month. These meetings include musical programs, speeches, discussions, and readings. Home talent is drawn upon and the development of this phase is one of the aims of the group.

What They Get Out of It

We asked several staunch supporters of the Fox and Long Grove Community Club what they thought was the big advantage of having a society like this in their community and invariably the answer came back, "Sociability and understanding among farm families and townspeople is the achievement of our club. An organization like this can do much and is doing a great deal to create a better feeling among all people concerned."

E. L. Matlock, president of the Kendall County Farm Bureau, is a loyal rooter for the club idea. When asked what effect the community club has with the young people, he said, "Too many boys and girls are leaving the farm for the city and they don't know the good things they are leaving behind them. But the community club is doing much to counteract the influence of the big city, and to keep the coming generation on the farm."

Mr. Matlock's Views

Mr. Matlock showed us his newly-built hennery which we found the last word in sanitation and chicken comfort. Then he added, "We need a higher standard of living on the farm and a better rural life if we want agriculture to be what it should. To get there, farmers must organize and the community club is one way to put this across, as it helps much to keep farm people together."

That the farm women of the territory around Yorkville are 100 per cent with the club is shown by the fact that a woman, Mrs. Clara Harris, is president; Ed. Price is vice-president; and Mrs. Jennie Ament is secretary-treasurer.

Farm Adviser Price is well satisfied with the results accomplished by his farmer clubs. There are nine in his county and each of them is a great help to him. Home ownership runs high in Kendall county. This, and the fact that most of the farmers are Farm Bureau members, says Price, are two good reasons, why the community clubs have prospered. The county is full of well-kept farmsteads and comfortable farm homes. The people mix well as a rule and there is harmony between farmers and townfolks.

Lots More, Too

In addition to the two clubs mentioned, Kendall County has the following farmers' clubs: Bristol Progressive Farmers' Club, Countryside Community Club, Grove Road Farmers' Club, Little Rock Farmers' Club, Na-Au-Say Farmers' Club, Southern Kendall Community Club, and Newark Farmers' Club. Besides these regular community clubs there are several parent-teachers' associations, some of which have spread beyond the school district limit. These, too, says Price, are very popular.

Soil improvement is Price's big project and with it goes the better crop program. Phosphate fertilizer has been applied to Kendall county soils in large quantities. The type of farming in the county ranges from dairying in the northern part to grain farming in the southern part — all within an area three townships square.

We left Kendall county with the thought, "No wonder Kendall county is full of happy farm homes."

Here's Food For Thought; Get Out Your Pen and Ink!

Food for thought for farm bureau members is contained in the following booklets which can be obtained free by writing for them:

"The Agricultural Situation — Past and Present," an address by Chas. J. Brand, consulting specialist in marketing, U. S. Dept. of Agri., before the I. A. A. annual meeting at Champaign. (Write care of Record.)

"The Discussion of Grain Marketing" as given at the I. A. A. annual meeting. (Write care of Record.)

"Agricultural Relief," consisting of hearings before the Committee on Agriculture, House of Representatives, Serial CC-Part 13. (Write your Congressman for this one.)

"The McNary-Haugen Bill," consisting of joint hearings before the Committee on Agriculture and Forestry, United States Senate, and the Committee on Agriculture, House of Representatives, on S. 4200 and H. R. 12127, Jan. 21, 1925. (This is the Farmers' Export Corporation bill. Write your Senator or Congressman.)

The hearing testimony in the latter pamphlet includes the testimony of the American Council of Agriculture. President Thompson's statement for Illinois farmers is in the latter. "Agricultural Relief" contains the testimony of Geo. N. Peek, Moline, Ill., president of the American Council of Agriculture, in which he charged that Secretary of Commerce Hoover has been dominating the Department of Agriculture. He asked for an investigation.

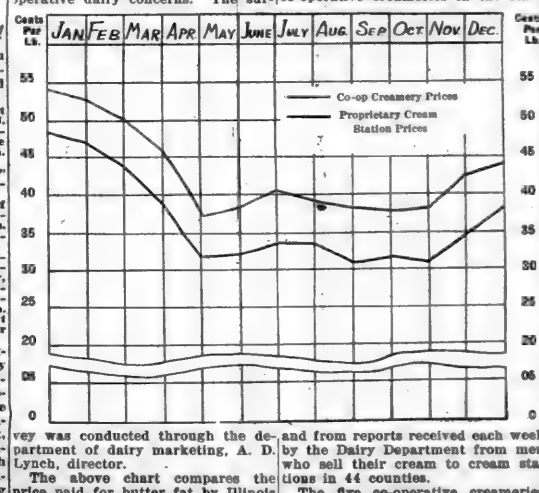
GRADING DEMONSTRATION BRINGS THE STOCK YARDS TO THE PRODUCER," DOWN-STATE SHIPPERS LEARN AT HOME

Marshall Co-operative Shipping Association Holds Successful Live Stock Grading Demonstration. Movement Getting More and More Popular. Seen as One Solution to Shipping Problems

They Graded the Carload at Marshall

Live stock grading at the home shipping yards is on the up-grade in Illinois. The movement started in Champaign county last December. Since then, about six live stock grading demonstrations have been held in various parts of the commonwealth and indications are that the movement is just beginning to gain in popularity as more and more counties are instituting them. Adams county alone has arranged for four demonstrations in one week.

One of the most recent live stock grading demonstrations was at Marshall, Clark county, W. W. Merritt, farm adviser. A carload of cattle and hogs was graded at the local shipping yards, before officers and directors of the Marshall Co-operative Shipping Association and the county Farm Bureau. About 40 to 50 shippers were present to witness the demonstration, which was conducted by F. H. Kelly and Robert Griesser, representing the Indianapolis Producers Commission Association. These men pointed out the different grades of stock in the carload, endeavoring to show the men what constitutes good and poor veal calves. They also pointed out what good and bad features to look for in hogs and cattle generally, as to market grades.



T. R. Lovett, manager of the local shipping association, declares the demonstration very successful, stating that the plan was an effective way of "bringing the stock yards to the producers."

"One of the problems in shipping association work," says Wm. E. Hedgcock, I. A. A. live stock marketing director, "has been the lack of understanding on the part of the shippers, of the grades of live stock marketed. Now comes the grading demonstration plan. It is a most satisfactory way to show the live stock producers how stock is graded at the terminal markets and it helps them to apply the same process at home—before the stock is in transit.

"The I. A. A. live stock marketing department recommends holding live stock grading demonstrations thruout the state, wherever possible. It has asked the Producers to co-operate with the county farm bureaus and the shipping associations in this project. Farm Bureau and shipping association officers and directors especially will find these demonstrations of advantage as they then can assist shippers in their marketing problems generally."

DAIRY SURVEY SHOWS CO-OPERATIVES HOLD ADVANTAGE OVER PROPRIETARIES

Results of the butter fat price inquiry, carried on by the I. A. A. for the first time in 1924, reveal an interesting comparison between prices received by co-operative and non-co-operative dairy concerns. The survey was conducted through the department of dairy marketing, A. D. Lynch, director.

The above chart compares the price paid for butter fat by Illinois co-operative creameries with the price paid for butter fat by Illinois cream stations operated by proprietary creameries.

The data for this comparison has been compiled from reports of all co-operative creameries in the state and from reports received each week by the Dairy Department from men who sell their cream to cream stations in 44 counties.

The five co-operative creameries studied are the Mt. Carroll Co-operative Creamery, the Ill-Mo Dairy Company, the Stephenson County Co-operative Marketing Company, the Elizabeth Co-operative Creamery, and the Galena Co-operative Creamery.

Farmer-owned creameries paid their patrons between 5c and 6c more per pound of butter fat than the cream stations. Creamery butter fat returns were from 15 per cent to 20 per cent higher.

"Where local conditions do not justify the formation of a co-operative creamery," Lynch advises, "farmers desiring to co-operate can effect a substantial saving by operating their own cream station and selling the cream to the highest creamery bidder."

ROLL CALL WILL SHOW BIG GAINS IN STATE NUMBERS

Forty Illinois Counties Will Renew Membership in 1925; Nine Counties Are Now Under Way

Forty Illinois counties are scheduled for renewal of membership in the Farm Bureau and the I. A. A. in 1925, according to O. E. Metzger, I. A. A. director of organization. The task of renewal, Metzger says, is already well under way in nine counties: Warren, Edgar, Shelby, Knox, Grundy, DuPage, McHenry, Christian and Henry.

"Farm bureau membership in the I. A. A. is sound," the organization director declares. "By the end of the year we expect to have 75,000 Illinois farmers on our membership list."

The list of counties in which farm bureau membership is to be renewed this year follows:

County	Membership Expires
Warren	June 1925
Edgar	July "
Logan	July "
McHenry	July "
DeKalb	Aug. "
Christian	Sept. "
Clark	Sept. "
Coles	Sept. "
Macon	Sept. "
Stephenson	Sept. "
McLean	Oct. "
Moultrie	Oct. "
Henry	Nov. "
Livingston	Nov. "
Effingham	Dec. "
Grundy	Dec. "
Brown	Jan. 1926
Champaign	Jan. "
Crawford	Jan. "
DuPage	Jan. "
Jersey	Jan. "
Kane	Jan. "
Knox	Jan. "
Lake	Jan. "
Marshall-Putnam	Jan. "
Mercer	Jan. "
Randolph	Jan. "
Rock Island	Jan. "
Saline	Jan. "
Shelby	Jan. "
Vermilion	Jan. "
Whiteside	Jan. "
Will	Jan. "
Woodford	Jan. "
Peoria	Jan. "
Kendall	Feb. "
Union	March "
Sangamon	March "
Macoupin	March "
Fulton	March "

In addition to the above the following may possibly come up for renewal: DeWitt, Lee, Macon, McDonough, Menard, Morgan, Williamson, and Montgomery counties.

In Iroquois county, where the work of reorganization has been going on since October, 1924, and where the old membership does not expire until April 1, 1,375 members have been signed up to date.

Says "Nobody Home" to Grain Merger Idea; Likes Farm Bureau

The following vote of confidence was received by Secretary Fox from a Jo Daviess county farmer:

"As a member of this great association, the I. A. A., allow me to give my opinion.

"Every department has done its duty to the association.

"It is a pleasure to have Mr. G. E. Metzger outline programs for us. We of Jo Daviess county should try and follow.

"Mr. S. H. Thompson shows much spirit in taking the stand against the Grain Marketing Company. The old boys of big interest are trying to unload $26,000,000 worth of junk on to the farmers. We say 'nobody home' to that.

"Yours,

(Signed) "H. N. Riplinger."

TWO MILLION DOLLAR TAX SAVING AVERAGES $8.04 PER FARM

INTRODUCE T. B. BILL TO COVER NUMEROUS SINS IN CLEAN-UP WORK

Representative Tice Sponsors Legislation to Keep Statutes Abreast with Clean-up Fight

A general re-codification of existing legislation pertaining to the eradication of tuberculosis in cattle covering a multitude of sins is provided for in a bill that has been introduced in the House of Representatives at Springfield by Homer J. Tice of Greenview, Menard county. This bill was suggested by the Illinois Agricultural Association and is in accordance with the legislative program which consist of three major objectives, this being one of them.

The new bill is drawn to bring out-of-date legislation on tuberculosis eradication up-to-date and to keep the legislative channels abreast with the present day remarkable development of the state-wide clean-up work. With approximately 2,000 cattle being subjected to the test each day in Illinois, it is highly desirable that this great public health movement go ahead without hindrance, according to Representative Tice.

"The new bill," says M. H. Petersen, in charge of tuberculosis eradication extension for the I. A. A., "is a re-codification of existing legislation on this subject with a number of important additions to cover much-demanded needs on the part of farmers and live stock raisers from all over the state.

Restricts Tuberculosis Serum

"Among the new features is a provision which places the sale of tuberculin, the serum used in the testing, in the state under the jurisdiction of the State Department of Agriculture and limits its use to licensed veterinarians. Veterinarians will also be required to tag and brand all tuberculous cattle found if the proposed measure becomes effective. There has been considerable laxity on this score."

Closer supervision of cattle brought into Illinois for breeding and dairy purposes is also proposed. While more stringent requirements will be imposed on cattle to be shipped from stock yards to be tested at their destination, care has been taken to include nothing which will restrict the feeding industry in the state. A 60-day retest is also required for cattle brought into the state for dairy and breeding purposes.

The demand for a compulsory testing law from many counties has led to the inclusion of a provision requiring all the cattle in any county to be tested when 75 per cent of the cattle owners in the county have voluntarily submitted their herds for a test.

STEPHENSON COUNTY WINS ROAD DECISION

Ridott, Stephenson county, will continue as a railway station. The Illinois Commerce Commission says so. A hearing was held in which the Chicago and Northwestern Railroad Company petitioned to be allowed to discontinue the station. J. H. Swanzey, representing farmers in the vicinity of Ridott, and the local live stock shipping association as its president, had his evidence very comprehensively prepared. With the help of the I. A. A. transportation department, this went a long way toward getting favorable consideration from the Commission in handing down its decision.

PRODUCER FACTS

$122,507.67 is the total saving during 1924 to shippers to the Producers Live Stock Commission Association at National Stock Yards, Illinois.

The Chicago Producers Commission Association points out the following as essential features of successful co-operative shipping associations: First, a co-operatively-minded board of directors, who actually direct; who meet at regular intervals, and assist the manager in working out any problems which arise. Second, a capable manager, in sympathy with co-operative marketing—a real booster. Third, a membership who are 100 per cent behind their Organization and who believe in co-operation.

DIFFERENTIAL IN EGG QUALITY NOW TO BE SHIFTED TO PRODUCER

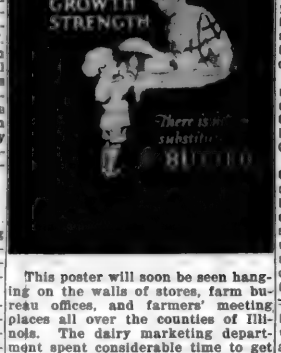
National Standardization of Egg Grades Will Prove a Boon to Farmers, Says I.A.A. Authority

Grading of eggs on a uniform basis of quality will soon be the order of things on most egg markets thruout the United States, according to the I. A. A. poultry and egg marketing department, F. A. Gougler, director.

A practical plan has been devised by the federal Bureau of Agricultural Economics, by which all egg grading systems used are to be adjusted and aligned into one uniform system. The new system has been accepted by the egg trade generally and will be used as a standard guide everywhere within a few years. These grades are: (1) U. S. Special; (2) U. S. Extra; (3) U. S. No. 1; (4) U. S. No. 2; (5) U. S. No. 1 dirties; (6) U. S. No 2 dirties; (7) U. S. Checks.

"It will be well for the Illinois egg producer to get familiar with these terms and learn their full meaning," says the I. A. A. egg marketing department, "as he will now have the advantage of getting paid on the basis of quality. If U. S. Extras are worth, say, 10 cents per dozen more on the New York market than U. S. No. 1's, then the producer should receive the same differential at his local market.

"Co-operative marketing of eggs will bring this differential down to the producer from the consumer in the best and quickest possible way, because co-operatively, eggs will be handled on the graded basis and producers will receive pay on a quality basis."



ILLINOIS VILLAGES AND TOWNS SLATED FOR BUTTER DRIVE

I. A. A. Dairy Department Plans Campaign to Increase Use of Butter and Reduce Surplus

"Spread your butter a little thicker."

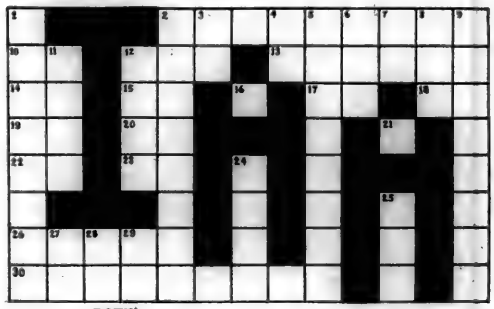
That's the motto chosen by the I. A. A. dairy marketing department, A. D. Lynch, director, in a campaign to be started throughout Illinois to increase the consumption of butter on the farms and in the centers of population.

And here is the poster!

This poster will soon be seen hanging on the walls of stores, farm bureau offices, and farmers' meeting places all over the counties of Illinois. The dairy marketing department spent considerable time to get a real poster, and it now feels that it has one that will do the job up brown.

"A survey made several months ago through the co-operation of 33 county Farm Bureaus," says Lynch, "brought home more clearly than anything else the observation that not enough butter was used in the majority of Illinois counties studied. The survey also disclosed the fact that farmers, including dairymen, were almost as heavy users of oleo as town and city dwellers."

The poster will have a kid brother to play sidekick in the campaign. Plans have been drawn for a little placard which can conveniently be hung in the farm kitchen. It reads: "No butter substitute used in this home. Our family believes in good butter for health, growth, strength." It will be distributed to farm families through the county Farm Bureau offices.



FOR 63,000 *THINKING* FARMERS

Cross-Word puzzles. Who doesn't fall for them? Here is the first one appearing in the Record. How many of our readers can solve it? Can you?

The correct answers will appear in the next issue of the Record. Watch for them.

The white spaces in the puzzle represent words, running horizontal and vertical, the synonyms and descriptions of which are to be found in the list below. Each synonym is numbered and corresponds to the number in the puzzle. The black spaces may be regarded as periods.

When completed the letters will spell out recognized words, running from left to right and from top to bottom. Most of the words in the accompanying puzzle refer to farming.

DOWN

1. The I. A. A. membership consists of 63,000 - ? - farmers.
2. National legislative body.
3. Oh Gee!
4. Father.
5. What the Farm Bureau does for the agricultural industry.
6. The farmer's mail service.
7. Abbreviation for earliest American war.
8. A good sized litter of pigs.
9. What the College of Agriculture does for farmers.
11. Remain.
12. An area of tilled soil.
16. The person you most appreciate.
21. You.
24. Something of which we never get enough.
25. An organization of 63,000 *thinking* farmers.
27. Adverb, preposition and conjunction.
28. Adverb, prefix and preposition.
29. Third person, singular, present indicative of verb "be."

ACROSS

2. What every farm bureau member should do.
10. Abbreviation for common place of learning.
12. A heavy mist.
13. "Al's" full name.
14. Pronoun denoting a thing.
15. Indefinite article.
17. What Edward's boy friends call him.
18. Abbreviation of institution of advanced learning situated at Evanston, Ill.
19. Abbreviation of great continent in northern hemisphere.
20. Abbreviation for football player's position.
22. Abbreviation for state where burley tobacco producers are co-operating to market their products.
23. A title of address for a man.
26. Obsolete form of word "notice."
30. Noun meaning opposite of net.

SEVEN FARM BUREAUS GET EXEMPTION FROM FILING TAX RETURNS

I. A. C. A. and County Farm Bureau Offices Instrumental in Negotiating Tax Exemption

Seven county farm bureaus to date have been granted exemption from filing income tax returns, following the I. A. C. A. application for such exemption.

Hancock county leads the state by being the first to receive such exemption. The other farm bureaus that have been favorably notified are Clay, Coles, Ford, Henderson, Iroquois, and Pulaski counties.

George R. Wicker, I. A. A. co-operative accounting director and general manager of the Illinois Agricultural Co-operative Association, points out that this action establishes a precedent for all similar organizations, as the farm bureaus exempted are saved the annoyance of making returns on income tax each year. He calls attention of those farm bureaus who have not yet filed application for exemption, and urges them to take the necessary steps to do so at once.

This may be done by sending the necessary information to the headquarters at 608 So. Dearborn Street, Chicago, from where application will be made to the Internal Revenue Commission.

There have been filed with the Collector of Internal Revenue applications for exemption of the following additional farm bureaus: Grundy, Kane, LaSalle, Livingston, Madison, Monroe, Scott, Stark, and Vermilion counties. Other applications are now being forwarded to more county farm bureaus for the signatures of their officers.

Negotiations Are Under Way to Buy Fertilizer For Bureau Counties

The phosphate-limestone department of the I. A. A. has been on the go the last few weeks—hot-footing it downstate most of the time. Director J. R. Bent has spent considerable time in southern Illinois, calling on the Charles Stone company at Marion, also the Lehigh Stone company at Kankakee, advancing negotiations for the 1925 limestone agreement. On February 24 he attended a meeting of all the limestone producers at St. Louis. Business called him to Peoria following the St. Louis meeting.

The phosphate agreement is nearing its final form and it is expected that there will be a meeting between the department and the various phosphate producers either in Chicago or at Nashville, Tennessee, at the first opportunity in the future.

LISTEN IN!

The Illinois Agricultural Association has arranged for the following speakers on KYW's evening programs for March:

Tuesday, March 3—Curt Anderson, Xenia, Ill., manager of the Red Top Growers, Inc., and executive committeeman of the Illinois Agricultural Association, on "Co-operative Selling of Red Top."

Thursday, March 5—W. H. Moody, Port Byron, Ill., executive committeeman of the Illinois Agricultural Association, on "Interesting the Women on the Farm."

Friday, March 31—Wayne Hummer, President of the Illinois Bankers' Association, Chicago, on "When Farmers and Bankers Get Together."

I. A. C. A. KEEPS GROWING

The last co-operative to join the Illinois Agricultural Co-operatives Association, according to Geo. R. Wicker, I. A. A. accounting director, is the Farmers' and Grange Fire Insurance Company of Alta, Peoria county. This brings the total membership in the I. A. C. A. up to 138 farmer co-ops within nine months of the establishment of the association.

138

A recent farm and community meeting in Ogle county had an attendance of 200 people.

DIVIDE THE $2,000,000 BY THE 237,000 FARMS AND IT'S $8.04, SEE?

Saving Will Be Repeated Until Valuations Are Changed; Only Few Counties Out of Line Now

The two million dollar tax saving secured by the I. A. A. and the county Farm Bureaus and pocketed by the great group of Illinois farmers, if it were apportioned out among the 237,000 farms of the state, would mean an average saving of approximately $8.04 per farm, ordinary arithmetical division reveals. However, this figure is not the actual amount of reductions per farm—it is the average for all the state. The saving is, as a matter of fact, considerably larger in some counties than in others.

This saving applies not only to members of the Farm Bureau who financed and made possible the fortuitous saving, but it applies to members and non-members as well. "Lots of farmers are riding and not paying for their share of the gas," is the truth of the situation.

Valuations of different classes of property are now on a fairer basis than they have been at any time in the past five years, according to J. C. Watson, director of the department of taxation and statistics. There are only a few counties left in which farm property is known to be assessed on a much higher percentage of its value than other kinds of property.

Saving Will Be Repeated

"The saving of over two million dollars in the farm property tax bill in 1923 is likely to be maintained this year, and this will probably be true every year until valuations are changed," says Mr. Watson.

HOG CHOLERA TO RECEIVE SERIOUS SETBACK BY SERUM

Eradication Under Way as Serum Companies Confer with Farm Bureau Serum Association

Hog cholera in Illinois is under continuous fire and will be undermined from all sides this year, according to Wm. E. Hedgcock, director of live stock marketing for the I. A. A. Serum, it is averred, will do it.

The board of directors of the Illinois Farm Bureau Serum Association, including Wm. E. Hedgcock, I. A. A., met recently with representatives of eight serum companies to receive bids for the 1925 supply of serum for the Farm Bureaus. The I. A. A. expects to be able to give the information as regards the price within a few days.

"The serum companies all showed a fine spirit and expressed their appreciation for the way the Farm Bureaus were handling the serum contracts," says Hedgcock. "The agreement which the serum companies in Illinois, Iowa, Missouri, and Indiana, represented at the meeting were asked to sign, met the approval of all representatives present. The companies agreed unanimously to do no soliciting in any Illinois county until after the expiration of a three-weeks' period, the date of expiration to be announced by the board of directors. This is done in order to give the serum association officers an opportunity to present their findings to all counties interested in serum contracts."

Farmer vaccination of hogs, as promoted by the county farm bureaus, has proved itself satisfactory and successful, Hedgcock declares.

The Farm Bureau Serum Association has been inspecting some of the serum plants and expects to make a report soon.

Farm management, the McLean county system of hog sanitation, T. B. eradication, soil improvement, club work, farm visits, seed improvement, and purebred seeds make up the major projects for Woodford County Farm Bureau in 1925.

Pulaski County Farm Bureau has a soil fertility committee. The committee plans to carry out a sweet clover campaign in the county, to last over several years. Already 2,600 pounds of sweet clover have been ordered this year as compared with 200 pounds in 1924.

ACCOUNTING SCHOOLS PROVE THEIR WORTH FOR SHIPPING CO-OPS

Series of Twelve Schools Held in February by State College and I. A. A. Bring Out Discussion

Five hundred thirty-three Illinois farm advisers and managers and directors of live stock shipping associations were present at the accounting schools held for shipping associations in 12 districts throughout the state in February. The meetings were held under the joint auspices of the College of Agriculture, University of Illinois, E. T. Robbins, live stock extension specialist, and the I. A. A. department of live stock marketing, Wm. E. Hedgcock, director.

Sixty-five counties and 186 of the 526 live stock shipping associations in Illinois were represented at these meetings, which the I. A. A. department states were very successful in bringing the matter of improved accounting to the attention of those attending. Representatives of the three Producers Commission associations operating in Illinois also were present. The highest attendance reached was at Galesburg, where 103 came to the meeting.

Among the matters discussed at the meetings it was pointed out that to make shipping associations successful, the boards of directors ought to meet monthly. Both manager and membership, it was felt, must be co-operative-minded. That the shipping association is dependent upon the parent association, and to be successful must realize its dependency upon the parent, was another point brought out. In Illinois, it was stated, the farm bureau is responsible for the establishment of most of the shipping associations.

Point Out Many Things

Fifty directors of shipping associations talked at these meetings concerning the need of continued reliance upon the Farm Bureau for leadership. Many of them pointed out the need for having a shipping association's policies directed by its officers and that the manager needs their active co-operation in planning the work so as to serve the members to the best advantage. Both directors and managers indicated that it is necessary for managers, in rendering service, to be on deck when live stock is received, and personally weigh and mark all shipments. The efficient manager, it was brought out, should carry a notebook and keep a list of the live stock to be marketed from his community.

Managers of shipping associations, it was further declared, should not overload their shipments, as this leads to crippling and killing of stock; and underloading, similarly, increases the costs of marketing.

Another fact brought out was that many shipping associations confine their membership to farm bureau members and that a service charge of five to ten cents per hundredweight is charged to non-members in most counties.

Expect Healthy Growth

The shipping association business, it was foretold, should experience a healthy growth in 1925. Direct shipping of stock to the packers was denounced as detrimental to the co-operative marketing movement. The work of the Producers, it was stated, is gaining.

Both old and new system accounting supplies may be secured from the I. A. A. office, Hedgcock declares. Sheets, binders, and forms are available there.

SAM IS HONORARY MEMBER

After explaining the advantages of creating a farmers' export corporation at a Farmers' Day held by the Quincy Kiwanis club, Sam H. Thompson, I. A. A. president, was made honorary member of Kiwanis by a unanimous vote of the members present.

PACK UP YOUR TROUBLES AND SMILE

Beecher City Wins Live Stock Safety Loading Contest

First place in the safety loading contest for co-operative live stock shipping associations in Illinois, sponsored by the transportation department of the Illinois Agricultural Association, L. J. Quasey, director, goes to the Beecher City Shipping Association, Effingham county. The contest was carried on in co-operation with the Chicago Producers Commission Association, the Producers Live Stock Commission Association of East St. Louis, and the Producers Commission Association of Indianapolis, Indiana, and was open to all Illinois shipping associations shipping at least 20 cars of livestock to any of the three Producer agencies between the dates of July 1 to December 31, 1924.

The Beecher City association won the silver trophy offered by the Illinois Agricultural Association with a record of only $1.45 loss, or .004 per cent of $29,031.84, the value of the 22 carloads of stock shipped to the Indianapolis Producers agency. Second place goes to the Rockport Shipping Association, with a record of .009 per cent loss, or $4.00 out of $40,594.82 in 27 carloads shipped to the East St. Louis market, and third place to the North Henderson Shipping Association, with a record of .01 per cent loss, or $3.40, out of $33,728.67 in 22 carloads shipped to the Chicago Producers. Other shipping associations coming under the .04 per cent loss mark are: Crawford-Jasper, Oblong, Illinois, .015 per cent loss; Tabor, .025 per cent loss; Lawrence County, Lawrenceville, .033 per cent loss; and the Martinsville Co-operative Shipping Association, .039 per cent loss.

Seventy-one Co-ops Entered

Shipments of live stock in the entire contest from 71 Illinois shipping associations qualifying, totaled $3,661,379.60 in value, with .13 per cent loss, according to the I. A. A. "The contest," says Quasey, "aroused great interest on the part of shipping managers in handling and loading stock. The matter of good care and sound judgment in handling and loading live stock at the local stock yards cannot be emphasized too strongly and the safety loading contest is an effective means of bringing it to the attention of live stock shipping association managers.

"The contest is another step forward in the marketing of Illinois live stock," the I. A. A. department concludes.

Radio, Favorite Indoor Sport, Carries Romance All its Own—Anderson

"Radio is proving its worth down in Clay county," Curt Anderson, I. A. A. executive committeeman from the 24th district, told us when in the office the other day. "Take it in just three townships around my home, Xenia. A year ago there were just two receiving sets on farms there. Now there are around 50 farm sets."

Anderson told us the romance of his own set, which he acquired last September. "On the day after I installed the thing, I hauled a truckload of 14 hogs to St. Louis. Before I left I told my wife to tune in on the stock yards for hog quotations but never thought of my own pigs. When I got back home I said, 'Bet you don't know what the hogs brought.' 'Guess I do,' says my wife, 'fourteen lights topped the market at 10.65.' 'Them's mine,' says I, 'how did you find out?' 'Well,' she comes back, 'what did you put that radio in here for?'

"Once in a while neighbors call me up and ask about quotations. I tell 'em to wait, the loudspeaker is right handy, and then edge the thing up to the telephone."

LISTEN IN!

The following speakers representing the Illinois Agricultural Association are scheduled to talk over WLS.

Wednesday, March 25, 8:40—F. A. Gougler, director of poultry and egg marketing, on "Poultry Conditions as I Found Them in Wayne County."

Wednesday, April 1, 8:40—President S. H. Thompson on "Changing Agriculture."

Friday, April 3, 8:40—Vice-President H. E. Goembel on "What do Farmers Really Want in Grain Marketing?" Mr. Goembel is chairman of the grain marketing committee of the I. A. A.

SPECIAL MEETING OF FARM BUREAU PRESIDENTS, SECRETARIES AND ADVISERS SET FOR MARCH 17 AT SPRINGFIELD FOR BIG HEARING ON T. B. BILL

Executive Committee Has Busy Two-Day Session; Reports of All Departments Approved; Much Legislative Work Under Way—Gas Tax Bill to Displace State Aid Road Tax to be Introduced

A special meeting of representatives of each of the 92 Farm Bureaus in Illinois has been called by the executive committee of the Illinois Agricultural Association to take place March 17 at Springfield. The meeting is called for the purpose of discussing the I. A. A. legislative program, particularly as regards the tuberculosis eradication bill which has been introduced by Representative Tice of Menard county. A hearing on this bill has been set for the same day. The executive committeemen will attend the meeting at Springfield.

A busy two-day session marked the regular monthly meeting of the executive committee, March 5 and 6. On Thursday, March 5, the executives heard from each of the 13 department directors who told of the work that has been done and that is now under way or contemplated in these several departments. In addition, on Thursday evening a "get-acquainted" dinner was held for the purpose of making the new committeemen more familiar with officers, brother committeemen and directors. On Friday the executives approved all the work being done by all the departments. Following are the high spots of the two-day session:

What They Did

1. Heard of the work of each of the departments and approved it.
2. Decided to call all farm bureau presidents, secretaries and farm advisers into a special meeting to be held at Springfield, March 17, for the purpose of considering first-handed the legislative program of the association. Those interested in tuberculosis eradication work will attend a hearing on the Tice bill which re-codifies and strengthens the bovine tuberculosis laws of the state. The bill as drawn will place Illinois on a real business basis and gives Illinois farmers a tuberculosis eradication law which is superior to any law that has been enacted in the United States.

"This bill is receiving opposition from certain individuals and groups interested in defeating the tuberculosis eradication program in the state," the notice of the special meeting reads.

3. The legislative committee reported progress on the three major legislative desires for which the I. A. A. is standing. The bill on tuberculosis eradication has been introduced by Representative Tice and the second hearing will be on March 17.

Amendment Is Brewing

The revenue amendment is still brewing and an amendment will be ready for the legislators to work on in the near future.

As to the gasoline tax in place of the State Aid road tax, the legislative committee reported that this bill is quite likely to be introduced the week of March 9-14. The general order of gas tax bills which have been floundering around at Springfield could not be indorsed by the I. A. A. The only way the I. A. A. can stand for a gas tax is providing it displaces some present form of taxation and the State Aid road tax seems to be the one that should be displaced.

Wolves! Wolves!!

Other legislative action by the executive committee consisted of referring a communication read by Committeeman Earl Smith from Pike county asking for the support of the Illinois Agricultural Association to exterminate wolves. The river counties of Illinois, particularly Calhoun, Pike, Adams and Hancock, the communication stated, have absorbed large numbers of wolves from across the Mississippi river during the winter. Vigorous war on these marauders of livestock on the western side of the Mississippi has driven the

(Continued on page 4, col. 1.)

Higher Prices Paid By Co-ops Increased; Thank You, Mr. Critic!

"Our attention has been called to the fact by the president of the Sugar Creek Creamery Company that one of the creameries listed in our price survey in the RECORD of February 28 is not a co-operative," says A. D. Lynch, director of the I. A. A. dairy marketing department.

"It is true that the Ill-Mo Dairy Company of E. St. Louis, the company in question, although the stock is owned by farmers, is not organized under Illinois co-operative laws.

"Taking out the average price paid by Ill-Mo from the computation, the difference paid by Illinois co-operative creameries as compared to prices paid by proprietary cream stations would be just slightly more than the 5 cents and 6 cents differential stated in the article under review."

CASS SHIPPERS SAVED $8 FREIGHT PER CAR

An average saving of from $8 to $8.50 in freight costs on each carload of mixed live stock to the E. St. Louis market has been made by the Cass County Shipping Association, according to W. A. McNeill of Chandlerville.

"This saving is a direct result of the favorable changes in the rule on mixed shipments of live stock secured by the Illinois Agricultural Association transportation department in the fall of 1923," states Mr. McNeill. "The actual difference in freight rate, as it applies to our association, is 16.51 cents per hundred. It was 68 cents, but after the change had been secured by the I. A. A., the rate became 51.49 cents per hundred on mixed shipments. It meant a saving of $784 in 13 months to our association.

"There are 526 live stock shipping associations in Illinois and the mixed car victory means a tremendous sum—and it stays in the farmer's pocket," Mr. McNeill asserts.

FRUIT GROWERS MEET

On March 14 the Illinois Fruit Growers, Inc., held its first annual membership meeting at Centralia. A. B. Leeper, I. A. A. fruit and vegetable marketing director, is manager of this association. An executive committee meeting preceded the membership meeting.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Keep the Facts Straight

The Illinois Agricultural Association has not asked for a hearing on the grain merger before the Illinois Commerce Commission; we asked the Commission to investigate. The Commission has set the date of its hearing as April 15. In the meantime, the I. A. A. committee on grain marketing is working with the Farmers' Grain Dealers' Association on a common sense plan. The committee reports progress, but has no official announcement to make at this time.

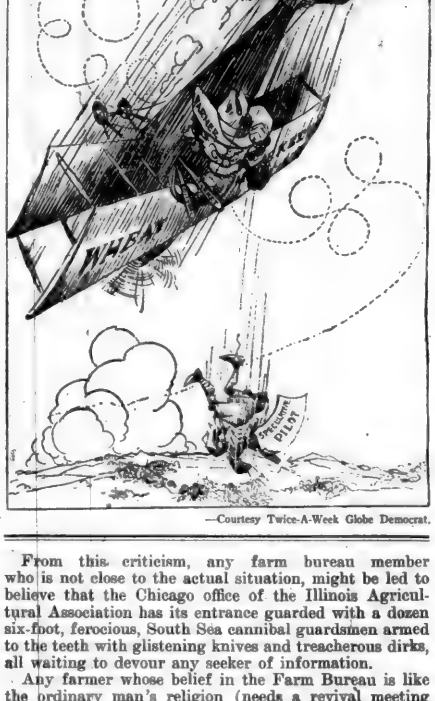
—o—

About a Letter

In glancing through the many farm papers which come to the I. A. A. office, not long ago we noticed a letter in one of them which had been written by a member of the Farm Bureau in Illinois. This letter contained an interesting criticism of the I. A. A. which we had not heard before, so we are passing it along to our members. The letter follows:

Your trenchant editorial, "Tell the Truth", in your issue of Feb. 4, is in a nutshell the chief reason for the apparent decline of farm organizations. Time was when the farm bureau had a very definite open door policy, when public and press were welcomed to meetings of the governing board, and when the president and executive committee of the American Farm Bureau Federation as well as most of the state organizations went on record time and again instructing their publicity departments to tell the truth, the whole truth and nothing but the truth. It was this policy which established the farm bureau in such high favor with the public and its membership.

As a member of the Illinois Agricultural Association, I think that I have a perfect right to know everything that is going on in the organization. Yet I scanned the last issue of the RECORD from cover to cover in a vain attempt to find who is the executive officer of our association. Yet I presume that the executive committee must have chosen an executive secretary, or at least discussed it.



No farm organization can live and flourish unless it belongs to its members. And it cannot belong to its members unless its members are fully informed as to every policy and activity.

Whenever the officials of any farm organization see fit to suppress any information or record of organization activity, that minute they convert it from a democracy to an autocracy, and in order to preserve itself, autocratic methods must be used.

The board of directors of the California Fruit Growers Exchange meets in a room banked by a gallery. This gallery is open to the public and the press. "Open covenants, openly arrived at", is fundamental and it is one of the prime factors in the early success of the farm bureau.

As a loyal member I shall continue to hope for a return to the open-door policy on absolutely every question that comes within the scope of our organization's thought and action.

About Time He Began to Handle Those Levers Himself—By J. N. Ding

—Courtesy Twice-A-Week Globe Democrat.

From this criticism, any farm bureau member who is not close to the actual situation, might be led to believe that the Chicago office of the Illinois Agricultural Association has its entrance guarded with a dozen six-foot, ferocious, South Sea cannibal guardsmen armed to the teeth with glistening knives and treacherous dirks, all waiting to devour any seeker of information.

Any farmer whose belief in the Farm Bureau is like the ordinary man's religion (needs a revival meeting once in awhile) could be so misinformed as to believe by such propaganda that the I. A. A. is governed by an invisible sultan of secrecy who keeps the facts concerning this association in a sealed vault which can be approached only after whispering a mystic password to the glowering guards.

Indeed, we can imagine a suspicious-looking farm bureau member stealthily approaching the I. A. A. office in the manner of the Human Fly. At the peril of his life he crawls from window ledge to window ledge from the sidewalk on busy Dearborn street toward the 12th floor wherein abides the Empire of I. A. A. Inch by inch and foot by foot he climbs upward until he reaches the window of the I. A. A. information department. Crashing his fist through the sooty window pane and hanging to the sill in midair with the other he cries:

"How much are my farm bureau dues?"

"What's the password?" the informationist asks cautiously.

"I dunno any," explains the member, peeking over the window sill, "but being in the city I thought I'd come up and pay my dues."

"No password—no information, that's our motto—and take that!!" says the official informer as he calmly kicks the member in the snout, toppling him from the sill for a 12-story non-stop flight to the cement sidewalk.

"The audacity of anybody trying to get information from the I. A. A. without the secret password!!" we could imagine the official informer saying as he leisurely watches a white clad streetsweeper brushing a grease-spot off the sidewalk 12 stories below.

Seriously, now folks, your state farm bureau body is not at all as pictured above. This association believes in and endorses the open door policy. What is more, it practices it. As much news as it is possible to squeeze into the RECORD's limited space is sent to each member every two weeks—26 times a year. And this is more than many organizations inform their members.

In addition the I. A. A. sends out an average of at least one news story a day to the public press. Each story of average news value is printed in papers having approximately one million readers. Some stories concerning this association have had enough importance to be printed from coast to coast. We know because we have the clippings. And it might be interesting to you as a farm bureau member to know that your state association is becoming more and more important in the news of this nation; it is rapidly assuming an enviable position of authority in its field.

As for the "apparent decline of farm organizations we offer in rebuttal the fact that there is a growing quarter-million treasury balance of this association. Also the prediction that the 63,000 members will be boosted to 75,000 when about 40 counties renew this year is ample evidence that this association is by no means declining. The I. A. A. is growing in reserves, members and accomplishments. What more do you want?

The specific instance mentioned in the criticism printed concerning our secretary can be disproved officially by referring the reader to the upper left hand corner of this page in the issue in question. The officers are named there and always have been.

This association is founded upon that solid and enduring basis such as Abraham Lincoln once so ably described the secure foundation of the United States when he said—"A government of the people, by the people and for the people."

The I. A. A., like the United States government, is also conducted in democratic fashion and upon the principle of a true republic. It is **of** farm bureau members, **by** farm bureau members and **for** farm bureau members, first, last and always.

And, like Senators or Congressional representatives of the United States, the officers and 15 executive committeemen (also named in the left hand corner above) and employed directors often times negotiate business of vital importance to all the 63,000 members. Sometimes such business cannot be exposed at the moment. Exposing at the wrong time would be like a card player showing his whole hand to his opponent before the game is finished.

All thinking members must realize that certain business of the association has to be conducted without telling the world until the results have been accomplished. However, any bona fide member can get any such information by seeing personally or writing the executive committeeman representing his district. County farm bureau presidents and other county officers are also reliable sources of such information. District meetings are good places to get informed. All members are invited to these. Questions can be asked and answered without getting the facts twisted. Difficulties can be cleared up.

Furthermore, there is a standing invitation to farm bureau members to attend meetings of the executive committee when members happen to be in Chicago at meeting time, the first Friday of each month. This invitation is also standing for representatives of the press. The only closed periods are during executive sessions. These are few and short.

Yes, the I. A. A. subscribes to the open door policy and practices it. However, it does not lay all its cards on the table where opponents to the farm bureau members' interests can see them. And don't forget, Mr. Farm Bureau member, there are plenty of opponents in this great game. And oftentimes they would like especially to see what cards **this** farm organization is holding.

The Illinois Agricultural Association is **of, by and for** its 63,000 *thinking* farmer members first, last and always.

Whatever the I. A. A. does, it is in the interest of the members who support it. If we may be permitted to parallel that famous declaration of Stephen Decatur—**"Our Farm Bureau! In her intercourse with other interests may she always be in the right; but our Farm Bureau, right or wrong! !"**

—o—

Dean Davenport is "For the Farm Bureau"

Eugene Davenport, that great leader of agriculture who is now on the retired list after many years as Dean of Agriculture at the University of Illinois, has a warm spot in his heart for the Farm Bureaus in Illinois and the Illinois Agricultural Association. However, someone of the reporters who "covered" a meeting at which he spoke during the recent Farmers' Week at the University, got the wrong slant on the former Dean's views. This has been taken up by some opponents of this organization of *thinking* farmers.

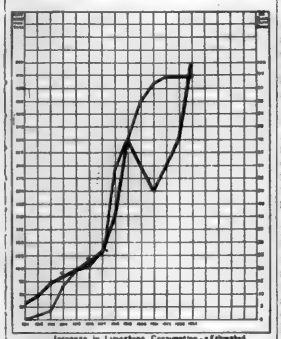
The "Sangamo Farmer," official publication of the Sangamon County Farm Bureau, reprinted an attack on the Farm Bureau in which some non-member quoted the statement Dean Davenport was supposed to have made. We sent a copy of the "Sangamo Farmer" to Mr. Davenport and he replied as follows:

Your marked quotation in the Sangamo Farmer, Vol. VI, No. 2 in no wise represents either my views or my expression at the University this winter, except as to one particular phase of the organization.

In so far as farmers are urged to imitate organized labor and attempt to control prices and production by force and starve the public into submission, I said I believe that the attempt is vicious and will fail as it ought.

As to organization in general and especially for expression I believe that all the firms of co-operative undertaking have done great good. On the whole I regard the Farm Bureau as the best and most promising for local results and the state and the national federations the most useful and powerful for the larger issues.

If this fails to make clear my unbounded faith in national organization for farmers, I should be glad to go further into any particular point.



Sincerely yours,
(Signed) E. Davenport.

ILLINOIS FARMERS BOUGHT QUARTER OF ALL LIME USED IN '24

I. A. A. Phosphate-Limestone Department Successful in Securing Continuance of Ten Cents per Ton Discount to Members

Illinois farmers last year bought 500,000 tons of limestone to use on their soils. That is one-fourth of all the limestone used on farms in the entire United States last year (the U. S. Department of Agriculture says the whole country used 2,000,000 tons). And the farm bureaus were responsible for the larger portion of Illinois' record, as about 260,000 tons of this soil sweetener was purchased through them in co-operation with the Illinois Agricultural Association.

"From the earliest records in

Increase in Limestone Consumption—a Estimated Growth of County Farm Bureaus

1911," says J. R. Bent, director, "when 32,000 tons was used, the quantity of farm limestone applied on the soils of the state has advanced, much through Farm Bureau effort, until Illinois farmers last year established a new record for the country by spreading a half million tons of limestone on their farms. This is a significant step in the direction of establishing a sound policy of soil maintenance and it is something the state is entitled to take great pride in."

The Illinois Agricultural Association, through the phosphate-limestone department, has been at work since early 1920 endeavoring to make the available supply as efficient and economical as possible. Last year the department was successful in negotiating a ten cents per ton differential, granted by the limestone producers as a discount, in favor of farm bureau members. This advantage has now been in force for six months and has saved the farm bureau members of Illinois thousands of dollars.

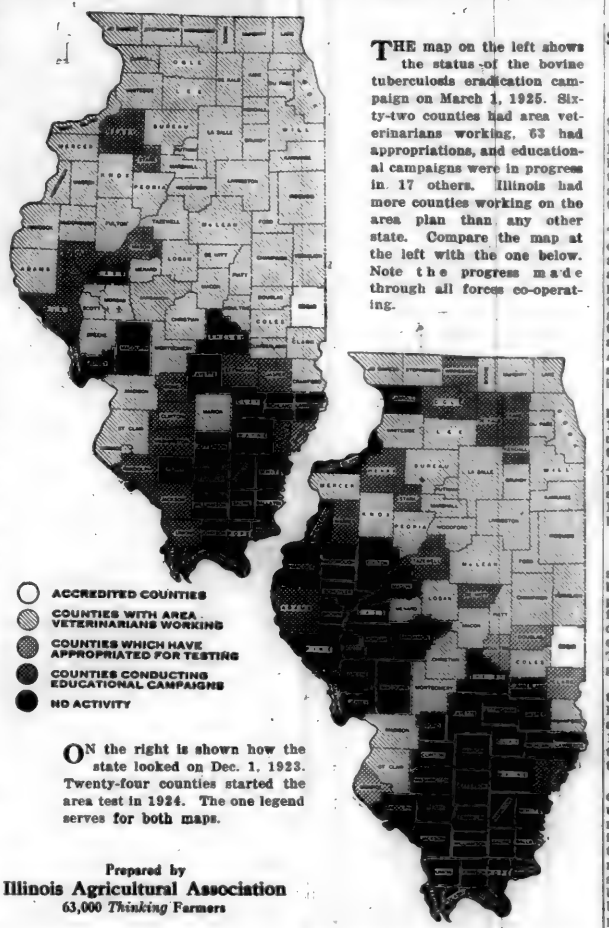
Department Kept Busy

"The limestone producers early in the winter started a movement to abandon this practice and return to the old basis of one price to all and announced its decision to the I. A. A.," says Mr. Bent. "The phosphate-limestone department has been kept busy during the last three months in an endeavor to perpetuate the discount feature in behalf of its members and has been rewarded this past week by victory,—the majority of the producers having finally agreed to continue the discount feature direct to each purchasing member by means of discount certificates issued by the respective county Farm Bureaus.

"The large demand in 1924 not only took care of the current production of screenings from the crushed stone industry but almost entirely cleaned up the surplus which had been accumulating during the previous three or four years. This fact led the Producers to feel that they could no longer continue a price which was less than the pro-rata share of the cost of production and that hereafter they should secure a price for this material which would cover the cost of production with some profit. They claimed that a minimum price of 80 cents at the quarry net to farm bureau members would be necessary to accomplish this. However, at least two of the producers have agreed with the I. A. A. department to hold their price for the present to 75 cents a ton f.o.b. the quarry with 10 cents off to farm bureau members, thus effecting a saving of 15 cents below the price that at first had been contemplated by the producers. This doubtless will have some bearing upon the price quoted by other companies, including those that sell on a delivered price basis."

RENEW DECLARATION OF WAR ON BOVINE T. B. IN ILLINOIS

State Is Leader in Move to Stamp Out Cattle Plague Which Brings Suffering to Mankind and Losses to Livestock Industry



Bovine Tuberculosis must go!

This is the unqualified statement of all extension forces operating in Illinois to stamp out the cattle pest. The Illinois Agricultural Association, through its T. B. eradication project, M. H. Petersen, in charge, is squarely behind the efforts made by the state and the federal government in their efforts to rid the country-side of the plague.

"A survey carried on by the federal government shows that 33 1-3 per cent of the infantile tuberculosis in the United States is directly traceable to the presence of the bovine tubercle bacillus in milk," states the I. A. A. department. "This statement is also borne out in the report of a similar survey conducted by the British Royal Commission.

"The Bureau of Animal Industry, United States Department of Agriculture, estimates that the annual losses from bovine tuberculosis to the livestock industry of the country amounts to no less than $25,000,000 to $40,000,000 and that this loss is largely preventable.

"Illinois now is a leader in the country in the anti-T. B. fight, but only a start has been made. With Edgar county accredited free from the disease, testing going on in 62 other counties, and educational campaigns in 17 others, the work must progress until all rural Illinois, where 135 out of every 100,000 human beings are victims of the disease, is entirely free from every vestige of bovine tuberculosis."

THE map on the left shows the status of the bovine tuberculosis eradication campaign on March 1, 1925. Sixty-two counties had area veterinarians working, 63 had appropriations, and educational campaigns were in progress in 17 others. Illinois had more counties working on the area plan than any other state. Compare the map at the left with the one below. Note the progress made through all forces co-operating.

ON the right is shown how the state looked on Dec. 1, 1923. Twenty-four counties started the area test in 1924. The one legend serves for both maps.

Prepared by
Illinois Agricultural Association
63,000 *Thinking* Farmers

APPROVE ACTION OF THE I. A. A. EXECUTIVE COMMITTEE ON MERGER

Twenty-first District Meeting Adopts Resolutions Urging Continued Vigil and Advising against Purchasing Grain Marketing Company Stock

The first quarterly meeting for 1925 of the executive committees of the four farm bureaus in the 21st Congressional district, which includes Sangamon, Christian, Montgomery, and Macoupin, was held at Carlinville, Macoupin county, February 26. Four meetings were held last year, starting with one at Carlinville a year ago. Sam Sorrells, Raymond, is executive committeeman for the I. A. A. from this district.

The purpose of this meeting was to discuss farm bureau problems of special interest to the farm bureaus in this district. The program included discussion of legislative matters, membership campaign problems, status of grain marketing, status of live stock marketing, especially from the angle of the Producers at East St. Louis, and the problem of marketing whole milk in this territory. C. R. Martin of the Producers Live Stock Commission Association spoke on the Producers' work.

Approve I. A. A. Action

Resolutions were adopted approving the action of the I. A. A. executive committee relative to the Grain Marketing Company and advising every farmer in the 21st district against the purchase of stock in the grain merger. Another resolution was passed urging the I. A. A. executive committee to take whatever steps necessary to remove from the counties of Illinois the intolerable situation which now exists by inducing the American Farm Bureau Federation to publicly repudiate all connection with the Grain Marketing Company to cease carrying propaganda favoring the Grain Marketing Company in its official publications, or by any other means deemed advisable by the executive committee of the Illinois Agricultural Association.

The next meeting will be held at Hillsboro, Montgomery county, April 23.

Following is a list of those in attendance: From Macoupin—J. P. Enslow, H. W. Rice, J. F. Leefers, W. C. Robinson, John Robison and Dr. J. F. Denby. From Christian — W. W. Grimes; C. G. Curtin, Dwight Hart, H. H. Gordon, W. T. Wallace, T. A. Ostermeier, T. R. Potts, C. E. Hay. From Montgomery—Sam. Sorrels, H. A. Cress, R. E. Gifford, Chas. Whitlock, and Alden Snyder. From Sangamon—J. P. Stout, J. F. Greenwood, Geo. C. Washburn, Albert Trutter, H. H. Mauer, S. J. Snell, E. A. Bigler, C. N. Reynolds, I. A. Madden, and R. E. Nowlan.

PUT OFFICIAL O. K. ON I. A. A. SLOGAN

The phrase, "63,000 thinking farmers," has been in use for about a year—unofficially. From now on, however, it will be used with might and main, as the executive committee of the I. A. A. in its March meeting adopted the term as the official slogan of the organization.

The slogan has already gained wide popularity throughout Illinois and even outside the state. I. A. A. officials believe this to be the first case of a general farm organization to adopt a slogan by which it might be known.

Official Scribe's Squib Puts Henry County into A Grotesque Limelight

Henry county last year "imported 235 acres of limestone," according to a statement appearing in the February 28 RECORD. Quite an order, we take it, as the surface eight inches of soil per acre weigh only 2,000,000 pounds, to say nothing of stone.

The I. A. A. house organ does not tell just how the stuff was smuggled into the county. If by the acre, we are wondering if much of the mineral, while perhaps not broken, did not get BENT (J. R.). However, now that the deed's been done, we shall expect legumes in Henry county to grow a mile high, and we are confident that sour soils will no longer have any terrors for the farms of this county.

CAN HOLD WIFE OF CONTRACT SIGNER

Can the wife of a contract signer be held? Persons interested in co-operative marketing are furnished a precedent in the case of the California Prune and Apricot Growers' Association vs. William H. Allenden and Myrtle Allenden. William H. Allenden signed a contract with the association while his wife owned the property. It appeared, however, that she had permitted Mr. Allenden, her husband, to deliver prior crops to the association and that she had accepted the proceeds therefrom. In view of this fact, she was regarded as a principal and judgment was rendered against both of them.

HEALTHY GROWTH IN STATE ACCREDITED HATCHERIES, 1924

State Division of Standardization and Markets Tells of Purpose and Gives List of Farms

Illinois' Accredited Hatchery system is on the up-grade. So says H. W. Day, supervising inspector of the Division of Standardization and Markets, Illinois Department of Agriculture, co-operating with the poultry and egg marketing department of the Illinois Agricultural Association.

"In the fall of 1923," says Day, "the poultry interests of the state requested a plan whereby hatcheries and flocks might be inspected by an authorized state agency and be placed on an accredited list. By now the baby chick industry in Illinois is growing to be one of great importance and competition is keen among all those who sell day-old chicks. All poultry interests are eager to do something which will better their industry."

The Illinois Accredited Hatchery plan was formulated in the fall of 1923 jointly by the poultry and egg marketing department of the I. A. A., the poultry division of the College of Agriculture at Urbana, the Illinois Baby Chick Association, and the state Division of Standardization and Markets co-operating. After several hearings the plan was adopted.

Few Accredited in 1923

Due to the late start in the 1923 season, only a few hatcheries could be inspected. Ten hatcheries were placed on the state accredited list for the season of 1923-1924. In addition, about 150 flocks were inspected and placed on the reserve list. The hatcheries and reserve flocks together totaled 49,558 birds.

The work was started earlier in the fall of 1924 and at present, 24 hatcheries have been placed on the accredited list for the season of 1924-1925. These hatcheries with all their flocks and some reserve flocks total approximately 125,000 birds.

"The Accredited Hatchery plan," declares Day, "is becoming quite popular and the public is beginning to realize the value of chicks from these inspected hatcheries. The object of this plan is three-fold: first, to help raise the standard of Illinois poultry; second, to assist in the marketing of baby chicks; and third, to help the baby chick buyer secure a better product for his money."

Could Accredit Many

The State Division of Standardization and Markets and the poultry and egg marketing department of the I. A. A. are promoting the extension of the plan, together with other poultry interests. "Some hatcheries," asserts Day, "no doubt are already selling chicks which meet the requirements of Grade A and the Department feels that there are a great many hatcheries in the state that might easily be placed on the accredited list. The accredited hatcheries guarantee that the chicks which they offer for sale come from eggs produced by hens which were inspected and leg-banded by one of our authorized inspectors."

"The inspection is not compulsory," the State Department advises. "No hatcheryman nor flock owner need feel that he must have the inspection. It is offered to those who wish to have the approval of quality placed on their chicks which they offer for sale. Those who want the inspection are requested to write to the Division of Standardization and Markets at Springfield and ask for an application blank. This blank should be filled out and returned to the office and an inspector will be sent as soon as possible."

Latchstring Is Out

Any hatchery operating within the State of Illinois shall be published on the State accredited list, provided, upon inspection by an authorized inspector of the State Division, it is found to meet and maintain throughout the hatching season the certain specified requirements and regulations. The hatchery also must be open to re-inspection at any time.

The State Division of Standardization and Markets announces the following list of Illinois Accredited Hatcheries:

Brenner Hatchery — Edgar Brenner, Freeburg, Ill.
Cedardale Poultry Farm—Glenn Rau, Maroa, Ill.
Chestnut Hatchery — B. M. Myrick, Chestnut, Ill.
Corn Belt Hatchery—D. E. Roth, Gibson City, Ill.

(Continued on page 4, col. 4)

GROW NEARLY ALL OF WORLD CROP IN EIGHT COUNTIES

Egyptian Seed Growers Exchange Handled $150,000 Business for 826 Farmers in Year 1924

"Co-operative marketing is a business undertaking and not a political venture," declared Curt Anderson, Xenia, in a recent address over KYW, Chicago.

Anderson is general manager of the Egyptian Seed Growers Exchange, a commodity marketing organization handling Red Top clover seed co-operatively for 826 producers in Clay county and the seven adjoining counties. He also is executive committeeman for the Illinois Agricultural Association.

The area concerned produces 95 per cent of all the Red Top seed grown in the world. The Exchange was incorporated in June, 1922. In 1924 it sold over $138,000 worth of unhulled seed. This represents about one-third of the total Red Top crop produced in this area.

"Co-operative marketing," said Anderson, "is founded upon human relationships and has for its purpose human benefits and therefore it cannot be temporizing in its character. To be successful, co-operative marketing must be understood to be a business undertaking arising from the common desire of producers of like agricultural products to work together in the creation of a business institution suited to the commodity in question. It must be operated under a responsible management whose sole purpose is to create standardization of the product, economics in distribution, and an orderly flow into the practical channels of trade."

EXECUTIVE MEETING COVERS MUCH GROUND

(Continued from page 1)

wolves to more protected areas in Illinois, the letter stated.

Support in securing an appropriation for official assistance in ridding the country of wolves was requested. The matter was referred to the legislative committee.

Another legislative consideration had to do with the fear that the appropriation necessary to continue inspecting work under the farm products inspection law would be cut off. This matter was also referred to the legislative committee for action.

To Help Appeal Tax Case

4. Decided to support the Madison County Farm Bureau in its appeal to the Supreme Court of Illinois concerning the decision of the lower court in Madison county which ordered that the 199 Madison County Farm Bureau members who had held back a portion of their taxes must pay with penalty. The final outcome of this case is of so much importance to every farm bureau member in Illinois that the I. A. A. will furnish both men and money in the fight which is to come.

5. Heard President Palmer of the Ohio Farm Bureau Federation tell of good work that is going on in Ohio. President Palmer stated that Ohio looks to Illinois for leadership in many things in farm bureau work. President Palmer was visiting in Chicago.

Favor State Police

6. Heard of legislative program of the Illinois Chamber of Commerce from Edward E. Gore, chairman of that body's legislative committee, and Geo. E. Stephens, who is in charge of the Chamber of Commerce legislative office at Springfield. Executive committee later in the day voted to support a measure giving police protection to rural communities. This means indorsement of state police. Frank F. Barth of the Pennsylvania State Police, told of the success of the plan in his state.

7. President Thompson announced that the executive committee had decided to place the positions of secretary and treasurer of the association on the same basis as the directors are employed. That is, there are no yearly contracts, each man being employed with the mutual understanding that if he wishes to resign or the executive committee wishes him to resign, a 60-day notice shall be served by the party who initiates the change. Secretary Fox and Treasurer Cowles both desired the 60-day basis and will continue their offices.

The date of the next meeting is April 3.

GAS TAX COUNTED FAIR IF IT RELIEVES PROPERTY TAX BURDEN

Proposal If Enacted Would Shift the Road Tax to Consumption Basis, Says the I. A. A.

"The fairest tax for those who use the highways of Illinois is the gasoline tax." So declares the Illinois Agricultural Association, through its taxation department, J. C. Watson, director.

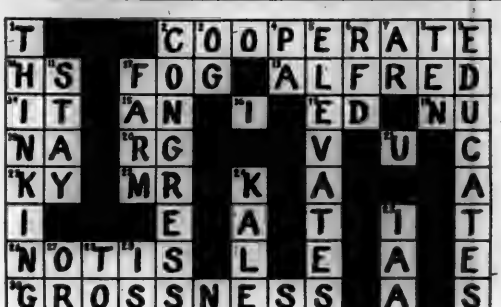
The Illinois Agricultural Association is squarely behind a tax on gasoline used to propel automobiles and trucks on the highways of the state, providing the funds derived therefrom displace and do not add to the present property tax burden. "The most insistent demand for improved roads comes from those who drive cars and trucks," says the taxation department. "They have the most to gain from improvement of highways. Their loss is greatest when the highways they must use are rough or soft, or are not usable part of the year."

Property owners have every reason to resist any further increases in property taxes for improving the public highways of the State, the I. A. A. director points out. "The burden of improving and maintaining the roads most used by motor vehicles must fall upon the users. Only in this way will they cease paying for bad roads without getting any better roads.

"The gasoline tax takes account of the speed of the machine, its weight and power, and the distance it is driven. It adapts itself equally to persons who use the roads little and to those who use the roads much. It measures the benefit which the user receives from the road. Furthermore, the gasoline tax is easy and simple to collect."

The Illinois Agricultural Association is supporting a measure which provides for a gasoline tax to relieve in part the excessive burden of taxation now carried by farm lands and city real estate. The Association states that it wants the gas tax to displace and not add to the present property burden.

It estimates that a two cent tax per gallon of gasoline would provide about $10,000,000 annually. Of this sum, $6,500,000 to $7,000,000 would go direct to the counties for construction and maintenance of State Aid roads, and the balance would go to the State Aid fund, distributed to the counties where the need is greatest. A two cent tax, it is believed, would take $4,000,000 off the State property tax books and thus relieve property of part of its tax burden.



TELLS WHY HOOSIERS LEAD AS PRODUCERS

"The shipping associations in Illinois," says F. H. Kelley, manager of the Producers Commission Association at Indianapolis, "as a whole are still less loyal to their own marketing organization than those in Indiana. We attribute this in part to the fact that the Indiana associations being much closer to the market, send many more men to see the actual marketing process and to investigate their own marketing organization first hand. In fact, many Indiana counties have been sending delegations of from 30 to 80 men from different parts of the county to market, for a detailed study of the Producers. Unbiased investigation has convinced these men that the way to sell their live stock is through the Producers. In Illinois the average consignor to a shipping association does not come to market often, and consequently a manager who is prejudiced, not having the weight of the shippers' first hand knowledge of the market, can more easily ship to Old Line firms.

"Through the co-operation of county farm bureaus and the Indianapolis Producers, local stock yard grading demonstrations are being held in the Indianapolis trade territory and are proving popular. Recent demonstrations have been held at Neoga in Cumberland county, Illinois, and at Bethany, Lovington and Sullivan in Moultrie county. Arrangements have been completed to hold seven of these demonstrations in Champaign county soon."

One hundred twenty-five Vermilion county farmers recently met with their farm adviser to discuss their seed corn problems for 1925.

IT WAS "KALE," NOT "TIME" OR "LOVE"

Judging from all the letters that have come into the I. A. A. office from farm folks, including executive committeemen, in answer to the cross-word puzzle in the February 28 issue of the RECORD, we discover that the thing has created a mild tempest—especially with one word.

Look at the solution and compare it with the one you doped out. How did you answer 24 down? We were showered with a wide variety of possibilities on that one—as might be expected for the problem under discussion. "Time," "love," and "kale" are the three words suggested by most contestants and according to our official builder, "kale" is the only right one. These words were defined as "something of which you never get enough."

One of the pleasant surprises in connection with the attempt was the receipt of a letter from H. Strotheide, a nine-year-old farm boy from Highland, Madison county. All of his answers — except "kale" — were correct. From his own testimony we have it that he worked the thing with practically no help.

WANT BETTER MILK MARKETING SYSTEM IN 11TH DISTRICT

Farm Bureau Officers and Advisers Hear Talks on Co-operative Problems at Wheaton

A more adequate milk marketing system than now exists was the chief desire expressed by the representatives of the county farm bureaus of Lake, Cook, Kane, DuPage, and Will counties in their first district meeting of the year at Wheaton on Feb. 26.

That the representatives are dissatisfied with present milk marketing conditions was expressed in an afternoon of discussion on their dairy problems following a talk by A. D. Lynch, director of dairy marketing. W. J. Schreck of Waukegan, a dairy farmer, explained how a group of dairymen, of which he is a member, co-operate in furnishing milk to one buyer.

Considerable interest was shown in the possibilities of co-operative poultry and egg marketing. In the forenoon, F. A. Gougler, director of the poultry and egg marketing department, discussed the Minnesota plan of co-operative egg marketing. It has been working successfully in the Gopher State and has lessened the cost of getting eggs from the nests to consumers' breakfast tables at a fair saving to both, Mr. Gougler stated.

Resolutions were adopted declaring: (1) the need for a more adequate milk marketing system than now exists; (2) endorsing the full legislative program of the Illinois Agricultural Association, which includes a constitutional amendment for revenue changes, a gas tax in place of some present tax and assistance in furthering the eradication of bovine tuberculosis; (3) endorsing the invitation of the Lake County Farm Bureau's invitation to the Illinois Farmers Institute to bring its 1926 annual meeting to Waukegan and (4) urging lower freights in lieu of abolition of surcharges on Pullman fares.

William Webb of Plainfield road, Joliet, presided. He is an executive committeeman of the Illinois Agricultural Association representing Congressional districts 1 to 11 inclusive and is also president of the Will County Farm Bureau.

Others present from Will county were: O. J. Luther, Wilmington; Fred Schweiser, Elwood; John Cryder, Plainfield; Geo. Hinze, Beicher; Russel Webb, Joliet; J. Franklin Hedgcock, farm adviser, and Roland Clark, assistant.

Will C. McQueen of Elgin, represented the Kane County Farm Bureau.

Lake County Farm Bureau was represented by Willard Darrell, Waukonda; W. J. Shreck, Libertyville; Ira G. Stephens, Wadsworth, and J. J. Doerschuk, farm adviser.

Herman Schnake of Arlington Heights, represented the Cook County Farm Bureau.

The DuPage County Farm Bureau was represented by Harold C. Vial, George B. Goss, Wilton B. Lehman, Lee O. Littleford, C. R. Wimpress, Otto Heuer, Robert Plane, Wm. Ross and E. A. Carncross, farm adviser.

EARLY COLLECTIONS BEST, SAYS AUDITOR

That early collections of Farm Bureau membership dues are the easiest is borne out by the report of L. A. Evans, membership auditor for the I. A. A. Woodford County Farm Bureau, he points out, was the first to file returns for 1925 with the I. A. A., reporting a total of 92 per cent collections by February 5, on dues payable January 1, 1925. Woodford county is considered the pioneer county in farm account work, and Evans ascribes to its business-like methods the results which farm bureau officials were able to show at this early date.

On the same day another county reported 76 per cent collections. On February 6, two counties reported; one for 77 per cent and the other for 62 per cent. On February 9, one county reported for 84 per cent and another reported a collection of 83 per cent.

"It is this kind of spirit which spells success in farm bureau work," says Evans. "It is not surprising to see why farmers pay their dues promptly when farm bureau officers are on the job early.

Whiteside County Farm Bureau is urging its members to "raise a ton litter this year, and get your neighbor to raise one."

MUST MAKE FARM HOME ATTRACTIVE FOR LASTING GOOD

Farm Wife Wants Conveniences in Home to Keep Pace With Modern Farm Progress

Unless the farm home is made just as convenient and attractive as the town and city home, we cannot hope to keep the farm wife contented and happy on the farm.

That is the opinion of W. H. Moody, Port Byron, Illinois, executive committeeman for the Illinois Agricultural Association from the 14th Congressional district, speaking recently over KYW, Chicago.

Moody pointed out that time and labor-saving devices have been applied to farming operations long ago, but that the farm home has not kept pace with the rest of the farm and has suffered in the general march of progress. This, he declares, is because farmers generally have not considered home conveniences as indispensable as good equipment in farm operations. "The farmer," he said, "promptly discarded the grain cradle when the hand rake reaper appeared, and in turn purchased the self rake, the Marsh harvester, and finally the modern self-binder, realizing that to ignore them meant to fall by the wayside in the march of progress."

Moody raised the question, "Does the farm house wife enjoy the modern conveniences that are found in the city home? Unfortunately, many do not. He mentions the gasoline engine, the pressure tank, the bath room and the radio as essential in modernizing the farm home.

"Can you blame the farm wives for wanting to leave the farms?" Moody asked. "The farm home is repulsive and she longs to have what can be made the most delightful abode on earth—the old home with modern devices at a very moderate cost. The farm home can be made as convenient and attractive as the city palace and when that is done, the rural dweller is delighted to invite her city friends to her country home."

FORWARD! FARM BUREAU

"The most hopeful movement of modern times in agriculture is the county Farm Bureau. It is going to help us to bring agriculture up more rapidly than any other agency we have had in the past and that is because it gets the farmers to co-operate with one another along the most practical and successful lines. I know that it is true in Illinois, and I am quite sure it is equally true elsewhere. I have more faith in an improved and permanent agriculture through the agency of the county Farm Bureau than in any other single agency we have."—Frank O. Lowden.

I. A. C. A. STRONG IN IROQUOIS

Three farmers' co-operatives in Iroquois county are the most recent to join the Illinois Agricultural Co-operatives Association, co-operative accounting and business advisory service organization. Geo. R. Wicker, general manager of this association and I. A. A. accounting director, states that Iroquois county now has seven farm co-ops that have taken out membership in the organization.

The three co-ops are the Cissna Park Co-operative Grain and Coal Company; Farmers' Co-operative Company, Leonard; and Wataga Live Stock Shipping Association. This brings the total I. A. C. A. membership up to 141.

LEST WE FORGET!

"* * * Now therefore be it resolved by the executive committee of the Illinois Agricultural Association that we disapprove the grain marketing plan of the Grain Marketing Company and advise the members of this association against purchasing stock of the company either as an investment or for the purpose of supporting the company's program for marketing grain."—Part of a resolution passed on Jan. 9, 1925 by the I. A. A. executive committee.

ALL FORCES WORKING TO RELIEVE THE FARM TORNADO SUFFERERS

THREE-LEGGED LAW PLATFORM GALLOPS INTO FAVOR

LIVELY DISCUSSION OVER TICE BILL AT SPRINGFIELD MEET

All Three of I.A.A. Legislative Desires Get Hearty Endorsement Following Explanations

First-hand acquaintance with the three-legged state legislative platform of the Illinois Agricultural Association was acquired by presidents and representatives of 89 of the 92 farm bureaus during the sessions held during the special meeting on March 17 at Springfield.

Keep Babies Healthy With Clean Milk

The three legislative desires of this organization of *thinking* farmers were each discussed bit by bit and segment by segment by those who know the details as well as a handy farmer knows the mechanism of his windmill or cream separator.

What We Want

The three planks are:

1. Amendment to the revenue section of the constitution to permit a more equitable distribution of the tax burden (covered in joint resolution No. 5 introduced by Senator Simon Lantz, a hearing on which is scheduled for the near future.

2. A two-cent tax on gasoline in place of the county highway tax (covered in Senate Bill 165 introduced by Senator Cuthbertson—hearing Wednesday, April 1).

3. Continuation and expansion of the effort toward eradication of bovine tuberculosis (covered in Tice Bill).

Wishes All Were There

"We wish every farm bureau member could have been present to get the first-hand information about the I. A. A. legislative program because it is really a platform of tremendous importance to Illinois agriculture," President Thompson stated after the special meeting.

Frank D. Barton of Cornell, H. E. Goembel of Hooppole and A. C. Everingham of Hutsonville, members of the legislative committee, have the three planks of the platform well under their care.

Bovine tuberculosis, that dreaded disease which lurks in apparently healthy cows and creeps into bones of infants, causing human tuberculosis of the bone, was the first one of the three planks taken up by the farm bureau officers. Their attitude on this great health question was reflected powerfully in the following resolution:

The Resolution

"We, the presidents and representatives of the Farm Bureau of Illinois, assembled at Springfield, March 17, 1925, recognizing in the tuberculosis eradication program of the state and nation the economic welfare of the live stock farmer and the protection of the life of the public and believing that more stringent laws are necessary to greater efficiency and economy in eradication work, hereby endorse, recommend and respectfully urge members of the legislature and the Governor to write into the laws of the state Tice Bill No. 176; and we further recommend and urge that adequate appropriation be provided to effectively carry on the eradication work in Illinois."

Resolution Carried Much Weight

Although this resolution was a repetition of the unanimous in-

(Continued on page 3, col. 1.)

WHAT IF THIS WERE YOUR HOME?

The top picture is what the tornado left of the residence of E. W. Johnson of Crossville, White county, Ill. Both Mr. and Mrs. Johnson were in the house. The picture below is the farm home of Roy Stokes, south east of Crossville. Mrs. Stokes was picked up at spot marked X. She stands under the other X in the picture. Both farmers were Farm Bureau members. The pictures were furnished by Ed Creighton, Farm Advisor of White County Farm Bureau.

Latchstring to I. A. A. Office Always Out To Chicago Visitors

The next meeting of the executive committee is Friday, April 3. Farm bureau members and ex-executive committeemen are cordially invited by the present committee to attend when they are in Chicago on meeting days.

The usual meeting date is the first Friday of each month and unless something unusual occurs it is always held at that time. The latchstring on the I. A. A. office door is always out. Whenever farm bureau members come to Chicago they should not miss visiting the office.

His Dues Tardy, He Pays Interest; Vote Him Refund

Farm bureau loyalty was demonstrated recently when a Clark County Farm Bureau member, who had been in arrears with his organization, paid his back membership fees and also remitted interest amounting to $1.05 to the treasurer for keeping the farm bureau folks waiting.

The Clark County Farm Bureau executive committee in its last meeting voted to refund the man his interest.

A.F.B.F. Committee On Boys and Girls Clubs Aims High for 1925

"One million club members in 1925" is the slogan of the National Committee on Boys' and Girls' Club Work of the American Farm Bureau Federation, G. L. Noble, director. Every effort is being put forth to enroll farm girls and boys in junior club work throughout the country. Indications are that much will be accomplished this year, Mr. Noble believes.

There are about 6,000 farm boys and girls between the ages of 10 and 18 in clubwork in Illinois. E. I. Pilchard is state leader of this branch of agricultural extension carried on by the College of Agriculture.

GRUBSTAKING OUR ILLINOIS NEIGHBORS IS JOB FOR US ALL

State-Wide Committee Representing All Organizations Is Formed to Collect Funds; Need Is Great

Grubstaking their brother Illinois farmers who are destitute because of the tornado has been and still is the mighty task before the more fortunate farmers of Illinois.

A campaign for raising money for permanent farm relief was launched soon after news of the calamity came. All county Farm Bureaus not in the tornado area were sent the following telegram by Secretary Geo. A. Fox after a meeting was held in the I. A. A. office and a course of procedure determined:

"Farm damage in tornado area well over two million dollars stop Farm organizations and farm papers co-operating to raise and administer fund to grubstake stricken farmers to raise crop stop Hope to raise average two thousand dollars from farmers in each county stop Take charge and go to it stop Wire answer."

Response to this telegram was almost spontaneous. County Farm Bureaus plunged into harness, organized for the money-raising campaign, and relief for the unfortunate Illinois farmers got under full steam. All organizations representing or serving Illinois farmers joined hands in the grubstaking campaign.

Money for Permanent Relief

A central committee representing all these interests was formed Monday, March 23, to raise money for permanent relief. It was realized that the immediate needs of the tornado sufferers were well cared for by Red Cross and local agencies but who is to help these folks get started into business again? Who is to help them get a milk cow to furnish milk and butter while planting this crop, the growing season of which is right upon Southern Illinois? Who is to help them secure seed and machinery? Who is to furnish a plow? Who is to furnish a work horse, chickens, pigs? It must be from farmers for farmers. Permanent relief is the goal of this central committee, which is named "The Grubstake Committee For Farmers of Illinois". All interested farm organizations are represented on the Grubstake Committee.

Cowles Is Chairman

R. A. Cowles, I. A. A. treasurer, was made chairman and treasurer of it. His first act was to make proper connections with the Red Cross in Chicago to make certain that farmers' needs would be cared for. He dispatched Vernon Vaniman, field organiser of the I. A. C. A., to St. Louis to make connections with the Red Cross of that city, which is in direct charge of the tornado district.

Other members of the committee are as follows:

C. V. Gregory, Editor, Prairie Farmer; Arthur C. Page, Editor, Orange Judd Illinois Farmer; Dean H. W. Mumford, University of Illinois; Edgar L. Bill, Sears-Roebuck Agricultural Foundation and Wife; E. A. Eckert, Master, Illinois State Grange; H. E. Young, Secretary, State Farmers Institute; C. A. Asplund, Orion, President Illinois State-Farmers Mutual Fire Insurance Ass'n; Lawrence Farlow, Secretary, Farmers Grain Dealers Association of Illinois; J. D. Phillips, rural banker, Green Valley, Illinois; J. E. Lloyd, Carthage, President Illinois Farm Advisers Association; Chas. E. Snyder, Chicago Daily Drovers Journal; Curt Anderson, Xenia, I. A. A. executive committeeman for the 24th district and also chairman of a survey and distribution committee working in all counties in the tor-

(Continued on page 4, col. 3.)

GROW NEARLY ALL OF WORLD CROP IN EIGHT COUNTIES

Egyptian Seed Growers Exchange Handled $150,000 Business for 826 Farmers in Year 1924

"Co-operative marketing is a business undertaking and not a political venture," declared Curt Anderson, Xenia, in a recent address over KYW, Chicago.

Anderson is general manager of the Egyptian Seed Growers Exchange, a commodity marketing organization handling Red Top clover seed co-operatively for 826 producers in Clay county and the seven adjoining counties. He also is executive committeeman for the Illinois Agricultural Association.

The area concerned produces 95 per cent of all the Red Top seed grown in the world. The Exchange was incorporated in June, 1922. In 1924 it sold over $138,000 worth of unhulled seed. This represents about one third of the total Red Top crop produced in this area.

"Co-operative marketing," said Anderson, "is founded upon human relationships and has for its purpose human benefits and therefore it cannot be temporizing in its character. To be successful, co-operative marketing must be understood to be a business undertaking arising from the common desire of producers of like agricultural products to work together in the creation of a business institution suited to the commodity in question. It must be operated under a responsible management whose sole purpose is to create standardization of the product, economies in distribution, and an orderly flow into the practical channels of trade."

EXECUTIVE MEETING COVERS MUCH GROUND

(Continued from page 1)

wolves to more protected areas in Illinois, the letter stated.

Support in securing an appropriation for official assistance in ridding the country of wolves was requested. The matter was referred to the legislative committee.

Another legislative consideration had to do with the fear that the appropriation necessary to continue inspecting work under the farm products inspection law would be cut off. This matter was also refegred to the legislative committee for action.

To Help Appeal Tax Case

4. Decided to support the Madison County Farm Bureau in its appeal to the Supreme Court of Illinois concerning the decision of the lower court in Madison county which ordered that the 199 Madison County Farm Bureau members who had held back a portion of their taxes must pay with penalty. The final outcome of this case is of so much importance to every farm bureau member in Illinois that the I. A. A. will furnish both men and money in the fight which is to come.

5. Heard President Palmer of the Ohio Farm Bureau Federation tell of good work that is going on in Ohio. President Palmer stated that Ohio looks to Illinois for leadership in many things in farm bureau work. President Palmer was visitine in Chicago.

Favor State Police

6. Heard of legislative program of the Illinois Chamber of Commerce from Edward E. Gore, chairman of that body's legislative committee, and Geo. E. Stephens, who is in charge of the Chamber of Commerce legislative office at Springfield. Executive committee later in the day voted to support a measure giving police protection to rural communities. This means indorsement of state police. Frank E. Barth of the Pennsylvania State Police, told of the success of the plan in his state.

7. President Thompson announced that the executive committee had decided to place the positions of secretary and treasurer of the association on the same basis as the directors are employed. That is, there are no yearly contracts, each man being employed with the mutual understanding that if he wishes to resign or the executive committee wishes him to resign, a 60-day notice shall be served by the party who initiates the change. Secretary Fox and Treasurer Cowles both desired the 60-day basis and will continue their offices.

The date of the next meeting is April 3.

GAS TAX COUNTED FAIR IF IT RELIEVES PROPERTY TAX BURDEN

Proposal If Enacted Would Shift the Road Tax to Consumption Basis, Says the I. A. A.

"The fairest tax for those who use the highways of Illinois is the gasoline tax." So declares the Illinois Agricultural Association, through its taxation department, J. C. Watson, director.

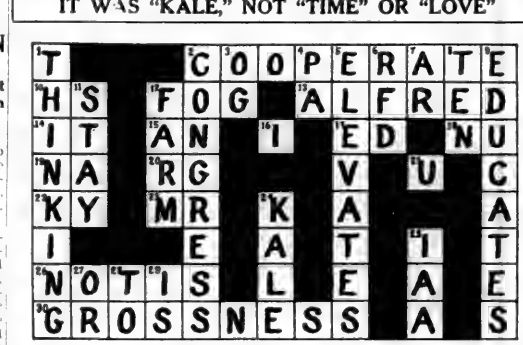
The Illinois Agricultural Association is squarely behind a tax on gasoline used to propel automobiles and trucks on the highways of the state, providing the funds derived therefrom displace and do not add to the present property tax burden. "The most insistent demand for improved roads comes from those who drive cars and trucks," says the taxation department. "They have the most to gain from improvement of highways. Their loss is greatest when the highways they must use are rough or soft, or are not usable part of the year."

Property owners have every reason to resist any further increases in property taxes for improving the public highways of the State, the I. A. A. director points out. "The burden of improving and maintaining the roads most used by motor vehicles must fall upon the users. Only in this way will they cease paying for bad roads without getting any better roads.

"The gasoline tax takes account of the speed of the machine, its weight and power, and the distance it is driven. It adapts itself equally to persons who use the roads little and to those who use the roads much. It measures the benefit which the user receives from the road. Furthermore, the gasoline tax is easy and simple to collect."

The Illinois Agricultural Association is supporting a measure which provides for a gasoline tax to relieve in part the excessive burden of taxation now carried by farm lands and city real estate. The Association states that it wants the gas tax to displace and not add to the present property burden.

It estimates that a two cent tax per gallon of gasoline would provide about $10,000,000 annually. Of this sum, $6,500,000 to $7,000,000 would go direct to the counties for construction and maintenance of State Aid roads, and the balance would go to the State Aid fund, distributed to the counties where the need is greatest. A two cent tax, it is believed, would take $4,000,000 off the State property tax books and thus relieve property of part of its tax burden.



TELLS WHY HOOSIERS LEAD AS PRODUCERS

"The shipping associations in Illinois," says F. H. Kelley, manager of the Producers Commission Association at Indianapolis, "as a whole are still less loyal to their own marketing organization than those in Indiana. We attribute this in part to the fact that the Indiana associations being much closer to the market, send many more men to see the actual marketing process and to investigate their own marketing organization first hand. In fact, many Indiana counties have been sending delegations of from 30 to 80 men from different parts of the county to market, for a detailed study of the Producers. Unbiased investigation has convinced these men that the way to sell their live stock is through the Producers. In Illinois the average consignor to a shipping association does not come to market often, and consequently a manager who is prejudiced, not having the weight of the shippers' first hand knowledge of the market, can more easily ship to Old Line firms.

"Through the co-operation of county farm bureaus and the Indianapolis Producers, local stock yard grading demonstrations are being held in the Indianapolis trade territory and are proving popular. Recent demonstrations have been held at Neoga in Cumberland county, Illinois, and at Bethany, Lovington and Sullivan in Moultrie county. Arrangements have been completed to hold seven of these demonstrations in Champaign county soon."

One hundred twenty-five Vermilion county farmers recently met with their farm adviser to discuss their seed corn problems for 1925.

IT WAS "KALE," NOT "TIME" OR "LOVE"

Judging from all the letters that have come into the I. A. A. office from farm folks, including executive committeemen, in answer to the cross-word puzzle in the February 28 issue of the RECORD, we discover that the thing has created a mild tempest—especially with one word.

Look at the solution and compare it with the one you doped out. How did you answer 24 down? We were showered with a wide variety of possibilities on that one—as might be expected for the problem under discussion. "Time," "love," and "kale" are the three words suggested by most contestants and according to our official "builder, "kale" is the only right one. These words were defined as "something of which you never get enough."

One of the pleasant surprises in connection with the attempt was the receipt of a letter from H. Strotheide, a nine year-old farm boy from Highland, Madison county. All of his answers—except "kale"—were correct. From his own testimony we have it that he worked the thing with practically no help.

WANT BETTER MILK MARKETING SYSTEM IN 11TH DISTRICT

Farm Bureau Officers and Advisers Hear Talks on Co-operative Problems at Wheaton

A more adequate milk marketing system than now exists was the chief desire expressed by the representatives of the county farm bureaus of Lake, Cook, Kane, DuPage, and Will counties in their first district meeting of the year at Wheaton on Feb. 26.

That the representatives are dissatisfied with present milk marketing conditions was expressed in an afternoon of discussion on their dairy problems following a talk by A. D. Lynch, director of dairy marketing. W. J. Schreck of Waukegan, a dairy farmer, explained how a group of dairymen, of which he is a member, co-operate in furnishing milk to one buyer.

Considerable interest was shown in the possibilities of co-operative poultry and egg marketing. In the forenoon, F. A. Gougler, director of the poultry and egg marketing department, discussed the Minnesota plan of co-operative egg marketing. It has been working successfully in the Gopher State and has lessened the cost of getting eggs from the nests to consumers' breakfast tables at a fair saving to both, Mr. Gougler stated.

Resolutions were adopted declaring: (1) the need for a more adequate milk marketing system than now exists; (2) endorsing the full legislative program of the Illinois Agricultural Association, which include a constitutional amendment for revenue changes, a gas tax in place of some present tax and assistance in furthering the eradication of bovine tuberculosis; (3) endorsing the invitation of the Lake County Farm Bureau's invitation to the Illinois Farmers Institute to bring its 1926 annual meeting to Waukegan and (4) urging lower freights in lieu of abolition of surcharges on Pullman fares.

William Webb of Plainfield road, Joliet, presided. He is an executive committeeman of the Illinois Agricultural Association representing Congressional districts 1 to 11 inclusive and is also president of the Will County Farm Bureau.

Others present from Will county were: C. J. Luther, Wilmington; Fred Schweizer, Elwood; John Cryder, Fred Frank, Guy Heath, Howard Phelps, Howard Klett and Wm. Cryder, Plainfield; Geo. Hinze, Beicher; Russel Webb, Joliet; J. Franklin Hedgcock, farm adviser, and Roland Clark, assistant.

Will C. McQueen of Elgin, represented the Kane County Farm Bureau.

Lake County Farm Bureau was represented by Willard Darrell, Waukonda; W. J. Shreck, Libertyville; Ira G. Stephens, Wadsworth, and J. J. Doerschuk, farm adviser.

Herman Schnake of Arlington Heights, represented the Cook County Farm Bureau.

The DuPage County Farm Bureau was represented by Harold C. Vial, George B. Goss, Wilton B. Lehman, Lee O. Littleford, C. R. Wimpress, Otto Heuer, Robert Plane, Wm. Ross and E. A. Carneross, farm adviser.

EARLY COLLECTIONS BEST, SAYS AUDITOR

That early collections of Farm Bureau membership dues are the easiest is borne out by the report of L. A. Evans, membership auditor for the I. A. A. Woodford County Farm Bureau, he points out, was the first to file returns for 1925 with the I. A. A., reporting a total of 92 per cent collections by February 5, on dues payable January 1, 1925. Woodford county is considered the pioneer county in farm account work, and Evans ascribes to its business-like methods the results which farm bureau officials were able to show at this early date.

On the same day another county reported 76 per cent collections. On February 6, two counties reported; one for 77 per cent and the other for 62 per cent. On February 9, one county reported for 84 per cent and another reported a collection of 83 per cent.

"It is this kind of spirit which spells success in farm bureau work," says Evans. "It is not surprising to see why farmers pay their dues promptly when farm bureau officers are on the job early.

ALL FORCES WORKING TO RELIEVE THE FARM TORNADO SUFFERERS

THREE-LEGGED LAW PLATFORM GALLOPS INTO FAVOR

LIVELY DISCUSSION OVER TICE BILL AT SPRINGFIELD MEET

All Three of I.A.A. Legislative Desires Get Hearty Endorsement Following Explanations

First-hand acquaintance with the three-legged state legislative platform of the Illinois Agricultural Association was acquired by presidents and representatives of 89 of the 92 farm bureaus during the sessions held during the special meeting on March 17 at Springfield.

Keep Babies Healthy With Clean Milk

The three legislative desires of this organization of *thinking* farmers were each discussed bit by bit and segment by segment by those who know the details as well as a handy farmer knows the mechanism of his windmill or cream separator.

What We Want

The three planks are:

1. Amendment to the revenue section of the constitution to permit a more equitable distribution of the tax burden (covered in joint resolution No. 5 introduced by Senator Simon Lantz, a hearing on which is scheduled for the near future.

2. A two-cent tax on gasoline in place of the county highway tax (covered in Senate Bill 165 introduced by Senator Cuthbertson hearing Wednesday, April 1).

3. Continuation and expansion of the effort toward eradication of bovine tuberculosis (covered in Tice Bill).

Wishes All Were There

"We wish every farm bureau member could have been present to get the first-hand information about the I. A. A. legislative program because it is really a platform of tremendous importance to Illinois agriculture," President Thompson stated after the special meeting.

Frank D. Barton of Cornell, H. E. Goembel of Hooppole and A. C. Everingham of Hutsonville, members of the legislative committee, have the three planks of the platform well under their care.

Bovine tuberculosis, that dreaded disease which lurks in apparently healthy cows and creeps into bones of infants, causing human tuberculosis of the bone, was the first one of the three planks taken up by the farm bureau officers. Their attitude on this great health question was reflected powerfully in the following resolution:

The Resolution

"We, the presidents and representatives of the Farm Bureau of Illinois, assembled at Springfield, March 17, 1925, recognizing in the tuberculosis eradication program of the state and nation the economic welfare of the live stock farmer and the protection of the life of the public and believing that more stringent laws are necessary to greater efficiency and economy in eradication work, hereby endorse, recommend and respectfully urge members of the legislature and the Governor to write into the laws of the state Tice Bill No. 176; and we further recommend and urge that adequate appropriation be provided to effectively carry on the eradication work in Illinois."

Resolution Carried Much Weight

GRUBSTAKING OUR ILLINOIS NEIGHBORS IS JOB FOR US ALL

State-Wide Committee Representing All Organizations Is Formed to Collect Funds; Need Is Great

Grubstaking their brother Illinois farmers who are destitute because of the tornado has been and still is the mighty task before the more fortunate farmers of Illinois.

A campaign for raising money for permanent farm relief was launched soon after news of the calamity came. All county Farm Bureaus not in the tornado area were sent the following telegram by Secretary Geo. A. Fox after a meeting was held in the I. A. A. office and a course of procedure determined:

"Farm damage in tornado area well over two million dollars. Stop Farm organizations and farm papers cooperating to raise and administer fund to grubstake Stricken farmers to raise crop stop Hope to raise average two thousand dollars from farmers in each county stop Take charge and go to it stop Wire answer."

Response to this telegram was almost spontaneous. County Farm Bureaus plunged into business organized for the money raising campaign, and relief for the unfortunate Illinois farmers got under full steam. All organizations representing or serving Illinois farmers joined hands in the grubstaking campaign.

Money for Permanent Relief

A central committee representing all these interests was formed Monday, March 23, to raise money for permanent relief. It was realized that the immediate needs of the tornado sufferers were well cared for by Red Cross and local agencies but who is to help these folks get started into business again? Who is to buy them get a milk cow to furnish milk and butter while planting this crop, the growing season of which is right upon Southern Illinois? Who is to help them secure seed and machinery? Who is to furnish a plow? Who is to furnish a work horse, chickens, pigs? It must be from farmers for farmers. Permanent relief is the goal of this central committee which is named "The Grubstake Committee For Farmers of Illinois". All interested farm organizations are represented on the Grubstake Committee.

Cowles Is Chairman

R. A. Cowles, I. A. A. director was made chairman and treasurer of it. His first act was to make proper connections with the Red Cross in Chicago to make certain that farmers' needs would be cared for. He dispatched Vernon Vanman, field organizer of the I. A. A., to St. Louis to make connections with the Red Cross at that city, which is in direct charge of the tornado district.

Other members of the committee are as follows:

A. V. Gregory, Editor, Prairie Farmer; Arthur H. Pace, Editor, Breeders Gazette; Jay Hinrichs Farmer, Dr. Earl V. Mumford, University of Illinois; Edgar L. Bell, Sears Roebuck & Co.; Fred Sexton, Illinois Agricultural Association and Wm. F. Kirk, Secretary, Illinois State Grain Dealers Association; Secretary, Illinois State Farmers Institute; C. A. Aspegren, Orion, President Illinois State Farmers Mutual Fire Insurance Association; Lawrence Foltz, Secretary, Farmers Grain Dealers Association of Illinois; J. P. Phillips, rural banker, Green Valley; Lewis J. H. Lloyd, Carthage, President Illinois Farm Advisers Association; Claude C. Snyder, Chicago Daily Drovers Journal; Curt Anderson, Niles, I. A. A. executive committeeman for the 24th district and also chairman of a survey and distribution committee working in all counties in the tor-

(Continued on page 4, col. 1.)

Latchstring to I. A. A. Office Always Out To Chicago Visitors

The next meeting of the executive committee is Friday, April 3. Farm bureau members and ex-executive committeemen are cordially invited by the present committee to attend when they are in Chicago on meeting days.

The usual meeting date is the first Friday of each month and unless something unusual occurs it is always held at that time. The latchstring on the I. A. A. office door is always out. Whenever farm bureau members come to Chicago they should not miss visiting the office.

His Dues Tardy. He Pays Interest: Vote Him Refund

Farm bureau loyalty was demonstrated recently when a Clark County Farm Bureau member, who had been in arrears with his organization, paid his back membership fees and also remitted interest amounting to $1.05 to the treasurer for keeping the farm bureau folks waiting.

The Clark County Farm Bureau executive committee in its last meeting voted to refund the man his interest.

I.F.B.F. Committee On Boys and Girls Clubs Aims High for 1925

"One million club members in 1925" is the slogan of the National Committee on Boys' and Girls' Club Work of the American Farm Bureau Federation, G. L. Noble, director. Every effort is being put forth to enroll farm girls and boys in junior club work throughout the country. Indications are that much will be accomplished this year, Mr. Noble believes.

There are about 6,000 farm boys and girls between the ages of 10 and 18 in clubwork in Illinois. E. I. Pilchard is state leader of this branch of agricultural extension carried on by the College of Agriculture.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 19, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or misssent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, H. E. Goembel, Hooppole.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Our Hearts go Out to Our Unfortunate Neighbor Farmers in the Tornado Area

The Tornado

("Time and tide wait for no man, and neither does the deadline" is a saying in many newspaper offices. It certainly applies in the office of the information department at this particular moment. Work on the farm relief fund has kept us jumping. The printer's boy is waiting for his last installment of news for this Record *and we dare not overstep the deadline. So with apologies to our readers we are printing a part of a radio talk given Sunday noon, March 22, over WLS, by your editor, with the hopes that it will in some small way help you to picture the need for assisting our brother farmer-neighbors of Illinois.—H. C. Butcher.)*

This message is a message to the farmers of Illinois. It is a message to you farmers who are sitting contentedly in your comfortable homes on this beautiful day of divine worship—free from harm, secure in your happiness, content with your well being and happy in your fortitude.

This message is to those good farmers and their families who can sit down to their country-famous Sunday dinners with a feeling of happiness, pleasure and comfort. All is well with you. Even the work horses are enjoying their day of rest—possibly this is their first day of green pasture this spring. You farmers are usually at peace when your stock is all cared for. The little pigs are being farrowed and you are looking forward to a good, profitable year as a result of a favorable hog market situation.

You good farmers are perhaps soon to sit down to your Sunday dinners with naught but happiness in your hearts. This is the second day of spring. The call of spring is greatest in the farm home for it brings the beginning of another season of chance. Never are farmers' hopes as high as when spring planting time comes—and now—this message is to you farmers who are in the midst of all this happiness, this security, this fortitude, this contentment on this day of rest and this time of the year when your hopes are high and the prospects shine as brightly as the glorious sun.

This message is to call you to the consideration of your fellow neighbor. Is all well with him? Many have already felt the call to aid but there is still much to do. Imagine, if you can, your neighbor and brother farmer of the tornado-stricken area in southern Illinois on this beautiful Sunday. Imagine HIS Sunday dinner. Picture, if you can, the things which he sees today as he stumbles with bewilderment in the ruins of his farm buildings. Picture his house strewn by the elements across a 40-acre field and torn into kindling wood. Picture his crumbled barn with his work horses—his Nell and his Duke—pinioned to death under the timbers of his once proudly owned barn. Picture the corn crib—twisted, wrecked and torn. Corn scattered over the muddy ground for rods and rods. Picture freshly farrowed pigs squelched to pig heaven soon after they had first seen the light of life. Picture motherly sows farrowing amongst the scattered debris with your farmer-neighbor still too bewildered and stunned to take care of farrowing problems. Perhaps this farmer has been burying his relatives, his son, his daughter or perhaps his good wife. Perhaps HIS Sunday is a burial day. It is not only material loss that your neighbor farmers of Illinois are valiantly suffering, Mr. Fortunate Farmer, but it is death and injury of the dearly beloved ones of his own family. Perhaps his Sunday is a funeral day instead of a happy day of rest and wholesome Sunday dinner such as you are having today.

Multiply this picture by a minimum of 100 and you have the condition in White county—just one of the several stricken Illinois counties. Ed Creighton, farm adviser for the White County Farm Bureau, which is doing all it can for the farmers in that county, reported to the Illinois Agricultural Association that at least 100 farms have been completely or very nearly obliterated by the terrific tornado which cut a mile swath across White county. Farms were hit and the cities missed in White county. The damage to farms alone in this county will amount to between three quarters and a million dollars, Mr. Creighton reports. Forty-nine good farm folks, farmer-neighbors of yours too, lost their lives in White county. At least one hundred more are seriously injured.

Now multiply the conditions in White county by the several counties which suffered the wrath of the elements. Then you realize what a gigantic chore there is before the farmers of Illinois to help adequately their neighbor and brothdr farmers in this time of tragedy.

Many of these farmers escaped with nothing but the very clothes which clung to their backs. Their temporary needs are being cared for by such noble agencies as the Red Cross and local committees. This, however, is only temporary relief.

How are these destitute farmers to have the opportunity of growing a crop this year? Their planting season is almost upon them. Their season starts 30 days in advance of that of Northern Illinois. With no horses with which to seed their oats, no milk to provide milk and butter for whatever number of the family remains, with few or no chickens, with farm machinery for the most part demolished and broken, with seed for planting lying sprouting on the moist ground—or with none at all—with all these obstacles to overcome, in addition to the terrific shock of the calamity, how can these farmers carry on without some assistance from their neighbor-farmers of Illinois?

If one of your immediate neighbors becomes sick and cannot plant his corn, what do you do? You and the rest of his neighbors combine your strength and plant it for him so he'll have a crop. That is the call which the farmers in every county of Illinois must heed if their unfortunate neighbors in Little Egypt are to be grubstaked to plant and harvest this year's crop.

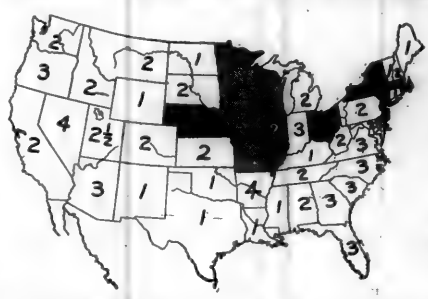
LET US GRUBSTAKE THEM TO ANOTHER GROWING SEASON!

A small contribution from each of us will do the job. Don't put it off, put it over!!

—o—

The Gas Tax

Any farmer who has followed the taxation program of the Illinois Agricultural Association knows our stand has always been for lower taxes on real property and for a more equitable distribution of the tax burden.



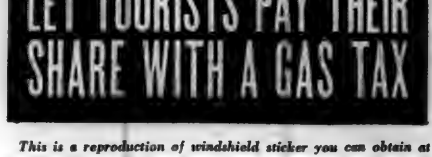
Our desire for a gas tax is in keeping with this stand. Those people who are close to the gas tax situation admit that such a tax is inevitable in Illinois. If it is inevitable, which it is because it is fair and just, then the thing to do is to see that the proceeds from it go in place of some present tax and not in addition to the burden property is now carrying.

Therefore, we are 100 per cent behind the Cuthbertson bill, which provides for a two-cent tax per gallon on gasoline used on the public highways, the proceeds from which shall go in place of the present 25 cent levy for county highway taxes.

The main points in this bill, which have been set forth in a 22-page booklet recently prepared by the department of taxation and statistics and issued by this association, are as follows:

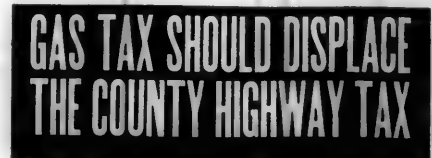
1. A tax of two cents per gallon on all gasoline sold within the state.
2. Provision for refunding the tax, under proper safe-guards, to purchasers of gasoline for agricultural, industrial, or domestic uses.
3. Substitution of the gasoline tax for the present County Highway tax on property for the State Aid roads, subject to the second provision under four (4).
4. Quarterly apportionment to each county of the gasoline tax in the proportion which its total permissible State Aid road mileage bears to the total permissible State Aid road mileage in the state, provided that no county can be apportioned a larger amount in any quarter than it could raise by one-fourth of a 35 cent tax rate applied to the latest assessed valuations of all property assessed in the county; and provided that the county board in any county which in the previous fiscal year shall not have received the equivalent of the amount which could be raised by a 25 cent property tax, shall have the power to levy a sufficient tax to make the total amount available for the State Aid roads the equivalent of the amount a 25 cent tax rate would produce.
5. Transfer to the State Highway Fund of any balance of the gasoline tax remaining after the quarterly distribution.
6. Limitation of the use of the proceeds of the gasoline tax to the State Aid roads not included in the State Bond Issue System of hard paved roads.
7. Proper administrative provisions for carrying the act into effect.

During 1924, 35 of the 48 states and the District of Columbia imposed a gas tax, the rate ranging from 1 to 3 cents per gallon in all states excepting Arkansas, which levied 4 cents. Nearly $80,000,000 was collected from the gas tax in these states in 1924. It was used or was available very largely for road maintenance and construction, according to the bureau of public roads of the department of agriculture. However, since the first of the year, other



states have adopted the gas tax. The accompanying map was prepared about two weeks ago for the booklet, and it is already out of date. The states in white have a gas tax, the figures indicating the rate of tax in cents per gallon. States in black have not approved a gas tax. The shaded states are favorably inclined. A gas tax was enacted in Iowa and Wisconsin in 1923, but was vetoed by the governors. Bills are now pending in these states with support of the governors. Minnesota, by popular vote in November, 1924, amended its constitution to permit a gas tax. Missouri approved it.

Since the map was made, Ohio has practically got a gas tax. There is favorable agitation in Nebraska. The tax is fair. It is sweeping the country. Illinois will soon become an island in a whole sea of gas-taxing states. When Illinois motorists go out of the state, they will help pay for our neighbor's roads, but when tourists come to Illinois—(and Illinois catches the great bulk of East and West and North and South traffic because of our excellent main roads), the tourists will wear and destroy our roads without bearing their share.



The amount paid by the average motorist where the tax is collected, including all makes of cars, large and small, is $10.30 per vehicle, according to the bureau of public roads.

By displacing the county highway tax of 25 cents per $100 valuation, the tax saving to all property owners, both farm and city, amounts to $10 a year for each $4,000 valuation.

Mr. Watson, our director of taxation and statistics, the authority for the booklet that the I. A. A. has issued, estimates that from $15 to $20 a year could be saved on the average 160-acre farm in the northern two-thirds of Illinois. Therefore it can easily be seen that a gas tax in place of the county highway tax would be of financial advantage to the taxpayers as well as to the advantage of the motorist who wants good roads.

This is a reproduction of windshield sticker you can obtain at your farm bureau office or by writing direct to the I. A. A. office. Put one on your car!

These windshield stickers are red with regular postage stamp glue on the front of them. They stick! Get one for your car!

Likes Our Slogan

In its executive committee meeting for March, the Illinois Agricultural Association officially adopted as its slogan the phrase: *"63,000 Thinking Farmers."* It's a slogan that has the right ring.—Rockford (Ill.) Gazette.

To the Grubstake Committee,
Care of R. A. Cowles, I. A. A. Office.

I am contributing herewith $..... for helping the Southern Illinois farmers who were left destitute by the tornado. This money will be used for "grubstaking"—setting them up in business again.

Signed .....

Town .....County .....

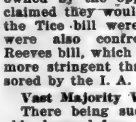
(Money sent direct will apply to your county's quota.)

LOWDEN SPEAKS ON COMMUNITY CLUB PROGRAM APRIL 24 OVER WLS

STATE LEGISLATIVE PROGRAM GAINS FAVOR

(Continued from page 1.)

dorsement given the legislative program at the last annual meeting, it came at an opportune time. For at 3 o'clock the hearing on the Tice bill, which embodies the I. A. A. requirements, was called in the House with the committee on agriculture in charge.



Never since the days of the Lantz bill, restraining the board of trade, has there been such an assemblage of farmers in the state house, representatives remarked. In the galleries were packed opposing dairymen from the Chicago milk territory, largely from McHenry county. In the seats of the representatives who are not on the agricultural committee, sat proponents of the bill, mostly farm bureau folks. However, the I. A. A.'s position being held well in hand by appointed representatives, the farm bureau presidents remained in session for a time across the grounds at the Centennial building.

Several conferences had been held during the previous week in efforts to compromise with the McHenry county dairymen, who, led by cattle traders and banking interests holding chattel mortgages on a large percentage of the stock owned by the opposing dairymen, claimed they would be bankrupt if the Tice bill were enacted. They were also confronted with the Reeves bill, which was considerably more stringent than the one sponsored by the I. A. A.

Vast Majority Want Tice Bill

There being such an unmistakable demand from the 87 farm bureaus as well as by the farm bureaus in the Chicago milk district, including McHenry county, the I. A. A. was reluctant to concede all the demands of such a minority even though it was insistent. However, certain concessions were offered but each time they were received with a request for more until finally after a conference which lasted until 2:30 in the morning on the day of the hearing, no unified agreement had been reached and the bill was kept practically in its original form.

It was in this situation which Chairman Turner of Livingston county called the meeting to order and quieted the galleries. The pro and con was to be discussed with the pros leading. Representative Tice of Menard county presented the opening argument for his bill.

"This is a health bill for the citizens of Illinois," he said. "It will further protect human lives from tuberculosis. It is a humanitarian measure. It will place Illinois in advance of other states in testing. We have a cesspool of infection in our great milk district.

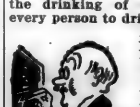
"It gives full return to the taxpayer for the money he pays in appropriations for indemnities. For every four dollars expended by the state in paying indemnities we should have four dollars worth of progress. Instead we are finding ourselves slipping back three dollars out of every four. Our duty to the tax-payers is to go ahead with full force on this work so that which has been gained will not be lost because of re-infection.

"The bill may work a temporary hardship on some few, but we have tried vainly to lessen any hardship on any locality. Our purpose is to advance every locality in such a manner that the whole state will be clean in as short a time as possible. That is the only economical and business-like way to carry on this great campaign."

Bert L. Thomas, president of the McHenry County Farm Bureau and an ardent leader of the farmers who favor testing in his county, spoke next. He prefaced his appeal with a statement that "here I am, a farmer, addressing a group of legislators in the House of Representatives. Certainly that is a change from olden times. I am talking also to my neighbors in McHenry county who are here opposing the thing for which I stand and I expect I will lose a good many friends by it, but the right will eventually prevail."

McHenry Slow in Testing

He stated that only 190 herds have been tested in McHenry county, that opposition to the test was the reason for their delinquency and that it is the unthinking farmers who will not come to the test and clean up their herds. The City of Chicago is gradually tending to draw its milk from tested cattle and farmers who look to the future will see the handwriting on the wall, he said. Representative McCarthy, who led the fight for the McHenry county opponents, attempted to heckle all speakers favoring the bill.



Thomas' remarks concerning the Chicago situation dovetailed with those of Herman N. Bundesen, health commissioner of Chicago, who followed in a fiery speech.

"The eradication of bovine tuberculosis is of vital importance to us as health officers," opened Dr. Bundesen. "Ten per cent of all milk that comes to Chicago has tubercular germs in it. Pasteurization, which is required by city ordinance, kills most of them, but pasteurization is not 100 per cent deadly because the human equation enters into the operation of the machinery.

Says 8 Out of 10 Infected

"We also know that 82 per cent of all the cattle in McHenry county are positive reactors to the tuberculin test. This is a lamentable condition.

"In Chicago we are encouraging the drinking of milk. We urge every person to drink a quart a day.

The Facts

If we—(and here Dr. Bundesen turned to the press box and asked that these alarming facts be temporized or suppressed so as not to excite the people of Chicago)—if we tell these facts broadcast to Chicago people they would soon cut down the consumption of milk. That, too, would be disastrous because the increased use of milk through our encouragement has decreased the death rate in children more than any other single factor. We have increased Chicago's daily milk consumption from 1,100,000 to 1,250,000 quarts since a year ago.

11.8 Per Cent Deaths by T. B.

"Out of every 10,000 deaths in Chicago, 11.8 per cent die because of bovine tuberculosis which appears in humans in the form of bone tuberculosis.

"We also know that 37 cities and towns have ordinances which prohibit the sale of milk from cattle not under state and federal supervision. This has caused the dairymen who cannot sell in those towns to divert contaminated milk to Chicago. We will not stand for it forever.

"Chicago has been patient," he said, "and still intends to be patient in giving dairymen reasonable time in which to eradicate tuberculosis in a hurry. But we are not going to be patient forever when the dairymen stand idly by and do nothing to improve their condition, especially when they have had ample opportunity to do so."

T. B.-Free Milk Only

Dr. Bundesen also discussed the advent of the railway glass-lined milk car which enables dealers to bring milk in from considerable distances. His efforts to confine the milk selection from the legitimate territory around Chicago has kept these people in a market, and now they had all better get busy and clean up or else, he intimated, Chicago will heed a recent request from 100 representative dairymen (farm bureau members) from Wisconsin, Illinois, Indiana and Michigan who asked that after Jan. 1, 1926, all milk sold in Chicago come from tested cows.

H. R. Smith of the National Live Stock Exchange, Chicago, was next on the stand. He told of the tremendous losses caused by bovine tuberculosis.

"Each year in the U. S., 4,300 cars of cattle and hogs are consigned to the tanks because of t. b.," he said. "Six million dollars is lost each year because of it. In 1908, one per cent of all slaughtered hogs showed evidences of t. b. It climbed steadily and in 1916 as many as 10 per cent showed it. In recent years it has been 15 per cent and today 20 per cent—20 hogs out of every 100—of all hogs slaughtered at Chicago show t. b.

Tice Bill No Experiment

"Approximately one per cent of all hogs shipped to Chicago are condemned for food purposes.

"The Tice bill is no experiment. It embodies the good points of similar legislation in other states. One of the great troubles in Illinois is that 20 or 30 herd owners hold up a whole county from getting accredited. Since the packers pay a 10 cent per hundred premium on hogs from accredited counties, these 20 or 30 objectors are keeping the whole county from considerable money which they could easily get if all would test."

R. N. Scott, of the Mercer County Farm Bureau, also spoke in favor. He reflected the great need for the Tice bill as viewed by 87 bureaus which were represented in the resolution. A. Thompson of Ford county spoke in the same vein.

Farm Bureau Men Confer

The meeting was adjourned until 8 o'clock in the evening. The farm bureau presidents and representatives and some legislators again met at a dinner at the Elks' Club. Here the plan of renewing membership now being used by the organization department was explained by G. E. Metzger. The legislative program was also discussed until the hearing was again in order at the state house.

Opponents to the Tice bill were taking their inning. Representative McCarthy opened by saying that he favored compulsory testing. Secretary E. C. Rockwell of the Chicago Milk Producers Association, in a long speech, assailed the Tice bill as un-American because it requires compulsory testing when 75 per cent of herds have voluntarily come in. He stated that the bill would bankrupt the tenant dairymen in the Chicago area and that steers were exempt from branding.

And so the fight went far into the night. Circuit Judge Edward N. Shurtleff, formerly leader of the Republicans in the House, talked against repealing the Shurtleff act which was enacted in 1911. This act makes it impossible for any town or city in Illinois to pass an ordinance prohibiting milk from cows which have not been t. b.-tested.

Judge Shurtleff For It

The 37 towns and cities to which Dr. Bundesen referred are getting around this act by stipulating that no milk shall be sold in those towns or cities unless the cattle are under state or federal supervision.

"I am for the Tice bill," the Judge said. "And, further, you dairymen would be breaking faith with the people of Illinois unless you ask for a five-million-dollar appropriation for the next two years to fight bovine tuberculosis."

After his speech, the hearing adjourned until 3 o'clock the next day. The next morning the I. A. A. legislative committee recommended rewriting certain sections of the bill, even though Representative Tice assured them that he had plenty votes to pass the bill in its original form. The changes were made in accordance with an agreement by Representative McCarthy that he would line up for anything H. R. Smith of the National Live Stock Exchange would recommend. However, when the changes were made, Representative McCarthy failed to accept them. Consequently the bill went to committee on agriculture, where it quite likely will have been voted out favorably and without material changes by the time the reader receives this RECORD.

BANKERS' PREXY

Wayne Hummer, La Salle banker, is president of the Illinois Bankers' Association. March 31 at 7:30 he speaks on the American Farm Bureau Federation's farm program over KYW upon invitation of the Illinois Agricultural Association. The title is: "When Farmers and Bankers Get Together." He believes they should pull together and is telling why. Tune in.

Who Was There

Following are the names of those who registered at the morning session. Others came later whose names were not obtained.

Adams—John A. Connery, Lewis L. Boyer; Bond—W. F. Foard, Frank Potthast; Boone—Elmer Hyde, Robert Cummings, G. H. Rogers, Harold Lampert, Phil M. Sanford; Brown—W. P. Miller, Chas. H. Snyder, W. D. Mobley, R. A. McCaskill; Bureau—W. R. Severhill, Geo. Stanneberger, Jr., D. G. Rader J. B. Habertoon.

Carroll—G. R. Bliss; Cass—Guy H. Husted, George R. Cline, Harry Crumbine, A. E. Crum; Champaign—C. S. Rhode; Christian—C. E. Hay; Cook—Herman Schwake; Coles—Harvey N. Ames; Clark—Temple R. Lovett; J. T. Sneden; Clay—Curt Anderson, Geo. W. McElyea; Christian—W. N. Grimes.

Clinton—C. C. Hofsommer; Coles—J. L. Whisnand; Crawford—N. J. Goodwin; Cumberland—Frank Hackley; DeKalb—John Nelson, F. C. Love; DeWitt—Claude W. Thorp, O. M. Allyn, M. E. Turner; Douglas—Chas. McDonald, J. E. Grant; DuPage—E. L. Gate, Harold G. Vial.

Edgar—Enos Waters, Dr. B. L. Strohl, John O. Honnold; Effingham—H. O. Henry, F. W. Wascher; Fayette—O. G. Anderson, J. A. Barton, George T. Swaim, M. Malone, A. C. Thompson; Franklin—Glenn L. Hamilton; Gallatin—L. Pinwell; Greene—L. H. Rafferty; Grundy—R. A. Barker.

Hancock—M. G. Lambert; Henry—J. W. Whisenand, W. B. Cardiff, Senator Boyd Galva, H. E. Goembel, L. W. Warner, Jacksonville; Fayette—Harry L. Gilbert, Fred Dietz, C. J. Thomas; Jefferson—Jno. A. Gage; Jersey—Thomas Cummins; Kendall—R. C. Churchill, E. L. Matlock, I. V. Cryder.

Knox—H. R. Hornbaker; B. L. Baird; Lake—Wm. C. Dillon; J. J. Lyons, C. Willard Hall; Lee—C. C. Benwell, John H. Barrett, Lindon R. Burns, Bob R. Rouse, E. Harris; La Salle—E. E. Stevenson, Fred Peck, Henry W. Watts, H. T. Marshall.

Lawrence—David McClary; Lee—J. W. Larabee, Chas. R. Yale, F. L. Riegle; Livingston—F. D. Barton; Logan—J. H. Checkley, Thomas Reonard., D. C. Shepler, Oscar Mountjoy; McDonough—M. L. Hunt, Ray C. Dongehue; McHenry—B. L. Thomas, Geo. A. Hant, Fred H. Hunes.

McLean—D. M. Stittsman; Macon—Brice Martin, E. P. Imboden, Hugh S. Baker, Frank O. Gulick, Harvey Phillips, Chas. E. Vulgamott, Jesse L. Beery; Macoupin—M. E. Rusk, J. P. Denby, H. J. Schultz; Madison—Henry Heepke; Marion—Fred J. Blackburn, W. L. Cope.

Marshall-Putnam—L. F. Boyle, A. R. Wright, Harry Blackburn; Menard—W. E. Sturgis, Herman Koster, H. E. Bells, O. C. Haggard, Chas. D. Becker, C. A. Hughes; Mercer—Scoville Lee, P. B. Scott, C. H. Belting; Montgomery—Alden Snyder, A. E. Satterlee, Walter E. Sattelee, A. A. Cress, W. C. Rebhan, John F. Foster, Sam Sorrells, Lewis Lesman.

Morgan—C. S. Black; Moultrie—T. P. Bella, J. H. Sharp, O. Warren—W. C. Turner; Ogle—C. E. Bamborough; Peoria—Wilfred Shaw, W. B. Van Cleave, Charles R. Ford; Piatt—Wm. Wiegarrver, S. E. Bull, J. J. Gross; Pike—J. A. Miller, E. C. Smith; Pope—James M. Riger.

Pulaski—E. A. Bierbaum; Randolph—Louis Glow, John Ullmann; Richland—D. H. King, president; Rock Island—W. H. Moody, Port Byron, C. J. Golden; St. Clair—H. H. Hartman, David O. Thomas; Saline—H. N. Fowler; Sangamon—J. F. Stout; Schuyler—L. E. McKinzie, C. J. Thompson, Chas. L. Bates; Scott—M. E. Murray; Shelby—Theodore Rorebier, Chas. J. Robinson; Stark—E. K. Willcox; O. L. Hatch; Stephenson—I. M. Swansey.

Tazewell—Edward T. Conaghan, Ralph E. Arnett, Joseph Morris; Union—R. K. Loomis; Vermilion—J. S. Crobher, Otis Kercher, G. W. Lenhart; Wabash—John Deputy; Warren—W. H. Rodgers, F. W. Ferris; White—Otto Casebier; Whiteside—John McNeil; Will—J. Franklin Hedgcock, C. J. Luther, Wm. Webb, W. J. Cryder; Williamson—Jacob Krumrey, W. T. Haescker, W. K. Galeener; A. M. Spitznass; Woodford—Major Darst.

Miscellaneous

Herman M. Bundesen, Chicago health department, Chicago; H. C. Becker, Chicago health department, Chicago; John H. Hugh, supervisor of milk surveys, department of public health, Springfield; Geo. W. Hess, Hilsboro; Floyd Keepers, Prairie Farmer; Dr. J. J. Lintner, in charge federal testing, Union Stock Yards, Chicago; Wallace F. McKee, commissioner of live stock, Union Stock Yards, Chicago; F. A. Laird, Springfield; Thomas Farran, M. D., state department of public health, Springfield; H. P. Smith, commissioner, National Live Stock Exchange, Chicago; O. U. Sengo, Springfield; Earl Swingle, Hillsboro, Ill.; Albert C. Wilson, chief seed analyst, Springfield.

I. A. A. officers and directors concerned in the legislation were also present.

PROGRAM WILL BE GIVEN FROM WLS; I.A.A. SPONSORS IT

Ex-Gov. Lowden Headliner on "Co-operative Marketing;" Midwest Farm Bureau Presidents to Speak

If all the barns in the largest county in Illinois were put together to make one gigantic auditorium, quite likely it would not be large enough to house all the people who will be listening in the Midwest Radio Community Meeting, the program of which will be given over WLS at Chicago, Friday evening, April 24, 7:30 to 9:30. This meeting is being called the "world's largest community gathering."

Realizing that farmers of the middle west have very few opportunities of hearing the really big men in farm leadership, the Illinois Agricultural Association has made arrangements to bring the foremost leaders in agricultural thought to the very firesides and platforms of farm homes and community clubs in the middle west by means of the great informer—radio.

The first of the Midwest Radio Community Club meetings, which will be held at various times in the future, has Ex-Governor Frank O. Lowden as the headline speaker. He will talk on "Co-operative Marketing" in a 30 to 40 minute address. President Thompson will preside. The editors of the Orange Judd Illinois Farmer and Prairie Farmer will also speak.

Community Clubs Urged to Meet

Community clubs are urged to meet on this night with a high-powered radio and loudspeaker connected for the occasion. If none of the community club members have a radio that can be obtained, it is suggested that local radio stores be solicited to furnish and operate one of their sales models. In many counties, the county Farm Bureaus have radio equipment for community use. Community singing will be tried out over the radio.

In addition to the community club gatherings which are urged to be in session, farmers who have radios are solicited to invite their neighbors over for the evening's entertainment. Farmers who do not have radios are urged to "get invited" over to their radio-owning neighbors.

Other States Participating

WLS is announcing this program two or three times a week. The Iowa Farm Bureau Federation, the Indiana Farm Bureau Federation and the Michigan Farm Bureau Federation will be represented by their presidents. Full publicity is being given the Midwest Radio Community Meeting in these other states.

The programs for the Midwest Radio Community Meetings are being arranged by the Illinois Agricultural Association through the information department. The complete program for April 24 is as follows:

The Two-Hour Program

Singing of "America." Community Singing lead by J. E. Checkley, Logan county farm adviser.

Opening of meeting by Sam H. Thompson, president of the Illinois Agricultural Association. Greeting to Illinois and midwest farmers.

Treasurer's report on standing of I. A. A. by R. A. Cowles, treasurer of the Illinois Agricultural Association.

Secretary's report on progress of I. A. A. work for farmers of Illinois.—By Geo. A. Fox.

Kane County Farm Bureau Quartet.

Greeting to farmers of Michigan by M. L. Noon, president of Michigan Farm Bureau Federation.

Greeting to farmers of Indiana by President Wm. H. Settle.

Greeting to farmers of Iowa by Charles E. Hearst, president, Iowa Farm Bureau Federation.

Message from Arthur C. Page, editor of Orange Judd ILLINOIS FARMER.

Message from C. V. Gregory, editor of PRAIRIE FARMER.

How-Do-You-Do song on speakers by Ford and Glen.

Introduction of Ex-Governor Lowden by President Thompson.

Song by Kane County Quartet.

Address by Ex-Governor Lowden on "Co-operative Marketing." Talk to last 30-40 minutes.

Community Singing—"Star Spangled Banner."

GRUBSTAKING OUR ILLINOIS NEIGHBORS

(Continued from page 1.)

nado district to make an accurate survey to determine the actual farm losses incurred.

Distribution Committee Functions

Others on this distribution committee, which was formed in co-operation with Samuel R. Guard of the Sears Roebuck Agricultural Foundation and George Thiem of Prairie Farmer, are: Ed Creighton, White county farm adviser; J. M. Krebbs, head of County Relief, White county; Fred Deets, President, Jackson County Farm Bureau; Fred Biere, Murphysboro; C. J. Thomas, Jackson county farm adviser; W. K. Galeener, Williamson county farm adviser; J. E. Whitchurch, Saline county farm adviser; President Fowler of the Saline County Farm Bureau; E. E. Gliek, Franklin county farm adviser, Benton; Chas. Crisp, Benton; H. H. Webb, Mulkeytown. Geo. Thiem of the Prairie Farmer and F. A. Gougler of the I. A. A., were made ex-officio members.

Great credit is due the county Farm Bureaus in the tornado district and adjacent to that area for their quick assistance to the injured and for their business-like organization for relief.

WLS on the Job (And Then Some)

Appeals for money from farmers for farmers have been made over WLS by many persons connected with the organizations represented on the Grubstake Committee. That no discrimination between members and non-members of the Farm Bureau should be made in collecting funds and that none would be made in their administration was the foundation-thought when plans were first made in Secretary Fox's office by him and Editors Page and Gregory of Orange Judd Illinois Farmer and Prairie Farmer. The county Farm Bureaus were asked to utilize their organization machinery in collecting funds for this general farm relief.

Frank A. Gougler, I. A. A. director of poultry and egg marketing, was dispatched by Secretary Fox to the scene of the tornado soon after the news reached Chicago. He was requested to make a survey of conditions and report. He found that practically all of the assistance so far had gone to city people, yet the farm suffering was tremendous. This was no fault of those in charge, it being only natural that farm folks would receive attention last because of the distance factor. It was felt that it would be up to farm people to come to the aid of their neighbor farmers of Illinois. Other advices from farm advisers and others in touch with the situation showed the dire necessity of grubstaking the unfortunate farmers so they can get their crops in the ground.

White County An Example

Ed Creighton, farm adviser of White County, a county in which the tornado cut a mile wide swath and was particularly destructive to farm buildings and farm life, estimated that the farm loss in that county alone would be from three quarters of a million to a million dollars. It was conservatively estimated that the entire farm loss in Illinois would be well over $2,000,000. Forty-nine farmers lost their lives in White county, 25 or 30 of whom were farm bureau members, Mr. Creighton reported. 100 sets of farm buildings were demolished and 100 people were injured. Eight country school houses were demolished in his county.

By the time this Record reaches most of its readers practically every county will have raised its quota of $2,000, it is expected. This quota was set with the thought in mind that the 230,000 farmers of Illinois would contribute an average of at least $1 apiece. Contributions may be made direct to the I. A. A. office and will be credited to the respective counties. The blank on the editorial page can be used. All will be acknowledged over WLS.

Following are the telegrams which have been received up to the time the Record went to press, from the County Farm Bureaus participating in the drive. Other telegrams are arriving constantly, and it is expected that all the counties will soon have reported.

Madison County is with you.—Alfred Raut, farm adviser.

Going now on tornado relief.—Schuyler County Farm Bureau.

Directors have oked plan to raise money for farmers in the tornado district in Southern Illinois. Believe we can raise two thousand dollars or more. Will report Saturday amount raised. Grant Park raised over four hundred dollars yesterday.—Jno. S. Collier, farm adviser.

Start campaign for funds Monday. —J. C. Kline, Boone County Farm Adviser.

Starting relief fund today.—Gallatin County Farm Bureau.

Woodford county bureau directors met yesterday and organized drive for funds for farmers cyclone victims. —H. A. DeWerff, Woodford County Farm Adviser.

Executive committee is taking up matter of relief for farmers in tornado area.—E. H. Walworth, Macon County Farm Bureau.

I am sending out a call for relief funds to be contributed at my office and will forward to you.—D. E. Warren, Ogle County Farm Adviser.

We will do our part. Send details. —E. A. Bierbaum, Pulaski County Farm Adviser.

County dairymen's meeting in session when wire reached us. Committee appointed subscription blanks going out to township and school district chairmen tonight. Will report on fund Saturday noon twenty-eighth. —W. W. Wise, Whiteside County Farm Adviser.

Mr. Wise also wrote the follow letter:

"Am enclosing sample of material mailed to each school district chairman, township chairman and director. Everything was in the mail in one and one-half hours of time. Committee decided to go ahead. Big interest in your telegram at dairymen's meeting."

Greene county will co-operate to relieve farmers in devastated district. —E. M. Phillips, Greene County Farm Adviser.

Will take charge to raise cyclone area funds in this county.—J. G. McCall, Johnson County Farm Bureau.

Will campaign for tornado sufferers. Much soliciting by other organizations.—Marshall-Putnam Farm Bureau.

Will do all we can to raise our quota.—L. A. Madden, Sangamon County Farm Adviser.

Executive committee today approved plan to solicit all farmers in county for relief funds. Will report Thursday.—Ford County Farm Bureau.

Am starting campaign today for tornado relief fund.—F. R. Isaacs, Mason County Farm Adviser.

LaSalle County Farm Bureau will help in collecting relief fund. We are asking farmers in each school district to co-operate.—Walter McLaughlin, LaSalle County Farm Adviser.

County pretty well solicited already. Will do what we can.—F. H. Schacher, Effingham County Farm Adviser.

Will try to arouse interest in relief work.—Ernest D. Walker, Henderson County Farm Adviser.

Meeting last night. Farmer relief drive Friday.—H. C. Wheeler, Lawrence County Farm Adviser.

Will do what we can on storm relief. Believe you should put out special issue I. A. A. Record covering storm relief. Cover the whole situation thoughly. Many farmers and taking city papers have no idea of extent of damage and necessity of relief.—J. H. Checkley, Logan County Farm Adviser.

First school district reporting raised ninety-nine dollars for farm relief.—H. A. DeWerff, Woodford County Farm Adviser.

Will do what we can to collect for farmers tornado area.—Stark County Farm Bureau.

Lee County Farm Bureau will have one hundred men on relief fund work tomorrow.—W. I. Reigle.

Organized to raise fund. Planning county wide drive to help clean work land in White county.—R. C. Gilkerson, Edwards County Farm Adviser.

Counties in stricken area organized. Definite information being compiled. Will furnish you with same at early date. The Illinois committee for rural relief prepared to distribute all donations and supplies for rural relief. Give me your suggestions.—Curt Anderson.

Fund is being raised in Jefferson county for rural sufferers.—L. R. Caldwell, Jefferson County Farm Adviser.

V. J. Banter of Jo Daviess County reports that he was calling his committee on Monday, March 21, to outline a plan of action.

Executive Committeeman R. K. Loomis of Makanda in Jackson county writes:

"I saw Fred Deets, president of the Jackson County Farm Bureau and adviser C. J. Thomas. We can count on them for anything. Mr. Thomas said he could name every farmer who was hit. He believes that there will be sufficient funds, provided we can get proper distribution. But the farmers cannot build at this time of the year.

"We believe that we will have to stay with these men until Mr. Thomas and we are going to do this thing up right. I think nearly all of them own their own farms and part of the job is to encourage them to stay and rebuild. They will probably do this if they do not have to mortgage. Mr. Thomas thinks the immediate need of many is a temporary barn to be made out of what is left."

"The Winnebago County Farm Bureau is sending $100 to the I. A. A. office today," said a voice over the phone from that county. "More is coming."

Below is a list of Farm Bureau and Illinois Agricultural Association members who were totally or partially wiped out by the storm in White county. The list was furnished by Ed Creighton, farm adviser.

Sam Sherman, Alva Flynn, Jerry Nelson, Ed. McCarty, John Fields, Eva Williams, Ed. Erkman, Marion Bleeks, Alex Jordan, John Finney, C. S. Conner, J. E. Wills, Adam Lutz, Chas. Meyers, Henry Gates, Jacob Mauer, Geo. Speck and Son, C. W. Seitz, Emanuel Kallenback, Wm. Hubbels, Wm. Moser, A. E. Fryxendall, Roy Stokes, E. W. Johnson, James T. Garner, Albert Bramlett, Loren Boultinghouse, Elgin Britton, George Brown, Joe Ridgeour, Dr. J. T. Legler, Scott Furgerson.

HATS OFF TO PAST, COATS OFF FOR FUTURE, IS SENTIMENT OF FRUIT MEN AT 1ST MILESTONE

Illinois Fruit Growers' Exchange Holds First Annual Membership Meeting at Centralia. Point to Hiring of Sales Manager and Adoption of Trade-Name as Big Achievements.

The first annual membership meeting of the Illinois Fruit Growers' Exchange is history.

J. O. Lawrence Sales Manager

On March 14, 35 men, most of them members of the Exchange, met in Centralia. Satisfaction over the accomplishments of the past year, optimism concerning the future of the organization, good leadership, clear thinking on the part of the delegates present, a willingness to tackle common problems of marketing and financing, and general good will marked the entire session of the meeting. It was business from start to finish.

I. D. Snedeker, president of the Exchange since the organization re-incorporated under the present name on February 29, 1924, opened the guns on the Growers' fruit and vegetable marketing problems. He first expressed the appreciation of the board of directors for the co-operation accorded them by the member associations.

Made Important Step

"During the past fiscal year," said Mr. Snedeker, "we decided to hire a sales manager whose purpose it would be to get acquainted with the members and also to boost the products of Illinois. This will be done in co-operation with the Federated Fruit and Vegetable Growers, Inc. J. O. Lawrence is the man we hired. We have also arranged it so that our finances are handled through our own association, and we have the assurance from the Illinois Agricultural Association that its transportation department will give us their assistance in the handling of claims.

"There has been much branching out last year. Much work has been done. The prospects for the coming year are even brighter, and we cannot question the growth of the co-operative movement."

A. B. Leeper, general manager of the Exchange, in his report stated it as his belief that the organization stands alone among members of the Federated in the matter of hiring its own sales manager, at the same time retaining full membership in the national federation on a three-year contract.

In commenting on Manager Leeper's report, Mr. Snedeker, chairman of the meeting, said: "I feel great confidence that our Illinois products will have a more and more reliable home market and that foreign competition will grow less."

Adopt Constitution

The entire constitution and by-laws as framed by the Exchange at the time of re-incorporation under the new name and according to the specifications of the Illinois Co-operative Marketing Act a year ago was read in full. With a minor amendment, it was adopted by unanimous vote.

Elect Board of Directors

The first annual membership meeting was attended by delegates from 10 member fruit marketing associations in southern Illinois and five individual member-growers. The following were elected the board of directors for the coming year: W. L. Cope, Tonti; L. O. Day, Olney; Willis Seward, Quincy; Frank Lanter, Belleville; J. A. Gage, Texico; N. W. Casper, New Brunswick; L. N. Colp, Carterville; H. O. Smith, Newton, and R. B. Endicott, Villa Ridge.

Lawrence Outlines Plans

J. O. Lawrence, who entered the organization as sales manager on March 1, 1925, outlined the general plan of the work to be followed by his department, stating that quality of product would be stressed in shipping all the produce of the Exchange. The Exchange trade-name, "Illini," was the subject of much favorable comment and discussion. How to keep it constantly before the public was dwelt upon at length.

Pass Resolutions

Resolutions were adopted at the meeting to memorialize the 54th General Assembly to appropriate sufficient funds to the Division of Standardization and Markets, State Department of Agriculture, as per the requests of that Division for the continuance and expansion of its activities. Another resolution was to the effect that the gratitude of the Illinois Fruit Growers' Exchange be extended to the University of Illinois, the I. A. A., the various farm bureaus, and to other organizations for assistance and moral support during the re-organization of the Exchange.

Re-elect Officers

In the directors' meeting which followed the membership conclave, the old officers were re-elected: I. D. Snedeker, Jerseyville, president; W. L. Cope, Tonti, vice-president; and W. L. Parks, Patoka, secretary-treasurer. Members of the new executive committee included the same members as before: R. B. Endicott, L. O. Day, J. A. Gage, and the officers ex officio. A committee was then appointed consisting of the chairman and one member of the board, N. W. Casper, to represent the Growers at Springfield in the fight before the Legislature for appropriations to carry on State inspection of fruits and vegetables. W. L. Cope is executive committeeman for the Illinois Agricultural Association from the 23rd Congressional district.

IROQUOIS ENROLLS STRONG IN I. A. C. A.

To Iroquois county goes the honor of having the largest number of farmer co-operatives on the membership list of the Illinois **146** Agricultural Co-operatives Association, farmers' co-operative auditing and business advisory service. They are the Buckley, Leonard, Crescent City, Watseka, Goodwine, Claytonville, Woodland, and Cissna Park elevator companies; the Cissna Park Lumber Company; and the Iroquois County Farm Bureau.

"This makes ten farmer co-operatives for Iroquois county that are members of the I. A. C. A.," says R. F. Karr, executive committeeman from the 18th district. "Who can claim more?"

One hundred forty-six is the number of farmer co-operatives now holding membership in the I. A. C. A.

Baseball Fans Meet to Lay Plans for Coming Season; 9 Districts for 25 Counties

Knock that pill for a two-bagger!

Balls—and words, too—will soon be flying through space when Farm Bureau folks will fight—county with county—for honors in the Illinois Farm Bureau Baseball League.

Twenty-five counties will be included in the league, according to G. E. Metzger, I. A. A, organization director. G. R. Kline, Cass county, is president of the league. The counties are divided into eight districts for the convenience of the players in reaching the diamond and getting back home.

At a meeting of officers held in Peoria on March 16, where 12 farm bureau counties were represented, the committee on constitution and by-laws gave a report, submitting the re-written constitution. It was provided that the directors of county farm bureau leagues get together to work out their own games.

Start Last of May

Festivities will begin about Memorial day and last until August 31.

According to the constitution, which was adopted at the Peoria meeting of the executive committee, membership in the League is limited to Illinois county farm bureaus. Only certified farm bureau members or farmers on farm bureau farms are eligible to play in the league games. The teams bear each its own expenses. Receipts are to be evenly divided between playing teams. The games are financed through the sale of reserved seats at each game.

FARM BUREAUS IN ELEVEN DISTRICTS HOLD CONFERENCES

Officers Meet With Executive Committeemen and I. A. A. Representatives to Talk Over State and Local Problems

The I. A. A. legislative program, including the Tice bill for re-coding existing laws governing bovine tuberculosis eradication, the Cuthbertson gasoline tax bill, and the proposal to amend the State Constitution as framed in 1870, to allow for needed revenue changes; the grain marketing problem; co-operative marketing of farm products; the seed corn situation; the new co-operative poultry and egg marketing plan—these and other problems of local importance made up the discussion in the farm bureau district conferences held at various places recently.

District meetings of farm bureau officers and farm bureau advisers have so far been held in 11 Congressional districts, at the following places: 11th district, Wheaton, DuPage county, Wm. Webb, Joliet, I.A. A. executive committeeman; 13th district, Aurora, Kane county, G. F. Tullock, Rockford, executive committeeman; 14th district, Bushnell, McDonough county, H. Moody, Port Byron, executive committeeman; 15th district, Galesburg, B. H. Taylor, Rapatee, executive committeeman.

Sixteenth district, Pekin, Tazewell county, A. R. Wright, Varna, executive committeeman; 17th district, Bloomington, McLean county, F. D. Barton, Cornell, executive committeeman; 18th district, Danville, Vermilion county, R. F. Karr, Iroquois, executive committeeman; 19th district, Mattoon, Coles county, J. L. Whitehand, Charleston, executive committeeman; 21st district, Carlinville, Macoupin county, Sam Sorrells, Raymond, executive committeeman; 22d district, Belleville, St. Clair county, Stanly Castle, Alton, executive committeeman; and 23rd district, Salem, Marion county, W. L. Cope, Salem, executive committeeman.

DEFENDS FARMERS IN TELEPHONE HEARINGS

Three departments of the Illinois Agricultural Association recently represented farmers' interests in hearings on 14 applications before the Illinois Commerce Commission relative to proposed telephone rate increases by companies suffering losses from the sleet storm during the winter. The finance, accounting, and legal departments appeared before the commission in behalf of farmer patrons.

FARM ADVISERS TO ADDRESS FARM FOLKS

Tune in on your farm adviser in April!

April 7 marks the first of the farm advisers' radio talks over WLS, Chicago. J. W. Whisenand, Henry county, will start the ball rolling at 12:30 on "Making alfalfa and sweet clover grow in Henry county." At 8:40 P. M. the same day he will speak on "Saving live stock dollars in Henry county."

The special farm advisers' radio program has been arranged by the I. A. A. Other radio broadcasts scheduled in this series for April are:

April 13, 12:30 P. M., A. A. Olsen, "Warren County Farm Bureau live stock shipping association." April 14, 12:30 P. M., J. H. Checkley, "When farmers get together in Logan county;" 8:40 P. M., Dan G. Davies, executive committeeman of the Logan County Farm Bureau." April 20, 12:30 P. M., T. H. Roberts, "Clean farms and high yields." April 21, 12:30 P. M., L. A. Madden, "Treating seed corn for disease in Sangamon county;" 8:40 P. M., "Essentials in grain marketing as the farmer sees it." April 27, 12:30 P. M., Dan G. Davies, executive committeeman in place of J. E. Watt, farm adviser, on "Community happiness in Kane county." April 28, 12:30 P. M., W. A. Hertington, "Our Stephenson County Farm Bureau limestone project;" 8:40 P. M., "Co-operative dairy marketing in Stephenson county."

The farm advisers' program for May will be announced in another issue of the Record.

"The Tice Bill was reported out favorably by the Agricultural Committee with amendment agreed upon and sixty-day retest on grade cattle made for July 1, 1927," wired M. H. Petersen from Springfield as the RECORD went to press.

Office employees of the Illinois Agricultural Association raised $302.50 for the Grubstake Committee.

MISS MARY G. BURNHAM, LIBRARIAN
UNIVERSITY OF ILLINOIS,
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday For 63,000 *thinking* Farmers—April 11, 1925 | No. 7

ILLINOIS FARMERS RESPOND NOBLY WITH CASH FOR NEIGHBORS

THREE-LEGGED LAW PROGRAM CONTINUES ROMP INTO FAVOR

Gas Tax and Revenue Amendment Gain Ground; Tice Bill Now Ready for House Vote

That three-legged legislative platform entered in the General Assembly derby by the I. A. A. Racing Stables is a good hoss upon which to bet your money, if the indications of April 1, when two of the legs were up for examination (the gas tax and revenue amendment) do not turn out to be an April Fool joke in keeping with that day.

Under the command of Stable Master Frank D. Barton, chairman of the legislative committee, the bill for the two-cent gas tax with proceeds to be used in place of county highway taxes and the joint resolution providing for amending the revenue section of the state constitution to permit a lessening of the burden of farmers, was unwrapped for the legislators to look upon.

Committee on the Job

Groom H. E. Goembel, I. A. A. vice-president and also a member of the legislative committee, busied himself with bandages and applications of Farmer Brand Liniment while Jockey A. C. Everingham of Hutsonville, the third member of the legislative trio, sandpapered his quirk preparing for the great General Assembly Derby which will test the real strength of the I. A. A.'s three-legged legislative platform. Bandage Boys and Rubbing Doctors stood handy to help the legislative committee.

Gas Tax Recommended to Pass

The Cuthbertson bill, which embodies the I. A. A. stand on the gas tax, was due for a hearing before the Committee of Revenue on April 1. Because of the limited time of the committee and the large number of proponents and opponents wishing to be heard, Senator Cuthbertson asked that a hearing be had before the Senate as a committee of the whole. Upon his motion, the bill was voted out of committee with the formality of the recommendation that it pass. The hearing is to be April 22.

Revenue Amendment in Favor

The Lantz resolution, which gives the General Assembly broad powers in saying who shall pay the taxes, and which is the third leg of the I. A. A. legislative platform, enjoyed a rather one-sided hearing, also on April 1. The text of this resolution was decided upon following a series of meetings during the past eight months of a committee representing nearly a score of organizations. It has the support of most of them with the exception of the Illinois Manufacturers Association.

John C. Watson, director of taxation and statistics for the I. A. A., was on this committee and consequently the farmer's tax plight was not forgotten. This resolution calls for an amendment to the revenue section of the constitution and will make possible a much more equitable distribution of the whole tax costs.

A Far-Reaching Measure

It is considered the most far-reaching of any measure proposed in the state legislature this year because it has the possibilities of bringing Illinois' public money-raising scheme up to date. Taxes are now based on a state constitution adopted in 1870. If the Lantz resolution passes both Senate and House, it will then need to be passed by popular vote to become effective.

(Continued on page 3, col. 3.)

"We All Look to I. A. A. For Leadership," Says New A. F. B. F. Secretary

"We look to the Illinois Agricultural Association for leadership in many things from all parts of the United States," said Frank Evans, secretary of the American Farm Bureau Federation since February, in a talk to the I. A. A. executive committee in its meeting of April 3. Mr. Evans was invited over to get acquainted. On Monday he was also the guest at an office conference of directors and officers.

"However," Mr. Evans stated, "there are good things in other states from which you, too, can take patterns."

Mr. Evans was formerly legal counsel for the Utah Farm Bureau Federation and was successful in assisting with the establishment of marketing organizations in that state. His title with the American Farm Bureau Federation is "marketing counsel," but he holds the chair of secretary.

LAUNCH REINSURANCE BODY FOR PROTECTION OF ALL FARM MUTUALS

Association of Mutual Insurance Companies and I. A. A. Complete New Plan

A plan whereby local farm mutual insurance companies can reinsure in a state company has been worked out by representative leaders of the farm mutual insurance companies of the state and the insurance committee of the Illinois Agricultural Association.

The Illinois Association of Mutual Insurance Companies approved the general proposal of a joint committee at its annual meeting at Springfield, Feb. 10-11. Numerous conferences have been held the past six months considering various phases of the problem until at the April 3 meeting of the executive committee, the plan as agreed upon was ratified.

The principal object is to provide means for local mutual insurance companies leveling out their risks in such a way that all companies will be protected.

Work of Joint Committee

A joint committee representing the Illinois Association of Farm Mutual Insurance Companies and the Illinois Agricultural Association worked out the definite plans for launching the reinsurance company which will function in accordance with the general principles agreed upon by the two associations. It will be known as the Farmers Mutual Reinsurance Company of Illinois.

A temporary board of directors has been selected as follows: Wm. B. McFarland, Hoopeston; Geo. F. Tullock, I. A. A. executive committeeman, Rockford; C. A. Asplund, president, Illinois Association of Mutual Insurance Companies, Orion; E. J. Carmody, Towanda; Everett H. Tripp, Belvidere; I. N. Hosford, Hamilton; Otis Kercher, farm adviser, Vermilion County Farm Bureau, Danville; Frank Troeckler, Mitchell and H. A. Cress, Hillsboro.

Wm. B. McFarland was designated as secretary-manager and R. A. Cowles, I. A. A. director of finance, as treasurer.

I. A. A. Financing Company

The I. A. A. will assist in promoting the new company in much the same way as the Illinois Agricultural Co-operatives Association, auditing and business advisory service for co-ops, was launched and

(Continued on page 4, col. 5.)

FARM RELIEF SUPPLY DEPOT

This is the supply depot at Benton, Franklin county, only a few miles out of the tornado's path, where clothes, food, cooking utensils and the like have been given out by the Illinois Farm Relief Committee. Several carloads of things have gone through this depot, most of which has been from WLS listeners.

Use of Radio on Farm Doubles in One Year, I. A. A. Survey Reveals

That radio is getting more and more popular on the farm is shown by a survey made by the I. A. A. in co-operation with county Farm Bureau advisers.

A survey conducted by the I. A. A. in March, 1924, showed that there were over 20,000 receiving sets on farms in 73 Illinois counties. A rough but conservative estimate just completed brings out the discovery that radio sets on Illinois farms just about doubled since the survey a year ago.

"While radio is mostly used for entertaining," declare the farm advisers, "it is proving of great value by way of market information and lectures on farm subjects."

Probe Judge Who Threw Dairy Co-op Into Bankruptcy

The dailies have been giving reports of the progress of the special congressional committee investigating the office and official conduct of Federal Judge George W. English of East St. Louis, for the purpose of determining whether impeachment proceedings should be instituted in Congress against Judge English. Evidence of a bankruptcy ring has been presented to the investigating committee in the form of a report of investigators from the department of justice.

This report indicates flagrant violations of the law in bankruptcy proceedings in the Federal Court at East St. Louis. One of the bankruptcy proceedings which was basis for severe criticism was the case against the Illinois-Missouri Co-operative Milk Producers Association. A few dissatisfied producers with small claims against the association got into the hands of those associated with the bankruptcy ring, a proceeding was filed, a receiver appointed with only a $2,000.00 bond and the going business of the co-operative was closed.

Beside the death blow to the business and the loss of thousands of dollars to the dairymen in the district it cost the company over $20,000 to get the property of the association back in the hands of the Board of Directors.

TORNADO SWIRLED $1,338,000 OUT OF FARMERS' POCKETS

Average Loss Per Farm Is $2,330 with Insurance Deducted; Ultra Conservative Estimate

Six hundred and sixteen "cases" of farms caught in the tornado were recorded in a farm-to-farm survey made by the Franklin, Jackson, White and Williamson County Farm Bureaus in their respective counties and by mutual assistance in Hamilton county, where there is no Farm Bureau. This county was handicapped in many ways because it had no farm organization.

The total net loss by counties, with collectable insurance deducted, was as follows: Franklin, $416,228; Jackson, $224,850; Hamilton, $221,726; and White, $475,196. Only six farms were hit in Williamson county. The total farm loss in the four counties was $1,338,000. Collectable insurance amounted to between 20 and 30 per cent. The average loss per farm was $2,330.

This amount is regarded by the farm advisers in these counties as ultra conservative since the farm canvass could in no accurate way determine losses on the more intangible properties.

The detailed figures for Jackson county are illustrative of the rural conditions in the other counties. In this county, 107 farms were seriously damaged; 506 farm people were affected; 23 killed and 104 injured. Ninety-two farm houses, 29 barns and 91 sets of out buildings were demolished completely. Fifty farms had sets of farm implements totally destroyed. Thirty-one cows, 26 horses and considerable other live stock was killed. A great number were injured. Under a miscellaneous classification, Jackson county also had losses posted for entire fencing systems, fruit bearing orchards, silos and windmills.

Eight farms near Benton in Franklin county were reported as having no owners or relatives of the owners available from whom to get information.

"Our farmers are gathering supplies, such as plows, horses and other needed farm materials, to help in the cyclone district. We are planning to confine our help to Hamilton and White counties. If you have any suggestions please let us have them."—C. T. Hufford, Wayne County Farm Bureau.

FARM RELIEF SUM REACHES $103,732.17; 68 COUNTIES ACTIVE

Many Counties Over Quota; Much Money Being Held Until Drives are Completed

Farmers all over Illinois are responding nobly to the call sent out by the Illinois Farm Relief Committee for funds with which the farmers in the tornado area can be at least partially supplied with material and equipment so vitally necessary if they are to get back into business again.

Tuesday morning April 7, the total amount of money received by R. A. Cowles, chairman of the committee representing farmers' elevators, the Grange, farmers' institutes, insurance mutuals and the farm papers, had risen to $103,732.17. Sixty-eight counties had reported some activity or turned in funds. In some counties, the awfulness of the tornado has not been realized and the need of money for permanent rehabilitation has not been taken seriously. In others, local agencies collected money for emergency relief, which makes money for permanent relief harder to get.

Definite arrangements have been completed whereby all funds placed at the disposal of the Illinois Farm Relief Commitee will be expended through the Red Cross. The money will be given the Red Cross as needed.

A Humanitarian Project

Some objections have been raised to the I. A. A. and the Farm Bureaus losing their identity in administering the money, but those in charge, after careful consideration, point out that this is a humanitarian project of all farm interests in the state. Even if any one agency, such as the I. A. A., has the personnel to actually make the awards to the stricken families, the Red Cross can do it much better because of experience and trained workers.

An executive committee has been appointed from the ranks of the Illinois Farm Relief Committee which is actively supervising the work. The executives appointed by the whole committee are: B. S. Crebs; Dean H. W. Mumford; Edgar L. Bill, director, WLS; E. A. Eckert, master, Illinois State Grange; R. A. Cowles, chairman; R. K. Loomis and Curt Anderson, I. A. A. executive committeemen.

Produce Not Wanted Now

Offers of all kinds of produce such as seed corn, poultry, setting eggs and the like have been received by Chairman Cowles. He states that the best thing to do where such things are offered is to hold a public auction or ship the goods in a large lot where they can be sold. The cash is much better than the goods, Mr. Cowles states.

The Illinois Farm Relief Committee will furnish a man to accompany each Red Cross case worker when the farmers are visited to make sure that practical farm points are given the right consideration before actual awards are made. The farm bureau president, farm adviser and one other farmer will act as an advisory committee in each of the four counties where awards will be made.

Following are the contributions received by the Illinois Farm Relief Committee by Wednesday, April 8:

Adams	$ 500.00
Bond	102.60
Boone	1,438.95
Brown	265.00
Bureau	1,574.45
Cass	1.00
Champaign	85.00

(Continued on page 2, col. 2.)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, H. E. Goembel, Hooppole.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, Wm. E. Hedgcock; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, F. A. Gougler; special representative on Tuberculosis Eradication, M. H. Petersen; Legal Counsel, Donald Kirkpatrick; Co-operative Accounting, Geo. R. Wicker.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

A Good Piece of Work

One of the most significant pieces of work done for the White and Jackson county farmers who were caught in the tornado's fury was the neighborly pilgrimage of farmers from Edwards, Wabash, St. Clair and Randolph counties to clean up debris from the land homesites.

In White county, a strip nearly seven miles long of the tornado's mile-wide path was covered by 1,400 good farmers from Edwards and Wabash counties. These men furnished their own cars and with their lunches reported for work at the line of duty.

Boards, limbs, posts, barbed wire fence and the great mass of scattered debris were picked up and hauled off.

After the fields were cleaned off, the visitors cleaned up the building sites, tore apart what remained of barns and homes, and piled the lumber so part of it could be used again. Shade trees and orchards that were destroyed were sawed up and on many farms small buildings, such as sheds and barns, were put up. Some fence was stretched to keep what live stock was left from running on the crops.

A report from F. A. Fisher and H. C. Gilkerson, farm advisers in Wabash and Edwards counties, states that at least 9,000 hours of work were put in which would have cost at least $5,000.

In Jackson county, men from St. Clair and Randolph counties have been pulling a similar stunt with good results.

The generalship of the pilgrimages came through the Farm Bureaus. It is a fine illustration of the advantages of farm organization.

—o—

News That Is Good News

The news that Iroquois county has increased its membership 15 per cent in a renewal campaign that is not yet ended is certainly good news, although it was expected. This county now has 1,500 members.

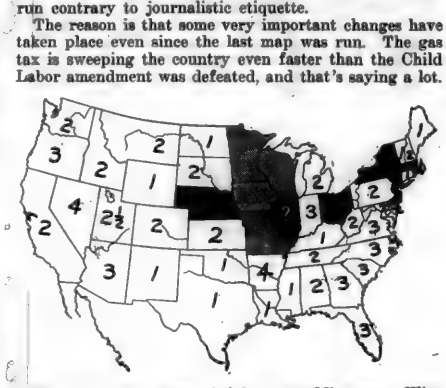
It is especially good news in view of the fact that about 40 counties fall due for membership renewals this year. It bears out the prediction that there will be a general increase in membership when the 40 counties have finished their renewal campaigns. The better we are organized, the better work we can do.

—o—

In Which We Toss a Bouquet to Ourselves

Here's a headline we picked up in the Wall Street Journal of New York City:

Illinois Agricultural Association opens drive for gas tax.



Not a bad kind of an organization when its activities make news in New York City, is it?

More on the Gas Tax

Remember the map we printed last time?

For fear you have forgotten some of its important details, we are printing it again even if by so doing we run contrary to journalistic etiquette.

The reason is that some very important changes have taken place even since the last map was run. The gas tax is sweeping the country even faster than the Child Labor amendment was defeated, and that's saying a lot.

The four shade states in the map, Minnesota, Wisconsin, Iowa and Missouri, were favorably inclined toward a gas tax when this map was made a month ago. (The states in white have a gas tax, the figures indicating the rate of tax in cents per gallon.) Great changes have come about recently in these four states.

In Minnesota, the House of Representatives has passed a two-cent gas tax bill by a vote of 105 to 6. In Wisconsin, the two-cent gas tax bill has been enacted into law. Iowa has passed a two-cent gas tax bill in both houses and it will become effective as soon as minor differences are ironed out in regard to distribution of the funds. Missouri also enacted a two-cent gas tax.

Nebraska, a deathly black in this map, should now be pure white for the state that William Jennings Bryan and his brother made famous now has a two-cent gas tax.

With Minnesota's House of Representatives feeling over 17 to 1 in favor and Iowa as good as white, the whole area west of the Mississippi will be white as a fresh snowdrift before the next Record reaches you.

There is favorable gas tax action east of the Mississippi, too. Ohio, another black spot on our map, has passed a gas tax bill in both its Senate and House, but the Governor is against it and is expected to use his veto power. However, best advices indicate that the Governor's veto will be overridden.

Our own case here in Illinois is regarded with considerable favor, regardless of the frantic shouts of the motor clubs. Several gas tax bills had been introduced at Springfield but all of them were added taxes and not replacement taxes such as the I. A. A. stands for.

This first group of gas tax bills was knocked cold as a door knob when the Governor's administration declared that no more money was needed for the hard road program at the present time. Reduction of taxes is one of the big chores of the legislators and consequently our bill is enjoying a favorable reception.

The Cuthbertson bill is the one covering the I. A. A.'s stand. In it the proceeds are to be used in place of the county highway taxes.

How much do you pay each year in county highway taxes? The average quarter-section farm in the northern two-thirds of Illinois must stand from $15 to $20 in county taxes each year. City property is hit likewise.

The gas tax itself, when levied at the rate of two cents a gallon, costs the average motorist $10.30 a year. This figure was determined by the Bureau of Public Roads, which is a part of the U. S. Department of Agriculture. It includes Fords, Packards and all makes in all of the 35 states which used the gas tax system in 1924.

If you drive a car (your tractor, gas engine and such are exempt under the Cuthbertson bill), subtract the $10.30 average gas tax cost from your county highway taxes. The difference is your saving. If you do not drive a car, your saving is more. There is the big reason why the I. A. A. is for the gas tax; it is because the funds can be used to displace some of the present burden.

—o—

Heaviest Tax Falls on Farms

Taxation based on property values tends to press more heavily on farm owners than on any other taxpayers because farm land yields a lower income in proportion to its value than other land, the U. S. Department of Agriculture has found.

This is brought out in a study of taxation in three counties in Indiana, in which the net earnings of different classes of property are compared.

From a farming standpoint, Indiana and Illinois are about as much alike as any two states in the Union. Therefore the results of the Indiana survey apply very well. As a matter of fact, the Illinois Agricultural Association has known this to be true in Illinois for some time and has been vigorously fighting to lower that burden.

So far this fight has resulted in an annual tax saving to the farmers of Illinois, members and non-members, of some two million dollars. To re-state that saving in another way would be: a tax saving averaging $8.04 per farm per year. In some counties it is a great deal more; others less.

This fight is being continued in our present state legislative program. The two-cent gas tax, the proceeds from which are to go in place of county highway taxes, means a reduction of taxes on real property. If it did not, the I. A. A. would not stand for it. This is another means of reducing taxes on real property.

Another plank in our legislative program calls for an amendment to the revenue section of the State Constitution to permit a more equitable distribution of the tax burden. The form of this amendment must first be approved by the General Assembly and then submitted to the voters for approval.

—o—

Bringing the Farmers' Side to Bear

Another benefit of farmers being organized is shown in the report of the Illinois Educational Commission recently filed with the General Assembly at Springfield.

It will be remembered that the I. A. A. went to considerable trouble to find the truth about the farmers' school problem in order that we might present a clear picture to the Illinois Educational Commission which was making a comprehensive study of the whole catalog of school problems. The Commission asked the Illinois Agricultural Association, as the representative of 63,000 *thinking* organized farmers, to give the farmers' side of the story. This was done by means of the survey conducted last summer.

Now the Commission reports its findings to the General Assembly. Here is one of the significant paragraphs in it:

"Farmers pay more for the high school education of their children and get less than any other class of citizens in Illinois."

Any action taken by the legislators will be influenced by this report.

If it had not been that organized agriculture was on the job to bring the real facts before the right people, few would have known anything of the farmers' school problem—and it probably wouldn't have done any good if they had.

—o—

T. B. Work Does Not Stop

According to several resolutions that have come into the I. A. A. office lately, it appears that many people think the I. A. A. is quitting its activities in pushing the campaign to eradicate bovine tuberculosis.

Tuberculosis eradication promotion has been a special project of the association for some time and it will continue to be given as much time and energy as is needed. A great deal of good work has been done as is shown by the fact that Illinois is leading in the nation-wide clean-up campaign.

The executive committee, however, feels that under the present conditions this work can be carried on by two regular departments. Consequently they have turned over the ribbons to the dairy and live stock marketing departments.

If experience proves that the program cannot be handled in this manner and that it is necessary to have a man especially assigned to this work, the executive committee will no doubt be disposed to change back to the special project means of handling it.

—o—

Midwest Radio Community Club Meets April 15

That the spacious and intangible galleries of the Midwest Radio Community Club will be packed for the club's first big meeting is shown by the response to the first announcement of the event made in the last Record.

There is splendid reason for a packed house, if that be possible to say about a radio event, for former Governor Lowden will speak on "Co-operative Marketing" and this is a subject of tremendous interest to farm folks, especially when presented by this speaker. It is not often that farmers get a chance to hear Mr. Lowden, even over the radio. Presidents of the state farm bureaus of Michigan, Indiana, and Iowa, as well as our own, and other notables in the agricultural field, will take part.

The date was first set for April 24, Mr. Lowden having agreed to it when written while on a vacation trip in Arizona. During his vacation, however, fire destroyed the building in which he kept his records. When he returned to Oregon, Ill., everything was in a muddle. In the jam, he found himself scheduled for a meeting in Washington, D. C. on April 23. Consequently he cannot be in Chicago on the 24th, but he will on the 15th. This is Wednesday evening and the date for which the program is now set.

Many local community clubs have made arrangements to hold a meeting especially for the radio program, but of course these will have to be changed to April 15. Local radio dealers are in most cases found willing to supply powerful radio receivers for this occasion. Where community clubs are not meeting, farmers who have radios are urged to invite their neighbors over for the evening.

CO-OP HATCHERY IN EDGAR COUNTY WORKS, THE MEMBERS DECLARE

Eggs Pass Through Farm Bureau Incubator; Baby Chicks Go Back to Home Farm Brooder

Over in Edgar county, Illinois, the first county in the state to be placed under federal accreditation as free from bovine tuberculosis, farm bureau members have established what is believed to be the first and only co-operative egg hatchery in the United States.

In Paris, the county seat, is the office of Enos Waters, farm adviser, and the hatchery is located in the basement of the office. System and efficiency was the first thing that struck us as we dropped into the dug-out. The egg hatchery filled one room. One hundred eighty eggs to an incubator, 10 rows of incubators to the row, two-deep, and three tiers straight up and down.

Edgar County Strong in Poultry

The poultry business is one of the big farming activities in Edgar county, lining up favorably in value with the county's hog industry. But, as in every other county, white diarrhea has made its inroads on the flocks. Much progress, however, has been made in stamping out the disease through the application of the blood test, on which basis the flocks are culled. And flock masters in Edgar county are confident that the disease will eventually check out, at least in flocks where good care of henneries is standard, and cleanliness the watchword.

For many years the need of an organization was felt through which the problems of poultry raising and marketing could be solved. Such an organization was perfected last summer, calling itself the Edgar County Poultry Marketing Association. The program laid out by the 15 members is as follows:

1. Each member's flock is thoroughly culled by a man trained in the work to cull, not only from the standpoint of breed characteristics, but also from that of production.

2. The flocks are first tested for white diarrhea, using both the blood and the intradermal tests.

Holds 10,800 Eggs

3. The eggs from those flocks—averaging 500 to 1,000 — are hatched in the mammoth incubator holding 10,800 eggs. The hatchery is valued at $2,200 and is the property of the organization. Every known precaution is taken to prevent the spread of any disease in the hatching process. Hatched cripples are cast out.

4. The excess breeding stock, baby chicks and hatching eggs from these flocks will be marketed through the organization. All poultry supplies needed by its members will be purchased co-operatively and it is hoped that the selling of commercial eggs and poultry may become a function of the organization if the membership is increased sufficiently to give the necessary volume to this part of the enterprise.

All eggs hatching out perfect go back to the flocks from whence they came. In normal seasons the expectancy of matured pullets in a consignment of 1,000 eggs is placed at about 250, the cockerels being sent off to market. Only purebred stock is eligible.

The hatchery was installed in the farm bureau office in January and on February 1, the first consignment of eggs was received, these hatching out by February 23. The members hope to take care of 60,000 eggs during the season. This leaves an average of 4,000 eggs to the member. A manager has been hired to spend all his time on the care of the hatchery and the chicks until delivered to the owners.

Paris Convenient to All Members

No member is over 24 miles from Paris and so all the eggs are brought in by car. A limit of 10 days is set in which eggs must be delivered at the office after being laid. Non-members desiring unused space in the hatchery pay at the rate of four cents an egg.

Preferred stock amounting to $5,000 is provided for, on which six per cent interest is allowed. Profits accruing in addition are to be prorated out to members and others according to patronage.

Co-op Hatchery Stands Alone

Adviser Waters declares that the hatchery is the only co-operative one in the state and that it is booked for success, as indications already point. The association hopes to grow in membership and in volume of business, as the hatchery is to be enlarged when more space can be provided. Eventually it is hoped, a separate building will be erected to house several units of hatcheries. Officers of the Edgar County Poultry Marketing Association, which controls the incubator proposition, are: James Scott, president and manager; C. R. Boland, Secretary-treasurer; and Clinton Delap, Fred Gumm and Harlan See, directors.

Here the eggs—thousands of them—get their airing every day.

The following communications have been received from counties which report activity in the drive but which have not yet sent in funds collected.

"Peoria county grub stake relief fund now totals $3,289.56. Late reports will probably increase this to thirty-five hundred. Radio certainly has been large factor in successful drive in this county."—Wilfred Shaw, farm adviser, Peoria county.

"At the regular monthly meeting of our executive committee Friday night, April 3rd, plans were worked out to canvass the entire county in behalf of the Relief Fund. A team captain was selected for each of the ten townships and each captain will appoint from three to five men to assist him in making sure no farmer misses a chance to contribute.

"I believe I am safe in predicting that Crawford County will exceed her quota. This coming week will be devoted to thorough preparation and publicity, the following week will be spent in solicitation."—Henry F. Crosby, farm adviser.

"We are working on the grubstake fund and while the response so far as we have gone is splendid we are not in a position to say how much money Iroquois county will raise but we are optimistic in believing that we will raise our $2,000. In view of the fact that other organizations have made solicitations in a number of communities this work is a little slow. We have about $400 raised now and we believe our efforts are just getting under way."—L. W. Wise, farm adviser, Iroquois county.

"We have been greatly hampered in getting the accurate survey completed owing to the fact that good men were not available. We are now compiling the last of the figures and hope to be able to send you results tomorrow."—C. J. Thomas, farm adviser, Jackson county.

"We have raised $2,809 here and sent to the Red Cross at Chicago to help the unfortunate people who suffered losses and injuries in the cyclone. If, after we look the situation over, we find that we should raise more money for this purpose, we will do so."—O. M. McGhee, farm adviser, Massac county.

"Moultrie County Farm Bureau has over fifteen hundred dollars for the tornado relief fund and is still going."—C. C. Turner, farm adviser, Moultrie county.

The St. Clair County Farm Bureau is working, according to B. W. Tillman, adviser.

"Henry county has $264.10 on hand for the farm relief committee and there is more than that in the county that has not been turned in yet. Tuesday is election day and we expect to get in touch with more people then," says J. W. Whisenand, farm adviser.

I.A.C.A. NUMBERS 30,000 MEMBERS

At the beginning of the year, membership in the Illinois Agricultural Co-operatives Association, **150** farmers' co-operative auditing and business advisory service agency, numbered 117. After slightly more than three months, this figure has jumped to 150, according to Vernon Vaniman, field organizer.

The last four co-ops to join the ranks are the Will County Farm Bureau, Joliet; the Stephenson County Farm Bureau, Freeport; the Pearl City Farmers' Grain and Coal Company; and the Pearl City Farmers' Co-operative Mercantile Company.

"This is the first instance," says Geo. R. Wicker, the manager, "where a co-operative store has joined our ranks, and now we have every kind of farmers' co-operative concern in our organization. The total membership now numbers 30,000 farmers."

LAW PLATFORM IN CONTINUED FAVOR

(Continued from page 1.)

The Tice bill, over which legislators were treated to first class dairy arguments as was reported in the last Record was advanced to third reading on April 1. The stage is all set for it to pass. It was amended considerably in committee, but mostly to change minor details of phraseology. One amendment of importance, however, does not make the requirement for retests on grade cattle to become effective until July 1, 1927. Retests on purebred cattle are required when the bill becomes effective July 1, 1925. Retests on all cattle will be required when 75 per cent of the herds in a county are signed up for the t. b. test. Retests are also required in modified accredited counties. A general recodification of the old, jumbled laws is also required, as well as tagging and branding reactors. The sale of serum is placed under the control of the state department of agriculture. All herds must be tested when 75 per cent of the herds of a county have been signed up for testing.

Need $3,000,000

Unless sufficient money is provided for carrying on the campaign of tuberculosis eradication, this bill will lose much of its effectiveness. Senator Barr has introduced a bill for a three million dollar appropriation for the two-year period which is needed badly as a companion measure to the Tice bill. Senators and representatives, and even the Governor, should be acquainted with the way farmers feel about this appropriation if it goes through without being pared down. The legislative committee urges that farm bureau members write their senators and representatives on all three of the I. A. A. bills.

The I. A. A. also favors a bill introduced by Representative McCarthy of Kane county, which requires milk dealers to be licensed and bonded for the protection of dairymen who sell them milk.

PROMISES NEW DAY IN EGG MARKETING AS PLANS RIPEN

I.A.A. Poultry and Egg Marketing Director Now Ready to Project the Proposition

A movement is on foot which it is hoped will do much to improve the present system of egg production and marketing throughout Illinois.

The I. A. A. poultry and egg marketing department is ready with a plan which F. A. Gougler, director, will project to Farm Bureaus throughout the state. Gougler has been working for a considerable time on a plan which would prove feasible and now he has one that will meet all needs. Here it is:

The state will be divided up into shipping districts about the size of the average county. Where possible, each district will be determined by the location of good roads surrounding it. The district also will be limited in area to include, on the average, from 15 to 20 "assembling points"—where eggs are to be delivered by farmers, and from where a "district truck" will gather the cases to haul to central shipping points.

In each of the communities or assembling points, a man and woman are to be chosen by the local farm bureau in the district. The 20 or 30 people thus selected will meet weekly or semi-monthly for discussing the outline as planned by Gougler, and each meeting will include a discussion on a well-defined project, previously reviewed and studied by all the parties concerned. These discussions, as suggested by Gougler, will be pursued in somewhat the following order: (1) Outline for studying egg grades; (2) egg packages and packing eggs; (3) fattening and marketing poultry; (4) including battery feeding of live poultry; (5) meeting quality demands by the producers (eggs and poultry); (6) important points to know about the proposed marketing plan for Illinois; (7) collecting poultry information from respective communities; (8) financing a poultry and egg marketing project; (9) legal aspects of marketing; (10) history of co-operative poultry and egg marketing and of agricultural education; (11) cold storage facilities; (12) accounting systems; (13) transportation problems; and (14) federating district problems. This makes 14 discussions in all, and the arrangement may be shifted to suit individual districts.

These "schools" will be held with the assistance of the farm adviser. When called upon, Gougler will be available to explain the entire plan. There are a goodly number of references bearing on the discussions, as prepared by the director. Whatever texts are to be used, will be held by the Farm Bureau office. Pamphlets and bulletins will be made available to each person in the discussion.

LOWDEN'S SPEAKING DATES MUDDLED IN FIRE CAUSES CHANGE

Many Local Community Clubs Report Meetings to Be Held to Receive WLS Program

The first meeting of the Midwest Radio Community Club will be held Wednesday, April 15 rather than April 24, as announced in the last Record.

Frank O. Lowden

This change was found necessary because former Governor Lowden, the principal speaker of the evening, got his dates mixed due to a fire on his farm near Oregon, Ill., which destroyed a large part of his records. He has found that he will have to be in Washington, D. C., on April 23 and of course cannot get back to Chicago to take part in a program April 24. Consequently, the date has been shifted to April 15, the time being the same as before, 7:30 to 9:30.

No doubt this change will cause considerable shifting with community clubs since many have signified their intention of holding a meeting that night with a powerful radio receiver tuned on WLS to furnish the entertainment. Radio dealers have been found willing to loan good receiving sets for the event to many community clubs which do not have radios of their own.

Invite Your Neighbor Over

Those farmers who own radios and who will not be taking part in a community meeting that night are urged to invite their neighbors over for the evening.

An addition to the program has been made since announced last time. It is Frank Evans, the new marketing counsel of the American Farm Bureau Federation who really functions as secretary but prefers the other title.

Farmers and others in Illinois' sister states — Michigan, Indiana and Iowa will also be in attendance when the first program of the Midwest Radio Community Club comes on the air April 15. The program is being announced in farm and daily papers in these states.

An attempt to lead community singing over the radio will be made which is thought to be the first time ever tried. J. H. Checkley, farm adviser in Logan county, is the leader.

The program follows:

The Two-Hour Program

Singing of "America." Community singing led by J. H. Checkley, Logan county farm adviser.

Opening of meeting by Sam H. Thompson, president of the Illinois Agricultural Association. Greeting to Illinois and Midwest farmers.

Treasurer's report on standing of I. A. A. by R. A. Cowles, treasurer of the Illinois Agricultural Association.

Secretary's report on progress of I. A. A. work for farmers of Illinois. —By Geo. A. Fox.

Kane County Farm Bureau Quartet.

Greeting to farmers of Michigan from M. L. Noon, president of Michigan Farm Bureau Federation.

Greeting to farmers of Indiana from Wm. H. Settle, president, Indiana Farm Bureau Federation.

Greeting to farmers of Iowa from Charles E. Hearst, president, Iowa Farm Bureau Federation.

Message from Arthur C. Page, editor of Orange Judd ILLINOIS FARMER.

Message from C. V. Gregory, editor of PRAIRIE FARMER.

How-D-You-Do song on speakers by Ford and Glen.

Introduction of former Governor Lowden by President Thompson.

Kane County Farm Bureau Quartet.

Address by Ex-Governor Lowden on "Co-operative Marketing." Talk to last 30-40 minutes.

Community singing—"Star Spangled Banner."

LISTEN IN!

Madden, "Testing seed corn for disease in Sangamon county;" 8:40 P. M., "Essentials in grain marketing as the farmer sees it." May 4, 8:30 P. M., R. F. Karr, Iroquois, executive committeeman for 18th district: "The farmer's niche."

Boys and girls club work has been made a major project in the Adams County Farm Bureau program for 1925. The goal is at least 100 members.

FARMERS' ELEVATORS ARE THE RIGHT BASIS FOR CO-OP MARKETING

I.A.A. Vice-President Tells Why Illinois Should Have Grain Marketing Association

H. E. Goembel of Hooppole, I. A. A. vice-president and chairman of the grain committee, recently addressed WLS listeners on the subject, "What do the farmers of Illinois want in grain marketing?"

H. E. Goembel

"Our committee," said Mr. Goembel, "has been meeting with other groups of grain men, and in particular, the officers of the Farmers' Grain Dealers' Association of Illinois and also representatives of the American Wheat Growers in Montana, North and South Dakota, and the Indiana Wheat Pool, studying their successes and failures so that we may formulate a plan that is workable and will meet the needs of grain marketing in Illinois. The Farmers' Grain Dealers' Association of Illinois and its member elevators deserve great credit for their good work in the co-operative marketing of grain.

"There are a few fundamental principles to which we all agree," said Mr. Goembel. "First, we believe that the farmers' elevator is the unit around which to build any grain marketing program in Illinois. Second, that there should be formed a selling agency owned and controlled by member elevators. Third, that the central selling agency be flexible in its set-up, so that it can handle grain for the different state groups, either by pool or on consignment, or as a commission house for direct sale."

"Reduce Taxes With Gas Tax," Is Cry At District Meets

District conferences throughout the state are lining up with the Illinois Agricultural Association in its efforts to secure favorable action by the legislature on the three-legged law program of the I. A. A.

This platform, subscribed to by the county Farm Bureaus throughout the state, contains the following planks: (1) The Tice bill for re-coding existing laws governing the eradication of bovine tuberculosis; (2) the Cuthbertson gasoline tax bill to replace the present county highway tax and make for better farm-to-market roads in all the counties; and (3) the Lantz resolution to amend the state constitution to allow for changes in the revenue laws providing for a more equitable distribution of the tax burden.

The grain marketing plan of the I. A. A., relief for the farm sufferers in southern Illinois, and the police bill also came up for discussion in several meetings. The gas tax, however, occupied the center of interest.

Those representing the I. A. A. in four of the district meetings held recently were President S. H. Thompson, Quincy; J. C. Watson, director of taxation and statistics; J. R. Bent, phosphate-limestone director; F. A. Gougler, poultry and egg marketing director; Geo. A. Fox, executive secretary; L. J. Quasey, transportation director; Geo. R. Wicker, co-operative accounting director and Donald Kirkpatrick, legal counsel.

President Thompson, speaking at the 15th district meeting at Galesburg, in commenting on the gas tax bill declared that motorists who are benefited by the good roads should take part in paying for their construction and upkeep. He pointed out the many advantages of the road system to the farmer and to communities as well and declared that if this measure is not passed now it will be, in some other form, within the next two years. Forty-one states already have the gasoline tax, the speaker declared, and stated that while many motorists are opposed to the bill they would turn around and support it if they would make a thorough study of the proposition and consider that in the long run they could save money, on the upkeep of their cars and in many other ways, through the use of good roads.

Favors State Police Bill

President Thompson also stated that he favored the state police proposition for the reason that the time has come when the people of Illinois need more police protection for the prevention of crime. Criminals do not flourish in states where police operate, the speaker declared. He stated that a number of counties turned down the police bill because they did not really realize that more protection is needed.

The following were present at the 16th Congressional district meeting held at Pekin, March 25:

Tazewell county: Ralph E. Arnett, farm adviser; Wm. Freitag, O. J. Sommer, Chester Peake, A. A. Sipfle, John Strickfaden, J. H. Yentes, Joseph Morris, W. F. Donnelly, S. B. Roth, L. R. Welk, W. F. Wurmnest, E. L. Krug, Gilbert Young, Irving Weisel, Clarence Damsell.

Peoria county: Wilfred Shaw, farm adviser; C. R. Ford, W. H. Coultas, Albert Hayes, Alva Scott, T. H. Wasson, Charles Gordon.

Bureau county: W. W. Wilson, farm adviser; Otto Wisenhuger, J. A. Ransom, Wilbur Orland, S. S. Hussey, D. G. Reder, W. R. Soverhill, D. W. Smith, J. A. Haberorn.

Marshall-Putnam: F. E. Fuller, farm adviser; Harold Wright, A. R. Wright, E. H. Riley, Wm. Drake.

Stark county: E. E. Brown, farm adviser; J. I. Colgan, R. H. Jackson, O. L. Hatch.

Those present at the 17th Congressional district meeting held at Bloomington, March 26, include:

McLean county: Harrison Fahrnkopf, farm adviser; John Klasinger, J. J. Schweizer, J. C. Nafsiger and W. E. Tenney.

Woodford county: H. A. DeWerff, farm adviser; F. L. Jones, L. M. Powell, J. I. Powell and J. E. Rocke.

Logan county: J. H. Checkley, farm adviser, and D. E. Shepler.

Livingston county: O. F. Bennett and F. D. Barton.

Ford county: G. T. Swaim, farm adviser.

At the 18th district meeting at Danville, March 27, the following were present:

Vermilion county: Otis Kercher, farm adviser; J. A. Teenan, James Stallings, C. F. Westfall, A. C. Drall, F. L. Terry, D. W. Lenhart, J. L. Brown, C. F. Finley, James Hart, W. H. Morris, J. W. Johnston, W. B. McFarland, C. G. Juvinall, and C. B. Crawford.

Iroquois county: L. W. Wise, farm adviser; R. F. Karr, F. W. Schroder, E. W. Sass.

Cumberland county: E. A. Whalin, farm adviser.

Clark county: W. W. Merritt, farm adviser; J. C. Snedeker, and T. R. Lovett.

Other district meetings taking place this week occurred at Albion, Edwards county, April 9, Curt Anderson, executive committeeman for the 25th Congressional district; Anna, Union county, April 10, R. K. Loomis, Makanda, executive committeeman for the 25th district; and Jacksonville, Morgan county, April 10, E. C. Smith, Detroit, executive committeeman for the 20th district. The date and place for the 13th district farm bureau officers to meet have not yet been determined.

April 23 marks the beginning of the second round of district meetings, when farm bureaus of the 21st district, Samuel Sorrells, Raymond, executive committeeman, will meet at Hillsboro, Montgomery county.

Kane County Features Community Clubs For Home Entertainment

Community Clubs are Kane county's strength. There are 14 of them—in a county of 15 townships — and they are strong in farm bureau membership, too. They are from 2 to 22 years old. The largest club has 110 members.

W. C. McQueen, Elgin, president of Kane County Farm Bureau, is proud of the county's record. Here's the list: Big Rock Community Club, Town Line Farmers' Club, Twentieth Century Farmers' Club, Sugar Grove Farmers' Club, West Aurora Farmers' Club, Church Road Community Club, Bald Mound Community Club, Geneva-Batavia Community Club, La Fox Community Club, Wasco Community Club, Lily Lake Community Club, Little Woods Community Club, Udina Farmers' Co-operative Community Club and Rutland Community Club.

I. A. C. A. HEAD SPEAKS IN THOMPSON'S PLACE

Called to Springfield on urgent legislative matters, our I. A. A. president, Sam H. Thompson, Quincy, was unable to deliver his message to Illinois farmers on "Changing Agriculture," as scheduled for April 1 over WLS, Chicago. In his place, Geo. R. Wicker, I.A.A. director of co-operative accounting, spoke on the subject, "Co-operative marketing of agricultural products."

Geo. R. Wicker

Mr. Wicker explained the rise of co-operative marketing as "the result of the intent of the American farmer to participate in the marketing and distribution of his products as far as practicable. A changing agriculture means that the American farmer must take his place in the business world as a business man. He must meet the competitive conditions which exist, and he must solve the problems of marketing and distribution to the point where waste is eliminated and every item of unwarranted cost is removed.

Sees Safe Growth In Phosphate Use For Coming Year

That ground rock phosphate will continue to be a money maker this year as in other years, is the assertion of J. R. Bent, I. A. A. phosphate - limestone director. Mr. Bent spent the week of March 30 in Tennessee, negotiating agreements with the Tennessee Rock Phosphate Association. He signed up all ground rock companies now operating for the I. A. A. supervisional service, in all essential details the same as in 1924.

The companies, informs the phosphate-limestone department, will do their own soliciting and advertising direct. Consumers may place their orders with the companies direct, or through the county Farm Bureaus, or they may be turned in to the I. A. A. for assignment to various companies. Whenever the request comes with the placing of an order, the I. A. A. department stands ready to supervise the taking of a sample as the car is loaded and submitting it to analysis by the I. A. A. chemist.

In every such case a report will be made to the customer in order that he will be satisfied as to the quality of material he is receiving and as to the correctness of his bill. The department also will follow up complaints arising between customer and company, as the companies have called upon the I. A. A. to act as official arbiter.

"The volume of business so far in 1925," says Mr. Bent, "is very gratifying. Indications are strong that 1925 will be the best year since 1920. We urge all purchasers to get their orders in early to insure delivery when desired; and we urge as far as possible that orders be placed in spring and early summer instead of later.

Home-Bureau Folks Appoint Committees To Carry Out Program

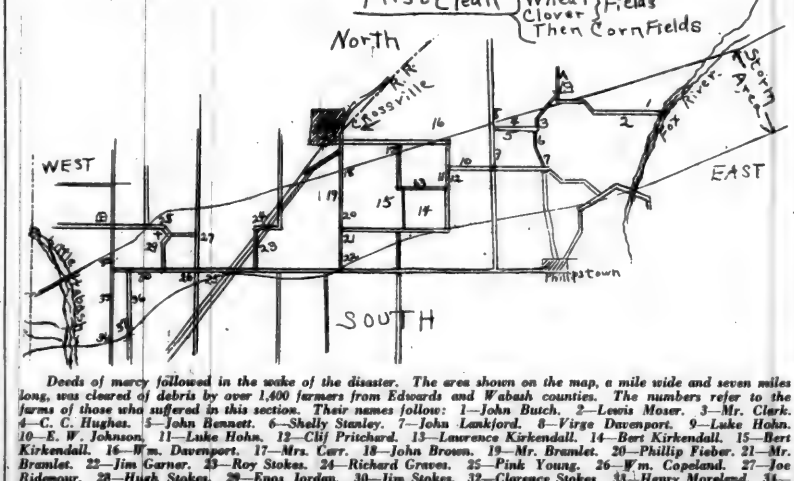
That the Illinois Home Bureau Federation, the state association of Illinois farm women, organized at Urbana in January, 1925, is going to do a lot of work, is indicated by the action of its executive committee in appointing eight committees to carry out the aims for which the organization was effected.

"Our big task is to raise the standard of living on the farms of the state and to bring about a more wholesome home life throughout the rural sections of Illinois," states Mrs. Spencer Ewing, Bloomington, president of the federation. The following committees have been appointed:

SPEAKERS' BUREAU: Mrs. H. M. Dunlap, Chairman, (Champaign) Savoy; Mrs. H. J. Meis, (Livingston) Pontiac; Mrs. O. C. Baiar, (Williamson) Johnson City; Mrs. A. Newby, (Coles) Charleston, c/o Court House; Mrs. Milo Powers, (Mercer) Aledo, R. R. 1.

PROGRAM AND POLICY: Mrs. Will Parks, Chairman, (Rock Island) Reynolds; Mrs. M. E. Craig, (Macon) N. Dennis St., Decatur; Mrs. Fred Baier, (McHenry) Woodstock; Mrs. W. C. Chesney, (Marshall-Putnam) McNabb; Miss Marlida Zearing, (Bureau) Princeton, R. R.

INTERRELATIONS: Mrs. Thomas Kirkpatrick, Chairman, (Adams) Adams County Home Bureau, Clayton; Mrs. C. M. Wright, (Kankakee) Manteno; Mrs. John Calsen, (Rock Island) Port Byron; Mrs. C. H. James, (Saline) c/o Saline County Home Bureau, Harrisburg; Mrs. Irvin Cameron, (Mercer) Aledo.



YOUTH AND ITS PROBLEMS: Mrs. Herbert Wolters, (Vermilion) Danville, Chairman; Mrs. Henry Echternach, (McHenry) Marengo; Mrs. Ralph French, (Marshall-Putnam) c/o Marshall-Putnam Home Bureau, Henry; Mrs. Harry Reed, (Livingston) Pontiac, R. R.; Mrs. D. W. Robeson, (Tazewell) Pekin.

POLITICAL EDUCATION: Mrs. Melvin Thomas, (Coles) Chairman, c/o Coles County Home Bureau, Charleston; Mrs. Freeman Johnson, (Kane) Elgin, R. R.; Mrs. Edward Erickson, (Vermilion) Hoopeston; Mrs. C. O. DuBois, (Saline) Eldorado; Mrs. Wesley Schaper, (Stephenson) c/o Stephenson County Home Bureau, Freeport.

PLAY AND EDUCATION: Mrs. Homer Johnson, (McLean) Covel, Chairman; Mrs. Herman Douglas, (Vermilion) Catlin; Mrs. R. E. Shepherd, (Kane) Sugar Grove; Mrs. A. M. Shaw, (Hancock) Adrian; Mrs. Henry Gildermaster, (Bureau) Princeton, R. R.

HOME BUREAU WELFARE: Mrs. Fred Homann, (Coles) Mattoon, R. R. 4, Chairman; Mrs. Hamill Graham, (Hancock) Denver; Mrs. Chas. Lamb, (Stephenson) Ridott; Mrs. Lewis Kirby, (Macon) Oriana; Mrs. Eugene Funk, (McLean) McLean.

PUBLICITY: Miss Edith Robbins, (Adams) Payson, Chairman; Mrs. Oakley Esmond, (LaSalle) Ottawa; Mrs. Elsa Gregg, (Champaign) Rantoul; Miss Cleo Lamb, (Stephenson) Ridott; Mrs. Ballard, (Kankakee) Chebanse.

Deeds of mercy followed in the wake of the disaster. The area shown on the map, a mile wide and seven miles long, was cleared of debris by over 1,400 farmers from Edwards and Wabash counties. The numbers refer to the farms of those who suffered in this section. Their names follow: 1—John Buich. 2—Lewis Moser. 3—Mr. Clark. 4—C. C. Hughes. 5—John Bennett. 6—Shelly Stanley. 7—John Lankford. 8—Firge Davenport. 9—Luke Hohn. 10—E. W. Johnson. 11—Luke Hohn. 12—Clif Pritchard. 13—Laurence Kirkendall. 14—Bert Kirkendall. 15—Bert Kirkendall. 16—Wm. Davenport. 17—Mrs. Carr. 18—John Brown. 19—Mr. Bramlet. 20—Phillip Fieber. 21—Mr. Bramlet. 22—Jim Garner. 23—Roy Stokes. 24—Richard Graves. 25—Pink Young. 26—Wm. Copeland. 27—Joe Ridenour. 28—Hugh Stokes. 29—Enos Jordan. 30—Jim Stokes. 32—Clarence Stokes. 33—Henry Moreland. 34—Jasper Brown. 36—Hawve Britton. 37—Chas. Hancock.

DIRECTOR OF GRAIN MARKETING SECURED BY I.A.A. EXECUTIVES

Former Director of Montana Department of Agriculture Was to Work in the U. S. D. A.

Grain marketing activities of the I. A. A. have advanced to the place where a full-time director is needed, according to H. E. Goembel of Hooppole, chairman of the grain committee, which recommended the hiring of Chester C. Davis, retiring commissioner of the Montana State Department of Agriculture.

Chester C. Davis

At its last meeting, the executive committee approved hiring Mr. Davis and he is now "getting into harness."

As head of the Montana State Department of Agriculture, Mr. Davis became an outstanding figure, his work attracting attention far beyond that state. When the McNary-Haugen bill was before Congress more han a year ago, Mr. Davis went to Washington to urge adequate legislation for farmers. Here he became recognized as an authority and was offered a position by the late Secretary Wallace as head of the division of grain standards and grain futures.

LAUNCH REINSURANCE BODY FOR PROTECTION

(Continued from page 1.)

supported. In less than a year's time, this organization now has 150 members and has rendered 132 audits.

Headquarters of the new company will be with the I. A. A. J. H. Kelker, office manager, will give part of his time to the new company as will Vernon Vaniman, field organizer of the I. A. C. A.

It is estimated that working capital to carry on the company's activities for the first year will require $5,000, which will be furnished by the I. A. A. in order to protect and further farm mutual insurance in Illinois.

When the minimum membership is secured and operations begun, a reserve fund of $10,000 will be required, which the I. A. A. will provide also.

"If the Cuthbertson bill is passed by the present General Assembly, Illinois will have lower property taxes and better roads."—President Thompson.

The Farm Bureau is a service organization,—use it. It's like a pump. You can go thirsty leaning on the handle or you can draw water by working it.

The directors of Montgomery County Farm Bureau have decided to furnish any boy or girl in the county with enough disease-free seed corn to plant one acre.

RELIEF FUND NEARS GOAL AS WORKERS IN AREA FIND NEEDY ONES

Illinois Farm Relief Committee Reports Machinery in Action to Administer Fund; Many Counties Not Yet Finished

Farm rehabilitation in the tornado area of Southern Illinois is well under way, reports R. A. Cowles, I. A. A. treasurer and chairman of the Illinois Farm Relief Committee, who, with vice-chairman Curt Anderson called on the Red Cross workers and the Farm Relief people in White, Hamilton, Franklin and Jackson counties April 17 and 18.

"The Red Cross has two rural case workers at Carmi in White county, one at McLeansboro in Hamilton county, two at West Frankfort in Franklin county, two at Gorham, one at Murphysboro, and one at De Soto in Jackson county and one at Bush in Williamson county," says Mr. Cowles.

"The Illinois Farm Relief Committee has representatives of farmers working with the case workers, assisting and co-operating with them as needed. The case workers are engaged now with representatives of the farmers in going over the area making awards of needed farm equipment and implements so that the farmers can begin to help themselves. Work in the field is beginning and neighbors are assisting in getting the field work started. Immediate minimum needs are being supplied. In Hamilton county the work has progressed to the extent that the chairman of the local committee this week will be in a position to receive contributions of commodities and supplies for distribution to storm sufferers."

Contributions to the Illinois Farm Relief Fund now total $152,980.64 according to Mr. Cowles. In view of the fact that many of the counties have not sent in their total collection as yet, and many more are waiting to complete their drives before they send in money, the final total should be well over the $180,000 quota set by the committee, he thinks.

Following is a detailed list of contributions received.

Adams	$ 700.00
Bond	658.77
Boone	1,438.95
Brown	602.50
Bureau	1,613.45
Carroll	1,438.00

Grain Merger Fights To Evade State Inquiry As It Loses First Point

Fighting to ward off an inquiry by the state, the Grain Marketing Company (the $26,000,000 grain merger), met a reverse on April 15 in Chicago when Chairman Frank I. Smith ruled that the Illinois Commerce Commission considers that it has jurisdiction over the grain merger interests.

Chairman Smith, however, granted a two weeks' continuance to allow attorneys for the corporation to prepare a more detailed statement of their legal contentions.

A public inquiry into the Grain Marketing Company was asked by the Illinois Agricultural Association in January when it became known that stock was being offered for sale to Illinois farmers.

The I. A. A. executive committee adopted resolutions in January warning farm bureau members from buying stock "either for an investment or for the purpose of supporting the company's program of marketing grain."

I.A.A. LAW PLATFORM SCORES AS DISTRICT FARM BUREAUS MEET

First Round of Conferences is Over and Second Round Swings into Form

District meetings of farm bureaus have been thinning out as the first round of conferences for 1925 has approached an end. Three conferences were held in the week of April 6, viz.: 24th district, April 9, Albion, Edwards county, Curt Anderson, Xenia, executive committeeman; 25th district, April 10, Anna, Union county, R. K. Loomis, Makanda, executive committeeman; and 20th district, April 10, Jacksonville, Morgan county, E. C. Smith, Detroit, executive committeeman.

The Illinois Agricultural Association was represented at these meetings by President Thompson, Geo. A. Fox, executive secretary; F. A. Gougler, poultry and egg marketing director; G. E. Metzger, organization director; A. D. Lynch, dairy marketing director; and Donald Kirkpatrick, legal counsel. Each of these men spoke on the work of his department, Mr. Thompson telling of the activities of the I. A. A. and pointing out some of the problems confronting the organized farmers of Illinois.

Endorse I. A. A. Stand

The three-fold I. A. A. legislative program has been endorsed liberally. The 24th district meeting passed a resolution urging an early adoption of the bills supported by the I. A. A. and advising each Senator of the district of this action. Senators and Representatives were urged to do all in their power to secure the passage of the bills.

The 25th district meeting at Anna passed a resolution requesting the Legislature that adequate appropriation necessary for the continuation and expansion of the Division of Standardization and Markets of the State Department of Agriculture be made. This conference also went into the matter of standardization of farm machinery.

April 23 marked the date of the first district meeting held in the second round. It took place at Hillsboro, Montgomery county, 21st Congressional district, Sam Sorrells, Raymond, executive committeeman. Those scheduled to represent the I. A. A. were J. C. Watson, taxation director, and G. R. Metzger, organization director.

Farm Bureau officers and farm advisers in the 11th district, Wm. Webb, Joliet, executive committeeman, will hold their second meeting at Joliet on April 28. Mr. Thompson and Mr. Metzger are slated to represent the I. A. A.

BALANCING THE SCALES

Calls I. A. A. for Help as Railway Continues to Ignore His Complaints

One request for aid from the I. A. A., successfully negotiated, led to another, in the case of C. A. Jackson of Roseville, Illinois. Mr. Jackson wrote to the transportation department last August asking help in persuading the C. M. & St. P. railroad company to repair the fence on their right of way adjoining his farm. After considerable discussion, the railroad officials had the fence repaired. Now Mr. Jackson writes from Vermilion county:

"I am very thankful to you for the help you gave me to get this fence repaired. I am going to ask another favor of you. Last November the train of the C. M. & St. P. railroad started a fire and burnt about 10 acres of my young clover and killed it. The section foreman sent in my claim for $50, but they have not written me or said anything to me as yet. So if you can help me out I would thank you very much."

FORTY COUNTIES SEND CONTRACTS TO I.A.A.

Forty counties out of the 48 county Farm Bureaus that have requested serum service for this year have so far sent in their contracts to the office of the I. A. A. live stock marketing department. Wm. E. Hedgecock, director, is turning these over to the respective serum supply companies.

Information has also been received to the effect that the other county Farm Bureaus expect to sign the contract upon meeting of their executive committees, and to forward these contracts to the I. A. A. office.

"I don't know what the farmers are down here, but the farmers up in Canada I sometimes think are almost incurable individualists. In other words, you need an abundant supply of glue with you all the time to keep them sticking together." (Applause.)—Hon. R. A. Hoey at I. A. A. annual meeting.

"TWO DOLLAR WHEAT" CALLED MISNOMER BY I. A. C. A. DIRECTOR

Finds Farmers Received Only $1.11 Per Bushel for Wheat and $.88 for Corn in 1924

That the talk of two dollar wheat and dollar born last fall and winter was mostly "talk" is shown in figures just released by the Illinois Agricultural Association which were compiled from comparative business data assembled by its department of co-operative accounting in the auditing of 23 representative farmers' co-operative elevators in Illinois during 1924.

The "two dollar wheat" actually netted Illinois farmers, after it was delivered to their local elevators, $1.11 per bushel; corn, 88 cents and oats 44 cents.

George R. Wicker, director of the department, feels that these figures apply with reasonable accuracy to the prices received by all Illinois farmers. They cover a half million bushels of wheat delivered to elevators situated at various points in the state to both large, small, and medium size elevators. They apply directly to over two and one-half million bushels of corn and over two million bushels of oats.

"There is no doubt that the general public has a false impression as to just what the farmer actually received for his grain last fall," states Mr. Wicker. "We do not wish to appear to be painting doleful shrouds on the farmers' situation, but we are desirous of finding and telling the exact truth."

The figures as compiled are a part of the Illinois Agricultural Association's comparative data service rendered to the 150 member co-operatives of the Illinois Agricultural Co-operatives Association, which functions as a subsidiary of the former, but under its own board of directors.

"The Cuthbertson bill for a two-cent gasoline tax is the most constructive piece of legislation before the Illinois General Assembly in 25 years," declares F. D. Barton, Cornell, I. A. A. executive committeeman from the 17th Congressional district and chairman of the I. A. A. legislative committee.

LAW MAKERS LOOKING UPON FARMERS' IDEAS IN FAVORABLE LIGHT

Tice Bill Passed House with Only Two Dissenting Votes; $3,000,000 T. B. Appropriation Recommended.

The three-fold legislative program of the Illinois Agricultural Association progressed considerably during the last two weeks.

Under the guidance of Frank D. Barton of Cornell, H. E. Gombel of Hooppole and A. C. Everingham of Hutsonville, who comprise the legislative committee, as well as President Thompson and good support by the county Farm Bureaus, the farmers' wishes in law making are being heard with attentive and respectful ears by the senators and representatives.

Only Two Against Tice Bill

The Tice bill, which covers this association's stand for continuance and furtherance of the present campaign to eradicate bovine tuberculosis, was passed by the House, with only two dissenting votes. One of these was by Representative McCarthy of Kane county, who led the oppositionists from McHenry county when the first hearing was held.

This is taken as proof that the oppositionists were really trying to kill the whole bill, but were masquerading as only seeking amendments. With only two negative votes against the bill, the true sentiment in the state for t. b. eradication is expressed as being practically unanimous for the program as supported by the I. A. A.

Appropriation Bill Recommended

What is considered as even more favorable action was the voting out, by the committee on appropriations, of the Barr bill which provides for a $3,000,000 appropriation to pay indemnities for the next two-year period. It was recommended that it "do pass."

A great deal of sentiment prevailed among the members of this committee for an even larger appropriation—some wanted $5,000,000. Some senators, however, in the interests of economy, were desirous of reducing the $3,000,000 appropriation, but when proponents of the $5,000,000 sum talked up, it was agreed to recommend the $3,000,000 as asked for by the Farm Bureau.

"Interviews with various senators," states A. C. Everingham, who was stationed in Springfield keeping tab on farmers' interests, "leads me to believe that the tuberculosis eradication program backed by the Illinois Agricultural Association, including the Tice bill and the necessary appropriation, will be passed speedily and substantially in its present form."

Hearing on Cuthbertson Bill

Wednesday, April 22, was the date set for a big hearing on the Cuthbertson bill, which provides for a two-cent tax on gasoline, the proceeds from which shall be used in place of present county highway taxes.

According to the legislative committee, the Cuthbertson gas tax bill is in good standing. This is principally because it is a tax reduction measure and most of the legislators are pledged to reduction of taxes. The other gas tax measures, which were additional taxes and did not displace any present tax such as does the Cuthbertson bill, have been killed in committee.

Agitation on the part of motor clubs in several Illinois cities has livened the issue. The more substantial legislators are said by the I. A. A. legislative committee to view the motor club opposition lightly. On the other hand, a great deal of propaganda against any kind of gas tax has gone to the public and this of course weighs to some extent upon the bill.

(Continued on page 3, col. 2.)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Another Voice on the Gas Tax

George W. Hinman, a writer of editorials of the Arthur Brisbane type, and who also enjoys ability which enables him to put his thoughts into writing in such a way that big city papers from New York to San Francisco print them, not long ago said some things about the gas tax which strike a sympathetic chord for the farmer. It was entitled: "Why People Want the Gas Tax." It follows:

In common with farmers in other states, the Illinois Agricultural Association is demanding a gasoline tax. The association is to appeal to the Springfield legislature tomorrow to enact such a tax into law. That is the morning's news.

The idea, of course, is that as long as the country spends five or six hundred millions a year on automobile roads, the persons who use the roads should pay a large part of the sum.

This does not look like a big business proposition, yet in a way it is. If all the gasoline used in motors this year were to be taxed 2 cents a gallon, the collections would come to something like $125,000,000 or perhaps $150,000,000.

Gasoline Easy to Tax

Now, perhaps a third of the gasoline used in motors is bought by the farmers themselves. They own more than four million of the motor cars, and many trucks and tractors besides. How does it happen then that they are for a tax that will bear heavily on them? There is no list of reasons, but it is possible to guess a few.

Plainly, the cost of gasoline is not a great burden compared with other living costs just now. If other necessities of modern life had gone up in price only as much as gasoline since the war, most persons would be living twice as easily and saving twice as much as now.

While gasoline has risen but 17 per cent since 1913, wheat has gone up 80 per cent, meats 40 per cent, shoes 80 per cent, coal 100 per cent and the building materials that help make the high rents, 90 per cent.

Gas Tax No Hardship

All together, the things we live by cost us half as much again as in 1913, and then some. Meantime, gasoline shows only a third of this general increase in price. Therefore, to put a tax of 2 cents a gallon, or even more, on gasoline would not cause great hardship—that is, as compared with the other hardships of high prices and high costs of living just now.

That is not a conclusive reason but a fairly popular one. Another reason is that, if the gasoline tax were used to build highways, it would come to pass that the people who use the new roads would be helping pay for them.

Suppose half the families in the United States have motor cars and the other half have none. That is about the case. Isn't it fairer then that the half who have motor cars should contribute largely to the cost of the motor roads, rather than that all families should contribute, whether they have cars or not?

Road Users Pay

By means of the gasoline tax the road users would be compelled to pay. By means of bond issues and general taxes, everybody is compelled to pay, whether he is a road user or not, whether he rides in a motor car, takes a street car, or walks.

The farmer thinks he is robbed and oppressed by local taxes. He is—in most cases, he is. He wants to get out from under the highway taxes. If he doesn't escape some of the present tax burdens, if he doesn't get relief soon from the local taxation on his acres, says Dr. Ely of Madison university, he is likely to be impoverished or bankrupted. In parts of the Northwest, the farmer pays in taxes nearly two-thirds of what he can rent his farm for. It is from this sort of wild taxation that the gasoline tax for hard roads would give the farmer some relief.

Wouldn't a Gas Tax Help?

There are other arguments. Should motorists from one state use up the roads in another state without paying a cent for the privilege? And, if they are to pay at all, what easier method is there than to pay every time they take in gasoline?

Can there be any end to tax-exempt bonds as long as states issue such bonds by the ten million for the construction of hard roads? And will such bond issues be ended unless some other means, like a gaoline tax, be used to bring in at least part of the money?

—o—

Its Hands Are Tied

There can be no substantial reform looking to an equalization of the tax burden while the legislature has its hands tied as it has under the present constitution of the state.

The present constitution was adopted in 1870, five years after the Civil War. We are not spending our money now like we did in Civil War days, even though we wish we could. Neither are we earning money now in the same manner as it was earned in 1870.

Things have changed. Bonds and a thousand and one other intangibles have sprung into great use since 1870. There is a greater proportion of wealth invested in bonds and other intangibles today than there was in 1870—or even 10 years ago.

The World War educated people to buying bonds through the Liberty bonds. They have been buying bonds like hot cakes since then, and for more than one reason.

One reason is that they are easier to hide from tax assessors than investments in real estate and visible property. That is an illustration of classification of property according to visibility. Real estate, and especially farm property, is visible to the assessor, consequently it gets caught. It is the visible things that pay most.

In the present day, people are coming more and more to expect no relief from under the present constitution. The proposed amendment embodied in Joint Resolution No. 4 introduced by Senator Lantz provides for an amendment to the revenue section of the constitution which will make it possible to permit the taxing of incomes. If money to run the government can be raised by taxing incomes, all the better for farmers and other owners of real property. The proposed amendment does not in itself establish any new form of tax, but it simply unties the hands of the legislature and enables them to pass laws adapting the levying of taxes to changed economic conditions.

Farmers and home-owners should get behind the Lantz resolution if they expect to have their tax burden properly distributed. The legislative committee is especially desirous that farmers write, wire or see their senators and house members urging them to support this amendment.

—o—

The Four G's and the Five M's

Illinois has a cream marketing problem as well as a good many others.

Each year Illinois farmers sell about $17,000,000 worth of cream. That is enough money to build a Keokuk dam every year and a half from Illinois cream checks.

Illinois farmers market their cream many ways. Some of them have taken advantage of collective bargaining methods and have sold together, thereby increasing their incomes.

A. D. Lynch, our dairy marketing director, says Illinois farmers can save or make a heap of money by forming cream bargaining associations.

The average butter fat price received by Illinois farmers in October, November and December of 1924, with both co-operative and private creamery prices taken, was 34.6 cents, according to Mr. Lynch. This figure was compared with the prices received in 12 other states the same date.

In Ohio it was found that the farmers were getting at private stations 4.4 cents per pound fat more than the farmers in other states were getting at private stations during the same period. The reason is that Ohio has 88 co-operative cream stations in the state, Mr. Lynch finds. There are a good many less than that in all the other 12 states which participated in the price comparison.

The averages paid in the 12 states were brought together by the dairy department of the Ohio Farm Bureau Federation with results as follows:

Ohio	38.5 cents	Iowa	34.6 cents
Michigan	38.2	Kansas	34.5
Minnesota	37.1	North Dakota	33.4
Indiana	35.8	South Dakota	33.5
Kentucky	35.5	Missouri	32.8
Illinois	34.6	Nebraska	30.8
		Oklahoma	29.3 cents

Illinois farmers could get more money if they were organized. Where there is not enough volume of cream in a community to support a farmer-owned co-operative creamery, it has been found desirable to form a cream selling organization. About five hundred cows are needed and it requires very little capital.

As a rule a building can be rented where the cream from these 500 cows can be weighed and tested by the farmers' own man. The equipment required need not cost more than $300. Mr. Lynch says that some cream clubs raise this amount by membership fees, while others have started off by borrowing money at the bank. This kind of an arrangement is known as a cream bargaining association. After the cream from the minimum requirement of cows is signed up, the total volume is sold to the highest bidder.

The Ford County Farm Bureau started one at Paxton last year. Farmers in it not only received the market price but at the end of the year paid a patronage dividend of 2.3 cents per pound.

Mr. Lynch says any group of farmers that have the four G's and the five M's can make a go out of a cream bargaining association. These are grit, git, guts and gumption, and men, milk, money, minds and marketing. To make the score even all around, the editor hereby adds "glue" to the first set, because they've got to stick.

The biggest question to settle before starting a cream bargaining association, according to Mr. Lynch, is "Will you work with your neighbor?"

The I. A. A. is prepared to help farmers solve their cream problems.

—o—

The Gas Tax Should Replace, Not Add

Illinois is now the only state west of New York not having a tax on gasoline.

This statement can be made with the qualification that Minnesota will without doubt enact some kind of a gas tax in this session of its legislature. Both branches of the Minnesota General Assembly have passed bills, but in the House it was two cents while the Senators wanted two and a half cents.

Ohio, which has been in doubt, has definitely adopted it. The Governor vetoed the bill, but it was passed over his veto in company with 33 other bills which he wished to keep from passing.

If all the good points favoring the adoption of a gas tax in Illinois were cast aside for the moment, should our legislators leave this state to be overridden by motorists from every other state without them paying some small portion of the road expenses?

And with the insistent demand for tax reduction from all parts of the state, could the legislators consistently enact a gas tax as an additional tax?

Illinois will eventually have a gasoline tax, of that there is little doubt. The question is whether it will come as an additional tax or as a replacement tax.

As has been stated before, the Illinois Agricultural Association is for the gas tax in lieu of the county highway tax. That is the main requirement in the Cuthbertson bill. Are you actively supporting it?

—o—

Where They Are Really Using Lime

Last year the farmers of Illinois used 500,000 tons of limestone on their soils. This is one-fourth of all that was used on all the soil of the United States. This record doesn't mean that Illinois is a particularly sour state, but it does mean the Illinois Agricultural Association has carried on an organized campaign to get farmers to apply the needed soil correction.—Pacific Rural Press, San Francisco, Calif.

—o—

Easterners Like This Kind

The Illinois Agricultural Association has taken steps to help the farmers of the five counties hardest hit by the tornado. That's the kind of farm relief with which everybody is in sympathy.—Philadelphia Public Ledger.

LOWDEN WONDERS IF RAINS BRING BENEFIT OR FAILURE IN TALK

Letters Endorse Idea of Having Radio Bring Farm Leaders Direct to Homes and Community Clubs

Letters from many parts of the Middle West tell the story that a tremendous audience was listening to the first program of the mythical Midwest Radio Community Club given over WLS of Chicago Wednesday evening, April 15.

All the letters speak highly of the event. These will be mounted in a scrap book and presented to former Governor Frank O. Lowden who delivered the main address of the evening, it being on the condition of agriculture. The purpose of the club is to bring big speakers into contact with farmers who otherwise could seldom, if ever, hear the leading agricultural thinkers of the day.

Following community singing led by J. H. Checkley, farm adviser of the Logan County Farm Bureau, President Sam H. Thompson opened the meeting with a short talk on "Changing Agriculture."

"There has been enough said about agriculture in the last five years to fill volumes, both as to cure and remedy," said President Thompson. "So when I started to study what had happened to the farmer, I started right at home. I lived in a country community six miles from a railroad station on a good average Illinois farm, in what is usually called the corn belt of America, and is well adapted to diversified farming and is conceded to be among the best farming districts of the country.

What are Farm Conditions?

"What has taken place here at home? Following the road east and west six miles across the township representing 24 160-acre farms on both sides of the road, we find but five farm owners farming their own farms. All the rest of those farms are now operated by tenants. Surprising as this may seem I followed the road running north and south through the center of the township six miles and found only three owners living on their farms. Another six miles streak revealed a similar condition with only four owners operating their farms. This would make a stretch of 12 miles representing 72 160-acre farms with only 12 owners operating their own farms. There must be some reason for such a wholesale change taking place in a few years.

"Farmers have been, and are, discontented, and not without reason. Some of these reasons will disappear only with lapse of time. Others come and are being improved, through education, organization and the reconstruction of agriculture. With all the improvements that have been wrought, the intelligent farmer realizes that his net profits have been growing smaller, while his land has been growing poorer and poorer and he has not been able, speaking generally, to maintain his buildings and equipment. The individual farmer has become a more efficient and intelligent producer, while he has been forced to admit that his margin of profit has been growing smaller and smaller.

Worst Losses Not Mentioned

"The disastrous effects of the agricultural depression are immeasurable. It is impossible to estimate, even approximately, the tremendous losses that have been sustained. Probably there has been a tendency to stress these losses too much. I don't think so. As a matter of fact, some of the more serious results are seldom mentioned, and we are at times inclined to refer to these losses as a thing of the past. While, as a matter of fact, many farmers are hanging on, hoping against hope, that in some miraculous way the tide will turn and bring relief. Some adopt this point of view because of a dogged unwillingness to admit defeat.

"It is proper to deal with the agricultural depression as an acute problem, and to do all that can be done to bring relief. It is more important, however, that we understand the causes for agricultural depression and that we determine the factors affecting the future of the farming business. There is a growing evidence that farmers are

(Continued on page 4, col. 2.)

EVEN THE DOG WANTS HIS SHARE

Within 17 days after the storm, the first relief award in the wind-swept area was made in White county, Illinois. The check was from the Illinois Farm Relief Committee, co-operating with the I. A. A. and providing permanent relief to farm sufferers. The photo shows Miss Margaret McGrievy, Red Cross worker; J. M. Crebs, Carmi banker; Henry Gates, farmer storm victim of White county; H. M. Baker, national disaster relief director of the Red Cross; and E. W. Creighton, White county farm adviser.

New Grain Director Has Two Lines of Work Under Way for Present

Activities in the newly created grain marketing department, with Chester C. Davis who has been the Commissioner of Agriculture of Montana now in charge, have taken shape in the form of conferences by him and the grain marketing committee with committees representing National and State Associations of Farmers' Elevators, and the Indiana Wheat Pool.

The general aim of the department is toward helping establish a grain marketing system that is truly co-operative in every respect and one that will rest on the farmers' elevators as a foundation. With this objective, two principal lines of work are under way in this department.

The first resolves into an investigation to determine whether a true co-operative, with special emphasis on the patronage dividend feature, can get onto the Chicago Board of Trade if the memberships are held by farmers' elevators organized as they are at the present time. While most farmers' elevators are co-operative in spirit, some are not so in their organization, many being stock companies supported by farmers. The point of obtaining entrance onto the Board of Trade under the Capper-Tincher act rests with the interpretation as to whether these farmers' elevators are co-operative as defined in the Capper-Volstead act, which permits co-operative marketing.

To Survey Soft Wheat Area

The second line of work is to make a survey of the soft wheat situation in Eastern Illinois in the row of counties adjacent to the Wabash river. The purpose is to determine whether it would be advantagious to the growers of soft wheat in these counties to develop a marketing plan along the line of that of Indiana.

LAW MAKERS VOTE YES ON FARMERS' DEMANDS

(Continued from page 1.)

Farmers Need Revenue Amendment

The hearing for Wednesday was scheduled to be before the Senate sitting as a committee of the whole, to whom the bill was passed by the committee on revenue without a hearing but with the recommendation that it "do pass."

The third legislative desire of the I. A. A. lies in the fortunes of the proposed revenue amendment. This amendment should have the wholehearted support of every farmer because it is by this means that he can get permanent relief from his present unjust taxes. Under the present revenue section of the Illinois constitution, taxation along the lines of present-day affairs is impossible. By securing an amendment such as is being fostered by the I. A. A., in company with other state groups, it will be possible to get more intangibles taxed, an important one being incomes.

No Reason for Alarm if Check for Reactor Indemnity Not Received

There is no cause for worry if you have waited overlong for your indemnity checks on reactor cattle.

An instance has come to the attention of the I. A. A. where a member having a reactor, received a check for federal indemnity but none for state indemnity. The I.A.A. live stock marketing department took up the matter with Dr. F. A. Laird, state veterinarian. Investigation disclosed that a check had been mailed several months previous, and apparently was lost in the mails.

On the receipt of affidavit from the owner of the reactor stock, Dr. Laird issued a duplicate check which was promptly forwarded to the farmer.

The I. A. A. announces that it is ready to follow up any like cases and that owners who do not get their indemnity checks within reasonable time should bring the matter to the attention of the dairy marketing or live stock marketing departments.

Farmer Can't Afford to Be Without Farm Bureau, Declares Mr. Johns

Claims against railroads by Illinois farmers continue to come to the attention of the I. A. A. transportation department. One of them, successfully adjusted by the I.A.A., involved a shortage of six lambs and a decline in the market due to delay in transit of a shipment to the Chicago Producers. The following letter was received after the negotiations were completed:

Gentlemen:—

This will acknowledge receipt of your letter of April 9, file number 2035, with draft attached in our favor from the railroad for $200.

We wish to thank you for your efforts in our behalf in regard to this claim and to assure you that we are very appreciative of what you have done for us. Such results as this, confirm our belief that the Farm Bureaus and the Illinois Agricultural Association are organizations that no one in the agricultural game can afford not to be affiliated with.

Ewing and Johns,
By Corwin H. Johns,
Forsythe, Macon Co.

The I. A. A. transportation department also took a hand in the case of Flagg station on the C. & N. W. Ry. in Ogle county. Under the Illinois law a railroad must have an order from the Illinois Commerce Commission either to close a station or to take off a train.

If the railroad does so without securing the permission of the Commission, it is a plain violation of the law.

This happened in the Flagg station case. In August last year, the station was closed and the agent removed.

D. E. Warren, Ogle county farm adviser, brought it to the attention of the I. A. A., and the transportation department promptly went after both the Illinois Commerce Commission and the North Western line.

Due to the fact that the station had been closed without the permission of the Commission, the station was re-opened by the railroad, and a station agent re-instated on April 20, without waiting for an order from the Commission.

A cut of $24,000,000 in farm land assessments is the record of the Missouri Farm Bureau Federation. This sister organization to the I. A. A. asked the Missouri Board of Equalization for the reduction and was able to save Missouri farmers $202,000 in taxes for 1926. John C. Watson, I. A. A. tax director, gave them assistance.

Farm accounts, hog sanitation, pig clubs, limestone-legumes-phosphate, seed corn improvement, and community meetings make up the Ford County Farm Bureau program.

SEES NEW DAY IN FORD COUNTY PLAN FOR SELLING CREAM

Integration of Effort Will Provide Volume of Business, Leaders Believe; Henry County to Follow

The cream marketing system in Illinois is taking a turn for the better.

Indiscriminate selling and buying of small and frequent quantities of cream has not worked to the advantage of the Illinois farmer, declares the I. A. A. dairy marketing department, A. D. Lynch, director, from observations extending over a period of years.

"Our past scheme of marketing dairy products has been adverse to the farmers owning a few cows, largely because of the large spread existing between producer and consumer," says the department. "This spread has been due to the excessive number of middlemen in the assembling game."

Better Days Coming

The almost universal practice throughout the state heretofore—except where local circumstances have warranted the establishment of co-operative farmer creameries—has been for the farmers to haul their cream to local assembling points or cream stations where it was bought by private individuals or by representatives of centralizer creameries; or for the farmers to ship their cream direct to centralizer plants, not owned by the producers. Recently, however, the sails of co-operative cream assembling and marketing have appeared on the horizon of a better agricultural system, says the I. A. A. department.

Mr. Lynch points to the establishment of co-operative cream clubs in various sections of the state, as one way out of the difficulty, and as a step in the direction of a more equitable distribution of income derived from the sale of butter fat in Illinois. He cites the Ford County Dairy Marketing Association as a successful example of what can be accomplished along the lines of co-operative effort in the marketing of dairy produce.

Co-ops Pay Better Prices

The Ford county association so far has but one unit—at Paxton. In the 10 months since the association was organized and began operation, it has paid approximately 2.4 cents a pound more for butter fat than the average price paid by other cream stations in Illinois in the same period. In its first nine months of operation, this co-operative has sold cream amounting to $17,989.91 — and $1,672.59 worth of eggs besides. An average of 34 cents was paid to the members and patrons per pound fat, besides a patronage dividend of 2.3c a pound.

Equipment amounting to $306.53 has been paid out of the earnings of the association, and $50.37 has been laid aside for depreciation on equipment.

"The Ford County Dairy Marketing Association so far has increased the returns for fat to the members seven per cent over what they could have received by selling it by the old method," says Geo. T. Swaim, farm adviser. "Our plan is to add other units and thereby increase the volume of business. Every new unit joining the association will be represented on the board in the county organization."

Looks to Ford County

The I. A. A. dairy marketing department looks on the Ford county idea as worthy of repetition elsewhere. In Henry county, it states, farmers around Geneseo, dissatisfied with cream prices received in recent years, are contemplating the organization of a cream club on the Ford county plan. Already 50 cream producers have signified their intention to start the plan in Henry county.

Surveys Reveal Plenty

A recent survey conducted by the I. A. A., disclosing a differential of 5 to 6 cents per pound fat in favor of co-operative creameries, has done much to stimulate desire on the part of farmers to do their own dairy marketing, says Mr. Lynch. Another survey made by the I. A. A. in connection with 12 other states showed that Illinois stands in sixth place on butter fat prices received by the producers. Ohio, which has 88 cream clubs, was first, the survey revealed.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

[illegible] membership fee of the Illinois Agricultural Association [illegible] five dollars a year. The fee includes payment of [illegible] subscription to the Illinois Agricultural Association.

[illegible] returning an uncalled-for or missent copy, [illegible] key number on address as is required by law.

Another Voice on the Gas Tax

George W. Hinman, a writer of editorials of the Arthur Brisbane type, and who also enjoys ability which enables him to put his thoughts into writing in such a way that big city papers from New York to San Francisco print them, not long ago said some things about the gas tax which strike a sympathetic chord for the farmer. It was entitled: "Why People Want the Gas Tax." It follows:

In common with farmers in other states, the Illinois Agricultural Association is demanding a gasoline tax. The association is to appeal to the Springfield legislature tomorrow to enact such a tax into law. That is the morning's news.

The idea, of course, is that as long as the country spends five or six hundred millions a year on automobile roads, the persons who use the roads should pay a large part of the bill.

This does not look like a big business proposition, yet in a way it is. If all the gasoline used in motors this year were to be taxed 2 cents a gallon, the collections would come to something like $125,000,000 or perhaps $150,000,000.

Gasoline Easy to Tax

Now, perhaps a third of the gasoline used in motors is bought by the farmers themselves. They own more than four million of the motor cars, and many trucks and tractors besides. How does it happen then that they are for a tax that will bear heavily on them? There is a list of reasons, but it is possible to guess a few.

Plainly, the cost of gasoline is not a great burden compared with other living costs just now. If other necessities of modern life had gone up in price only as much as gasoline since the war, most persons would be living twice as easily and saving twice as much as now.

While gasoline has risen but 17 per cent since 1913, wheat has gone up 80 per cent, meats 40 per cent, shoes 80 per cent, coal 100 per cent and the building materials that help make the high rents, 90 per cent.

Gas Tax No Hardship

All together, the things we live by cost us half as much again as in 1913, and then some. Meantime, gasoline shows only a third of this general increase in price. Therefore, to put a tax of 2 cents a gallon, or even more, on gasoline would not cause great hardship—that is, as compared with the other hardships of high prices and high costs of living just now.

That is not a conclusive reason but a fairly popular one. Another reason is that, if the gasoline tax were used to build highways, it would come to pass that the people who use the new roads would be helping pay for them.

Suppose half the families in the United States have motor cars and the other half have none. That is about the case. Isn't it fairer then that the half who have motor cars should contribute largely to the cost of the motor roads, rather than that all families should contribute, whether they have cars or not?

Road Users Pay

By means of the gasoline tax the road users would be compelled to pay. By means of bond issues and general taxes, everybody is compelled to pay, whether he is a road user or not, whether he rides in a motor car, takes a street car, or walks.

The farmer thinks he is robbed and oppressed by local taxes. He is—in most cases, he is. He wants to get out from under the highway taxes. If he doesn't escape some of the present tax burdens, if he doesn't get relief soon from the local taxation on his acres, says Dr. Ely of Madison university, he is likely to be impoverished or bankrupted. In parts of the Northwest, the farmer pays in taxes nearly two-thirds of what he can rent his farm for. It is from this sort of wild taxation that the gasoline tax for hard roads would give the farmer some relief.

Wouldn't a Gas Tax Help?

There are other arguments. Should motorists from one state use up the roads in another state without paying a cent for the privilege? And, if they are to pay at all, what easier method is there than to pay every time they take in gasoline?

Can there be any end to tax-exempt bonds as long as states issue such bonds by the ten million for the construction of hard roads? And will such bond issues be ended unless some other means, like a gasoline tax, be used to bring in at least part of the money?

—o—

Its Hands Are Tied

There can be no substantial reform looking to an equalization of the tax burden while the legislature has its hands tied as it has under the present constitution of the state.

The present constitution was adopted in 1870, five years after the Civil War. We are not spending our money now like we did in Civil War days, even though we wish we could. Neither are we earning money now in the same manner as it was earned in 1870.

Things have changed. Bonds and a thousand and one other intangibles have sprung into great use since 1870. There is a greater proportion of wealth invested in bonds and other intangibles today than there was in 1870 or even 10 years ago.

The World War educated people to buying bonds through the Liberty bonds. They have been buying bonds like hot cakes since then, and for more than one reason.

One reason is that they are easier to hide from tax assessors than investments in real estate and visible property. That is an illustration of classification of property according to visibility. Real estate, and especially farm property, is visible to the assessor, consequently it gets caught. It is the visible things that pay cost.

In the present day, people are coming more and more to expect no relief from under the present constitution. The proposed amendment embodied in Joint Resolution No. 4 introduced by Senator Lantz provides for an amendment to the revenue section of the constitution which will make it possible to permit the taxing of incomes. If money to run the government can be raised by taxing incomes, all the better for farmers and other owners of real property. The proposed amendment does not in itself establish any new form of tax, but it simply unties the hands of the legislature and enables them to pass laws adapting the levying of taxes to changed economic conditions.

Farmers and home-owners should get behind the Lantz resolution if they expect to have their tax burden properly distributed. The legislative committee is especially desirous that farmers write, wire or see their senators and house members urging them to support this amendment.

—o—

The Four G's and the Five M's

Illinois has a cream marketing problem as well as a good many others.

Each year Illinois farmers sell about $17,000,000 worth of cream. That is enough money to build a Keokuk dam every year and a half from Illinois cream checks.

Illinois farmers market their cream many ways. Some of them have taken advantage of collective bargaining methods and have sold together, thereby increasing their incomes.

A. D. Lynch, our dairy marketing director, says Illinois farmers can save or make a heap of money by forming cream bargaining associations.

The average butter fat price received by Illinois farmers in October, November and December of 1924, with both co-operative and private creamery prices taken, was 34.6 cents, according to Mr. Lynch. This figure was compared with the prices received in 12 other states the same date.

In Ohio it was found that the farmers were getting at private stations 4.4 cents per pound fat more than the farmers in other states were getting at private stations during the same period. The reason is that Ohio has 88 co-operative cream stations in the state, Mr. Lynch finds. There are a good many less than that in all the other 12 states which participated in the price comparison.

The averages paid in the 12 states were brought together by the dairy department of the Ohio Farm Bureau Federation with results as follows:

Ohio	38.5 cents	Iowa	34.6 cents
Michigan	38.2	Kansas	34.5
Minnesota	37.1	North Dakota	33.4
Indiana	35.8	South Dakota	33.5
Kentucky	35.5	Missouri	32.8
Illinois	34.6	Nebraska	30.8
		Oklahoma	29.3 cents

Illinois farmers could get more money if they were organized. Where there is not enough volume of cream in a community to support a farmer-owned co-operative creamery, it has been found desirable to form a cream selling organization. About five hundred cows are needed and it requires very little capital.

As a rule a building can be rented where the cream from these 500 cows can be weighed and tested by the farmers' own man. The equipment required need not cost more than $300. Mr. Lynch says that some cream clubs raise this amount by membership fees, while others have started off by borrowing money at the bank. This kind of an arrangement is known as a cream bargaining association. After the cream from the minimum requirement of cows is signed up, the total volume is sold to the highest bidder.

The Ford County Farm Bureau started one at Paxton last year. Farmers in it not only received the market price but at the end of the year paid a patronage dividend of 2.3 cents per pound.

Mr. Lynch says any group of farmers that have the four G's and the five M's can make a go out of a cream bargaining association. These are grit, git, guts and gumption, and men, milk, money, minds and marketing. To make the score even all around, the editor hereby adds "glue" to the first set, because they've got to stick.

The biggest question to settle before starting a cream bargaining association, according to Mr. Lynch, is "Will you work with your neighbor?"

The I. A. A. is prepared to help farmers solve their cream problems.

—o—

The Gas Tax Should Replace, Not Add

Illinois is now the only state west of New York not having a tax on gasoline.

This statement can be made with the qualification that Minnesota will without doubt enact some kind of a gas tax in this session of its legislature. Both branches of the Minnesota General Assembly have passed bills, but in the House it was two cents while the Senators wanted two and a half cents.

Ohio, which has been in doubt, has definitely adopted it. The Governor vetoed the bill, but it was passed over his veto in company with 33 other bills which he wished to keep from passing.

If all the good points favoring the adoption of a gas tax in Illinois were cast aside for the moment, should our legislators leave this state to be overridden by motorists from every other state without them paying some small portion of the road expenses?

And with the insistent demand for tax reduction from all parts of the state, could the legislators consistently enact a gas tax as an additional tax?

Illinois will eventually have a gasoline tax, of that there is little doubt. The question is whether it will come as an additional tax or as a replacement tax.

As has been stated before, the Illinois Agricultural Association is for the gas tax in lieu of the county highway tax. That is the main requirement in the Cuthbertson bill. Are you actively supporting it?

—o—

Where They Are Really Using Lime

Last year the farmers of Illinois used 500,000 tons of limestone on their soils. This is one-fourth of all that was used on all the soil of the United States. This record doesn't mean that Illinois is a particularly sour state, but it does mean the Illinois Agricultural Association has carried on an organized campaign to get farmers to apply the needed soil correction.—Pacific Rural Press, San Francisco, Calif.

—o—

Easterners Like This Kind

The Illinois Agricultural Association has taken steps to help the farmers of the five counties hardest hit by the tornado. That's the kind of farm relief with which everybody is in sympathy.—Philadelphia Public Ledger.

LOWDEN WONDERS IF RAINS BRING BENEFIT OR FAILURE IN TALK

Letters Endorse Idea of Having Radio Bring Farm Leaders Direct to Homes and Community Clubs

Letters from many parts of the Middle West tell the story that a tremendous audience was listening to the first program of the mythical Midwest Radio Community Club given over WLS of Chicago Wednesday evening, April 15.

All the letters speak highly of the event. These will be mounted in a scrap book and presented to former Governor Frank O. Lowden who delivered the main address of the evening, it being on the condition of agriculture. The purpose of the club is to bring big speakers into contact with farmers who otherwise could seldom, if ever, hear the leading agricultural thinkers of the day.

Following community singing led by J. H. Checkley, farm adviser of the Logan County Farm Bureau, President Sam H. Thompson opened the meeting with a short talk on "Changing Agriculture."

"There has been enough said about agriculture in the last five years to fill volumes, both as to cure and remedy," said President Thompson. "So when I started to study what had happened to the farmer, I started right at home. I lived in a country community six miles from a railroad station on a good average Illinois farm, in what is usually called the corn belt of America, and is well adapted to diversified farming and is conceded to be among the best farming districts of the country.

What are Farm Conditions?

"What has taken place here at home? Following the road east and west six miles across the township representing 24 160-acre farms on both sides of the road, we find but five farm owners farming their own farms. All the rest of those farms are now operated by tenants. Surprising as this may seem I followed the road running north and south through the center of the township six miles and found only three owners living on their farms. Another six miles streak revealed a similar condition with only four owners operating their farms. This would make a stretch of 18 miles representing 72 160-acre farms with only 12 owners operating their own farms. There must be some reason for such a wholesale change taking place in a few years.

"Farmers have been, and are, discontented, and not without reason. Some of these reasons will disappear only with lapse of time. Others come and are being improved, through education, organization and the reconstruction of agriculture. With all the improvements that have been wrought, the intelligent farmer realizes that his net profits have been growing smaller, while his land has been growing poorer and poorer and he has not been able, speaking generally, to maintain his buildings and equipment. The individual farmer has become a more efficient and intelligent producer, while he has been forced to admit that his margin of profit has been growing smaller and smaller.

Worst Losses Not Mentioned

"The disastrous effects of the agricultural depression are immeasurable. It is impossible to estimate, even approximately, the tremendous losses that have been sustained. Probably there has been a tendency to stress these losses too much. I don't think so. As a matter of fact, some of the more serious results are seldom mentioned, and we are at times inclined to refer to these losses as a thing of the past. While, as a matter of fact, many farmers are hanging on, hoping against hope, that in some mirgculous way the tide will turn and bring relief. Some adopt this point of view because of a dogged unwillingness to admit defeat.

"It is proper to deal with the agricultural depression as an acute problem, and to do all that can be done to bring relief. It is more important, however, that we understand the causes for agricultural depression and that we determine the factors affecting the future of the farming business. There is a growing evidence that farmers are

(Continued on page 4, col. 2.)

EVEN THE DOG WANTS HIS SHARE

Within 17 days after the storm, the first relief award in the wind-swept area was made in White county, Illinois. The check was from the Illinois Farm Relief Committee, co-operating with the I. A. A. and providing permanent relief to farm sufferers. The photo shows Miss Margaret McGrievy, Red Cross worker; J. M. Crebs, Carmi banker; Henry Gates, farmer storm victim of White county; H. M. Baker, national disaster relief director of the Red Cross; and E. W. Creighton, White county farm adviser.

New Grain Director Has Two Lines of Work Under Way for Present

Activities in the newly created grain marketing department, with Chester C. Davis who has been the Commissioner of Agriculture of Montana now in charge, have taken shape in the form of conferences by him and the grain marketing committee with committees representing National and State Associations of Farmers' Elevators, and the Indiana Wheat Pool.

The general aim of the department is toward helping establish a grain marketing system that is truly co-operative in every respect and one that will rest on the farmers' elevators as a foundation. With this objective, two principal lines of work are under way in this department.

The first resolves into an investigation to determine whether a true co-operative, with special emphasis on the patronage dividend feature, can get onto the Chicago Board of Trade if the memberships are held by farmers' elevators organized as they are at the present time. While most farmers' elevators are co-operative in spirit, some are not so in their organization, many being stock companies supported by farmers. The point of obtaining entrance onto the Board of Trade under the Capper-Tincher act rests with the interpretation as to whether these farmers' elevators are co-operative as defined in the Capper-Volstead act, which permits co-operative marketing.

To Survey Soft Wheat Area

The second line of work is to make a survey of the soft wheat situation in Eastern Illinois in a row of counties adjacent to the Wabash river. The purpose is to determine whether it would be advantagious to the growers of soft wheat in these counties to develop a marketing plan along the line of that of Indiana.

No Reason for Alarm if Check for Reactor Indemnity Not Received

There is no cause for worry if you have waited overlong for your indemnity checks on reactor cattle.

An instance has come to the attention of the I. A. A. where a member having a reactor, received a check for federal indemnity but none for state indemnity. The I.A.A. live stock marketing department took up the matter with Dr. F. A. Laird, state veterinarian. Investigation disclosed that a check had been mailed several months previous, and apparently was lost in the mails.

On the receipt of affidavit from the owner of the reactor stock, Dr. Laird issued a duplicate check which was promptly forwarded to the farmer.

The I. A. A. announces that it is ready to follow up any like cases and that owners who do not get their indemnity checks within reasonable time should bring the matter to the attention of the dairy marketing or live stock marketing departments.

Farmer Can't Afford to Be Without Farm Bureau, Declares Mr. Johns

Claims against railroads by Illinois farmers continue to come to the attention of the I. A. A. transportation department. One of them successfully adjusted by the I.A.A., involved a shortage of six lambs and a decline in the market due to delay in transit of a shipment to the Chicago Producers. The following letter was received after the negotiations were completed:

Gentlemen:—

This will acknowledge receipt of your letter of April 9, file number 2035, with draft attached in our favor from the railroad for $200.

We wish to thank you for your efforts in our behalf in regard to this claim and to assure you that we are very appreciative of what you have done for us. Such results as this, confirm our belief that the Farm Bureaus and the Illinois Agricultural Association are organizations that no one in the agricultural game can afford not to be affiliated with

Ewing and Johns,
By Corwin H. Johns,
Forsythe, Macon Co.

The I. A. A. transportation department also took a hand in the case of Flagg station on the C. & N. W. Ry. in Ogle county. Under the Illinois law a railroad must have an order from the Illinois Commerce Commission either to close a station or to take off a train.

If the railroad does so without securing the permission of the Commission, it is a plain violation of the law.

This happened in the Flagg station case. In August last year, the station was closed and the agent removed.

D. E. Warren, Ogle county farm adviser, brought it to the attention of the I. A. A., and the transportation department promptly went after both the Illinois Commerce Commission and the North Western line.

Due to the fact that the station had been closed without the permission of the Commission, the station was re-opened by the railroad, and a station agent re-instated on April 20, without waiting for an order from the Commission.

A cut of $24,000,000 in farm land assessments is the record of the Missouri Farm Bureau Federation. This sister organization to the I. A. A. asked the Missouri Board of Equalization for the reduction and was able to save Missouri farmers $2o2,000 in taxes for 1925. John C. Watson, I. A. A. tax director, gave them assistance.

Farm accounts, hog sanitation, pig clubs, limestone-legumes-phosphate, seed corn improvement, and community meetings make up the Ford County Farm Bureau program

possible. By securing an amendment such as is being fostered by the I. A. A., in company with other state groups, it will be possible to get more intangibles taxed, an important one being incomes.

LAW MAKERS VOTE YES ON FARMERS' DEMANDS

(Continued from page 1.)

Farmers Need Revenue Amendment

The hearing for Wednesday was scheduled to be before the Senate sitting as a committee of the whole, to whom the bill was passed by the committee on revenue without a hearing but with the recommendation that it "do pass."

The third legislative desire of the I. A. A. lies in the fortunes of the proposed revenue amendment. This amendment should have the wholehearted support of every farmer because it is by this means that he can get permanent relief from his present unjust taxes. Under the present revenue section of the Illinois constitution, taxation along the lines of present-day affairs is im-

SEES NEW DAY IN FORD COUNTY PLAN FOR SELLING CREAM

Integration of Effort Will Provide Volume of Business, Leaders Believe; Henry County to Follow

The cream marketing system in Illinois is taking a turn for the better.

Indiscriminate selling and buying of small and frequent quantities of cream has not worked to the advantage of the Illinois farmer, declares the I. A. A. dairy marketing department. A. D. Lynch, director from observations extending over a period of years.

"Our past scheme of marketing dairy products has been adverse to the farmers owning a few cows, largely because of the large spread existing between producer and consumer," says the department. "This spread has been due to the excessive number of middlemen in the assembling game."

Better Days Coming

The almost universal practice throughout the state heretofore except where local circumstances have warranted the establishment of co-operative farmer creameries has been for the farmers to haul their cream to local assembling points or cream stations where it was bought by private individuals or by representatives of centralizer creameries; or for the farmers to ship their cream direct to centralizer plants, not owned by the producers. Recently, however, the sails of co-operative cream assembling and marketing have appeared on the horizon of a better agricultural system, says the I. A. A. department.

Mr. Lynch points to the establishment of co-operative cream clubs in various sections of the state, as one way out of the difficulty, and as a step in the direction of a more equitable distribution of income derived from the sale of butter fat in Illinois. He cites the Ford County Dairy Marketing Association as a successful example of what can be accomplished along the lines of co-operative effort in the marketing of dairy produce.

Co-ops Pay Better Prices

The Ford county association so far has but one unit at Paxton. In the 10 months since the association was organized and began operation, it has paid approximately 2.4 cents a pound more for butter fat than the average price paid by other cream stations in Illinois in the same period. In its first nine months of operation, this co-operative has sold cream amounting to $17,989.91 and $1,672.59 worth of eggs besides. An average of 34 cents was paid to the members and patrons per pound fat, besides a patronage dividend of 2.3c a pound.

Equipment amounting to $306 53 has been paid out of the earnings of the association, and $50.37 has been laid aside for depreciation on equipment.

"The Ford County Dairy Marketing Association so far has increased the returns for fat to the members seven per cent over what they could have received by selling it by the old method," says Geo. T. Swaim, farm adviser. "Our plan is to add other units and thereby increase the volume of business. Every new unit joining the association will be represented on the board in the county organization."

Looks to Ford County

The I. A. A. dairy marketing department looks on the Ford county idea as worthy of repetition elsewhere. In Henry county, it states, farmers around Geneseo, dissatisfied with cream prices received in recent years, are contemplating the organization of a cream club on the Ford county plan. Already 50 cream producers have signified their intention to start the plan in Henry county.

Surveys Reveal Plenty

A recent survey conducted by the I. A. A., disclosing a differential of 5 to 6 cents per pound fat in favor of co-operative creameries, has done much to stimulate desire on the part of farmers to do their own dairy marketing, says Mr. Lynch. Another survey made by the I. A. A. in connection with 12 other states showed that Illinois stands in sixth place on butter fat prices received by the producers. Ohio, which has 88 cream clubs, was first, the survey revealed.

LISTENERS CONCUR IN VIEWS ON PROBLEMS VOICED BY LOWDEN

Success Marks First Radio Club Meeting. Replies Reveal Thoughtful Comment

That the first "Midwest Radio Community Meeting" was a success is attested to by the letters of congratulation and comment received by WLS after the program in which former Governor Frank O. Lowden was the principal speaker, with his talk on "Co-operative Marketing."

Following are copies of just a few of the many replies received. The entire stack of letters will be bound permanently in a "scrapbook" and presented by the I. A. A. to the farm leader:

"I want to congratulate you on the Midwest Community Club program. It proves as Mr. Evans recently said, that the I. A. A. is looked to as a leader and is a leader in things worth while. I am proud to be a member of the Ford County Farm Bureau and the I. A. A.—F. W. Tieken, Piper City, Ill."

"Heard your program "Mid-West Community Club" last night and wish to congratulate you on the fine arrangement of your program. Am thoroughly in accord with the views expressed by your speakers. Let us have more of them. Former Governor Lowden knows what he was talking about and we hope for a speedy action to bring about co-operative marketing. WLS is certainly trying to improve the situation in agriculture.—H. W. Jeske, Batavia, Ill."

All Agree with Lowden

"It was with a great deal of pleasure I listened in last night. I wish there were more men like you.

"I feel that you know and are doing all one man can possibly do to set the farmer right.

"It was simply great.—Dan G. Davies, Sugar Grove, Ill."

"I listened with great appreciation to the entire speech of Ex-Governor Lowden last night. It was so interesting and informing that I lost not a word of it. Congratulations. I'm not a farmer, but this speech ought to do a great deal of good.—C. T. Watson, Brookfield, Ill."

These from the City

"While as a would-be broad minded individual I have always respected the farmer and his calling, giving the latter its proper niche in importance, I somehow never visualized in mind him and his vocation as being governed by the same economic laws and methods of development as other industrial, commercial and financial lines of endeavor. Your speech convinced me of the desirability of the farmers being "like other men" in their marketing, and the benefit to accrue to the consumer thereby.

"Hoping that very many doubting or hesitating farmers were as easily convinced as I was in your propaganda, and congratulating myself on the accidental chance that caused me to hear your talk, and thanking you for my pleasure and profit in it.—Very truly yours, H. N. Mudge, Chicago."

"I enjoyed your R. F. D. program last evening. The address by Hon. Frank O. Lowden on farm conditions was a gem. The deep study and knowledge of farm conditions, no doubt gained by actual experience, should be heeded by all farmers to band together and better their conditions through the medium of co-operation.

"I also enjoyed the good points brought out by Mr. Evans of the A. F. B. F. in his talk.—John Klein, Chicago."

Farm Bureau Projects Are Subjects of Talks by County Farm Advisers

Farm advisers' talks have filled the air on the I. A. A. programs broadcast over WLS, Chicago, "What the Farm Bureau Is Doing" was the general subject of these talks.

J. W. Whisenand, Henry county farm adviser, spoke on "Saving Dollars for Henry County Shippers." He stated that Henry county is the heaviest shipper of live stock in Illinois and that it has a shipping association at every one of its 19 shipping points. All of these associations, he said, have been organized since the coming of the farm bureau in that county in 1917.

A. A. Olsen, speaking on the co-operative marketing of live stock in Warren county, told of the establishment of the Warren County Shipping Association, in answer to the realization that the farmer today needs the best possible marketing service. The association ships live stock from 11 points in the county, all of them being supervised by a county manager whose headquarters are in the farm bureau office.

J. H. Checkley in talking to his farmer constituency told of the many activities taken part in by the members of the 70 community clubs in Logan county. Boys and girls club work, he said, is one of the major activities of the county Farm Bureau. His clubs are strong on community singing, too.

DeKalb County Farm Bureau Adviser T. H. Roberts in his talk on "Clean Farms and High Yields" stressed the importance of buying none but weed-free seed. "Continued cultivation and hard work," he said, "will clean up a farm provided you don't re-sow it with weeds every time you sow your small grain and grass seed."

I. A. Madden, Sangamon county farm adviser, voiced the sentiment of farmers in his county by saying that "corn testing is one of the most profitable projects we have ever undertaken. We are looking forward and making plans for the time when all our members will select, cull, and test their seed corn. We consider our seed corn testing project one of the most important services we have ever offered because corn is our money crop.

The gas tax problem, so pressing right now, occupied the center of interest on Friday evening, April 24, when WLS broadcast a debate on the subject, "Shall Illinois Have a Gasoline Tax?" The affirmative was upheld by J. C. Watson, I. A. A. director of taxation and statistics, while Zack C. Elkin, legislative director of the Chicago Motor Club, took the negative.

The following program is scheduled for the week of April 27 over WLS:

Monday, April 27 at 12:30—Dan G. Davies, director of the Kane County Farm Bureau, on "Community Happiness."

Tuesday, April 28 at 12:30—D. C. Cooke, director of the Stephenson County Farm Bureau, on "Our Farm Bureau Live Stock Project;" and at 8:40—L. M. Swansey, president of the Stephenson County Farm Bureau, will speak.

Talks by farm advisers over WLS for the first half of May are scheduled as follows:

Monday, May 4 at 12:30—Geo. T. Swaim, farm adviser of the Ford County Farm Bureau, on "How Farmers In Ford County Get Higher Cream Prices."

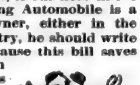
Tuesday, May 5 at 12:30 and 8:40—F. E. Fuller, farm adviser of the Marshall-Putnam Farm Bureau on the accomplisments and services of this Farm Bureau.

Monday, May 11 at 12:30—C. C. Turner, farm adviser of the Mouitrie County Farm Bureau on "Mouitrie County Farm Bureau Has the Budgets."

Tuesday, May 12 at 12:30 and 8:40—Enos Watson, farm adviser of the Edgar County Farm Bureau on accomplishments and services of the Edgar County Farm Bureau.

On Friday, May 8, at 8:40 P. M., R. F. Karr, I. A. A. executive committeeman for the 18th district, will speak on "The Farmers' Niche."

A Short Story On the Adventures of A Motoring Friend



The genial gentleman scooting along in the automobile at the left is enjoying the good roads of Illinois — the ones which have been and are being built by the two bond issues totaling $160,000,000.

Unfortunately, our motoring friend turned onto a state aid road which appears to have been neglected. He is now traveling the farmers' principal farm-to-market road. We hope his springs are good!

Quite likely this fellow will write his Senator and Representative asking them to vote for the Cuthbertson gas tax bill because money from its application will help make these farm-to-market roads better. He will tell his legislators that his experience illustrates the recent statement of John C. Watson, director of taxation and statistics of the Illinois Association, that Illinois is rapidly developing the best primary roads in the country, but the worst secondary roads. Our motorist wouldn't have to pay as high upkeep bills if his roads were kept in better shape.

(Of course, if our hero in the Rough Riding Automobile is a property owner, either in the city or country, he should write anyway, because this bill saves him from paying his county highway tax. If the legislators got a whole lot of letters down at Springfield, they'd be more likely to vote right. A letter from you, too, will help.)

LOWDEN SPEAKS ON CO-OP MARKETING

(Continued from page 3.)

becoming more competent and are able to understand their difficulties, and work out methods for their relief. This is as it should be. If it were not so it would be a sad commentary on the agricultural teaching of the last fifty years.

Discontent Is a Protest of Intelligence

"Farmer discontent—I want you to get this and I want everybody else, as well as farmers, to get it. Farmer discontent may be looked upon as a protest of intelligence. I believe, as never before, that farmers have had real grievances, and they have been increasingly successful in getting a larger number of people to recognize that fact."

Carrying this thought further, President Thompson stated that the American public does not fully realize the actual condition of agriculture. They get their ideas from the unusual reports of individually successful farmers who are given publicity and through the propaganda sent out by interests to whom it is desirable to make things appear to be running smoothly.

President Thompson then introduced Frank Evans, general marketing counsel of the American Farm Bureau Federation, who extended a greeting to the farmers of the Middle West, a part of which is as follows:

"The mission of the Farm Bureau, as conceived by the leadership of the present, is not less—indeed, it is much greater in its scope and purpose—than it was in its earlier years. If there are any who look upon the farm bureau movement as designed merely to meet a momentary emergency, let them be disabused of the thought, for it is no temporary expedient, but a deliberate, determined and ever increasing effort designed to build and to foster a dignified, efficient and permanent agricultural policy throughout the country."

Lowden Begins

"There is no music sweeter to my ears than the patter of rain drops upon the roof breaking a drought in summer time, and yet, to save my life, I cannot tell whether the rain is a sweet and fragant bearer of benefit or bankruptcy," said former governor Lowden.

"Is it to be wondered at that the farmers distrust the present methods of marketing farm products?" the farming governor asked. "They see their 1924 crop of two billion four hundred million bushels of corn, inferior in quality, worth more by something like two hundred million dollars than their 1923 crop of three billions bushels of high grade corn.

"This, it is agreed upon by all hands, was due largely to the unfavorable growing season in 1924. But while the season, wet and cold as it was, was unfavorable to corn, it was exactly what the grasses needed. And so, because of the abundance of moisture, there was a larger production of milk, with the result that this larger quantity brought five hundred million dollars less in the market than the smaller production of the year before.

"Now suppose that the corn growers and milk producers had been completely organized during these years, do you believe this depressing and puzzling condition would have come about?

Organization Is Needed

"It is safe to say that the larger part of the bumper corn crop of 1923 was sold at a price which did not cover the cost of production. If corn growers had been organized and found that the market would not receive their corn at what it cost them to produce it, they would not have dumped the larger part of the crop upon the market in a few brief months. They would have sold sparingly. They would have stored the remainder, knowing full well that seasons of bountiful production are always followed by seasons of low production, and that at no distant day they would receive a fair price for their corn.

"As it was, only a few of the corn farmers were able to hold their corn for the higher prices which they had rightly anticipated and which were later received. Of course, even if organized, they could not have expected to receive as much per bushel for a three million bushel crop as for a two billion four hundred million bushel crop. They doubtless would have asked a price—and would have received it—which would have made the three billion bushels of corn worth more to them than the very next year's crop of two billion four hundred million bushels of poor corn actually brought on the market.

"In other words, the corn farmers, if organized, would have adjusted the supply to the actual demand.

Slight Surplus Depresses Price on Whole Crop

"Under the present system of marketing farm products, a surplus, no matter how slight, seems to have the effect of depressing the price with a total disregard for the cost of production of even the absolute necessities of life.

"I have been studying this question of surplus, and I have come to the conclusion that it exists mainly in the minds of those whose interest it is to depress prices."

In defending the present efforts put forth by farmers' co-operative marketing, Mr. Lowden said that those who oppose the farmers' co-operative movement seem to think it is an effort to arbitrarily fix prices upon farm products. They assume that there are only two ways in which prices are made: first, through monopolistic control; and second, by an indiscriminate throwing upon the market, as at present, of the products of the farm, taking whatever offered.

There Is a Third Method

"They say that monopolistic control is impossible and that therefore the present system must continue to be employed," the former governor said. "I insist that there is a third method and that is co-operative marketing. No one that I know of denies the validity of the law of supply and demand and its influence upon farm prices. Some of us, however, deny that it is self-supporting so as to preserve nicely a perfect balance between supply and demand."

A buyer and a seller must meet to dicker in order to establish some price, Mr. Lowden said in carrying this thought further. The sellers, in the case of farmers selling indiscriminately, are at present almost entirely unorganized while the buyers are organized.

Does Rain Bring Benefit or Bankruptcy?

"These perplexing facts lead me to wonder whether a rain pattering on the roof is bringing benefit or bankruptcy.

Due to the change of dates, farm bureau presidents from Iowa, Indiana and Michigan were unable to be present, but sent messages of greeting instead.

R. A. Cowles, I. A. A. treasurer, reported to the unseen audience on the financial condition of the association, which, he said, is of the very best in the country, there being over a quarter of a million dollars of surplus. This reserve, he pointed out, is earning interest for the organization and the fact that the association has it gives a great degree of dignity to the activities and undertakings.

Takes a Day to Hear of Work

Geo. A. Fox, I. A. A. secretary, gave a short report on what the association is doing. As an illustration of the great amount of work under way, he told of the directors of each of the departments presenting their 1925 programs of work to the executive committee. Each took a half hour and the executives put in a whole day at nothing but listening to oral tales of what the I. A. A. is actually doing in serving the farmers of Illinois.

Arthur C. Page, editor of Orange Judd Illinois Farmer, among other things, drew attention to the wonderful possibilities of radio. In this instance, he said, it made it possible for farmers who never before had heard these agricultural leaders speak to get almost a first hand impression from them.

John Got Sleepy

John Turnipseed, scheduled to speak for Prairie Farmer, was on hand all evening, but got sleepy before his turn came. He caught the 9:31 train for Wheaton.

Community clubs in many parts of the Middle West stood at attention during the final song, the "Star Spangled Banner." Other big speakers will be scheduled later, it was decided following the successful reception accorded this one.

SPREAD THE RISK OF FARM LOSSES IS THE AIM OF RE-INSURANCE

Officers Look to Successful Examples in Other States in Laying the Illinois Plan

Plans for re-insuring farm mutual companies in Illinois are getting under way as conferences are being held and as similar companies in other states are being investigated.

Wm. B. McFarland, Hoopeston, president of the newly organized Farmers Mutual Re-insurance Company of Illinois, has been studying the situation in Indiana, and he and J. H. Kelker, I. A. A. office manager, investigated the Iowa situation.

Both of these state re-insurance companies are reported as performing much valuable service to the farmers of their commonwealths in the matter of spreading the risks of losses incurred by farm mutuals in cases of fire and tornado. It is hoped that some satisfactory plan may be evolved whereby farm mutual insurance companies in Illinois may pool their losses in a common state fund such as the re-insurance company would provide.

On April 21, President McFarland conferred with Mr. Kelker and E. A. Myers, I. A. A. insurance counsel, relative to formulating a system which is to be presented to the executive committee for approval. Vernon Vaniman, field organizer for the Illinois Agricultural Co-operatives Association, will present the state re-insurance plan to Illinois farm mutuals. There are 237 farm mutual insurance companies in the state.

Here Are the Main Points in Tice Bill As Passed by House

The main points of the Tice bill, as passed by the House, are as follows:

(1) Whenever the owners of 75 per cent of the herds of breeding and dairy cattle in any county operating under the county area plan, shall have signed agreements with the State Department of Agriculture, the Department shall enroll the county under the accredited area plan and notify the state attorney and the board of supervisors or board of county commissioners of such county accordingly.

(2) The sale of all tuberculin in the state is placed in the hands of the State Department of Agriculture.

(3) Female cattle used for feeding purposes must be branded.

(4) All reactors, whether tested by private veterinarians or under the co-operative plan, must be branded and reported to the State Department of Agriculture.

(5) A 60-day retest is required on all dairy and breeding cattle coming into modified accredited area counties. It is also required on all dairy and breeding cattle coming into counties whenever the owners of 75 per cent of the herds have signed agreements to test with the Department of Agriculture. The 60-day retest is required of pure breds coming into any county. The retest is also required of all grade dairy and breeding cattle coming into any Illinois county after July 1, 1927.

(6) All breeding and dairy cattle to be sold or offered for sale at public auction within the state of Illinois, unless from an accredited herd or a modified accredited area, shall be tuberculin tested by a qualified veterinarian within the 30 days immediately preceeding the date of sale.

The bill, if passed by the Senate and signed by the Governor, both of which are expected, will go into effect July 1, 1925.

The principal difference between the bill as passed by the House and the original as drawn by the I. A. A. is in the extension of time until July 1, 1927 for grade cattle to be subject to the 60-day retest.

An appropriation of $3,000,000 for paying indemnities during the next two-year period is deemed necessary to carry out the t. b. eradication program.

PRODUCER FACTS

The Chicago Producers Commission Association, established in 1922, handled 17,917 cars of live stock carrying 1,240,226 animals in 1924. Total sales amounted to $27,225,247, and $103,461 patronage dividends were declared for the year.

The Producers Live Stock Commission Association of National Stock Yards, Illinois, established in 1922, handled 14,053 cars carrying 1,036,558 animals. Total sales amounted to $18,977,387, and patronage dividends to $58,932.

The Producers Commission Association, Indianapolis, established in 1922, handled 902,833 animals in 12,782 cars. Total sales amounted to $16,864,568, patronage dividends to $77,404.

"ORGANIZATION PAYS" IS LESSON TAUGHT IN TORNADO RELIEF WORK

Emergency Adviser Appointed to Help Hamilton County Red Cross with Farm Relief

Within two weeks after the nation's most destructive tornado swept across Southern Illinois, relief workers in Hamilton county, the only one in the afflicted area not having a farm adviser or a county farm bureau, found that they were severely handicapped in their rehabilitation work by not having an organization through which to direct their efforts. Farm bureaus in the other afflicted counties—Franklin, Jackson and White—had benefited from their organization machinery and within a few days after the storm had passed they had plans well under way for cleaning away the debris and helping farmers get back to normal as quickly as possible. In White county, for instance, the clean-up campaign was staged within nine days after the storm.

In view of the existing conditions, H. W. Mumford, dean of the College of Agriculture, University of Illinois and director of its extension service, named J. C. Spitler, assistant state leader of farm advisers, emergency farm adviser for the county.

Striking Results

Working with the Hamilton county unit of the Illinois Farm Relief Committee, Mr. Spitler put definite plans for farm rehabilitation work into operation and within two weeks the work in the county had progressed to the point where it was on a par with that in the other three counties having farm advisers. What was accomplished was nothing short of a striking demonstration of what can be accomplished by even a temporary farm adviser.

Throughout the work Mr. Spitler worked in close co-operation with the local unit of the American Red Cross. Before Mr. Spitler and the representatives of the Illinois Farm Relief Committee started their work the Red Cross had early met the problem of food, clothing, shelter, medical assistance and hospitalization. However, when it came to taking the next steps in the relief of farmers and their families, it was evident that Hamilton county was handicapped by not having an organization of farmers, for farmers, such as existed in White, Jackson and Franklin counties.

Temporary Farm Organization

The temporary farm organization committee in Hamilton county was composed of C. N. Burnett, A. B. Anderson and Frank Porter. Mr. Spitler served as emergency farm adviser for two weeks and at the end of that time was relieved by C. E. Gates, club work specialist of the agricultural college.

The local committee decided that a clean-up of the debris, such as had been and was being accomplished in the other counties, was the most necessary thing to do at that time, and Monday, April 6, was set when all forces would drop all else to help clear away the twisted wreckage.

With the assistance of the emergency farm adviser, the local committee started a five-day campaign to get the assistance of as many able-bodied men as possible who could devote Monday, April 6, to the huge clean-up of debris.

Organized Farm Clean-up

An article telling of the big day was placed in each county newspaper. Personal letters were sent to 25 men living in the villages located over the county asking them to organize groups of men. Eight hundred leading farmers of the

TRYING TO LOOK SMALL

Big Grain Merger Again Asks Continuance to Ward Off Inquiry By State

Continuing its tactics of evasion to ward off an inquiry by the state, the $26,000,000 grain merger applied for another two weeks' delay on its hearing before the Illinois Commerce Commission which was scheduled for April 29.

Counsel for the Grain Marketing Company asked for a two weeks' continuance because the lawyer who was said to be most familiar with the case was detained in another court.

Chairman Smith of the Illinois Commerce commission granted the continuance, which is the third one, and stated that "we'll have to get down to the facts—we can't postpone this thing too long."

The I. A. A. had asked the Commerce Commission to conduct a public inquiry into the grain merger to protect the interests of Illinois farmers.

Application for permission to sell $1,000,000 worth of stock in the Grain Marketing Company was made to the Indiana Public Securities Commission at Indianapolis recently.

Upon protest of the Indiana Farm Bureau Federation, the application was not granted and a hearing was set for May 19. Application to sell stock in Michigan has met a similar reaction from the Michigan Farm Bureau Federation.

FARM BUREAU OFFICE BURNED AT DANVILLE

Fire, originating in a photographer's shop in the downtown section of Danville Sunday, April 26, virtually destroyed a three-story brick building housing the Vermilion County Farm Bureau, the Red Cross, and the Chamber of Commerce headquarters and damaged several stores on the ground floor. The loss is estimated at $100,000.

GOAL OF $180,000 FOR FARM RELIEF NEAR REALIZATION

Cowles and Anderson of Relief Committee Spend Much Time on Work in the Storm Area

Illinois farmers have come to the assistance of their unfortunate neighbor-farmers in the tornado-swept district of Southern Illinois so effectively that a total of $167,665.30 is now in the hands of the Illinois Farm Relief Committee, according to R. A. Cowles, chairman of the committee and I. A. A. treasurer.

Thirty-three Counties Over Top

Thirty-three counties have exceeded the $2,000 quota suggested by the committee and additional contributions are being received daily. In all, 86 counties have sent in part or all of their quotas.

Chairman Cowles and vice-chairman Curt Anderson of the committee have each week spent some time in the storm area calling on representatives of local disaster relief committees and Red Cross representatives, and have reviewed with rural case workers certain cases and peculiar problems involved.

"Business rehabilitation needs in the country are being determined as rapidly as possible and immediate needs supplied as determined," says Mr. Cowles. "The mechanics involved in the work are, determining needs, making immediate minimum awards, selection of vendor, material, equipment and supplies, by beneficiary, disbursing the award and direct settlement with vendor by the Red Cross.

Award According to Needs

"Awards in all cases are made strictly in accordance with needs. There is no attempt or obligation on the part of the Red Cross to reimburse anybody for losses sus-

AMENDMENT TO CUTHBERTSON GAS TAX BILL IS PUT TO SENATE THIS WEEK; ALLOCATION OF FUNDS IS CHANGED TO FAVOR LARGER CITIES

Twenty per cent of Revenue Will Go to Highway Commission, 20 per cent to Counties on 1924 License Fee Basis, and 60 per cent to Counties on Basis of State Aid Road Mileage.

SPRINGFIELD, ILL., May 6—(Special)—An amendment to the Cuthbertson gas tax bill which is pending in the legislature with the Senate revenue committee's recommendation that it pass, will be introduced by the sponsors of the bill this week, according to the legislative committee of the Illinois Agricultural Association and Senator Andrew S. Cuthbertson (Macoupin) who have been in conference here.

In an interview Senator Cuthbertson said that the bill as it now stands provides for division of the gas tax revenue to all counties in proportion to the permissible state aid road mileage in each county. The amendment will change this allocation of funds so that 20 per cent of the total contemplated receipts will go to the State Highway commission, 20 per cent to the counties on the basis of the 1924 license fees and 60 per cent on the basis of the State Aid road mileage in each county.

Frank D. Barton
Chairman
Legislative
Committee

Allocation Changed

"We are changing the bill in this way," said Senator Cuthbertson, "in order to make a more fair return to the counties which have the big cities. This will permit each county to apply its own money where and how it sees fit, with 20 per cent to be expended by the State Highway commission with a state-wide and county-to-county travel viewpoint.

"The 20 and 60 per cent amounts returned to each county will, in a large share of the 104 counties, be sufficient to replace the present 25 cent levy for county highways. By replacing this tax, the gasoline tax becomes a lieu tax and not an additional tax. Most of the senators are desirous of reducing taxes so we anticipate that the bill as amended will pass the Senate."

Cites Peoria County as Example

Senator Cuthbertson presented figures compiled by the Illinois Agricultural Association which showed several possible divisions of the expected $10,000,000 annual gas tax revenue for the state. Pointing to Peoria county as typical of the counties in the state with a large city population, he showed that this county would contribute $235,340 in a year if a two cent gas tax were levied.

This figure, he stated, was arrived at on the basis of the motor licenses issued in Peoria county in 1924. The 20 per cent of this total which would go to the State Highway commission, under the amendment which he is submitting this week, would be $47,070. The 20 and 60 per cent amounts which are based on permissible mileage of state aid roads in the county and the 1924 license fees, respectively, would aggregate $165,560. This would mean an average of $602 per mile of State Aid roads in Peoria county available for their use as they see it.

Replaces Present Tax

Property owners in this county are now paying approximately $100,000 a year for the upkeep of the same roads, his figures indicated. Under the terms of the Cuthbertson bill, the $100,000 would be displaced and the burden on all property thereby lessened. At the same time Peoria county would have $165,560 to invest on its roads. This condition applies even more favorably in most of the other counties, he stated.

Tice Bill

The Tice bill, which provides for a general re-codification of t. b. laws and compulsory testing when 75 per cent of the herds of a county have signed up for testing, has passed the house with only two dissenting votes, as was announced in the RECORD last time. From that stage it was referred to the Senate Committee on Agriculture, which passed it out to the Senate with the recommendation that it pass. It is on second reading in the Senate as

(Continued on page 4, col. 1.)

State Commerce Commission Hands Down Decision as to Telephone Rate Increase

The sleet storm which ravaged central Illinois late last year has not yet thawed out, as far as telephone and light service in the areas afflicted is concerned.

According to Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, many of whose members live in the section struck by the storm last December, the Bell telephone companies applied to the Illinois Commerce Commission for permission to increase their service rates to their farmer patrons as a result of the storm, so as to provide for reconstruction funds. Other independent telephone companies also applied for the same permission.

"The Commission on January 15, 1925," says Mr. Kirkpatrick, "issued an order, the substance of which is to the effect that any telephone company receiving injuries to its property in the sleet storm of December 18, 1924, must file application to the Illinois Commerce Commission for relief, stating in full its property losses and the amounts of moneys required for restoration. On the basis of this information, specifications for relief are to be made by the Commission."

The Illinois Agricultural Association has the case under advisement.

20 Per Cent Increase In Membership for First Eight McLean Townships

Eight townships in McLean county have been practically completed in the renewal campaign of the McLean County Farm Bureau with an average increase of 20 per cent in membership. This county is the second one of the 40 which fall due for renewals of three-year memberships this year. The first was Iroquois, which finished 1,501 members representing a 15 per cent increase over its former membership.

Local leaders in McLean county report that the old members have been signing up again very readily and that non-members are signing easier because they are beginning to see the light of the need of organization for farmers if agriculture is ever to get anywhere.

Brown County Farm Bureau in the first three months of 1925 bought 700 tons of limestone.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Trying To Discredit Us

An effort to discredit the Illinois Agricultural Association because of its stand against the $26,000,000 grain merger is shown in the stock selling promoters' public accusation that a legal report on the company has been suppressed by the I. A. A.

This legal opinion is known as the Starr report. It is a lawyer's opinion on the legal phase of the grain merger, only one of several phases studied by the Illinois Agricultural Association before the association's executive committee decided to warn the members not to buy stock.

It is true that the Starr report was never released for publication by this association or Mr. Starr. It was never thought to be of enough importance to single it out of several reports and print it in full. The weight of it was balanced with the weight of other reports and the result was a negative decision. However, the Starr report has been open for persual by members of the association and has been seen by all who desire to see it.

Demand for its release has come only from the stock selling promoters of the grain merger, who, it was feared by the association, would extract only such sections as would help sell stock in the merger. The use now being made of the Starr report illustrates perfectly why the I. A. A. officials and executive committee did not release it to the prompters of the Grain Marketing Company for publication.

To Ruth and Red Cross

The title of this poem is rather misleading unless one knows who "Ruth" and "Red Cross" are in this case.

Ruth is a young lady of four years who got blown about a bit in the recent cyclone in Southern Illinois and, in order to cheer her up, Miss Ruth's 15-year-old sister, Bethyl S. Allardin, wrote this little poem to her. According to Mrs. James L. Mitchell, the Red Cross case worker for Hamilton county and who sent this and the other poem on page 4, to R. A. Cowles, chairman of the Illinois Farm Relief Committee, both girls are convalescing in a hospital. The poems give a sidelight on the tornado tragedy reflecting the good spirit being shown in the stricken communities.

I'm just-a little girl; I'm only four years old.
My name is Ruth Allardin, if you haven't already been told.

I live at McLeansboro. It's a long, long way from here.
I wish I was back home with all my friends so dear.

My leg got hurt badly. I'm here to get well you see.
I'm at the Red Cross Hospital, they'll take good care of me.

I took Red Cross with me, when I was ready to go.
I have to take good care of her, 'cause she's my dolly, you know.

A man came to see me this morning. I like him a lot, you bet.
He brought me some candy and a rabbit, and the rabbit is a pet.

I play with him and he doesn't try to run away.
He's a great big rabbit, Red Cross rode on his back one day.

I play on my little piano, a lady showed me how,
Red Cross soon can play, 'cause I'm giving her lessons now.

We are very happy here, Little Red Cross and I.
We are always laughing, and never have time to cry.

We are going home some day, we'll surely be glad to go,
Tho we're loath to leave our new friends, we miss our old ones so.

—Bethyl S. Allardin, McLeansboro, Illinois.

Want a Good Laugh? Read This!

(Reprinted from the Evening Bulletin of New York City.)

Four states, each in the East, may be the only survivors in the battle the farmers have waged against the city automobilists. Today every state in the Union but Ohio and Illinois, New York, Massachusetts, Rhode Island and New Jersey have adopted the gasoline tax, and it appears as if Ohio and Illinois would approve the plan before their Legislatures adjourn.

The gasoline tax is nothing but a new blow aimed by the farmers against the city dwellers. It is a scheme by which the cost of building roads is taken from the general tax and placed exclusively upon the shoulders of city automobilists.

The unfairness of the proposition may be judged by two specific facts:

1—That the automobile already is the highest tax article of personal property. It is taxed by the Federal government through a war assessment on purchase of parts; it is taxed by the state by a registration fee and driver's license; it is taxed by municipal communities by a property tax.

2—The farmer has profited more from the automobile than any other individual. Before the automobile came no state in the Union could boast of good roads. Farmers had to use many horses and trucks to get their produce to market. The automobile came and registration fees, court fees, etc., provided sufficient money to build good roads. Today the automobilist really needs no more roads. The farmer does. So the farmer intends to get the roads he needs by taxing the city automobilist.

Only 4 per cent of all the pleasure cars in the United States use country roads; yet 70 per cent of all the taxes assessed against city owned automobiles has been spent building country roads.

The cost of getting farm produce to the market has been reduced 11 per cent since the automobile tax built good roads where there were bad ones.

But the farmer is not satisfied.

New York state doesn't need to be told of the greed and cupidity of the farmer. Lowman's pals gave full and bold proof of it during the past Legislative season. But it is remarkable that the nation has been so completely deceived.

To show how selfish and unfair the farm politician is one need but know that in almost every state where the gasoline tax has been enacted farm automobiles have been made exempt from the tax.

The Illinois Agricultural Association, a bunch of farmers, arguing for the passage of the gasoline tax in that state, states:

> The tax is about as equitable as it can be . . .
> The farmer who still drives a horse . . . saves the whole amount.

The farmers have expended much effort and more money in attempting to foist the gasoline tax upon the people. Road building costs were a nightmare to them. Because of the chronic ignorance which characterizes so many of the farmers' campaigns the agriculturists wasted both time and money. To solve the road building problem one does not need a gasoline tax; one does need to remove politics from road building.

Go into any small city or country town and investigate road building costs! Then go to any competent engineer and get the facts. You will find that, allowing a fair profit to the contractor and paying a fair price for labor and materials, every community pays about 30 per cent more for its road work than it should.

Where does this money go?

Politics profits more out of road building than in any municipal activity except the purchase of fire apparatus—so observers claim who should know what they are talking about.

Every small town politician welcomes the proposal that a road be built. Every contractor welcomes it. And then when the contract is awarded it is bloated 30 per cent to pay the political fare. The result is that roads which should contain half cement and half sand really contain one-fifth cement and four-fifths sand. In a year the road is a wreck; it cannot withstand a single winter's storm. Then repairs must come.

It is amusing to note the complaint of the Illinois farmers that the gasoline tax of two cents a gallon barely covers the cost of repairs and does not provide any money for new construction. That is fairly good proof that all the tax does is pay the high price demanded by practical politics.

It would be interesting and illuminating if one could ascertain how many selectmen's garages, mayor's summer camps, aldermen's automobiles and councilmen's shoes have been bought in the cities and towns of the nation by the contributions of road builders.

The gasoline tax is a political tax. But the farmer is too thick to realize it, just as he is thick enough to pay the $10 to the klan and subscribe to the courses which teach dupes how to become hypocrites.—The Evening Bulletin, New York City.

The I. A. A. is quite a "bunch" of farmers to be causing so much editorial comment in the world's largest city a thousand miles away, don't you think?

Our guess is that the gentleman who wrote this editorial knows about as much about farmers as the fellow who pumped the cow's tail to get milk—and about the same proportion about the gas tax. Rhode Island has adopted the tax, as has Ohio.

INTRODUCING TWO NEIGHBORS—John Thinker and Epidermis Flint. (John's a Loyal Farm Bureau Member. Epidermis Is Agin It!)

CONSTANT PROGRESS MARKS EFFORTS OF I. A. C. A. IN ELEVEN MONTHS

ORGANIZATION, FAIRS, FARM MART, SUBJECTS AT JOLIET CONFERENCE

Farm Bureau Men From Five Counties in Two Districts Talk Problems in Conference

Officers and farm advisers of the county Farm Bureaus in the 10th and 11th Congressional Districts of Illinois met in Joliet on April 28 for the second conference of the year.

Wm. Webb

According to Wm. Webb, Lockport, executive committeeman from these districts in the Illinois Agricultural Association, 50 representative farm bureau members were present from the counties of Will, Lake, McHenry, DuPage and Kane. A trip through the new state prison and the dairy barn at Stateville preceded the business meeting.

Metzger Tells About I. A. A.

What the Illinois Agricultural Association is doing to build the farm bureau forces throughout the state, was the subject of G. E. Metzger, organization director of the Illinois Agricultural Association. Explaining the method used in organizing the farmers in each county, he stated that the township plan was being stressed now more than ever. Under this plan the community or township is made the basis of building the membership, and local leaders are chosen to line up the farmers behind the farm bureau movement.

"The community plan," said Mr. Metzger, "is working well in all the counties where it is used. The Farm Bureaus are now well established and are going institutions."

Pushes Agricultural Mart

Mr. Webb, in speaking of the proposed agricultural mart to be erected in Chicago, declared that "agriculture as the greatest industry in the world should have the best site and the largest building in the world." He told of the plans now under way to build and finance the undertaking, which when completed is to be the largest fireproof building in the world, with transport facilities and accommodations for conventions and expositions unequalled anywhere.

Following Mr. Webb's talk, the audience heard J. C. Hackleman, seed certification specialist at the University of Illinois. Mr. Hackleman traced the history of the seed certification movement from its start in Sweden and Canada to the present, and stated that at present there are 40 seed improvement associations in the country, including the Illinois Seed Improvement Association, which was organized in 1921.

Talks Seed Certification

In 1919, he informed his hearers, there was organized in Chicago the International Seed Improvement Association, with the purpose of standardizing all seed certifying as well as the teaching of this subject. The International association, he said, now carries all Canada and 19 states in the Union.

J. E. Watt, farm adviser of Kane County Farm Bureau, followed Mr. Hackleman with a talk on "What the Rural Fair Can Do for the Farmers." He stated that the fair is a big influence in cementing the farm bureau, and spoke of the educational value possessed by the agricultural exhibits. He pointed out that community exhibits are the promising thing in farm fairs today.

Want I. A. A. to Have Exhibit

It was moved by the assembly that the I. A. A. be represented at the Central States Fair, to be held at Aurora, August 19 to 28. Mr. Metzger then spoke briefly on the legislative program of the I. A. A.

Those present at the meeting are as follows:

Kane County: John E. Watt, farm adviser; Glenn C. Warne, E. L. Hoyt, Dan G. Davies, W. Lloyd Keepers, assistant farm adviser.

Lake County: J. J. Doerschuk, farm adviser, and Willard Darrell.

Will County: J. Franklin Hedgcock, farm adviser; Rowland F. Clark, assistant farm adviser; Wm. Anderson, Emil Deist, Henry Knater, James Clow, Wm. T. Eldridge, J. C. Hartman, C. R. Barr, R. R. Webb, Herman Teske, John P. Willis, Geo. Hinse, F. B. Reichert, Ernest Reichert, C. J. Luther, Wm. Webb, Elmer, E. Barton, and Henry A. Felton.

DuPage County: E. A. Carncross, farm adviser; Geo. B. Goss, Frank Fraley, E. T. Ashbrook, C. C. Wimpross, C. C. McChesney, W. B. Lehmann, August Shillinger, Harold C. Vial, Arnold A. Kohley, F. C. Landorf, Leo Pauling, Robert J. Plane, E. D. Timko, Wm. Ross, and P. W. Lambert.

McHenry County: A. J. Gafke, farm adviser; D. Ross, Leonard Thomas, B. L. Thomas, Geo. A. Hunt, Ole A. Stalheim, Frank M. Barber, and L. R. Lippold.

Fame of Campaign to "Spread Your Butter Thicker" Goin' Some!

News of something new under the sun travels fast and far.

This is illustrated in a recent request from the Whatcom County Farm Bureau in the state of Washington for a cut of the "Spread Your Butter Thicker" poster being used in Illinois at the instance of the I. A. A. dairy department.

Evidently Washington dairymen are also interested in cutting down the butter surplus. A. D. Lynch, dairy marketing director, says that the more butter they eat out there, the better the prices all over. Ten thousand posters of this kind have been distributed in Illinois. The Illinois Butter Improvement Association and I.A. A. dairy department are co-operating in the distribution.

TORNADO RELIEF WORK TEACHES ORGANIZATION

(Continued from page 1)

county were solicited for their help by means of postal cards. Pastors announced the plan from the pulpits at Sunday services. Mr. Spitler, as emergency adviser asked the farm advisers in Jefferson, Wayne, Gallatin and Saline counties to send delegations of farmers for the day. A thousand hand bills were printed and distributed in the autos and buggies of several hundred people who came to McLeansboro because of examination day for pupils of the rural schools. The mayor of McLeansboro issued a proclamation asking all business places to close from eight to four o'clock. Superintendents of the high schools in McLeansboro, Dahigren and Broughton released their high school boys for the day.

All these things were accomplished in preparation for the big day. The result was that nearly 2,000 people assisted in the work. The tillable fields over the entire farm area in Hamilton county were cleaned of debris as were a large number of building sites. About 6,000 acres were covered. It was a wonderful demonstration of co-operation.

Turned to Other Problems

Following the clean-up the attention of the local committee and the emergency farm adviser was turned to determining the emergency business needs of those men in resuming their farming. Horses, machinery, feed, seeds, poultry and dairy cows were items of their first consideration, with consideration of building requirements to come later.

Full co-operation was accorded the Red Cross supplementing their work. Authority was vested in Mrs. James L. Mitchell in charge of the Red Cross case work for Hamilton county to issue requisitions to supply immediate minimum rehabilitation needs.

Following this conference the first needs of farmers were determined and then the Red Cross rural case worker commenced to issue requisitions for horses, machinery, feed and other necessities which were required in order to make each one a producer again as rapidly as possible.

Hamilton Now Well Fixed

The local committee and the emergency farm adviser in effect constitute a temporary farm bureau for Hamilton county. As a result of this organization, Hamilton county's rural sufferers are being cared for with dispatch and in a manner which places the whole county's farm relief status in a most satisfactory situation.

Moral: Farm organization pays.

NEW AGRICULTURE TO BE CHARACTERIZED BY DIGNITY, SELF-RESPECT

Stephenson County Speaks; and Limestone Crushing Co-op Has Blazed the Trail

"Agriculture is waking up to a new day." This is the statement recently made by L. M. Swanzey, president of the Stephenson County Farm Bureau, talking over WLS, Chicago, in the radio series sponsored by the I. A. A.

Mr. Swanzey in his talk pointed to the accomplishments of the farm bureau in his county as great helps in the development of the county's agriculture. "But the real merit of organized agriculture," he said, "does not lie in the projects successfully carried by the farm bureau, important as these are.

"The new agriculture is to be characterized by dignity and self-respect. Again and again, we have been told that the farmer must help himself. 'Relief must come from within, not from legislation.'

Farm Bureau the Only Group

"The farm bureau is the only national organization uniting the farmers of America into a position where they can speak for themselves, can defend their rights, and claim recognition.

"Our social structure has become exceedingly complex. Our age is one of specialization and organization. Labor, industry, and capital are organized."

Competition Out of Date

The once popular belief that competition is the life of trade is losing its eminence, according to Mr. Swanzey. "The farm bureau movement has been the means for the farmer to find himself in this age. He no longer believes that he can succeed alone. He knows that he must work out his own destiny with his brother farmers. He knows that he and his neighbors have more problems in common than they have differences. He is thinking in terms of group action and leaders are being developed. He has therefore found himself and this is the highest step forward in working out a program for a satisfactory agriculture. This is the big thing in the farm bureau."

County Wakes to Limestone Sources

The farm bureau limestone project in Stephenson county was the subject of a radio talk by E. C. Goeke, secretary of the county Farm Bureau. He spoke of the Stephenson County Co-operative Limestone Association, organized in 1922.

A portable crusher, a tractor, and two dump trucks made up the equipment of this co-operative, according to Mr. Goeke. During the three-year period, 32 quarries have been worked by the crusher, and over 11,000 tons of limestone have been ground and delivered to 305 farmers.

Eleven Other Crushers Started

As a result of the efforts of the farmer co-op, several private crushers have been put into operation in Stephenson county, which is underlain by much limestone fit for agricultural purposes. Now there are 12 crushers in the county.

"The original purpose," declares Mr. Goeke, "was to sell the limestone idea to the farmers by selling the stone in order that they might see the value of the material on their own farms." He reports that one of the important things that have come out of the crushing project is the increase in the number of acres of alfalfa.

"An alfalfa campaign worked with the project helped to sell the stone. Many farmers have tried to grow this crop on sour soil and failed. Conservatively speaking, the acreage of alfalfa in the county during the three-year period increased from 750 acres to over 8,000 acres."

Florida's legislature has voted against the Child Labor Amendment.

Quasey Explains $2 Charge on Stock Cars Ordered But Not Used

The I. A. A. transportation department, L. J. Quasey, director, points out that there has been considerable misunderstanding as regards the demurrage charge on stock cars placed at loading chutes but not used.

"The railroads make a charge of $2 when a car is ordered placed and not used," Mr. Quasey says. "This charge starts from the actual placement.

"Cars are required on short notice and, unless there is some penalty for this practice, it would create a car shortage. Many shippers would order cars in sufficient quantities to enable them to have a supply on hand at all times, thereby preventing some other shipper from getting his share.

"This rule has been in effect for several years but has not been enforced."

ILLINOIS FARMERS ARE BUYING MORE MINERAL FOR CROPS

Limestone Purchases Continue to Increase, While Demand for Phosphate Also Improves

Demand for minerals to improve Illinois soil continues to grow.

According to the I. A. A. phosphate-limestone department, J. R. Bent, director, the outlook for purchases of limestone and phosphate by the farmers of Illinois is very favorable. "The demand for limestone alone," he says, "for 1925 to date has been larger than in 1924 for the same period, and indications are that this increase in demand over last year will continue through the year, especially in late summer and early fall.

"The I. A. A. phosphate-limestone department wishes to point out, however, that limestone is not being produced in as large quantities as last year, as many right-of-way problems have been holding up the letting of contracts for construction of concrete roads throughout the state.

Predicts Less Crushed Stone

Only 50 to 70 per cent of the concrete mileage of last year is likely to be built this year. This means less production of crushed stone, and less by-product screenings for agricultural purposes. Furthermore, the accumulation of three to four years' ground limestone in storage was largely used up in 1924, when Illinois farmers bought 500,000 tons of limestone, or one-fourth of all the agricultural limestone purchased in the United States last year.

"In that part of the state where production is heavier and demand lighter, there may be no shortage, but in some other sections of Illinois where the reverse is true, there may be a shortage."

Advises Ordering Early

The phosphate demand, says Mr. Bent, is keeping up very well for this time of year. "It would be well," he advises, "for those desiring shipments of the mineral in August, September, and October to order their shipments now and, if possible, to accept these shipments earlier than fall."

The phosphate-limestone director has been spending some time in Ohio, investigating the methods used by the purchasing service department of the Ohio Farm Bureau Federation. During the week of April 27 he was in Hancock and Warren counties in Western Illinois, reviewing the situation as to the possibility of developing local farm-owned limestone producing projects.

During the six months period ending March 31, 1925 the Polo Cooperative Marketing Association, Ogle county, did a business in marketing cream and eggs amounting to $18,878.83 paid for cream and $2,114.49 paid for eggs or a total of $16,993.32. After paying all expenses of operation the association has a balance of profit of $348.00 which will be retained for working capital.

STEADY GROWTH IS PROGRESS OF FARMERS' CO-OP AUDITING BODY

"Under a Year and Over 150" Is Record of the I. A. C. A. As the Figures Climb

That the growth of the I.A.C.A. has been more than satisfactory in the 11 months of its existence, is the statement of Geo. E. Wicker, general manager and co-operative accounting director for the Illinois Agricultural Association.

159

"When our work started in June, 1924," states Mr. Wicker, "we felt that if we had 50 members in the organization by the end of the year, we would consider our efforts successful. However, we were more than gratified to see the membership figures reach the 114 mark by the end of December, 1924. Today the roll call stands at 159 member co-ops in the I. A. C. A., and we are confident that the future will see the organization continue in its healthy state.

Must Establish Credit Policy

"One of the outstanding weaknesses of co-operative associations," declares Mr. Wicker," and more particularly farmers' elevators and those engaged in handling merchandise, is their failure to establish a credit policy with respect to the extension of credit to their customers and also their failure to consistently follow up collections. Because of this condition, we have found it advisable in many of the examinations which we have made to analyze the accounts receivable and classify them by age.

"Letters of verification have been sent to each customer in the several classifications with two purposes in view; first, to verify the accuracy of the account as shown on the books of the company; second, to induce the collection of past due accounts. These letters are sent out over our signature and are followed up by such correspondence as may be necessary to effect settlement, if possible.

Manager Kept Informed

"The manager is kept currently informed and where differences exist, or the account is disputed, an effort is made to get the customer and the manager together in a settlement which will be mutually agreeable. This service has been found very effective in reducing the volume of accounts receivable and in clearing up some of the old accounts. In one particular instance, with accounts receivable at $22,082.00, collections in the thirty days following our letter of verification sent out to customers amounted to over $14,000.00.

"An analysis of accounts receivable, as indicated above, results in making it possible to establish a proper reserve to protect the company against probable losses in the collection of accounts receivable."

Through the efforts of Vernon Vaniman, field organizer, new member organizations were added to the I. A. C. A. month after month. The following shows the numerical growth by months:

June, 1924	18 members
July	43 members
August	55 members
September	70 members
October	82 members
November	100 members
December	114 members
January, 1925	132 members
February	143 members
March	149 members
April	159 members

Divide State into Five Districts

With the purpose of establishing definite districts around branch offices, Mr. Wicker has divided the state into five districts, comprising the following counties:

CHICAGO DISTRICT: Jo Daviess, Stephenson, Winnebago, Boone, McHenry, Lake, Carroll, Ogle, DeKalb, Kane, DuPage, Cook, LaSalle, Kendall, Will, Grundy, Kankakee, Putnam, Marshall, Livingston, Ford, Iroquois.

SPRINGFIELD DISTRICT: McLean, Schuyler, Brown, Cass, Mason, Menard, Logan, DeWitt, Pike, Morgan, Scott, Sangamon, Christian, Macon, Calhoun, Greene, Jersey, Macoupin, Montgomery, Madison, St. Clair, Monroe.

GALESBURG DISTRICT: Whiteside, Lee, Rock Island, Henry, Bureau, Mercer, Henderson, Warren, Knox, Stark, Hancock, McDonough, Fulton, Peoria, Tazewell, Woodford, Adams.

(Continued on page 4, col. 1.)

First County Dairy Marketing Body Gets 2.4 Cent Fat Premium

"How Farmers in Ford County Get Higher Cream Prices" was the subject of a recent radio talk by G. T. Swaim, farm adviser of Ford county, over WLS, Chicago, in the radio series scheduled by the I.A.A.

Mr. Swaim spoke of the organization and plan of the Ford County Dairy Marketing Association, which, with its first unit at Paxton, has become well established during the first 11 months of its existence.

"Late in May, 1924," said Mr. Swaim, "a meeting was called of those cream producers who had signed the membership agreement to pool their produce co-operatively. The dairy herds concerned included over the prescribed minimum of 400 cows. An incorporating board was elected and authorized to start an association. This board received bids from several of the larger centralizer companies and finally closed a deal with a centralizing plant in Chicago.

Sponsored by Farm Bureau

"A special feature of the Ford county plan is the fact that the voting power is reposed in the farm bureau membership, and the by-laws of the county association provide that the farm bureau shall help conduct the management of the association. The plan is for a closely knit federation of units and local boards of directors at each place where cream producers decide to organize as a branch of the county association.

"That the organization has already proved its worth to the members is proved by the fact that a premium of 2.4 cents over the average price for the state has been realized on every pound of butter made from the cream pooled by it."

SENATE CONSIDERS GAS TAX AMENDMENT

(Continued from page 1)

this is being written (May 5).

The Lantz resolution, which embodies the third plank of the I.A.A. legislative platform for the farmers of Illinois, is in good standing, according to the legislative committee. Action on it is expected to start soon since the end of this legislative session is drawing to a close. Only one possible amendment to the constitution can be made each biennium, consequently the legislators leave all possible amendments until the last and then pick out the one needed most.

The legislative committee, which consists of Frank D. Barton of Cornell (Livingston) as chairman, A. C. Everingham of Hutsonville (Crawford) and H. E. Goembel of Hooppole (Henry), has been on the job at Springfield, as well as President Thompson and Secretary Fox, who have assisted materially. Legal Counsel Kirkpatrick and Taxation Director Watson have also been busy on legislative affairs.

Assisted in Wolf Trouble

The committee was of some assistance recently in assisting the farmers of the counties along the Mississippi river to secure an appropriation to fight wolves which have been causing great damage to live stock in that section.

Action has been promised the legislative committee by leaders in both houses on securing an open season on rabbits. This change will be provided for as an amendment to some bill, according to the legislative leaders approached by the I. A. A. committee.

CO-OP AUDITING BODY SHOWS STEADY GROWTH

(Continued from page 3.)

EFFINGHAM DISTRICT: Champaign, Vermilion, Piatt, Moultrie, Douglas, Coles, Edgar, Shelby, Cumberland, Clark, Fayette, Effingham, Jasper, Crawford, Bond, Clinton, Marion, Clay, Richland, Lawrence, Washington, Jefferson, Wayne, Edwards, Wabash.

UNORGANIZED DISTRICT: Randolph, Perry, Franklin, Hamilton, White, Jackson, Williamson, Saline, Gallatin, Union, Johnson, Pope, Hardin, Alexander, Pulaski, Massac.

Membership is strongest among farmers' elevators. The I. A. C. A. has 75 such co-operatives under its auditing wing. There are 44 county Farm Bureaus, 18 live stock shipping associations, 3 terminal live stock marketing agencies, 6 dairy companies, 4 insurance companies, and 8 miscellaneous organizations on the membership list.

GOAL OF $180,000 NEAR REALIZATION

(Continued from page 1)

tained. In making awards the Red Cross in each case takes into full consideration the beneficiary's resources and meets needs beyond which the beneficiary is unable to provide. The project is strictly one of home and business rehabilitation so these people may be re-established so far as possible as self-supporting citizens."

The I. A. A. has contributed service in making available as needed dependable field workers to assist Red Cross rural case workers in determining business replacement needs of the farm. These men, who are practical farmers and know local conditions thoroughly, have assisted in locating work animals for purchases and have assisted in other ways, supplementing the rural case workers' service and working with the case workers in an advisory capacity.

Following is the detailed statement of contributions to the Illinois Farm Relief Fund.

Adams	$ 700.00
Bond	658.77
Boone	1,478.45
Brown	875.74

Total	$167,665.30

AFTER THE CYCLONE

(This poem was written by Miss Bethyl S. Allardin, 15 years old, of McLeansboro, while convalescing in a hospital several weeks after the tornado.)

The eighteenth of March was a very disastrous day,
For our home and all our possessions were entirely blown away.
The cyclone struck our place about half past three
And after it passed, things were a dreadful sight to see.
Not a building was left standing, most of our stock was killed,
Even the crib was torn away, and it with corn was filled.
My mother and sister were missing, and search was at once begun.
They were found beneath some rubbish, far from the light of the sun.
They were suffering something terrible, no doctor could be found.
"Docs" were all off doctoring in other parts of the town.
Long, dark days and nights followed, no hope by the doctors given.
We thought they'd dwell from that day in the bright and sunny heaven.
The doctors gave all their attention to the wounded, both old and young,
They worked shoulder to shoulder together and treated them one by one.
Then came all of the nurses, and rendered their service to all.
They came from all over the country, and came at a moment's call.
The Red Cross came to our rescue, in a body great and strong.
Giving aid to the distressed and suffering, (they'll be remembered in our prayers and song).
If I live to be one hundred, I'll never forget the day
The cyclone struck our place, and blew our home away.

FARM LIFE MADE MORE PLEASANT BY COMMUNITY CLUBS

Organization Is Great Help in Fostering Economic and Social Well-Being

That community clubs are a great aid to the establishment of a wholesome farm life, is the opinion of Dan G. Davies, executive committeeman of the Kane County Farm Bureau, speaking recently over WLS, Chicago.

"A community club is the result of the combined forces of co-operative spirit and co-operative effort on the part of the majority of the people in a given community," said Mr. Davies. "Community organization cannot be built up on the efforts and finances of a few. To be successful, the first prerequisite is a community spirit, and second, a willingness to work together for the mutual benefit of others in the community." He defined a community club as "a group of farmers and their families in a given locality whose interests are mutual, organized for the purpose of providing regular social entertainment, educational and economic development, and working as a unit of the county Farm Bureau.

"The community club is a great factor in making farm life more pleasant," Mr. Davies declared. "It forms a basis for the most wholesome of social intercourse, thus making the community in which we live more desirable and farm life more pleasant. The combined influence of the community clubs when affiliated with the farm bureau organization, forms the basis which in a very large measure is a solution to many of the farm problems. It means farmers united for mutual economic benefit as well as social advantages."

The Hancock County Farm Bureau Supply Company at its first annual meeting showed a net gain of $1,517.43 for the first eight months of operation. The association books were audited by the Illinois Agricultural Co-operatives Association.

TICE, GAS TAX BILLS, REVENUE AMENDMENT, AIRED AT HILLSBORO

Farm Bureau Members From Four Counties in the 21st District Hold Conference

Farmers and all property owners can never hope to pay lower taxes like in the good old days of 1914 unless the present state constitution is amended to permit taxation of intangible property, according to A. C. Everingham of the legislative committee of the Illinois Agricultural Association.

Sam. Sorrells

The occasion for this declaration was the second meeting this year of representatives of the Sangamon, Montgomery, Macoupin, and Christian County Farm Bureaus, comprising the 21st district, at Hillsboro, Thursday, April 23rd.

Mr. Everingham spoke of the progress of the legislative program of the Illinois Agricultural Association.

"The Tice bill, which provided among other things for compulsory testing when 75 per cent of the herds in any county have tested for T. B., has passed in the House with only two dissenting votes," said Mr. Everingham. "There is no doubt that the bill will go through the Senate with practically a unanimous vote. The Illinois Agricultural Association is also sponsoring and very actively pushing the Barr bill, which provides a $3,000,000 biennial appropriation to pay indemnities. This has been recommended to pass by the committee on appropriations in the Senate.

Talk Revenue Amendment

A second feature of the farmers' legislative program is the proposed amendment to the constitution, which would untie the hands of the legislature and permit it to tax all wealth in accordance with present day economics.

"Our present constitution was adopted in 1870, just five years after the Civil War," he said. "It is natural that we should outgrow it. All the state organizations, excepting the manufacturers, are backing this amendment, which must be submitted to the people for ratification if it comes through the legislature."

Another measure in which the county farm bureaus and their state association is interested is in the reduction of taxes by means of displacing the county highway tax.

The Illinois Agricultural Association is pushing the bill of Senator Cuthbertson of Bunker Hill, which provides for a two cent tax a gallon on gasoline. The estimated 12 million dollars returns from the whole state would be used in place of county highway taxes, which all property owners, both town and city, are now paying.

Future Field Work of Chicago Producers to Be Under New System

Field work in the future for the Chicago Producers in the Illinois-Chicago territory will be handled by various men direct from the office of the Chicago Producers, according to a joint announcement of the Chicago Producers' Commission Association and the I. A. A. live stock marketing department.

The former field representative for this territory, I. C. Grimes, is no longer representing the Chicago Producers and the Illinois Agricultural Association. Field work will be carried out on the co-operative plan as heretofore.

Gas Tax is Fair

"The gasoline tax is the fairest tax in the country," Mr. Everingham stated further. "It must be fair, as well as popular, or else there would not be only 5 states in our 48, which do not have a gas tax. Illinois is now an isolated gas-tax-free island in a whole sea of gas taxing states. It is the only state west of New York that does not have it. Whenever Illinois motorists go out of the state, they help pay for their roads and when motorists from outside come in, they ride on our good cement trunk lines and wear them out without bearing their just share of the cost."

He further stated that a gas tax was inevitable in Illinois and that unless care is taken early in the game to see that the gas tax, if enacted becomes a tax in lieu of some present tax, quite likely it will be enacted as a strictly additional burden.

A plan for farmers marketing their poultry and eggs themselves with a resulting increase in their own profits was presented by Frank A. Gougler, director of the poultry and egg marketing department. This plan is growing slowly but surely over the state, he pointed out.

Want Farmer-Owned Dairy

R. H. Isaacs of Gillespie, acting President of the Illinois-Missouri Co-operative, Inc., spoke briefly of a plan of Milk Producers in the St. Louis territory and including the counties in this district, by which the creamery building belonging to the bankrupt Illinois-Missouri Milk Producers' Association can be bought by the farmers out of bankruptcy. Need for a farm owned plant in the St. Louis market was expressed as being great because of its influence in maintaining milk prices on that market. The belief was also expressed that the original farmer venture, which was thrown into bankruptcy, was done so because of motives of Federal Judge English, who is now under impeachment trial.

G. E. Metzger, organization director of the Illinois Agricultural Association, presented the plan for the campaigns for renewal of memberships which will take place in Macoupin and Montgomery counties this year. A general increase in membership is expected he said. Iroquois county, the first out of 40 counties to complete its renewal campaign this year, has a 15 percent increase over its old membership.

LISTEN IN!

Farm advisers' radio talks scheduled for the remainder of May are as follows:

Monday, May 11 at 12:30—C. C. Turner, farm adviser of the Moultrie County Farm Bureau, on "Moultrie County Farm Bureau has the Budgets."

Tuesday, May 12 at 12:30 and 8:40—Enos Waters, farm adviser of the Edgar County Farm Bureau, on the accomplishments and services of the Edgar County Farm Bureau.

Monday, May 18, at 12:30—H. A. deWerff, farm adviser of Woodford County Farm Bureau, on "The Accomplishments and Services of Woodford County Farm Bureau."

Monday, May 25 at 12:30—H. O. Allison, farm adviser of Livingston County Farm Bureau.

Ten townships in Adams county are planning corn yield contests for the coming season. The contest will serve as a check on the yielding capacity of strains of corn used by the farmers of the county.

Marshall-Putnam County Farm Bureau has more than 100 farm boys lined up in pig, calf, and corn clubs.

"The best community talk we have heard. Give us another. So reads a communication to the I. A. A. concerning Dan G. Davies' radio message on "Community Happiness in Kane County," from E. E. Hughes, Elburn, Kane county.

PLAY BALL!

Schedules are being determined as the farm bureau baseball season draws near. The following dates have been arranged among the counties of Warren, Henderson, Knox, and McDonough:

	Warren	Henderson	Knox	McDonough
Warren		May 30 Biggsville	Aug. 20 Galesburg	June 13 Monmouth
Henderson	June 27 Monmouth		June 13 Galesburg	June 20 Biggsville
Knox	July 11 Monmouth	July 18 Biggsville		May 30 Macomb
McDonough	June 20 Macomb	July 11 Macomb	June 27 Galesburg

CROP PROSPECTS IN STORM-SWEPT AREA ARE UP TO NORMAL

Farm Relief Committee Workers Survey Devastated Region and Report Good Prospects

"The usual and normal acreage of tillable land in the tornado area in Illinois is at this time in crop or prepared for seeding," says R. A. Cowles, chairman of the Illinois Farm Relief Committee and I. A. A. treasurer. "This statement coming now means that the field work in the area is advanced over the average season. To those who are familiar with actual conditions consequent upon the disaster, the recovery must be regarded as remarkable."

Mr. Cowles, with vice-chairman of the committee, Curt Anderson, spent the greater part of the week of May 10-16 in the tornado district. In Franklin county a two days' personal canvass was made of individual rural cases, and a personal inspection of rural areas was made in White and Hamilton counties. Reports which may be relied upon were received in a meeting at the Jackson County Farm Bureau office on Saturday afternoon, May 16, and a canvass of individual cases in that county was made Monday, May 18.

Credit Where Credit Is Due

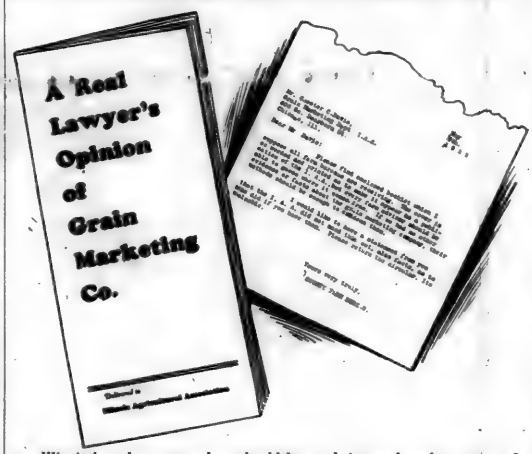
"Credit for the accomplishment first of all properly belongs to those who suffered disaster and who with courage met this task under severe handicap and with many privations," states Mr. Cowles. "Credit belongs to the good neighbors from far and near who came in and provided helping hands. Credit belongs to those who contributed supplies and funds, and to the several organizations that actively assisted in getting together these necessities and have assumed the responsibility of rehabilitation according to needs in each individual case.

"Farmers all over the state have responded so heartily to the call for help for their unfortunate southern Illinois neighbors that the total amount contributed to the Farm Relief Fund now amounts to $173,010.50—and we hope before the week is over that the $180,000 total at which we aim will be reached.

"All of this, it should be remembered, followed emergency aid and relief immediately administered by hundreds of willing volunteers. This story of first aid in the administration of surgical and medical attention, shelter, food, and clothes, has already been related.

"Throughout the rural area today repairs are well under way and buildings are beginning to go up—with some few nearing completion. The people for the most part are, however, living in government 'Sibley' tents dotting the area.

Red Cross in Thorough Survey



"The American National Red Cross are engaged in making a most thorough survey of each individual case as a basis for award. The organization operates through zone offices located at Carmi, McLeansboro, West Frankfort, Bush, DeSoto, Murphysboro and Gorham, with a general area office at Murphysboro.

"Very favorable weather conditions have assisted in advancing the field work and should not be overlooked. Many problems, needless to recount, have been continually encountered by all of those engaged in rehabilitation work. As might be humanly expected, some mistakes have been made and some criticism just and unjust is to be expected. All organizations engaged in the work in greater or lesser capacities are seriously engaged in advancing progress to the best of their ability. The value of organization has again been demonstrated in this disaster."

An article appearing in the last issue of the RECORD in error made

(Continued on page 3, col. 2.)

OH WHAT A TANGLED WEB WE WEAVE, WHEN FIRST WE PRACTISE TO DECEIVE!

Illinois farm bureau members should be on their guard so they are not deceived into believing that the booklet entitled "A Real Lawyer's Opinion of Grain Marketing Co." was published by the Illinois Agricultural Association. The booklet contains the supposedly suppressed Starr report. It is worded so as to make the unknowing reader believe that the report was actually printed and distributed by the I. A. A. The letter reproduced at the right is typical of the reaction of county Farm Bureau officials upon receiving copies of the booklet. All Farm Bureaus in Illinois received copies and thousands are being circulated to advance the pr[illegible] of the Grain Marketing Company, "The Farmers' Own Company."

May Have Soft Winter Wheat Pool in Counties Along Wabash Valley

Possibilities for a southern Illinois soft red winter wheat pool are reflected in a report given to the executive committee in its May meeting.

"Much of the soft red winter wheat grown in the southern third of Illinois is in a territory not served by farmers' elevators. Therefore the grain marketing committee recommends a marketing program for that territory that is based on the individual producers," states the written report.

"Studies are under way to determine the normal movement to market of the wheat that is shipped from the county where it is grown in this territory," the report continues. "A great part of each crop is milled in the counties where it is produced, while the shipment from south-eastern counties is mostly to markets east and south in Indiana and Kentucky. From the southwestern counties the movement is mainly toward St. Louis.

Wheat Now Competes with Pool

The Wabash Valley wheat comes in direct competition with wheat handled through the Indiana Wheat Growers' Association and some demand is apparent for an organization on the Illinois side to provide for the sale of the wheat through the sales agency of the Indiana Wheat Growers' Association. This organization might eventually take form as a Southern Illinois soft wheat pool closely affiliated with the Indiana organization. For the present season, if the county Farm Bureaus and wheat growers of that territory are favorable, organization might be confined to about 10 or 12 counties bordering Indiana. The study of the situation is not yet complete, and there are details yet to be worked out."

To Go Ahead

The report was adopted by the following motion: "That the grain marketing department and the grain marketing committee continue the study of the soft winter wheat marketing problem in Southern Illinois, and that the officers of the I. A. A.

(Continued on page 4, col. 4.)

Commission Sets May 27 For "Exhaustive Hearing" As Merger Asks More Delay

Decision to hold an exhaustive hearing May 27 into whether it has jurisdiction of the $26,000,000 grain merger, the Grain Marketing Company, was announced by the Illinois Commerce Commission May 14 after it heard arguments continued from the day before.

The postponement was made upon application of the Grain Marketing Company. Hearings have also been held in Indiana, but the outcome is said to be largely contingent upon the decision of the Illinois Commerce Commission.

In the hearing of May 13, counsel for the Grain Marketing Company contended that the Illinois Commerce Commission does not have at the present time nor will it ever have supervision over the merger. It was claimed that the federal secretary of agriculture would have supervision.

Claim Legal Decision Precedent

According to the merger's attorneys, the status of the public utilities (public elevators) controlled by the Grain Marketing Company has not changed even though there has been a contract for possible sale to the Grain Marketing Company, but if the sale is successfully completed, those public elevators under control would be under the jurisdiction of the Commission. A decision rendered by the Illinois Supreme Court was quoted to show that the law backs up the merger's stand.

It was explained that the Grain Marketing Company operates these elevators as subsidiaries of which the merger is the stock holding company leaving the utilities in absolute control of the Board of Managers of the Grain Marketing Company.

Connection Is Close

"Where the connection is so short," said Frank L. Smith, chairman of the Commission, "and where the holding company holds all the stock, taking all the profits and having all control, I don't care whether it's the law or not, it is evident that some public body should have jurisdiction from a public standpoint."

(Continued on page 4, col. 2.)

SENTIMENT FOR CUTHBERTSON GAS TAX RISES AS SENATE APPROVES I.A.A. AMENDMENT; FATE OF PROPERTY TAX REDUCER DECIDED SOON

Legislative Committee is Pushing: Gas Tax in Place of County Highway Tax; Registration of All Poultry Received by Dealers for Protection Against Thieves; Tice Bill and $3,000,000 Appropriation; Constitutional Amendment to Relieve Property Taxes; Bill Permitting School Districts More Self-Control;—Opposes Bill Requiring No Narrow-Tired Wagons on Roads

PROSPECTS for passing the Cuthbertson gas tax bill which provides for reducing property taxes by using the gas tax revenue in place of county highway taxes, boomed skyward when the amendment offered by Senator Cuthbertson (Macoupin) and the Illinois Agricultural Association was approved by the Senate on May 13.

By the time this RECORD reaches its readers the fate of the Cuthbertson bill may have been decided by the vote of the Senate, for the bill, after being amended was placed on third reading, ready for defeat or passage.

The amendment divides the expected $10,000,000 annual revenue from a state-wide two-cent gas tax on a 20-60-20 basis. That is, 20 per cent to the State Highway Commission for use upon any roads upon which it sees fit to spend its share; 60 per cent distributed back to the counties on the basis of their motor license fees and the remaining 20 per cent also goes back to the counties on the basis of their mileage of state aid roads. This distribution is more equitable than the one provided for in the original bill, which was never claimed to be in its final form when first submitted.

Still a Lieu Tax

An amendment to divide the fund 50-50 with the State Highway Commission and the counties was withdrawn by Senator Meents. This amendment was opposed by the Illinois Agricultural Association because of the small portion going back to the counties and also because it did not require the use of the gasoline tax revenue to be in place of county highway taxes, the principal feature of the I. A. A. gas tax stand.

No Gas Tax on Tractors

The I.A.A. amendment still leaves the gas tax as a reducer of property taxes. Provision is made in the bill for exemption of gasoline used in tractors, stationary gas engines and other gasoline not used on the public highways.

The I. A. A. legislative committee—Chairman Frank D. Barton of Cornell (Livingston), H. E. Goembel of Hooppole (Henry) and A. C. Everingham of Hutsonville (Crawford)—is optimistic about the bill as is President Sam H. Thompson, who has also been in Springfield assisting the farmers' legislative directors.

Against Poultry Thieves

One of the chief legislative side lines of the committee has been in urging the passage of the bill to require poultry dealers to keep a register of all purchases of poultry. The bill provides a penalty of a fine from $5 to $50, and would serve as a damper to the activities of poultry thieves. This bill, which is sponsored by Senator Jesse L. Deck of Decatur, has now passed the Senate and is in the House. The legislative committee is actively sponsoring its passage in its present form.

Should a farmer be allowed to drive a narrow-tired wagon on the roads on Illinois? The Senate has said "no" and the House is now faced with voting on the bill which requires that after July 1, 1925, driving on any paved or oiled highway with steel tires be prohibited unless the tires are three inches wide on wagons and loads exceeding 2,000 pounds. The penalty for violation is fixed in the bill at a fine from $5 to $10 for each offense.

The I. A. A. attitude on this bill is that it would be a hardship on the farmers of Illinois. It would require a great many farmers to buy new wheels and in many cases new wagons. In addition, certain road conditions require narrow tires.

I.A.A. Guarding Farmer's Purse

According to the legislative committee's report to the executive committee recently, any kind of law requiring farmers to throw away their narrow-tired wagons would be nothing less than a severe financial hard-

(Continued on page 3, col. 4.)

BUTTER SURPLUS OF WINTER GONE AS CONSUMERS BUY

I. A. A. Educational Campaign Helps to Reduce Surplus of Dairy Spread Below Average

What happened to last fall's butter surplus?

Illinois farmers are cashing in an extra quarter of a million dollars on their cream this May. A strengthened butter market, due to educational campaigns characterized by such slogans as "spread your butter thicker," and "there is no substitute for butter," which resulted in an effective reduction of the butter surplus is held responsible for the healthy condition of the industry today.

Surplus Is Gone

"The heavy surplus of last fall and winter," states the dairy marketing department of the Illinois Agricultural Association, "in October, 1924, was 50,000,000 pounds of butter in excess of previous five year averages. This has been gradually reduced until May 1, 1925, instead of a surplus as compared to previous years, there actually was 3,000,000 pounds of butter less than the customary average. May 1, 1925, found 5,000,000 pounds less in storage than May 1 a year ago."

The current price received by the farmers for butter fat is four cents more than it has averaged for any month of May during the last four years, states the I. A. A.

U. S. Eating More Dairy Spread

"Butter consumption in the United States has increased steadily in the last four months over what it was a year ago. March, 1925, showed an increase of 4.9 per cent over March, 1924. The increased use of butter can be laid largely to good employment conditions, a slight increase in quality of the product, and especially to the fact that farm organizations in the principal dairy states have been active in encouraging the use of butter and dairy products, for which there is no substitute."

Using the slogan, "Spread your butter thicker," the Illinois Agricultural Association, co-operating with the Illinois Butter Improvement Association, last winter started a state-wide campaign to increase the consumption of dairy products. Ten thousand posters were distributed throughout the state, urging farm and city people alike to use more butter.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entered as second class matter Oct. 19, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

Gougler; special representative on Tuberculosis Eradication, M. H. Petersen; Legal Counsel, Donald Kirkpatrick; Co-operative Accounting, Geo. R. Wicker.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Five Reasons

FIVE reasons why Illinois should have a gas tax in place of county highway taxes are:

1. Reduces property taxes, both city and country.
2. Places cost of roads on autos that use them and in proportion to the amount of travel.
3. Lets tourists pay their rightful share.
4. Improves farm-to-market roads, not just trunk lines.
5. Because a gas tax is as popular as any tax could be, and it is easy, simple and inexpensive to collect.

—o—

"Spread Your Butter Thicker"

WHAT'S in a slogan?

Evidently there's a lot of value in a good one. "The flavor lasts" is a catchy phrase that helps William Wrigley sell his chewing gums to millions of people the world over. The funny part of it is that if he lets down telling the world about his gum by means of this slogan and its brothers, he notices a corresponding decrease in gum sales. One week's let-up makes a noticeable difference in the world's gum chewing. The more ads Wrigley runs, the more the world smacks its gum.

Henry Ford resorted to advertising by means of joke books for many years, but with the application of legitimate advertising a couple of years ago he sold more Fords last year than ever before in the history of his industry.

The same is true in varying degree with: "The skin you love to touch"; "Ask the man who owns one;" "Time to re-tire;" "One of the 57;" "When it rains, it pours" and many others.

Now we have a demonstration of what a slogan will do for farmers.

The I. A. A., through its dairy marketing department, started the slogan: "Spread your butter thicker." This was given publicity and it spread. Others took it up. As a slogan, it is catchy. It handles well on the tongue. But most of all, it says something. It has helped bring results. We don't say it is responsible for all the decrease in that price cutting butter surplus, but it at least helped.

—o—

Looking Into the Future

WHAT can Illinois farmers expect, in terms of dollars and cents, from co-operative marketing during the next five years?

Few people are in better positions to answer this question than the directors of the co-operative marketing departments of this association.

Here is what Frank A. Gougler, director of poultry and egg marketing, has to say about his line for the future:

About one-fourth of our Illinois counties annually sell more than one million dozens of eggs per county. Our last census reports that Illinois now sells $37,864,702 worth of poultry and eggs each year.

The question asked has resolved itself into: Can these commodities be sold more efficiently co-operatively than the manner in which they are sold at present?

Within our own state we have no measuring stick with which to arrive at a satisfactory answer to that question, since up to date we have no functioning co-operative poultry and egg marketing associations of any importance. We do have, however, figures from nearby states which show that the members of their co-operative marketing associations received from 2 cents to 6 cents per dozen more for their eggs than the average paid for eggs outside the association.

At first thought 2 cents seems like a small amount but when thought of in terms of larger volumes than a single dozen, its importance is more outstanding. Take a million dozen egg county for example and the extra 2 cents amounts to the neat little sum of $20,000. It ceases to be "pin money." This is nearly enough to pay dues in the local county Farm Bureau and the Illinois Agricultural Association for 1,500 members. It is entirely possible to accomplish this with eggs alone, to say nothing about poultry.

What about poultry anyway? In a survey conducted in Wayne county, Illinois, 66 per cent of the farmers reported that they take their poultry to market without first fattening them. That is just what the poultry fattener wants for he takes the growthy young birds and milk feeds them and makes from 12 per cent to 50 per cent gains in 10 to 14 days.

If Illinois farmers would market their hogs as they market their poultry, each fall, just as the new corn crop is ready to turn into, they would load up all their fine growthy shoats and cart them off to market and let someone else fatten them instead of doing the job themselves.

The benefit derived from this feeding stunt is from two sources, namely, the gain in weight put on the birds and changing the quality of the flesh from a cheap grade of flesh to one of higher price.

Quality in eggs should not be overlooked, particularly in the co-operative marketing of eggs, for those of higher quality bring the most money and co-operatively, eggs will be handled only on the graded basis.

Here's an illustration as it actually worked out in practice last year through a mid-west co-operative organization. An egg pool, during the first half of May, was made up of:

50 per cent extras	@	22 cents per dozen (15 doz.)	$3.30
40 per cent firsts	@	18 cents per dozen (12 doz.)	2.16
10 per cent seconds	@	15 cents per dozen (3 doz.)	.45
		Value per case	$5.91

The average received per case through the pool was $5.91. Non-members received an average price of $5.31 per case. On the average, association members received 60 cents per case more than non-members.

Now, how about those above and those below the average in quality? Here's the way those fared with extra good eggs:

75 per cent extras	@	22 cents per dozen (22½ dos.)	$4.95
20 per cent firsts	@	18 cents per dozen (5.6 dos.)	1.00
5 per cent seconds	@	15 cents per dozen (1.9 dos.)	.28
			$6.23

This producer realized 91 cents per case above current receipt prices. But the producer of poor quality fares differently, as follows:

10 per cent extras	@	22 cents per dozen (3 dos.)	$ .66
40 per cent firsts	@	18 cents per dozen (12 dos.)	2.76
50 per cent seconds	@	15 cents per dozen (15 dos.)	2.25
			$5.67

This member receives 37 cents per case through the co-operative association less than he would have received had he sold them as current receipts, which merely goes to show that a co-operative institution must be built upon quality if it succeeds.

Application of these known results, coupled with fair response from farmers to a sound plan of procedure to establish co-operatives, will undoubtedly make a big, favorable change in poultry and egg marketing during the next five years.

Wm. E. Hedgcock, director of livestock marketing, has this to say:

The potential possibilities of extending the co-operative livestock marketing field in Illinois are very promising when we bear in mind that during the last three years through the establishing of the Producers Livestock Commission associations and other co-operative commission companies, we have been able to market 14 per cent of the Illinois livestock at an advantageous price to the farmers and at a saving of over $110,000 with a possibility of increasing our saving at the ratio we increase the percentage of Illinois livestock marketing. This 14 per cent is a good start toward helping eliminate the radical breaks.

On the basis of the 1924 refund to the farmers, if 100 per cent of the livestock were marketed co-operatively, it would mean an approximate saving of $785,000.

Through the development of the livestock shipping associations during the past few years, Illinois farmers in 1924 marketed approximately 35,000 carloads of livestock at an increased price of 25 cents to $2 per hundred. With a conservative estimate of 50 cents per hundred, this increase has meant $2,975,000 more income to Illinois farmers. If 50 per cent of the Illinois livestock were marketed through co-operative shipping associations it would be reasonable to expect an additional $5,500,000 income for our farmers.

In discussing the savings to the livestock producers through co-operative marketing we must take into consideration our wool marketing which, at a conservative figure, netted the Illinois farmers not less than $10,000 in 1924. This increased income was based upon the handling of about 25 per cent of the Illinois 1924 wool clip, which at the above rate would have meant approximately $100,000 to Illinois farmers provided all of the 1924 wool had been marketed through co-operative channels.

The swine growers, alone, through pooling of serum orders in 1925 will save approximately $50,000. You can readily estimate what the savings would be to the farmers if all serum used by the swine growers was purchased through the same channels.

The above figures indicate a fertile field for those interested in the future developments of co-operative marketing and we should be able to expect, during the next five-year period, through the co-operation of all farmers, to be marketing 35 per cent of our livestock through the Producers Commission associations, 40 per cent through our co-operative livestock shipping associations, 50 per cent of our wool through the pool system and the purchasing of 50 per cent of all serum used by Illinois farmers. When farmers themselves handle as much as 35 per cent of their own stock, it will go a long way toward eliminating wide price fluctuations. To attain this goal will call for the utmost co-operation and support of all Illinois farmers interested in advancing their own cause. No one else will do it, it's up to Illinois farmers.

Later we will hear from the other marketing departments—dairy, grain, and fruit and vegetable.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis Is Agin It!) **Even Epidermis Gets Suspicious!**

COMMERCE BODY PROMISES MORE ATTENTION TO PROPERTY RIGHTS

UNITY IN FARM LIFE IS HOME BUREAU AIM AS PROGRAM DEVELOPS

Federation Head Tells of the County Play Day as First Step in Farm Women's Scheme

The Illinois Home Bureau Federation, state association of county Home Bureaus, now in the fifth month of its existence, is planning a "County Play Day" as the first step in its program to unify farm and community life.

Mrs. Spencer Ewing, Bloomington, president of the Federation, in commenting on the plan, says that heretofore in Illinois, Home Bureaus have had in mind the county as their largest unit. "Local groups have worked in the township or community and have been thrilled and inspired on coming to a county meeting by getting a vision of larger membership. Now, with the Home Bureau Federation this county viewpoint is still further enlarged to a state-wide point of view and the individual member passes on from her local point of view through the county view-point to one embracing state-wide conditions. She begins to think in terms of the state, and her idea of home bureau is correspondingly changed and broadened."

Unity the Coming Thing

In the past, county Home Bureaus have gone their own way and done their work as isolated units, states Mrs. Ewing. "Occasionally news has sifted in from other counties, but there has been no feeling of 'togetherness' and working for the same big ends. With the coming of the Federation, committees have been appointed of women from widely separated parts of the state, correspondence has taken place, acquaintance made, mutual aims discussed, and the county organizations drawn together by a dozen bonds. Isolation is a thing of the past, unity and co-operation are the coming characteristics."

The Federation works with the force of members, the Home Bureau head believes. "Where the counties represent hundreds, the Federation numbers thousands, and numbers count. When in army tactics any big thing needs to be done, regiments, not companies, are used. No general would think of attacking with a single company. So the Federation with its larger membership, with the momentum of numbers can do more than a single county working alone. It is also in a position to work with other state organizations; it has a state machinery which corresponds and fits into that of the others; it can look them in the eye; can meet them on equal terms, and work for proportionate ends. Its own self-respect and value is enhanced thereby.

Let's Play

"As its first piece of work, the Illinois Home Bureau Federation is suggesting a County Play Day this summer. In such a play day everybody, young and old, takes part, even the children of kindergarten age. There is a general assembly in the morning, with flag ceremonies, followed by some special events like singing, games or folk dances. Then the crowd separates into various groups for team and individual athletics, games, etc., each with its group leader. At the end of the day, the crowd comes together again for some general event like a base ball game. Negotiations are on foot for the co-operation of the farm bureaus in this County Play Day, and it is hoped that their active assistance will be obtained."

WITH THE PRODUCERS

During the fiscal year of April 1, 1924 to March 31, 1925, Illinois shipping associations contributed 2,521 cars to the Producers at Indianapolis, which represented 75.3 per cent of all shipping association business to that market.

The high association in Illinois was the Charleston Shipping Association in Coles county with 119 cars. This association consigned close to 100 per cent of its live stock to the Producers.

The high county in Illinois was Coles with 301 cars. Clark was second with 253 cars. Eleven Illinois counties shipped 100 per cent of their shipping association consignments that came to Indianapolis, to the Producers.

Attorney General Rules Poisoning of Ground Hogs Is Legal If Done Right

After fox hunters and game wardens in Taswell county had opposed the Tazewell County Farm Bureau's ground hog poisoning demonstrations, Ralph E. Arnett, the farm adviser, made a trip to Springfield to get an interpretation of the law.

His reply from Oscar F. Carlstrom, attorney general, is of state-wide importance. The attorney general's opinion is that it is permissible to poison ground hogs and other pests of similar nature and that are not protected as fur bearing or game animals. However, the poisoning must be under supervision of some authority who knows where and how to place the poison. Farm bureaus are classified as authorities, providing the adviser has received and is readily conversant upon animal poisoning as prescribed by the United States Department of Agriculture. The Tazewell County Farm Bureau's demonstrations were carried out.

Committee Determines Taylorville as Scene Of Year's I. A. A. Picnic

Taylorville, county seat of Christian county, will be the scene of this year's annual I. A. A. state picnic, according to the decision of the executive committee at its May meeting.

Christian and Tazewell County Farm Bureaus sent representatives who appeared before the executive committee asking for the picnic. Although both counties have good picnic facilities, the committee decided to accept the invitation of the Christian County Farm Bureau and extended its thanks and appreciation to the Tazewell County Farm Bureau. Other counties were interested also.

Christian county was taken because it is slightly farther from last year's big picnic which was at Lincoln in Logan county. Traveling conditions were described as being of the best to Taylorville.

Pending the selection of some nationally known figure as chief speaker of the occasion the exact date of the picnic has not been set. The time now appearing most suitable is some day in the first three weeks of August, with the second week preferred. More detailed announcements will be made later.

SAVE $20 TO $40 A CAR ON CO-OP MANURE BUY

A reduction from $20 to $40 per car is the record of the co-operative manure buying project of a southern Illinois county.

Union County Farm Bureau on February 1, 1925 sponsored a movement to purchase manure from jobbers in Chicago and St. Louis for the benefit of fruit grower members. According to R. E. Blaylock, county Farm Bureau president, farmers contracted for 500 cars for 1925, to be delivered in varying amounts each month.

While individual farmers formerly bought manure irregularly and paid high prices for the fertilizer, they now have the advantage of orderly buying and so are able to realize big savings, according to Mr. Blaylock.

The first shipments were received on March 1. While most of the manure is shipped to Union county points, some of it reaches Johnson and Pulaski counties, according to G. E. Fager, Anna, farm adviser of Union County Farm Bureau.

GAS TAX SENTIMENT GAINING MOMENTUM

(Continued from page 1)

ship. Consequently the I. A. A. will fight for the farmers' pocketbooks by endeavoring to keep the bill from passing in the House.

If it is necessary to keep narrow-tired vehicles off the roads, it would be more fair to require all manufacturers to make and sell only the wider-tired wheels. This requirement would automatically replace present vehicles with those having uniformly wide tires and the change would cause no material hardship on anyone. Or, as an alternative, the I. A. A. may suggest an amendment to the bill deferring the enactment until 1930 thus giving all farmers a chance to be prepared for the change, which is only fair.

T. B. Appropriation in Danger

Obtaining a three million dollar appropriation for paying t.b. indemnities became rather doubtful when Senator Barr introduced an amendment to his original bill which cut the appropriation to two million for the biennium. The three million dollar appropriation is deemed necessary by the I. A. A. if the present program of eradication is to be carried out with efficiency. Strong support was accorded the three million appropriation in the Senate, there being so much opposition to the cut that action was deferred. By the time this RECORD reaches the reader, it is likely that the Senate will have reached a decision.

Constitutional Amendment

The Lantz resolution, which provides for an amendment to the state constitution untying the legislature's hands and permitting levying of taxes in accordance with present day taxing methods, is resting with favorable support from all state organizations excepting the Illinois Manufacturers' Association. Unless some amendment for a constitutional restriction upon Cook county's representation in the legislature is given precedence, the Lantz resolution will be the most favorably considered when the time comes to consider which one possible constitutional amendment shall be submitted to the voters.

Support School Bill

Support is being given House Bill 566 which allows the detachment of territory from a community or high school district, and the attachment of such territory to an adjacent community high school district or to an adjacent township high school district, when 75 per cent of the voters so vote. The legislative committee feels that this bill, if passed, would provide means of correcting many school muddles.

Illinois Fruit and Vegetable Growers Adopt Indian Name for Quality Products

An Indian tribe is responsible for the trade name of southern Illinois fruit and vegetables.

Following the example of the Illini Indian tribe, whose maneuvers were the news of the day in pre-White Illinois history, the Illinois Fruit Growers' Exchange, co-operative fruit and vegetable growers sales agency in southern Illinois, has adopted as its trade name, "ILLINI."

A. B. Leeper, general manager of the exchange and fruit and vegetable marketing director of the Illinois Agricultural Association, states that the exchange is built on a co-operative marketing basis and operates on much the same way as the California Fruit Growers' Exchange, successful western commodity marketing organization. Contracts are drawn with brokers throughout the middle west and the east in the shipment of its produce. As shipments are made directly from local assembling points to destination, the exchange does not act in the capacity of warehouse, but only as a central agency.

ILLINI for Quality

The trade name "ILLINI" will be used on every package of quality fruit or vegetables sold through the exchange. According to Mr. Lawrence, sales manager, the name was chosen for its appropriateness. "The Illini Indians," he says, "were 'chief-of-all' when it came to war and they also were leaders when it came to sports. At the time of the organization of the exchange, it was decided that this name of 'ILLINI' could very fittingly be used by an association which was composed of the better growers, the chiefs, and the leaders."

The work of the fruit growers in southern Illinois has progressed until today the label is used on all the best grade products shipped by the growers. Formerly only tree fruits were given that name by the exchange.

Quality Based on Honest Packing

"This year," declares Mr. Lawrence, "due to the progress made and the success achieved in getting honest pack and true grading, the growers have reached their goal and can now carry out the original idea of the organizers, which was to use the 'ILLINI' label on all commodities of the bang-up quality type."

May 10 marked the first day when a shipment of strawberries left Villa Ridge. This is the first shipment of the fruit from an Illinois point this season, according to Mr. Lawrence.

RIGHTS OF PROPERTY NOT TO BE IGNORED, UTILITY BODIES FIND

Right of Eminent Domain Subject to Farmers' Inconvenience; DeKalb Case Dropped

The time has passed when public utility corporations in Illinois can get right-of-way privileges from the Illinois Commerce Commission, without consideration of inconveniences imposed on the farming classes.

According to the I. A. A. transportation department, the Illinois Commerce Commission has declared that whenever public utility companies apply to it for a certificate of convenience and necessity, the Commission will consider the side of property owners whose lands are in the territory to be crossed by the transmission lines. State laws require utility companies to notify only other public utilities, and not property owners, of intended action, before applying to the Commerce Commission for permission to construct their lines.

"When a public utility company at Galesburg asked the state Commerce Commission for permission to extend its power lines over a certain territory, the farmers concerned objected to the move," says L. J. Quasey, I. A. A. transportation director. "The chairman of the Commerce Commission accordingly has set aside the first week in June for a conference on the matter. The farmers from Galesburg to Galva want the lines to extend over another route than the one proposed, and will be represented by a committee at the conference."

Rate Increase Not Granted

The DeKalb County Telephone Company Case, in which the company asked permission to increase its telephone rates to subscribers, has been ordered dismissed by the Illinois Commerce Commission. The increase in toll rates has not been granted.

The I. A. A. transportation department in behalf of the farmers involved, had filed a brief with the Commission bearing on the case, pointing out that the establishment of further toll rates would fall unduly on the rural subscribers, also that the company had made substantial returns and therefore was not entitled to an advance in rates in any form.

Rate schedules filed by the DeKalb County Telephone Company with the Commission on December 22, 1920 and February 3, 1925, have been declared permanently canceled and annulled.

Deferring Peach Rate Increase Saved Union Bureau's Yearly Cost

In discussing problems as encountered by the transportation department before the May meeting of the I. A. A. executive committee, R. K. Loomis, the representative of the 25th district, told of an instance wherein the Illinois Agricultural Association had been of inestimable service to the peach growers of Union county last year.

"Deferment of a peach rate increase for 60 days," said Mr. Loomis, "saved enough money in Union county to pay farm bureau dues in Union county for a year. This is an illustration of how farmers can benefit by working together in a state-wide way, combining their strength, both financial and moral, to secure the best possible representation on our common problems. This saving is appreciated in Union county.

LAUNCH INSTITUTE TO TRAIN STUDENTS FOR CO-OP LEADERS

I.A.A. Only State Body of 16 National Farm Organizations Backing World-Wide Study

Two I. A. A. directors have been honored with the request to join the faculty of the American Institute of Co-operation. They are Geo. R. Wicker, general manager of the Illinois Agricultural Co-operatives Association, and A. D. Lynch, dairy marketing director.

Working together with other leading farm organizations in the forward movement of co-operative marketing, the Illinois Agricultural Association is supporting the American Institute of Co-operation. This body was incorporated under the laws of the District of Columbia as an educational institution in January, 1925, and will launch its first summer session at the University of Pennsylvania, July 20 to August 15.

The I. A. A. is the only state association among 17 participating organizations that are promoting the undertaking. Geo. R. Wicker, I. A. A. co-operative accounting director, is on the board of directors and executive committee for the Institute.

The Institute is educational, according to Mr. Wicker. The founders purpose to train students for leadership in managing co-operative associations. This, they hope, will be accomplished by providing courses on review of the past history of the co-operative movement, and also practical problems from actual co-operative life.

Tackle Practical Problems

The present plan includes special study of commodity problems in seminars as follows: first week—grain, live stock dairy products, and supply-buying. Second week—fruits, vegetables, poultry and eggs, and dairying. Third week—fluid milk, butter and cheese, and manufactured milk products. Fourth week—cotton, tobacco, and dairy products.

The legal phases of co-operation constitute only a number of important aspects of the movement which will be discussed at the summer session of the Institute.

Both Mr. Wicker and Mr. Lynch have been granted a leave of absence from their I. A. A. duties by the I. A. A. executive committee. They will spend a week to 10 days at the summer session as leaders in round table discussions.

Fayette, Washington Counties Thinking of Joining Farm Bureau

Fayette county bankers in a meeting at Vandalia, May 17, adopted resolutions favoring the establishment of a Farm Bureau and securing a farm adviser. Financial assistance was offered the farmers of the county if it is needed to establish a Farm Bureau.

Fayette county is one of nine Illinois non-farm bureau counties, the others being: Calhoun, Jasper, Washington, Perry, Hamilton, Hardin, Massac and Alexander.

Agitation for organizing a Farm Bureau has also started in Washington county. Because agricultural conditions have not been of the best is the reason why no Farm Bureaus have been organized in these counties previously.

FARM BUREAU PREXY DIES

Clinton County Farm Bureau suffered the loss of its president, Geo. W. Koch, who died May 2. The executive committee passed a resolution of condolence and extended sympathy to Mrs. Koch and children. The vice-president, C. C. Hofsommer, succeeds to the presidency.

District Meetings of Farm Elevators Resolve More Against Big Merger

Each of the district meetings of farmers' elevator executives held recently in Champaign, Pontiac and Morris have passed resolutions stating that the Grain Marketing company is in no sense a true farmers' co-operative enterprise controlled by farmers; that neither the farmers nor their patrons should subscribe for stock and that true co-operators should actively fight against the merger. The merger, however, was discussed but little, there being, as one man said, "no confidence in it."

DAIRYMEN TAKE OVER CITY MILK CONCERN

Plans for a permanent building for the newly organized Producers' Dairy Company, a Springfield co-operative, are under way. The co-operative was organized jointly by the Sangamon County Milk Producers' Association and the county Farm Bureau as a project to supply consumers in Springfield with the product of the dairy cow. It is a farmers' stock company organized under the Illinois Co-operative Marketing Law.

The dairy plant of a local dairy concern has been bought. Installation of an ice machine and a cooling room are now under consideration. Operations will be begun at the earliest convenience, according to H. H. Maurer, president. Over $10,000 worth of stock has been sold among dairy farmers throughout the county.

Motor Cars, Better Roads, Better Schools, Vanguards of Higher Community Life

That the farmer has a very definite place in the scheme of things, and that it is his duty to find it, is the statement made by R. F. Karr, Iroquois, in a recent radio address over WLS, Chicago. Mr. Karr is executive committeeman in the I. A. A. from the 18th Congressional district. He is chairman of the I. A. A. department of information advisory committee.

R. F. Karr

Co-operative effort, declares Mr. Karr, has only begun to assert itself. He believes that no class of people have made greater strides in the business world in the last few years than the farmers. He mentions the automobile, better roads, and better schools as vanguards in the farmers' march toward a better community life.

"Working together is the wise way of working out individual, mutual, and industrial problems," states Mr. Karr. "That is a matter of growth, a matter of education—a matter to be acquired out of abundance of experience.

"When through organization and co-operation we have attained to the fullness and richness of life to which we are all equally entitled, then will the farmer have attained to the highest possible niche in the agricultural world," Mr. Karr concludes.

MAY 27 IS DATE SET FOR MERGER HEARING

(Continued from page 1)

Donald Kirkpatrick, I. A. A. legal counsel, showed that the Grain Marketing Company holds leases for seven Illinois public warehouses with a total capacity of approximately 10,000,000 bushels which is two-thirds of the public warehouse space in the Chicago district, and is paying a rental of eight per cent of the valuations of these properties. Evidence was also shown by Mr. Kirkpatrick wherein the Grain Marketing Company was advertising control of those elevators in its campaign to sell approximately sixteen million dollars worth of stock.

LISTEN IN! !

Farm Advisers' radio talks scheduled over WLS, Chicago, on the I. A. A. radio program are as follows:

Monday, May 25 at 12:30—H. O. Allison, Livingston county farm adviser, on "Building a Permanent Agriculture in Livingston County." Tuesday, May 26 at 12:30 and 8:40—J. J. Doerschuk, Lake county farm adviser, on "Farm Bureau Service to Lake County Dairy Farmers," and "Developing Community Spirit in Lake County." Monday, June 1—F. W. Wascher, Effingham county farm adviser, on the accomplishments and services of Effingham County Farm Bureau. Tuesday, June 2, at 12:30 and 8:40—F. E. Longmire, Grundy county farm adviser, on the accomplishments and services of Grundy County Farm Bureau.

Wednesday, May 27 at 12:30—Wm. E. Hedgcock, I. A. A. livestock marketing director, on "WOOL MARKET TRENDS."

Randolph County Farm Bureau has a Jersey breeding association which will give about 15 farmers joint ownership of three well-bred Jersey sires. The members look on this as one step forward in improving the quality of dairy breeding animals used in that section. The Jersey county group is one of 12 co-operative bull associations in Illinois.

First $100 Award For Cattle "Bootleggers" Won in Lake County

The first claimant to the standing $100 reward offered by the Illinois Agricultural Association for information leading to the conviction of cattle "bootleggers" is D. H. Minto, president of the Lake County Farm Bureau.

The executive committee in its May meeting looked with favor upon Mr. Minto's work and ordered that the award of $100 be paid him upon receipt of written data covering the case. He helped apprehend and prosecute violators of the federal and state rules for transporting cattle not t. b. free. The reward is offered by the I. A. A. to help protect farmers who have tested their cattle from re-injection by unscrupulous cattle traders.

FARMERS HAVE CHANCE TO POOL WOOL CLIP IN 1925 AS BEFORE

I.A.A. Is Ready with Plan to Ship Wool to Boston and Get the Highest Prices

Farmers of the state again will have the privilege of pooling their wool co-operatively, according to the I. A. A. live stock marketing department, Wm. E. Hedgcock, director. Arrangements have been made with the National Wool Exchange to market the wool of Illinois flocks this year.

"In the last five years," says Mr. Hedgcock, "Illinois and Iowa wool has been sold to eastern mills in the Boston territory, but was first graded in Chicago. Under the new arrangement, the wool this year will be shipped to Boston and graded there, then sold to the mills. This gives the producers a chance to get their wool graded and sold at the largest wool market in America."

Advantage Without Extra Cost

According to the I. A. A. department, the National Wool Exchange declares this arrangement to be to the advantage of Illinois producers, as Illinois wool has been sold to eastern mills in the past. "Handling charges," states Mr. Hedgcock, "are not increased under this plan, as wool growers have always had to pay the freight of shipments to Chicago in the past, plus the freight from Chicago to the eastern mills.

"The Illinois pool in 1924 netted the farmers from eight to twenty cents per pound over what they were offered at the time of shearing. Fifty-two counties were represented in the pool and marketed 93,637 pounds of wool. The principle of pooling wool is right and in line with the co-operative marketing endeavor. The farmer thus gets as much for his product as the local dealer would receive, at the time the wool is sold on the market."

Established "Wool Pool Weeks"

This summer, certain weeks will be set aside as "Illinois wool pool weeks." Mr. Hedgcock is looking for a large consignment of wool from Illinois farms this year and urges all growers to get in touch with their farm adviser to insure prompt, safe, and satisfactory shipment of their wool clip.

VOTE I. A. A. SHOW-WINDOW

An exhibit to portray the big reason for the existence of the Illinois Agricultural Association was authorized by the executive committee in its May meeting to be made and shown at the Aurora fair, the state picnic at Taylorville, the state fair and the Illinois Products Exposition.

COUNTIES CELEBRATE INDEPENDENCE DAY

A patriotic celebration of the Fourth of July, sponsored by county Farm Bureaus, will take place in at least five Illinois counties this year.

Commemorating the day when, 150 years ago, farmers first answered to the call of "arms" at Concord Bridge and "fired the shot heard 'round the world," Wayne, Stark, Kankakee, Lee and Mercer Farm Bureaus have decided to hold their annual picnic on the traditional Fourth. This is in line with the suggestion of the American Farm Bureau Federation, Chicago, to have county Farm Bureaus throughout the United States choose July 4, 1925 for their hey-day.

May Shut Down New T. B. Testing for Lack Of Appropriations

Illinois' army of veterinarians is ridding cattle herds of T. B. faster than ever.

April was a record month for T. B. testing. Due largely to the agitation leading to the passage by the House of the Tice bill to re-codify existing laws governing the eradication of bovine tuberculosis from Illinois herds, no less that 98,521 head of cattle were tested for T. B. during April, according to the Illinois Agricultural Association.

Shipped 4,800 Reactors

Never before have so many cattle been tested in Illinois in a single month, states the I. A. A. dairy marketing department. Of this number, 4,800 reactors were detected and slaughtered. "The veterinarians have been notified by Dr. J. J. Lintner, federal veterinarian in charge of the work," states the I. A. A., "not to take on any new testing and to limit their efforts only to retesting cases. The reason for this is that present funds are insufficient to carry on the work in accordance to the increasing demand on the part of herd owners to have their cattle tested.

"The past biennium provided for only $1,000,000, and April of this year alone took $200,000 of this fund," continues the I. A. A. Dr. Lintner also states that it may be necessary to shut down the entire T. B. testing work until the end of the fiscal year, July 1, 1925.

Need $5,000,000 Bad

The Barr bill, now before the Senate, provides for an appropriation of $3,000,000 to carry on the testing operations during the next biennium. Those closely in touch with the work believe that no less than $3,000,000 should be appropriated to stamp the cattle pest out of Illinois herds. If the present rate of testing continues, it will take close to $5,000,000 to provide sufficient funds to carry on the work another two years.

WHEAT POOL CHANCES LOOM ALONG WABASH

(Continued from page 1)

be authorized to take such action to assist wheat growers in that section to organize for marketing their crop as in their judgment the situation justifies."

The University of Illinois is co-operating with the I. A. A. in a survey of the soft winter wheat area. Meetings are scheduled at Mt. Carmel (Wabash) May 21 and at Robinson (Crawford) May 22. At these conferences the advisability and the form of a soft wheat marketing project will be discussed. Notices of these meetings were sent to Edgar, Clark, Crawford, Lawrence, Edwards, White, Wabash and Gallatin County Farm Bureaus.

Boys' and girls' clubwork in Coles county has reached 125 members in enrollment. Forty boys are in corn clubwork.

I.A.C.A. HOLDS SERIES OF CONFERENCES FOR FARMERS' ELEVATORS

Farmers' Auditing Body Announces Plans to Talk Over Common Problems

Farmers' elevator problems will be in the limelight when representatives of a number of elevators gather in district conference soon.

Geo. R. Wicker

Geo. R. Wicker, general manager of the Illinois Agricultural Co-operatives Association and co-operative accounting director of the Illinois Agricultural Association, announces that the Illinois Agricultural Co-operatives Association is arranging a district conference with the farmers' elevators in Iroquois and Ford and adjoining counties to be held at Watseka or some other central point in Iroquois county on May 27. Managers and officers of farmer's elevator companies make up the committee on arrangements.

At this conference subjects of common interest with reference to management problems will be presented and discussed. The I. A. C. A. has compiled tables of comparative data which will form another topic for the conference. The conference is not confined to organizations which are members of the co-operative auditing body. The invitation has been made open to all farmer's elevators desiring to be represented.

On May 28th a similar conference will be held by the officers and managers of the live stock shipping associations in the same territory. Subjects to be discussed will include particularly the accounting system recently formulated by the Illinois Agricultural Co-operatives Association.

These are the first of a series of conferences which it is proposed to hold in the state during the year wherever sufficient interest is indicated to warrant the time and expense involved, according to Mr. Wicker.

162

Membership in the I. A. C. A. now numbers 162 farmers co-ops. The last three to join are the Piatt County Farm Bureau, the Ransom Farmers, Elevator, LaSalle county, and the Pearl City Farmers' Grain and Coal Company, Stephenson county.

Mr. Wicker has been asked to give two or three lectures at the Grain Marketing Short Course to be held at the Iowa State College at Ames, Iowa, May 25th to June 5th inclusive.

The tentative program for the course includes instruction on the elevator business, finances merchandising practice, markets, management, co-operation, and accounting. Mr. Wicker has been asked to speak on the subject of—"The Federal Revenue Act as it Relates to Farmers' Elevators" and "Accounting for Farmers' Elevators."

BALL SEASON OPENS

Strike one!

The baseball season is on. Farm Bureau teams are practicing. Officers and directors of farm bureau baseball teams in district No. 4 composed of Peoria, Tazewell, and Woodford counties have drawn up the following schedule:

May 21, Peoria vs. Tazewell at Peoria. May 23, Tazewell vs. Woodford at Eureka. May 30, Peoria vs. Woodford at Peoria. June 6, Peoria vs. Tazewell at Pekin. June 13, Tazewell vs. Woodford at Washington. June 20, Peoria vs. Woodford at Eureka.

Other schedules line up as follows:

June 4, Stark vs. Marshall-Putnam, June 11, Marshall-Putnam vs. LaSalle. June 18, Stark vs. Marshall-Putnam. June 25, LaSalle vs. Marshall-Putnam.

Marion County Farm Bureau has declared a campaign war against corn root rot. Each co-operator has had 200 ears of culled corn tested by the farm bureau. On each 48 demonstration farms there will be an average of 10 acres of disease-free seed corn and one acre of infected seed. Records of yields will be accurately secured by weighing. In addition, seed corn selection meetings will be held on each of these farms early next fall, when corn from desirable stalks will be selected.

Have you seen this illustration before? The I. A. A. office is furnishing quantities of this cut to farm advisers for use in the newspapers in their counties. Watch for news concerning your county and state farm organization under this head.

MISS MARY G. BURWASH, LIBRARIAN,
COLLEGE OF AGRICULTURE,
UNIVERSITY OF ILLINOIS,
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—June 6, 1925 | No. 11

TAZEWELL BUREAU MAKES SUCCESS OF CAR INSURANCE PLAN

Farmers' Automobile Ins. Assn. Now Has 1,075 Cars Under Its Wing; Spreading Rapidly

If you were to take a bird's eye view of a map of Illinois—a map about as large as the side of a fair-sized barn—and if every county Farm Bureau had pinned a placard to its county telling its services to farm bureau members, you would see a great variety of activities ranging all the way from the distribution of patent sealers for home canning to poisoning ground hogs.

Joseph Morris, President

Somewhere between these two possible extremes lies that realm of service where farm bureau members' automobiles are insured against those unpleasant dictates of fate from which most automobile drivers seek protection.

This kind of service has developed and is developing further in Tazewell county, where in April of 1921 the Farm Bureau saw the possibilities of saving money for members on their automobile insurance and straightway formed a farmers' company under the wing of the Farm Bureau.

Grew On Ration of Conservatism

It was named "The Farmers' Automobile Insurance Association." From a modest start it has grown upon a ration well mixed with conservatism until now it has approximately 1,075 cars insured in Tazewell county and has expanded across the county borders, with the consent of their neighbor Farm Bureaus, to the extent of about 200 cars in Mason county and 50 in Woodford. Stark County Farm Bureau is taking up this insurance for its members, which means further extension for the Tazewell county organization.

One fundamental requirement is that no car or truck shall be insured in the company unless its owner is a member of the Farm Bureau.

When the company started, the farm adviser at that time became the attorney-in-fact of the company, which was incorporated as a reciprocal company upon an interinsurance basis which is similar to that of mutual companies. The first board of directors and the men responsible for establishing the company are as follows: R. B. Orndorff (then farm bureau president), Ralph Boyle, J. L. Schwartzentraub, W. F. Donley, Wm. Freitag, John Betzelberger and Geo. B. Muller. Under the guidance of these men the attorney-in-fact company was set up strictly as a service to farm bureau members. Now that the company is over four years old, it is of interest to those who are keen on knowing something about the various kinds of service possible to be rendered by a farmers' organization to farmer-members, to survey briefly the status of the insurance company at the present date.

Membership Steadily Growing

If you talk to Joseph Morris, the present president of the Tazewell County Farm Bureau and by virtue of that office also president of the insurance association, he can tell you what the people in his county and in the territory acquainted with this phase of the farm bureau's category of services, actually think of the farm bureau's automobile insurance proposition.

What they think of it is reflected, as President Morris sees it, in the steady and constant growth in membership. Also the insurance feature

(Continued on page 4, col. 3.)

"SAM" THOMPSON AND "BILL" JARDINE

PRESIDENT THOMPSON was interested in the "crinkyness" of the weather when Secretary Jardine visited the I. A. A. office last week and while posing for the photographer told the Secretary of the heavy damage of the recent frost in Illinois. "Our Sam" is particularly interested in the region around Quincy, his home, where frost made it necessary for him to hurry home from legislative work at Springfield to help his sons replant corn. He is shown pointing out the frost areas.

"The department of agriculture has charge of the weather forecasts," the Secretary said, "but do you know, even the government can't control it!"

Farmers' Elevator Books Compared by I. A. C. A.; Find Common Trend in All

That comparisons of books of farmers' elevators and other co-operatives may prove a fruitful source of information to guide the financial course of new co-operative organizations, is the opinion of Geo. R. Wicker, I.A.C.A. manager and I. A. A. co-operative accounting director.

The I.A.C.A. has just completed a tabulation of the financial condition and operation of 31 farmers' elevators. Among the significant facts revealed by the comparison, states Mr. Wicker, were figures to show that the cost of goods sold, including grain and merchandise, represents $95.29 for each $100 of sales. The average operating profits are indicated at $3.25 on each $100 of sales. Interest and other incidental expense show an average of 68 cents for each $100, while the average net profit is 78 cents on each $100 of sales.

Data Reveal Much

"Analysis," says the I. A. C. A. head, "shows accounts receivable to be $31.21 on each $100 net worth. For the 31 elevator co-ops studied, 87.12 per cent of the sales are grain sales while 12.88 per cent represents the merchandise sales. The average gross margin of profit in the grain-trading operations was shown to be 3.51 per cent of sales, while merchandise trading showed an average gross margin of 12.76 per cent of merchandise sales.

"This is the first analysis of its kind made by the I. A. C. A.," states Mr. Wicker. "It is hoped that similar compilations will be prepared after the close of June 30 and December 31 of each year, covering a large number of elevators. We hope, too, that eventually percentages will be established which may be accepted as standard for the purpose of comparison."

Another Non-Member Joins Farm Bureau On Claim Settlement

What to do when confronted with overcharges on railroad shipments?

Tell it to the I. A. A. transportation department!

The I. A. A. has just won another loyal member to its force of "63,000 *thinking* Farmers." This time it is Walter Follett, of Tonica, LaSalle county.

Walt wasn't a farm bureau member but had two grievances against as many railroads. Some thoughtful farm bureau neighbor, or maybe it was the I. A. A. RECORD that fell into his hands—gave him the urge. He had suffered an overcharge of $27.60 on a shipment of stock cattle from South Dakota, and another overcharge of $5.10 on a shipment of the hogs from the same state.

He took it up with the LaSalle County Farm Bureau and W. W. McLaughlin, the farm adviser, promptly referred him to the I. A. A. transportation department. The claims were filed with the proper railroads and successfully negotiated in both cases. The 25 per cent commission due the I. A. A. would have amounted to $8.17, but Walt thought twice, joined the Farm Bureau, and was saved paying the commission.

Walt now wears a big grin, thanks to I. A. A. efforts. "I'm for the Farm Bureau," is his song.

One hundred Pike county farmers have signed with the Pike County Farm Bureau to improve the seed corn of the county by the prevention of stalk, root and ear rot. It is expected that 150,000 ears of seed corn will be tested in the Farm Bureau office before planting time.

Corn demonstrations will be featured by Iroquois County Farm Bureau this season.

Stipulation Before I.C.C. Stops Merger's Stock Sale In Illinois 'Till July 28

No stock of the $26,000,000 grain merger, the Grain Marketing Company, can be sold nor offered for sale in Illinois between now and July 28, in accordance with a stipulation entered into in proceedings before the Illinois Commerce Commission and signed June 1 by Donald Kirkpatrick, I.A.A. legal counsel and Mayer, Meyer, Austrian and Platt, counsel for the Grain Marketing Company.

Donald Kirkpatrick

Hearings will begin after this date if the merger goes through, according to Mr. Kirkpatrick.

Chairman Frank L. Smith of the Illinois Commerce Commission suggested the stipulation after repeated continuances had been asked for by the Grain Marketing Company and some facts had been presented by the Illinois Agricultural Association. July 28 is the date when the property and leaseholds of the vendor companies brought into the merger are supposed to be turned over to the Grain Marketing Company in return for $4,000,000 of cash expected to have been derived from the sale of stock to farmers. Little stock has been sold in Illinois.

No Farmer Support

Prospects for completing the merger are considered negligible since the farmers of the country have not been induced to buy the stock as was anticipated by the promoters. Meetings have been held in Washington in an effort by Grain Marketing Company officials

(Continued on page 3, col. 3.)

JARDINE VISITS I. A. A. OFFICE AND LEAVES BOUQUETS WITH US

Secretary of Agriculture Says Conditions Have Improved Over Five Years Ago, But There Are Still Many Problems to Hurdle

America's foremost agricultural spokesman—Secretary of Agriculture, Wm. M. Jardine—was a visitor at the I. A. A. office last week when he stopped off at Chicago for two days as a part of his six-week's tour of the Middle West and West where, as he said, he is "touring his workshop."

After spending the better part of the forenoon at the I. A. A. office getting acquainted with President Thompson, Secretary Fox, Treasurer Cowles and directors of departments and inspecting the general office, he said to an Associate Press correspondent after leaving, that he was much impressed with the Illinois Agricultural Association and that "the personnel and facilities of the I. A. A. are of such a character to make its service of great value to the farmers of Illinois. I have never seen anything like it—anywhere."

In connection with his visit, the Secretary made the following statement for Illinois farm bureau members:

"For a number of years I have been following with a great deal of interest and approval the excellent contribution which county Farm Bureaus and the Illinois Agricultural Association have made to the welfare of farmers in this state. We look upon the agricultural situation today as improved over what it has been in the past five years. However, we must recognize that there are certain fundamental problems which must be solved before agriculture can be said to be on a satisfactory basis.

"The I. A. A. has an enviable record in the state and the nation and is materially assisting in the solution of these problems. It is my hope and my feeling that it will go on and on in the interests of Illinois farmers."

PROSPECTS BRIGHT FOR WHEAT POOL IN SOUTHERN ILLINOIS

Conferences at Mt. Carmel and Robinson Consider Advisability of Marketing Project

Prospects are bright for Illinois farmers who grow soft winter wheat in the counties adjacent to Indiana along the Wabash joining with their neighbor farmers of Indiana in marketing their wheat co-operatively through the pool of the Indiana Wheat Growers' Association, according to H. E. Goembel, chairman of the grain marketing committee of the Illinois Agricultural Association following a meeting at Robinson recently.

The meeting in Robinson was the second meeting called by the Illinois Agricultural Association for consideration of the possibilities of some kind of a grain marketing plan for this soft wheat area, the first having been at Mt. Carmel the previous day. Farm bureau representatives, many of them the largest soft wheat growers in this part of the state, attended the meetings, the following counties being represented: Crawford, Lawrence, Wabash, Edwards, White and Gallatin.

In both meetings, the decision was made at the close to further consider the advisability of joining the Indiana pool by each county Farm Bureau, several of them calling special board meetings since tf

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Secretary Jardine's Visit

THE friendly call of Secretary Jardine at the office of the Illinois Agricultural Association is significant.

Those who followed closely the strenuous fight to put over the McNary-Haugen bill in the campaign a year ago will remember that the present Secretary of Agriculture was very much against that particular move to lift agriculture to the economic level of our neighbor classes.

The I. A. A. was in the front line trenches trying to put the bill over, and "Bill" Jardine was there trying to keep it from going over.

There is no need of heckling and stewing over what has been done; it is the present and future that concerns us. Both Secretary Jardine and the men on his side of the fence and those on the side of the export corporation principle agree that there are certain fundamental principles which must be solved before agriculture can be said to be on a satisfactory basis.

How to get to that basis is the big problem. President Coolidge's Agricultural Conference said the big thing to do is to make the tariff apply to agriculture. Secretary Jardine was a member of the Conference and is understood to subscribe to that idea. As Secretary of Agriculture he has the opportunity of practicing what he preached. Making the tariff more effective will help some, but not enough.

In the meantime, he is on the way toward being the most popular member of the Cabinet. That is a good thing for agriculture. His personality is a winning one. He made many friends in Chicago, as he does every place he goes. He told President Thompson that he thinks Illinois farmers have a question mark after his name. Granted, but it will disappear with the right performance. Since both the Secretary and the I. A. A. agree on the basic premise that there is need of some fundamental patching to re-commission agriculture, there is nothing but good results to come from working together.

Work together, that's the team—we'll never get anywhere if we don't. It is better to be friends even though there may be some differences of opinion. As Ben Franklin said: "Tart words make no friends: a spoonful of honey will catch more flies than a gallon of vinegar."

Pass It, Senators!

PRACTICALLY all agricultural states in the Middle West and West have passed resolutions memorializing Congress to form an export corporation or do something along that line for agriculture.

We are happy to report that the Illinois legislators are also of that same mind. A resolution asking Congress to provide an export bounty on wheat, corn, hogs and cattle and their by-products "in order to bring these items of farmers' produce to a parity with the products of industrial enterprise" was adopted recently by the House. It was offered by Representative William Adcock of Galesburg, and was approved by the House Committee on Agriculture. Senate approval is necessary before the resolution becomes an official action of the General Assembly.

The farmers' fight to get equality is never out and never over even though the price index shows agricultural prices worth 90 to 91 per cent of the other fellow's. Such a big howl has been made over the farmers regaining prosperity during the jump from a 75 cent dollar to the present "90 center" that if farmers get back to normal we judge there'll be a prosperity yodel from the metropolitan press loud enough to attract Mars.

—o—

Pass the Revenue Amendment

IF the house passes the Lantz Joint Resolution No. 4, as the Senate did recently, and if the people of Illinois vote to accept this amendment to the revenue section of the constitution, then Illinois will have a new and up-to-date means of taxation.

It will take a tremendous amount of work and support to get the necessary votes to put the amendment across with the people, for every voter who doesn't vote casts a negative vote, and that's a tough proposition to overcome. That task lies ahead.

Anyway, the dope is that the Lantz resolution will pass the House, as it should, and then it will be up to good farm bureau members and others who see the light to get the votes to put it over.

The adoption of this amendment will give Illinois a system of taxation that will make it possible to relieve farm property of a portion of its unjust burden which it now bears. Real estate can not be classified, and that will meet with approval with farmers as it does with the I. A. A. Mineral lands and lands devoted to reforestation are, and rightly so, permitted to be taxed differently than other real estate. Farmers who own wooded land and which is bearing a tax equal to that imposed on good agricultural land, will appreciate this much classification.

—o—

A Victory Won, Though Defeated

BY the time this is read, the Cuthbertson gas tax bill will have been defeated or at least shelved. That is the dope.

According to the legislative committee, which is, of course, very close to the situation at Springfield, there is but a bare possibility of the bill being passed at this time. Too many senators were pledged when elected to oppose any gas tax, no matter what its purpose. Chicago opposition, based on prejudice and not merit, is largely responsible. At this writing, about 20 votes are counted as favorable to it and the number needed is 26.

Even though the gas tax is defeated, there is a great deal of recompense in the advance made in the principle advocated by the I. A. A. The idea is pretty thoroughly sold that whenever there is a gas tax, it shall take some of the burden off of property. Illinois farmers will eventually benefit from this principle. If there had not been so many gas tax bills of little value introduced in the legislature at the beginning of the session, there would not have been so many hurdles of unpopularity to overcome. If the I. A. A. had been given a start with no handicap, quite likely the result would have been different.

No apologies are needed for the gas tax showing in this session of the legislature. In the next session, the I. A. A. position is likely to be defensive rather than offensive for there will be a decided move to get the gas tax funds applied to hard roads—and with no reduction of property taxes.

A Little History.

ACTIONS speak louder than words, especially when words are carefully uttered.

In the case of the Grain Marketing Company, the $26,000,000 grain merger, the actions speak plainly to those who have followed the unfolding of the gigantic plan to unload millions of dollars worth of partially obsolete property upon farmers under the guise and label of co-operative marketing.

Follow the action: When Sam H. Thompson, our president, was a member of the specially created grain committee of the American Farm Bureau Federation, a part of the information available on the then proposed consolidation was withheld from him. Being a banker, and also a farmer of good judgment, he knew that such a business deal should not be consummated unless all the facts on the amount and kind of business done by the merging companies could be obtained. He stood pat on this point and all the I. A. A. has backed him up.

When the I. A. A. took its position of making an impartial investigation before saying yes or no on the deal, the Grain Marketing Company was asked to furnish independent auditor's reports on each of the merging companies for each of the past five years. This information was promised by the **buying** side of the Grain Marketing Company. If it had been forthcoming, the I.A.A. would have been able to determine the amount and kind of business engaged in by each of the companies while they were individual operators. This would have shown whether profits came from speculation or from the merchandising of actual grain. Such information would be vital to the success of any co-operative. These facts were not forthcoming.

Follow the next step: When the I. A. A. asked the Illinois Commerce Commission to conduct a public inquiry into the merger, the dates for the hearings were continually postponed upon request of counsel of the Grain Marketing Company. It should be made plain here, too, that it was very evident that the counsel represented the selling interest and not the buying interest. After several postponements, Chairman Frank L. Smith requested that a stipulation be entered into by the Grain Marketing Company and the Illinois Agricultural Association that no stock be sold in Illinois pending the successful or unsuccessful closing of the deal July 28. Chairman Smith had said that either a stipulation should be agreed upon or the hearing would go forward. A hearing would have brought out some interesting facts regarding actual values of the merged facilities.

All the way through the selling side of the Grain Marketing Company has refused to come out in the open with the facts. And at the same time they say they have nothing to conceal. Thus actions speak louder than words.

This history illustrates in a negative way the necessity for absolute frankness in forming a co-operative association. All the members should know what is going on and why.

—o—

The Drama Goes On

SECRETARY JARDINE is going after the Board of Trade trying to get it to control its wide and rapid price fluctuations. He told the directors of the board while he was in Chicago that it is up to them to remedy their own disease.

He called fluctuations of 15 cents in one day entirely unreasonable. Farmers everywhere can be heard saying "Amen" to this.

"It is such evidences of gambling that makes the public think the Board of Trade is a damn nuisance," he is quoted as saying. Amen again.

The next act of this drama will likely be accompanied with a general shifting of the scenery as a move to comply with the Secretary's suggestions. If it is nothing more than a gesture, it is to be hoped that the Secretary will take proper steps within his province to segregate and put the brakes on actual speculation. Here is a place where agriculture can be served to great advantage for every rapid change in price catches some farmer or group of farmers.

SENATE PASSES BILL APPROPRIATING $3,000,000 FOR T. B. WORK

HEALTH OF MOVEMENT SEEN IN CONFERENCES OF FARMERS' CO-OPS

First Meeting of Elevators and Live Stock Co-ops in Watseka by I. A. C. A. Organization

The first of a series of conferences of farmers' elevators and live stock shipping associations in Illinois is over.

Through the efforts of the Iroquois and Ford County Farm Bureaus, co-operating with the farmers' elevators and live stock co-operators in those and adjoining counties, two conferences were held at Watseka, May 27 and May 28.

The meetings were sponsored by the Illinois Agricultural Co-operatives Association, states Geo. R. Wicker, general manager and I. A. A. accounting director. Eighty-three representatives of 23 farmers' elevators met on the first day, and the second conference was attended by 63 representatives of 18 shipping associations.

Talk Financial Problems

Speakers on the program of the elevators conference included Mr. Wicker, who spoke on "Financial Problems of Farmers' Elevators;" and Vernon Vaniman, I. A. C. A. fieldman, on "Selling Co-operation to Co-operatives." A discussion of comparative data as recently prepared by the I. A. C. A. on the financial condition and operations of 31 farmers' elevators was presented by F. E. Ringham, assistant manager of the I. A. C. A. Comparison was on the basis of audit reports for 1924. According to Mr. Wicker, this feature aroused particular interest among all present at the conference, and for the first time presented a means of making comparisons of financial conditions and operations of a considerable number of similar enterprises.

Watseka Has First Conference

This is the first conference of its kind to be held by the I. A. C. A. Similar conferences are contemplated in other parts of the state, according to the interest indicated by farmers' elevators and county Farm Bureaus.

The conference of live stock shipping associations on May 28, according to Mr. Wicker, covered uniform accounting systems, group organization for auditing purposes, and other common problems. Mr. Wicker explained the Federal Revenue Act and its application to co-ops generally, but more particularly to the requirements for exemption of live stock co-ops.

The most interesting development of this meeting, states the I.A.C.A. head, was a voluntary action by those present to endorse the uniform accounting system recently prepared jointly by the I. A. C. A. and the University of Illinois. The plan of group auditing of association records was also endorsed, whereby examinations can be made at a minimum of time and expense.

Vote Conference a Success

"Officers and managers of the organizations represented at these two conferences," declares Mr. Wicker, "also farm advisers and other representatives of farmers in Iroquois, Ford, and nearby counties, are enthusiastic over the results of the conferences. A close co-operation of the Farm Bureaus and the co-operative associations points to the better relationship which is being established by bringing together representatives of the various organizations to discuss their common problems."

I.A.A. MEN JOIN U. OF I. FACULTY FOR ONE DAY

The College of Agriculture at the University of Illinois has enlisted the services of two I. A. A. men.

Both Geo. R. Wicker, general manager of the Illinois Agricultural Co-operatives Association, and Vernon Vaniman, I. A. C. A. field organizer, have accepted an invitation from the Illinois College of Agriculture to participate as instructors in the short course for farmers' elevator managers to be held at Urbana, June 16 to 20.

Mr. Wicker will meet with elevator managers present on June 19 and will discourse on the subject, "Financial Problems of Grain Elevators." On June 16, Mr. Vaniman will choose for his subject, "Leading Problems of Farmers' Elevators."

WHEAT POOL CHANCES LOOM ALONG WABASH

(Continued from page 1.)

organization work is started this year, it must begin within two or three weeks, the harvesting being expected in four or five weeks.

Only Modest Membership Wanted

Only a modest membership is expected or even wanted this year, according to the Illinois Agricultural Association, which made its position on the pooling system of marketing clear in stating that it is a service organization ready to serve its members upon request from them.

According to H. E. Goembel, spokesman for the I.A.A., the pooling system is deemed the best for the conditions which exist in these counties because there are very few farmers' elevators. Any marketing plan must be, therefore, based upon individual producers in this area, but in northern Illinois, where there are about 600 farmers' elevators, the I. A. A. favors working with the farmers' Grain Dealers' Association of Illinois to build a terminal marketing agency based upon the farmers' elevators.

Since the Indiana Wheat pool has had one year's experience, the I. A. A. favors going along with it, especially since the unorganized soft wheat of Illinois competed last year with the pool and the quality of wheat is practically the same. If a modest venture this year proves successful, which is expected, the Indiana pool plans to change its name and organization to include Illinois, with the membership in Illinois being increased to cover all of southern Illinois.

Got $1.25 and More to Come

Representatives of the Indiana Wheat Growers' Association said that they expect to handle 50 per cent of the soft wheat grown in Indiana this year. Reports on the pool's operation were everything that could be expected following the first year of operation, Mr. Goembel stated. Approximately 7,000 Indianans joined the pool last year and this number has increased to around 16,000 at the present time. Members of the pool have already received $1.25 per bushel as partial payment for their wheat, and a substantial sum remains yet to be distributed according to James H. Gwaltney of Poseyville, Indiana, president of the pool. Non-members in Indiana received an average of $1.14 to $1.16 per bushel at the same time, he said.

Since the meetings, resolutions have been passed in White, Wabash and Gallatin counties asking that the I. A. A. give service in organizing this territory with the Indiana Wheat Growers' Association. Organization work is expected to go forward very soon.

Frost Which Covered Middle West on May 24 Nipped Illinois Fruit

There won't be so many folks this year appeasing their appetites with juicy Illinois fruits and vegetables.

Severe damage to the fruit and vegetable crop of Illinois is reported by the Illinois Fruit Growers' Exchange, as a result of the recent killing frost following the excessive heat which stifled the Middle West recently.

According to J. O. Lawrence, sales manager of the exchange, which functions as a department of the Illinois Agricultural Association, the crop of strawberries is practically ruined. In Quincy territory strawberries are completely nipped, Mr. Lawrence states.

"The full extent of damage done by the freeze is not yet known," he declares. Raspberries, potatoes, tomatoes, and cabbage are badly injured in the Quincy district.

Apples More Promising

The outlook for apples is more promising, according to the exchange. "Indications are that the apple crop in the Quincy section was only slightly injured," states Mr. Lawrence.

The Illinois Fruit Growers' Exchange, with headquarters in Centralia, is continuing its survey throughout Egypt to determine the extent of damage done to the entire fruit and vegetable crop.

Farm accounts; hog sanitation; pig clubs; limestone, legumes, and phosphate; seed corn improvement; and community meetings make up the Ford County Farm Bureau program for 1925.

Live Stock Producers Given Suggestions on Marketing Their Stock

Watch your shipping facilities when the hot weather comes!

This is the call going out to Illinois live stock producers from the Illinois Agricultural Association.

The Chicago Producers' Commission Association and the I. A. A. transportation department are urging that the following shipping rules be observed:

First—See that the hogs are brought in ample time to cool before loading.

Second—See that the car is bedded with clean sand, which is moistened.

Third—Give only a light grain feeding before loading.

Fourth—Load not more than an hour before train time.

Fifth—Use ice bags suspended from the car roof, whenever possible, six bags to the car and drench the car at every possible point.

Sixth—Do not load more than 17,000 lbs. in a standard 36 ft. car. Compliance with these rules will mean lighter shrinks and losses.

I. C. C. STIPULATION STOPS MERGER SALES

(Continued from page 1.)

to get Secretaries Jardine and Hoover to appoint a national advisory committee for the merger. Failing in this, an attempt to form a committee to resurrect the merger and get the confidence of the farmers has been attempted by officials of the company, but co-operative leaders have generally declined to serve.

The stipulation filed with the Illinois Commerce Commission in which it is agreed that no stock shall be sold in Illinois is considered an indicator of what will be done by other states which are now considering the company's stock. In some states, notably Indiana, judgment has been withheld on the stock pending the outcome in Illinois. This decision is considered the death knell to virtually all stock selling operations of the grain merger.

It is generally understood that the vendor companies did not wish to come into a public hearing since facts in possession of the Grain Marketing Company which have not been obtainable heretofore could be pried loose in such a hearing.

GENERAL ASSEMBLY LISTENS TO FARMERS' CLAIMS AS I. A. A. LAW PLATFORM COMES INTO THE FOREGROUND IN LEGISLATIVE MILL

Resolution on Revenue Amendment Passes Senate, as Does Barr Bill Appropriating $3,000,000 for T. B. Clean-up in Next Two Years. House Passes Bill Asking Federal Export Bounties on Farm Products. Gas Tax Bill Temporarily Quiescent

WILL ILLINOIS join other states in the forward march toward gasoline tax enactment? Will the state constitution be amended to allow for revision of the revenue section? Will our T. B. laws be recodified? Will enough funds be appropriated to carry on the T. B. eradication work throughout the state? Will the General Assembly carry the sentiment of Illinois grain growers to the nation's lawmakers as to tariffs on staple farm products?

These were the questions uppermost in the minds of I. A. A. officials and others representing farm bureau members, "63,000 *thinking* Farmers," throughout the state at Springfield the past two weeks.

See Relief on Property

Prospects for relief from the present excessive tax on property are looming larger on the horizon of state legislation. On May 27, the Senate passed the Lantz resolution for submitting to the voters of the state, a revision of the revenue section of the state constitution.

The original resolution, as introduced by Senator Simon J. Lantz, of Congerville, was first amended to require a two-thirds vote in both houses of the assembly for the passage of taxation measures, according to F. D. Barton, chairman of the I. A. A. legislative committee.

Rock Island County May Have Federation Of Live Stock Locals

Rock Island may be the next Illinois county to form a county-wide live stock shipping federation, according to Wm. E. Hedgcock, I. A. A. director of live stock marketing, who attended a meeting of representatives of the six loyal shipping associations in that county recently.

A meeting was also held in Drury township during which the need of assisting individual associations was discussed with 225 farmers present. One of the best means of strengthening locals is by federating them into a county unit, Mr. Hedgcock said.

County federations of local shipping associations have been formed this spring, or are considering forming, in the following counties: Ford, Ogle, DeWitt, McDonough and Rock Island.

"A county federation is the means of bringing officers of locals together for discussion of mutual problems," Mr. Hedgcock states, "and helps in establishing a uniform accounting and auditing system. It also brings the shipping associations and the Farm Bureau closer together, which is mutually beneficial."

Can't Classify Real Estate

In addition, the resolution was further amended to the effect that all real estate shall be in one class except that mineral land and lands devoted to reforestation may be in different classes. "This means," says J. C. Watson, I. A. A. director of taxation and statistics, "that urban and rural property shall both be in the same class for purposes of taxation."

The purpose of the proposed amendment, according to Mr. Watson, is to grant the Legislature a general power with respect to revenue, and to permit the employment by the general assembly of various methods of taxation, or combinations of tax methods. "This broad power may be subject to abuse," he says, "but broad powers are necessary if tax conditions are to be improved."

It is believed in I. A. A. circles that the Lantz resolution will pass the House with little trouble. It will then come up for popular vote for adoption or rejection on a referendum in the next election of members of the General Assembly. Farmers will then have the chance to voice their approval to a change in the constitution whereby laws can be passed to relieve property generally of its excessive burden of taxation.

Senate Passes Barr Bill

The outlook for an eventual statewide clean-up of T. B. in Illinois' cattle industry was given an encouraging forward push when the Senate, by a vote of 38 yeas, on May 21 passed the Barr bill, providing for an appropriation of $3,000,000 to indemnify cattle owners sustaining losses in tuberculosis eradication from their herds.

According to Mr. Everingham, an amendment to the Barr bill by its author, to cut the appropriations by $1,000,000, was defeated by the Senate the day previous to the passage of the Barr bill, by a vote of 28 to 17. The Barr bill now provides for $3,000,000 for the next biennium to pay farmers for losses sustained in tuberculosis eradication. The Illinois Agricultural Association strongly advocated the $3,000,000 appropriation.

Tice Bill Prospects Good

Mr. Everingham states that prospects also look bright for early passage of the Tice bill which provides for a general recodification of Illinois' T. B. regulations. The Tice bill has already been passed by the House, and the Barr bill now awaits the approval of the House for final passage.

At the present the only fly in the I. A. A.'s legislative ointment seems to be the Senate's temporary inactivity as to the gasoline tax bill. The measure is booked for final consideration during this week when the Record goes to press and at the time of writing this, I. A. A. stalwarts are not in a position to know which way the legislative wind is blowing.

House Asks Export Bounties

MARCH TORNADO WORST IN HISTORY, WEATHER MEN STATE

Illinois Farm Relief Fund Has Grown Until It Now Reaches $177,263.40.

"Contributions are still coming into the Illinois Farm Relief Fund," says R. A. Cowles, chairman of the Illinois Farm Relief Committee and I. A. A. treasurer. "Since the May 23rd issue of the RECORD, $4,-252.90 has been received, bringing the total now in the fund to $177,-263.40."

According to Clarence J. Roof and William E. Barron, weather bureau meteorologists, the tornado which swept Missouri, Illinois and Indiana last March, killed 742 persons, injured 2,756 and caused a total property damage of $16,500,-000. This includes net farm property loss to Illinois farmer alone of $1,338,698 according to the survey made by the I. A. A. This is the worst tornado history has ever recorded, the meteorologists stated in an exhaustive report filed at Washington, D. C., recently.

The St. Louis tornado of May, 1896, which caused a property damage of $13,000,000, was the worst previous tornado.

Describe Peculiarities

In several particulars, the meteorologists say, the tornado of last March was peculiar. One remarkable feature was that its path extended for 219 miles across three states. The great area covered by the storm gave rise to many theories that more than one tornado passed across Illinois, but the report dispelled this idea, although testimony obtained by the two investigators from persons in the storm area was practically unanimous in stating that two "clouds" hurtled out of the west together, one smiting the left and the other the right side of the storm zone.

As a rule, a tornado may be described as "lifting" and "skipping," but this storm struck the earth with undiminished intensity along its path. Its velocity was estimated at 57 miles an hour across Missouri, 59 in Illinois and 68 in Indiana.

"The fortitude of the people in the stricken area was wonderful," the report said. "From those who had lost their homes, property and even members of their family not one word of complaint was heard."

Among the "freaks" of the tornado was a rural school carried away in which the seats remained fastened to the floor. The pupils clung to the seats, and none were seriously hurt.

Following is a detailed list of contributions to the Illinois Farm Relief Fund, as of June 1, 1925:

Adams	$ 2,859.98

Ford County Co-ops "Whoop 'Er Up" for Piper City Picnic

The conference of farmers' elevators in Iroquois, Ford, and adjoining counties, held at Watseka on May 27, had a very "happy ending" when just before a motion was made to adjourn, J. B. Blissard, manager of the Farmers' Grain Company of Gibson City, Ford county, made the announcement that all the farmers' co-operative associations of Ford county and the Ford County Farm Bureau were making plans for a big "co-operative" picnic to be held at Piper City on June 24. In behalf of these associations Mr. Blissard extended an invitation to all present.

ASSEMBLY LISTENS TO FARMER CLAIMS

(Continued from page 3.)

secure federal legislation for agriculture in the last session of Congress, were revived when, on May 20, the Illinois House passed the House joint resolution No. 37, memorializing Congress to consider export bounties on wheat, corn, cattle, and their by-products.

TAZEWELL BUREAU PLAN INSURES CARS

(Continued from page 1.)

has brought farmers into the farm bureau and has been found to act as glue in helping make members stick. Eighty-five per cent of the members in Tazewell county insure their cars this way.

The reason why so many are in it, according to Ralph E. Arnett, the present farm adviser, is because it is much cheaper than regular old line insurance. Besides it is farm bureau-owned and controlled. It is the only automobile insurance, they say, that is confined solely to farm bureau members. Another selling point is that it is run on an actual cost basis.

Cheaper Than Old-Line

Comparison of insurance premiums paid on old-line policies and the Farmers' Automobile Insurance Association, as made by the Tazewell County Farm Bureau, states that when a $1,500 full coverage policy, which includes insurance for possible loss by fire, theft, personal liability, property damage and collision, is taken out in an old line company, the average cost is about $140 a year. The farm bureau insurance is less than $20 a year, including assessments of $5 every six months, or $10 for the year, which go to build up a reserve.

Furthermore, it is declared that the farm bureau policy is much more liberal in its collision features than are those of most old line companies, while some reciprocal mutual companies, which are in reality private enterprises, sell insurance somewhat cheaper than the old line companies. One does not need to be a shark at arithmetic to figure the dollars saved the farm bureau members from this project.

In explaining the mechanical details of handling the business, Mr. Arnett, who served as attorney-in-fact for 2½ years and until this spring when an assistant had to be secured to relieve him of the load, points out that at the end of each six-month period, which terminate April 1 and October 1, each member holding a policy is assessed for actual losses and expenses incurred in paying the losses. The $5 charge which is made each six months for the purpose of building up a reserve continued for six-month periods, or three years on each car.

Costs Itemized

Books are kept carefully to show where the money comes from and how it is spent and from which particular phases come the heaviest losses. The six-month period ending April 1, 1925, showed the following division of assessments per member: Fire, none; theft, 58 cents; collision, $2.12; personal liability, 11 cents; property damage, 24 cents; expense, $2.66, which totals $5.71. The average of all assessments since the first one which was dated October 1, 1921, is: fire, 12 cents; theft, 57 cents; collision, $1.64; personal liability, 43 cents; property damage, 11 cents; expenses, $1.28; which totals $4.15. To this of course is added the $5 charge for reserve fund, making an average six-month assessment of $9.15 as against approximately $70 in an old line company.

The need for the reserve fund outside of the needs of a reserve fund for any sound business is because of a state law requiring that insurance companies must have on deposit a sum five times that of their greatest single liability. The greatest single liability of this farmers' association is $5,000. Consequently the reserve necessary was $25,000. When first organized, the Tazewell county folks did not know of this state requirement and were perplexed on first thought as to how to raise it. It did not bother them long, however, for the Farm Bureau itself loaned $5,000, and the trustees borrowed $10,000 on personal notes, and advance premiums provided the rest.

The unique point of this company is that a man has to be a member of the Farm Bureau in order to get insurance on his car or truck, members of his immediate family living at home also being eligible.

$10 Permanent Membership Fee

A fee of $10 is required on each car upon taking out insurance. This is a permanent membership fee and is good as long as assessments are paid. Some owners have three and four cars insured.

The present trustees are Joseph Morris, president, Wm. Freitag, E. L. Robinson, W. F. Donley, Ralph Boyle, J. H. Warner of Mason county, and Geo. B. Muller. These men, acting as a board of trustees, are elected at the annual meeting. They hold control over the attorney-in-fact, who is J. E. Harris, assistant farm adviser of the Tazewell County Farm Bureau.

Upon the basis of comparative insurance costs furnished the Tazewell County Farm Bureau, every time a member pays an assessment, a four-year membership in the Farm Bureau is saved. Of the 960 farm bureau members in Tazewell county, 85 per cent of them belong to the Farmers' Automobile Insurance Association. Each year, according to the figure, they save, in the aggregate, 6,528 annual $15 farm bureau membership fees. This saving is striking, and it is so largely because it is possible to figure it out in a tangible way with reasonable fairness. Many farm bureau accomplishments are as striking as this, but they are of such intangible nature that the direct value to members is difficult to figure.

MRS. WILLIAM WEBB DIES

The many friends of William Webb of Route 1, Joliet, were grieved to learn of the death of Mrs. Webb, Friday, May 29. Mr. Webb is a member of the I. A. A. executive committee for districts 10 and 11.

BULLETIN

Secretary Jardine will speak at the annual I.A.A. picnic to be held at Taylorville under auspices of the Christian County Farm Bureau, Thursday, August 27.

While the Secretary was visiting the I. A. A. office last week, he was invited to address farm bureau members at the picnic by President Thompson and President Grimes of the Christian County Farm Bureau.

He accepted on the spot. August 27 was found to be the earliest date he could speak, which was later found to conflict with the Sharpsburg and Edinburg Farmers' Chautauqua in Christian county, but fortunately this difficulty has been overcome as is indicated in the following telegram received Tuesday, June 2, from C. E. Hay, farm adviser:

"Advertise August 27 as picnic dates. Wire Jardine acceptance. Sharpsburg Edinburg Farmers' Chautauqua Going to boost. Boost them."

Put a big circle around the date August 27 on your calendar and come if you possibly can. Many other big picnic features are to be announced in the RECORD later.

SEES ILLINOIS AS SOURCE OF DAIRY STOCK IN FUTURE

Present Rate of T. B. Eradication Accounts For It, Declares Dairy Marketing Director

Will Illinois ever become a source of good dairy cattle?

That question is up to the farmers themselves, asserts the dairy marketing department of the Illinois Agricultural Association, A. D. Lynch, director.

"At present," says the I. A. A. director, "Illinois dairymen who wish to replace reactor cattle with clean, quality stock, must go to other states to replenish their herds. Yet the time may not be far off when farmers will come to our own state for good dairy stock.

"At the present rate of T. B. eradication work in Illinois, indications are that within the next five years, this state will be the cleanest among dairy states. This will mean that dairy cattle from Illinois counties will command a premium over cattle in other states. For this reason it is time for Illinois dairymen to begin to think of their herds as sources of stock in years to come."

During the last week in May, the I. A. A. director visited Clark, Marathon, and Wood counties in Wisconsin with a view toward finding reliable sources of good dairy cattle with which to stock Illinois herds. He consulted county agents and breed association secretaries, inquiring about sources of grade stock.

"The I. A. A. is not a buyer of dairy cattle," states Mr. Lynch, "but the association is willing to assist in locating dairy cows, T. B.-free and of good dairy strains, as we are in touch with sources in Indiana, Illinois, Wisconsin, and Minnesota."

LISTEN IN!!

Farm advisers' radio talks scheduled over WLS, Chicago, on the I. A. A. program are as follows:

Monday, June 8 at 12:30 (standard time)—C. E. Hay, Christian County Farm Bureau adviser, on "Saying It with Soys and Clover in Christian County." Tuesday, June 9 at 12:30 and 8:40—W. P. Miller, farm adviser of Brown County Farm Bureau, on "Agricultural Ills and Farm Bureau Treatment," and "Community Spirit Pays." Tuesday, June 23 at 8:40—H. C. Vial, DuPage County Farm Bureau president, on the accomplishments and services of DuPage County Farm Bureau. Friday, June 12, 8:40—J. H. Lloyd, farm adviser, Hancock County Farm Bureau, on achievements of that county's farm bureau supply company.

Monday, June 15, 12:30—G. E. Metzger and A. D. Lynch, of the I. A. A., in a dialogue on "John Smith Joins the Farm Bureau."

Thursday, June 11, over KYW, Chicago, at 7:30—B. H. Taylor, I. A. A. executive committeeman from 15th district, on "Brains Plus Brawn Equals Good Farming."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—June 20, 1925 | No. 12

U. OF I. AND U. S. D. A. START GRAIN SURVEY THRU FARM ELEVATORS

First Part To Be Finished This Season But Study Will Continue Over a Long Period

A study of grain marketing will be carried on this summer through the farmers' elevators of Illinois by the Illinois Experiment Station and the United States Department of Agriculture, it was announced following a meeting at the University of Illinois, June 12.

Dean H. W. Mumford

This meeting was called by the Illinois Agricultural Association, after preliminary conferences with representatives of the Illinois Experiment Station, U. S. Department of Agriculture, Farmers' Grain Dealers Association of Illinois, and other groups and institutions. Its purpose was to define the objectives and consider the methods of approach for a study of grain marketing in Illinois through the farmers' elevators.

Many Notables There

The meeting was attended by Chris L. Christensen of the Division of Agricultural Co-operation, Bureau of Agricultural Economics, Department of Agriculture, Washington, D. C.; Dean H. W. Mumford, Dr. Charles L. Stewart, Prof. L. J. Norton, Prof. John Pieper, and Prof. R. W. Stark, of the University of Illinois and Illinois Experiment Station; Lawrence Farlow of Bloomington, Ralph Allen and Homer Price of Delavan, representing the Farmers' Grain Dealers Association of Illinois; George R. Wicker and Chester C. Davis, representing the Illinois Agricultural Association; A. J. Suratt of Springfield, agricultural statistician; and Dr. Alva H. Benton of the North Dakota Agricultural College, who was invited to assist at the conference because of his experience in conducting similar studies in North Dakota.

Touches Every Farmers' Elevator

"A complete reconnaissance survey, covering every farmers' elevator in Illinois, will be made early this summer and probably finished this season by the Illinois Experiment Station with the co-operation of the U. S. Department of Agriculture," according to Chester C. Davis, I. A. A. grain marketing director.

"This is one of the two phases of the grain marketing study which is to be undertaken. It will assemble general information regarding the form and method of operation of the farmers' elevators of Illinois; the movement of grain to market from every locality in the state covering a period of years to bring out thorough understanding of the routes used in moving to point of final sale of grain from each county of the state; and such other information concerning the elevators as can be secured by the survey method.

"Co-operation of the Illinois Agricultural Co-operatives Association; the auditing department of the Farmers' Grain Dealers Association of Illinios; and that of the American Co-operative Publishing Company, will be secured in making this survey, as the questionnaire can be handled by the auditors working in connection with every auditing service. Personal calls on the remaining farmers' elevators will be made by representatives of the Illinois Experiment Station this summer to get the complete data."

NO THOUGHT FOR THE SHIP

Co-operative Marketing Invades Realm of Poultry And Eggs In Ford County

Plans are under way to enroll 1,000 farmers in Ford and adjoining counties in a new venture known as the Illinois Poultry Producers' Association, No. 1, to be incorporated under the co-operative marketing act of Illinois.

Ford county is the first county in the state to adopt the I. A. A. plan for marketing Illinois eggs, according to F. A. Gougler, I. A. A. poultry and egg marketing director. This is the beginning of a statewide plan whereby many counties can be federated into a central sales agency.

The contract calls for delivery of all poultry and eggs by the member to the association, exceptions being made for hatching eggs, breeding stock, and direct consumer sales. The association agrees to handle the produce, grade it, and pool by grades at a central grading and shipping plant to be established in Gibson City. The members further agree to a penalty of five cents per pound of poultry or 10 cents per dozen of eggs as liquidated damages for any breach of agreement.

INDIANA BARS SALE OF GRAIN MERGER STOCK

The Indiana Securities commission has denied the request of the Grain Marketing Corporation of Illinois for permission to sell $1,000,000 worth of stock at $25 a share in Indiana.

Financial affairs of the company were held, in an opinion by Frederick E. Schortemier, secretary of state, acting as administrator of the securities law, to be unsound. The decision was based on evidence submitted at a public hearing on the company's application before the commission several weeks ago.

The sale of stock was opposed by the Indiana Farm Bureau Federation.

PLAN THAT HAS BEEN WANTED 20 YEARS AND TALKED 10 NOW READY

Details of State-Wide Re-Insurance Company to Serve Farmers' Mutuals Completed

"This is something we have been talking about for 20 years," experienced farm mutual insurance men said when the I. A. A. offered to be of assistance to them in forming a state-wide body to help local companies handle their own affairs. A plan along the lines of the one now about to be projected by both the Illinois Association of Mutual Insurance Companies and the Illinois Agricultural Association has been discussed for 10 years in meetings of the mutual insurance companies' state association, insurance officials declare.

Vernon Vanlman

As a service organization, the I. A. A. accepts the invitation for service in this field, and consequently is embarking upon a project of special service to farmers which has never been touched.

Temporary Officers Selected

Temporary officers who will serve until the first annual meeting, are as follows: C. A. Asplund, Orion, Henry county, president (also president of the Illinois Association of Mutual Insurance Companies); Geo. A. Fox, Sycamore, DeKalb county, 1st vice-president (also I. A. A. secretary); E. J. Carmody, Towanda, McLean county, 2nd vice-president; Wm. B. McFarland, Hoopeston, Vermilion county, secretary; and R. A. Cowles, Bloomington, McLean county, (I. A. A. treasurer) treasurer. Geo. F. Tulloch, Rockford, Winnebago

(Continued on page 3, col. 4.)

ALMOST UNANIMOUS PASSAGE BY BOTH HOUSES OF LANTZ RESOLUTION PERMITTING AMENDMENT TO REVENUE SECTION OF STATE CONSTITUTION

House Makes Minor Change to Clarify Wording Which Must be Concurred in by Senate, Then, After Getting Governor's Signature, it Will be up for People's Vote at Next General Election; I. A. A. Backing it.

STANDING head and shoulders above all other legislation considered during the present session of the General Assembly is the proposed amendment to the revenue section of the state constitution, which passed the Senate 44-1 and the House 135-2, and as soon as a minor House amendment is approved by the Senate and the Governor's signature is affixed, it will be submitted to the people for their approval at the next general election.

It is vitally important to all people in Illinois, but especially so to the farmers because it permits the levying of taxes in accordance with present-day economics rather than upon the basis existing at the time the present revenue section was adopted, which was five years after the Civil War.

These are the thoughts of the legislative committee—Frank D. Barton (Livingston), H. E. Goembel (Henry), and A. C. Everingham (Crawford)—given in a report to the executive committee at its meeting of June 12.

Killed Narrow Tire Bill

At the May meeting of the executives, the legislative committee was instructed to oppose the bill then in the House, and which had passed the Senate, which would prohibit farmers from driving on the roads of the state with wagons having tires narrower than three inches.

"You gave us our instructions on that narrow tire bill last time," reported Chairman Barton, "and those instructions were printed in the RECORD. That ended it! The bill went no further."

The bill of Senator Dick requiring that poultry dealers keep a register of all purchases of poultry has been actively favored and, having passed the Senate, is awaiting its turn in the House, where it is feared the final jam may keep it from coming to vote.

Memorial to Congress

The Senate has passed Representative Adcock's resolution memorializing Congress to pass legislation embodying a scientific plan or program by which reasonable export bounties may be provided to be paid upon all exports of wheat, corn, hogs and cattle and their by-product. Although this is not specifically the export corporation idea it is along the same line and is considered as extremely valuable support for the equality for agriculture program of the I. A. A. The memorial now goes to Congress as a reflection of the thought of the Illinois General Assembly.

Coming to the Cuthbertson gas tax bill, Chairman Barton stated that the biggest handicap experienced by the committee was in legislators having promised previous to the opening of the session that they would not vote for a gasoline tax. While many senators felt friendly for the I. A. A. gas tax, which provided for replacement of the county highway tax, they could not break their promises.

"The gas tax is in a strong place," said Mr. Barton. "We have not lost ground in our decision to abandon the bill for this session. The Illinois Agricultural Association campaign has gone a long way toward establishing the 'gas-tax-as-a-lieu-tax' idea. A great deal of educational work has been done, but we have much more to do. We must not let down.

We've Just Begun to Fight!

"Two big points have been made in this gas tax fight," he said. "One is that the gas tax funds, at least the major portion of the funds, shall be used on secondary roads. The second is that whenever we have a gas tax, and I believe it inevitable as do many of the legislators, the tax shall replace some present tax."

"It is freely predicted that the gas tax will be brought up and passed at the next session," Mr. Barton said.

(Continued on page 3, col. 1.)

Select January 21-22 For Next Annual Meet; Choose Place In July

January 21 and 22 are the dates of the next annual meeting of the Illinois Agricultural Association, according to a decision of the executive committee in its meeting of June 12. Selection of the place was set for special consideration for the next meeting, which will be July 3. All invitations will be considered at that time.

Farm Bureau Baseball Gaining In Popularity; Several Games Played

Farm bureau baseball is growing in popularity, judging from reports that come in after various games have been played. The season is now well under way, and the teams are fighting to have a chance at the cup denoting "State Farm Bureau Champions" which will be given the nine emerging victorious from the final conflict at the I. A. A. picnic at Taylorville, Thursday, August 27.

Morgan county's team won over Sangamon 7 to 4 on June 6. Mercer suffered a 9 to 4 defeat at the hands of Henderson on the same day. Henderson had also won over Warren on May 30, 6 to 4.

Other scalps successfully tucked under victors' belts are as follows: May 23, Woodford beat Tazewell, 4-3; May 30, Woodford over Peoria, 15-11; May 14, Tazewell over Peoria, 20-15.

Following are the list of games yet to be played in districts that have reported schedules to the I. A. A. office:

District No. 7: Sangamon vs. Morgan at Jacksonville, August 8; Sangamon vs. Cass at Virginia, August 15.

District No. 2: Warren vs. Mercer, July 18 at Aledo; Warren vs. McDonough, August 1 at Macomb; Warren vs. Knox, August 20 at Galesburg.

Henderson vs. Warren, June 27 at Monmouth; Henderson vs. McDonough, July 25 at Macomb.

Knox vs. Warren, July 11 at Monmouth; Knox vs. Mercer, August 9 at Aledo.

McDonough vs. Henderson, June 20 at Macomb; McDonough vs. Knox, June 27 at Galesburg.

Mercer vs. Warren, June 20 at Monmouth; Mercer vs. Knox, June 25 at Galesburg; Mercer vs. McDonough, July 11 at Macomb; Mercer vs. Henderson, August 1 at Biggsville.

Schedules for semi-finals will be arranged between Geo. R. Cline, Virginia, president of the Illinois Farm Bureau Baseball Association, and G. E. Metzger, I. A. A. organization director, in a conference to be held June 29 at Virginia.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, H. E. Goembel, Hooppole.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Watch For It.

IT has been decided by the executive committee of the Illinois Agricultural Association that before the next election the RECORD will publish, with appropriate comments, the complete agricultural voting record of each state senator and representative.

The attitude of our legislators toward agriculture is of considerable importance to Illinois farmers. The RECORD will print an impartial list of their "yeas" and "noes" as well as the number of absentees. Appropriate comments will be available from the legislative committee.

The RECORD will furnish the facts and then it will be up to you farm voters to say who of the senators and representatives shall remain legislators and who shall stay at home.

—o—

Facts, not Fancies

QUITE a furore was created by the announcement some time ago from the Illinois Agricultural Association that Illinois farmers actually received $1.11 a bushel for wheat last year rather than what was popularly supposed to be close to $2.

George R. Wicker, director of the co-operative accounting department, was called upon to substantiate his figures in some instances, but nothing could jar them since they were taken direct from audits of elevators' books.

One man called on Mr. Wicker thinking the figures incorrect. He is an economist for a large Chicago bank. He had it figured that farmers received $1.78 a bushel last year. His estimate was made by means of some theoretical deduction. After seeing the facts, he went away wondering how to correct his theory.

All of which goes to show that we need more facts and less fancies.

—o—

Agriculture's Battle Cry

EQUALITY for Agriculture!

Someday the children and grand children of the present generation will read that slogan in their histories. It is the battle-cry of a peaceful revolution.

The Illinois Agricultural Association is backing that cry to the limit. The most recent expression of this association's attitude toward national legislation designed to bring about agricultural equality is this resolution printed below:

"We believe the outstanding need of American agriculture from the standpoint of federal legislation to be the placing of agriculture upon the same economic basis with labor, business, and industry, and we feel that the whole force of the American Farm Bureau Federation should be exerted to secure that end.

"We believe that unless some sound method is devised for the disposal of the exportable surplus of basic farm products that the price of those commodities will be fixed by world markets rather than by domestic conditions, that American agriculture will never be able to avail itself of the advantages of the American Protective System, and the American farmer will be forced to compete with cheap production and peasant conditions elsewhere.

"We, therefore, believe that the major legislative activities of the American Farm Bureau Federation should be centered toward the enactment of sound legislation looking to the disposal of such exportable surpus of farm commodities to the end that the domestic price of such products will be fixed by domestic conditions rather than by world markets.

"We believe in a domestic price on a basis of domestic equality.

"We believe that the legislative program of the American Farm Bureau Federation as announced in their resolutions adopted at their last annual meeting should be carried out.

"We believe that the legislative prestige of the American Farm Bureau Federation would be materially enhanced if such activities should be centered largely on one or two major projects, lending such co-operation as may be deemed proper from time to time to such measures as are designed to bring about better conditions for the American farmer and which give reasonable promise of accomplishing the desired end."

The occasion for this resolution was a request to answer a long questionnaire covering every degree of farmers' ills and their possible remedies, which was submitted by the American Farm Bureau Federation in its nation-wide search for the answer to the question: "What does the farmer want of Congress?" The reply was drafted by the legislative committee and passed unanimously by the executive committee.

Warning!

BEING watchdog over the interests of Illinois farmers is one of the biggest regular chores of the I. A. A. And, when some prowler gets nipped by the watchdog, quite often the owner is told that his dog is a nuisance and ought to be done away with. That's what some interests think about the Illinois Agricultural Association—but a good watchdog stays on the job no matter who tries to pet him and make friends with him. If things look wrong, a good watchdog barks a warning to its master. If the I. A. A. sees something that looks wrong it can bark its warning through the RECORD to its master—the 63,000 ***thinking*** farmers.

Here is an I. A. A. warning from J. R. Bent, director of the phosphate-limestone department. It speaks for itself:

"Don't be fooled by the 'disintegrated phosphate' man or by any fanciful claims of concerns attempting to sell some freak or extraordinary form of phosphate rock. Some years ago low grade phosphate-bearing muck, which had not been purified or ground, was sold in Illinois to a limited extent under the name of 'disintegrated phosphate' with a claim that it did not need grinding and was immediately or quickly available, having been made so by nature's own process. Farmers who bought this material at that time were turned against phosphate through their inability to see results.

"The phosphate-limestone department has recently discovered that this 'game' has been revived with other states as the victims. Farm Bureaus and farm bureau members are warned against falling for such efforts and are asked to report promptly to the Illinois Agricultural Association if they learn of any such efforts being made in Illinois.

"The I. A. A., through the phosphate-limestone department, has studied and keeps in close touch with the current phosphate situation and in light of this knowledge has established a standard which should be adhered to. It is for a basic quality of 13 per cent phosphorus ground fine enough so that at least 95 per cent will pass a 100 mesh sieve and not to exceed 3 per cent moisture. Individual shipments may vary by being higher or lower in grade but a sliding scale has been established to approximately equalize these differences on the basis of the average value delivered at the Illinois end. The I. A. A. maintains a branch office in the phosphate field in Tennessee and takes samples, makes chemical and physical analysis and sends a report to the customer in all cases where the customer desires it. This service is yours for the asking. Simply specify I. A. A. service when you place your order. The I.A.A. will tell you what the correction to the basic price should be due to any variation from the basic quality of the material which you receive."

—o—

Support in the Battle

THE Senate has also passed the resolution memorializing Congress to do something effective about the exportable surplus. This means that the Illinois General Assembly joins the large group of General Assemblies in mid-west and western states which have formally asked Congress to do something along this line. This puts the General Assembly behind the fight for equality for agriculture.

It also shows that the state of Illinois officially stands where the Illinois Agricultural Association has been standing all the time.

—o—

This Slogan Paid

You would imagine that the American public had been "sloganed" to the point of rebellion against all slogans. But the Illinois Agricultural Association declares in an official bulletin that its "Spread your butter thicker" and "There is no substitute for butter," have had the effect of reducing the butter surplus and putting the industry in a better condition.

The bulletin says the heavy surplus of last fall and winter has disappeared and that butter consumption has increased steadily in the last four months over what it was a year ago.

Another item which pleases the milk producers is that the current price received for farmers for butter fat is four cents more than it averaged for any months of May in the last four years.

The association had 10,000 "Spread your butter thicker" posters distributed over Illinois. Not a great number for so large and populous a state. Nevertheless, the results speak for themselves—the cashing in by Illinois farmers of an extra quarter of a million dollars on their cream this month.—Rockford (Ill.) Gazette.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis is "Agin" It) **John Catches a Benedict Arnold!**

SOUTHERN ILLINOIS DISTRICT MEETINGS CONSIDER PROBLEMS

Conferences at Carmi and Villa Ridge Hold Interest of Farm Bureau Folks Gathered There

Standardization of farm machinery and repairs, chicken stealing, the revenue amendment, school taxes, the work of the I. A. A., the marketing of Illinois grain, the Indiana wheat pool, and the work of the Illinois Fruit Growers' Exchange — all these problems were matters of discussion at the second conference of the year held in the 24th and 25th Congressional districts.

Curt Anderson

Farm bureau officers and farm advisers in the 24th district met in Carmi, White county, on June 9. Curt Anderson, Xenia, executive committeeman for this district in the I.A.A., presided over the meeting. R. A. Cowles, I. A. A. treasurer, addressed the meeting on the grain marketing situation, discussing briefly on the history of the movement in Illinois, and pointing out the I. A. A. plans for getting southern Illinois farmers to market their soft winter wheat through the Indiana wheat pool.

The 25th district conference took place at Villa Ridge, Pulaski county, on June 10. R. K. Loomis, Makanda, is member of the I. A. A. executive committee representing this district. The problem of catching the chicken thief was discussed from the floor, the sentiment being expressed that organized thievery has grown from a neighborhood to a state-wide affair.

R. K. Loomis

Explains Services

The work of the Illinois Agricultural Association in its various departments was outlined by Mr. Cowles. He was followed by J. C. Watson, I. A. A. taxation director, who spoke on the school tax problem and of the efforts being made to equalize the tax burden on a state-wide scale. Discussion from the floor centered around the community high school and the cost of maintaining several within a county.

LEGISLATIVE BODY GIVES GOOD REPORT

(Continued from page 1, col. 5.)

"Yes, and it would have passed this time, if we had condescended to divide the revenue 50-50 with the state highway department," President Thompson said.

The apportionment had been fixed in the amended I. A. A. bill on the basis of 20 per cent to the state highway department, and 80 per cent back to the counties.

I. A. A. Stands Pat for $3,000,000

Although the legislative committee has been constantly pressed by legislators to agree to a decrease in the $3,000,000 appropriation for t. b. passed by the Senate, there has been no change in the I. A. A. stand, which has been for the $3,000,000 amount.

"We have told them that if they reduce it, they must bear the responsibility. We have figured it out, and we believe three million will be required to carry out the present tuberculosis eradication work for the next two years," said Mr. Barton.

However, the House committee on appropriations, upon receiving the bill from the Senate, recommended a cut to $1,500,000. This is an unpopular cut on the floor of the House, and it is expected that a determined attempt will be made to increase the appropriation, at least to $2,000,000.

Tice Bill Amended

Fourteen amendments were tacked on to the Tice bill after a flag of truce was supposed to have been hoisted by both I. A. A. and opposing cattle trading dairy interests in northern Illinois. Many of these amendments are trivial, but two, the committee reported, are absolutely dangerous. One attempts to define segregation of stock and the other changes the 75 per cent clause to mean "herds tested" rather than "herds signed."

Under "segregation" comes the point of requiring double line fences, which the I. A. A. considers as wholly impractical and should not be included in the bill. Such a point should be covered either by regulation or by court decisions. A blanket law covering all segregation could very plainly be unfair to individuals, since double line fences are not necessary in many instances for effective segregation.

"We feel that both amendments should come out," said Chairman Barton. "If the House non-concurs in the Senate's amendments, the bill will go to conference where some changes may be made."

Record to Print Dope

The committee also strongly recommended the publishing in the Record of a full agricultural voting record of every state senator and representative. The motion by Chairman Barton is as follows:

"I move that the information department be authorized by this association to publish at the end of each legislative session, and at such other times as deemed advisable, the voting record of all members of the legislature on all legislation of interest to our association."

Membership in the Illinois Agricultural Co-operatives Association now numbers 170.

With a total of $179,824.08, the Illinois Farm Relief Fund now lacks less than $100 of its desired quota of $180,000.

A male glee club of more than 40 members representing most of the communities in the county has been organized in Champaign county.

Cold Figures Tell a Big Story For Any Farmer Who Sells Cream

COLD figures are poor story tellers most anytime, and especially so on hot days, but the comparative figures presented here tell a vivid story worth hearing most any day.

The comparison shows how butter fat prices in Illinois stack up with those of co-operative creameries and cream selling associations in Wisconsin, Iowa and Ohio.

Look at column three and you will see that Illinois co-operative creameries paid an average of about six cents a pound more than the Illinois private cream stations paid during the same period. Unfortunately, many Illinois communities produce too little cream to support a co-operative creamery, but the Illinois Agricultural Association has a remedy for this situation and in such places can render service by organizing a cream selling club. Under this plan no creamery is needed. The farmers contract to sell their cream through their own elected representatives and in this way are able to sell their combined output to the highest bidder. In this way farmers can get all the market affords—and that's only fair, isn't it?

NET PRICES PAID FOR BUTTERFAT IN 1924

Month	90 Score Butter Chicago	Illinois Private Cream Stations	Illinois Co-operative Creameries	Ohio Co-operative Cream Clubs	Iowa Co-operative Creameries	Wisconsin Co-operative Creameries
January	51.00c	46.55c	52.12c	53.63c	57.81c	57.50c
February	49.50	45.00	50.20	49.07	54.24	53.90
March	45.60	41.00	46.40	45.69	47.81	48.30
April	37.40	32.90	37.76	36.85	40.86	40.20
May	37.10	32.78	39.00	37.51	42.14	40.80
June	39.00	33.88	40.60	40.20	44.24	43.20
July	37.80	33.80	39.10	37.86	41.74	41.20
August	38.20	31.60	38.52	36.92	40.84	40.70
September	35.40	32.30	38.20	36.54	41.22	40.50
October	34.80	31.70	38.40	37.46	41.97	41.30
November	40.40	35.00	42.48	40.60	47.45	47.60
December	40.40	36.10	42.28	40.95	47.21	46.10
Averages	40.40	36.10	42.09	41.28	45.60	45.08

High Prices in Ohio

In Ohio, with the assistance of the Farm Bureau, 88 cream selling organizations of this kind were functioning in 1924 and in column four you will see that the Buckeye state farmers received an average of five cents a pound more than Illinois farmers who sold to private cream stations, and only three-fourths of a cent less than the average net price of our Illinois co-operative creameries. On first appearance, it seems that prices paid by Illinois co-operative creameries are nothing to brag about, especially when compared with similar figures of Iowa and Wisconsin as are shown in columns five and six. But Iowa and Wisconsin co-op creameries have been in the game much longer than Illinois. The oldest co-operative creamery in this state is only 10 years, while some in Iowa and Wisconsin are as old as 35 years. Volume of cream received increases with years of good service. The greater volumes going through co-ops in these neighbor states is largely responsible for their advantages in price averages. The greater the volume of a creamery, the less the overhead amounts to on each pound of butterfat delivered by its patrons, and consequently the greater the price received for the butterfat.

Write If You're Interested

Cream selling organizations are being formed in several localities in Illinois this year. Others can be formed where there is local demand and where cream from at least 500 producing cows can be signed into one cream club. Farmers who are interested should get in touch with their county Farm Bureau or write direct to A. D. Lynch, director of the dairy department, and he will get in touch with the county Farm Bureau.

RE-INSURANCE PLAN TO BOLSTER LOCALS

(Continued from page 1, col. 3.)

county, (I. A. A. executive committeeman for the 12th district), and all who are named above, excepting the 2nd vice-president, comprise the executive committee. In addition to the above named, the temporary board of directors constitutes the following: Everett H. Tripp, Belvidere, Boone county; I. N. Hosford, Hamilton, Hancock county; Otis Kercher, Vermilion county farm adviser; Frank Troeckler, Mitchell, Madison county and H. A. Cress, Hillsboro, Montgomery county.

Vernon Vaniman will serve as field organizer. He has directed the field work for the I. A. C. A., the co-operative accounting and business advisory service established last year by the I. A. A. and which, in less than a year, has grown to a membership of 170 co-operatives and other farmers' business organizations.

"Van" Loaned by University

With the auditing service now growing largely of its own accord, he will be able to devote practically full time to the re-insurance service. It will be remembered that Mr. Vaniman was "loaned" last year to the I. A. A. by the College of Agriculture where he had been in the extension service as assistant leader of farm advisers for the state. His stay with the I. A. A. is being extended so he can direct the field work of the new re-insurance company.

Here is what "Van" says about it:

"The Farmers' Mutual Re-insurance Company is the name of the proposed new company that will put the local mutual fire and lightning insurance companies of Illinois in a position to take care of all the insurance needs of the farmer. It will not be necessary for the farmer in the future to go to the old line company to secure the amount of insurance he desires.

Supplements Local Company

"The re-insurance company merely supplements the activities of the local company and does not enter into competition with it. The activities of the re-insurance company will depend on the use made of it by the local company, as the local company will be the agent of the state company.

"It frequently happens that the local company may have excessive losses, thus causing the assessments to be extra heavy which causes members of the local company to become dissatisfied, even though the average losses over a period of years would be much less than other insurance. The re-insurance company can agree to re-imburse the local for losses in excess of 125 per cent of their normal loss, thus providing against the heavy assessments and impressing the members with the stability of mutual insurance.

Reinsurance of Individual Risks

"Many local companies have limited the amount they will carry on separate risks. This is good practice. It frequently, however, makes it necessary for the farmer to get the insurance he desires elsewhere. A plan, whereby the re-insurance company will reimburse the local company for loss on individual risks in excess of certain amounts, would prevent heavy assessments by the local companies in case of loss on large risks. The local company in this case would write the policy and amount of insurance that should be carried and re-insure with the re-insurance company the amount that the local company does not desire to carry.

"According to the law a township company cannot write over $10,000 on a single risk and a county company cannot write one over $20,000. The re-insurance company in this case can write a separate policy for the amount that the local company cannot carry or desires not to carry.

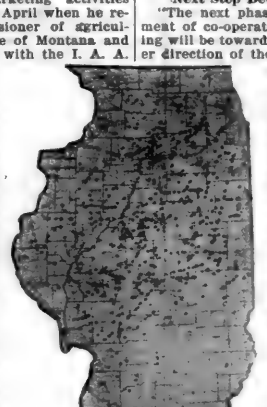
Keeps It In Farmers' Hands

"The re-insurance company will merely supplement the local company and put the local in a position to take care of all the needs of its members and provide the very best mutual insurance at the cheapest possible cost," says Mr. Vaniman. "It puts the mutual companies on a basis whereby they can take care of the needs of their members the same as an old line company can take care of all of its clients' needs for insurance."

Grain Marketing Activities Shaping Into 3 Main Channels

GRAIN marketing activities of the Illinois Agricultural Association are shaping themselves into three principal channels, according to Chester C. Davis, who has been directing the association's grain marketing activities since the first of April when he retired as commissioner of agriculture for the state of Montana and became affiliated with the I. A. A.

What's Being Done



These divisions are: (1), assisting the Farmers' Grain Dealers' Association of Illinois in formulating a marketing plan that will be of all-around service to grain growers; (2), securing a survey of the farmers' elevators of Illinois by the United States Department of Agriculture and the Illinois Agricultural experimental station and (3), assisting southern Illinois wheat growers in counties along the Wabash river sell their grain through the Indiana wheat pool.

Mr. Davis outlines the farmers' elevator situation in a brief way:

"Over six hundred farmer-owned grain elevators have been developed in Illinois in the evolution of grain marketing from the era of complete private merchandising toward one in which farmer control of his product as it moves to the consumer shall be the dominant factor. Most of these farmers' elevators grew up during the last 20 years in a successful attempt to improve conditions in the local grain market. Most of them are in the surplus corn-producing area of the state. There are fewer farmers' elevators in southern than in northern Illinois, while the condensation through the central and north central districts is remarkable. The number in the southeastern and extreme southern portions of the state is relatively insignificant.

Next Step Developing Now

"The next phase in the development of co-operative grain marketing will be toward centralized farmer direction of the volume of grain that moves from surplus areas to the centers where it is manufactured or processed for sale to the consumer. As this develpps, less grain will pass out of its normal route into speculative ownership, and more will be delivered along the shortest economic path to the final buyers of the raw crop.

Every black dot is a farmers' elevator—Note how few in Egypt.

"The accompanying map showing the distribution of the six hundred-odd farmers' elevators in Illinois illustrates the ground for the belief of the Illinois Agricultural Association that: (1), the major grain marketing program for Illinois will develop upon the farmers' elevators as a foundation; (2), the next logical step is to bring together in a directable channel, through a central co-operative selling agency of the local farmers' elevators, as large a part as possible of the grain that is delivered to them; and (3), that such a program would have little bearing on the grain growers of southeastern Illinois where farmers' elevators are few, and where co-operative grain marketing will depend on organizing the individual producers either in district or local marketing associations."

"WE WANT TO GO TO THE COUNTRY," CRY POOR CITY KIDDIES

100 Farmers Join Soft Wheat Pool In Southern Illinois In First Week

One hundred farmers who grow soft wheat in Wabash, Gallatin and White counties joined the soft wheat growers' marketing association during the first week of organization effort, according to Chester C. Davis, director of grain marketing, who looks upon this number as exceedingly encouraging and indicative of no evidences of "over selling."

"The way was paved during this week for future organization work in these three counties," Mr. Davis says, "and also in Edwards and Lawrence counties. Organization will continue up to threshing time."

The organization work is directed by the Illinois Agricultural Association with the county Farm Bureaus co-operating.

Five-year contracts are written with the Indiana Wheat Growers' Association as the sales agency for the soft wheat pool, with the understanding that before next season necessary changes will be made to place this association on a district basis, including the southern Illinois soft wheat territory.

Harvest Is Early

"Hot, dry weather advanced harvest fully a week earlier than expected in south-eastern Illinois, consequently the organization campaign and wheat cutting came on the farmers at the same time," says Mr. Davis. "Interest is keen, and uniform success is reported by the two organization crews at work in the territory under direction of M. L. Hunt of Macomb and H. E. McCarrel of Nebo, with Mr. Hunt representing the grain marketing advisory committee, of which he is a member."

After preliminary negotiations between the Illinois Agricultural Association and the Indiana Wheat Growers' Association had cleared the way, and after Mr. Hunt and Mr. McCarrel had thoroughly familiarized themselves with the first season's operations of the Indiana Wheat Growers' association at Indianapolis, a meeting at Carmi, White county, on Monday, June 8, brought together the Illinois organization workers. The field start was made the day following. Because of harvest, some difficulty was encountered in securing drivers.

Very Few Farmers' Elevators

The Wabash valley counties at which organization work is directed this season, are, with a few local exceptions, without farmers' elevators or other co-operative grain marketing agencies. The object of this summer's campaign is to give the grain producers an opportunity to market their 1925 crop of soft wheat collectively and with a successfully operating farmer's agency.

Contracts with local mills and elevators to handle the 1925 wheat for members, are being signed as the sign-up of farmers proceeds in the Illinois territory.

Farm Bureau Members Invited To Offer Outings Again This Season

"HEY, Spud, I'm goin' to th' country f'r sure. Th' lady said so! Gee! Say, you goin'?"

"I—I dunno. Say, I don't care—much. She—she said there wasn't any more people wanted us, so maybe I couldn't go—but—but I don't care—much. I guess I kin have just as much—fun—here—".

Have you seen them—the little children of the city slums? Hemmed in by dingy walls, their little rights ignored in the rush of a vast industrial community, they carry on the age-old games of childhood in littered alleys or streets made perilous by motor cars and trucks. In their eyes, behind the eagerness that even the city cannot crush from youth, there is something wistful; something the more pitiful because many of the children themselves do not know the heritage of which they have been robbed—the freedom of fields, the green of trees, the smell of meadow grass after a summer shower, and all of the thousand and one delights that even the poorest country child accepts as his natural right.

It is worst in the summer time when an unfriendly sun (strange—how friendly the sun can be in the country) beats mercilessly onto treeless streets; when the heat creeps stiflingly into that land of cement, brick, narrow stairways and stuffy, over-crowded rooms. Milk sours (not everyone can afford ice), the heat aggravates the tenement odors almost unbearably, and tired mothers' nerves are strained to the breaking point.

Then—well, imagine yourself a child again and think how you would feel if someone gave you a free ticket to fairyland. That is just what two weeks in the country is to these poor little heat-tormented urchins. How they look forward to that outing, and how they remember it all the year long—if they get to go. And the bitterness of the disappointment if they are told that there is no place for them!

Every farmer family living within 200 miles of Chicago can be the "fairy god-parents" of some little slum child. It takes such a little effort, when that effort is measured beside the happiness it gives. The matter of getting the children is easy. The United Charities of Chicago handles that end of it. For purposes of convenience, they place 12 or more children in each community. Trained charity workers pick the children who are to go, clean them up in every way, and deliver the whole group to any place within the 200-mile radius. The outing season begins with the close of the city schools, June 26.

The farmers who open their homes to these unfortunate children enjoy the "outings," too. The United Charities report that many families write back year after year, requesting the same children they have had before—which speaks well for the children.

Last summer, Mr. A. Mailloux of St. Anne in Kankakee county found enough people in his community to take 28 youngsters. He said that all he had to do was telephone and see some of his neighbors, and it wasn't long until he had the "orders."

If you can take one or more of these little slum children into your home for two weeks this summer, for just that brief taste of the joys of country life, and if you have neighbors whom you can interest also, won't you fill in the blank provided at the left and return it to our Outing Secretary? This summer the RECORD will print the name of each family that co-operates in this great humanitarian and christian work.

Outing Secretary,
Illinois Agricultural Association,
Chicago, Illinois.

.....192.....

We have organized a group of.....hosts in this neighborhood who will be glad to entertain.....Chicago poor children for two weeks beginning.....Following are the names of hosts, number and description of children wanted by each host:

Month and Date

Name of Host	No. of Children Wanted	Sex	Age

It is understood that United Charities of Chicago assumes the liability in the case of accident or illness to any of the children sent to us; however, we pledge to exercise proper precautions in the care and treatment of these children.

We will meet the children at.....Railway Station.....or

.....(Please name at least one optional Railway Station)

Remarks:.....

Quincy Dairymen Beat Their Time On Pledge To Deliver T. B.-Free Milk

Members of the Quincy Co-operative Milk Producers' Association blazed a trail heretofore untravelled by Illinois co-ops or commercial market milk handlers when, on Feb. 9, 1925, they passed a resolution to receive no milk after July 1 of this year from herds not accredited or on the way to accreditation.

With July 1 as a starting time, they have jumped their guns by several months, according to A. D. Lynch, dairy marketing director, for within 30 days after passage of the self-imposed high-quality standard, the co-op was selling nothing but t. b. tested milk to its patrons.

"The consuming public of Quincy was pleased with the efforts of the co-op," states Mr. Lynch. "This was fully demonstrated by a gain of 10 per cent in the co-op's business within three months."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—July 4, 1925 | No. 13

I. A. A. PRESENTS VOTING RECORD OF LEGISLATORS FOR FIRST TIME

I.A.A. LEGISLATIVE COMMITTEE REVIEWS LEGISLATURE'S WORK

Major Accomplishment of General Assembly Was Revenue Measure Pushed by I.A.A.

By the Legislative Committee

The General Assembly just closed was generally conceded to be one of few constructive accomplishments. In fact everyone agrees that the one far-reaching bit of legislative action was the submission to the people of an amendment to the state constitution, permitting the legislature to pass tax laws in conformity to modern conditions.

Frank D. Barton

At present probably more than 90 per cent of the tax burden falls upon the farm lands, city homes and other tangible property. This amendment, if adopted, will enable the legislature to find means of taxing the intangible wealth thereby reducing the burden now resting on the property of the farmer.

This action, before it becomes effective, must be ratified by the people at the November election in 1926. Because of that fact, and because of its importance, it is being printed in full on the editorial page. This resolution had the whole-hearted support of the Illinois Agricultural Association.

Text of Revenue Amendment

The Tice bill to hasten the work of eradicating bovine tuberculosis was seriously amended in the Senate. The House refused to concur and the bill went to conference. The conference committee from the House was composed almost entirely of men who had indulged in more or less destructive criticism of the bill at different times. In spite of definite promises, none of the outstanding friends of the bill were placed on this committee. Even Mr. Tice, its sponser, was completely ignored.

A. C. Everingham

Tice Bill A Step Forward

However, the bill came out of the conference with some of the most objectional Senate amendments eliminated. While we do not feel that the bill, as finally passed, is as good a bill as the one originally presented, we believe it is a definite forward step. It recognizes the principle of compulsory testing when 75 per cent of the cattle have been tested. It will enable many counties, where work is now well started, to very soon become clean territory and it clarifies and gives legislative sanction to many practices that are now merely department regulations.

H. E. Goembel

The appropriation as finally passed was $2,000,000. The committee felt and still feels that the amount appropriated will not be sufficient to carry the work through the next biennium. Three million dollars was

(Continued on page 4, col. 4.)

"DON'T forget me!" screeched Eltore Martire Pompilio, 12 years old, of 811 Morgan street, in the Halsted street district of Chicago, when he was asked to say goodby to the folks who had been listening 10 minutes to his peppy "yes mam's" over WLS recently. He was interviewed before the microphone by your editor in behalf of the slum kiddie project. Eltore enjoyed an outing on a farm in Livingston county last summer. He answered questions before the microphone in a way that would convince the coldest hearted person that the poor kiddies of Chicago's congested districts appreciate and look forward to trips to the country. There are many others like Eltore who would appreciate an invitation from some kind-hearted farm bureau member—an invitation that becomes effective by writing the Outing Secretary of the I. A. A.

Eltore's father is a blind musician and has been out of work for some time. He has a brother and sister, both wishing to go, too. Eltore wrote the following letter relating his experience in the radio studio especially for the RECORD:

RADIO

The Sharman Hotel

I talked in the radio at the sharman hotel and I told the country man That I like to go this year where the radio was. There were velvet curtain.. I saw a man playing a instrument he was playing a mouth organ and a bangio and they took me a picture now I got afraid all at once they burned a big iron thing and now they going to print my picture. Your very truly, Friend Eltore Martire, 811 Morgan Street, Chicago.

PUBLISHING VOTE MARKS BEGINNING OF A NEW LEGISLATIVE POLICY WHICH WILL BRING FACTS TO MEMBERS AND STRENGTH TO AGRICULTURE

Executive Committee Ordered Vote Printed in Record; Vote Shown Here on Revenue Amendment, Tice Bill, Barr Bill and Dunlap State Police Bill, All of Which Were Backed by I.A.A.; Comments on Senators and Representatives to be Printed Before Election.

THE record of the legislators who served the state during the 54th General Assembly just closed, upon measures of vital interest to Illinois farmers, is presented herewith by the Illinois Agricultural Association. This is a new departure upon behalf of the association, but it is one that farm bureau members have asked for many times. At the meeting of the executive committee on June 12, it was ordered that this action be taken.

"How can agriculture have an effective voice in the affairs of the state if the farmers do not have the information from which they can learn who are their friends and supporters?" asked Frank D. Barton (Livingston), chairman of the legislative committee in advocating this change in policy for the I. A. A. "Likewise, it is important that farmers know who are against agriculture."

"Too many legislators have regarded the farmers' rights too lightly," President Thompson stated at the time.

Comments on various members of the legislature will be made later. These will be written by the legislative committee, of which A. C. Everingham of Hutsonville and Vice-President H. E. Goembel of Hooppole, are also members.

The record, as compiled by the legislative committee from the journals of Senate and House, begins on page three.

I. A. A. Fighting Against Proposed 11 Per Cent Freight Rate Increase

An advance of about 11 per cent in freight rates on all commodities, and particularly live stock, is the expressed desire of the railroads serving Illinois and the West, according to a report of L. J. Quasey, director of the transportation department. This increase is vigorously opposed by the Illinois Agricultural Association.

"Recently the lines filed a petition for an increase in rates between all points in western territory, including Illinois," the report stated. "The railroads contend that their revenue during the past several years has not been adequate. It is said to fall considerably below the 5¾ per cent authorized by the Transportation Act.

Strategy Seen in Petition

"This petition is particularly interesting in that it comes at a time when the Interstate Commerce Commission is contemplating a method of procedure under the Hoch-Smith resolution, which was passed by Congress in its last session and which requires that the subject of freight rates shall be given a good airing with a view toward possible revisions.

"However, the railroads very strenuously oppose having this petition considered under the Hoch-Smith resolution. The opposite view is taken by the shippers' organizations, and the Illinois Agricultural Association.

"From the standpoint of Illinois, we feel that the action on the part of the Western lines involves Illinois rates on all classes and commodities. This action is of great concern to us in that the railroads, over a period of years, have endeavored to increase Illinois rates, and particularly on live stock. As nearly as can be determined, the increase asked for in the carriers' petition would mean an advance of about 11 per cent on all commodities. This might vary to some extent on one commodity over another."

No definite plan of procedure for executing the Hoch-Smith resolution has been indicated by the Interstate Commerce Commission. It has received suggestions from shippers' organizations from all over the country, and will now formulate its own plan.

15 Per Cent Increase In Membership In Six Counties, Metzger Says

Farmers are joining the Farm Bureau in the counties which are renewing memberships this year with a real appreciation of what it is all about, according to G. E. Metzger, I. A. A. organization director. Six counties are already in their campaigns. In these six, the increases range from 10 to 25 per cent of the old membership, which speaks well, he states, for the standing of the Farm Bureaus over the state. The average increase so far is estimated as 15 per cent.

Pool Gets 200 Members In Southern Illinois As Threshing Ends Campaign

Growers whose deliveries for the season will amount to approximately 150,000 bushels have joined the soft wheat growers pool in the campaign just drawing to a close in Gallatin, White, Edwards and Wabash counties, according to reports.

Complete reports will be on hand this week, as the start of threshing will mark the end of the membership drive for this year. Two membership teams of the Illinois Agricultural Association and county Farm Bureaus co-operating, headed by M. L. Hunt of Macomb and H. C. McCarrel of Nebo, have been given contracts from over two hundred wheat growers in about two weeks' working time. Elevator contracts providing for handling the wheat, have been signed. Effort has been made to secure membership in local groups, rather than to scatter them throughout the soft wheat territory, to facilitate deliveries and shipping.

This year's wheat will be handled as part of the second year's pool of the Indiana Wheat Growers' association, and will provide a starting point for the general organization of soft wheat growers in southern Illinois next season. Most of the soft wheat comes from territory not served by farmers' elevators.

THERE was a good-sized turnout of farm bureau leaders and their wives and children when the second district meeting of the year was held in the 25th Congressional district at Villa Ridge in Pulaski county not long ago. Wells were going dry down in Egypt then, but rain has come and the fruit and late vegetables, upon which these farmers bank their income, are doing much better. R. K. Loomis of Makanda is their I. A. A. representative.

"WE WANT TO GO TO THE COUNTRY," CRY POOR CITY KIDDIES

100 Farmers Join Soft Wheat Pool In Southern Illinois In First Week

One hundred farmers who grow soft wheat in Wabash, Gallatin and White counties joined the soft wheat growers' marketing association during the first week of organization effort, according to Chester C. Davis, director of grain marketing, who looks upon this number as exceedingly encouraging and indicative of no evidences of "over selling."

"The way was paved during this week for future organization work in these three counties," Mr. Davis says, "and also in Edwards and Lawrence counties. Organization will continue up to threshing time."

The organization work is directed by the Illinois Agricultural Association with the county Farm Bureaus co-operating.

Five-year contracts are written with the Indiana Wheat Growers' Association as the sales agency for the soft wheat pool, with the understanding that before next season necessary changes will be made to place this association on a district basis, including the southern Illinois soft wheat territory.

Harvest Is Early

"Hot, dry weather advanced harvest fully a week earlier than expected in south-eastern Illinois, consequently the organization campaign and wheat cutting came on the farmers at the same time," says Mr. Davis. "Interest is keen, and uniform success is reported by the two organization crews at work in the territory under direction of M. L. Hunt of Macomb and H. E. McCarrel of Nebo, with Mr. Hunt representing the grain marketing advisory committee, of which he is a member."

After preliminary negotiations between the Illinois Agricultural Association and the Indiana Wheat Growers' Association had cleared the way, and after Mr. Hunt and Mr. McCarrel had thoroughly familiarized themselves with the first season's operations of the Indiana Wheat Growers' association at Indianapolis, a meeting at Carmi, White county, on Monday, June 8, brought together the Illinois organization workers. The field start was made the day following. Because of harvest, some difficulty was encountered in securing drivers.

Very Few Farmers' Elevators

The Wabash valley counties at which organization work is directed this season, are, with a few local exceptions, without farmers' elevators or other co-operative grain marketing agencies. The object of this summer's campaign is to give the grain producers an opportunity to market their 1925 crop of soft wheat collectively and with a successfully operating farmer's agency.

Contracts with local mills and elevators to handle the 1925 wheat for members, are being signed as the sign-up of farmers proceeds in the Illinois territory.

Farm Bureau Members Invited To Offer Outings Again This Season

"HEY, Spud, I'm goin' to th' country f'r sure. Th' lady said so! Gee! Say, you goin'?"

"I—I dunno. Say, I don't care—much. She—she said there wasn't any more people wanted us, so maybe I couldn't go—but—but I don't care much. I guess I kin have just as much fun here—".

Have you seen them—the little children of the city slums? Hemmed in by dingy walls, their little rights ignored in the rush of a vast industrial community, they carry on the age-old games of childhood in littered alleys or streets made perilous by motor cars and trucks. In their eyes, behind the eagerness that even the city cannot crush from youth, there is something wistful; something the more pitiful because many of the children themselves do not know the heritage of which they have been robbed—the freedom of fields, the green of trees, the smell of meadow grass after a summer shower, and all of the thousand and one delights that even the poorest country child accepts as his natural right.

It is worst in the summer time when an unfriendly sun (strange—how friendly the sun can be in the country) beats mercilessly onto treeless streets; when the heat creeps stiflingly into that land of cement, brick, narrow stairways and stuffy, over-crowded rooms. Milk sours (not everyone can afford ice), the heat aggravates the tenement odors almost unbearably, and tired mothers' nerves are strained to the breaking point.

Then—well, imagine yourself a child again and think how you would feel if someone gave you a free ticket to fairyland. That is just what two weeks in the country is to these poor little heat-tormented urchins. How they look forward to that outing, and how they remember it all the year long—if they get to go. And the bitterness of the disappointment if they are told that there is no place for them!

Every farmer family living within 200 miles of Chicago can be the "fairy god-parents" of some little slum child. It takes such a little effort, when that effort is measured beside the happiness it gives. The matter of getting the children is easy. The United Charities of Chicago handles that end of it. For purposes of convenience, they place 12 or more children in each community. Trained charity workers pick the children who are to go, clean them up in every way, and deliver the whole group to any place within the 200-mile radius. The outing season begins with the close of the city schools, June 26.

The farmers who open their homes to these unfortunate children enjoy the "outings," too. The United Charities report that many families write back year after year, requesting the same children they have had before — which speaks well for the children.

Last summer, Mr. A. Mailloux of St. Anne in Kankakee county found enough people in his community to take 28 youngsters. He said that all he had to do was telephone and see some of his neighbors, and it wasn't long until he had the "orders."

If you can take one or more of these little slum children into your home for two weeks this summer, for just that brief taste of the joys of country life, and if you have neighbors whom you can interest also, won't you fill in the blank provided at the left and return it to our Outing Secretary? This summer the Record will print the name of each family that co-operates in this great humanitarian and christian work.

Outing Secretary,
Illinois Agricultural Association,
Chicago, Illinois.

....., 192.....

We have organized a group of ..... hosts in this neighborhood who will be glad to entertain Chicago poor children for two weeks beginning..... Following are the names of hosts, number and description of children wanted by each host:

Month and Date

Name of Host	No. of Children Wanted	Sex	Age

It is understood that United Charities of Chicago assumes the liability in the case of accident or illness to any of the children sent to us; however, we pledge to exercise proper precautions in the care and treatment of these children.

We will meet the children at..... Railway Station ..... or

(Please name at least one optional Railway Station)

Remarks .....

Name of Host Chairman.....

Post Office.....

Rural Route No..... Telephone No.....

Quincy Dairymen Beat Their Time On Pledge To Deliver T. B.-Free Milk

Members of the Quincy Co-operative Milk Producers' Association blazed a trail heretofore untravelled by Illinois co-ops or commercial market milk handlers when, on Feb. 9, 1925, they passed a resolution to receive no milk after July 1 of this year from herds not accredited or on the way to accreditation.

With July 1 as a starting time, they have jumped their guns by several months, according to A. D. Lynch, dairy marketing director, for within 30 days after passage of the self-imposed high-quality standard, the co-op was selling nothing but t. b. tested milk to its patrons.

"The consuming public of Quincy was pleased with the efforts of the co-op," states Mr. Lynch. "This was fully demonstrated by a gain of 10 per cent in the co-op's business within three months."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—July 4, 1925 | No. 1

I. A. A. PRESENTS VOTING RECORD OF LEGISLATORS FOR FIRST TIME

I.A.A. LEGISLATIVE COMMITTEE REVIEWS LEGISLATURE'S WORK

Major Accomplishment of General Assembly Was Revenue Measure Pushed by I.A.A.

By the Legislative Committee

The General Assembly just closed was generally conceded to be one of few constructive accomplishments. In fact everyone agrees that the one far-reaching bit of legislative action was the submission to the people of an amendment to the state constitution, permitting the legislature to pass tax laws in conformity to modern conditions.

Frank D. Barton

At present probably more than 90 per cent of the tax burden falls upon the farm lands, city homes and other tangible property. This amendment, if adopted, will enable the legislature to find means of taxing the intangible wealth thereby reducing the burden now resting on the property of the farmer.

This action, before it becomes effective, must be ratified by the people at the November election in 1926. Because of that fact, and because of its importance, it is being printed in full on the editorial page. This resolution had the whole-hearted support of the Illinois Agricultural Association.

Text of Revenue Amendment

The Tice bill to hasten the work of eradicating bovine tuberculosis was seriously amended in the Senate. The House refused to concur and the bill went to conference. The conference committee from the House was composed almost entirely of men who had indulged in more or less destructive criticism of the bill at different times. In spite of definite promises, none of the outstanding friends of the bill were placed on this committee. Even Mr. Tice, its sponser, was completely ignored.

A. C. Everingham

Tice Bill A Step Forward

However, the bill came out of the conference with some of the most objectional Senate amendments eliminated. While we do not feel that the bill, as finally passed, is as good a bill as the one originally presented, we believe it is a definite forward step. It recognizes the principle of compulsory testing when 75 per cent of the cattle have been tested. It will enable many counties, where work is now well started, to very soon become clean territory and it clarifies and gives legislative sanction to many practices that are now merely department regulations.

H. E. Goembel

The appropriation as finally passed was $2,000,000. The committee felt and still feels that the amount appropriated will not be sufficient to carry the work through the next biennium. Three million dollars was

(Continued on page 4, col. 4.)

"DON'T forget me!" screeched Eltore Martire Pompilio, 12 years old, of 811 Morgan street, in the Halsted street district of Chicago, when he was asked to say goodby to the folks who had been listening 10 minutes to his peppy "yes mam's" over WLS recently. He was interviewed before the microphone by your editor in behalf of the slum kiddie project. Eltore enjoyed an outing on a farm in Livingston county last summer. He answered questions before the microphone in a way that would convince the coldest hearted person that the poor kiddies of Chicago's congested districts appreciate and look forward to trips to the country. There are many others like Eltore who would appreciate an invitation from some kind-hearted farm bureau member an invitation that becomes effective by writing the Outing Secretary of the I. A. A.

Eltore's father is a blind musician and has been out of work for some time. He has a brother and sister, both wishing to go, too. Eltore wrote the following letter relating his experience in the radio studio especially for the RECORD:

RADIO
The Sharman Hotel

I talked in the radio at the sharman hotel and I told the country man That I like to go this year where the radio was. There were velvet curtain: I saw a man playing a instrument he was playing a mouth organ and a bangio and they took me a picture now I got afraid all at once they burned a big iron thing and now they going to print my picture. Your very truly, Friend Eltore Martire, 811 Morgan Street, Chicago.

Pool Gets 200 Members In Southern Illinois As Threshing Ends Campaign

Growers whose deliveries for the season will amount to approximately 150,000 bushels have joined the soft wheat growers pool in the campaign just drawing to a close in Gallatin, White, Edwards and Wabash counties, according to reports.

Complete reports will be on hand this week, as the start of threshing will mark the end of the membership drive for this year. Two membership teams of the Illinois Agricultural Association and county Farm Bureaus co-operating, headed by M. L. Hunt of Macomb and H. C. THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Setting a Precedent

SOME legislators whose agricultural voting record is published in this issue will be surprised; others will be pleased, and not a few will sorely be perplexed. Publishing their record sets a precedent in the life of the Illinois Agricultural Association that will mean much to the farming industry of this state. Note the disregard for party affiliation; it is the agricultural record, without political favor.

—o—

Text of Proposed Amendment

THE proposed amendment to the revenue section of the constitution reads as follows:

Senate Joint Resolution No. 4.

Resolved by the Senate of the State of Illinois, the House of Representatives concurring therein: That there shall be submitted to the electors of this State for adoption or rejection at the next election of members of the general assembly of the State of Illinois, in the manner provided by law, a proposition to amend Article IX of the Constitution by adding thereto an additional section to be known as Section 14 of Article IX, as follows:

ARTICLE IX

Section 14. From and after the date when this section shall be in force, the general assembly shall have authority to provide by general law for the levy and collection of taxes for public purposes upon persons, property, and income, free from the limitations contained in Sections one (1), three (3), nine (9), and ten (10) of this article. Taxes levied under the authority of this section shall be uniform upon all persons, property or income of the same class. All real estate shall be in one class, except that mineral land and land devoted to reforestation may be in different classes. Exemptions from taxation may be established only by general law. This section shall not affect existing exemptions established by law under the authority of section 3 of this article. Taxes by valuation under the authority of this section shall be based upon a value to be ascertained by some person or persons to be elected or appointed in such a manner as the general assembly shall direct, and not otherwise. No act for the imposition, increase, continuation or revival of a tax under the authority of this section, or for the establishment of exemptions under the authority of this section, shall become a law without the concurrence of two-thirds of the members elected to each house.

Relief Fund Reaches Goal

OVER the top!!

That's the status of the Illinois Farm Relief Committee's fund for re-establishing tornado-stricken farmers in southern Illinois. The latest report shows the total at $180,105.13. The goal had been set at $180,000. It was thought that if this amount could be raised, it would be a great showing of generosity and neighborliness upon the part of Illinois farmers. Congratulations and thanks are in order for the thousands of farmers who contributed.

—o—

Doesn't The Farmer Count?

WHEN a public utility company wishes to build a line for transmission of its electrical energy, it must apply to the Illinois Commerce Commission for a certificate of "convenience and necessity." In applying for the certificate, the utility company must also give notice to telephone, telegraph and light and power companies whose lines will be crossed or paralleled. This is done in order that all interested parties may appear in the hearing where any objections to the proposed course of the line may be brought out.

But the utility companies are not required to serve notice upon farmers over whose land they propose to cross!

Obviously, this is an injustice to the farmer. What usually happens is that a representative of the company privately talks to each farmer and dickers on the amount that shall be paid for the condemned areas. The individual farmer is practically powerless in the face of the company's official certificate of convenience and necessity which had been issued upon the basis of the rights of all interests excepting the farmer's.

An illustration of this very thing is in the Galesburg-Galva case, which has been pending some time. Its history is given by L. J. Quasey, transportation department director, like this:

"The Illinois Power & Light Corporation made surveys between Galesburg and Galva for the proposed construction of a 66,000 volt transmission line between the points named. The corporation applied to the Illinois Commerce Commission and obtained from it, on Feb. 18, 1925, a certificate of convenience and necessity, and the right of condemnation.

"The Illinois Agricultural Association was not approached by the land owners until after that date, when the Knox County Farm Bureau asked that we take some action and assist the land owners concerned in getting the course of the proposed line changed if possible.

"It so happens that the course most preferred by the company runs on an average of three-quarters of a mile from the Burlington right of way. It necessarily cuts the farm lands diagonally. Some 52 farms are involved and under the proposed plan there would be from two to ten towers on each farm. Ninety seven per cent of the lands proposed to be crossed were under crop rotation.

"The Knox County Farm Bureau proceeded with this matter in a very orderly manner, appointing committees to act in behalf of those concerned. The company in the meantime had written some 19 contracts with individual farmers for right of way, and in some instances payments had been made under the provisions of these contracts. This gives an idea of the difficult position the Illinois Agricultural Association was placed in when we took this matter up.

"We made an appeal to the chairman of the Illinois Commerce Commission for a conference so that we could present our objections to the proposed course. At the conclusion of the conference the Commission ordered that further activities on the part of the company toward construction of the line be suspended until further ordered by the Commission.

"The Commission then, in compliance with our request, sent out an engineer to check up the situation in connection with the proposed course, also to develop alternative routes. After this was done, an informal hearing was held. Those present were the interested farmers, the Illinois Power & Light Corporation and others interested.

"The route most agreeable to the farmers and which was one of the routes suggested by the Commission's engineers, was one parallel to the Burlington railroad between the Galesburg and Galva. Serious objection to this was made on the part of the Burlington railroad on the grounds that inductive interference from the high power line would cripple their signal devices. The Western Union Telegraph Company likewise made objections on the same grounds; a portion of their coast to coast line passes along the Burlington railroad. The Bell Telephone Company was the most strenuous objector for the same reasons. They also have lines along a major portion of the proposed route.

"At the conclusion of the conference, the Chairman of the Commission appointed a committee to represent all the various interests in an endeavor to work out a plan mutually agreeable, and in the event that no mutual agreement can be reached, the Commission will set the matter for further hearing and undertake to decide the matter to the best interests of all."

While the immediate concern is to see that 52 farmers are not oppressed, the principle involved is of more importance. Mr. Quasey says that there are already 7,000 miles of transmission lines in Illinois and the industry is still in its infancy. When we get to a point where there will be two, three or four times as many miles and no definite recognition given to the effect upon farm lands, a great injustice will result to the farm owners in this state. In working to overcome this possibility of injustice, the transportation department has set up four principles, which are as follows:

1. That public utilities shall be mindful in their surveys to transverse plow lands to the least possible extent.
2. That they shall, so far as possible, pursue the right of way of railroads and highways and endeavor to follow fence lines.
3. That they conduct their surveys in a manner to prevent the least loss and damage to crops and property.
4. That any resulting damages be properly compensated for.

These four points constitute a basis upon which the I. A. A. stands and will continue to stand in its everlasting crusade of protection of farmers' rights.

(Continued on page 4.)

MAP showing Senatorial districts of Illinois. There are three representatives for each district.

Note No. 1—It was in 1870, five years after the Civil War, that the present revenue section to the constitution of Illinois was adopted. Things have changed since then! In 1870, it was fair to make general property bear the taxes of the state, for most wealth was in tangible investments. Today a large portion of wealth is invested in intangible things, and conditions have changed so that the old system of gathering taxes works a hardship on owners of property, and especially on farmers. After a great deal of study and much effort, the Illinois Agricultural Association, the Illinois Bankers' Association, the Illinois Chamber of Commerce, the Illinois Federation of Labor, the National Board of Realtors, the Illinois Teachers' Association and other state-wide organizations, have drawn up an amendment to the constitution which will place Illinois' tax collecting on a basis in keeping with present-day economics. None of these groups gain a special favor by the adoption of the amendment, it merely giving the General Assembly power to act when two-thirds favor any changes. This is the only hope of the farmer to gain freedom from the present oppressive burden of taxation on general property. The General Assembly was almost wholly in favor of it, as the vote shows. To become effective, it must receive the majority of the votes cast in the election of November, 1926.

Note No. 2—The Tice bill, as most farmers know, provides for a general re-codification of existing regulations governing tuberculosis eradication. Chief among its features is a provision that when 75 per cent of the cattle have been tested in any county that is cleaning up under the area plan, the test becomes compulsory on the remainder of the cattle.

Note No. 3—This vote was taken on a motion made to table an amendment offered by Senator Barr to reduce the appropriation for tuberculosis eradication from $3,000,000 to $2,000,000. Affirmative votes on this motion, as are recorded in this column, indicate that senators so voting favored the larger amount.

Note No. 4—This vote was on the passage of the $3,000,000 appropriation bill in the Senate.

Note No. 5—Being unable to get the vote on the Barr appropriation bill in the House at the time the RECORD goes to press, it cannot be included here. However, this vote is relatively unimportant since it was on the $1,500,000 amount which had been recommended by the House committee on appropriations. The House vote was practically unanimous, it being known that the bill would be required to go to conference between the two legislative branches. It was in the conference that appropriation was fixed at $2,000,000.

Note No. 6—The "yes" votes in this column indicate that the representative favored the Dunlap State Police bill. This record was made when the opposition made a motion to table the bill, which terminated successfully for them, and meant permanent defeat in this session for a state police to protect farmers and others from depredations of thieves.

John C. Watson, director of taxation and statistics, showed the Iowa Farm Bureau Federation how taxes have been equalized in Illinois, when he put on a demonstration at their request in Polk county, Iowa, one day recently. Now they are planning a similar campaign.

The fight of the Madison County Farm Bureau in behalf of 199 farmers who paid only two-thirds of their land taxes because of inequalities existing between the city and country valuations, and who were forced to pay the full amount by court order in Madison county, has been carried to the Supreme court of Illinois. This case is a very important one, it being the first to be carried to the Supreme court. The I. A. A. is acting in an advisory capacity and is helping finance the farmers' fight because the decision will have bearing on all farmers in Illinois.

BARTON URGES FIGHT START NOW FOR 1927 LEGISLATIVE BATTLE

Bloomington Conference Hears Reports on Legislature, Farm Relief, Taxes, Lime-Stone and Discusses Them

The campaign for the farmers' legislative program in 1927 should begin at once, declared Frank D. Barton, executive committeeman for the 17th district, at that district's meeting at Bloomington, June 26. He stated that one feature of the campaign will be a gasoline tax measure designed as a lieu tax, taking the place of the present special tax assessments for maintaining state aid roads. Most counties of the state have this special assessment included with their regular property tax schedules, he said.

Discussion brought out that it would be advisable to carry on a very thorough campaign on the gas tax of the farmers themselves in order that they may be solidly behind it, and can talk it to their neighbors. "In the last session, the opponents spread propaganda to the effect that the gas tax would be an additional tax and that it was detrimental to farmers, it was said.

Relief Fund Reaches Goal

R. A. Cowles, I. A. A. treasurer, reported that the farm relief fund had reached approximately $180,000, the goal originally sought. The fund is to be used to re-establish the farmers in the stricken area, building homes and barns and granaries where they are needed, re-stocking the county with cattle, hogs and chickens. This work is being done, he said, only where it is essential in order that a farm family can continue living and earning a living on the farm. It is a slightly different class of work than can be done by the Red Cross, which has raised over two million dollars for the general storm relief work, though the farm relief fund is being administered by the Red Cross after it is received in moderate amounts from the Illinois Farm Relief Committee.

One of the most effective pieces of storm relief work was done by the farmers living near the stricken area in organising crews, going into the storm-swept country and picking up rubbish and wreckage from the fields, building temporary shelters and fences and in other ways lending a helping hand to the sufferers. This action proved to be far more than a contribution of so many hours of labor, Mr. Cowles said, for this neighborly act restored the morale of the storm victims, a priceless contribution.

Predicts Limestone Price Increase

John C. Watson, director of taxation and statistics, reported that he is doing work along equalization lines in McLean county, but had not progressed far enough to give any light on the situation. J. R. Bent, director of the phosphate-limestone department, stated that because of decreased activity in road building in the state, which has reduced the quarries' output of the screenings, and, too, because of greater farm demand, there will be an increase in the price of agricultural limestone of from 10 to 15 per cent about August. This applies particularly in southern Illinois, but some of the companies in northern Illinois have announced that they will not increase the price, he said.

George R. Wicker, director of co-operative accounting, told how his department has proceeded along almost the identical lines in analysing farmers' elevators' books as have the farmers in Woodford and adjoining counties in their co-operative farm accounting. As a whole, the study shows where farmers' elevators are falling down in good business practice or where they are above the average.

It was decided to hold the next conference at Bloomington Nov. 27.

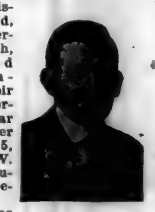
Application of Grain Marketing Company for permit to sell its stock in Ohio, which was filed pursuant to a ruling of the attorney general holding the corporation subject to the Ohio Securities law, was withdrawn by officers of the company not long after it had been filed, according to the Ohio department of commerce. No action on the application had been taken, at the request of attorneys for the grain merger, who expressed a desire to hold the matter in abeyance until the departments of Indiana and Illinois had disposed of it. The withdrawal from Ohio took place the day before the Indiana Securities Commission rejected the application to sell stock in Indiana.



NOTICE

IT should be borne in mind that the simple record of a man's vote on any given measure does not give the complete information with regard to the actual attitude of the member on the measure being voted on. More complete and specific information relative to the actual position of each member on farm measures is being compiled by the legislative committee of the Illinois Agricultural Association and will be furnished each member through the Record at such time as that information will be of most value in determining your attitude toward candidates for public office. This information will be made up of a study of all the activities of the members relative to all agricultural measures. Be sure and keep this issue in your home for future reference.

14TH DISTRICT MEN MEET AT ALEDO FOR FRANK DISCUSSIONS

"Equality For Agriculture" Is Given Boost; Next Meeting at Rock Island in October

Farm Bureau representatives of counties of the 14th Congressional district, comprising Rock Island, Mercer, Henderson, McDonough, Warren and Hancock, convened in their second conference of this year at Aledo, Mercer county, June 25, upon call by W. H. Moody, executive committeeman.

W. H. Moody

Resolutions were passed favoring the export corporation idea, the state police bill as supported by the I. A. A., the gas tax as a lieu tax, the formation of detective associations for farm protection, and the amendment to revenue section of the state constitution.

The I. A. A. was represented by A. D. Lynch, director of dairy marketing, and Harry C. Butcher, director of information. Round table discussion featured the session and considerable interest was shown in projects under way by the I. A. A., particularly as regards reinsurance for farm mutuals, which brought forth commendatory remarks.

The next conference is to be held at Rock Island during the early part of October.

Following are the names of those present at the dinner:

Henderson county—C. W. Cooper, Little York.

Mercer county—E. J. Longley, Aledo; Scoville Lee, Aledo; C. H. Belting, Aledo; H. L. Thornton, Aledo; F. B. Wicket, Keithsburg; Guy Mardock, Joy; L. L. Park, Viola.

Rock Island county—W. H. Moody, Port Byron; S. S. Carney, Rock Island.

Warren county—W. D. Rodgers, Monmouth.

Reinsurance Body Needs $500,000 in Individual Policies; Will You Help?

The only law under which a mutual fire and lightning company can operate over the entire state also requires that $500,000 in individual policies must be held by the company before it can receive its charter.

This is the situation of the newly organized reinsurance company sponsored by the Illinois Association of Mutual Insurance Associations and the I. A. A. It becomes highly important and absolutely necessary that individual fire and lightning insurance to the extent of $500,000 be subscribed or else the new company cannot get its charter. Indiana has had a farmers' reinsurance company for eight years, and Iowa 15.

"With all friends of Farmers Mutual Fire and Lightning Insurance companies co-operating, each county in Illinois should raise at least 20 policies of $1,000 each," Vernon Vaniman, field representative, says. "After the charter is received, the company will be ready to operate. To enable the local companies to render greater service and to serve you better is the real purpose of the reinsurance company. Which county will have the honor of sending in 20 policies first?

"Are you interested in Illinois having a farmers' reinsurance company? If so, sign your name to the attached coupon and complete information will be sent you."

I am interested in the Farmers Mutual Reinsurance Company of Illinois and in order to help it get its charter, I could use about $_____ of fire and lightning insurance on my property. Send complete information.

Name _____

Address _____ County _____

Fox and Whisnand Tell Conferring Ag. Teachers What I. A. A. Stands For

"It is a fine thing to teach boys and girls of Illinois about the intricacies of growing crops on our farms, but it would be a still finer thing to add to that kind of teaching courses dealing in marketing these crops after they are grown, and to teach more on business problems," said George A. Fox, executive secretary of the Illinois Agricultural Association in an address before the teachers of vocational agriculture when they met in their annual conference at the University of Illinois recently.

J. L. Whisnand, of Charleston (Coles), executive committeeman for the 19th district and chairman of the standing committee on taxation and education, also spoke, telling of the need for an amendment to the revenue section of the Illinois constitution and about the school survey made by the I. A. A. last year. The biggest thing shown by the survey was the need for a revenue amendment, he said.

Farmers Around Peoria May Have Own Milk Body; Visit Detroit For Ideas

Members of the organization committee of the proposed Peoria Dairy Association which is being planned for Peoria, Tazewell and Woodford counties visited the Detroit Milk Producers' plant, officials and dealers at Detroit, Mich, June 29. Farm Advisers Shaw, Arnett and De Werff accompanied the committee. A. D. Lynch, director of dairy marketing, conducted the party.

Since the farmers in the vicinity of Detroit have put across a successful milk marketing organization, it was felt that a trip there would bring out important points.

COMMITTEE REVIEWS LEGISLATURE'S WORK

(Continued from page 1, col. 1.)

the amount asked for and that would have furnished sufficient funds to have done this work effectively. There was much evidence that the administration was active in reducing the appropriation to the above amount. In fact, men in the confidence of the administration predicted freely that the bill would receive the executive veto if $3,000,000 were allowed by the General Assembly. The Governor's position seemed to be that the federal government should share fifty-fifty in the expense of paying for condemned cattle. If increased appropriation cannot be secured from Congress the money will doubtless be exhausted long before additional funds can be made available. If that should happen, then the only way that the work can be carried on without interruption will be to secure an emergency appropriation immediately upon the convening of the General Assembly. Although the $2,000,000 received will in all probability not carry the work through until additional funds can be made available, it should be borne in mind that the amount appropriated was just twice the amount appropriated two years ago.

Gas Tax To Be An Issue

The Cuthbertson gasoline tax bill did not come to the roll call in the Senate, although it was passed out of committee with favorable recommendation. Here again, as in the case of the appropriation just referred to, there was much evidence of administration interference in the passage of that measure. It is the belief of the legislative committee that the administration desires the gasoline tax in the near future, probably at the next General Assembly and desires to use all the fund accruing from such tax for the completion of the system of highways already voted, which would ignore entirely the secondary roads of the state.

This bill is not dead, but only sleeping and will be a live, active issue during the next two years. The Illinois Agricultural Association has insisted and will continue to insist that the gasoline tax is a fair tax for road purposes and that when such tax is imposed it shall contain the two fundamental principles embodied in the Cuthbertson bill, namely: that it shall provide a fund for the maintenance of the secondary roads, the roads which really tie the farmers and the rural community to the state road system and that such tax shall be in lieu of an existing tax against the property and not an addition to the already heavy burden of taxation against such property. Farm bureau members should make their business during the next two years to find out where the candidates for the General Assembly who ask for their support, stand on the gasoline tax proposition and on all other propositions in which farmers are vitally interested. They should also find out whether or not their activities are to be controlled by the interests of their constituency, or are to be dominated by the suggestions of a powerful individual or a political machine.

The Adcock resolution, which memorialized Congress to make a scientific study of the difference existing in the exchange value between agricultural products and the products of industry, business and labor and to find some means for adjusting such differences, was passed without record note and without any opposition. This resolution recommends an export bounty to be provided by some equitable excise tax spread over the total production of the commodity in question. This backs up the "Equality for Agriculture" program of the Illinois Agricultural Association.

The Bill prohibiting the use of narrow-tired wagons on improved roads was killed in the road and bridge committee of the House. The association stood for the elimination of the closed season on rabbits. Several bills to accomplish that failed to pass but a bill was passed lengthening the open season

EVERYBODY OUT FOR BIG I. A. A. PICNIC AT TAYLORVILLE," IS CRY

sual and Unusual Stunts Will Feature State Picnic Aug. 27; Secretary Jardine on Program

"Everybody out for the big I. A. annual picnic at Taylorville, August 27!"

rs. Spencer Ewing

Baseball, community singing, horseshoe pitchin', "stunts" by the club boys and girls, "eats," hog calling and chicken calling contests just for fun, and, best of all, a real farm message from Secretary of Agriculture Jardine —these are some of the reasons hy every Illinois farm bureau ember who possibly can should an to take in the annual picnic.

The I. A. A. picnic is one of the ggest events of the farm bureau ar. This is the day to run the actor into the shed, turn old Pete d Barney out to pasture for a oliday, load the family into the vver and spend a day just playg and getting acquainted with our neighbor-farmers in other unties and refreshing yourself ith new ideas from men of note the agricultural life of the state d nation. If you have attended e picnic in previous years, you now its value—and the coming icnic is to be the best one yet. If ou have never attended, you have treat coming to you.

Women's Program Feature

A feature of the picnic which is ew this year is the women's proram in the morning, which will e conducted by Mrs. Spencer Ewg, president of the Illinois Home ureau Federation. Boys and girls f the 4-H clubs of Champaign and acon counties will entertain the udience with folk dances, songs nd stunts. Mrs. J. L. Mitchell, in harge of the Red Cross tornado elief work will speak on "Tornado elief in Southern Illinois." Mrs. Ewing will tell about "The Home ureau and its work."

In addition to the principal adresses of the day which is to be iven by Secretary Jardine, Dean dumford of the University of Illiois will speak.

The baseball and horseshoe hampionships will start in the orning and will be finished by the ime the speaking program begins. resident S. H. Thompson of the . A. A. will present the championhip cups to the winning teams in he two sporting events.

The hog calling contest for men nd chicken calling contest for omen is another new feature of he picnic. Each county is urged o enter contestants in each event.

DAIRYMEN RUN OWN WAGONS IN SPRINGFIELD

The new producers' dairy, organzed recently by the Sangamon County Farm Bureau at Springfield, began the first part of July o deliver milk to patrons. Nine etail wagons are being operated by the farmers' organization, in adition to wholesale business to restaurants, hospitals and grocery tores.

C. H. Buecker, who has been manager of the West Side dairy, which was purchased by the Producers' Dairy company, is continuing as manager. On about Oct. 1 the company will be housed in a new building. On this same corner a building suitable for the offices and warehouse for the Sangamon County Farm Bureau is to be constructed.

Urges Farmers Who Still Have Wool to Pool to Ship Soon

"Farmers who wish to pool wool this year in the I. A. A. wool pool can still get in by communicating with their farm adviser," states Wm. E. Hedgcock, director of live stock marketing.

"We are urging farmers who wish to pool wool to ship as early as convenient in order that it may be graded and put in shape to show buyers. The wool market is showing an improvement. Indications are that manufacturers are going to be on the market early this year."

Here's Gist of What Executive Committee Did in July Meeting

Here is a "read-as-you-run" report on the executive committee meeting of July 3:

1. Treasurer's report read and approved.

2. Heard report from George R. Wicker, director of co-operative accounting, on status of income exemptions for farmers' co-operative companies. Status is unsatisfactory. Congressional action will be necessary to clarify and define what a co-operative is in the eyes of the law.

Approve Text of Amendment

3. J. L. Whisnand, chairman of committee on taxation and education, recommended continuing relations with other groups to push revenue amendment. Adopted. Text of final resolution officially endorsed.

4. E. A. Meyers, Chicago, insurance counsellor, reported on progress of Farmers' Mutual Reinsurance Company. Three kinds of policies or contracts are to be issued by the state company. They are: (1) direct policies to individual risks; (2) blanket reinsurance contracts, and (3) specific reinsurance contracts. Outlook for new body reported as very favorable. Expect opposition from old-line interests, some already apparent. Let it come. State company assists local company only where asked to. Not competitive in any sense. Designed to take care of all insurance needs of farmer.

5. Report by R. K. Loomis, chairman of advisory committee to transportation department, stated this department is taking over all claim and transportation work for Chicago Producers, at their request. To get $250 a month for service. Requires extra help.

Annual Meeting at University

6. Decided annual meeting will be at University of Illinois again this year in compliance with invitation of Dean Mumford.

7. Report on exhibit depicting agriculture in Illinois to be shown at Central States Fair and Exposition at Aurora, Illinois State Fair at Springfield and Illinois Products Exposition at Chicago. Received and placed on file.

8. Approved report of legislative committee on work at Springfield.

9. Set date of next meeting as Friday, August 7.

Legislative Committee Overlooked a Point in Its Report Last Issue

In the report made by the legislative committee in the last RECORD, the activity of the I. A. A. in securing an appropriation for inspecting fruit and vegetables was overlooked.

"The regular list of appropriations did not contain one for inspecting fruit and vegetables," Chairman Barton adds. "Through the efforts of the I. A. A. this appropriation, which was for $42,000, was re-instated."

COMMENDS WORK ON TICE BILL

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF ANIMAL INDUSTRY
LOCAL OFFICE
900 Exchange Ave., U. S. Yard,
Chicago, Ill., June 27, 1925.

Mr. S. H. Thompson, President,
Illinois Agricultural Association,
608 S. Dearborn Street, Chicago, Ill.

The legislature of Illinois has adjourned and passed two bills—House Bill 176 and Senate Bill 257—which are of vital importance to the agricultural interests and the people as a whole.

I assure you that I appreciate the interest and support your Association has extended Co-operative Tuberculosis Eradication in Illinois. Your Association is credited with writing the (Tice) House Bill 176 which I think is the best piece of legislation of its kind, giving us ways and means to complete this great task undertaken. The Co-operative Tuberculosis Eradication program of Illinois is among the leaders in the United States, which fact is possible only by the loyal support given it by your Association and Farm Bureau organization in Illinois due to your direct contact with the leading agricultural interests.

I wish to thank you for the support given us to make such a reality and especially do we appreciate the services rendered by your legislative committee in their untiring efforts to secure the passage of these bills.

Hoping that we may go on and complete this great work, and with kind personal regards, I remain

Very truly yours,
(Signed) J. J. Lintner,
Inspector in Charge,
Tuberculosis Eradication.

ROADSIDE MARKETING IS ONE OF PROBLEMS I. A. A. IS STUDYING

Discuss It at District Conference at Wyoming; Secretary Fox Urges Farmers to Back Revenue Amendment to Get More Equitable Taxation

Illinois might well be that mysterious land of which the nurseryrhyme says, "Nobody but the farmer knows, where oats, peas, beans and barley grows," according to A. B. Leeper, director of fruit and vegetable marketing for the I. A. A., in addressing the last meeting of the farm bureaus of the 16th district at Wyoming.

A. B. Wright

"The many different kinds of crops produced in Illinois calls for much versatility on the part of I. A. A. officials if they are to serve every branch of the agricultural industry in the state," declared Mr. Leeper.

Committee Is Working

"A committee of the I. A. A. is now investigating the possibilities of roadside marketing in Illinois and considering some plan of standardization and inspection whereby those who so desire, and will meet the requirements, may obtain standard signs with which to announce to the public that theirs is a market approved by the I. A. A., the Farm Bureau, or such other agency as may have supervision, the idea being to assist producers and protect customers," Mr. Leeper further announced.

The necessity for more business in agriculture today was emphasized by Secretary Geo. A. Fox. "The I. A. A. is endeavoring to assist its membership in every way possible," he said. He touched on legislative questions, especially the Lants revenue amendment, providing for more equitable taxation methods, which is now referred to the vote of the people of Illinois, and to the subject of a gasoline tax, which will be pushed vigorously in the next General Assembly.

A. R. Wright of Varna is executive committeeman of this district.

Chicago Producers to Refund 25 Per Cent of Commissions This Year

Patrons of the Chicago Producers will be receiving a refund check amounting to 25 per cent of the commission charges in the near future, it has been decided by the board of directors.

"As you are all aware," an official statement of the Chicago cooperative live stock marketing agency reads, "receipts of live stock this past year have shown a considerable decrease and prospects are for light supplies for the immediate future. The board of directors, taking these facts into consideration, voted to return a refund of 25 per cent to member shippers on this year's business and to set aside another fund in the reserve, feeling that this is a sound business policy.

"The amount of the refund will not be definitely determined until after the auditors finish checking over our books, but it will be approximately $80,000. The refund will be handled in the same manner as last year, this office sending back total refund checks to the shipping associations and individual checks to straight-load feeders.

"If you have not already made application for membership, do so at once, for we are not allowed to refund to non-members."

The third year of the Chicago Producers was closed on June 19. During the year the co-op handled a total of 16,734 cars, of which 95,063 were cattle, 26,074 calves, 867,298 hogs and 164,152 sheep.

On the opening date in 1922, 15 employes gathered at the desk of Steve Doty, the manager, preparing to take care of the six loads which were received on the memorable first day. By the end of the week, the receipts had grown to 97 cars and the association was in that short space of time upon a paying basis. Three years later to the day, the receipts were 44 cars, or 10 per cent of the entire receipts at Chicago for the day. For the week which ended that day, the Producers' receipts were 244 cars, exactly 72 more than their nearest competitor.

More details as to the number sold for Illinois farmers during the fiscal year will be given in an early issue of the RECORD.

The Iowa Farm Bureau Messenger, official organ of the Iowa Farm Bureau Federation, recently blossomed out in eight pages and with advertising. It presented feature stories on questions of interest to farm bureau members and considerable news of Iowa farm bureau events.

JARDINE SITS IN WITH MIDWEST GROUP IN ITS MIDSUMMER DISCUSSION

Resolution Passed Urging A. F. B. F. to Fight Proposed Increase in Rail Rates; Secretary Fox on Program

A three hour conference with Secretary of Agriculture Wm. M. Jardine, brought to a close a two-day conference of Midwest state Farm Bureau presidents and secretaries on Saturday afternoon, July 11.

In addition to expressing the agricultural thought of the Midwest to the Secretary, the Midwest leaders on Saturday Secretary Jardine adopted a resolution urgently requesting the American Farm Bureau Federation to use every effort to prevent the proposed freight increase in western states.

Present at the regular midsummer meeting of the Midwest group were: Chas. E. Hearst, president of the Iowa Farm Bureau Federation; Ray L. Gribben, secretary of the Iowa Farm Bureau Federation; M. L. Noon, president of the Michigan State Farm Bureau; L. B. Palmer, president of the Ohio Farm Bureau Federation; W. H. Settle, president of the Indiana Farm Bureau Federation; S. H. Thompson, president of the Illinois Agricultural Association; Geo. A. Fox, secretary of the Illinois Agricultural Association; J. F. Reed, president of the Minnesota Farm Bureau Federation; C. B. Steward, secretary of the Nebraska Farm Bureau Federation, together with the president and officers and department heads of the American Farm Bureau Federation.

Commends Farm Bureau

Meeting with the Secretary of Agriculture on Saturday, the Midwest group frankly outlined the many problems affecting Midwest agriculture. The Secretary of Agriculture expressed the keenest appreciation of the Farm Bureau and the service it is rendering to agriculture. He emphasized the necessity of orderly production as well as orderly marketing and insisted that the farmers themselves must take the lead in solving their problem. He said, "The Department of Agriculture and Department of Commerce cannot take the lead. The farmers themselves must take the lead and then the government departments will give all of the aid within their power."

Speaking from his own observation at the end of an eight weeks' trip across the continent, the Secretary said:

"The agricultural situation in different parts of the country varies materially. The relative purchasing power of the farm products in terms of non-agricultural products stood in March at 91 per cent of the pre-war average, which is the highest point since 1920."

"The conference resulted in a much better understanding with the Secretary," said President Thompson. "We feel that we must pull together if anything worth while is accomplished."

Transportation Resolution Passed

The transportation resolution which was adopted after presentation of the transportation situation by J. F. Reed, chairman of the transportation sub-committee of the A. F. B. F. executive board, was as follows:

"In view of the action taken by the railroads in the western district in asking for an increase in freight rates on all commodities in-
